Explaining the endemic criminality of the big tech oligarchs and RICO-violating elitists from the Bay Area

The cultural characteristics in criminology profiling of the racketeering-oriented organized crime groups of the San Francisco Bay Area reveal the following systemic standards more often than not:

They cheat on their taxes at the expense of civic public schools, firemen and nurses salaries. Their business tax evasion schemes are bigger than Al Capone's was. Their off-shore money laundering keeps a large portion of the Cayman Islands in business.

They usually have either a mistress, gay-sex rent boys, tons of hookers, are cheating on their spouse or all of the above.

They lie about who actually created their tech company and steal the credit from their workers or those they copied their technology from.

They bribe local and state politicians and own most of the mid-California Senator's like dogs-on-a-leash.

They talk co-eds from Stanford University into becoming escorts and ruin the lives of those girls forever.

When they went to Stanford University they used to date-rape girls in organized rape-culture schemes organized with the help of Stanford frat houses.

They each have a fake 501C scam "charity" to hide their money in and keep their trophy wives occupied while they are screwing their interns and nannies at the Rosewood Hotel.

They are almost all alcoholics and addicted to drugs and not one of them can pass a full-panel drug test.

They pay bribes to get their snot-nose kids into Stanford where those kids sign up for some BS diploma, that nobody will ever hire them for, but they want it because it sounds good in coffee houses, where they all sit like clones with the exact same lip and nose ring and the exact same tattoos.

They are narcissists and sociopaths like Elon Musk and Tim Draper and come from dynastic asshole parents who promote such behavior (ie: Elon Musk's trophy wife racist mother and his incest promoting father who got his sister pregnant.)

They hire Wilson Sonsini, Mossack Fonseca, Black Cube, Fusion GPS and other lobbyists, lawyers and staff, who are actual criminals, that do their dirty work behind the scenes.

They hate anyone who is black or brown unless they are working in their gardens.

They abuses their staff. Their Stanford frat house boy culture left them all with latent homosexual angst.

They treat women like tools, trophies and "baby ovens" and beat women. The divorce court filings in the pacer.gov database prove that 90% of them are sick, twisted, animals.

They all wear the same khaki pants because they want to appear "humble" and hang out in little sports bar groups because they cannot exist without 6 other asshole guys standing next to them reinforcing their

misogyny.

They date rape OKCupid and Match.com girls using Ruffies, Turbo-Oxytocin sprays, Scopalomine and tweaked LSD that only they can afford.

They buy more stuff than they can afford leverage themselves out because outward appearances is all that they live for. They are entirely focused on superficial appearances and virtue-signaling pretensions like the espose at TED conferences, Burning Man self-indulgence rituals and stupid "Singularity Events".

They always fake and exaggerated "mugging" facial expressions and reactions when interacting in public.

They won't do business with anyone outside of the Yale/Stanford frat-boy circuit cartel and run an active Black-List to stop people they don't like from getting hired or funded!

They were trained by asshole parents to be an "asshole" or "douchebag" in order to maintain self-esteem.

They are easily brainwashed by echo-chambers and TED-like self promoting tech events.

Their names and shell companies turn up a large number of times in the Swiss Leaks, Wikileaks, Panama Papers and other financial crimes exposures.

They only get married for the "optics" so that they will superficially fit into their frat boy social bubble.

They feel compelled to join exclusionary "mens clubs".

They moved some of their venture capital offices from Palo Alto's rape factory on Sandhill Road to South Of Market San Francisco but they then turned San Francisco into a more corrupt city.

They buy a virtue-signaling over-priced exploding Tesla to make up for their feelings of sexual inadequacy and to say that they are rich but care about a tree, except they don't.

CHECK BACK FOR MORE TO COME. ALL MATERIALS HAVE BEEN PROVIDED TO THE FBI, THE U.S.CONGRESS, THE EU, THE FTC, THE SEC, THE FEC AND RELATED AGENCIES...

U.S. House of Representatives

Committee on Oversight and Government Reform

Darrell Issa (CA-49), Chairman

The Department of Energyâ s Disastrous Management of Loan Guarantee Programs

STAFF REPORT

U.S. HOUSE OF REPRESENTATIVES

112

TH

CONGRESS

March 20, 2012

Executive Summary

After conducting a substantial review of the Department of Energyâ s (DOE) loan guarantee program, it is clear that the significant losses absorbed by taxpayers as a result of Solyndraâ s collapse is just the beginning. The investigation conducted by the House Committee on Oversight and Government Reform has uncovered numerous examples of dysfunction, negligence and mismanagement by DOE officials, raising troubling questions about the leadership at DOE and how it has administered its loan guarantee programs.

By the expiration of Â§ 1705 program in September 2011, the DOE had approved 27 projects totaling more than $14.5 billion in guaranteed loans. Inexplicably, DOE management has turned a blind eye to the risks that have been glaringly apparent since the inception of the program.

This report will demonstrate how DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. The Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances demonstrating that when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration.

DOE has overseen a process wrought with misdirection, changing and expanding requirements, unexplained delays, gross mischaracterizations, and a never-ending cycle of excuses. Not only does it appear that DOE purposely directed taxpayer funds at a failing enterprise, DOEâ s action robbed taxpayers of genuine investment toward renewable energy.

3

Key Findings

â ¢ The Committee has identified a pattern indicative of poor management and a bias toward unconstrained lending that resulted in the creation of a high risk, speculative and

undiversified loan portfolio that could ultimately result in substantial loss of taxpayer dollars. (pg. 3)

â ¢ From the very inception of the program, warnings signs existed pointing to a likely loss of taxpayer dollars that went ignored by Administration officials. (pg. 7)

â ¢ DOE invested a disproportionate amount of its funds into solar technology leaving taxpayers vulnerable by overemphasizing a single technology. 16 of the 27 1705-backed projects employed solar technology â that represented 80 percent of DOEâ s funds. (pg. 7)

â ¢ The billions of dollars in loan guarantees and cash grants directed at a Spanish firm, Abengoa, reveal the excessive risks associated with directing that volume of subsidy to a single firm. Abengoa managed to obtain a DOE loan commitment for the lowest rated project across the entire DOE Junk portfolio â which received an extraordinarily low CCC rating and was still approved by DOE for a direct loan to the project. This overinvestment in this single firm will likely cause substantial harm to the taxpayer. (pg. 12)

â ¢ DOEâ s failure to diligently oversee costs and set prudent limitations on executive compensation while it distributed billions of dollars in loan commitments has created a significant moral hazard that has created enormous risks for DOE and taxpayer funds. (pg. 14)

â ¢ Beacon Power Corp, the second recipient of a Â§ 1705 loan guarantee, paid three executives more than a quarter million dollars in bonuses in March 2010. Eighteen months later, Beacon declared bankruptcy â leaving taxpayers to repay the loan. (pg. 13)

â ¢ BrightSource Energy, recipient of a $1.6 billion loan guarantee to build a solar generation facility, has spent more than $56 million on a desert tortoise relocation program. BrightSource has indicated that the exploding cost of tortoise relocation program threatens to derail the entire $1.6 billion project â leaving taxpayers on the hook for the enormous sums on money spent on construction thus far. (pg. 14)

â ¢ DOE has engaged in a disturbing pattern of suspending the approval of a credible project that adheres to all stated standards, only to later approve massive funding for a project proven to be nowhere nearly as far along in the process as DOE purported. DOEâ s favoritism significantly harmed numerous companies that had relied on the promise of 1705 financing. The perception is that DOE actively misleads applicants about the status of their loan application, thereby encouraging these firms to misallocate capital, which has led to financial harm. (pg. 17-19)

4

â ¢ DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. The Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances showing that when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration. (pg. 22)

â ¢ Substantial evidence indicates that in two cases officials in the Loan Programs Office deliberately mischaracterized substantively identical technologies as dissimilar. Additionally, there is evidence that applicants, with the encouragement of department officials, intentionally mischaracterized their projects as â innovativeâ in an effort to access the Federal Financing Bank and defeat these prudential requirements. (pg. 23-28)

â ¢ There appears to be a significant amount of evidence indicating that DOE manipulated analysis and strategically modified evaluations in order to issue loans to First Solar that would qualify under the statutory guidelines. An application that should otherwise fail, but instead passes under improper influence and through manipulation of analysis, results in the defrauding of taxpayers and misappropriation of assets. (pg. 32)

â ¢ DOE Violated the Statutory Requirement that Projects Commence Construction by September 30, 2011. (pg. 32)

â ¢ In almost every public statement about its loan guarantee program, DOE touts job creation. DOEâ s Loan Programs Office webpage proudly proclaims that DOE expects the loans and loan guarantees to â employâ over 60,000 people. The site also breaks down the number of jobs created or saved by each loan or loan guarantee, and issues press releases for specific projects discussing job creation. These figures are misleading and attempt to pass off jobs that already existed as new jobs. (pg. 37-40)

â ¢ Solopower accepted $40 million of Oregon taxpayer money in addition to DOEâ s approval of a $197 million loan via the Federal Financing Bank (FFB). They received this federal assistance despite a rather dire prediction of Solopowerâ s prospects by Standard & Poorâ s (S&P) which predicted that Solopower will fail to meet its debt obligations. (pg. 47)

â ¢ Despite warnings from both S&P and its own internal analysis regarding risky business models, DOE proceeded with a $25 million grant for Beacon Power. In April 2010, S&P evaluated the loan guarantee project and assigned it a dismal CCC+ credit rating noting that â Beacon is currently an unprofitable start-upâ and that â significant exposure to commodity price volatilityâ could significantly hurt the company. S&P ran two default scenarios, both of which demonstrated that taxpayers would lose millions. (pg. 49)

5

â ¢ Fitch Ratings evaluated the Abound Solar project, which was approved for a $400 million conditional loan guarantee, and assigned it a junk credit rating. Fitch gave the project a credit rating of â Bâ (worse than Solyndraâ s) with a recovery estimate of only 45%. Fitch labeled the project â highly speculativeâ and described Abound as lagging in technology relative to its competitors, failing to achieve stated efficiency targets, and expecting that Abound Solar will suffer from increasing commoditization and pricing pressures.

Abound Solar announced on March 1

st

that it would stop producing solar panels and

would fire 180 employees, even though it has already received $70 million from DOE.

(pg. 50-51)

â ¢ On June 15, 2010, DOE announced that it would conditionally issue a $98.5 million partial loan guarantee to Nevada Geothermal Power Company. The loan did not finance any new construction and therefore did not help to create a single new job. Yet, in the press release for the project, Secretary Chu and Senate Majority Leader Harry Reid touted Blue Mountainâ s potential, with Senator Reid stating, â I am glad to see economic recovery funding being used to put Nevadans to work on a project that will help us achieve energy independenceâ ¦â DOEâ s awarding of this loan guarantee raises questions about why DOE was investing significant taxpayer resources in an entity with well-established financial difficulties. Nevada Geothermal has a well documented history of major financial problems. By the time DOE conditionally approved the loan guarantee, Nevada Geothermal had already violated contract terms and debt covenants relating to financing from its primary lender, TCW. According to Nevada Geothermalâ s financial statements, the firm would not avoid default without the benefit of a loan guarantee. (pg. 53-54)

6

I. Introduction

A. A History of Federal Government Loan Guarantees

For decades federal loan guarantees supported a variety of policy objectives, â including home ownership, university education, small business growth, international development, and others.â

1

In 1976, the Congressional Budget Office (CBO) defined loan guarantees as â a loan or security on which the federal government has removed or reduced a lender's risk by pledging to repay principal and interest in case of default by the borrower.â

2

Loan guarantees supporting

â cleanâ energy-related projects began in the 1970s as a response to the perception of record high oil prices for the foreseeable future and the notion that the country was in the midst of an â energy crisis.â

3

The Energy Security Act of 1980 authorized $20 billion for the development of a synthetic fuels industry via a new government enterprise, the U.S. Synthetic Fuels Corporation (SFC).

4

Loan guarantees were among the public finance tools available to SFC. The Great Plains coal gasification project was the only one of the five SFC projects to utilize a loan guarantee. The Great Plains project (located in Beulah, ND), â which converts lignite coal into pipeline-quality methane (the primary component of natural gas), received a $2 billion federal loan guarantee (approximately $1.5 billion of the loan guarantee was actually used) to construct the plant.â

5

Because the value proposition of the project hinged on gas prices remaining high for a long period of time, in 1985, when gas prices dropped below the level at which Great Plains was cost competitive, the project â was not able to meet debt service requirements and subsequently defaulted on its loan obligations.â

6

The Office of Alcohol Fuels at DOE, created by the Energy Security Act of 1980, had the authority to issue $265 million in loan guarantees for projects related to alcohol fuels.

7

Three

projects received loan guarantees. Of them, â one had to refinance its loan, one experienced

technology performance complications, and one ceased operations.â

8

After the failures of loan

guarantees via the Energy Security Act of 1980, clean energy loan guarantees were not again

funded until the American Recovery and Reinvestment Act of 2009.

9

A recent report from the Congressional Research Service points out that in 1976 the

Congressional Budget Office (CBO) identified inherent problems with loan guarantees that were

relevant then and are still relevant today. The background paper, titled â Loan Guarantees:

1

PHILLIP R. BROWN, CONGRESSIONAL RESEARCH SERVICE, LOAN GUARANTEES FOR CLEAN ENERGY

TECHNOLOGIES: GOALS, CONCERNS, AND POLICY OPTIONS (Jan. 17, 2012), available at

9

Title XVII of the Energy Policy Act of 2005 created the renewable energy loan guarantee program at the

Department of Energy but did not provide funding for loan guarantees. See generally 42 U.S.C. Â§Â§ 16511-16514.

7

Current Concerns and Alternatives for Control,â explains that loan guarantees disorient risk

evaluation:

When commercial lenders originate loans that are guaranteed by the government, these lenders may be more concerned with the adequacy of the loan guarantee agreement than by the actual risk of the project. As a result, projects may not receive an adequate amount of due diligence by the lender, therefore increasing the federal government's risk exposure.

10

The CBO also notes that â while such guarantees reduce the risk of loss to lender and borrower, they cannot reduce the project's risk of economic failure.â

11

Furthermore, the paper explains that loan guarantees can be attractive to Congress because the costs, on paper, appear small but fail to fully account for unforeseen risks.

12

Failing to heed these warnings has led to widespread taxpayer losses from loan guarantees, from Great Plains in 1985 to Solyndra and Beacon Hill in 2011.

B. An Overview of the DOE Section 1703 and 1705 Loan Programs

Congress first authorized the Department of Energyâ s Loan Guarantee Program under title XVII of the Energy Policy Act of 2005.

13

The program purportedly incentivizes energy innovation by making it easier for companies to secure loans for projects that employ new technologies to promote energy efficiency, renewable energy, and advanced transmission.

14

Section 1703 specifically authorizes the Secretary of Energy to make loan guarantees for projects

that employ innovative technology to reduce greenhouse gas emissions.

15

To date, the DOE has

conditionally approved three projects under Â§ 1703, totaling $10.4 billion in guaranteed loans.

16

The American Recovery and Reinvestment Act of 2009 significantly expanded the

Secretaryâ s loan guarantee authority under a newly-created Â§ 1705.

17

This section authorized the

Secretary to issue loan guarantees for renewable energy projects â including those employing

non-innovative technologies â that commenced construction no later than September 30,

2011.

18

10

Brown, supra note 1.

Additionally, in contrast to loan guarantees issued under Â§ 1703, the project sponsor did not have

to pay for the cost of the loan guarantee because the government covered the credit subsidy

18

42 U.S.C. Â§ 16516(a)

8

costs.

19

The short timeframe for eligibility and the congressional appropriation of the credit subsidy cost reflect Â§ 1705â s primary purpose: economic stimulus.

20

The DOE issued its first Â§ 1705 loan guarantee solicitation on July 29, 2009.

21

By the expiration of Â§ 1705 program in September 2011, the DOE had approved 27 projects totaling over $14.5 billion in guaranteed loans.

22

The DOEâ s Loan Programs Office awards and administers loan guarantees under three sets of official rules: the statutory requirements of Â§ 1703 and 1705, the departmental regulations issued pursuant to statute, and the departmentâ s formal solicitations for loan guarantee applications.

23

This initial report focuses on the Department of Energyâ s portfolio of loan guarantees issued under Â§ 1705 of Title XVII. These loan guarantees were issued under two solicitations which differed in their eligibility requirements and financing method. The first solicitation targeted projects that employed innovative technologies.

Naturally, these rules describe the eligibility requirements with increasing specificity. The redundancy and specificity of these criteria testifies to their importance; such prudential regulations make the difference between responsible stewardship of the program and a taxpayer-financed earmark.

24

Under this solicitation, the project

sponsor could acquire the underlying loan from U.S. government through the Federal Financing

Bank.

25

The second solicitation created the â Financial Institution Partnership Program.â

26

This

program accepted projects that employed non-innovative (i.e., already commercialized)

technology, but required the project sponsor to acquire the underlying loan from a private

financial institution.

27

Committee staff evaluated renewable energy projects that received loan commitments

from DOE or from private lenders partnering with DOE. Staff identified a pattern indicative of

poor management and a bias toward unconstrained lending that resulted in the creation of a high

risk, speculative and undiversified loan portfolio. In this report, we consider all aspects of loan

commitments in the context of the broader marketplace to reveal the extent of the risk taxpayers

face as a result of competition within the domestic energy industry and the global renewable

energy industry.

9

The Advanced Technology Vehicle Manufacturing (ATVM) Program was created in 2008 as part of Â§ 136 of the Energy Independence and Security Act of 2007.

28

According to the U.S. Department of Energy (DOE), the purpose of the ATVM Program is to provide â direct loans to support the development of advanced technology vehicles and associated components in the United States.â

29

The Energy Independence and Security Act set aside $25 billion for direct loans and appropriated another $7.5 billion to support these loans.

30

To qualify for a direct loan under the ATVM Program, the project and the sponsoring company must meet several criteria. First, in order to be eligible for a loan a company must either manufacture an advanced technology vehicle (ATV) or manufacture components for ATVs. Companies must also be

â financially viable without the receipt of additional federal funding for the proposed project

other than the ATVM loan.â

31

DOE defines â advanced technology vehicleâ as a light duty

vehicle that meets Clean Air Act regulations established by the U.S. Environmental Protection Agency (EPA) and is 125 percent of the average of the Corporate Average Fuel Economy (CAFE) for similar vehicles.

32

The loan must finance the reequipping, expanding, or

establishing of a manufacturing facility in the United States or the costs of engineering integration performed in the United States.

33

As of February 2012, the ATVM Program loaned $8.3 billion to five projects.

34

Most

notably, two of the largest companies in the country, Ford Motor Company and Nissan North America, received over $7.3 billion to retool and upgrade manufacturing facilities for vehicles that were deemed ATVs by DOE.

35

Fisker Automotive and Tesla Motors received $529 million

and $465 million, respectively, from the ATVM program.

36

Fisker produces plug-in hybrid

electric vehicles in a manufacturing plant in Delaware.

37

Its first vehicle, the Karma, costs well

over $100,000 to purchase.

38

Tesla produces three models of plug-in electric cars at its

manufacturing plant in California. Finally, The Vehicle Production Group LLC received a $50

million loan to support the creation of a factory-built wheelchair vehicle that runs on compressed

natural gas.

10

advanced high strength steel (AHSS) used to make component parts for ATVs.

40

Almost 100

companies have applied for loans through the program; however, an overwhelming majority still await a decision from DOE on the status of their applications.

41

II. The DOE Portfolio of Loan Commitments

DOE committed to issuing 27 loans or loan guarantees under the Â§ 1705 program. These loan commitments total in excess of $16 billion. At the outset, the ratings agencies rated 23 of these loans as non-investment grade categories, also known as â Junk,â due to their poor credit quality, while the other four were rated BBB, which is at the lowest end of the â investmentâ grade of categories. Overall, DOEâ s 1705 portfolioâ s initial unweighted average rating was BB-, which is considered â Junk grade.â According to Fitch, a â BBâ rating is speculative and indicates an elevated vulnerability to default risk.

42

40

Press Release, Department of Energy Offers Severstal Dearborn, LLC a $730 Million Conditional Loan Commitment for Michigan Project, U.S. Depâ t of Energy, July 13, 2011.

Accordingly a BB- is on the low end of what are considered to be â speculative investments,â barely escaping the classification of â highly speculativeâ investments.

Within the range of non-investment grade credit risk, six of the Junk loans were rated at the lower tiers of the range. Specifically, these six projects or loans received ratings within either the â Bâ or â CCCâ categories under the Fitch or Standard and Poorâ s classifications. Despite lending to highly speculative and troubled projects, the government only charged those green energy firms its own cost to borrow money. In other words, the government sought no profit or compensation for credit risk. Given the extent of losses already apparent, the failure to seek any compensation for credit risk inevitably means the taxpayer will lose substantial

funds. This is distinguishable from normal business practices, where banks or investment firms charge a premium or require more upfront capital as a condition for agreeing to finance riskier projects; thus, if the project were to go completely under, the banks would have some capital to show for the losses.

A. DOEâ s High Risk Loan Portfolio

At an October 2011 press conference, after the collapse of Solyndra, President Obama commented on the 1705 loan portfolio saying that â we knew from the start that the loan guarantee program was going to entail some risk, by definition. If it was a risk-free proposition, then we wouldnâ t have to worry about it. But the overall portfolio has been successful.â

43

As this report reveals, it appears that taxpayer losses associated with Solyndra are just the tip of the iceberg. Clues warning of this risk have been apparent from the inception of the program. This does not bode well for the future of DOEâ s loan portfolio. Moreover, most of the energy projects funded under 1705 continue construction or just plan to begin construction. As projects proceed and spend their capital, additional weaknesses will be exposed and more loan recipients will begin to fail.

However, the risk conceded by President Obama is larger than he or Secretary Chu have publically acknowledged. Left unsaid is the continuing and mounting risks taxpayers face with each additional disbursement of funds.

Secretary Chu has done very little to mitigate these risks. In the first instance, DOE failed to abide by the number one investment rule of thumb â diversify your portfolio. Instead of making investments in a broad range of emerging technologies, DOE sunk 80% of its funds into either solar manufacturing or solar generation projects.

44

This overemphasis on one type of technology leaves taxpayers vulnerable to changes in the market for solar energy. After Solyndra collapsed, Energy Secretary Steven Chu claimed that â this company and several others got caught in a very, very bad tsunamiâ and then blamed China and the recession in Europe.

45

[C]hanges in business or economic conditions center upon the intermediate

and longer term pricing of PV solar panels which are now under extreme competitive pressures. Fitch expects PV pricing pressures throughout the term of the DOE loan and this factor will be the largest challenge facing Solyndra and the largest credit risk incurred in repayment of the Fab 2 loan according to its terms.

Secretary Chu neglected to mention the extraordinarily clear warning by Fitch Ratings (Fitch) prior to DOEâ s commitment. Specifically, Fitch stated:

46

As the above excerpt reveals, prior to approving Solyndra, Fitch warned DOE that extreme competition within the solar panel market threatened pricing of solar panels in the coming months and years and that this was the greatest risk to Solyndraâ s survival. Even

13

knowing this, DOE chose to invest billions of taxpayer dollars despite the clear warning - 16 of the 27 section 1705-backed projects employed solar technology,

47

In compiling this report, staff considered many troubling issues that deserve attention, yet, because of the magnitude of problems associated with this program, only a share of the concerns could be investigated. Committee staff, therefore, considers this an initial report. The following sections examine the various actions that DOE took while building its financially vulnerable portfolio that jeopardizes billions in taxpayer funds.

the very technology that

experts were warning about. These loans for solar projects totaled more than $13 billion â more than 80% of the total portfolio. DOE also concentrated its investments in two solar companies in particular, Abengoa and First Solar, to such an extent that financial troubles with either company would affect a significant portion of the loan portfolio. In addition to over investing in solar, the Federal government also permitted â double dipping,â wherein a company received multiple federal grants and loans to cover the cost of a project, thereby reducing the companyâ s â skin in the game.â DOE also allowed large and financially sound parent entities to undercapitalize their loan guarantee projects, which effectively shifted the risk away from the company to the taxpayer. It appears that for most DOE loan recipients, a low cost loan, in and of itself was insufficient to attract private investors.

B. Major Risk Factors to the Loan Portfolio

1. Falling Natural Gas Prices Hurt Renewable Projects

In addition to the poor credit risk determinations of 1705 recipients, the falling price of

natural gas poses a material risk to the sustainability of these renewable energy projects. This section of the report attempts to explain how the market for natural gas has evolved and how it interacts with the market for renewable technologies.

Advances in hydraulic fracturing (â fracking â) technology over recent years dramatically improved domestic natural gas and natural gas liquids production. Over the past few months, in particular, this increase in production resulted in an extraordinary decline in the domestic price of natural gas, substantially widening the efficiency gap between fossil fuels and renewable technologies.

48

In other words, natural gas has become so cheap that other energy technologies are having difficulty competing, even after federal subsidies.

The high price of oil incentivizes fracking for natural gas liquids, which supply valuable raw materials to oil refiners.

49

In areas where fracking produces both natural gas and gas liquids, frackers often produce natural gas at a loss, but, in the aggregate, profit due to the high price of gas liquids.

50

47

U.S. Depâ t of Energy, Loan Program office, Our Projects, available at https://lpo.energy.gov/?page_id=45

This unique result reduces the responsiveness of natural gas producers to the price

14

of natural gas. This ability to continue to profit from the premium price of gas liquids changes the economics of natural gas production enabling a secular decline in natural gas prices.

The resulting low natural gas price reduces the market price for power generation in most areas, as natural gas fired generators usually set the market clearing price. Below is a chart reflecting natural gas prices since 1992.

51

Todayâ s low prices for natural gas have not been seen

1770

since the 1990â s and, when adjusted for inflation are at historically low levels. While this is good news for consumers of electricity who will benefit from lower rates, this is bad news for the renewable energy industry.

a. Low Natural Gas Prices Reduce Power Purchase Agreement Revenues for Renewable Projects

As natural gas powered generation provides the market clearing price in most regions within the United States, the recent drop in natural gas prices lowered market prices for power. These falling power prices reduce the expected value of anticipated Power Purchase Agreements (PPAs), which are agreements that provide power purchasers, such as utilities and suppliers of energy, such as renewable energy generators, with certainty over future prices. The energy industry relies on PPAs to manage risks associated with the purchase and sale of power. The pricing of PPAs largely depends on expectations with regard to future power prices. The recent

51

Federal Reserve Bank of St. Louis, Economic Data, Natural Gas Price: Henry Hub, Louisiana, available at http://research.stlouisfed.org/fred2/series/GASPRICE

collapse in natural gas prices reduced the potential revenue for PPAs that have not yet been executed.

Lower natural gas prices increase the risks of renewable energy projects that have not yet entered into long term contracts to sell the power they expect to generate because buyers of their product now have cheaper options. Project Amp and other projects that fail to meet benchmarks necessary to maintain a PPA, suffer the risk that they cannot negotiate agreements sufficient to support the cost of the renewables project, even with the benefit of multiple substantial subsidies.

Accordingly, it is reasonable to expect utilities to seek an exit from expensive PPAs whenever the renewable company fails to meet certain benchmarks, whether those benchmarks relate to commercial operation date, insufficient output, reliability or other variables. In other words, given the falling price of power in areas where natural gas is the marginal supplier, it is reasonable to expect revenues from risky renewables projects to be at risk to these falling power prices. If a PPA with a solar producer reflects a price based on markets where $4.00 per million British thermal unit (MMBtu) of natural gas was prevalent, the utility paying for that solar power might act on any opportunity to renegotiate or exit the unprofitable PPAs now that natural gas prices are below $3.00. Specifically, as DOE-backed projects come online over the next few years, any failure to meet the production or capacity requirements stated in the PPA may enable the power purchaser to exit or renegotiate the contract, subjecting the renewable project to lower power prices, and thus lower revenues for the company than was predicted at the time DOE negotiated the loan agreement.

In other words, given that power prices have fallen since these projects executed PPAs, there is substantial risk that the power purchasers will find a way out from the PPAs they entered into with the renewable projects. A PPA provides the renewable project security that it will earn a specific amount of revenue. If a party, such as a Utility, that is purchasing power from the renewables project can find a way out of the PPA, this places the revenue of the project at risk. If the renewable projects are forced to renegotiate at current market prices, they will suffer a substantial loss of revenue.

This is particularly concerning in the case of newer technologies, where many of these projects may fail to achieve target operation dates, or may not generate as much power as the contract requires simply as a matter of not having enough experience with the newer technology. Given this risk, many of these projects face the danger of losing the benefit of a higher priced PPA. One good example comes from the recent reports that First Solarâ s solar panels are suffering higher failure rates in the desert. This unexpected underperformance will reduce the output of

their plants. Such output is a key performance variable considered in the PPA.

b. Low Gas Prices Reduce Demand for Solar Panels

Falling market prices for power as described above impacts all aspects of renewable projects. Despite solar panel prices, the demand for solar panels declines as the relative economic benefits of their installation fall. Solar companies currently suffer from excessive competition in panel manufacturing, and also likely face decreasing demand as a result of the competition from cheaper natural gas generation. To the extent low natural gas prices persist,

16

this represents a sea-change that threatens the viability of all solar manufacturing investment that DOE and Treasury subsidized.

2. DOEâ s Failure to Diversify

a. DOE Overinvests in Solar Manufacturing despite Ample Warnings

DOE should have averted some of the risks it created in its portfolio by diversifying its investments across renewable energy technologies. DOEâ s investment in multiple solar manufacturers added to a heated global competition that was already creating an excessive supply of solar panels. These manufacturers were forced to compete both against each other and other solar companies worldwide. As a result, the average selling price per watt for solar panels has continued its decline.

Despite Solyndraâ s fall, there remains excessive competition in the manufacturing of solar panels. Just this past month, both Abound Solar and First Solar cut solar panel production globally, reflecting this excessive supply and heated competition.

52

While U.S. solar generation projects can take advantage of falling panel prices to offset a share of the impact of reduced power prices, it appears solar manufacturers that suffer both supply and demand shocks can only survive through continued provision of subsidies. Unfortunately for these manufacturers, there is

growing evidence that the subsidies are drying up.

With regard to subsidies on a global scale, Germany, the leader in solar subsidies, having invested over $130 billion to date, is now giving up the habit. According to news reports:

Germany once prided itself on being the â photovoltaic world championâ , doling out generous subsidiesâ totaling more than $130 billion, according to research from Germanyâ s Ruhr Universityâ to citizens to invest in solar energy. But now the German government is vowing to cut the subsidies sooner than planned and to phase out support over the next five years. What went wrong?

Using the governmentâ s generous subsidies, Germans installed 7.5 gigawatts of photovoltaic capacity last year, more than double what the government had deemed â acceptable.â It is estimated that this increase alone will lead to a $260 hike in the average consumerâ s annual power bill.

According to Der Spiegel, even members of Chancellor Angela Merkelâ s staff are now describing the policy as a massive money pit. Philipp RÃ¶sler,

52

Cassandra Sweet and Ryan Tracy, Loan Reicipient Abound to Cut Jobs, Retool Colorado Factory, WALL ST. J., Feb. 29, 2012, available at http://online.wsj.com/article/BT-CO-20120229-719672.html; Ehren Goossens, Solar Suppliers Head for First Demand Drop as Subsidy Cut, B LOOMBERG NEWS, Mar. 9, 2012, available at http://www.bloomberg.com/news/2012-03-09/solar-panel-sales-seen-dropping-first-time-in-decade-feeding-glut-energy.html

17

Germanyâ s minister of economics and technology, has called the spiraling

solar subsidies a â threat to the economy.â

53

The ratings agencies fully informed the DOE of their expectations for falling panel prices due to excessive global competition. Both Germany and the U.S. appear to be phasing out subsidies over the coming years, and this should eventually help reduce the excessive supply; however, it does so at the expense of the subsidized solar firms. In other words, the apparent cure to the oversupply is the outright shuttering of a large share of solar panel manufacturers worldwide.

b. DOE Overinvested in Abengoa and First Solar Projects

As DOE failed to diversify the portfolio sufficiently across industries, DOE also failed to diversify across award recipients. A single Spanish firm, Abengoa, received an aggregate $2.45 billion in loans and loan guarantees plus $818 million in Treasury cash grants.

54

This reveals

excessive risk and subsidies provided to a single firm via multiple subsidiaries. Abengoa has a credit rating of BB, which is considered Junk, thus making this concentration of investment in one company speculative and highly questionable. Exemplifying the risk DOE took in the case of Abengoa, Abengoa managed to obtain a DOE loan commitment for the lowest rated project across the entire DOE Junk portfolio; Abengoa Bioenergy Biomass of Kansas received an extraordinarily low CCC rating and yet the DOE approved a direct loan to the project.

r_power_subsidies_.html

54

See FitchRatings credit report for Mojave Solar, LLC, dated July 27, 2011, where DOE committed to an $862

million loan and Treasury committed to a $340 million grant; FitchRatings credit report for Abengoa Solar, Inc.â s

Solana Generating Station, dated December 2, 2010, where DOE committed to a $1.445 billion loan guarantee and

the Treasury committed to a $455 million grant; and, FitchRatings credit report for Abengoa Bioenergy Biomass of

Kansas, dated August 26, 2011, where DOE committed to a $130 million loan and Treasury committed to a $23

million grant.

