“ **GOOGLE IS A CRIMINAL EMPIRE** ”say investigators...

"Washington, DC - In this election year of leaks, hacks and whistle-blowers, indisputable evidence has come forward which proves that Google traded cash and internet experience manipulation for control of United States federal contracts, decisions, DOE "cleantech" cash give-aways, tax loop-holes and stock market advantages worth billions of dollars. The evidence includes recordings, emails and eye-witness testimony.

Even without the new evidence, escalating news stories had already begun exposing Google's shady hand in U.S. and international government boondoggling. From filling up federal offices with its own employees to the direct exchange of goods with White House staff to running massive attacks on targeted political adversaries; Google's VC's and executives are drunk with power, cash and corruption...."

"FOR THE GOOD OF SOCIETY, GOOGLE MUST BE TERMINATED AND ERASED FROM THE GLOBE..", Say public interest groups

From a recent news clippings and filings:

"...Google and it's investors organized, paid for and executed multi-million dollar attacks on individuals who competed with it or cooperated with law enforcement authorities against it. Google created and locked character assassination programs into the top spots on the internet that it controlled. Google paid politicians to manipulate black-lists and give it state and federal funds, while cutting off those very same funds for those it was attacking. In one case, Google ran one of the greatest scams in technology against a Bay Area entrepreneur in which Google took his technology, made billions of dollars from it and then used the Google-verse to try to destroy him. In the 2016 cases, Plaintiffs will use leaks, Congressional data, employee testimony and technical information from multiple national investigations to prove, beyond a doubt, that Google, and it's associates engaged in fraud, interference, anti-trust, defamation, bribery and overt intellectual property theft. While The New York Times article entitled: *"How Larry Page's Obsessions Became Google's Business"* implies that Google steals ideas, Wikis, like www.capitolcrimesquad.com, explore an even darker set of realities about Google..."

"In each and every case, 1.) Google staff and associates solicited Plaintiffs under the guise of "maybe we'll invest in your idea", 2.) copied the ideas, 3.) used Google's vast network resources to then defame Plaintiffs, on HR hiring databases and the public internet around the world, in order to prevent future competition by Plaintiffs and cut off Plaintiff funding 4.) then made billions of dollars off of the exact same product that Plaintiffs had launched years before Google had even thought of the product, according to Google's own internal records, emails, employees and government investigations. Google controlled a network of investment funds run by a group of "venture capitalists" who colluded with Google to control valuations, no-poaching cartels, black-lists of entrepreneurs who Google had *"borrowed" ideas* from, and regional deal making."

"How Screwed is Google? Even though Google had hundreds of billions of dollars of covert technology tools at it's disposal, the reality of modern technology is that the more you use it, the more you open up vast holes for guys like Guccifer and Snowden to walk through. The proof is in the pudding in Washington DC. The U.S. Government spent trillions of dollars trying to secure it's data and had men with machine guns, but teenage hackers gutted all of the background check files of the whole United States Government, and the entire Department of Energy, hundreds of times. On top of that, in trying to do sneaky hidden consumer data profiling, Google attached surreptitious data sets to every internet file and link they touched. Even Google can't now find and delete all of those footprints and they all lead right back to Eric Schmidt's and Larry Page's offices..."
