'All the while I didn't see one of my babies for five months. And this is only what can be said publicly, since most of my experience these last years should remain behind closed doors.'

The statement is partially thought to allude to **Musk's disowning of his transgender daughter Vivian Jenna,** who he shares with first wife Justine Wilson.
Grimes previously stated that Musk's anti-trans comments were 'not [from] his heart' and shared public support for Vivian.

Musk sued for for custody of the children he shares with Grimes in Texas, where his businesses are headquartered.
Grimes then counter-sued filing a 'petition to establish parental relationship' in a California court, typically seen as the first step in suing for custody for unmarried parents.

She claimed that Musk was withholding access to her kids and even prevented them from seeing their terminally ill maternal grandmother.

A Travis County Clerk confirmed that the Texas dispute had been settled, but declined to give further details.
Grimes claimed the ordeal almost left her 'bankrupt' and unable to make new music.

My new s t is so elevated beyond that - after everything I've been thru - I am keeping the best of book 1 for the new stuff but I've never been better in my life than right now, and I spent a lot of my time off with babies getting in my ten thousand hours of creative writing and mastering the art which I've never had - but I think I'm in new sound design territory too, I feel like I found my Atticus Ross as well in my friend VADAKIN, and I feel like I have to follow the path I'm on. Having babies rips you apart and puts you back together. Babies are ten thousand philosophy classes of s t you can only learn from that experience. Spent a year locked in battle in a state with terrible mothers rights having my instagram posts and modeling used as reasons I shouldn't have my kids and fighting and detaching from the love of my life as he becomes unrecognizable to me, with a fraction of his resources (or iq/ strategy experience), all the while I didn't see one of my babies for 5 months. And this is only what can be said publicly, since most of my experience these last years should remain behind closed doors. Poetry and pure raw emotion are pouring out of my soul at a rate I've never known, and Im improving deeply as a producer past the technical and back to the art