55

See FitchRatings credit report for Abengoa Bioenergy Biomass of Kansas, dated August 26, 2011.

18

Abengoaâ s prospects look dim due to its investments in Europe, particularly Spain, and suffer the risk of declining subsidies as Spain contends with its own declining credit quality and the potential need for a bailout of its own government in the coming months or years. Now that Germany and Spain cut back solar subsidies, this will undoubtedly harm the European renewable

investments of Abengoa.

56

3. DOE Allowed â Double Dippingâ â Multiple Subsidies to Single Projects

Even if Abengoa investments initially appeared attractive to DOE,

overinvestment in this single firm will likely cause substantial harm to the taxpayer. DOE similarly overinvested in First Solar, as we describe in Section III; the taxpayer will undoubtedly suffer losses from that investment as well.

The junk quality loan portfolio of loan guarantees amassed by DOE reflects funding that substantially exceeds the amounts loaned by DOE. To understand the full extent of funds invested into these renewable firms, all state and federal subsidies need to be considered. For example, most of the 1705 projects benefitted from multiple enormous subsidies, such as grants that covered a third of the cost to build a generation facility, low interest DOE loans, state subsidies, beneficial access to power grids and mandates that require renewable production

56

See Ben Sills, Spain Halts Renewable Subsidies to Curb $31 Billion of Debts, BLOOMBERG NEWS, Jan. 27, 2012,

available at http://www.bloomberg.com/news/2012-01-27/spain-suspends-subsidies-for-new-renewable-energy-plants.html. See also Germany to Axe Solar Panel Installations by More than Half in 2012 (Jan. 19, 2012),

available at http://www.greenworldinvestor.com/2012/01/19/germany-to-axe-solar-panel-installations-by-more-than-half-in-2012/.

known as renewable portfolio standards. Such mandates result in premium pricing for power

generated by renewable technologies.

57

Even with the benefit of these massive government subsidies, DOE continues to hold a portfolio of â Junkâ grade loans and commitments. This defies the natural assumption that layer upon layer of government subsidies, and billions in costless equity should at some point cause an entity to become profitable; however, given the poor quality of the DOE portfolio, this has failed to occur.

4. DOE Allowed Large Energy Companies to Undercapitalize Projects and Shifted Risk to Taxpayers

Even when a company had significant assets to cover a project, DOE put the taxpayer at a greater risk because of the way they structured the guarantee. In four cases among the 27 loan guarantees and Federal Financing Bank (FFB) loans, the parent or project sponsor that sought the benefit of a loan guarantee or FFB loan had a credit rating significantly above that of the project itself. In other words, in four cases, the borrower undercapitalized the project and refused to extend a parental guarantee.

As a result, the taxpayer takes on greater risk, despite the borrowersâ ability to increase funding to the project. The most egregious use of this technique was in the case of Record Hill, LLC, where AAA rated Yale University created a project with a rating of only BB+. The idea that Yale would take a substantial taxpayer subsidy and still seek to protect its remaining assets from the liabilities of Record Hill reflects Yaleâ s view of the Record Hill project and its disregard for taxpayers. It is inconceivable that any normal bank would take these kinds of risk when loaning money. Banks traditionally insist on a number of provisions to â protectâ their investment. Yet DOE and Treasury did just the opposite, and essentially let these companies dictate terms favorable to them and not to the taxpayer. The result is when the company defaults on their obligations, the taxpayer is left with little to no remedy.

3. Systemic Risks from â Crony Capitalismâ and Wasteful Spending

There is evidence a number of loan guarantee recipients have engaged in clearly profligate spending. Such wasteful spending threatens the financial viability of the recipient companies, creating risks to both the DOEâ s loan commitment portfolio and taxpayer dollars. It is particularly troubling that this waste often takes the form of large cash bonuses to company executives â such payments feed the perception that taxpayer funds are being used to line the pockets of green energy executives.

Beacon Power Corp, the second recipient of a Â§ 1705 loan guarantee, paid three executives more than a quarter million dollars in bonuses in March 2010.

58

57

See M.J. Beck Consulting LLC, Renewable Portfolio Standards, available at http://mjbeck.emtoolbox.com/?page=Renewable_Portfolio_Standards (â With few exceptions, utilities are allowed to recover the additional cost of procuring renewable power.â); see also Katerina Dobesova, Jay Apt, and Lester B. Lave, Are Renewable Portfolio Standards Cost-effective Emission Abatement Policy? (Carnegie Mellon Electricity Industry Center, Working Paper CEIC-04-06), available at http://wpweb2.tepper.cmu.edu/ceic/pdfs/CEIC_04_06.pdf.

Eighteen months

later, Beacon declared bankruptcy, leaving taxpayers to repay the loan. Adding insult to this injury, these bonuses were explicitly linked to the executives securing the DOE loan guarantee.

Similarly, bankruptcy records show Solyndra doled out executive payments just months prior to its late August collapse and early September bankruptcy.

59

The Department appears to recognize the unacceptability of this crony capitalism. DOE has stated, â We take our role as stewards of taxpayer dollars very seriously, and as such, we will make clear to loan recipients our view that funds should not be directed toward executive bonuses when the rest of the company is facing financial difficulty.â

In Solyndraâ s case, former executives have stated that DOE explicitly allowed federal funds to be used to pay out executive bonuses.

60

Good government groups have severely criticized the DOEâ s administration of the loan guarantees with respect to executive compensation. Citizens Against Government Waste has stated that â [g]iving a bonus to the executives under these circumstances is rewarding failure with our money with no chance of getting it back. Taxpayers need some representation here. They didn't really get it.â

The DOE has not explained why they waited three years into the program to finally take this view, or what â if any â concrete steps they will take to protect taxpayer monies.

61

Wasteful spending is not limited to executive compensation alone. BrightSource Energy, recipient of a $1.6 billion loan guarantee to build a solar generation facility, has spent more than $56 million on a desert tortoise relocation program.

62

Furthermore, BrightSource will build 50 miles of intricate fencing, at a cost of up to $50,000 per mile, designed to prevent relocated

tortoises from climbing or burrowing back into the solar generation facility.

63

The DOEâ s failure to diligently oversee costs and set prudent limitations on executive compensation while it distributed billions of dollars in loan commitments created a significant moral hazard that has created enormous risks for DOE and taxpayer funds.

BrightSource has

indicated that the exploding cost of tortoise relocation program threatens to derail the entire $1.6 billion project â leaving taxpayers on the hook for the enormous sums on money spent on construction thus far.

C. Harm Posed to Our Economy

The DOE loan guarantee and ATVM loan programs may harm capital formation within the capital markets. As the government makes low cost loans available, private capital cannot compete with the subsidized low interest loans. As a result, many private investors and lenders cease to compete in the same space or may choose to invest in those subsidized firms that anticipate government loans. As intended, government subsidies redirect capital to less efficient

63

Id.

industries, causing a misallocation of capital. To the extent investors target subsidized firms, those funds that would have sought a more profitable opportunities that would have yielded greater efficiencies and benefits for the economy, instead invest in relatively less profitable industries, where the government subsidy compensates for the lost profit.

To the extent government loans programs proceed, the government must maintain the highest integrity in the allocative process. If government fails to impose a fair and impartial loan process that prioritizes genuinely eligible borrowers, then the government further misallocates capital within the subsidized industry, increasing economic harm. Relatively better businesses may suffer losses while waiting for subsidies that never materialize. Lower quality firms, with strong political ties, may succeed in gaining government support with inferior products, reflecting a multi-factored misallocation of capital.

The failure to maintain integrity and abide by the law when implementing the DOE loan program significantly impacts those that failed to receive subsidies as well.

On February 28, 2012, Bright Automotive announced it was shutting down operations. In a poignant and blunt letter to the Secretary, Bright Automotiveâ s management team laid the blame squarely on the unprofessionalism and mismanagement of the DOE loan guarantee program. Bright Automotive described a process wrought with misdirection, changing and expanding requirements, unexplained delays, gross mischaracterizations, and a never-ending cycle of excuses:

Bright Automotive

February 28, 2012

Secretary Steven Chu

U.S. Department of Energy

Washington, D.C.

Dear Secretary Chu,

Today Bright Automotive, Inc will withdraw its application for a loan under the ATVM program administered by your department. Bright has not been explicitly rejected by the DOE; rather, we have been forced to say â uncleâ . As a result, we are winding down our operations.

Last week we received the fourth â near finalâ Conditional Commitment Letter since September 2010. Each new letter arrived with more onerous terms than the last. The first three were workable for us, but the last was so outlandish that most rational and objective persons would likely conclude that your team was negotiating in bad faith. We hope that as their Secretary, this was not at your urging.

The actions â or better said â lack of actionâ -- by your team means hundreds of great manufacturing and technical jobs, union and non-union alike, and thousands of indirect jobs in Indiana and Michigan will not see the light of day. It

means our product, the Bright IDEA plug-in hybrid electric commercial vehicle, will not provide the lowest total cost of ownership for our commercial and government fleet customers, saving millions of barrels of oil each year. It means turning your back on a bona fide step forward in our national goal to wean America away from our addiction to foreign oil and its implications on national security and our economic strength.

In good faith we entered the ATVM process, approved under President Bush with bi-partisan Congressional approval, in December of 2008. At that time, our application was deemed "substantially complete." As of today, we have been in the â due diligenceâ process for more than 1175 days. That is a record for which no one can be proud.

We were told by the DOE in August of 2010 that Bright would get the ATVM loan "within weeks, not months" after we formed a strategic partnership with General Motors as the DOE had urged us to do. We lined up and agreed to private capital commitments exceeding $200M â a far greater percentage than previous DOE loan applicants. Finally, we signed definitive agreements with state-of-the-art manufacturer AM General that would have employed more than 400 union workers in Indiana in a facility that recently laid-off 350 workers. Each time your team asked for another new requirement, we delivered with speed and excellence. Then, we waited and waited; staying in this process for as long as we could after repeated, yet unmet promises by government bureaucrats. We continued to play by the rules, even as you and your team were changing those rules constantly â seemingly on a whim.

Because of ATVM's distortion of U.S. private equity markets, the only opportunities for 100 percent private equity markets are abroad. We made it clear we were an American company, with American workers developing advanced,

deliverable and clean American technology. We unfortunately did not aggressively pursue an alternative funding path in China as early as we would have liked based on our understanding of where we were in the DOE process. I guess we have only ourselves to blame for having faith in the words and promises of our government officials.

The Chairman of a Fortune 10 company told your former deputy, Jonathan Silver, that this program â lacked integrityâ ; that is, it did not have a consistent process and rules against which private enterprises could rationally evaluate their chances and intelligently allocate time and resources against that process. There can be no greater failing of government than to not have integrity when dealing with its taxpaying citizens.

It does not give us any solace that we are not alone in the debacle of the ATVM process. ATVM has executed under $50 million of transactions since October of 2009. Going back to the creation of the program, only about $8 billion of the

approved $25 billion has been invested. In the meantime, countless hours, efforts and millions of dollars have been put forth by a multitude of strong entrepreneurial teams and some of the largest players in the industry to advance your articulated goal of advancing the technical strength and clean energy breakthroughs of the American automotive industry. These collective efforts have been in vain as the program failed to finance both large existing companies and younger emerging ones alike.

Our vehicle would have been critical to meet President Obama's stated goal of one million plug-in electric vehicles on the road in 2015 and his commitment to buy 100 percent alternative fueled vehicles for the Federal Fleet. So, we are not the only ones who will be disappointed.

The ineffectiveness of the DOE to execute its program harms commercial enterprise as it not only interfered with the capital markets; it placed American companies at the whim of approval by a group of bureaucrats. Today at your own ARPA-E conference, Fred Smith, the remarkable leader of FedEx, made the compelling case to reduce our dependence on oil; a product whose price is manipulated by a cartel which has caused the greatest wealth transfer in our history from the pockets of working people and businesses to countries, many of whom are not our allies. And yet, having in hand a tremendous tool for progress in this critically strategic battle -- a tool that drew the countryâ s best to your door -- you failed not only in the deployment of funds from ATVM but in dissipating these efforts against not just false hope, but false words. For us, this is a particularly sad day for our employees and their families, as well as the employees and families of our partners. We asked our team members on countless occasions to work literally around the clock whenever yet another new DOE requirement came down the pike, so that we could respond swiftly and accurately. And, we always did.

Sincerely,

Reuben Munger Mike Donoughe

CEO COO

64

Bright Automotive is not alone in its frustration, as at least three additional companies, U.S. Geothermal, Inc., RenTech, and Tenaska, have suffered substantial harm at the hand of DOEâ s favoritism and blatant disregard of the law.

U.S. Geothermal, Inc.

U.S. Geothermal, Inc. submitted a DOE loan guarantee application for a geothermal power project in San Emidio, California. Like Bright Auto, U.S. Geothermal received several

â clear assurances the DOE considers San Emidio a priority project and that [the] credit review

64

Letter, Reuben Munger and Mike Donoughe, Bright Automotive, to the Honorable Steven Chu, Secâ y of Energy,

Feb. 28, 2012 (on file with author).

process could be accomplished within the required timeframe.â

65

Relying on these statements

and assurances, U.S. Geothermal took action to advance the project and ensure full readiness and compliance with DOEâ s stated requirements. The company incurred numerous expenses, including fees to legal counsel and engineers, as well as resources devoted to the completion of engineer reports and a term sheet.

66

Most significantly, consistent with a DOE requirement for

priority treatment within the 1705 program, U.S. Geothermal executed a 25 year PPA.

67

U.S. Geothermal has taken every step to ensure that the San Emidio project embodies the â qualityâ and â readinessâ requirements DOE has emphasized. The project, which â would be one of the smaller and more straight-forward transactions,â was ready to enter the credit approval process by May 2011, only to be abruptly notified that DOE decided to suspend work on this loan guarantee.

68

DOE, in a draft letter to U.S. Geothermal, stated â there are a number of projects that are closer to the conditional commitment stage than yours, and we expect these projects, if they reach financial close, to utilize all of our remaining appropriation.â

69

In this draft letter, Jonathan Silver further provided that â the decision does not reflect the merits of the project, but rather the timing and funding constraints of the program.â

70

According to its letter, U.S. Geothermal suffered substantial harm as a result of DOEâ s decision to violate the terms of its own program in providing loan commitments to ineligible projects. The company incurred significant expenses in its efforts to meet DOEâ s standards and secure the financing it needed to proceed. The greatest harm will result from the PPA U.S. Geothermal entered into in reliance on DOE statements, which now contractually obligates them to provide power for 25 years or suffer penalties.

This claim is dubious at best. As is revealed in Section III of this report, Project AMP failed to meet the eligibility requirement relating to commencement of construction; nonetheless, it received a $1.4 billion FIPP-based DOE loan guarantee commitment on September 30, 2011. Antelope Valley Solar Ranch failed to meet the â innovativenessâ requirement and the â one technology per sponsor rule.â Despite this, Antelope Valley succeeded in gaining a $646 million FFB direct loan commitment. These two projects consumed an enormous share of DOEâ s appropriation yet clearly were not â closer to the conditional commitment stage.â

71

According to U.S. Geothermalâ s letter, in the absence of a DOE loan guarantee, the terms of the PPA create a significant obstacle to obtaining commercial financing for their project going forward.

25

Rentech submitted a proposal for financing for its Northwest Florida Renewable Energy Center Project (NWFREC). Like Bright Automotive and U.S. Geothermal, Rentech had progressed according to plan and adhered to DOEâ s prescribed schedule. In coordination with DOE staff, Rentech had taken such steps as signing sponsor payment letters, setting up necessary infrastructure, and entering the due diligence process.

73

Despite making every effort to fulfill all the requirements DOE laid out, DOE, again, unexpectedly suspended the approval process for the NWFREC Project.

74

Tenaska

Given the steps

Rentech took to ensure all requirements were being fulfilled, DOE seems to have made a decision based on favoritism rather than the law, choosing to fund larger, ineligible projects over a number of more suitable alternatives.

Tenaska sought financing for Imperial Solar Energy Center South (IESC South), a solar

power project in Imperial County, California. Like the others, this company also received a letter from DOE suspending the loan approval process, indicating that other projects were closer to the conditional offer stage.

75

Prior to receipt of DOEâ s letter, Tenaska had been working in coordination with DOE staff and was finalizing the execution of the required term sheet.

Given the steps Tenaska appears to have taken prior to the suspension,

this is unlikely.

76

Additionally, the company

was progressing through the due diligence stage and expected its preliminary Credit Assessment from Fitch in the very near future.

77

The similarity of concerns and claims made by Bright Automotive, U.S. Geothermal,

Rentech and Tenaska make clear that DOE actively mislead applicants about the status of their loan applications, thereby encouraging these firms to misallocate capital, which has led to financial harm. When considered in the context of the excessively large loan guarantees provided to Abengoa, First Solar and ProLogis, and the outright violations associated with Antelope Valley and Project AMP, the claims of these companies bring to light the extent of harm that can result when a regulator fails to maintain integrity and allows inappropriate bias and influence to distort its decisions.

It appears that, once again, DOE suspended the approval of

a credible project adhering to all stated standards and working closely with DOE staff, only to later approve massive funding for a project proven to be nowhere nearly as far along in the process as DOE purported. DOEâ s favoritism significantly harmed yet another company that had relied on the promise of 1705 financing.

To the extent that political connections and lobbying efforts influenced the DOE loan

program, this increases the potential harm to our capital markets and our economy. The large

number of troubling relationships between industry and government officials reflects an environment where fair impartial loan determinations did not occur, resulting in poor decisions. For example, First Solar gained a unique advantage relative to its peers by mastering its relationship with government as we describe in Section III. Just six months after DOE provided First Solar three loan commitments totaling $2.4 billion, the Committee learned that DOEâ s prized achievement under the First Solar scheme, First Solarâ s Mesa solar panel manufacturing plant, will delay its startup and cut jobs while cutting back global production by 60%. We also learned Abound Solar, a solar panel manufacturer that received a $400 million DOE loan commitment, has since failed.

Following Solyndra, such a rapid pace of failure for solar projects, including the industry leader First Solar, leads us to expect many more solar projects will follow. As a result of these failures, we should also expect supply disruptions to solar generation projects, breaches of supply contracts, job loss, and dislocation to harm other taxpayer-backed solar firms. Based on these projections, it appears the DOE loan program, in the aggregate, will place a drag on the entire economy as investors in these firms and taxpayers face losses and bankruptcies.

D. The â Independentâ Review of the Loan Guarantee Program

In October 2011, the White House ordered that an independent review be conducted by outside consultants in response to emerging problems, uncovered by the Solyndra scandal, with DOEâ s Loan Guarantee Programs.

78

The review, led by an â independent consultant,â former Obama Administration Assistant Secretary of the Treasury, Herbert Allison, found serious systemic problems related to DOE management and issuance of loan guarantees.

79

- A lack of clarity in the lines of authority within the loan program office;

Among the

findings, Allison reported that DOEâ s loan program office suffers from structural weaknesses.

The report finds:

- A lack of balance between those with governmental experience and those with

â substantial private sector experience and skill in project management and finance;â

- A lack of clear guidance regarding DOEâ s standard of â reasonable prospect of

repayment;â

- A lack of clarity with regard to DOEâ s goals and tradeoffs with respect to financial goals

versus policy goals; and

- The fees charged to companies to administer the program are not adequate to last through

the duration of the loan guarantees.

While the institutional and managerial recommendations from the independent review are

appropriate and helpful, the report falls short because it fails to consider whether political

pressure played a role in the decision-making process at DOE. Additionally, the review does not

Id.

27

provide much insight into taxpayer risks â the independent review looks at â credit subsidy costs,â which represent the net present value of the expected lifetime cost to taxpayers of these loans. Credit subsidy costs, however, do not fully capture the risks to which taxpayers are subjected. According to the non-partisan Congressional Research Service, the independent review â did not calculate expected losses that may be realized by the project portfolio, and the report states that eventual losses cannot be predicted [using the accounting methods adopted by the review].â

80

Furthermore, it has been widely reported that the independent review found the cost to taxpayers of the loan programs to be lower than originally projected. This reading of the report neglects to explain how these calculations came about. The independent review evaluated 30 loans and loan guarantees, broken down into three categories created by the independent consultant: utility-linked loans and loan guarantees (â projects for the generation or transmission of alternative sources of energyâ

In other words, unforeseen risks exist within DOEâ s portfolio which may have future budgetary implications but are incalculable using governmental accounting methods.

81

); Non-utility-linked loans and loan guarantees (generally, projects that bear greater technological risk; Beacon Power and Solyndra would fall into this category); and Ford and Nissan loans (loans to these two companies were broken out because these â projects are more typical of traditional secured corporate loansâ).

82

When looked at in the aggregate, the costs of the program have, in fact, decreased since the DOEâ s estimates at the time of origination.

83

However, this optimistic outlook is driven

largely by the third category of loans and loan guarantees â those given to Ford and Nissan. The costs of the first two categories â utility-linked loans and non-utility-linked loans â increased by 14 percent and 71 percent, respectively, while the estimated cost of the Ford and Nissan loans decreased by 95 percent. The large drop in the cost of the loan to Ford and Nissan was largely driven by these two companies receiving credit ratings substantially greater than what DOE believed they merited at the time of DOEâ s loan origination.

84

Lastly, the review excludes costs associated with Beacon Power and Solynda when it calculated taxpayer liabilities. This is a significant omission, as Beacon Power had drawn down 91 percent of its loan guarantee at a cost to taxpayers of $39 million, while Solyndra had drawn

Looking just at utility-linked and

non-utility-linked loans and loan guarantees, the expected cost to taxpayers has markedly increased. The Allison report glosses over this pertinent fact.

down 98 percent, or $527 million. This is $566 million in costs to taxpayers from the loan

guarantee program that are completely ignored by the independent review.

III. DOE Violated Statutory, Regulatory, and Prudential Requirements

The Committee investigation and analysis reveals that, among many other concerns, DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. In some cases it appears the bias may stem from DOEâ s susceptibility to effective lobbying efforts, conflicts of interest present in the Administration, or from its overriding policy preference for renewable technology.

85

The

Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration. .

A. DOE Repeatedly Violated Requirements Intended to Ensure Innovation and Manage Risk

1. Regulatory Requirements

The Energy Policy Act specifies that the Secretary may only make loan guarantees under Â§1703 for projects that employ â new or significantly improved technologies.â

86

DOEâ s

implementing regulation defines this as an energy technology â that is not a Commercial Technology, and that has either (1) Only recently been developed, discovered, or learned; or (2) Involves or constitutes one or more meaningful and important improvements in productivity and value, in comparison to Commercial Technologies in use in the United States. . . .â

87

In applying

this definition, it is important to bear in mind the congressional intent underlying title XVII: to

incentivize innovative technologies.

88

The Loan Program Officeâ s (LPO) first solicitation, issued on July 29, 2009, targeted

innovative projects that satisfied the statutory and regulatory requirements of Â§1703.

89

The LPOâ s second solicitation, issued on October 7, 2009, created the Financial

Institution Partnership Program (FIPP) under Â§ 1705.

Projects

approved under this solicitation could access 100% financing through the Federal Financing

Bank.

90

85

An example of evidence indicating a strong ideology: Jonathan Silver, the former Director of the Loan Program

Office (LPO) stated in an email to Matthew Winters dated June 9, 2011, in relation to a Treasury review of First

Solar cost estimates, â Well done. Sorry you have to deal with all this. Hope the real story of how those folks tried

to kill deals that would have moved the needle and created jobs because of a slavish attachment to a flawed and

limited world view comes out.â

This loan guarantee solicitation was

86

90

FIPP Solicitation, supra note 23.

open to non-innovative (i.e., already commercialized) projects, but the project sponsor had to secure the loan itself from a private lender. This structure reflects a reasonable and prudent application of the Departmentâ s loan guarantee authority: a project that employs commercialized technology would only need a federal loan guarantee if it was an inherently high-risk venture. The Department prudently sought to mitigate this risk by requiring that it be shared with a private financial institution.

A second requirement in the Code of Federal Regulations only allows for â one technology per project sponsor.â

91

Nonetheless, in issuing these loans, DOE disregarded these constraints, often with the explicit encouragement of department officials. Substantial evidence indicates that, in two cases, officials in the Loan Programs Office deliberately mischaracterized substantively identical technologies as dissimilar.

Section 609.3(a) states that a Project Sponsor or Applicant

may only submit one Pre-Application or Application for one project using a particular technology. The rule prohibits an Applicant from submitting a Pre-Application or Application for multiple projects using the same technology. This common-sense requirement mitigates the risk to taxpayer dollars by ensuring diversity, while increasing the potential for innovation within the Departmentâ s loan guarantee portfolio.

92

In other cases, DOE labeled a technology as â innovativeâ when it

clearly should have been classified as a â proven technologyâ merely because the particular model had not been sold in the United States.

93

2. The First Solar Scheme

Additionally, there is evidence that applicants,

with the encouragement of department officials, intentionally mischaracterized their projects as â innovativeâ in an effort to access the Federal Financing Bank and defeat these prudential requirements.

a. Overview

First Solar manufactures thin film cadmium telluride solar panels and also provides prefabricated solar plants, where buyers can purchase a ready to run solar generation facility that uses First Solarâ s cadmium telluride panels.

94

First Solar sought to create four turnkey projects

with the assistance of DOE loan guarantees and direct loans. Contrary to the law governing DOE loans, these four projects relied on virtually identical solar technology. Accordingly, First Solarâ s use of the same technology across the four projects resulted in potential violations of federal regulations and the underlying loan solicitations. Specifically, through DOEâ s funding of three First Solar projects, DOE and First Solar may have violated regulations imposing the innovativeness requirement

95

and violated the regulation that allows only one technology per project sponsor.

95

The Energy Policy Act specifies that the Secretary may only make loan guarantees under Â§1703 for projects that employ â new or significantly improved technologies.â 42 U.S.C. Â§ 16513(a)(2). DOEâ s implementing regulation defines this as an energy technology â that is not a Commercial Technology, and that has either (1) Only recently been developed, discovered, or learned; or (2) Involves or constitutes one or more meaningful and important

First Solar submitted applications for two of the projects, Topaz and Desert Sunlight, under the DOEâ s FIPP solicitation that allowed for non-innovative projects. The other two projects, Agua Caliente and Antelope Valley Solar Ranch, sought and succeeded in gaining an advanced position in the application process by purchasing existing projects from Nextlight Renewable Power (â Nextlightâ) that previously filed applications with DOE. However, the projects purchased from Nextlight had applied under the DOEâ s â innovativeâ solicitation. First Solar always intended to use the same technology across all four projects. However, given the innovativeness requirement that applied to Agua Caliente and Antelope Valley Solar Ranch, as a result of Nextlightâ s original applications, these projects still needed to be deemed innovative. Additionally, the two projects needed to comply with the one technology per project sponsor requirement. This latter requirement meant that the two â innovativeâ projects also needed to be differentiated from each other to qualify.

First Solarâ s Agua Caliente and Antelope Valley Solar Ranch received funding despite the fact that each project may have violated the regulations described above. In the next section, we describe these violations in greater detail, provide the motives of DOE and the Administration, and offer documentation indicating DOE manufactured evidence of compliance

with these rules while internally conceding their failure to adhere to the law.

b. The Manufacturing Plant that Motivated Action on All Four First Solar Projects

While DOE publicly talked about the merits of each First Solar project individually, internal DOE emails indicate that DOE favored First Solar projects and viewed them collectively because DOE sought to enable First Solar to build a new manufacturing plant in Arizona.

97

The logic was simple: four solar generation projects would provide sufficient demand to justify and support locating a new First Solar manufacturing plant in Arizona.

98

The White House planned to use this new manufacturing plant and the jobs that it supported as evidence of the indirect benefits of DOE loan guarantees for the economy. Documents and e-mails obtained by the Committee offer unique insight on how decisions were made. In an e-mail from Jonathan Silver, Executive Director of the Loan Programs Office at DOE, to Deputy Energy Secretary Daniel Poneman in May of 2011 demonstrates DOEâ s plan to group the First Solar deals as a package. Silver wrote that â First [S]olar deals need to be considered as a package since they support the building of a manufacturing plant to service their collective needs.â

99

We have often talked about how the 3 FSLR [First Solar] projects were are (sic) considering will support the building of a manufacturing facility in Arizona. Can

The White House supported this packaging idea. In an email to other DOE officials from June 2011, Matthew Winters, Senior Advisor for Loan Programs at DOE, wrote:

improvements in productivity and value, in comparison to Commercial Technologies in use in the United Statesâ ¦â

one you (sic) please quickly draft a 1-2 sentence blurb that states exactly how this

is the case, and give the location, size, and expected construction date of the mfg

facility? This will go into a document for the White House that describes the

manufacturing impact of the projects in our pipeline.

100

c. The Collective Application of First Solar

(emphasis added)

The DOEâ s treatment of the First Solar applications during the credit review process demonstrates the Department realized the projects all employed the same non-innovative technology. DOE considered packaging three First Solar projects as one vote in front of the DOE credit review board (the Antelope Valley, Topaz, and Desert Sunlight projects), despite the projects coming from different solicitations (innovative versus commercial). Margot Anderson, a Senior Advisor at DOE, wrote an email on June 25, 2011, before the DOE credit review board voted to grant conditional guarantees to three First Solar projects (Antelope Valley, Topaz, and Desert Sunlight), asking â [S]hould it be three separate votes or one vote for all three projects?â

101

Despite ultimately approving credit individually for each project, the next email shows the extent to which DOE wanted â all of the deals to look exactly alikeâ :

While the credit review board appears to have voted separately for all three projects, this conversation reinforces the mindset within DOE that all First Solar projects represented a package and not individual projects.

Our question is simply â is there an issue if we bring all of the First solar projects including the various IEs (Luminate and Burns and Roe) into the same room to discuss the terms of the deals?â Essentially, we want all of the deals to look exactly alike. First Solar has suggested the meeting so they are on board the IEs are OK with it but one brought up the [Non-Disclosure Agreement] issue and I want to get that resolved. Jonathan want[s] the meeting to happen this week or early next, to get these projects going.

102

With this plan to package the First Solar deals, DOE granted conditional loan guarantees

to four First Solar projects that used First Solarâ s cadmium telluride photovoltaic solar panels.

103

DOE describes this technology as â commercially provenâ and â deployed since 2001.â

104

Yet,

DOE was classified two of First Solarâ s projects as innovative and ignored the â one sponsor per

technology per solicitation.â .

105

100

Email from Matthew Winters, DOE, June 14, 2011. (Emphasis added).

101

Email from Margot Anderson, DOE, June 25, 2011.

102

Email from Jeffrey Walker, DOE, to Susan Richardson and Kimberly Heimert, DOE, Subject â Bridge [Non

Disclosure Agreements] for this unusual circumstances,â (March 29, 2011, 8:21 AM).

103

DOE did not finalize First Solarâ s Topaz project and only gave final approval to three First Solar projects. Upon

finalization of its DOE loan guarantees, First Solar sold all of its development projects to large utilities, such as

Exelon and NextEra.

104

â Energy Department Finalizes Loan Guarantee to Support California Solar Generation Project,â U.S. Department

of Energy, September 30, 2011. Available at:

https://lpo.energy.gov/?p=5324.

105

This scheme coincidentaly improved the financing terms of the programs by enabeling the government to

provide

a 100% direct loan as opposed to an 80% loan guarantee. Specifically, those entities approved under the innovative

path received direct federal loans from the Federal Financing Bank (FFB) for 100% of the sought after amount. Had

these entities gone through the commercial path, they would need to borrow from a private lender who would then

d. First Solarâ s Acquisition of NextLight's Projects to Enable All Four Projects to

Proceed Together

To understand why DOE manipulated the First Solar applications one must understand how these projects came to pass. First Solar purchased NextLight Renewable Power in a deal that included NextLightâ s two pending DOE loan guarantee projectsâ Agua Caliente and Antelope Valley Solar Ranchâ in April of 2010.

106

DOE had invited both NextLight projects

into the due diligence level in the loan application process,

107

indicating that both continued to

progress successfully towards ultimate approval. NextLight had applied for innovative loan guarantees for both projects. Under Nextlightâ s applications, the Agua Caliente project would use amorphous silicon technology, and the Antelope Valley project would use crystalline silicon solar technology.

108

When First Solar purchased NextLight, it planned to switch to its own proven â and non-innovative - technology relying on cadmium telluride panels for both projects. However, First Solar wanted to keep both projects in the innovative technology queue. First Solar faced two challenges to keep both projects in the innovative queue. First, the company had to prove that both projects used innovative technology; while using First Solar cadmium telluride panels for the projects that would not qualify as innovative. Second, First Solar had to ensure that both projects used different â innovativeâ technologies, otherwise the projects would violate the DOE rule that one company could only sponsor one project using a specific innovative technology under the innovative technology solicitation.

e. Failure to Prove Innovativeness; Resorting to Falsification

First Solar planned to qualify both projects for the innovative solicitation by incorporating relatively minor new technologies into the solar plants. The Agua Caliente project

would use standard First Solar cadmium telluride panels, but would use an inverter â fault ride-

through and dynamic voltage regulationâ technology

109

that would help the plant stay operational

even if the sun did not shine constantly on a particular day.

