Aaron

Elon Musk earned a B.A. in physics and a B.S. in economics (concentrations: finance and entrepreneurial management) from the University of Pennsylvania. The degrees were awarded on May 19, 1997.

Subject: Elon Musk Graduation Information

Mr. Ozio,

Thanks for taking my call. I am interested in the University of Pennsylvania degrees that Elon Reeve Musk did or did not graduate with, and when. As I mentioned, I have read conflicting reports.

He is referred to here at "ELON MUSK, W'97":

<https://www.wharton.upenn.edu/wp-content/uploads/125anniversaryissue/musk.html>

But here he is "ELON MUSK W'95":

http://www.upenn.edu/gazette/1108/feature4_1.html

And here he is "Elon Musk (W'97, C'97)":

<https://upennstatesman.org/2018/10/04/the-case-for-elon-musk/>

Other sites claim he did not officially graduate at all. Any clarifying information would be greatly appreciated.

Best regards

Best regards,

Aaron