110

receive at most an 80% guarantee. Therefore, the non-innovative entities benefitted from the false â innovativeâ

designation in that they received fully guaranteed funding, as opposed to partially guaranteed, reducing their cost of

borrowing. The other two First Solar projects received partial loan guarantees as part of the Financial Institution

Partnership Program.

First Solar relied on this inverter

to qualify the Agua Caliente project as innovative.

111

An email between DOE staff describes the lack of innovativeness of this inverter technology, stating, â The Projectâ s inverter that we show currently specified is an SMA 630CP â ¦From a design perspective, switching to the 720CP (from the 630CP, if this is in fact what First Solar is doing), has no real impact on the electric energy production values.â However, the innovativeness of this inverter technology is highly questionable based on the following issues identified through the review of email communications and internal DOE reports.

112

A DOE whitepaper reveals that more than 200 of these allegedly â innovativeâ inverters had been in use in Germany, Italy and Spain since September 2010.

113

Directly calling into question any determination that this technology is innovative, the DOE whitepaper provides that these inverters are â commercially ship[ped] today in the United States as well.â While, according to the rule, foreign commercial use of a technology is not a bar to deeming domestic use innovative, the broad commercial use in Europe reflects the disrespect DOE applies to the actual innovativeness requirement.

114

The report explains that â the technology being implemented is not new as compared to traditional turbine-based generatorsâ and is commercially manufactured in Colorado.

115

These facts emailed among DOE staff undermine any determination of

innovativeness and clearly indicate that Agua Caliente failed to satisfy the requirements designed to spur development of new technologies.

116

First Solar also planned to use this inverter technology to make the Antelope Valley project innovative; however, even if the technology were innovative with regard to Agua Caliente, its second application to Antelope Valley would violate the one technology per project sponsor requirement.

117

To overcome this obstacle, First Solar added a â single axis trackingâ system for the Antelope Valley project to differentiate it.

118

111

See â NEXT LIGHT ANTELOPE VALLEY TECHNICAL ELIGIBILITY RE-EVALUATIONâ attachment (July 21, 2010) to email from Sarah Hetznecker, U.S. Depâ t of Energy, to Patrick Gorman, U.S. Depâ t of Energy, Subject: â here is the antelope valley re-evaluation memoâ (July 22, 2010 9:06 AM).

This system simply allowed the panels to track the sun â a technology that has been around for decades. Additionally, First Solar

The Antelope Valley Project will use the new Fault Ride-Through Technology inverters that are being used in the Agua Caliente Project and were the basis for new and significantly improved technologies as compared to commercial technologiesâ for that project. While this is being used on both of these projects, it will meet the definition of â new of [sic] Singificantly Improved Technology and it is not a Commercial Technology, because it is not being used in three or more commercial projects in the US in the same general application and it has not been in operation for 5 years. In addition, First Solar will use single axis tracking on 50 MW of the 230 MW for the Antelope Valley Project. Based up on the re-evaluation, we conclude that the project will meet the

eligibility criteria

Eligibility Re-Evaluationâ (Aug. 4, 2010).

34

only planned to install this system on 50 MW of the plantâ s 230 MW capabilities, less than 25% of the plant.

119

Rather than force First Solarâ s Antelope Valley project to step out of the innovation queue, DOE quickly created a memo that allegedly justified the project remaining â innovative.â The memo claimed that the Antelope Valley project would use three different innovative technologies: Fault Ride-Through Technology, Dynamic Voltage Regulation, and single axis tracking.

120

Internal DOE emails reveal a rushed process that left certain DOE officials questioning the validity of the analysis.

121

DOE officials also heavily edited the memo to deemphasize First Solarâ s other pending projects and the fact that the Antelope Valley project

used the same â innovativeâ technology as the Agua Caliente project.

122

More importantly, on June 23, 2011, Dong Kim, Director of the Technical and Project Management Division, (who had edited the DOE memo on Antelope Valleyâ s innovativeness referenced above) wrote an email indicating that the allegedly innovative tracking technology did not constitute innovativeness, was not considered innovative originally, and also pointed out that others continuously revised documents to incorrectly reflect that the trackers were â innovative.â Kim wrote:

Someone keeps changing [Antelope Valley Solar Ranch] Technical slides to include single axis trackers as an innovation. Be clear that this not an innovation. The record will show that we did not grade this as innovative during intake review. It will not stand up to scrutiny if compared with CVSR [California Valley Solar Ranch] trackers. Whoever continues to make this change needs to understand that Technical does not support the 20 percent of the CVSR field with trackers as an innovative component.

123

The apparent cover-up that led to Kimâ s stern email indicates that DOE staff sought to maintain a false finding of â innovativeâ for the single axis trackers. (emphasis added)

DOEâ s August 4, 2010, memo claimed that the Antelope Valley project used three innovative technologies. However, DOEâ s Director of the Technical and Project Management Division revealed that the single axis trackers did not qualify as innovative and DOEâ s own press release demonstrated that the Agua Caliente project already used both the fault ride-through and the dynamic voltage regulation technologies.

124

119

Id.

Since Agua Caliente had already received a loan

guarantee using this â innovativeâ technology, Antelope Valley was barred from relying on the

same technology for its innovativeness-based application. As a result, Antelope Valley provided

the Agua Caliente Solar Project (Aug. 5, 2011) available at

http://energy.gov/articles/department-energy-finalizes-

967-million-loan-guarantee-support-agua-caliente-solar-project.

no innovative technology that would justify its eligibility for a DOE loan. DOE should have deemed First Solarâ s Antelope Valley project ineligible under the innovativeness solicitation.

f. Persistent Pressure to Approve the First Solar Projects and Achieve the Master Plan of Building a Manufacturing Facility

First Solar kept pressure on DOE to approve the three projects in the final weeks leading up to DOEâ s issuance of conditional loan guarantees. On May 18, 2011, Jens Meyerhoff, an executive at First Solar, wrote a letter to Jonathan Silver implicitly threatening that First Solar might not commit to completing construction on the Arizona manufacturing plant if DOE did not approve all three First Solar loan guarantees. Meyerhoff wrote:

A failure to receive DOE and U.S. government agency approvals for these projects or missing the September 30 statutory deadline under the 1705 program would seriously jeopardize the financing for the Agua Caliente, Antelope Valley Solar Ranch, Desert Sunlight and Topaz projects. As you

know, a major reason for choosing to build the manufacturing plant in Mesa, AZ was to provide solar modules to these large and important U.S. projects.

We will invest more than $300 million in the factory, put people in Mesa to work at a long-dormant industrial site that once was home to an automotive testing facility, and create high tech green jobs that did not exist beforeâ ¦

â ¦First Solar consciously made the decision to build a new U.S. manufacturing center to support and recycle economic benefits created by favorable U.S. political support for renewable energy, including the 1703 and 1705 DOE loan guarantee programs.

The DOE loan programs provide an important financing â bridgeâ at a time when the U.S. private debt markets have little or no experience financing first-of-their-kind utility-scale solar projects, and the capital markets remain constrained in the wake of the global financial crisis. If First Solarâ s project applications are not approved, or if theyâ re delayed beyond September 30, we believe it could jeopardize our ability to close financing (both debt and equity), jeopardize construction of 1,620 megawatts of solar capacity and, frankly, undermine the rationale for a new manufacturing center in Arizona.

125

First Solar also tried more friendly persuasion. Nikolas Novograd, Vice President at First Solar, sent Bill Pegues at DOE a picture of the construction taking place at First Solarâ s Arizona plant. Pegues planned to use the construction picture to help persuade members of the credit review board to vote for the First Solar projects. He forwarded the picture to several DOE officials, commenting, â [H]ereâ s a photo of the construction

125

Letter from Jens Meyerhoff, First Solar, to Jonathan Silver, Director of Loan Programs Office, U.S. Depâ t of Energy (May 18, 2011) (emphasis added).

36

progress on the FSLR mfg plant in Mesa, Arizona as of Tuesday 6/14. Iâ ll bring several copies to CRB [Credit Review Board] just in case we need them.â

126

Additionally, Rob Gillette, CEO of First Solar, arranged a phone call with the Deputy Energy Secretary on June 24, 2011, only days before the Credit Review Board met to decide whether to grant conditional loan guarantees to the three First Solar projects.

127

By June 22, 2011, several days before the Credit Review Board approved conditional loan guarantees for the projects, Secretary Chuâ s office had already planned a press release to announce the conditional loan guarantees for the First Solar projects that relied upon job creation numbers from First Solar itself.

128

S1â s office hopes to offer an advanced story to a national reporter on all three First Solar deals later today, with a story to run tomorrow along with the press releaseâ ¦

Secretary Chuâ s office

carefully coordinated the media strategy for the approval of the conditional loan

guarantees for the three First Solar projects. Sonia Taylor at DOE wrote in an email on

June 28, 2011, that

â ¦If you havenâ t already, can you all please notify the appropriate people

from First Solar and the other companies that the deal is official? I have

been working with First Solar (under the guise of â should the deal be

approvedâ), and they do not plan on writing a press release. Can you all

please see whether the banks plan on issuing a release? If so, weâ ll need

to review it.

129

On June 30, 2011, DOE issued a press release that announced the conditional loan

guarantees for the three First Solar projects for around $4.5 billion.

(emphasis added)

130

The six paragraph

announcement only mentioned First Solar once and described the Antelope Valley

project as featuring â a utility-scale deployment of innovative inverters with voltage

regulation and monitoring technologies that are new to the U.S. market.â

131

DOE would eventually issue final loan guarantee offers to First Solarâ s Antelope

Valley and Desert Sunlight projects on the final day of the 1705 loan guarantee program

(September 30, 2011).

The press

release did not mention the trackers on the Antelope Valley project.

132

126

Email from Bill Pegues, U.S. Depâ t of Energy (June 23, 2011).

Despite the issues surrounding the innovative nature of the

Antelope Valley project, DOE finalized a 100% loan guarantee worth $646 million for

the allegedly â innovativeâ project. Ultimately, DOE did not finalize First Solarâ s Topaz

37

project, but a subsidiary company of Warren Buffettâ s Berkshire Hathaway purchased the project from First Solar.

133

g. First Solarâ s Financial Problems since the Loan Guarantees

Since DOE finalized First Solarâ s three loan guarantees (for over $3 billion), First Solar has encountered serious financial problems that put the DOE funded projects in jeopardy. First Solarâ s stock declined the greatest compared to of any S&P 500 companies in 2011 and has lost over $100 per share over the past year.

134

First Solar has cut production of its solar panels

worldwide.

135

Based upon the companyâ s financial troubles, First Solar fired its CEO in October.

136

Additionally, in March 2012, the Securities and Exchange Commission announced an investigation into whether First Solar had improperly disclosed information about whether the First Solar Topaz project would receive a loan guarantee from DOE.

137

More recently, First Solar has revealed problems that directly impact its three DOE loan guarantee projects. First Solarâ s Antelope Valley project had problems getting a permit and has yet to receive any DOE funding.

138

First Solar announced in late February that it would postpone manufacturing solar panels at its Mesa Arizona plant, which is still under construction, because of financial problems.

139

First Solar intended for the Mesa facility to provide panels to the four First Solar projects. This delay means that the indirect jobs that the White House wanted to create with the three loan guarantees will likely never materialize, and raises questions about whether First Solar will have problems supplying solar panels to its DOE loan guarantee projects. Additionally, First Solar has revealed that it has needed to replace millions of dollars worth of its solar panels under warranty because they did not last in hot climates.

140

h. Conclusion

Considering all three of First Solarâ s DOE-based solar generation projects are located in hot desert climates,

this issue raises serious concerns about whether the panels will work properly long term.

There appears to be a significant amount of evidence, based on documents received by the Committee and supplied by DOE and others, indicating that DOE manipulated its analysis and strategically modified evaluations in order to issue loans to First Solar that would qualify

38

under the statutory guidelines. This is cause for serious concern. An application that should otherwise fail, but instead passes under improper influence and through the manipulation of analysis, results in the defrauding of taxpayers and misappropriation of assets.

141

B. DOE Violated the Statutory Requirement that Projects Commence Construction by September 30, 2011

Furthermore,

any advantage to an applicant disadvantages other applicants and improperly diverts DOE resources.

The Recovery Act states that the Secretary may only make loan guarantees under Â§ 1705 for projects â that commence construction not later than September 30, 2011.â

142

This provision

is designed to effectuate the rapid deployment of renewable energy projects. Furthermore, Â§

3(b) of the Act mandates that the Secretary expend appropriated funds â as quickly as possible consistent with prudent management,â so as to achieve the Actâ s stated goal of economic stimulus.

143

The DOE knowingly violated this explicit statutory mandate. The Departmentâ s FIPP loan guarantee solicitation from October 7, 2009, defined â commence construction on before September 30, 2011â to mean that

This â shovel-readyâ requirement also helps to mitigate risks associated with too many unknown variables.

(i) the Borrower has completed all pre-construction engineering and design, has received all necessary licenses, permits and local and national environmental clearances, has engaged all contractors and ordered all essential equipment and supplies as, in each case, can reasonably be considered necessary so that physical construction of the Eligible Project may begin (or, if previously interrupted or suspended, resume) and proceed to completion without foreseeable interruption of material duration and (ii) such physical construction (including, at a minimum, excavation for foundations or the installation or erection of improvements) at the primary site of the Eligible Project has begun (or resumed).

On September 30, 2011 â the last day of the program â the Secretary approved a $1.4 billion loan guarantee for Project AMP. Project AMP intends to install solar panels on the rooftops of many of ProLogisâ extensive real estate holdings. However, as the September 2011 application approval deadline approached, Project AMP was nowhere near prepared to commence construction, in part because it failed to secure contractual commitments to purchase energy from its proposed solar generation facilities.

144

141

See discussion infra Part V.A. and V.B.

Construction cannot begin for any phase

of Project AMP until parties agree to a Power Purchase Agreement (PPA), which helps to ensure

sufficient revenue to justify an installation of solar panels. As of March 6, 2012, Project AMP

142

42 U.S.C. Â§ 16516(a).

143

American Recovery and Reinvestment Act of 2009, Pub. L. No. 111-5, Â§3(a), 123 Stat. 115 (2009).

144

Email from Eric Mogilnicki, WilmerHale, counsel to Bank of America, the lead lender for Project AMP (Mar. 6,

2012) (on file with author).

had not signed any PPAs, had not purchased any solar panels, and had not begun construction at

any locations.

145

Consistent with Project AMPâ s lack of preparedness to commence construction, Fitch Ratings imposed a â frameworkâ methodology to rate the credit risk of Project AMP.

146

Fitch explained that, due to a lack of negotiated prices, a lack of known product suppliers, and a lack of PPAs, Fitch could not model cash flows or consider the credit quality of the businesses the project would transact with.

147

For this reason, Fitch mandated the use of a framework approach that imposed minimum credit quality requirements and other controls to ensure adequate credit quality relating to future transactions.

148

Fitch also required that Project AMP return to Fitch to receive ratings for each phase prior to seeking DOE loan disbursements consistent with the framework approach.

149

As of March 6, 2012, Project AMP had not sought ratings for any phase of Project AMP.

150

While the credit rating methodology appears appropriate given the circumstance, the need to apply this approach reflects Project AMPâ s failure to meet the specific requirements of the law. Nonetheless, DOE approved Project AMPâ s loan guarantee for $1.4 billion dollars. DOE approval of this project on the final day with pressure from Secretary Chu reflects improper influence and recklessness that led to an extremely large and inappropriate loan commitment.

This further clarifies the extent of Project AMPâ s failure to commence

construction.

151

As we describe in Section D below, following DOEâ s approval of Project AMP, natural gas prices fell dramatically, resulting in substantially lower power prices in areas where natural gas generation provides the marginal supply of power. Lower market prices for power reduce potential revenue for all PPAs â in other words, solar power directly competes against natural gas fired generation. Had Project AMP locked in PPAs at the time DOE approved its loan, this loss of potential revenue would have been avoided. Given the lag between approval and PPA negotiation, price risk materialized, likely reducing the aggregate value of Project AMP as a direct consequence of Secretary Chuâ s inappropriate approval.

Had DOE rejected Project AMP due to its failure to commence construction, the government and participants in the project would have avoided misallocating capital to a project that was premature.

C. DOE Violated the Statutory Requirement of â Superiority,â Illegally Benefiting Banks at the Expense of Taxpayers

When it created the loan guarantee program, Congress took several steps to protect taxpayer funds and limit the DOEâ s risk exposure. These restrictions are recited in Â§ 1702 of the

Energy Policy Act and by statute apply to all loan guarantees issued under title XVII.

152

One of

the most important risk-limiting provisions requires the Secretary to secure a superior claim to any assets in the event of a default.

153

The statute unequivocally requires that these rights must

be â superior to the rights of any other person.â

154

This common-sense rule ensures that if the

U.S. government is on the hook to pay off creditors, it should be able recover at least some of its losses.

This right to superiority over collateral is appropriate given that taxpayers enabled the transaction through provision of a subsidy. Given the substantial risk associated with DOE loan guarantees and the lack of any potential for the taxpayer to profit, the law required that the DOE at least maintain a superior position with respect to collateral to protect taxpayers in the event that a project failed. Private banks stand to profit if a project succeeds, while also avoiding substantial downside risk if a project fails. Given these clear benefits to lenders, Congress determined that lenders should not also gain parity with the DOE on the rights of collateral and inserted the â superiorityâ provision to prevent weakening the taxpayerâ s position.

In what can only be considered a preemptive bailout for banks, DOE eliminated taxpayer protections by agreeing to share its rights in the collateral of failed projects with private lenders. Notwithstanding the clarity of the statutory requirement and the policy basis for it, the DOE enacted regulations that allowed banks to gain parity with the United States with regard to collateral.

155

While this may have increased its lending authority, it did so by weakening the

taxpayerâ s protections.

A review of the seven Financial Institution Partnership Program based loan guarantees reveals that DOE agreed to share its collateral rights with the lenders for all FIPP loans issued after enactment of the DOE regulations.

156

Instead of selectively sharing collateral for the safest projects, DOE instead applied this approach to all FIPP loans, irrespective of the highly varying deal terms, credit quality and loan amounts.

157

In no case did DOE withhold this benefit from banks to protect taxpayers. In effect, DOE behaved as if its new interpretation of the law mandated that banks be placed on par with taxpayers.

1. Superiority of Rights vs. Pari Passu Sharing

In the event of a default, a loan guarantee provides assurances to banks and other lenders that they will recover 80% of the money loaned to the renewable energy project.

158

152

42 U.S.C. Â§ 16512 (â â ¦ the Secretary shall make guarantees under this or any other Act for projects on such terms and conditions as the Secretary determines, after consultation with the Secretary of the Treasury, only in accordance with this section).

This money comes from the American taxpayer. Under the system designed by Congress, while taxpayers

153

42 U.S.C. Â§ 16512(g)(2)(B) (â The rights of the Secretary, with respect to any property acquired pursuant to a loan guarantee or related agreement, shall be superior to the rights of any other person with respect to the propertyâ).

154

Id.

155

157

Id.

158

See 42 U.S.C. Â§ 16512(c) (stating â a guarantee by the Secretary shall not exceed an amount equal to 80% of the project cost of the facility that is the subject of the guaranteeâ ¦â).

41

are on the hook for at least 80% of the loan in case of default, they will at least be in first

position to try to recover their investment based on the sale of the defaulting companyâ s assets.

159

The Department of Energyâ s approach ignores the plain letter of the law. Section 1702(g)(2)(B) contains the Superiority of Rights provision (â Superiorityâ). However, under the contracts awarded under Â§ 1705, DOE included pari passu terms, which puts a lender in a position equal to the taxpayer with respect to rights to collateral.

160

Consider the following hypothetical example:

Superiority

provides that â [t]he rights of the Secretary, with respect to any property acquired pursuant to a guarantee, shall be superior to the rights of any other person with respect to the property.â The statute clearly requires that DOE maintain superiority with regard to assets acquired as a result of a guarantee, and, as a result, precludes sharing the collateral with other creditors. Such sharing of collateral also flies in the face of the FIPP program requirements, which mandate loan guarantees to cover no more than 80% of any loan.

DOE guarantees 80% of a billion dollar loan, which defaults. Upon default, the DOE pays $800 million to the senior creditor protected by the DOE loan guarantee. Assume the leftover assets are worth $500 million. Under this Administrationâ s pari passu construct, DOE shares its senior rights to the recovery with the senior lenders, who already received $800 million from the loan guarantee. Therefore, DOE recovers 80% of the $500 million recovery, or $400 million; the non-guaranteed lenders recover an additional 20% of the $500 million, which equals $100 million.

Recall that the lenders already recovered $800 million for their guaranteed portion. This means that in the aggregate, the private lenders that received the DOE loan guarantee recovered $900 million of the total billion dollar loan or 90%. Yet the law intended for taxpayers to be in

first position with respect to the full $500 million in this hypothetical. Accordingly, Pari Passu terms directly violate the FIPP solicitation requirements.

2. Congress Specifically Considered and Rejected Changes to the Superiority Provision that Would Have Allowed for Pari Passu Credit Terms

Supporters of pari passu credit terms for DOE loan guarantees sought to change the law to allow for such credit structures. On July 16, 2009, Senate Bill S. 1462, which would have modified Title XVII to allow for pari passu credit terms by disabling the Superiority provision, was passed by the Senate Energy and Natural Resources Committee, but failed to pass the full Senate.

161

The time invested in drafting a bill and seeking to pass it in both the Senate and the House reflects the effort and analysis that many lawmakers put into this issue. This is the clearest evidence that Congress does not recognize the DOEâ s authority to provide Â§ 1705 loans Also, in the last Congress, the House of Representatives passed â Cap and Trade,â under H.R. 2454. That bill had an identical provision to disable Superiority under Title XVII. H.R. 2454 also failed to become law.

159

See 42 U.S.C. Â§ 16512(g)(2)(B).

160

Id.

161

See S. 1462, 111th Cong. Â§ 103(b)(3) available at http://energy.senate.gov/public/_files/s1462pcs1.pdf.

42

with pari passu terms. Rather, the law requires Superiority to apply to any property acquired pursuant to the original guarantee or binding agreement to provide a guarantee.

3. The Department of Energy Knowingly Violated the Law

Notwithstanding Congressâ s rejection of these bills that were designed to weaken taxpayer protections, on December 4, 2009, the DOE issued final regulations to allow for pari passu treatment of DOE loan guarantees.

162

The Committee raised these concerns in a letter to the Secretary dated December 7, 2011.

By these actions, the DOE disregarded the law and Congress. The specific approach used in both S. 1462 and H.R. 2454 highlights the fact that the law currently does not allow for pari passu treatment specifically due to the Superiority provision. DOEâ s awareness of Congressâ s failure to change the law indicates DOE understood it may be violating the law when it provided loan guarantees with pari passu credit terms.

163

The Department of Energy responded by asserting that Â§ 1702(g)(2)(B) only â governs post-default rights of the Secretary, rather than conditions that must be met at the time the Secretary determines to make a loan guarantee.â

164

Under the DOEâ s interpretation of the

statute, â [o]nce the Secretary has actually acquired property through the Secretaryâ s right of subrogation in a post-default situation, the statute provides that, as a matter of law, the Secretaryâ s rights in that acquired property are superior to any other claimant with respect to that requirement.â

165

The Departmentâ s interpretation is lacking on three levels. First, the Secretary can only secure his superior of rights in collateral before entering in a loan guarantee contract. To say Â§ 1702(g)(2)(B) only applies after a default renders the provision useless. Second, the preceding quotation from the DOEâ s response letter evinces the circularity of its logic: once the Secretary has actually acquired property through the right of subrogation, there is no need to provide for a superiority of rights: he has already acquired the property. Finally, the Departmentâ s interpretation ignores Congressâ clear pronouncements of its understanding that Â§ 1702(g)(2)(B) prohibits pari passu terms. The DOE has never addressed these clear statements of congressional intent.

IV. DOE Has Artificially Inflated Job Creation Statistics

One characteristic of â green jobsâ often touted by the Obama Administration is that green industries rely heavily on manpower, a trait that â makes them especially alluring when it comes to government-led job creationâ measured in terms of jobs â created or saved.â

166

In studies

heralding the creation of large numbers of jobs in green jobs programs, there is a consistent preference for inefficiency.

167

162

74 Fed. Reg. 63544, 63545 (Dec. 4, 2009) (to be codified at 10 C.F.R. pt. 609).

This is contrary to the fundamental economic principle that high

167

Witnesses Provide Various Definitions of Green Jobs Before House Workforce Panel, DAILY LABOR REPORT,

Apr. 4, 2009 at 60.

43

labor productivity is a measurement of an efficient and healthy economy.

168

The DOEâ s 1705

Loan Guarantee Program follows this flawed principle precisely. According to a leading expert, an economy based on â high paying, low-productivity jobs â ¦ would require an economic structure unknown in human history.â

169

While the energy sector is a very large source of employment, it is a mistake to treat it as a government jobs program. Dr. David Montgomery, Senior Vice President at NERA Economic Consulting and a former CalTech professor, has explained:

It is a fundamental error in policymaking and economics to design or justify federal support for new energy technologies as a jobs program. It subverts the entire purpose of government involvement in R&D, and is the greatest single cause of the continued failure of energy technology programs.

170

However, even accepting the premise that it is appropriate to base a jobs program on green energy development, the Administration fails at this objective.

In almost every public statement about its loan guarantee program, DOE touts job creation. DOEâ s Loan Programs Office webpage proudly proclaims that DOE expects the loans and loan guarantees to â employâ over 60,000 people.

171

One example of DOEâ s misrepresentation of jobs figures relates to a DOE loan guarantee to Ford Motor Company. DOE proclaims that this project, funded through the ATVM program, accounts for 33,000 of the 61,383 jobs. However, these jobs, which DOE represents to be â permanent jobs created or saved,â already existed. Upon closer examination, it appears that DOE reports that the DOE loan â convertedâ existing jobs to green energy jobs. The site also breaks down the number of jobs created or saved by each loan or loan guarantee, and issues press releases for specific projects discussing job creation. These figures are misleading. In reality, the 60,000 number includes jobs that existed at one time, but have since been eliminated; jobs that exist independent of the loan program; and jobs that already existed, but are now considered â green jobs.â

172

168

Green Jobs and Red Tape: Assessing Federal Efforts to Encourage Employment: Hearing Before the Subcomm. On Investigations and Oversight of the H. Comm. on Science, Space, and Technology, 112 th Cong. (2011) (testimony of W. David Montgomery). Had no loan occurred, presumably, the factory would continue to produce non-green energy vehicles; there is no evidence that Ford planned to lay off 33,000 employees if the company had not received the loan. This jobs statistic is also misleading given the statements of David Frantz, Acting Executive Director Loan Program Office and Acting Director ATVM to Committee staff. Mr.

44

Frantz stated during a phone interview, â [ATVM] is not a jobs program. [Job creation] is not a governing factor when we do a deal. Itâ s only a matter of record.â

173

DOE also includes failed projects and a project that refused DOE funding in its job

creation numbers. Despite Solyndra going bankrupt and firing all of its employees, as of February 20th, 2012, DOE still lists Solyndra as creating 3,000 construction jobs (see figure below). While those jobs may have briefly existed, touting jobs for a defaulted project that lost hundreds of millions in taxpayer dollars and including those jobs in a total jobs count prominently displayed on DOEâ s website is inappropriate and misleading.

173 Interview with David G. Frantz Acting Director ATVM Program Jan. 13, 2012.

DOE continues to include in its list of projects a $105 million loan guarantee it finalized with POET, LLC to build an ethanol plant. According to DOEâ s website, POET, LLCâ s loan

guarantee will create 40 permanent jobs and 200 construction jobs. However, POET announced on January 23, 2012, that it had decided not to accept the DOE loan guarantee because it had acquired private financing.

174

DOE also includes 180 jobs that Abound Solar announced, on February 29, 2012, it will be laying off due to a â retoolingâ of manufacturing facilities. Abound struggles to compete with Chinese manufactures that provide a comparable solar panel for a more competitive price. When asked about the layoffs, Aboundâ s CEO, Craig Witsoe, stated, â We hate to have any job loss in the company. But it was the right decision for the business."

Despite POET declining DOEâ s money, as of February 20, 2012, DOE had continued to include it in its job creation numbers (see figure below).

175

174

Timothy Gardner, Ethanol maker POET declines U.S. government loan aid, REUTERS, Jan. 23, 2012 available at

Of the $400 million DOE loan guarantee received by Abound, the company had already drawn down $70 million at the time of the layoffs.

http://www.reuters.com/article/2012/01/23/us-usa-ethanol-loanaid-idUSTRE80M20K20120123 .

175

Matthew Mosk, More Green Energy Layoffs: Colorado Solar Firm Cuts Workforce in Half, ABC NEWS, Feb. 29, 2012 available at

http://abcnews.go.com/Blotter/abound-solar-lays-off-180-workers/story?id=15816806.

46

DOE also incorporates jobs figures for Fisker Automotive (Fisker), which announced a 26 employee layoff on February 6, 2012, at their Wilmington, Delaware plant, as well as for Beacon Power Corp, which filed for Chapter 11 bankruptcy in October 2011, eliminating 34 construction and permanent jobs.

In addition to misleading the public regarding the number of permanent jobs created by the loan program, DOE obfuscates the number of jobs â createdâ by combining temporary and permanent jobs. For each listed loan and loan guarantee project, DOE provides a figure for permanent jobs and construction jobs. As loan projects generally require significant construction, these projects predominantly create temporary construction jobs, which terminate upon a projectâ s completion. For example, solar generation projects require few permanent employees to maintain and operation the facility. In the case of Antelope Valley Solar Ranch, DOEâ s posting reflects 350 temporary construction jobs and only 20 permanent jobs. Nonetheless, DOE reports the number of jobs â saved or createdâ as 370, even though 95% are temporary.

V. The Broken Process for Awarding Loan Guarantees

A. External Pressures on the Program

DOEâ s Inspector General explained that the administration of Recovery Act funds proved to be â more challenging that many had originally envisioned,â

176

and specifically asserted that

â the loan guarantee program could not always readily demonstrate through documentation how it resolved or mitigated relevant risks prior to granting loan guarantees.â

177

The Revolving Green Door

In addition to these concerns, the Committee has also discovered the existence of a revolving door of persons who worked at green energy investment groups only to later be hired by the Administration, which present significant conflicts of interest. These connections raise the specter of undue influence over the loan guarantee process.

Nancy Ann DeParle

Nancy Ann DeParle, the current Deputy Chief of Staff for Policy in the White House, had a financial stake in the success of Granite Reliable, which received $168.9 million loan from DOE. Prior to joining the White House, DeParle was a Managing Director of multi-billion dollar private equity firm CCMP and she both had a financial interest in and sat on the Board of Directors for Noble Environmental Power, LLC.

178

176

The Green Energy Debacle: Where Has All the Taxpayer Money Gone?: Hearing Before the Subcomm. on Regulatory Affairs, Stimulus Oversight, and Government Spending of the H. Comm. on Oversight and Govâ t Reform, 112th Cong. (2011) (statement of Gregory Friedman, Inspector General, U.S. Depâ t of Energy).

Noble owned Granite Reliable, a wind

177

47

energy project.

179

Prior to her departure, her position on Nobleâ s board of Directors positioned her to understand the most confidential and material aspects of Noble Environmental and its subsidiary Granite Reliable. DeParle misrepresented her relationship with Noble Energy, claiming on disclosure forms that her interest had been divested, when in fact it had merely been transferred to her 10 year old son.

180

During her time at the White House, Granite Reliable sought and, in September 2011, obtained a partial guarantee of a $168.9 million loan.

181

Michael Froman

Granite Reliableâ s application for a DOE

loan guarantee was made at least by early 2010, and probably earlier than that, according to signed documents relating to the loan application. Noble sold Granite Reliable in December 2010 to Brookfield Asset Management, just 6 months prior to the conditional approval of the DOE loan guarantee and deep into the application process. The DOE loan guarantee was conditionally approved on June 2011 and finalized in September 2011. DeParleâ s ownership stake in Noble, which owned Granite Reliable, a beneficiary of a DOE loan, represents a clear conflict of interest.

Michael Froman currently serves as the Deputy Assistant to the President and Deputy National Security Advisor for International Economic Affairs.

182

He was a friend of President

Obamaâ s from law school,

183

and supported his political career by bundling over $200,000 for

his 2008 presidential candidacy.

184

Prior to his arrival at the White House, Froman was the Managing Director of Alternative Investments at Citigroup,

185

where he managed infrastructure and sustainable development

investments.

186

Citigroup became a major investor in SolarReserve,

187

which ultimately received

a $737 million loan guarantee in September 2011.

48

Steve Westly

Steve Westly co-founded the Westly Group, a clean energy venture capital firm that, according to DOE records, has reaped over $600 million in DOE loans for its portfolio of investments.

189

One recipient company was Tesla Motors,

190

a premium electric vehicle manufacturer to which DOE awarded a $465 million loan guarantee in January 2010.

191

Westly also sat on Teslaâ s Board of Directors in the companyâ s early days.

192

Westly is a personal friend of President Obama and bundled over $500,000 for his 2008 campaign.

193

Since the election, Westly has visited the White House multiple times for both business and pleasure, and has privately dined with the President in small group fundraising settings.

194

After President Obamaâ s election, Westly was rumored to have been a primary candidate for Energy Secretary.

195

When Secretary Chu received the appointment, Westly was given the opportunity to serve on an advisory board to the DOE, â a pivotal [sic] advisory committee that made recommendations to the secretary on alternative energy policies.â

196

One committee initiative included a recommendation to modify federal rebates for electric cars, a change that would benefit companies such as Westly Groupâ s Tesla.

197

E-mails released by the White House also indicate that Westlyâ s advisory role gave him access to Obamaâ s top advisors and senior White House officials, including advisor Valerie Jarrett.

David Sandalow currently serves as the Assistant Secretary for Policy and International Affairs at DOE, where he acts as Secretaryâ s Chuâ s principal adviser on energy policy as well as coordinates DOEâ s foreign policy involvement.

199

Sandalowâ s ties to the White House date back to the Clinton Administration, during which he worked with President Clinton on environmental issues.

200

After having gained this experience, Sandalow became the influential Chair of the Energy & Climate Working Group of

the Clinton Global Initiative.

201

He went on to advise President Obamaâ s presidential campaign

in 2008.

202

Prior to joining the Obama Administration, Sandalow was a senior advisor to Good

Energies, Inc., an energy-focused venture capital firm.

203

Good Energies is an investor in

SolarReserve,

204

a solar power company that received a $737 million loan guarantee from DOE

in September 2011.

205

Sanjay Wagle

Sanjay Wagle has most recently served as Renewable Energy Advisor to DOE under

Secretary Chu, where he helped oversee the $11 billion renewable energy program under the

Recovery Act.

206

Wagle was an Obama fundraiser for the 2008 presidential campaign, garnering

much of his support through his Clean Tech for Obama group. Another venture capitalist that has

acquired an influential role at DOE, his industry colleagues believed that Wagle, among others,

â would help ensure commercial successes from â the steady flow of dollars coming out of

DC.â â

207

Prior to arriving in Washington, Wagle was a principal at Vantage Point Venture Partners

(Vantage Point), a cleantech venture capital firm whose investments received $2.4 billion in taxpayer funds.

50

Mascoma, which received $80 million for an ethanol plant.

209

Wagle left Vantage Point and

moved to DOE shortly after Obamaâ s election, â just as the administration embarked on a

massive program to stimulate the economy with federal investments in clean-technology

firms.â

210

His former firm and the companies it invested in, therefore, had a large stake in the

financing decisions being made by DOE at the time.

211

Steve Spinner

Steve Spinner served as an advisor to Secretary Chu from April 2009 to September 2010. In that position, Spinner helped oversee the strategic operations of the clean energy loan guarantee program under the Recovery Act.

212

Spinner was previously an energy-focused venture capitalist and high-tech consultant.

213

He is also an Obama bundler, having raised over $500,000 for the President in 2008,

214

and over $200,000 thus far for 2012.

215

Spinnerâ s wife, Allison Berry Spinner, is a partner at Wilson Sonsini Goodrich & Rosati, the law firm that represented Solyndra on matters related to the DOE loan.

216

According to federal records, the firm received at least $2.4 million in federal funds for legal fees related to the representation.

217

White House e-mails released late last year indicate that Spinner was influential in securing the $528 million loan to now-bankrupt Solyndra. Many of those emails were written just days after he signed an ethics agreement pledging that he would â not participate in any discussion regarding any application involvingâ his wifeâ s law firm.

218

In one message to a DOE

official on August 28, 2009, Spinner wrote, â How hard is this? What is he waiting for? . . . I have

OVP and WH breathing down my neck on this.â

219

The e-mail went on to demand that the DOE

official â walk over there and force [the official working on the Solyndra evaluation] to give

[him] an answer.â

220

After just being contacted by Solyndra, Spinner inquires in another e-mail,

â Any word on OMB? Solyndraâ s getting nervous.â

221

209

Id.

The e-mail correspondence occurring in

the final days before the Solyndra loan closed in September 2009 centers heavily on Spinnerâ s

efforts to coordinate plans for either the President or Vice President to announce the first loan approval at a scheduled visit to Solyndra.

222

Peter Weeks

Peter Weeks currently serves as Clean Energy Advisor at DOE, a position to which he was appointed in March 2009.

223

To be clear, there is no apparent connection between Mr. Weeks and a project that received a loan from DOE. However, his profound lack of experience in the renewable energy arena before being named as a top DOE advisor causes some concern. Prior to joining the Administration, Weeksâ s resume consisted primarily of Democratic campaign positions with groups such as Obama for America, Maine Democratic Party, Kerry for President, and Gephardt for President.

224

His prior experience was limited to communications and politics, and includes no record of any energy policy expertise.

225

According to Weeks, his work at DOE has included helping to â develop due diligence and procurement plans of 200 awards worth over $10 billion,â as well as â manage two multi-billion dollar energy tax programs.â

226

Additionally, Department e-mails also indicate that Weeks participated in meetings with and had access to high-level officials,

227

including Ron Bloom, giving him the opportunity to participate in decisions and exert some degree of influence.

228

It is puzzling how someone without any prior energy, project management, or finance

experience would be appointed to a position with responsibilities of this magnitude and particular nature. A private sector institution responsible for due diligence for billions of dollars in loans would never trust someone with only campaign experience to be involved with such technical issues. Given Weeksâ s consistent history of strong support of the Democratic Party and President Obama, his appointment adds to the perception that many of the Administrationâ s decisions have been driven by politics as opposed to any viable, coherent, energy policy.

Weeksâ s position at DOE appears to involve highly technical issues with high stakes and great sensitivity.

228

Id.

52

Solopower is a European firm that seeks to build a solar factory in Oregon. Solopower accepted $40 million of Oregon taxpayer money in addition to DOEâ s approval of a $197 million

loan via the Federal Financing Bank (FFB).

229

We believe that [average selling price (ASP) per watt] could decline to $1 or less within the next 1-2 years. From the output provided by the DOE, we concluded that even if SoloPower achieves the efficiency and yield projections of the DOEâ s base case, an ASP of $1 or less would severely strain SoloPowerâ s ability to meet its debt service obligations.

They received this federal assistance despite a rather dire prediction of Solopowerâ s prospects by Standard & Poorâ s (S&P). According to internal documents obtained by the Committee, S&P warned DOE that:

230

In other words, S&P predicted that Solopower will fail to meet its debt obligations.

Additionally, the loanâ s already extremely poor S&P rating of CCC+ appears to depend on lender protections that prevent loan disbursements unless benchmarks are met:

It is to lendersâ advantage that the company will not have access to the credit facility until it constructs and operates Line 1A at expected levels of performance. Similarly, the company cannot make the first or subsequent draws unless 30% of installed capacity is under contract to be sold.

231

According to S&P, these lender protections enable S&P to provide a CCC+.

232

The story of Solopower reflects a very concerning form of waste that creates substantial uncertainty as a byproduct, tying up private investor capital and federal funds until the entity fails (or succeeds) to achieve targeted benchmarks. If Solopower fails to achieve success sufficient to receive DOE funds, then those private investors anticipating the benefit of DOE loans will suffer substantial loss, resources will have been wasted, and employees will be let go

after a short time. However, if Solopower meets the requirements for disbursement, then the likelihood for failure and loss to the taxpayer are significant as the base case for the panel manufacturerâ s production costs does not reflect expectations for sufficiently competitive pricing.

In short,

the primary protection against losing $197 million of taxpayer money is the small chance that Solopower will ever get the money. Without these protections, it can only be presumed that the credit rating would fall to levels reflecting default.

What Solopower lacked in economic value, it made up for in political connections.

Unlike other 1705 loan guarantee recipients, Solopower exerted bipartisan political influence on DOE through strong ties to both the Bush and Obama Administrations. Solopower itself built the ties to the Obama Administration. Bruce Khouri, who served on the Board of Directors

237

Solopower, based in San Jose, California, developed an ally in Democratic San Jose Mayor

Chuck Reed. Mayor Reed sent letters to DOE and talked with DOEâ s Jonathan Silver in person

to advocate for and attempt to speed up Solopowerâ s loan guarantee.

238

Hudson Clean Energy Partners, the biggest investor in Solopower,

239

had strong ties to

the Bush-era DOE. Craig Cornellius, a member of the Board of Directors at Solopower and Managing Director at Hudson Clean Energy Partners, and Alexander Karsner, a member of the Hudson Clean Energy Partners Advisory Board, both worked in renewable energy positions for DOE during the Bush Administration.

240

Another Managing Partner for Hudson Clean Energy

Partners, Neil Auerbach, donated tens of thousands of dollars to Republicans in 2008.

241

Hudson

Clean Energy Partners also retained BlueWater Strategies to lobby both branches of Congress and the White House.

242

According to BlueWater Strategiesâ website, Andrew Lundquist,

founder and Managing Partner, â led George W. Bushâ s transition team for the Department of Energyâ and â served as a senior advisor and strategist on energy issues for the President and Vice President.â

243

With its ties to DOE officials in both the previous and current Administrations,

Solopower had people on both sides of the political aisle that could use their influence to pressure DOE into issuing and finalizing Solopowerâ s loan guarantee.

Dawn McCarty, Beacon Power, Backed by U.S. Loan Guarantees, Files Bankruptcy, BLOOMBERG, Oct. 31,

2011, available at:
http://www.businessweek.com/news/2011-10-31/beacon-power-backed-by-u-s-loan-guarantees-

files-bankruptcy.html.

both S&P and its own internal analysis regarding risky business models, DOE proceeded with a deal that will cost taxpayers millions in losses.

Before its demise, Beacon Power relied on funding from the federal government. DOE

gave Beacon Power over $25 million in grants.

246

However, the largest investment came when

DOE announced a conditional $43 million loan guarantee to Beacon Power on July 2, 2009, to

create a â 20 megawatt flywheel energy storage plantâ in Stephentown, New York.

247

In April

2010, S&P evaluated the loan guarantee project and assigned it a dismal CCC+ credit rating,

even though the rating incorporated the benefit of the $43 million loan guarantee.

248

The S&P

rating noted that â Beacon is currently an unprofitable start-upâ and that â significant exposure to

commodity price volatilityâ could significantly hurt the company.

249

S&P ran two default

scenarios, both of which demonstrated that taxpayers would lose millions.

250

DOE conducted its

own risk analysis and also assigned Beacon Power a junk CCC+ rating.

251

DOE, however,

ignored these warnings and finalized the loan guarantee in August 2010.

252

As predicted, Beacon Power continued to remain unprofitable and burn through money at

a rapid rate. In the weeks leading up to its bankruptcy, Beacon Power began spending hundreds

of thousands of dollars on law firms.

253

When Beacon Power went bankrupt, DOE tried to

minimize the bad publicity by arguing that it had required â many protections for the taxpayerâ in

the loan guarantee contract.

254

However, as Beacon Power continues to go through the

bankruptcy process, DOE now admits that taxpayers will likely lose millions on this bad

investment.

255

C. Abound Solar: Politics and a Risky Investment Collide

DOE could have avoided these loses by taking the warnings of S&P and its own

analysis seriously and not risking over $39 million on a company destined for failure.

255

Letter from David Frantz, Acting Executive Director of Loan Program Office, U.S. DOE, to Hon. Darrell Issa, Chairman, H. Comm. on Oversight and Govâ t Reform, Feb. 14, 2012 (Stating â the DOE stands to recover more than 70 percent of the taxpayerâ s investment.â However, even if DOE recovered 80 percent of its investment, taxpayers would still lose millions).

55

On July 3, 2010, President Obama announced during his weekly radio address that DOE would again invest hundreds of millions of dollars in a risky solar panel manufacturer. Much like Solyndra, Abound Solar manufactures solar panels using unproven technology, received a dismal credit rating for its loan guarantee, and has strong Democratic political connections. In fact, DOE finalized Abound Solarâ s loan in the same month that DOE worked to restructure the failing Solyndraâ s loan.

In between DOE issuing Abound Solar its $400 million conditional loan guarantee and finalizing it in December 2010, Fitch Ratings evaluated the project and assigned it a junk credit rating. Fitch gave the project a credit rating of â Bâ (worse than Solyndraâ s) with a recovery estimate of only 45%.

256

Despite including the benefit of the DOE loan guarantee in the rating (which likely made the rating more favorable), Fitch labeled the project â highly speculativeâ and described Abound as lagging in technology relative to its competitors, failing to achieve stated efficiency targets, and expecting that Abound Solar will suffer from increasing commoditization and pricing pressures.

257

In addition to these concerns, Fitch worried that Abound Solar needed to raise more private money to build its new facilities and that, if it could not, Abound Solar could default on its DOE loan.

258

Recently, Abound Solar began encountering the financial problems that Fitch predicted. In line with Fitchâ s prediction, Abound Solar has recently struggled to raise additional capital,

causing DOE to stop disbursing loan payments to the company.

259

More troubling, Abound

Solar announced on March 1

st

that it would stop producing solar panels and would fire 180

employees, even though it has already received $70 million from DOE.

260

256

Letter from Jason Paraschac, Senior Director, Fitch Ratings, to Steve Abely, Chief Financial Officer, Abound Solar, Nov. 4, 2010 (on file with author).

Abound Solar

continues to claim publicly that it does not have serious financial problems and will survive;

257

See id. at 4

â Aboundâ s lagging conversion efficiency negatively impacts the panelâ s installed costs which should negatively impact expected panel [average selling prices]. In addition, Fitch expects further price pressures in this market over the next 3-5 yearsâ ¦â

â Abound has not provided an explanation as to why gains in [solar panel] conversion efficiency have not materialized as expectedâ ¦â

â [Average selling price] assumptions in the new model are significantly below the prior plan. While this may in part reflect the lower conversion efficiency of [Aboundâ s] solar panel, it is largely a reflection of severe price contractions in the [solar photovoltaic panel] market over the past 24 months.â .

258

See id. at 7

â Abound must raise additional equity to fund the completion of its planned manufacturing facilities. An

inability to access equity markets could force an early default of the loan before construction is complete but also before the loan is fully drawn down.â .

56

however, its inability to raise capital and meet DOEâ s requirements likely indicate serious troubles ahead for the company, as predicted by Fitch.

Abound Solar has ties to Democratic politicians at the federal level and the state level in Colorado. Bohemian Companies, LLC, founded by Pat Stryker, became an early investor in Abound Solar (at the time AVA Solar) in October, 2008.

261

In addition to the initial funding, the

CEO of Bohemian Companies, Joseph Zimlich, has served as both a director

262

and a board

member of Abound Solar.

263

Pat Stryker is a major Democratic donor who Forbes included on

its 2011 list of top liberal spenders.

264

In 2008, Stryker donated $50,000 and bundled $87,500

for President Obamaâ s 2009 inauguration, and has given $35,800 to the 2012 Obama Victory

Fund.

265

Abound Solar also developed ties to Congressional Democrats. The company hired

then Democratic Congressman Paul Kanjorskiâ s nephew Russell as its vice president for

marketing.

266

Abound Solar supported the 2009 cap and trade bill in the House of

Representatives and funded an advertisement thanking then-Colorado Democratic

Congresswoman Betsy Markey for her vote in favor of the bill.

267

At the state level, then-Democratic Colorado Governor Bill Ritter strongly supported

Abound Solar and its application for a DOE loan guarantee. When Energy Secretary Chu visited

Colorado, Governor Ritter handed Secretary Chu a letter urging him to approve Abound Solarâ s

loan guarantee because it would allow the company to expand and hire new workers.

268

The combination of Abound Solarâ s junk credit rating, financial problems, and the companyâ s political connections raise serious concerns about whether DOE based the decision to invest $400 million on merit and whether taxpayers could again lose millions on a dubious solar manufacturing project.

D. Ormat Nevada: Strong Ties to Harry Reid

Senate Majority Leader Harry Reid announced on September 23, 2011, that DOE finalized a $350 million partial loan guarantee for three geothermal power plants owned by Ormat Nevada, Inc.

269

Press Release,Reid Announces Finalized Loan Guarantee for Ormat Geothermal Projects, United States Senator

Harry Reid, Sept. 23, 2011, available athttp://reid.senate.gov/newsroom/ pr_092311_geothermalloan.cfm.

57

Geothermal (see below) as Ormat received an almost $80 million engineering, procurement, and construction contract to build Nevada Geothermalâ s Blue Mountain plant.

270

Meaningful ties exist between the Senator and Ormat. Two of Ormatâ s federal lobbyists previously worked for Senator Reid. Ormatâ s outside lobbyist, Kai Anderson of Cassidy and Associates, served as Senator Reidâ s Deputy Chief of Staff up until 2005.

271

Anderson lobbies

both the House of Representatives and the Senate for Ormat.

272

Anderson has given close to

$90,000 to Democratic candidates and campaign committees over the past three cycles, including thousands to Senator Reid.

273

Ormatâ s company lobbyist, Director of Policy and Business

Development Paul Thomsen, served as a â Regional Representativeâ for Senator Reid through

2005.

274

Thomsen gave thousands in political contributions to Senator Reid.

275

During Senator

Reidâ s 2010 reelection campaign, Thomsen starred in a campaign ad for Senator Reid to

advertise the benefits of Ormatâ s loan guarantee for Nevada.

276

In addition to Anderson and

Thomsen, Ormatâ s President, Yoram Bronicki, gave thousands in political contributions to

Senator Reid.

277

E. Nevada Geothermalâ s Blue Mountain Project

The strong ties between the company and the Senate Majority leader raise

questions about whether the DOE acted in the best interests of the American people when it

approved the loan guarantee.

On June 15, 2010, DOE announced that it would conditionally issue a $98.5 million

partial loan guarantee to Nevada Geothermal Power Company (Nevada Geothermal).

278

270

Nevada Geothermal Application for DOE Loan Guarantee, U.S. Depâ t of Energy, Nov. 2, 2009 (on file with author).

This

loan enabled Nevada Geothermal to refinance the Blue Mountain Geothermal Project (Blue

Mountain) through John Hancock Financial Services (John Hancock). In other words, the DOE

Press Release, Energy Department Offers Conditional Commitment to Support Nevada Geothermal Development

with Recovery Act Funds,U.S. Depâ tt of Energy, June 15, 2010, available at: https://lpo.energy.gov/?p=805.

58

loan paid back a prior financial obligation of Nevada Geothermal. This was the first of DOEâ s â Financial Institution Partnership Programâ (FIPP) loan guarantees, under Section 1705, where private investment groups worked with DOE to provide financing to energy projects.

279

Less

than three months after the conditional approval, DOE finalized this loan guarantee, enabling Nevada Geothermal to refinance a loan from TCW through John Hancock.

280

The loan did not finance any new construction and therefore did not help to create a single new job. DOEâ s awarding of this loan guarantee raises questions about why DOE was investing significant taxpayer resources in an entity with well-established financial difficulties. In the press release for the project, Secretary Chu and Senate Majority Leader Harry Reid touted Blue Mountainâ s potential, with Senator Reid saying that, â I am glad to see economic recovery funding being used to put Nevadans to work on a project that will help us achieve energy independence. Northern Nevada is the Saudi Arabia of geothermal energy and I thank

Secretary Chu for recognizing the Silver Stateâ s enormous job-creating potential to produce plenty of clean and affordable energy.â

281

It was known to him at that time, however, that the loan would not create a single job, but instead simply refinance an existing loan, despite DOEâ s claim that it would create over 200 jobs.

282

1. Misuse of the DOE Loan Guarantee as a Tool to Bailout Creditors

Nevada Geothermal has a well documented history of major financial problems. By the time DOE conditionally approved the loan guarantee, Nevada Geothermal had already violated contract terms and debt covenants relating to financing from its primary lender, TCW. According to Nevada Geothermalâ s financial statements, the firm would not avoid default without the benefit of a loan guarantee.

On October 2, 2011, The New York Times ran a story about the financial difficulties of Nevada Geothermal, relying partially on a September 2011 Deloitte & Touche audit of the company which stated â significant doubt about the companyâ s ability to continue as a going concern.â

283

In response, DOE dismissed the financial problems of Nevada Geothermal and instead pointed to the alleged financial health of Blue Mountain to argue that the loan guarantee would be repaid.

284

Given that Nevada Geothermalâ s principal operation is Blue Mountainâ s Faulkner I Power Plant, such a distinction has questionable merit.

285

Peter Urban, DOE Remains Confident in Nevada Geothermal Plant, LAS VEGAS REVIEW-JOURNAL, Oct. 4, 2011,

available at http://www.lvrj.com/news/doe-remains-confident-in-nevada-geothermal-plant-131035678.html.

285

See Nevada Geothermal Power Inc., Consolidated Financial Statements, June 30, 2010 at 6, available

athttp://www.nevadageothermal.com/i/pdf/Annual_Financials_2010.pdf.

As noted above, at the time DOE approved the conditional loan guarantee, Nevada Geothermal had already violated terms to the loan agreement with its primary creditor, TCW. Based on financial disclosures, Nevada Geothermal avoided default as a result of TCWâ s granting a waiver and extension in anticipation of the John Hancock financing backed by the DOE loan guarantee. The resulting DOE bailout of Nevada Geothermal was planned out in advance, as made clear by Nevada Geothermalâ s March 31, 2010 Financial Statements:

> The Company has engaged John Hancock to provide long term debt up to $95 million which will be used to pay down the TCW loan and to fund additional drilling. However, this potential John Hancock loan is subject to due diligence and final credit committee approval by John Hancock. There is no certainty that the anticipated debt financing through John Hancock will be obtained. Failure to obtain the John Hancock loan, or a similar loan from another lender, and/or unsuccessful drilling may result in a default under the terms of the TCW loan agreement. In the event of a default TCW may elect to call the loan and execute upon the security, which would result in a material adverse effect on the Company, including delay or indefinite postponement of operations and further exploration and development of our projects with the possible loss of such assets.

286

The story continued to unfold in Nevada Geothermalâ s June 30, 2010 Financial

Statements, where the plan to bailout their lender, TCW, was successfully executed by DOE:

(emphasis

added)

As at June 30, 2010, the Company was not in compliance with the

terms of the TCW loan. The non-compliance results from the Company having

exceeded the maximum loan amount of $180 million, and having exceeded the

drilling expenditure budget by more than $3.8 million, as well as some instances

of technical non-compliance with other loan terms .â ¦ As a result, for balance

sheet purposes, the TCW long-term loan has been classified as a short-term

liability. On November 20, 2009, TCW agreed in principle to waive the non-

compliance until March 31, 2010 in return for 4.5 million NGP Inc. warrants

exercisable at CAD 1.50 (Note 21(f)). Subsequently, TCW agreed to extend the

agreement in principle, without change, until the John Hancock loan

[guaranteed by DOE

287

286

Nevada Geothermal Power, Inc., Consolidated Financial Statements, Mar. 31, 2010, at 11, available at

http://www.nevadageothermal.com/i/pdf/Q3_March_31_2010.pdf.

] closed. The John Hancock loan was closed on

287

Nevada Geothermal Power, Inc., Consolidated Financial Statements, June 30, 2010, at 55, available at

http://www.nevadageothermal.com/i/pdf/Annual_Financials_2010.pdf (Explainingthe John Hancock loan

guaranteed by DOE: â On October 13, 2009 the Company [Nevada Geothermal] announced that it appointed John

Hancock Life Insurance Company (â John Hancockâ) to be the exclusive debt provider for up to $95

Million 20-year

term loan. Further to the above, on October 7, 2009, the DOE announced its Financial Institutions Partnership

Program (â FIPPâ), a program supported by the 2009 ARRA. The FIPP program is designed to facilitate long term

financing for renewable development projects using commercial technology and applies to up to 80 percent of the

loan amount. John Hancock, as Lender for the Blue Mountain 'Faulkner 1' geothermal project, made an application

to the DOE for a Loan Guarantee under the FIPP. The loan guarantee was conditionally approved on June 15, 2010,

and the loan closed on September 3, 2010â ¦.At the closing of the John Hancock/DOE loan after paying associated

fees and funding reserve accounts for drilling, interest and plant maintenance the Company paid the TCW loan

down to approximately $86.9 million. The Company plans to apply for a second ARRA grant based upon work, to

60

September 3, 2010, and a repayment of $81,076,669 was made on the TCW

loan.

288

Confirming this troubling misdirection of taxpayer funds, the Summary of Proposed

Terms and Conditions for the Conditional Loan Guarantee, signed by Secretary Chu, provides

that the â proceeds of the Guaranteed Obligation will be used for the following: (i) Partial

repayment of intercompany loan from HoldCo [Blue Mountain], in the amount of approximately

80 million;â ¦â

(emphasis added)

289

This intercompany repayment would ultimately flow to TCW as described

above. The remaining amount of the loan went to the posting of cash collateral to NV Energy, Inc., funding a debt service reserve account, funding a maintenance reserve account, funding a drilling expenditure account (which included already incurred costs), and other fees. As these numbers total to around $98 million, it appears that little, if any, of the loan went to fund new drilling or new construction.

290

2. This Bailout Appears to Violate the American Recovery and Reinvestment

Act of 2009

Not only does it appear that DOE purposely directed taxpayer funds to a failing

enterprise, DOEâ s action robbed taxpayers of genuine investment toward renewable energy. This loan guarantee bailed out lenders (TCW) and provided no assurance that TCW would apply the money that it recovered toward the economy or jobs as required by the American Recovery and Reinvestment Act of 2009.

Title XVI, Section 1602 of the American Recovery and Reinvestment Act of 2009,

requires that â recipients shall also use grant funds in a manner that maximizes job creation and economic benefit.â

291

increase power production, subsequent to the first grant that will be partially funded by the John Hancock/DOE

loan.â).

Paying off a creditor clearly does not maximize job creation and

economic benefits. Rather, it provides an opportunity for private industry to exit an investment, deleverage and transfer the extraordinarily high default risk to taxpayers.

Loan Guarantee LGPO Loan Number: F1001, U.S. Depâ t of Energy, June 15, 2010 at. 4 (on file with author).

290

Nevada Geothermal Power, Inc., Conditional Loan Guarantee, U.S. Depâ t of Energy, Summary of Terms and

Conditions at 4 Summary of Terms and Conditions (Stating â USE OF PROCEEDS: The proceeds of the

Guaranteed Obligation will be used for following:

(i) Partial repayment of intercompany loan from HoldCo in the amount of approximately $80 million;

(ii) Funding security requirements under the power purchase agreement signed on August 18, 2006 with NV

Energy, f/k/a Nevada Power Company (â PPAâ), either by posting cash collateral, cash collateralizing

one or more letters of credit, or otherwise in accordance with the PPA in amount of $3.8 million (the

â PPA Credit Supportâ);

(iii) Funding of the Debt Service Reserve Account in the amount of approximately $5.5 million, Major

Maintenance Reserve Account in the amount of $125,000, and Drilling Expenditure Account in the

amount of approximately $8,400,000 (less amounts applied to reimburse the Borrower for Project

Costs incurred prior to the Closing Date in connection with the Additional Wells (as defined below));

(iv) The payment of certain fees and transaction expenses associated with the Guaranteed Obligation which are

permitted to be paid with such proceeds under the Solicitation as set forth in Schedule 1; and

(v) Initial funding of the Operating Account with all remaining proceeds of the Guaranteed Obligation.â).

291

American Recovey and Reinvestment Act of 2009 Â§1602, Pub. L. No. 111-5.

61

For this reason, it appears DOE, in its very first FIPP section1705-based loan guarantee, violated the spirit and, quite possibly, the letter of the law.

3. Given the â Pari Passuâ Deal Terms and the Required Consent of all Lenders to Reorder Priority, the Terms of the DOE Loan Guarantee Appear to Violate the Requirement of Superiority under Title XVII, Section 1702(g)(2)(B)

The Summary of Terms and Conditions in the Conditional Loan Guarantee signed by Secretary Chu that relates to the Blue Mountain loan guarantee, at page 8, provides for a pari passu and pro-rata right of payment for senior creditors.

292

This means that the unguaranteed senior lender, John Hancock, stands equal to taxpayers in terms of recovering a share of their loss in the event of default. The Summary of Terms also requires the consent of all Lenders in the event that DOE seeks to â change to the priority of payment in the payment waterfall.â

293

4. Nevada Geothermalâ s Continuing Problems

The combination of the pari passu credit terms, which ranked John Hancock as an equal to taxpayers, with DOEâ s inability to reorder priority in case of a default, disables the ability of DOE to rely on its superiority as required under Section 1702(g)(2)(B).

Since DOE finalized Nevada Geothermalâ s loan guarantee in September 2010, the project continues to have operational and financial problems. The project has an ongoing problem with

electrical fires. In January 2010 (before the loan guarantee), part of the Blue Mountain plant was damaged after electrical cables were placed too close together and burned; a significant amount of cable was destroyed and had to be replaced.

294

In October 2011, another fire occurred because the seal on one of the pumps failed, causing part of the plant to go offline for major repairs.

295

Operational problems at the Blue Mountain project resulted in revenue being less than estimated the last four months of 2011.

296

Additionally, in November 2011, one of Nevada Geothermalâ s major creditors considered placing Nevada Geothermal in default because of a late payment,

297

and Nevada Geothermal lost $3.9 million in the fourth quarter.

298

F. Granite Reliable

In September 2011, Granite Reliable Power, LLC, a wind generation company owned by the Brookfield family of companies, received a partial guarantee for $168.9 million loan from DOE.

299

292

62

Coos, New Hampshire.

300

Unlike other loan recipients, Granite Reliable was a very profitable company without any demonstrated need to obtain a loan subsidy in order to secure private financing.

301

Until 2011, Granite Reliable was owned and controlled by Noble Environmental Power, Inc. Noble sold that 75% interest to BAIF Granite Holdings, Inc., just prior to the projectâ s loan approval in September 2011.

A deeper look into the players and circumstances surrounding this decision suggest that politics may have led DOE to approve the loan.

302

BAIF Granite Holdings (BAIF) was created by Brookfield Renewable Power, a subsidiary of the $3.2 billion company Brookfield Asset Management (BAM).

303

Brookfield Renewable Power financed the creation of BAIF from its Brookfield Americas Infrastructure Fund, which reportedly has assets totaling $2.7 billion.

304

The remaining

minority interest is owned by Freshet Wind Energy, LLC, which partnered with BAIF on the

project.

305

1. Brookfieldâ s Company Background: Board Members, Holdings, and

Investors

Given the solid financial background from which Granite Reliable was formed, it is

unclear why DOE determined that the company needed a $168.9 million loan guarantee.

One reason DOE determined a loan guarantee may have been necessary may lie in the

inner workings of the BAM family of companies and the companiesâ strong Democratic ties.

BAM owns BAIF, which owns Granite Reliable, as well as Brookfield Office Properties (BOP).

BOPâ s Board of Directors is chaired by John Zuccotti, the man for whom New York Cityâ s

Zuccotti Park is named, and includes Diana Taylor, New York City Mayor Michael Bloombergâ s

long-time girlfriend.

306

George Soros and Martin J. Whitman, both prominent Democratic

donors, are both heavily invested in Brookfield.

307

Moreover, Heather Podesta, sister-in-law of

Obamaâ s influential White House transition director John Podesta, and the Podesta Group served

as the lobbyists for BAIF.

63

2. Nancy Ann DeParle: Obamaâ s Deputy Chief of Staff for Policy and Noble Interest Holder

As described in Section V, Part B of this report, Nancy DeParle suffered a conflict of interest during her time in the Administration. As indicated on her financial disclosure forms, prior to joining the White House, Nancy DeParle was one of five managing directors of a multi-billion dollar private equity firm CCMP

309

While with CCMP, she sat on the board of directors

for Noble Environmental Power, LLC, one of CCMPâ s investments.

310

She served as a board

member of Noble for about two years and quit in March of 2009.

311

Noble owned Granite

Reliable.

Coinciding with her tenure at the White House, DOE considered a loan guarantee for

Granite Reliable. The Granite Reliable project was well underway by late 2009.

312

Noble then

sold Granite Reliable in December 2010 to Brookfield Asset Management, just 6 months prior to the conditional approval of the DOE loan guarantee and deep into the application process.

313

The

DOE loan guarantee was conditionally approved in June 2011 and finalized in September 2011. The ultimate approval of the DOE loan guarantee that followed the sale of Granite

Reliable is tainted by DeParleâ s position within the White House and her financial interest in Noble. DeParleâ s position in the Administration could have been used to influence the successful sale by ensuring or increasing the likelihood of ultimate approval of the DOE loan guarantee. The loan guarantee would increase the value of the Granite Reliable, improving the sale price and, thereby, improving the investment of DeParleâ s son.

G. Record Hill Wind: DOE Uses the First Solar Precedent to Speed

Through Another Questionably â Innovativeâ Technology

DOE relied on the First Solar precedent to approve Record Hill Windâ s $102 million loan guarantee project as â innovative,â despite the project using commercial technology. DOE knew that the Record Hill project did not use significantly innovative technology. The Standard & Poorâ s credit rating for the project that DOE received clearly indicates the commercial (and non-innovative) nature of the project:

Record Hill has entered into a Turbine Supply Agreement for the shipment of 22 Siemens 93SWT[Siemens Wind Turbine] 2.3MW wind

64

turbines to be installed at the site. The SWT-2.3-93 turbine has been in operation in Europe since 2005, and the first turbines in the US were installed and began operations in 2006. Currently, there are a total 1,374 SWT-2.3-93 turbines operating worldwideâ ¦.

â ¦Due to harsh winter conditions in Maine, the project plans to install a cold weather package on all turbines, which will keep the turbines running in cold temperatures. Siemensâ cold weather packages are currently in use on turbines in Canada, Norway, and other cold areas, and have performed to expectations. Along with a cold weather package, the project expects to make use of Siemens proprietary Turbine Load Control (TLC) technologyâ ¦Given that the technology is software-based, however, and is not considered a fundamental component in the performance of the turbine, the TLC could be shuttered without damaging the turbine if it does not work properly. In this case, the turbines would continue to run similar to Siemensâ existing fleet.

314

Much like First Solarâ s â innovativeâ projects, the Record Hill Wind project attempted to categorize minor modifications to existing commercial technology as â innovativeness.â DOE eventually agreed with Record Hill Windâ s questionable reasoning. On December 14, 2010, Todd Shrader of DOE sent an email to several DOE personnel with the subject line â Eligibility Intepretation (sic)â that read: (emphasis added)

An eligibility issue arose during the technical evaluation of Ocotillo Express (FIPPâ F1033). This project is utilizing Siemens SWG-2.3-101 wind turbine generators. It is claimed to be a commercial technology based on the wide spread use (including in this country) of the closely related Siemens SWG-2.3-93 turbines, which are essentially the same just with smaller blade lengths (101 feet vs. 93 feet). Without looking deeper into the design differences (which will occur at due diligence), I concur with the applicant that this is a commercial technology. However, for Record Hill, which is using SWG-2.3-93 turbines, it is claimed that this is a new and innovative technology, partially based on no use over 5 years in the US for these turbines. I also believe there were some differences in internal controls. However, the 101 and 93 units are essentially the same technology. Can the same technology be innovative under the Renewables Solicitation and Commercial under the FIPPâ s solicitation?

315

Later in the day, Ruth Ku of DOE replied that the same question had occurred before with a different project and that the â project was asked whether it could obtain alternative financing in the private marketâ ¦the project was able to get alternative financing (e.g., with John Hancock) and I think the recommendation was for it to move

its application to FIPPâ ¦donâ t know where Record Hill is in its process for it to be

(emphasis added)

65

feasible for it to apply under FIPP at this point.â

316

Ruth Ku forwarded her email to

Douglas Schultz, a Program Manager at DOEâ s Loan Programs Office. Douglas Schultz replied, â Record hill is well into due diligence with [D]avid [S]chmitzer. No reason to transfer at all. In terms of precedent of innovative and not look no further than first solar where there [sic] panels are both innovative and noninnovative given the inverter used.â

317

Ruth Ku agreed with Douglas Schultz but worried that submitting two project applications using the same technology as innovative and not innovative could cause a â policy issue for OMB.â She wrote back to Douglas Schultz stating â [I]t cld [sic] be a policy issue for OMB if record hill followed Ocotillo. Think itâ s probably less of an issue if record hill was first then Ocotillo.â

(emphasis added)

318

After scheming about how to get the two

applications through OMB without problems, DOE allowed the Record Hill Wind project

to continue as an â innovativeâ project.

319

H. Genesis Solar: An Expedited Approval Process Now Threatens Entire

Project

DOE would eventually finalize a $102 million

loan guarantee (guaranteed 100% by the federal government) in August 2011.

On August 20, 2011, DOE awarded NextEra Energy Resources LLC (NextEra) a partial

loan guarantee for $825 million to fund the Genesis Solar Energy Project (Genesis). A planned

250-megawatt plant to lie on 1,950 acres of federal land located outside Blythe, California,

Genesis plans to power more than 187,500 homes by 2014.

320

Standard & Poorâ s gave NextEra

a BBB+ rating, highly dependent on a long term Power Purchasing Agreement (PPA) with

Pacific Gas &Electric (PG&E), and a Construction Completion Agreement with NECH, noting

that if eitherâ s credit ratings were downgraded in the interim, it would hurt Genesisâ s rating as

well.

321

S&P emphasizes that the loan guarantee would only support the project for up to a six

month delay. Additional delays would restrict Genesisâ s ability to meet the PPA and jeopardize

the success of the project.

322

An accelerated state and federal site approval process allowed the project to gain DOE

approval, but the hasty work may now endanger the entire project. Genesisâ s original site resided on a section of Ford Dry Lake, which archeologists suspected contained ancient cremation sites.

323

316

Email from Ruth Ku, U.S. Depâ t of Energy, Dec. 14, 2010 (on file with author).

To minimize delays, NextEra moved the project two miles north to a new site, still on federal land. DOEâ s application process requires extensive vetting of project sites for a variety of environmental factors. However, to expedite site approval, NextEra opted for a less thorough process developed by the state energy commission (The Commission) and the Bureau of Land Management (BLM) that would â streamline the time necessary to produce the

317

Email from Douglas Schultz, U.S. Depâ t of Energy, Dec. 14, 2010 (on file with author).

318

Email from Ruth Ku, U.S. Depâ t of Energy, Dec. 14, 2010 (on file with author).

319

DOE did not finalize a loan guarantee for the Ocotillo Express project.

66

joint cultural resources analysesâ ¦foregoing potentially lengthy investigations to evaluate the historical significance of the cultural resources found.â

324

The Commission did warn Genesis of the potential consequences associated with the site approval process in August 2011, stating, â This approach however has the real potential to result inâ ¦delays in construction start-up, increase in requisite construction monitoring, and cost.â

325

After DOE granted final approval to the project and construction began, grading equipment unearthed grinding stones lying on a bed of charcoal, indicating possible evidence of human settlements. This discovery caused work to halt on 400 acres of the Genesis site while the company and regulatory agencies discuss various options. The hasty approval process that prevented the earlier discovery has compromised the construction schedule and put Genesis in

serious jeopardy of not satisfying its obligations under the PPA. NextEra has admitted that these delays may have serious consequences for the project; according to a NextEra Senior Vice President, â the project could become uneconomical.â

As part of the process, NextEra dug 500 test pits 3feet deep and found no artifacts, allowing them to proceed with construction.

326

In addition to these problems, the new site also encroached on the habitat of the endangered Kit Foxes, native to the California desert. NextEra used â passive hazingâ techniques approved by state and federal biologists to remove the foxes prior to site grading of the area. Essentially, NextEra sprayed coyote urine around dens and removed food sources. Two dead foxes were found on site in October 2011, which died from Distemper, a disease similar to Rabies spread by bodily fluids, never previously recorded in Kit Foxes. Ultimately, seven foxes died from NextEraâ s removal process.

I. General Electricâ s Broad Access to Loan Guarantees: Caithness Shepherds Flat, 1366 Technologies and Kansas City Southern Railway Company

General Electric (GE) sponsored a project called Caithness Shepherds Flat (Caithness), and also supplied the project with 338 wind-turbines. High level Administration officials expressed concern that the project was receiving an excessive amount of public subsidy, and that private parties did not have sufficient â skin in the game.â In a Memorandum for the President (â Summersâ Memoâ) dated October 25, 2010, Carol Browner, Ron Klan and Larry Summers revealed concerns regarding excessive over-subsidization of the Caithness project, where grants, tax credits and loan guarantees provided 65% of the funding for the project. Because of the excessive subsidy, the memorandum reveals expectations of a 30% return to the

324

Letter from Mike Monasmith, Project Manager, California Energy Commission, to Scott Busa, Director, NextEra

Energy Resources, LLC, Dec. 3, 2009, available at http://www.energy.ca.gov/sitingcases/genesis_solar/

326

Louis Sahagun, Problems Cast Shadows of Doubt on Solar Project, L.A. TIMES, Feb. 11, 2012, available at http://articles.latimes.com/2012/feb/11/local/la-me-solar-foxes-20120211.

private investors generated on the backs of taxpayers.

Four months after DOE approved the Caithness loan, President Obama named Jeff Immelt, the CEO of GE, as the Chairman (Job Czar) of the Presidentâ s Council on Jobs and

Competitiveness (Jobs Council). As the Chairman of the Job Council, Immelt had direct access to President Obama.

327

327

About the Council, Presidentâ s Council on Jobs and Competitiveness, available at http://www.whitehouse.gov/administration/advisory-boards/jobs-council/about (Stating it shall, â Report directly to

Since Immeltâ s appointment as Job Czar, two additional GE related

68

government-backed transactions have occurred. First, the poorly rated 1366 Technologies, sponsored in part by GE,

328

received a direct $150 million loan commitment from DOE for its solar manufacturing plant.

329

Second, on February 22, 2012, the Federal Railroad Administration (FRA) loaned $54.6 million to Kansas City Southern Railway Company (KCSR) under the Federal Railroad Administration-administered Railroad Rehabilitation and Improvement Financing (RRIF) Program to purchase thirty new General Electric ES44AC diesel-electric locomotives.

330

Regarding KCSRâ s purchase of GE locomotives, the railroadâ s filings with the Securities and Exchange Commission (SEC) reveal a twenty-five year, $54.6 million loan at 2.96%.

331

KCSR received this loan despite reporting strong earnings. For the year 2011, KCSR reported operating income of $612 million on $2.1 billion in revenues, a 26% increase over the prior year â not the picture of a company in need of assistance in the form of a $54.6 million loan.

332

VII. Breakdown of Problems with ATVM Loans

As a result of this subsidized loan, the highly profitable KSCR gained a competitive advantage over its freight rail competitors.

Each of the â Big Threeâ auto manufacturers, Ford, General Motors, and Chrysler, along with Nissan, applied for loans under the ATVM Program. Ford and Nissan are the only major manufacturers that received an ATVM loan. The companies received $5.9 billion and $1.4 billion respectively.

333

Both General Motors and Chrysler withdrew their applications after waiting over a year for responses from DOE.

334

Initially, financial viability was the primary roadblock that kept GM and Chrysler out of the running for Department of Energy loans.

335

the President on the design, implementation, and evaluation of policies to promote the growth of the American economyâ ¦â).

Some speculated that the entire program had been put on hold in order to give these two manufactures time to prove their financial viability and qualify for loans that would have drained

69

the program of remaining funds.

336

In the end, both companies withdrew their applications,

choosing instead to seek private financing. The other loan recipients are Fisker, Tesla, and The Vehicle Production Group, receiving $529 million, $465 million, and $50 million,

respectively.

337

It is unclear whether DOE has a set of objective standards by which it judges the relative merit of applicants. Based on materials obtained by the Committee, it appears that DOE applies inconsistent standards to each applicant, leaving innovative car companies in a state of perpetual

uncertainty over how they will be treated under the process. These concerns are apparently shared by Senator Diane Feinstein, who wrote DOE complaining that, â On multiple occasions, the department has missed internal deadlines for initial decisions, term negotiations, final decisions and loan closure.â

To date, the ATVM Program has loaned $8.339 billion to five auto manufacturers for the production of ATVs.

338

This haphazard administration of the ATVM Program creates confusion in the advanced technology vehicle market and may have actually hurt President Obamaâ s goal of fostering a new generation of vehicles.

339

Despite an apparent lack of discernible objective criteria to judge the relative merit of loan applicants, it does appear that ties to the Obama Administration were important for those companies securing an ATVM loan early on in the process. Both Ford Motor Co. and Nissan were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012- 2016 at the time DOE was considering their applications.

340

Both companies eventually expressed publically their support for these standards, which the Administration described as the â Historic Agreement.â

341

In addition to this curious timing associated with the approval of Ford and Nissanâ s loan, the other recipients each enjoyed close ties to the Administration. For example, Fisker was backed by Kleiner, Perkins, Caufield & Byers, which has significant ties to the Administration.

342

One of the senior partners at Kliner Perkins is

former Vice President Al Gore. Another partner, John Doerr, serves on Obamaâ s Council on

Jobs and Competitiveness.

343

In the case of Tesla, board member Steve Westly was a major

Obama campaign bundler and a frontrunner for the position of Secretary of Energy.

Case Studies:

There has been very little activity in the ATVM loan program over the last three years, as DOE has only approved one loan since April 2010. Moreover, the Committee has yet to receive a response from DOE to its February 10, 2012, letter asking for additional information about the loan application process. Even so, the Committee has gleaned some information about the companies that DOE has considered for ATVM loans. These stories reveal the haphazard manner in which DOE is administering the program and how ever-changing goal posts and broken promises have promoted the misallocation of scarce resources and pushed some innovative companies into bankruptcy.

Aptera

Aptera first applied for an ATVM loan in December 2008, looking for money to fund the production of the Aptera 2e, a three-wheeled vehicle capable of nearly 200 miles per gallon.

345

Although DOE rejected Apteraâ s original application for a loan because a three-wheeled vehicle did not meet the criteria of a Section 136 loan, Congress amended the program in October 2009, and Aptera resubmitted its application in January 2010 for both the 2e and a four-wheeled vehicle.

346

By late 2010, DOE determined that the 2e would not be able to pay back capital costs.

347

Accordingly, Aptera shifted its focus to the 4e, a four door electric sedan, that DOE believed would be more suited to an ATVM loan program.

348

After numerous negotiations with

DOE, in September 2011, Aptera received a letter from DOE offering them a conditional loan commitment of $150 million if the company was able to raise $80 million privately.

349

Aptera shut down on December 2, 2011, citing the inability to raise additional private capital, having exhausted a bridge loan that was supposed to last through the time DOE made a final decision on the loan.

350

At this point, Apteraâ s investors had funneled $40 million of their own money into the project. Former Aptera CEO Paul Wilbur and former marketing Vice President Marques McCammon have publically asserted that the prolonged timeframe spent engaging with DOE to secure a loan ultimately consumed their cash reserves.

351

Wilber stated that a â bright shiny object diseaseâ characterized the ATVM Program and suggested in retrospect, â We should have raised the money ourselves rather than relying on DOE.â

352

345

John Voelcker, Aptera Collapse: How & Why It Happened, A Complete Chronology, Dec. 12, 2011, available at http://www.greencarreports.com/news/1070490_aptera-collapse-how-why-it-happened-a-complete-chronology; Basem Wasef, Aptera Unveils 200-mpg 2E Prototype, Popular Mechanics, Apr. 12, 2010, available at http://www.popularmechanics.com/cars/news/preview-concept/aptera-200-mpg-2e-prototype.

However, the loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company

71

throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.

353

Bright Automotive

Bright Automotive was an Indiana company that developed a plug-in hybrid delivery vehicle that it planned to market to fleet customers.

354

On February 28, 2012, Bright sent DOE a scathing letter announcing that they â have been forced to say uncleâ and that it would withdraw from the ATVM application process.

355

Bright applied for an ATVM Loan in December 2008 and its application was deemed â substantially completeâ at that time.

356

DOE continued to review the application for an additional 1,175 days.

357

According to the company, Bright secured letters of support sent to Secretary Chu from large fleet vehicle users such as Cox, Comcast, and Bust Buy, and had order letters from Duke, Vectren, and Snap On.

358

According to documents obtained by the Committee, on March 2, 2012, Lachlan Seward, then the Director of the ATVM Program, indicated to Bright that a loan for less than $300 million would be quickly approved.

359

In DOEâ s next communication, DOE suggested that

Bright partner with a large OEM in order to speed up the loan process, intimating that

conditional approval would occur in â weeks, not months.â

360

Pursuant to this advice, Bright

entered into a strategic partnership with GM in July 2010.

361

At that time, DOE officials

informed Bright that they would receive a conditional loan agreement within two months.

362

Two months later, DOE came back to Bright and directed the company to satisfy six additional

loan pre-conditions.

363

By January 2011, Bright received a â near finalâ conditional agreement

for a $314 million loan.

364

It was reviewed by the DOE credit team for five months when on

May 18, 2011, DOE determined that it would not consider Brightâ s loan based on a volume

consideration report generated by DOE, one that Bright had asked DOE to reassess.

365

DOE

contractors, A.T. Kierney, conducted a new volume study, which led to Brightâ s reconsideration

for a loan by DOE in June 2011.

366

353

Id.

DOE once again assured Bright that just as soon as the

companyâ s credit package went through the interagency process, it would receive an offer of

72

conditional agreement no later than October 2011.

367

However, instead of an agreement, in

October 2011, DOE told Bright to raise additional equity and perform other financial changes to bolster its balance sheet and credit.

368

This last demand caused Bright to withdrawal from the

ATVM loan process.

369

In their letter to the DOE, Brightâ s CEO Rueben Munger and COO Mike Donoughe flatly stated that the ATVM process distorted the U.S. private equity markets, effectively making DOE the only way for ATV companies to receive funding. According to Munger and Donoughe, DOE then used this position to submit the applicants to the control and â whimâ of government bureaucrats.

In February 2012, the company closed down.

370

Severstal

As the letter points out, the ATVM program, as DOE is administering it,

contravenes the purpose of the program because it stymies rather than advances technology within the automotive market. After spending millions of dollars to comply with DOEâ s endless finish line and consuming nearly three years of time, Bright withdrew its application from the

ATVM Program, closing the company and its idea.

While DOE was stringing along potentially innovative auto manufacturers, they were working to approve a conditional loan agreement for a business that did not appear to qualify at all for the ATVM Program. In June 2011, DOE conditionally approved a $730 million loan to steel company Severstal North America, a subsidiary of OAO Severstal, and a multibillion-dollar Russian steel and mining corporation. The ATVM loan would have financed Severstalâ s expansion and re-equipment of a Dearborn, Michigan, steel plant, located within Fordâ s manufacturing campus, to produce advanced high strength steel (AHSS). Chairman Issa challenged the appropriateness of this loan for several reasons: Severstal applied for a loan to produce AHSS, a material, not a â component partâ as required under Section 136;

371

and it did

not appear that the company needed public funding to â bring its product to marketâ as it was a subsidiary of a multi-billion dollar Russian corporation. Moreover, Severstal had already made significant strides towards completing the Dearborn project through private financing, even before receiving any money from DOE.

372

In its initial response to the Committee, DOE

defended its due diligence and decision-making on the Severstal loan, touting the market strength of the companyâ s product.

373

On January 6, 2012, DOE reversed its position and denied Severstalâ s loan. When asked why it has changed its mind, DOE informed Committee staff, â We [DOE] could not get

73

comfortable with apparent discrepancies and potential of fluctuation in steel prices,â and therefore would not offer the loan to Severstal.

374

This explanation is curious, as DOE offered the conditional loan agreement based on a forecasted increase in market demand for AHSS.

375

DOE had originally projected Severstal to be the market leader in domestic AHSS production, even as other companies entered the American AHSS market.

376

Fisker

DOE decided not to give a final loan to Severstal and, in so doing, questioned the companyâ s ability to repay the loan. Based on the apparent contradiction between DOEâ s analyses, it is obvious that DOE has no clearly established standard it uses to evaluate ATVM loan applicants.

One of DOEâ s original loans has been suffering severe setbacks in production, and many have predicted its eventual collapse.

377

In April 2010, DOE issued an ATVM loan of nearly half a billion dollars to Fisker. DOE froze the loan in February 2012, halting the issuance of any further money, because the company failed to meet DOEâ s benchmarks. Fiskerâ s woes began

with with regulatory issues and delays in production of the Karma, Fiskerâ s $100,000 luxury sedan. Fisker has since engaged DOE to renegotiate its loan agreement and renegotiate benchmarks.

378

Due to the financial troubles, including DOEâ s freezing of the loan, Fisker has laid off 23 employees from its Delaware manufacturing plant

379

and 40 employees and contractors in its California plant.

380

In addition, Fisker recently announced that it was replacing founding CEO Henrik Fisker with Tom LaSorda, a former executive at both Chrysler and GM.

381

Furthermore, the Fisker Karma that Consumer Reports purchased to review broke down after less than 200 miles of operation and had to be towed 100 miles back to the dealer because the car would not even start.

382

ATVM Conclusion

Based on this reshuffling and DOEâ s actions, Fisker appears to be a volatile company with a questionable future. Fiskerâ s current problems raise serious questions about DOEâ s decision-making and an inconsistent standard in the ATVM Program.

DOE mismanagement of the ATVM Loan Program has put potentially viable companies out of business and caused major setbacks within the ATV market. DOE has only succeeded in

giving billions of dollars to two large auto manufacturers and to companies with strong political connections to the Obama Administration. However, hundreds of other companies wait in DOEâ s loan queue. At least two of these companies have declared bankruptcy after engaging with DOE for a number of years, believing, based on representations from the Department, that they would eventually receive a government loan. Meanwhile, DOE conditionally approved a loan for a company that did not meet threshold requirement to be in the program. DOEâ s haphazard and inconsistent administration of the loan program has created significant uncertainty within the advanced vehicle manufacturing community and has potentially retarded progress on the next generation of automotive technologies.

Conclusion

The findings regarding the DOE loan programs discussed in this report tell only part of a

much greater storyâ a story of mismanagement, waste and abuse symptomatic of reaching too far, working too fast, and spending too much to achieve unrealistic objectives. There are significant concerns about DOEâ s management and administration of the weatherization, 1705, and ATVM programs. And a management structure unprepared and incapable of dealing with the challenges it faced when pressed to push out the door tens of billions of dollars in a short period of time. In the days ahead, the Committee will continue its investigation and examine DOEâ s record on a loan-by-loan basis, with the continued hope that spotlighting these shortcomings will provide Congress and the American people with the insight they need to assess the true valueâ or costâ of these types of programs.

â DIRTYâ CRIMES FOR â CLEANâ ENERGY: THE AFGHANISTAN LITHIUM SCAM

Latest case assessment summary:

â DIRTYâ CRIMES FOR â CLEANâ ENERGY: THE AFGHANISTAN ...

https://www.indybay.org/newsitems/2015/06/21/18773785.php

1 of 2

6/22/2015 12:36 AM

1944

At this point, enough evidence has accumulated to clearly prove that a mining scam was underway involving trillions of

dollars of lithium, which Tesla, John Doerr and the Silicon Valley Cartel, 1.) clearly acquired the monopoly ownership of, 2.)

at exactly the right moment to time it to the Afghan War, 3.) and place their associate: Steven Chu in office, 4.) and

arrange the Dept. of Energy exclusive cash give-aways and 5.) tie in with Goldman Sachs commodity rigging which every

suspect has now been shown to have had an operational hand in, and financial & political benefit from.

Solyndra was staged to exploit indium and other related minerals from the same mining deal. Alas, the Afghan War failed,

costing U.S. taxpayers (According to multiple news reports) over six trillion dollars, the Republicans found out about the

â Cleantech Scamâ and dissected it, almost all of the Cartelâ s pool of exploitation companies went out of business, the

Russian portions went into cold war mode with their U.S. counter-parts and leaks from Dept. of Energy staff broke the

cover-up. Senior Federal employees participated in, coordinated and benefitted from the crime.

How many Afghan farmers, soldiers and workers had to die to buy John Doerr his new mansion?

Why did federal employees get the profits from helping do this crime?

CASE POINTS:

Most investigators believe that the 2008 Campaign staff, who later became the senior White House staff, negotiated a campaign funding scheme with Silicon Valley billionaires. They traded DOE and TARP funding decisions, in their exclusive favor, for crony campaign resources, campaign web marketing, stock "skims" and insider trading edges. Goldman Sachs participated in most of the deals with a commodities and trade-fixing swindle. The amount of taxpayer funds manipulated, appears to exceed $300B.

Links to all of the confirming information can be found below. All witnesses are willing to demonstrate, prove and validate all of the facts, below, in an open public hearing before an appointed Federal Special Prosecutor.

The provable facts are the following:

- Steven Chu's nomination was organized by the law firm of Covington and Burling which is also the law-firm that Eric Holder worked for. Covington and Burling is retained by most of the Wall Street investment banks and corporations. Both Chu and Holder have been accused, by investigators, of running cover-ups and coordinating violations of the law.
- Applicant: Bright Automotive issued a very public letter proclaiming the DOE program to be a Scam.
- The Senate Investigating Committee issued a public investigation report proclaiming the DOE program to be a Scam.
- Over 200 applicants have stated, to investigators, that the DOE program appeared to be a Scam.
- Goldman Sachs whistle-blowers and under-cover investigators have revealed recordings and emails demonstrating that Goldman Sachs was involved with DOE agents and award winners in

a coordinated effort to manipulate the program for personal gain.

- Steven Chu and his associates had investments in the lithium battery industry and did not support fuel cells, hydrogen, ultra-capacitors, energy harvesting or other technologies that competed with their lithium-ion investments. Steven Chu and his associates took specific action to damage any industry that competed with the lithium battery industry.

- Tesla Motors has received more free money in the form of credits, waivers and perks, from State Tax offices, than almost any other company in California. Tesla Motors owners and investors have given campaign cash to more State Officials and Senators than almost any other company in California.

- Lachlan Seward of the DOE ordered his staff to destroy or â loseâ applicant documents from applicants who were not campaign donors or who competed with favored applicants of campaign donors.

- The TV Show 60 Minutes has covered portions of the crimes in the following episodes: THE CLEANTECH CRASH; and THE LOBBYISTS PLAYBOOK; and CONGRESS: TRADING STOCK ON INSIDE INFORMATION

- Senior White House staff including Rahm Emanual, Steven Rattner, David Plouffe, Robert Gibbs, David Axelrod, Jay Carney, Bill Daley, Erick Strickland and others, suddenly quite their White House and senior agency head jobs, in a bad economy, with no higher paying options. These departures all happened immediately upon receiving documents from investigators questioning â The Incidentâ situation.

- While the Section 136 Law required that applicants were to be reviewed on a â first come/first servedâ basis; DOE staff changed the rules, internally, so that favored applicants were reviewed first. This was a violation of the law.

- Recently acquired â lostâ emails show that White House staff ordered â hit-jobsâ on reporters such as Attkisson and Woodward who started to expose issues in the incident and members of

the public in retribution for reporting the crimes. The IRS TARGETING Investigation and sites such as http://www.paybackpolitics.org have now shown that federal staff have a record of targeting and attacking the public using government resources. Senators, governors and past Presidential candidates are prepared to testify to this fact before a Special Prosecutor. The White House says that its counsel's office was informed of the IRS's targeting of groups in late April, after earlier saying that it knew that an inspector general's report about the issue was coming but that it didn't know its findings. â Operation Rushboâ has now been exposed at a White House coordinated attack task team.

- Tesla, Fisker, Solyndra, Abound, and similar favored applicants, were hand-held through the DOE process by DOE staff and had little review. Competing applicants received no help from DOE and were stone-walled and delayed until they went out of business, even though a majority of them had better positions, metrics, technology, financials, and debt-ratios than Tesla, Fisker, Solyndra, and Abound.

- Any applicant who questioned, or reported, the DOE process was targeted, delayed, down-ranked, denied and, in many cases attacked with character assassination, career sabotage and blacklisting.

- Steven Chu, and his staff, ordered applicant submissions delayed and modified by Argonne Labs and other reviewers, in order to down-grade applicants who were not campaign donors.

- At each federal law enforcement agency, with jurisdiction over this incident, some agents are working on covering up and some agents are working on prosecution. This has led to a state of zero-productivity which a Special Prosecutor is needed to break.

- Tesla Motors, Solyndra, Abound and other â CleanTechâ DOE funded companies were used as money-laundering efforts to pass campaign funding through a â skim networkâ .

- Steven Chuâ s staff told applicantâ s they had to pay money to apply, then he said he waived the money, then he had his staff wait until after the deadline to give him the money in order to tell those applicants that they then could no longer apply because they had â missed the deadlineâ .

This was one of many tactics Chu and his DOE staff employed to keep anyone who was not a campaign donor out of the program.

- Jonathan Silver was placed into the DOE in order to work with Silicon Valley VCâ s.

- The CIA published multiple reports stating that â over a trillion dollars of Lithium for electric carsâ and Indium for Solyndra-type solar tubes â could be harvested in Afghanistanâ . Silicon Valley campaign investors involved in the incident held major positions in these assets.

- The White House hired an inordinate number of Google staff and executives because Google investors and owners controlled a portion of the policy programs at The White House.

- Gawker Media, Think Progress and Media Matters were used by Robert Gibbs, Jay Carney and David Axelrod as covert character assassination outlets in order to distribute attacks on journalists, public policy staff and members of the public in a manner which could not easily be traced back to the White House Press office. This is an illegal activity.

- Goldman Sachs is now under investigation, by multiple agencies, and has been charged with billions of dollars of commodity market manipulation and was connected to every investor in â The Incidentâ . Afghan minerals are â commoditiesâ . Sachs took money in stock trading, finders fees, intermediary fees and other â pass-alongâ routes. DOE staff have pointed to Goldman Sachs as one of the â key architects of the schemeâ . Goldman Sachs has now been called before the U.S. Congress as part of escalating investigations into their activities.

- Rahm Emanuelâ s senior aide in charge of finance was indicted for corruption and racketeering. Amer Ahmad, Rahm Emanuelâ s senior finance aide was arrested for conspiracy, corruption and racketeering. He pleaded guilty in federal court to charges that he steered state business to his financial adviser in exchange for more than $500,000 in kickbacks.

- Tesla Motors has a vast number of lawsuits filed against it for FRAUD, BREACH, HOMICIDE, SECURITIES MANIPULATION and other very serious matters.

- Tesla stated in itâ s own words, in itâ s federal patent filings, that itâ s particular battery configuration and chemistry was â likely to kill you, your family or your neighbors and burn

down your home, your office or your neighbors structures.â DOE and NHTSA officials saw these documents, yet chose to ignore them in order to not upset campaign donors.

- The Department of Energy hired IBM Consulting to â evaluateâ auto loan applications when IBM Consulting staff had little or no experience in the auto industry. The IBM staff operated from a small office of a Chinese Church in Virginia. IBM abandoned that office when confronted about it. Witnesses have charged that Steven Chu told this IBM group what results to come up with in order to rig the applicant progress in favor of campaign donors. In fact, history has now

shown that only campaign donors received funding and every single non-campaign donor was sabotaged and/or cut-out.

- Panasonic battery company has been charged with bribery, dumping, price fixing and thousands of deaths in other countries. Panasonic makes the batteries for Tesla

- Dianne Feinstein lobbied for Tesla and Solyndra to get the adjacent properties on land related to her family, in Fremont California. She lobbied against any competing parties getting that land. Her family owned the construction company to build the buildings, the leasing company to lease the buildings, the staffing company to hire the employees and owned insider trading stock in the companies that supplied some of the materials to Tesla and Solyndra. Her husband had ownership connections to the adjacent railroad properties.

- The computers of Dianne Feinstein, and her family, were hacked by federal investigative agencies in order to examine her potential involvement with charged illicit activities.

- Senior White House staffer Rahm Emanuel had a personal relationship with Department of Energy â Evaluation Centerâ Argonne National Labs

- In March 2012, Rod Blagojevich began serving a 14-year sentence in federal prison following conviction for corruption including the soliciting of bribes for political appointments including the 2008 vacant U.S. Senate seat of then-President-Elect Barack Obama, while in public office. The case pointed to White House staff Rahm Emanuel and Valerie Jarrett, who had dealings with

Blagojevich. Jarrettâ s White House tenure was delayed by FBI investigations.

- The services of Covington and Burling were paid for by Silicon Valley Vc's

- Almost every decision by Steven Chu, while at the Department of Energy, only benefited entities connected to Silicon Valley Vc's

- Under Steven Chu, more companies got more money and went bankrupt faster than ever before, relative to all of recorded human history

- Steven Chu had prior existing personal relationships with Silicon Valley Vc's

- Steven Chu hired his staff from a list provided by Silicon Valley Vc's

- At taxpayer expense, Steven Chu's staff commuted back to Silicon Valley on private jets, each weekend.

- The DOE fees for campaign backers were waived, but just for campaign backer's companies

- Silicon Valley Vc's had their companies manipulate internet search engines to up-rank DNC candidates and down-rank GOP candidates per communications with Senior White House staff

- NASA gave The NASA AMES airfield and jet fuel to Silicon Valley Vc's at the direction of White House Staff and California Senators. This appears to be a campaign â thank youâ gift.

- Silicon Valley Vc's compensated McKinsey Consulting staff for authoring White Papers for The White House and the U.S. Congress which only discussed the positive aspects of companies which happen to have been owned by Silicon Valley Vc's . Some Mckinsey staff have now been indicted and jailed for stock market manipulation.

- Deloitte consulting was both the accountant for DOE applicants and a DOE reviewer for DOE funding

- Whistle-blower Gary D. Conley, who railed against the inequality of federal actions on behalf

of Silicon Valley Vc's, was found with a bullet in his head under questionable circumstances

- Wall Street Journal energy industry reporter David Bird, while investigating part of this story, has disappeared and even the FBI canâ t find him.

- Consultants for Tesla Motors submitted multiple documents to the U.S. Government which stated that the Tesla batteries could cause cancer when they burned or out-gassed

- Consultants for Tesla Motors submitted multiple documents to the U.S. Government which stated that the Tesla batteries were mounted in a configuration which make them more likely to blow up than in any other configuration

- Panasonic provided documents to the U.S. Government which stated that Tesla Batteries "were not authorized for automotive power use".

- Eric Strickland, The Head of the National Safety Agency, quit his job 48 hours after receiving news from reporters that they knew he had manipulated Tesla's safety data. He had been given numerous reports on the safety dangers of both GM and Tesla vehicles, yet ignored these reports for long periods due to requests to â not upset campaign donorsâ .

- The applications for DOE funding by applicants who were not campaign backers were manipulated by Steven Chu and his staff. In a public, side-by-side comparison, today, of the applicants documents, almost none of the â winnersâ would have qualified.

- Steven Chu's nomination docket was almost entirely set-up by Silicon Valley Vc's

- Dianne Feinstein's husband is on the Silicon Valley VC group list.

- An inordinate number of Steven Chuâ s DOE awardees needed the minerals which existed in Afghanistan

- Solyndra needed Indium from Afghanistan. Silicon Valley Vcâ s had a business interest in mining efforts for Indium in Afghanistan.

- The Silicon Valley Vc's held featured stock in Afghan minerals

- The Silicon Valley Vc's held featured stock in lithium battery profits

- McKinsey Consulting provided both the congressional pitch papers AND the Staff for Steven

Chu, which were then used to pitch the â winningâ of DOE money by the very people who paid McKinsey.

- A plane crashed with three senior Tesla staff in it. One of them was a whistle-blower. All 3 were killed. One was known to be a whistle-blower.

- Tesla broke federal law by claiming to not be near bankruptcy when it submitted it's Section 136 documents. Elon Musk is now recorded on TV saying Tesla was about to go bankrupt when it was applying for the DOE ATVM loan, this is a violation of the law.

- Tesla claimed, in its application to DOE, that, as of Today, it would have sold over $1 million Teslaâ s. It has only sold 20,000 and the cost to sell those 20,000 has been hirer than any car in history, mostly due to mismanagement.

- Steven Chu manipulated federal filing documents to hide Tesla's application falsehoods

- In a public side-by-side comparison, almost none of the companies that received Department of Energy funding would have won over the other applicants

- All of the hundreds of Department of Energy applicants who were tossed out of the DOE funding process had not made campaign contributions

- The few "winners" of the DOE funding just happened to be connected to the largest campaign funders

- Stock market analysts, including researchers from the book: â FLASH BOYSâ , featured on 60 Minutes, have documented, all will provide in public hearings, evidence of Tesla Motors pumping itâ s stock in order to mask bad news that appears in the press about Tesla

- The "winners" of the DOE money used the DOE money to manipulate public stock market metrics by booking the loans as profits, or credits, in order to â cook their booksâ and grab windfall profit â scrapesâ before the stock fell again. They â skimmed off the topâ according to stock market analyst-investigators.

- The lawyers from Perkins Coie held private meetings with Steven Chu's staff in coordination for special interest favors for their clients.

- Over 80 of the promises in Tesla's DOE filings never came true. Former DOE staff attempted to destroy Tesla, and other, application documents but Senate investigators acquired pre-destruction copies from DOE staff who were not willing to be unethical.
- Senior White House staff communicated regularly with Silicon Valley Vc's from before, during and after the election
- Google owners and investors co-own Tesla Motors and manipulate Google search engine results to hide any negative information about Tesla and pump the stock. This is illegal.
- When Tesla batteries burn, they cause cancer and a large number of lethal human ailments. DOE and NHTSA had documents proving this, in their hands, prior to the award of taxpayer funds to Tesla.
- The White House appointed more positions connected to Silicon Valley Vc's than any other group in America
- Senator Dianne Feinstein, and her staff, engaged in over 100 conflicts of interest in arranging the government funding of Tesla Motors
- Senator Dianne Feinstein and her family relations held stock in the direct and indirect beneficiaries of Steven Chu's Department of Energy decisions
- Silicon Valley Vc's and their family relations held stock in the direct and indirect beneficiaries of Steven Chu's Department of Energy decisions
- White House Staff and their family relations held stock in the direct and indirect beneficiaries of Steven Chu's Department of Energy decisions
- Almost every company that was intentionally damaged by Steven Chu's decisions at the Department of Energy was a competitor with Silicon Valley Vc's.
- Almost every individual that was intentionally damaged by Steven Chu's decisions at the Department of Energy was a competitor with Silicon Valley Vc's.
- When the FBI raided and investigated Solyndra, they found evidence of a direct connection to The White House

- When the FBI raided and investigated Solyndra, they found evidence of a direct connection to The Silicon Valley Vc's.

- Federal investigators have now documented over $320 billion dollars of your taxes were used in state and federal cash and perks that were routed to The Silicon Valley Vc's

- California Governor Arnold Schwarzenegger took Silicon Valley Vc's to Russia to meet with individuals regarding Afghanistan clean energy minerals. Some of those individuals are now on CIA, DIA, FBI, and other agency, organized crime watch-lists.

- Senior White House staffer Steven Rattner (The Car Funding Czar) was indicted for securities fraud and sits on the Washington Lobby Group: The New America Foundation, backed by Silicon Valley Vcâ s and controlled by Google investors.

- The head of the California Obamacare program: James Brown, Jr, was arrested on corruption charges

- Mckinsey Consulting's Gupta has been arrested and jailed for felony securities fraud, other McKinsey staff are under investigation. Federal Investigators want to know what influence Mckinsey had on Washington policy and budgeting from 2007 to today.

- Silicon Valley Vc's met with Russian individuals regarding Afghanistan clean energy minerals and those individuals later appeared on CIA, DHS, FBI, DOJ and other federal Watch-List as organized crime suspects. 3 of the Russian investors held major stock in Department of Energy cash awardees. How did Ener1, Severstal and other companies with russian mob connections even get through the first pass in the DOE application process?

- White House staffer Jay Carney communicated by email, text and phone with representatives from Gawker Media to arrange character assassination hits on adversaries

- Federal agencies recorded all emails, texts and phone calls with subjects from 2001 to today

- More than the usual number of agencies had to record White House staff because some of their manipulations involved overseas operations in Afghanistan. Thus, those agencies had a legal right to record all White House staff communications and those recordings are still archived in

multiple locations

- Federal Investigators want to know if Tesla Motors would exist today, if Senators, DOE and campaign staff had not been influenced.

- Federal Investigators want to know if Senator Dianne Feinstein, White House staff David Axelrod, David Plouffe and Rahm Emanual and Energy head Steven Chu conspired with Tesla to exchange campaign resources for cash and stock value?

â Federal Investigators want to know if Tesla, or anyone associated with the company, ever hired multitudes of fake bloggers to post fake positive reviews about Tesla motors in order to create a fake perception of interest and defraud the stock market?

â Federal Investigators want to know if Tesla has ever compensated a publisher, or industrial rating company, for contrived positive reviews or ratings in order to create a fake perception of interest and defraud the stock market?

â Federal Investigators want to know each and every investor in Tesla Motors, SpaceX and Solar City Solar Company? Have any of those parties contributed money to political campaigns? How much?

â Federal Investigators want to know what percentage of Tesla Motors Googleâ s investors, staff and executives own cumulatively and the financial benefits each has received from Federal decisions since 2008?

â Federal Investigators want to how much money Tesla and Google investors contributed to election campaigns, or contract services for them, from 2007 to today? Which campaigns? Did the winners in any of those campaigns award U.S. taxpayer funds to the portfolio companies of those investors? How much money?

â When Tesla Motors applied for the Department of Energy funds Elon Musk stated that Tesla was in exceptional financial health, yet now Elon Musk, and his senior staff, have been recorded stating that the company was nearly bankrupt then. In light of these more recent revelations, is

that not a felony violation of the federal â Section 136 Lawâ which states that â a company cannot be on the verge of bankruptcy or it shall not receive Department of Energy fundsâ ? New disclosures show that Tesla stated information in itâ s federal application which Teslaâ s founders and staff have stated they knew was false at the time. Shareholder want to know if Tesla should be prosecuted for this?

â Federal Investigators want to know if Deloitte, under contract to Tesla, arranged false accounting via the Tesla Wells Fargo bank account while Deloitte was also acting, in conflict of interest, as the Department of Energy reviewer of applicants?

â Federal Investigators want to know if Tesla Motors has a confidential relationship with a national group of reporters known as A.L.I.C.E, from different publications, who have agreed to release Tesla-positive news spin stories on a synchronized basis, at the same time, in order to cover-up Tesla investigation disclosures and artificially accelerate stock market vales? Has Tesla Motors arranged with Google to have negative Tesla Motors stories down-ranked while having positive Tesla stories up-ranked? Would that be considered stock fraud?

â Federal Investigators want to know how many Senators and their families, own stock in Tesla Motors?

Figure 1 FEINSTEIN & MUSK

â Federal Investigators want to know if Elon Musk promised any NASA contracts, in advance of the closure of a portion of NASA, in exchange for campaign funding from Tesla and Google investors?

â Federal Investigators want to know how many Senators, their families and Google-related investors, hold stock in lithium-ion battery related companies?

â Federal Investigators want to know if Steven Chu, the former head of the Department of Energy, ever had a personal relationship with any Tesla staff or investors?

Figure 2 FEINSTEIN & MUSK

â Federal Investigators want to know if Senator Dianne Feinstein, or her family, ever had a personal relationship with any Tesla staff or investors?

â Federal Investigators want to know why Tesla and Solyndra are on the same physical plot of land?

â Federal Investigators want to know if anyone from Senator Dianne Feinsteinâ s office also worked for Tesla Motors and/or Solyndra, or later went to work at either organization, after working for Feinstein or her associates?

â Federal Investigators want to know if Dianne Feinsteinâ s husband, Richard Blum, ever traveled to Mongolia to arrange for resource deals beneficial to Teslaâ s investors?

â Federal Investigators want to know if anyone associated with Senator Dianne Feinsteinâ s family, named Herb of Newman Search, PH: 1-415-332-8425; 1707 Bridgeway # 3 in California, ever supplied staffing to Tesla Motors or Solyndra?

â Federal Investigators want to know if anyone associated with Senator Dianne Feinsteinâ s family had any relationship with the real estate transactions involving Tesla and/or Solyndra real estate?

â Federal Investigators want to see all Communications between The California, Fremont City Administrators, Dianne Feinsteinâ s senior staffer (M. Nelson) and the general management of NUMMI. They want to know if economic and political pressure was used to manipulate a deal

structure.

Figure 3 FEINSTEIN & BLUM

â Federal Investigators want to know more about Panasonic, Teslaâ s battery partner, who has been charged with organized crime, dumping, price fixing, the deaths of thousands of battery workers from toxic poisoning and with building lethal battery factories that destroyed all of the towns near them. What is the relationship between the Tesla Battery Factory in Nevada, Harry Reid, stock ownership and Panasonic?

â Federal Investigators want to know clarity about Teslaâ s comments in itâ s DOE application which stated, in writing, in their DOE application documents that the car to be produced with the DOE money was all designed and engineered, yet every aspect of the released model S was designed and engineered AFTER Tesla received the DOE money! Did Tesla lie on their application?

â Federal Investigators want to know why Tesla has not disclosed that Tesla battery packs release toxic and cancer causing fumes when they burn?

In a feature article called: Obama, Inc. in The Hill, reporter Peter Schroeder discloses a network of â revolving doorâ schemes.

â Federal Investigators want to know about the relationship between Tesla investors, lobbyists and Eric Strickland, the head of the National Highway Transportation safety agency who quit his job 48 hours after being notified that the toxic Tesla report he knew about was going public?

â Federal Investigators want to know if Tesla falsified lithium-ion safety reports? Bernard Tse, Teslaâ s battery program director, and 7 other senior staff, provided Tesla with numerous severely concerning lithium-ion safety reports which were never presented to the Department of Energy. Were these reports covered up because the Senators and Investors of Google and Tesla all have ownership interest in the lithium-ion industry?

â Valleywag Online Magazine reports that Elon Musk constantly spies on his employees and competitors and that he makes buyers sign non-disclosure documents to prevent Tesla from getting investigated?

â Federal Investigators want to know if Elon Musk has ever undertaken sabotage programs against his competitors?

â Federal Investigators want to know if Tesla manipulated SEC filings using tax credits from the White House to make Tesla look like it had profits?

â Numerous news reports state that Martin Eberhard founded Tesla and Elon Musk then came in later and stole it from him in a hostile takeover?

â Federal Investigators want to know what Teslaâ s â debt ratioâ was at the time that Tesla applied for the DOE loan? Why did Tesla have the worse debt ratio of any applicant , yet Tesla was awarded funds with almost no review?

â Federal Investigators want to know why has Tesla spent billions, and a decade, to only sell a few cars when all of your competitors have done 20 times better on less money and in less time? Why are over 200 technical problems with the car documented online by Tesla owners yet Tesla sayâ s â there are no problems?â

â Federal Investigators want to know why Tesla is being sued for fraud under the Federal â Lemon Lawâ ?

â Federal Investigators want to know why Tesla cars $100,000.00 over budget PER CAR, at the time of Teslaâ s Department of Energy loan application, yet nobody at the DOE commented about that in their review notes? How is it possible that a project, so mismanaged at the time of DOE application, could have bypassed hundreds of applicants with less issues?

â Federal Investigators want to know if Steven Chuâ s senior staff: Matt Rogers and Steven Spinner had any relationship with Tesla-related investors prior to Chu hiring them at the DOE? Was it coincidental that McKinsey Consulting, the company they worked for, produced all of the

pitch documents for the White House and Congress, which were used to steer the Federal funds to Tesla Motors?

â Federal Investigators want to know if Tesla Motors was funded as a gift to campaign investors?

â Federal Investigators want to know if Tesla lied about asking the NHTSA to conduct a safety study on their car when, in fact, the NHTSA first asked Tesla for a study after fires were reported? Did Tesla then bribe NHTSA officials to halt the request for an investigation after they plea-bargained to install a â titanium safety shieldâ which, in fact, only solves a small portion of the potentially lethal dangers from their battery pack? Is their battery pack made up of â non-automotiveâ batteries which are being used in the wrong way relative to what they were built for?

â Federal Investigators want to know if Tesla is trying to build a battery factory not far from Mexico in order to take advantage of Mexican workers? Is Tesla concerned that most battery factory workers in China were poisoned with toxins? Is Tesla concerned that their battery factory will ENCOURAGE immigration abuse and devastate our border?

â Federal Investigators want to know why the founders ex-partners, investors, buyers, suppliers, employees and ex wives have sued Elon Musk for fraud?

â Federal Investigators want to know how many of Teslaâ s employees have been burned alive at their factories? Why has OSHA fined Tesla for safety violations?

â Federal Investigators want to know: â If somebody puts a Bunsen burner or torch under a Tesla, will it blow up? Is a Tesla a threat to national security because of this? If hackers hack the easily hacked Tesla, can they make the battery charging system overload and blow up? If so, did Tesla inform the NHTSA of this in writing? When?

â Federal Investigators want to know if California State Officials, in Sacramento, California, ever manipulated tax laws and decisions to exclusively benefit Tesla Motors in exchange for perks on orders from any White House staff or U. S. Senators?

â Federal Investigators want to know what percentage of Teslaâ s buyers have killed members of

the public with their Tesla Vehicles? Why is that number, in relative terms, higher than any other car company? Why has Tesla had HOMICIDE lawsuits filed against it?

â Federal Investigators want to know what percentage of Tesla buyers have crashed their Teslaâ s while driving drunk, destroying public property, homes and Teslaâ s? Why is that number, in relative terms, higher than any other car company?

â Federal Investigators want to know if White House staff agreed to protect Tesla, at all costs, in order to keep Mitt Romneyâ s prediction from coming true and to cover campaign funding billionaires?

â Federal Investigators want to know if Tesla representatives meet with Rahm Emanuel, David Axelrod, David Plouffe or their campaign staff prior to the Election of President Obama?

â Federal Investigators want to know why it is that Tesla has sold nearly 4000% less cars than Tesla told the U.S. Government, in writing, they would sell by this date, in their DOE application documents? Was that hype used to pump stock market valuations of Tesla so finders and executives could do early â skimsâ ?

â Federal Investigators want to know why Tesla switched their factory plans between 5 different cities, during the DOE loan process, when they told everyone that their factory location was already a done deal? Why did DOE reject non-campaign applicants for not having a factory in place when Tesla very much did not have a factory in place and has now been sued by different cities for factory fraud?

â Federal Investigators want to know if Tesla VC investors pump the stock market rating by buying their own Tesla stock when bad news comes out about Tesla in order to create a synthetic cover-story short term stock rise? Would that be considered part of a stock fraud activity?

â Federal Investigators want to know what the relationship is between Teslaâ s investors, Googleâ s investors and the VC funds of Richard Blum, Dianne Feinsteinâ s husband?

Tesla: 45500 Fremont Blvd., Fremont, CA 94538 and Solyndra: 47488 Kato Road, Fremont, CA,

94538 Feinstein's ex-staff & lobbyists work there now.

â Federal Investigators want to know why Feinstein and her staff sabotaged other companies trying to use NUMMI? What is the relationship between Feinstein's husband's company: CBRE; and the Tesla, Solyndra and other Green Loan Real Estate deals?"

â Federal Investigators want to know what the relationship is between the Comptroller of Fremont California, the Mayor and Feinsteins staff?

â Federal Investigators want to know why Elon Musk is on public record, published and recorded in national media, saying that NUMMI is no good for Tesla and a bad choice for Tesla. Why did Feinstein make him flip flop?

â Federal Investigators want to know what the relationship is between NUMMI, the properties adjacent to NUMMI, The adjacent Solyndra property and the real-estate company owned by Feinsteinâ s husband: CBRE?

â Federal Investigators want to know if the CIA, The NSA and federal investigators have recordings of Feinstein breaking the law? Did Snowden get some of that data in his cache? Is that why Snowden and Greenwald are so comfortable mouthing off to Feinstein

- Tesla, Campaign Investors and political staff have a network of over 3000 internet news blogs which all send out the same story, at the same time, in a synchronized manner, in order to flood any negative information off of the Web. This is part of a group called A.L.I.C.E. but it is much

larger.

â Federal Investigators want to know why did TOYOTA and GENERAL MOTORS say that NUMMI was a "failed plant" and pulled out of it?

â Federal Investigators want to know what the fire and explosion that the Fremont fire department responded to at the Tesla Nummi plant?.... no, not the second one where the hot metal burned the workers, the earlier one?

â Federal Investigators want to know why did Feinstein met with UAW representatives and promised them NUMMI jobs if they supported requested issues and then how many UAW jobs did Musk actually keep on site? Why does LinkedIn show a huge number of Tesla H1-B lawyer hires advertised when all workers were supposed to be American's per the U.S. tax dollar funding?

- GLENN GREENWALD: â I think Dianne Feinstein may be the most Orwellian political official in Washingtonâ ¦.â Glenn Greenwald

- Tesla Drivers turn out to be deviants, drug users and unethical people more often than most any other drivers per:

After the, relatively, huge number of Tesla crashes and, now, multiple vehicular manslaughter charges, many are examining the type of people that drive Tesla's. An inordinately large number of them have turned out to be: Abusive, partner-beating, fraud-charged, drunk, asshole high-priced doctors and dot.com frat boys. There are, overall, quite a massive number of drunks, in fact. Tesla Driver ""Douche Bag"" Controversy. Are Tesla drivers inherently unsafe? Tesla driver blames fatal crash on new-car smell -A Santa Cruz resident has blamed the new-car smell of his Tesla Motors Model S for an accident that claimed the life of a bicyclist, the Santa Cruz Sentinel reports. blog.sfgate.com/energy/2014/02/07/tesla-driver-blames-f.../ Tesla Motors named in fatal bike crash suit in Santa Cruz ... SANTA CRUZ -- A 63-year-old Tesla driver from Santa Cruz, Navindra Kumar Jain, will be charged with vehicular manslaughter in the death of cyclist Joshua Alper, Santa Santa Cruz County prosecutors said./ mercurynews.com/crime-courts/ci_25076376/tesla-motor-co.../ Tesla faces lawsuit over new-car smell in

fatal cyclist crash ... leftlanenews.com/tesla-faces-lawsuit-over-new-car-smell-... / AD AGENCY ANALYZES TESLA DRIVERS, FINDS â DOUCHEBAGâ PERSONALITIES ARE PREDOMINANT.

- Investigators want to know why White House ordered ""no more DOE Loans to be funded""? Was it to protect campaign financiers other investments?

- Bankrupt solar panel firm took DOE stimulus money, left a toxic mess, says report.

- Emails show that Steve Rattner, While sitting in the White House, sought to negotiation GM funding with UAW in exchange for votes for Obama.

- The Snowden/Assange/Greenwald disclosures show that â StingRayâ devices around Washington DC captured and recorded all phone calls from 2007 to date. Their disclosures also show that all emails and texts, both private and government, were recorded in that region for the same time period. All illegal activities by federal staff and associates, in Washington DC, for that time period is recorded and archived in multiple locations. Those multiple locations are controlled by interests from different parties, making it unlikely all of the evidence can ever be fully deleted.

- A White House aide named Jofi Joseph began Tweeting corruption and misdeed information from within The White House. This has led to hundreds of Aides, protective service agents, Congressional staff also disclosing crimes that they witnessed, on social media. Many of these parties are willing to appear before a Special Prosecutor in a public hearing.

- Tesla Motors did NOT â repay the taxpayer moneyâ . It still receives taxpayer money annually. It has cost taxpayers 80% more than just the money that DOE loaned.

â â

Husbandâ s Business Ties to China Dog Feinstein â Los Angeles â ¦

LA TIMES INVESTIGATION:

For years, international financier Richard C. Blumâ s vast business portfolio has persisted as a nettlesome issue for his wife, Sen. Dianne Feinstein (D-Calif.), a vocal proponent of increased China trade. Three years ago, he vowed to turn over any profits from his China investments to â ¦

http://articles.latimes.com/2000/oct/20/news/mn-39450

Last week California Senator Diane Feinstein abruptly resigned her position as the chairman and ranking member of the Senate Military Construction Appropriations Subcommittee (MILCON).The MILCON subcommittee is in charge of supervising military construction. The committee also oversees "quality of life" issues for veterans, which includes building housing for military families and operating hospitals and clinics for wounded soldiers. During her six years as MILCON leader Senator Feinstein had a conflict of interest due to her husband Richard C. Blum's ownership of two major defense contractors, who were awarded billions of dollars for military construction projects that were approved by Senator Feinstein.

Thatâ s Billion with a capitol B. My very own California Senator Diane Feinstein may have just hit one out of the park folks. By directing Billions of dollars of our tax dollars to her husbands companies, DiFi may have set a new record for corruption. According to a report compiled by MetroActive a San Francisco area newspaper Diane Feinstein used insider information to direct billions of dollars of military construction projects to companies, URS Corporation and Perini Corporation, that were owned or controlled by her husband.

While setting MILCON agendas for many years, Feinstein, 73, supervised her own staff of military construction experts as they carefully examined the details of each proposal. She lobbied Pentagon officials in public hearings to support defense projects that she favored, some of which already were or subsequently became URS or Perini contracts. From 2001 to 2005, URS earned $792 million from military construction and environmental cleanup projects approved by MILCON; Perini earned $759 million from such MILCON projects.

792 million and 759 million works out to 1.551 Billion dollars. And what portion of this billion

and a half dollars did DiFi and her husband pocket?

In 2005, Roll Call calculated Feinstein's wealth at $40 million, up $10 million from just a year earlier. Reports show her family earned between $500,000 and $5 million from capital gains on URS and Perini stock. From CB Richard Ellis, her husband earned from $1.3 million to $4 million.

Public records show Blum's company paid $4 a share for controlling interest in Perini, and later sold about three million shares for $23.75 each.

The report also showed URS' military construction work in 2000 was only $24 million, but the next year, when Feinstein took over as MILCON chair, military construction earned URS $185 million. Additionally, its military construction architectural and engineering revenue rose from $108,000 in 2000 to $142 million in 2001, a thousand-fold increase.

In late 2005, Blum sold 5.5 million URS shares, worth $220 million

So a US Senator has used insider information to direct billions of tax payer dollars to her husband's companies and yet I have not seen one word of this in a single antique media outlet. Where is the outrage, where is the indignation, where are CNN, Fox, MSNBC, NBC, ABC, CBS news? And even more importantly where is an investigation by the Senate Rules Committee? Oh wait, Difi is the newly appointed chairman of the Rules Committee so I guess we can rule out an investigation there.

So after pocketing over as much as 300 million dollars as a direct result of her involvement with the MILCON committee DiFi just walks away unscathed?

Where is the investigation and where is DiFi's resignation followed shortly by her indictment? Or does that only happen to Republicans?

(See a much more extensive list in the Federal and Senate Case Files, available under FOIA from related entities and law enforcement agencies. Every major law enforcement and investigative journalism group now has all of the related details on this matter. All of the material below has been published online, printed in the media or broadcast on a news broadcast. Additional details and elaboration are held by various investigative entities. Every state and federal law enforcement agency now has a complete set of the evidence records and materials)

2006

All of the supporting factual documents and sworn witness testimony is available in open, public,

broadcast hearings. Hundreds of former agency staff, contractors and other credible witnesses are

prepared to testify, in a public hearing, if provided with proper security.

Over 800,000 pages of evidence now exist, to prove the facts in this briefing.

ARE YOU A MEMBER OF THE PUBLIC? WRITE, EMAIL, CALL AND FAX YOUR ELECTED REPRESENTATIVES

AND DEMAND: â THE APPOINTMENT OF A SPECIAL PROSECUTOR TO INVESTIGATE THE DEPARTMENT

OF ENERGY SCANDALâ .

UPDATE 7.3

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Reid Hoffman, Eric Schmidt, Marc Andreessen, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over $30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation

reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

THE FEDERAL ANTI-CORRUPTION LAWSUIT

Information For Congress, The FBI, The FTC, The DOJ And The Public.

U.S. Senators, and their husbands, do not get to own Google, Facebook Tesla and YouTube, and their suppliers, while exclusively financing Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg with government money (your money) and tax waivers, while sabotaging their competitors and cutting them off from the same government benefits.

U.S. Senators and the highest officials in the land are also financed by Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for their political campaigns. The United States Government is supposed to arrest Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for corruption, not help them, and Goldman Sachs, do more crimes!

A sort look at world history reveals these key dates:

**** October 31, 1979 Soviet informants under orders from the inner circle of advisors under Soviet General Secretary Leonid Brezhnev relayed information to the Afghan Armed Forces for them to undergo maintenance cycles for their tanks. This leads to a full Russian invasion of Afghanistan.**** 1987 â Soviets determine that Afghan minerals are far less minimal than thought and not worth the effort. â Feb. 5, 1989 â Soviets fully retreat from Afghanistan. **** March, 1990 â CIA operatives start â findingâ rare earth mineral treasure maps left behind by Russians. They later turn out to be fake and possibly a trick to sucker the Americans. **** 1998 â Memo written by al-Qaida military chief Mohammed Atef, acquired by the FBI, exposes the Bin Laden 9-11 plans based around his groupâ s insiders at the USA/Afghan mineral, oil, and gas exploitation meetings, which are falling apart. **** Sept. 11, 2001 â US Attacked **** 2002 to 2008 â USAID and McKinsey Consulting flood Washington, DC with â White-Papersâ and reports saying there are â trillionsâ of dollars of rare earth mines in Afghanistan â for the takingâ . Washington DC politicians and Silicon Valley oligarchs associated with Tesla, Fisker and Solyndra dreamed up this government scam based on a $7 trillion+ profiteering scam around a new invasion of Afghanistanâ ¦. Silicon Valley oligarchs and some U.S. Senators, and their husbands, created all of this hell. Then they attacked the whistle-blowers using government resources. Now hell, and the public, are coming for them!

The government reprisal attackers cancelled Plaintiffs federal funding and gave it to his competitor who they owned the stock of and were dating; they cut off Plaintiffs social security benefits; they hacked Plaintiffs devices; they cut off Plaintiffs HUD benefits; they took away Plaintiffs home; they got Plaintiffs fired; they poisoned hiring databases; they manipulated Paypal payments; They used DNS redirection, website spoofing, shadow-bans and other digital spy-tricks to keep Plaintiffs web storefronts hidden from buyers; They hired IN-Q-Tel, Think Progress, Media Matters, Gawker Media, Syd Blumenthal, etc to run a $40M digital character assassination; They hired Google to rig billions of global searches; They enforced blacklists and other anti-trust RICO actions; They exposed Plaintiff to weapons-grade toxins in his Dept of Energy lab work; and other spycraft type â political dirty tricksâ operations; Plaintiff was a key whistle-blower in the Solyndra FBI raids and Afghan war investigations yet never received his whistle-blower/informant/witness fees.

A number of those attacked (Sharyl Attkisson, Monica Samille Lewinsky, Julian Asange, John Michael Gravitt, Jeffrey Wigand, Dr. Aubrey Blumsohn, John Kopchinski, Robert Rudolph, Joseph Faltaous, Steven Woodward, Dr. Eric Ben-Artzi, Cheryl Eckard, Coleen Rowley, Bradley Manning, Frank Serpico, Edward Snowden, Daniel Ellsberg, et al) compared notes and found that the same government contractors did, generally, the same things to each of them:

â Applicants employers were called, and faxed, and ordered to fire applicants from their places of employment, in the middle of the day, with no notice, as a retribution tactic.
â Applicants HR and employment records, on recruiting and hiring databases, were embedded with negative keywords in order to prevent them from gaining future employment.
â Disability and VA hearings and benefits were frozen, delayed, denied or subjected to lost records and â missing hard drivesâ as in the Lois Lerner case.
â Paypal and other on-line payments for on-line sales were delayed, hidden, or re-directed in order to terminate income potential for applicants who competed with DOE interests and holdings.
â DNS redirection, website spoofing which sent applicants websites to dead ends and other Internet activity manipulations were conducted.
â Campaign finance dirty tricks contractors IN-Q-Tel, Think Progress, Media Matters, Gawker Media, Syd Blumenthal, etc., were hired by DOE Executives and their campaign financiers to attack applicants who competed with DOE executives stocks and personal assets.
â Covert DOE partner: Google, transfered large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for

years, with hidden embedded codes in the links and web-pages which multiplied the attacks on applicants by many magnitudes.
â Honeytraps and moles were employed by the attackers.
â McCarthy-Era â Black-listsâ were created and employed against applicants who competed with DOE executives and their campaign financiers to prevent them from funding and future employment and many other forms of Government vengeance and retribution dirty tricks.

Financial and communication records have now been recovered by ICIJ, private investigators, news organizations and others examining the leaked documents that prove who did what.

White House and Agency senior staff, along with members of Congress, ran an organized crime, insider-trading â Enterpriseâ, within our government. They convinced major law enforcement executives to look the other way. They sabotaged and attacked competitors using government resources. Their â consiglioreâ financier/beneficiary partners are the oligarchs of Silicon Valleyâ s Big Tech. All of their covert links have now been exposed by leaks, family insiders and whistle-blowers. Arrests are demanded!

Help fight these corrupt scumbags. Support our AMERICAN STOCK ACT (LINK) in Congress, Our CLASS-ACTION ANTI-CORRUPTION (LINK) , Our general anti-corruption lawsuits, the SHAME (LINK) campaigns against the corrupt politicians, our Citizen-CIA (LINK), the use of our promoted AMERICAN JOBS ACT (LINK) to allow crowd-funding, Our conversion of citizen lawsuits to federal lawsuits against corrupt Big Tech oligarchs, a global financial database assisted by ICIJ to root out family money-laundering by Senators and others, and much, much moreâ ¦

WHO ARE THESE BAD GUYS?

Having worked with, and lived with, these people, been in their secret meetings and attended their home parties for decades, we have decided we do not like them because they are infested with criminality and they seek to normalize cultural horrors that any knowledgeable society would never tolerate. On top of that, they used government resources to attack us in reprisal and anti-competition.

The documented characteristics of this â Cartelâ, which is an organized â enterpriseâ consisting of Silicon Valley â Venture Capitalistsâ, Big Tech executives, Senators, White House executives, agency heads and investment bankers; includes the following facts as detailed in, literally, millions of news articles and law enforcement reports:

They have a sick, echo-chambered, criminality: A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in Silicon Valley because Silicon Valley controls the media and the politicians that are usually supposed to check these kinds of things. Millions of pages of news reports, documentaries, interviews and legal transcripts prove this to be true. Feature films and network TV shows like: â Too Big Too Failâ; 60 Minutes (via over 10 investigation segments); Super-Pumped- The Uber Story; Bad Blood; Silicon Valley â The TV Series; and hundreds more, show the true culture of depravity that this crowd squirms around in.

They are an elitist cult. Silicon Valley elitists believe they are better than everyone else. Silicon Valleyâ s Kleiner Perkins founder: VC Tom Perkins, said that poor people must be â Naziâ sâ for not accepting the â superior intellectâ of VCâ s. Silicon Valleyâ s Kleiner Perkins VC Vinod Khosla, took over Californiaâ s favorite public beach, bribed the White House for â green cashâ and got sued for arrogance by a horde of public interest lawsuits. Silicon Valleyâ s Kleiner Perkins founder Ray Lane was indicted for tax evasion. Silicon Valleyâ s Kleiner Perkins boss John Doerr was sued for sexual office abuse and running a â frat houseâ and bribing Stanford University. Most of the VCâ s and tech CEOâ s in Silicon Valley are charged with similar ethics breaches. They bribe press and political figures to keep their dirty deeds out of the news.

They gorge on prostitutes. Silicon Valley males hire more hookers and â rent-boysâ and fly more sex workers into the Bay Area than any other city in America. Googleâ s and Tesla Investments executives were killed in sex and drug romps with hookers. Googleâ s Eric Schmidt ran a huge â sex penthouseâ and promotes infidelity and â anti-marriageâ . Googleâ s search engine rigging boss died at the hands of one of his hookers. The Silicon Valley VCâ s had the Rosewood Hotel built at the end of Sandhill Road as a place to take interns and hookers to for sex. Underage sex efforts operated by these VCâ s and Tech CEOâ s have created the â Pizzagateâ phenomenon.

They engage in Rape and Sexual Coercion of employees. Young interns are â sent up the hillâ by Stanford to the VCâ s Sandhill Road offices to become sexual playthings for the VCâ s at the Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual â rape cultureâ that they promoted. Thousands of women have written books and articles about the sexual intimidation they are subjected to by Silicon Valley VCâ s and their tech CEOâ s. VCâ s Joe Lonsdale, Micheal Goguen and hundreds of others have been charged with rape and sex trafficking. Stanford University gets â endowmentsâ and â giftsâ for hushing rape culture and intern-fluffing up.

They are Assholes. Fraternity House Take-What-You-Want culture is re-percussively promoted in the bars, clubs, meetings, conferences and emails of the VCâ s and CEOâ s. The TV Show: Silicon Valley, underscores the point of the dangers of infectious asshole-ism in Silicon Valley.

They are tunnel-vision clones. They assemble those around them, that have the same stereotypical facial structure. In a room full of ordinary people and Tech VCâ s, the VCâ s faces stand out as Hollywood-type character-cartoon duplicates of each other. They act alike, talk alike, dress alike and do crime alike.

They are devoted to sexual deviance and extremism. In the book: BROTOPIA, and related books, you see that Googleâ s founders have all had extreme sex scandals involving cheating, 3-way sex, divorces over abuse, forced anal sex and other outrages. Their teachers at Stanford have had to quit over their sex scandals. Their willingness and infatuation with sexual extremes defines them as moral degenerates who care little about laws and ethics.

The had Dysfunctional Parents. The majority of the VCâ s and Tech CEOâ s come from rich dynastic families who are cultism-like devoted to â the family bloodlineâ and run by male oligarchs who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their sonâ s Frat Houses for date rapes.

They are Tone Deaf. Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble by never interacting with, or reading information or news from, anyone outside of their group. VC Tim Draper spent vast amounts of money trying to make Silicon Valley itâ s own country in order to systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they are offended by normal people who they consider to be low-class and unworthy.

They have their enemies killed. Rajeev Motwani taught the Google founders how to build Google and was found, mysteriously, floating, dead, in his Silicon Valley swimming pool. Silicon Valleyâ s Gary D. Conley reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then suddenly died in a plane crash next to Teslaâ s factory in San Carlos. There are over 100 mysterious deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon Valley oligarchs.

They are arrogant self-centered narcissists. Elon Musk has spent over a billion dollars buying exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-million dollar PR agent assigned to make them look like â Gods of Industryâ . They regularly hold â Babes and Ballâ sâ

parties and sex parties in Woodside that require women to beg for their money. They were trained to be â assholesâ and â abusive dominantsâ via the Stanford Rape/Frat Culture.

They are misogynists. They are all White-Male-Controlled operations with frat house pasts. Women are used As Sex Objects and Window Dressing. The largest number of anti-women news stories, jock/bro blog reports and charges for abuse come from Silicon Valley. VC Steve Westlyâ s CEO friend is notorious for kicking his girlfriend hundreds of times because she â sassedâ him. Almost of of their Divorce filings include abuse charges against the man.

They manipulate employees. Silicon Valley cartel companies practice Scientology-like indoctrination and â cultural programmingâ of employees. These highly impressionable naive young employees are kept in â controlled environmentsâ , sent to â mindfulness programming workshopsâ and told what kind of political opinions they should have. Tight-knit groups of females experience synchronized menstrual periods (http://www.nature.com/nature/journal/v229/n5282/abs/229244a0.html) over time, cohesive Google and Facebook employee groups engaged in decision-making discount dissenting viewpoints in the interests of consensus, and that couples who stay together long enough begin to look alike. A new study has captured another group phenomenon in Silicon Valley and chronicled in humansâ natural habitat: â group brain synchronyâ . This is a CIA-like brainwashing technique exploited to get all Google/Facebook/Twitter employees to rapidly adopt the same political views.

They are racists. Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in America even though they have a high population of blacks at the edge of their community. Elon Musk was raised by racists and is always getting sued for racism. Google and Facebook hire almost no black people except window dressing tokens.

They have huge Male insecurity issues. They use TED-Talks, SXSW and Syncronicity Events as self-promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of arrogance and mock any male who does not own what they own or who who did not go to Stanford or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than family.

They run epic Blacklisting efforts. In the â AngelGateâ Investigation and the â Silicon Valley No Poaching Class Action Lawsuitâ , Silicon Valley was exposed as an insider club that black-lists those who look different or are not part of the boys club.

They are Politically corrupt. Silicon Valley has bribed more politicians than any other domestic region in history. They promote more immigration in order to get cheap labor for their tech companies. They steal their technology and bribe politicians to eliminate patent protections for small inventors that they steal from. Political Corruption and Bribery Is The Norm for these boys. Silicon Valley created a CIA knock-off called â In-Q-Telâ in order to use CIA technology to manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: â The Cleantech Crashâ is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund. They refuse to allow their MSM to report on their corruption and crony kickbacks, ie: Tesla Motors Funding, Off-shore tax evasion, Hooker networks, etc.

They engage in Collusion. In the AngelGate Investigation, the Silicon Valley No Poaching Class Action Lawsuit, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes to rig valuations, stock markets and employee poaching. They operate in herds within their peer group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing moles and saboteurs inside competitors start-ups. They operate in herds within their peer group. They are not inclined to independent thinking.

They are Stock Market Criminals. Stock Market Pump-and-Dump, Flash Boy Algorithm Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and FTC monopoly law

violations are vast in number.

They are idiotic Burning Man Sex-and-Drugs Devotees. Silicon Valley frat boys have a huge participation in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery animal-tranquilizer drugs to use on young Burning Man girls.

They have minimal regard for Consequences. Although their PR agents promote them as â greenâ and â socially positiveâ , it is all hype to get tax waivers and government hand-outs. Mark Zuckerbergâ s take-over of San Francisco General Hospitalâ s brand was entirely a scam to get him a $1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off the collateral damage later.

Many of them are closeted homosexuals. Using the tremendous funds they have at hand from their exclusive monopolies in public media, they push their trans-gender agendas through their bought-and-paid for politicians. This has resulted in a generation of sexually confused children who believe that they should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other companies are lying to the public about their sexuality and using hired wives, known as â beardsâ . If they lie about something so basic, one has to wonder what else they lie about.

They are thieves. They steal most of their technology from small inventors who canâ t defend themselves. They get inventions from Indian engineers and then ship them back to India before the employees can get any stock or IP rights. The tech CEOâ s send their VC friends to competing start-ups to spy on competing technologies and steal it. The VCâ s say they are just doing â due diligenceâ but they are actually sucking the competing start-up dry of IP and staff and making a clone of it under another name. The NY Times ran an article about how Larry Page sneaks around at conferences stealing ideas and technology for Google. (see www.usinventor.org)

There are so many other awful things about the people of Silicon Valley. You get the picture. Silicon Valley is a swamp and a cesspool.

Criminal politicians and their Silicon Valley oligarch financiers organized a felony-class â enterpriseâ to exchange stock market shares, jobs, government cash, sex, exclusive public policy switcheroos and other corrupt actions. They put hit jobs on us (their competitors and whistle-blowers) using government resources. Now we are suing them and filing criminal referrals against them with the FBI, DOJ, SEC, FTC, GAO, FEC and Congress!

CUT-OFF STOCK MARKET OWNERSHIP/BRIBES BY ALL POLITICIANS AND THEIR FAMILIES!!

By comparing records and files from FINCEN, FBI, FTC, SEC, Congressional Investigators, ICIJ, FEC, DOJ, ProPublica, and other sources, one can easily see that Bay Area political officials own Google, Tesla, Facebook, YouTube, Instagram, et al, (AKA â The Tech Cartelâ or, in legal terms: â The Enterpriseâ). This explains why those companies have been exempt from regulation and prosecution. Those public officials and tech company oligarchs have exchanged millions, and millions, of dollars between themselves and their families for profiteering.

They were all either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members have now supplied evidence against them. You donâ t hear about this, much, in the â main-stream newsâ because nearly half of Congress, White House staff and government agency bosses own the stock in the news broadcasters and receive billions of dollars of financing from them.

Many witnesses have now sworn, warranted and certified to federal law enforcement about the details of these crimes. Many of those whistle-blowers were former executives in â The Tech Cartelâ .

This is not about politics. It is about felony crimes! Our government representatives are business partners with our biggest enemies and make decisions based on greed, not duty! Call them out! Demand their arrests!

THIS SITE EXISTS SO THAT no that no law enforcement official or public agency official can ever say they didnâ t know about these crimes.

We told EVERY one of them in writing, verbally, in videos, in books, in court and at their front offices.

So far, all they have done is run COVER-UPS, SHRED our documents, STONE-WALL, blockade us from having a jury trial, tell FBI bosses NOT TO WRITE 302 REPORTS, and obfuscate.

WE DEMAND JUSTICE AND PROTECTION FROM THIS SILICON VALLEY BASED ORGANIZED CRIME CARTEL!

Without breaking a single law and WITH the help of the largest law enforcement and investigative resources on the planet, we have had every single party that has come after us, including some of the largest entities in the world, hunted down, and punished!

If you are attacking us in political reprisal, vendetta and revenge or because our products were better than yours and you chose to cheat rather than compete, you can expect to lose a minimum of one billion dollars in stock valuation. Corrupt politicians, criminal big tech companies and sex pervert billionaire oligarchs can never survive THE TRUTH about them coming out in public and in Congressional investigations.

We use lawsuits, federal investigations, news reports, whistle-blowers, new public regulations, anti-trust filings, FBI criminal referrals, stock-devaluations, tens of millions of crowd-sourced voters and unique AI-based forensics software.

When you attack us, when you kill our friends, when you run smear campaigns: we find every person and organization on the globe that hates you, gather them together and aim them all at your life! Anyone who attacks us stays on the â shit listâ for the rest of their lives plus the next 100+ years of internet time. The corrupt should add up the market valuation of all of the stock they own. Then they can watch it lose 40% to 90% of itâ s value and get huge investigations from the FBI, FTC, FINCEN, SEC, Interpol and activist investors!

If you come for us again, prepare to suffer. You will become a trailer park and we will be the tornado!

Every stock you buy is a notice to our team to bankrupt the company that you invested in. Every politician that gets that stock as part of a quid pro quo bribe, will be exposed. Even if we are dead, your punishment will be carried out by a legacy team of public volunteers and peers. It may happen to you tomorrow or it may be a slow-drip over the next 15 years. Never stop looking over your shoulder. Billions of citizens with notebook computers and criminology software are coming for every single one of these corrupt insiders!

If you hired media attackers, expect 100 times what you did to us to come back at you and your family forever!

THE PRESIDENT AND OUR STAFF WANT TO KNOW WHY OBAMA'S FELONY-LEVEL MAFIA-CLASS STOCK MARKET MANIPULATION CRIMES ARE NOT UNDER INVESTIGATION

POTUS Trump Goes Scorched Earth on Crooked Obama Admin and Jeff Sessions â Ask Sessions Why Dem Crimes Arenâ t Under Investigationâ

by Cristina Laila 301 Comments

- **619**Share
- **91**Tweet
- Email

President Trump has unleashed fire and fury on his Twitter account since Mueller indicted 13 Russians for using a troll farm to meddle in the 2016 election.

According to Muellerâ s indictment, the Russians began their operation in 2014, well before Donald Trump became president.

This is another failure by the Obama administration, yet Trump is taking all the arrows.

President Trump has been the victim of a Russian collusion witch hunt hatched by Hillary Clinton with her phony dossier and propped up by the fake news media sycophants.

Earlier this week Trump slammed Obama in a ferocious tweetstorm for allowing the Russians to set up shop and interfere in the election on his watch.

POTUS Trump showed no signs of lifting his foot off the peddle because he went scorched earth on Obama and the Russian hysteria again Wednesday. This time he blasted AG Jeff Sessions for doing NOTHING about the Dems crimes!

Donald Trump tweeted, â Question: If all of the Russian meddling took place during the Obama Administration, right up to January 20th, why arenâ t they the subject of the investigation? Why didnâ t Obama do something about the meddling? Why arenâ t Dem crimes under investigation? Ask Jeff Sessions!â

> Question: If all of the Russian meddling took place during the Obama Administration, right up to January 20th, why arenâ t they the subject of the investigation? Why didnâ t Obama do something about the meddling? Why arenâ t Dem crimes under investigation? Ask Jeff Sessions!
>
> â Donald J. Trump (@realDonaldTrump) February 21, 2018

Where the hell is Jeff Sessions? He recused himself like a coward after he caved to fake news pressure which is why Rod Rosenstein was able to appoint Mueller as Special Counsel.

There is ample evidence that the FBI, DOJ and other intelligence officials were working with Crooked Hillary and her phony dossier to obtain a FISA warrant to spy on Trumpâ s camp.

These are real crimes. How much more can the American people take? Rod Rosenstein misled the FISA court then reportedly threatened members of the House Intel Committee if they didnâ t stop the investigation into the dossier and FISA abuse and heâ s the one in charge of Muellerâ s witch hunt.

FISAGate is much worse than Watergate yet Sessions sits back while Trumpâ s people are skewered by a team of liberal lawyers who coincidentally donated to Hillary and Obama.

The Uranium One scandal also needs to be thoroughly investigated. This is why Mueller and Rosenstein are on the attack. They are implicated in these scandals; they are delaying and

THE REVENGE OF THE NERDS: CLEANTECH VERSION

"...Every single Obama Administration and Department of Energy Official that lied to us, defrauded us and fucked us has been identified, hunted down with FBI-Class forensics and fired, doxed, removed from office and had their stocks and revolving door payola job companies crashed or devalued. This is being done in a 100% legal manner even though those officials did those things to us in a criminal manner. This is being done on a crowd-sourced basis by the voting public, journalists and federal law enforcement experts.

They will never escape.

The only way to end this is to deliver our Constitutional rights and damages compensation.

Department of Energy officials can sit there in their little bubble on Independence Avenue and echo-chamber their fantasy world concept that nobody knows what they did but they should step out onto the street. The whole world knows and should be ashamed.

We have made certain that the news will follow them, everywhere, for life until we get justice and until they end the attacks that they started!..."

THE STANFORD CYCLE OF CORRUPTION

"Elite arrogant asshole dynasties send their kids to Stanford University.

Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies.

When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal old boys club manner.

They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors.

Stanford bosses keep all of this covered-up and covertly fund political camapigns to grease the wheels of political corruption.

They then sexually extort some Standford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again...."

HOW TO WIPE OUT THE CORRUPT

You, 100% legally, will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

These are the **100%** legal steps, tactics, methodologies and procedures being used to end political corruption in America. Every citizen, in every nation, is encouraged to engage in these efforts:

- Draft versions of FBI "302 Reports", on each and every suspect in the associated list of targets, (in these related documents) are being authored and submitted to the FBI. We will teach you how to write and submit them too!

- These sites, and the associated evidence repositories, have been electronically made available to every FBI agent, Interpol Agent and law enforcement agency in the world.

- Criminal complaints and investigation demands are being authored and submitted to the DOJ, FTC, FEC, SEC, SSA, OSC, CIA, GAO, Congress and each Inspector General.

- We have forced over 100 agency heads to resign simply by providing them with copies of the Draft versions of FBI "302 Reports" on them that we intend to submit.

- We have produced an analysis chart template, with the help of Wikileaks, ICIJ, Sunshine Groups, Follow-the-Money and other database efforts. This chart depicts a graphic analysis of each suspects collusion's, bribes and compromised assets.

- We are teaching and providing forensics and criminal investigation training to the public so that the public is as resourced as any special agent. A vast number of "how to be a private investigator" books have been

published on Amazon, E-Book sites and shared online.

- Confirming copies of all submitted reports are digitally carbon-copied to the press, the public and global "dead-man switch" torrent archives.

- We created a new series of public lawsuits, anti-trust lawsuits, RICO lawsuits and class-action lawsuits by the public and against the targets. These lawsuits have now placed permanent public transparency on record and changed the law to help the public and stop the crooks.

- We have exposed their Silicon Valley Bay Area, New York And Florida executive sex trafficking rings.

- Billions of members of the public are monitoring the suspects via public database information and public shared observation of their activities, locations, owner-ships and transactions via each member of the public's personal computers.

- We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

- We opened our own private investigator and crowd-sourced investigations into the following:

- - Every stock market account they or their family owns
- - Every judge that has taken campaign finance and stock market bribes from the crooks
- - Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- - Every flight manifest they appeared on
- - Every bank account they have ever held
- - Every lawsuit, divorce record and police record they have ever appeared in
- - Every trust fund they or their family holds
- - Every shell corporation they, or their family holds
- - Every person named in the Epstein Pedo book: https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- - Every item in the Swiss Leaks that cross connects to their holdings
- - Every item in the Panama Papers Leaks that cross connects to their holdings
- - Every item in the WikiLeaks that cross connects to their holdings
- - Every item in the Snowden Leaks that cross connects to their holdings
- - Every sex trafficking incident that connects to each of them alone, and in groups
- - Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo,Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, Buzzfeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- - Every use of Mossack Fonseca and related crooked CPA's, Banks and Tech Law Firms they engaged in
- - Every item in the Quest Leaks that cross connects to their holdings
- - Every tactical deployment, by a campaign financier, of the tactics listed in this manual: https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf
- - Every sex service that their credit card payments every connect too
- - Every person leaving or entering locations where they sleep
- - Every real estate transaction that any name or company they, or their family, were involved in,

tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. Study the writings and teachings of Luke Bencie and you will be at the top of the game.

THE SHAME OF THE U.S. DEPARTMENT OF ENERGY

Elon Musk 'had affair with Google founder Sergey Brin's WIFE in December which led to their divorce and end of tech billionaires' friendship' - after Sergey's and Larry Page's secret millions helped Tesla fake Dept of Energy viability to get taxpayer cash exclusive handout

- **Sergey Brin filed for divorce from his wife Nicole Shanahan in January citing irreconcilable differences**
- **White House and Department of Energy, Google and Musk formed 'criminal conspiracy' to get monopolistic government cash and tax waivers**
- **Now, friends of the pair tell The Wall Street Journal that Nicole had an affair with Elon Musk in December 2021**
- **In the same month, Musk welcomed a baby girl via surrogate with his ex-girlfriend GrimesÂ**
- **It was a month after he had twins with a former executive, and three months before he started dating current girlfriend Natasha BassettÂ**
- **Sergey and his wife were separated but still living together when she had her affair with the Tesla CEOÂ**
- **Brin and Shanahan were married for four years and welcomed a daughter in 2018Â**
- **He is the world's 7th richest man, worth of $93billion, while Musk, worth $253.4bn, is the richest**

By Jennifer Smith, Chief ReporterÂ

Elon Musk had an affair with Google founder Sergey Brin's wife in December last year, which was the catalyst for their divorce, it has been claimed.Â

Friends of the pair told The Wall Street Journal on Sunday that Musk's romance with Nicole Shanahan was what prompted the Google billionaire to file for divorce in January.Â

It's unclear how long the romance lasted but it occurred in the same month that Musk welcomed a baby girl via a surrogate with his ex-girlfriend Grimes, and was a month after he secretly welcomed twins with a former executive from one of his companies.Â

He started dating current girlfriend Natasha Bassett in February.Â

Brin, the seventh richest man in the world worth an estimated $93billion, filed for divorce in January, signaling the beginning of one of the most expensive splits in Silicon Valley history.Â

Sergey Brin filed for divorce in January , a month after his wife Nicole had an affair with Elon Musk. In January, Brin filed for divorce citing 'irreconcilable differences' from his wife. He asked for the docket to be sealedÂ

The reason for the divorce, at the time, was not clear.Â

He cited 'irreconcilable differences' in divorce papers but asked for the docket to be sealed to protect his young daughter.Â

The affair brought an abrupt end to Elon and Sergey's years-long friendship; in 2008, Sergey gave $500,000 in funding to Tesla at the height of the financial crisis.Â

Elon has also spoken fondly of crashing at Sergey's homes.Â Brin and Shanahan, 37, share a daughter, who was born in 2018.Â

The Google founder has asked to share custody of her as part of the divorce arrangements, which they are fighting to keep private out of fear that their daughter will be put at risk of 'harassment' or 'kidnapping'.Â

Musk has not commented on the allegations.

Google and Tesla Motors are partners in actual crimes

- Tesla's Crony Government Subsidies Are The Biggest Taxpayer Rape In History

- The Silicon Valley Mafia Soy Boys believe that driving a Tesla will offset their sexual inadequacies and that allowing Tesla to fail will hurt their political message points

- Anti-Tesla activists have tricked the Silicon Valley Mafia into dumping (and wasting) billions of dollars of their VC funds into Tesla stock to pump the NASDAQ valuation listings

- Scientific web data records now prove that Google hid all negative news about Musk and Tesla

Verifiable Facts Now Disclose an Epic Crime In Washington, DC!

Here are the facts, proven in news, law enforcement and public investigations:

** Thousands of articles discuss the possibility that Silicon Valley billionaires may be sociopaths, or otherwise deeply disturbed men who believe they are above the law. These kinds of people have been proven, in many past cases, to resort to extreme and criminal behavior without a second thought.

** Google and Tesla are run by Silicon Valley billionaires.

** Proven by web archives and metrics, the only company in the world that has had all of it's negative articles hidden by Google is Tesla.

** Proven by web archives and metrics, the only company in the world to own a majority, and covert, interest in Tesla is Google, via it's staff and owners.

** Internet records prove that the only company in the world to have it's press releases moved to P8 authority status by Google, even though concurrent negative coverage had a higher volume in every other search engine, and even though they were just Musk's press releases, is Tesla.

** Both Google and Tesla investors spent tens of millions of dollars lobbying for the invasion of Afghanistan and promoted white papers lauding *â Trillions of dollars of lithium in Afghanistanâ* and *â Afghanistan is the Saudi Arabia of Lithiumâ .*

** More than any other companies on Earth, Google and Tesla are staged to make the most profits from mining deals in Afghanistan, particularly the mining of lithium, indium and related metals.

** Frank Guistra, Jacques Littlefield and a number of Russian oligarchs are all involved in big Middle East mining and funding Obama's Campaign and Hillary's campaign and got perks from the same in Government deals and were closely associated with Tesla and Google.

** Goldman Sachs is partners with Tesla and Google and made billions by skimming the very deals that crashed in the Steven Chu DOE give-away plus the Tesla and Google stock manipulations.

** Goldman Sachs has been charged with profiteering in the invasion of Afghanistan.

** Goldman Sachs has been charged with criminal-class commodities market manipulation of the very metals, being mined in Afghanistan, that Google and Tesla, Sachs partners, also profit from.

** Google's money guys and Tesla's money guys are either the SAME guys and/or all have financial relationships

** Google, Tesla and Goldman Sachs, using back-door, illicit cash transfer routes were the largest financiers of the Obama campaign.

** None of Elon Musk's companies would be in business without White House intervention and tens of billions of dollars of government handouts.

** In the HSBC â Swiss Leaksâ Google, Tesla and White House staff were discovered to have had â slush fundsâ .

** The head of the Department of Energy, and his staff, were promoted for nomination by the investors of Google and Tesla, who he had a personal and financial beneficiary relationship with.

** Eric Schmidt, the head of Google, has spent more time in the White House dictating national policy and federal hiring decisions (for his own benefit) than all of Congress combined. Schmidt even ordered his staff, and business partners, to be placed in charge of the FCC and U.S. Patent Office.

** Attorney General Eric Holder was promoted for nomination by the investors of Google and Tesla, who he had a personal and financial beneficiary relationship with.

** The financiers of Tesla and Google use â Flash-Boyâ algorithm stock market software manipulation services.

** After Steven Chu was thrown out of the Department of Energy for running a kick-back scheme to the very same people, a duplicate scheme was moved to the Department of Transportation to relay cash for â Driver-less Carsâ with the core beneficiaries, again, being Google, Tesla and their owners.

** The Afghan failures have cost the U.S. Taxpayers over six trillion dollars and the publication: ***Pro-Publica***, has disclosed a hot bed of corruption deals associated with Afghan kick-backs, that continue to escalate.

** Tesla and Google â driver-less car projectsâ have been exposed as simply another scam to try to exploit the already failing lithium mining market and deals, because those particular cars use vast amounts of lithium, the mining deals for which are owned by Google and Tesla owners.

** From 2007 to today, Google Internet records prove that Google manipulated election information and public perceptions in order to seek to swing the election to the Obama campaign.

** Thousands of other provable financial, covert stock ownership, family trust fund and shell company disclosures prove that the suspects had a covert, organized, illicit political and business program underway, that they concertedly crafted.

Therefor...

Tesla and Google owners must have funded the Obama election campaign in exchange for the promise of vast monopolies in Afghan mining deals to be exploited in their electric car and Solyndra-type holdings. It is true and verifiable that these three companies funded the campaign and only they got those benefits and all of their competitors were targeted and damaged by the Obama Administration, which has ordered federal investigators not to investigate the matter. This seems to confirm that a trillion dollar kick-back scam was operated by senior White House staff and is the subject of a White House-ordered cover-up.

Elon Musk and Google are some of the biggest contributors of political cash and services to Barack Obama, Harry Reid and Dianne Feinstein.

Barack Obama, Harry Reid and Dianne Feinstein have personally signed off on, and lobbied to give billionaires Elon Musk and Google hundreds of billions of dollars of nearly tax free taxpayer cash for no apparent reason aside from their political connections.

Elon Musk and Google have provided Barack Obama, Harry Reid and Dianne Feinstein with billions of dollars of un-reported political campaign financing in the form of search engine rigging, stock valuation pumps for stocks held by the associates Barack Obama, Harry Reid and Dianne Feinstein and for other in-kind services which have a quantifiable cash value that has never been reported to regulatory authorities.

Elon Musk and Google use off-shore tax evasion tactics and methods advised and managed by the same financial advisors.

Business partners, family members and political associates of Barack Obama, Harry Reid and Dianne Feinstein hold stock in Elon Musk's and Google's companies.

Elon Musk is quoted as saying that he was arranging to have Google buy Elon Musk's Tesla Motors.

Google is quoted as saying that they plan to exclusively use Elon Musk's Space X rockets to launch a shroud of public surveillance satellites around the Earth.

Both Elon Musk and Google are counting on taxpayer funds created by Barack Obama, Harry Reid and Dianne Feinstein through the U.S. Department of Transportation for their â driver-less car projectsâ which they both happened to have come up with at the same time that the DOT funds were slotted out for them.

Elon Musk's and Google have both exchanged cash and employees with a company called IN-Q-TEL. IN-Q-TEL sells tricky spy services to the CIA, the U.S. Chamber of Commerce, Columbian drug lords (In-Q-Tel's airplanes were caught with 5 tons of cocaine on-board and Elon Musk's software programmer created and operated SILK ROAD, the world's largest illegal drug network), the DNC, Hillary Clinton's Department of State and other interesting groups. Elon Musk's staff and Google's owners have both publicly applauded IN-Q-TEL's tactics in funding Google and Elon Musk's companies. IN-Q-TEL and it's sister company: New America Foundation both have Elon Musk's and Google's staff on their management teams.

In the entire history of Google, only Elon Musk and Barack Obama have had the documented search engine hype-rigging, manual up-ranking and mood manipulation results as the most synthetically highly manipulated results in all global Google search and positioning presentations. In normal language, this means that Google faked the results for both of these names, in order to operate a contrived PR campaign, while, at the same time, attacking and defaming their competitors.

Elon Musk's and Google's people co-own the stocks of each others companies.

Both Elon Musk and Google have a number of mysterious deaths associated with themselves including the deaths of Rajeev Motwani, Forrest Hayes, Gary D. Conley,

David Bird, Karl Slym, Andrew Ingram, Brian M. Finn, Kenneth Bellando, Sarvshreshth Gupta, Kate Matrosova and many more. In each case, the dead person is thought to have had incriminating information on Elon Musk and/or Google.

More people from Google and Elon Musk's holdings got jobs in the White House and at top federal agencies than any other entities in the world.

Elon Musk and Google both have a financial and political need to control profiteering of the war-torn Afghanistan lithium and indium mining conglomerates. Both have deep connections with Russian mobsters who own the mining equipment in those regions. Both contributed technology and funding to implement â Arab Springâ and other political uprisings which would give them more control of those raw materials and both were the biggest recipients of the U.S. Department of Energy Cleantech Cash which was handed out by their friends: Steven Chu, Matt Rogers. Steven Spinner, Allison Spinner who Elon Musk and Google personally lobbied to have appointed to run the U.S. Department of Energy. John Doerr and Kleiner Perkins were the lead investors in all of the suspects. This makes it appear that a trillion dollar payola scam was organized by Elon Musk and Google.

If a major payola scam, using taxpayer dollars, was organized by Elon Musk and Google the very law enforcement agencies who should have arrested them happen to have been controlled by the decisions of Barack Obama, Harry Reid and Dianne Feinstein. Eric Holder, the attorney general, who ran the Department of Justice, in the Obama Administration, had stock relationships with Elon Musk's and Google's companies. Both Eric Holder and Steven Chu, who handed out the Department of Energy cash to them, were handled by the law firm of Covington and Burling who also work with the key business partners of Elon Musk and Google.

When federal investigators wrote Elon Musk's Tesla Motors a demand for a detailed safety investigation of Tesla Motors, Google's lobbyists assisted in getting the investigation terminated and Tesla still has not engaged in a complete independent public safety inspection.

Within minutes of negative news story's appearing about Elon Musk or Google companies, Google always manually hides the negative news story and replaces it with a â fluff storyâ

about Elon Musk or Google. At the same time, key investors from both groups engage in either/or stock buy-backs and stock-pumps to artificially increase the appearance of stock valuation surges so as to seduce day traders and institutional investors that they should invest. This is fraud and constitutes the use of taxpayer funded companies to defraud taxpayers. The methods of the company called â PollyHopâ in the current series of House of Cards, describes the methods used by Musk and Google.

There are quite a number of other common connections between these groups. While all of these similarities may simply be the most extraordinary set of coincidences in history, to the skilled law enforcement investigators who are pursuing this case, the matter calls for more action and less delay.

What Are the Implications Of Google Controlling The U.S. Government?

Opinion by Hiram Walker

- On the illicit insider take-over of the U.S. Administration by sex-crazed, stop-at-nothing Silicon Valley billionaires

Recent research by The Intercept, (The Android Administration : https://theintercept.com/2016/04/22/googles-remarkably-close-relationship-with-the-obama-w) China, The EU and most any voter that reads the news, shows that Googleâ s owners have impregnated the U.S. Government with their people at every level and in every choke-point of the federal decision-making process.

Google has most profoundly taken control of the White House with the largest majority of West Wing staff being Google-connected; most of the White House decisions benefiting Google and harming Googleâ s adversaries; and a shocking number of private White House meetings and revolving door job give-aways. If this was not a classic government take-over Coup that Eric Schmidt and Larry Page had strategically planned out, then it is the biggest coincidence in human history.

This is like a South American-class over-throw of a government except it used internet servers instead of bazookaâ s.

Many people hear these charges and cry: *â oh, it is just the Republicans picking on the Democrats againâ* .. and pass it off as another standard example of party politics. Nothing could be further from the truth. Google is not a Democratic thing. Google is a crazy, warped, billionaire thing. Google does what it does for a very specific goal of power and cash that has very little to do with liberals.

Imagine if you discovered that Satanists had covertly taken over the Catholic Church! This is pretty much the same thing.

Googleâ s bosses have been involved in a huge number of sex scandals, tax evasion schemes, corporate cheating investigations, privacy abuse and have made some of the most outlandish comments you ever heard from a crazy billionaire. How are these nut-jobs qualified to run the federal government? Google has steered a trillion dollars of taxpayer cash from the U.S. Treasury to itâ s bank accounts and not to any taxpayers. Is that the way it is supposed to work?

NO!

To save America, the FBI, or the FTC, should hunt down all of the hundreds of Google insiders and pluck them out of State and Federal administrations.

Musk is so gross.

THIS IS THE MANUAL USED BY FUSION GPS, ELON MUSK, GAWKER MEDIA, GIZMODO MEDIA, BLACK CUBE, PODESTA GROUP, MEDIA MATTERS, SID BLUMENTHAL AND OTHER WHITE HOUSE PARTNERS TO ATTACK CITIZENS AND REPORTERS ONLINE -

The Gentleperson's Guide To Forum Spies

Index:

COINTELPRO Techniques for dilution, misdirection and control of a internet forum:

Technique #1 - 'FORUM SLIDING'

Technique #2 - 'CONSENSUS CRACKING'

Technique #3 - 'TOPIC DILUTION'

Technique #4 - 'INFORMATION COLLECTION'

Technique #5 - 'ANGER TROLLING'

Technique #6 - 'GAINING FULL CONTROL'

8 Traits of the Disinformationalist:

1. Avoidance.
2. Selectivity.
3. Coincidental.
4. Teamwork.
5. Anti-conspiratorial.
6. Artificial Emotions.
7. Inconsistent.
8. Time Constant.

17 Techniques for Truth Suppression:

1. Dummy up.
2. Wax indignant.
3. Characterize the charges as "rumors"
4. Knock down straw men.
5. Call the skeptics names like "conspiracy theorist"
6. Impugn motives.
7. Invoke authority.

8. Dismiss the charges as "old news"
9. Come half-clean.
10. Characterize the crimes as impossibly complex and the truth as ultimately unknowable.
11. Reason backward
12. Require the skeptics to solve the crime completely.
13. Change the subject.
14. Lightly report incriminating facts, and then make nothing of them.
15. Baldly and brazenly lie.
16. Expanding further on numbers 4 and 5, have your own stooges "expose" scandals and champion popular causes.
17. Flood the Internet with agents.

25 Rules of Disinformation:

1. Hear no evil, see no evil, speak no evil.
2. Become incredulous and indignant.
3. Create rumor mongers.
4. Use a straw man.
5. Sidetrack opponents with name calling and ridicule.
6. Hit and Run.
7. Question motives.
8. Invoke authority.
9. Play Dumb.
10. Associate opponent charges with old news.
11. Establish and rely upon fall-back positions.
12. Enigmas have no solution.
13. Alice in Wonderland Logic.
14. Demand complete solutions.
15. Fit the facts to alternate conclusions.
16. Vanish evidence and witnesses.
17. Change the subject.
18. Emotionalize, Antagonize, and Goad Opponents.
19. Ignore proof presented, demand impossible proofs.
20. False evidence.
21. Call a Grand Jury, Special Prosecutor, or other empowered investigative body.
22. Manufacture a new truth.
23. Create bigger distractions.
24. Silence critics.
25. Vanish.

CONCLUSION

Remember these techniques are only effective if the forum participants DO NOT KNOW ABOUT THEM. Once they are aware of these techniques the operation can completely fail, and the forum can become uncontrolled. At this point other avenues must be considered such as initiating a false legal precidence to simply have the forum shut down and taken offline.

This is not desirable as it then leaves the enforcement agencies unable to track the percentage of those in the population who always resist attempts for control against them. Many other techniques can be utilized and developed by the individual and as you develop further techniques of infiltration and control it is imperative to share then with HQ.

Call a Grand Jury, Special Prosecutor, or other empowered investigative body.

Manufacture a new truth.

Create bigger distractions.

Silence critics.

Vanish.

Propaganda and Debating Techniques

byÂ A. Orange

In hisÂ *Rhetoric*, Aristotle acknowledges that it would be better if we could make our case without either browbeating or flattering the audience; nothing should matter except "the bare facts." Yet he laments, "other things affect the result considerably, owing to the defects of our hearers."

â Stanley Fish, in his blog "Think Again" in the New York Times, 2008.11.09
http://fish.blogs.nytimes.com/2008/11/09/psychology-and-torture/?apage=1

"I soon realized that the correct use of propaganda is a true art which has remained practically unknown to the bourgeois parties. Only the Christian-Social movement, especially in Lueger's time, achieved a certain virtuosity on this instrument, to which it owed many of its successes."

â Adolf Hitler,Â *Mein Kampf*, Volume 1, Chapter 6, "War Propaganda"

"Through clever and constant application of propaganda, people can be made to see paradise as hell, and also the other way round, to consider the most wretched sort of life as paradise."

â Adolf Hitler

"Propaganda," Goebbels once wrote, "has absolutely nothing to do with truth."

"In a time of universal deceit, telling the truth is a revolutionary act."

â George Orwell

"This election is not about issues," Rick Davis, John McCain's campaign manager said this week. "This election is about a composite view of what people take away from these candidates." That's a scary thought. For the takeaway is so often base, a reflection more of people's fears and insecurities than of our hopes and dreams.

â Judith Warner, New York Times, September 4, 2008

As you read the following pages, you will be exposed to quite a variety of deceptive propaganda techniques, logical fallacies, and lies (hopefully, none of them mine). You might as well learn a little about how the art and science of propaganda works, so that you can recognize the techniques as people try to fool your mind with them.

You probably already know a lot about this, whether you realize it or not, because politicians pull many of these standard stunts on you every election year, and you have grown immune to some of them. And modern advertising uses a lot of them, too, and you just tune them out. Nevertheless, let's just do a quick over-view of propaganda techniques.

Bear in mind that "propaganda" is not inherently a dirty word â it just usually is. Any time you are trying to convince anyone of something, you are using some kind of persuasion, debating, or propaganda technique. Just telling the whole truth about something is one simple propaganda technique, and a highly effective one. But lying often works better, at least with some audiences...

Master these propaganda techniques, and you too will be able to proselytize and promote cult religion and radical politics just like a battle-hardened old-timer.

PROPAGANDA TECHNIQUES:

- Tell The Truth
- Lie
- Lie By Omission and Half-Truths
- Hide the Truth
- Lie With Qualifiers
- Lie With Statistics
- Scream Accusations of Lies and Lying
- Observational Selection
- The Statistics of Small Numbers
- Bury The Lead
- The Big Lie
- Reversal Of Reality, and Counter-attack by Reversal of Reality
- Projection
- Make a Virtue out of a Fault
- Unsupported Claims
- Imaginary Evidence
- Use Association
- The Glittering Generality
- Exaggerate
- Confusion of Correlation and Causation
- The Fallacy of a Single Cause
- Reverse a Cause-and-Effect Relationship
- Straw Man
- Hypnotic Bait and Switch
- TheÂ *Either/Or*Â Technique â Bifurcation â the Excluded Middle
- False Dichotomy
- The Enemy Of My Enemy Is My Friend
- "Hobson's Choice"
- Alternative Advance
- "Somebody's got it worse"
- Faulty Syllogism
- *Non Sequitur*
- *Post Hoc, Ergo Propter Hoc*Â â "It happened after 'X', so it was caused by 'X'"
- The Norm of Reciprocity
- Guilt Induction
- Play On Emotions, Appeal To Emotions
- Are You Afraid?
- Induce and ExploitÂ *Apophenia*
- *Ad Hominem*, Launch Personal Attacks On Opponents
- Engage in Name Calling
- Delegitimize One's Opponent
- Deflect Criticism and Blame By Delegitimizing It
- Delegitimize Criticism and Rebuttal in Advance
- Spurious Delegitimization of Evidence or Criticism
- Spurious Rejection of a Question
- Demonize the Enemy
- Apply Labels
- Stroking Ploys

- Offloading Blame
- Blame A Scapegoat
- Blame The Victim
- Blame Somebody Else (Anybody Else)
- Blame A Non-Factor
- Claim That There Is A Panacea
- Claim That There Is A Panmalefic
- Flattery
- Proof by Anecdote
- Double-Talk
- Unprovable Statements
- Undisprovable Statements
- The Language Trap
- Vague, Undefined, Grandiose Language
- Loaded Language, Euphemisms, and Redefined Words
- Deception by Renaming
- Fluffy Phrases
- *It's Free!*
- Use Self-Referential Definitions â Define Something In Terms Of Itself
- Pigeon-holing and Labeling
- Deception Via Mislabeling or Misnaming Things
- Misuse Words
- Moving The Goalposts
- Set Low Expections
- The Perfect Solution Fallacy, also known as The Nirvana Fallacy
- Sliding Adjectives
- Vague Adjectives
- Undefined Terms
- Pseudo-intellectual Bull
- Slogans: Simplistic Slogans and Though-Stopping Slogans
- Oversimplify
- Wrap Yourself In A Higher Power
- Repeat Old Memes
- Everybody's Doing It, Everybody Knows, and Everybody Says, and The Bandwagon
- Pomp, Ceremony, and Ritual
- Humor and Ridicule
- Assume The Major Premise
- Assume Facts Not In Evidence (*Petitio Principii*)
- Hidden Assumptions
- Assume Futures or Future Results
- Fallacy of Presupposition
- Affirmation of the Consequent
- Irrelevant Conclusion (*Ignoratio Elenchi*)
- Confusion of Beliefs with Facts
- Substitute Feelings For Facts
- Confusion of Abstractions with Reality
- Circular Reasoning (*Circulus in Demonstrando*)
- Appeal to Evil
- Appeal to Higher Principles
- Appeal to Authorities (*Argumentum ad Verecundiam*)
- Cite Credentials
- Use Fake Credentials

- Appeal to Force (*Argumentum ad Baculum*)
- Appeal to Popularity â Appeal to the People (*Argumentum ad Populum*)
- Appeal to Numbers (*Argumentum ad Numerum*)
- Dismiss by Numbers
- Appeal to Averages
- Appeal to Fame
- Dismiss by Lack of Fame
- Appeal to Antiquity (*Argumentum ad Antiquitatem*)
- Dismiss by Antiquity
- Appeal to Novelty â Newness (*Argumentum ad Novitatem*)
- Dismiss by Novelty
- Appeal to the Exotic
- Appeal to Tradition
- Appeal to Normality
- Appeal to Poverty (*Argumentum ad Lazarum*)
- Appeal to Wealth (*Argumentum ad Crumenam*)
- Appeal to Common Folk
- Appeal To Stupidity
- Antirationalism
- Fake Philosophy:Â *"It's all just an illusion."*
- Appeal to Desperation and Argument from Impotence
- Appeal to PityÂ *Ad Misericordiam*
- Exploit Wishful Thinking, and Tell Them What They Want To Hear
- It Ought To Be True, So It Is.
- It's Too Terrible To Tell
- Argue from Adverse Consequences
- Argue from Beneficial Consequences
- Apply Time Pressure
- Argue For Delay
- Stall
- The Real Scotsman Fallacy
- Inverse Real Scotsman Fallacy
- Inconsistency
- Compare Apples To Oranges
- Special Pleading
- Self-Sell
- Repetition for Emphasis (*Argumentum ad Nauseam*)
- Antimetabole
- Reification
- Take Undeserved Credit
- Create A Granfalloon
- Spin Doctoring
- The Semi-Attached Figure
- Use Exact Numbers
- Avoid Specific Numbers
- Hide Behind Others
- The Preacher's We
- Put Words Into Other People's Mouths
- Tokenism
- Testimonials and Stories
- The Fallacy of One Similarity
- The Fallacy of One Dissimilarity

- If It Looks Like X, Then It Is X.
- A Distinction Without A Difference.
- Sly Suggestions
- Misleading Inference
- Unsubstantiated Inference and Groundless Claims
- Introduce Irrelevant Information as Supporting Evidence
- False Analogy
- Conflation, False Equality
- Double Bind
- Project Future From Past
- False Analysis Of History
- It's Never Happened Before
- I Didn't See It Happen, So It Never Happened
- Argue Inevitability
- Pollyanna's Ploy â Unbridled Optimism
- Chicken Little's Pessimism
- Generalize, and the Sweeping Generality
- Take Quotes Out Of Context
- Claim That Quotes Are Taken Out Of Context
- Argue from IgnoranceÂ *(Argumentum ad Ignorantiam)*
- Begging The Question
- Meaningless Question
- Play the Victim, and Self-Victimization
- Claim to Have Special or Secret Knowledge
- Bad Math
- The Gambler's Fallacy
- Mistaken Assumption of Randomness
- Use the Passive Voice
- Use Slanted Language
- Use Inflamatory Language

DEBATING TECHNIQUES:

- Refute By Example
- Refute By Exposing Contradiction
- Minimization and Denial
- Instant Denial
- Understatement
- Not As Bad As
- Admit a Small Fault to Cover a Big Denial
- False Comparison
- Give a Non-reason Reason
- Divert Attention â Change the Subject
- Prove Something Else
- "Well, all I know is..."
- The Positive Accomplishments Sidestep
- Declare Victory
- The Story Sourcing Distraction
- The Drama Queen, the Prima Donna Ploy
- "I'm so offended."
- Claim that "It's unfair."
- Red Herring

- The Personal Loyalty Red Herring
- Answer A Question That Was Not Asked (To Avoid Answering One That Was Asked)
- Answer a Question With A Question
- Surfeit of Questions (*Plurium Interrogationum*)
- Monopolizing the Question (*Hypophora*)
- Obfuscate
- Obfuscate With Bureaucritese
- Confuse With Technicalese
- Attack Without Appearing To Attack By UsingÂ *Paralipsis*Â orÂ *Apophasis*)
- Passive-Aggressive Attack
- Sarcasm, Condescension, and Patronizing Attitudes
- Adopt an air of superiority
- Damn with Faint Praise
- *Reductio Ad Absurdum*
- Rationalize
- Exchange A Term
- Frame The Argument
- Argue with Unrealistic Hypothetical Situations
- Misrepresent Your Opponent's Position, or Mischaracterize Your Opponent, or Mischaracterize His Statements or Questions
- Nit-Pick and Split Hairs
- Quibble
- Hit And Run
- Hifalutin' Denunciations
- Make Unreasonable Demands
- Make False Demands
- Shift the Burden of Proof Onto Your Opponent
- Double Standards
- Demand an Uneven Burden of Proof
- Demand Uneven Standards of Acceptance
- Specious Argument
- Spurious Agreement
- Escape via Ignorance
- Escape to the Future
- Escape via Relativism
- Escape via Irrationality
- Pack the House
- Embarrass Your Opponent
- Obtuseness â Refuse to See the Point
- Laugh It Off
- Dominate the Conversation, Talk Non-Stop, and Interrupt Constantly
- Escape via Bullying and Intimidation
- Shut Down the Debate

PROPAGANDA TECHNIQUES:

- **Tell The Truth, The Whole Truth, and Nothing But The Truth.**
  This can be highly effective, and very convincing, if you know your subject material well, and are a good speaker.

  *... AndÂ **IF**Â the truth is really what you want your audience to hear and believe.*

  The Truth, as a matter of habit, has some disadvantages: You have to learn and remember a whole lot of facts, and keep them straight in your head. The facts might not always be what you wish them to be. And, alas, the truth is sometimes very boring...

- **Lie**
  This one is simple, straight-forward, and obvious. Just lie and say whatever you want to. It has the advantages that you don't need to memorize so many facts, and you can make up new facts when the currently-existing ones don't suit your purposes. The disadvantages are that you might get caught in a lie, and that would destroy your credibility.

  > "You're never going to make it in politics. You just don't know how to lie."
  > Richard M. Nixon
  > *Secret Lives of the U.S. Presidents*, Cormac O'Brien, page 228.

- **Lie By Omission and Half-Truths**
  This is also known asÂ *Suppressed Evidence*.

  This one is more subtle. It has the advantage that you can't get caught in a lie, because everything that you say is true. You just happily fail to mention all of those bothersome little facts that do not support your point of view. Should a critic point out one of those annoying undesired facts, you can at least feign innocent ignorance, or claim that the fact is really just an unimportant, trivial detail, not worth mentioning.

  For example: In 1908,Â the Lutheran minister Dr. Frank Nathan Daniel BuchmanÂ got into a squabble over money with the trustee committee of their hospice for young men in Philadelphia, and in an angry huff, Buchman resigned and got on a boat for Europe. He ended up at a large religious convention in Keswick, England, where he felt that he had a spiritual transformation. He felt moved to write letters of apology to all six of the trustees with whom he had squabbled, humbly asking their forgiveness. Buchman said that none of them even bothered to answer his letters.

  That was rather unkind of them, wasn't it? No wonder Buchman had a disagreement with them, if they were really so haughty and so inconsiderate that they would not even acknowledge a man's humble apology and request for forgiveness...

  There is just one small detail that Frank Buchman left out in his telling of that story:Â Buchman didn't put any return address on the envelopesÂ that he mailed back to Philadelphia.

  Vice President Dick Cheney told CNN on May 8, 2001, that nuclear energy "doesn't emit any carbon dioxide at all."Â
  (CNN, 8 May 2001. Also seeÂ http://www.nirs.org/factsheets/KYOTONUC.html)Â

That is lying by omission. It is true that nuclear reactors do not create carbon dioxide while burning their nuclear fuel, but the process of mining the uranium is done by machines like bulldozers that create lots of carbon dioxide and air pollution as they burn diesel fuel. And so does the process of refining the ore and converting it into usable nuclear fuel, and transporting it to the reactor. And then there is the problem of disposal of the nuclear waste. That's another giant hole to be dug with diesel-powered machines. If the whole fuel cycle is taken into account, then nuclear power creates several times as much CO_2Â as renewable energy sources.Â (*The Party's Over: Oil, War, and the Fate of Industrial Societies*, Richard Heinberg, page 135.)

Bill Wilson gave us lots of good examples of that technique. In chapter 8 of theÂ *Big Book*, "To Wives", the wives of the recovering alcoholics seem to give advice to the wives of other alcoholics:

> As wives of Alcoholics Anonymous, we would like you to feel that we understand as perhaps few can. We want to analyze mistakes we have made.
> A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 8,Â *To Wives*, page 104.

> Sometimes there were other women. How heartbreaking was this discovery; how cruel to be told that they understood our men as we did not!
> A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 8,Â *To Wives*, page 106.

> We wives found that, like everybody else, we were afflicted with pride, self-pity, vanity and all the things which go to make up the self-centered person; and we were not above selfishness or dishonesty. As our husbands began to apply spiritual principles in their lives, we began to see the desirability of doing so too.
> Â Â Â At first, some of us thought we did not need this help. We thought, on the whole, we were pretty good women, capable of being nicer if our husbands stopped drinking. But it was a silly idea that we were too good to need God. Now we try to put spiritual principles to work in every department of our lives. Â ... We urge you to try our program, for nothing will be so helpful to your husband as the radically changed attitude toward him which God will show you how to have. Go along with your husband if you possibly can.
> A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 8,Â *To Wives,*Â page 116.

Yes, Bill Wilson really would like you to feel that the wives understand as perhaps few can.

The big problem with those quotes is that theÂ *To Wives*Â chapter of theÂ *Big Book*Â was not written by Lois Wilson or any of the other wives of the alcoholics â Â Bill Wilson wrote it all. Lois wanted to write it, but Bill didn't trust his wife to say the right things, or to get the "style" the way he wanted it, he said, so he wrote the whole chapter himself, while pretending to be his own wife.

What a huge difference that one tiny little fact makes. That chapter reads entirely differently, it becomes a sick twisted joke, when you know who the real author was.

Bill Wilson perceptively analyzed his wife's many mistakes for her, and confessed all of Lois' sins for her (in print), and honestly admitted her many failings: her moral shortcomings and dishonesty and selfishness and her silly thinking that she was too good to need God (page 116). (She was "selfish"

while she worked in Loesser's department store to support hisÂ unemployed thieving philandering drunken assÂ for years and years.)

Then Bill the housewife even lectured "the other girls" not to nag their husbands about their drinking, or else those guys willÂ get mad and go sleep with their mistressesÂ (page 111)...Â Like Bill did.

Â Â Â Bill Wilson gave us many more examples of thatÂ *Lie By Omission*Â technique. Here, he is talking about doing Step Five, where we confess all of our sins and moral shortcomings to someone else:

> This is perhaps difficult, especially discussing our defects with another person. We think we have done well enough in admitting these things to ourselves. There is doubt about that.Â In actual practice, we usually find a solitary self-appraisal insufficient.Â Many of us thought it necessary to go much further. We will be more reconciled to discussing ourselves with another person when we see good reasons why we should do so. The best reason first:Â If we skip this vital step, we may not overcome drinking.Â Time after time newcomers have tried to keep to themselves certain facts about their lives. Trying to avoid this humbling experience, they have turned toÂ easier methods.Â Almost invariably they got drunk. Having persevered with the rest of the program, they wondered why they fell.Â We think the reason isÂ that they never completed their housecleaning. They took inventory all right, but hung on to some of the worst items in stock. They only thought they had lost their egoism and fear; they only thought they had humbled themselves. But they had not learned enough of humility, fearlessness and honesty,Â in the sense we find it necessary, until they told someone else all their life story.
>
> A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 6,Â *Into Action*, pages 72-73.

Wow. That's really impressive. I guess we had better get down on our knees right now, and start confessing everything,Â *holding nothing back!*

Right?

Wrong.

Notice that the rest of the logic is missing. That is, where do we see the report on the other people,Â *who did confess everything*, and then successfully abstained from drinking? There is no such report, because they all relapsed too. The early New York group that Bill Wilson was writing about hadÂ a very high relapse rate. Fully fifty percent ofÂ the originalÂ *Big Book*Â authors relapsedÂ and returned to a life of drinking. In Akron, Bill Wilson and Doctor Bob calculated that they had only a 5% success rate in sobering up alcoholics (which is the same as the success rate of people who quit on their own). Bill Wilson couldn't keep 'em sober not for nuthin'. The cult religion routine didn't work at all.

But Bill didn't want to talk about that, because he was a faithfulÂ BuchmaniteÂ who believed that you must confess your sins to everyone else in your group if you are to be holy. So Bill was doing everything in his power to make everyone holy, even if it didn't make them sober.

And note how Bill also gave us illustrations of a few other propaganda techniques:

- *The Straw Man Tactic*:
  "We think we have done well enough in admitting these things to ourselves."
  "They only thought they had lost their egoism and fear; they only thought they had humbled themselves. But they had not learned enough of humility, fearlessness and honesty..."
  Those people who think that they don't really need to do all of Bill Wilson's wonderful 12 Steps are really stupid egotistical dishonest cowards, aren't they?

- *Hiding Behind Others*:
  The use of "We" to create the false impression that it was more than just the opinion of Bill Wilson â that many people had done a whole lot of research on the subject, and had gained a lot of valuable experience in what really works to keep people sober:Â *"We think... We usually find..."*Â The truth is, when Bill wrote that paragraph in December of 1938 and January of 1939,Â there were only 60 or 70 sober A.A. members in the whole world, and they didn't all agree with him. Their major experience was in watching Bill Wilson's religious programÂ fail to keep them sober, with most of the early A.A. members relapsing and leaving. Here, Bill Wilson was really just pushing his own strange Buchmanite religious beliefs, and trying to convince others that his ideas were the only things that work.

- *Lying by Omission*Â (some more):
  Half of those few sober A.A. members didn't like or do Bill Wilson's Twelve Steps. They were the members who demanded that Bill's 12 religious steps be called "suggestions", not requirements, because they saw clearly that Bill's dogmatic religiosity would drive away many of the alcoholics whom the program was supposed to help. See page 59 of theÂ *Big Book*Â â the steps are onlyÂ *"suggested as a program of recovery"*. But here, Bill wants to fool you into thinking that all of the sober members did Step Five thoroughly, holding nothing back, and that's why they were sober.

- *Post Hoc, Ergo Propter Hoc*: "*It happened after 'X', so it was caused by 'X'.*"
  "Time after time newcomers have tried to keep to themselves certain facts about their lives. Â ... Â Almost invariably they got drunk."
  Bill Wilson doesn't really give us any evidence that withholding embarrassing personal secrets makes people drink alcohol, just like he doesn't give us any evidence that confessing sins to other A.A. members makes people get sober. He just wants to fool us into thinking it. I can with equal validity argue that they all relapsed because they wore clothes to the meetings:

  > Time after time, we have seen newcomers make the stupid mistake of wearing clothes to A.A. meetings.Â *Almost all*Â of the newcomers who relapsed wore clothes. (What sins and bodily imperfections were they trying to hide?) Almost invariably, they got drunk. And almost all of the people who wore clothes to A.A. meetingsÂ eventually dropped out.

  Conclusion: Obviously, wearing clothes to A.A. meetings causes people to drink alcohol.

- *Sly Suggestions*,Â *Fear Mongering*, andÂ *Creating Phobias*:
  "If we skip this vital step, weÂ may notÂ overcome drinking."

  Then again, we might.Â (I did.)
  Notice how Wilson lies to you obliquely, by hints and suggestions, to lead you to an erroneous conclusion:Â "...weÂ **may not**Â overcome drinking."

  And Wilson does it again, here:

"... they wondered why they fell. We think the reason is that they never completed their housecleaning."
"**We think**"? It's hard to prove that Wilson is lying when he plants a suggestion like that. He might actually think that all of that crazy stuff is really true.

And we can again use the clothes clause:
"We think the reason that they relapsed is because they never completed the task of taking off all of their clothes and fully exposing themselves to the whole group."

- And who says that Step Five is aÂ *"vital"*Â step? Well, Bill Wilson does. That's assuming facts not in evidence, assuming facts yet to be proven, the trick calledÂ *petitio principii*. We have absolutely no evidence, other than Bill Wilson's deceitful declarations, that Step Five is in any way necessary, or even helpful, for quitting drinking.

- Sarcasm, Condescension, and Patronizing Attitudes:
"Trying to avoid this humbling experience, they have turned to easier methods."
If you won't do what Bill Wilson says, and humbly grovel before your sponsor and confess all of your sins, then you are just a weak, wimpy, unspiritual lazy bum who is guilty of seekingÂ *"an easier, softer way."*
(*You couldn't possibly be seekingÂ* ***a saner way****Â to recover.*)
Real men are proud to masochistically grovel on their knees and wallow in guilt.

For another example of lying by omission, look closely at this text:

> Â Â Â Despite four decades of AA research, no clear picture has emerged as to which patient characteristics can predict a positive outcome with AA and, therefore, can be used as criteria for matching patients to AA. Â ...
> Â Â Â Â To date, only three randomized clinical trials have examined the efficacy of AA participation, either with or without additional simultaneous treatment approaches (DitmanÂ et al. 1967;Â BrandsmaÂ et al. 1980;Â WalshÂ et al. 1991). The vast majority of AA studies, however, have focused on two narrower questions: Which factors predict whether a person will join AA? And how does involvement in AA predict outcome? In an attempt to answer these two questions, Emrick and colleagues (1993) reviewed 107 previously published AA studies.
> Tonigan, J. Scott, Hiller-Sturmhofel, Susanne, Alcohol Health & Research World, 0090838X, 1994, Vol. 18, Issue 4.

1. The authors almost accurately stated that there have only been three good randomized clinical trials of the effectiveness of Alcoholics Anonymous treatment ever done. (Actually, they ignored two of the best tests of all, the very large test done byÂ Drs. Orford and Edwards in England, and alsoÂ Dr. George E. Vaillant's clinical trial, which also had merit.)
2. But the authors did not tell us what those three good clinical trials actually found. They did not say one word about what Doctors Ditman, Brandsma and Walsh reported.
3. Instead, the authors did a quick tap-dance towards "the vast majority of A.A. studies" that were not properly done and are not scientifically or medically valid. Then they cited a survey done by Emrick where he examined 107 of those less-reliable "studies", essays, opinions, andÂ propaganda articles.

So what did those three valid clinical trails find? They found that Alcoholics Anonymous was a disaster:

- Dr. Ditman foundÂ that participation in A.A.Â *increased*Â the alcoholics' rate of rearrest for public drunkeness.
- Dr. Brandsma foundÂ that A.A. increased the rate of binge drinking. After several months of indoctrination with A.A. 12-Step dogma, the alcoholics in A.A. were doingÂ *five times as much*Â binge drinking as a control group that got no treatment at all, andÂ *nine times as much*Â binge drinking as another group that got Rational Behavior Therapy.
  Teaching people that they are alcoholics who are powerless over alcohol yields very bad results. It becomes a self-fulfilling prediction â they relapse and binge drink as if they really are powerless over alcohol.
- And Dr. Walsh foundÂ that the so-called "free" A.A. program was actually very expensive â it messed up patients so that they required longer periods of costly hospitalization later on.

- And the authors could have mentioned thatÂ Doctors Edwards and Orford foundÂ that A.A. was completely ineffective, and that having a doctor talk to the alcoholic for just one hour, telling him to quit drinking or else he would likely die, worked just as well as a whole year of A.A. meetings.

- And the authors could have mentioned that Dr. George E. Vaillant, member of the Board of Trustees of Alcoholics Anonymous World Services, Inc., found in his 8-year-long test thatÂ A.A. was completely ineffective, and just raised the death rate in alcoholics. His A.A.-based treatment program had the highest death rate of all of the treatment programs that he studied.

But the authors mentioned none of that. They just started talking about matching patients to A.A. without ever having established whether A.A. works or helps alcoholics even a little bit, or that weÂ *even should*Â try to match alcoholics to Alcoholics Anonymous. What is the point of sending patients to A.A. when it just makes them worse, and makes them binge drink and die?Â (So that also makes it an example of the propaganda trickÂ Assume The Major Premise.)

- **Hide the Truth**

Hide the truth by erasing it, or rewriting it, or destroying evidence, or stashing it someplace out of sight. Don't let people see the truth.

Such dishonest behavior is often rationalized by saying,Â "We don't want people to get the wrong idea."
Which really means:Â "We don't want people to get the right idea."

The Soviet dictator Joseph Stalin was famous for this. He massively rewrote Russian history. His agents actually went into libraries and cut pages out of books, and replaced them with other pages that said what Stalin wanted the people to read. People whom Stalin did not like and had killed â particularly other old Communists who could compete with Stalin for leadership â were simply erased from history. They became "non-persons" (which was the official term for someone who was erased from existence). They supposedly had no part in the Revolution. Their pictures were airbrushed out of historical photographs. All records of their existence were erased. They were never born. They simply never existed.

Bill Wilson taught hiding the truth as a standard recruiting trick. In his history of Alcoholics Anonymous,Â *Alcoholics Anonymous Comes Of Age*, Bill Wilson wrote:

> When first contacted, most alcoholics just wanted to find sobriety, nothing

> else. They clung to their other defects, letting go only little by little. They simply did not want to get "too good too soon."Â The Oxford Groups' absolute conceptsÂ â absolute purity, absolute honesty, absolute unselfishness, and absolute love â were frequently too much for the drunks. These ideas had to be fed with teaspoons rather than by buckets.
> Â Â Â Besides, the Oxford Groups' "absolutes" were expressions peculiar to them. This was a terminology which might continue to identify us in the public mind with the Oxford Groupers, even though we had completely withdrawn from their fellowship.
> *Alcoholics Anonymous Comes Of Age*, William G. Wilson, pages 74-75.

The alcoholics (whom Bill Wilson deprecatingly called "drunks" who didn't want to be good) just wanted to quit drinking; they didn't want to join Bill's crazy Buchmanite cult religion with its ridiculous Absolutes. So Bill Wilson's answer to that problem was to deceive the newcomers, and hide the intense religiosity of A.A., and to also hideÂ the Buchmanite Oxford Group cult religion rootsÂ of Alcoholics Anonymous, until after the newcomers had been indoctrinated and brainwashed enough... Mr. Wilson candidly admitted that he was practicingÂ deceptive recruiting, not honestly telling the newcomers what membership in his group would really entail. And now, the A.A. sloganÂ *"Teaspoons, Not Buckets"*Â teaches standard A.A. recruiting procedure.

The Alcoholics Anonymous shrine called "Stepping Stones", that was Bill Wilson's house in Bedford Hills, has been similarly cleansed of undesired information and unwanted history. There used to be a "spook room", downstairs to the left, where Bill Wilson would conduct sÃ©ances each day, and play with a Ouija board and talk to ghosts and the spirits of dead people.Â Bill Wilson routinely practiced necromancy and spirit-rapping and channeling of spirits, and fancied himself a skilled medium. The bookshelf in the room was full of spiritual and occult books. All of that is gone. The room has been "refurbished" to the point that nothing original is left, not even the wallpaper. Now the room features new furniture and a clear plastic bookshelf that contains only A.A. council-approved books (which are for sale in the bookstore). All documents pertaining to Bill Wilson's "spook sessions" have been removed and locked up in the sealed A.A. historical archives, where no one may see them.

For that matter, those historical archives are loaded with documents and history that you are not supposed to see (and probably never will see). There are the early financial records whereÂ Bill Wilson stole theÂ *Big Book*Â publishing fundÂ andÂ the copyright of theÂ *Big Book*. There are the letters whereÂ Clarence Snyder complained about Bill Wilson's financial dishonesty. There are accounts ofÂ Bill Wilson's misbehavior, like philanderingÂ andÂ LSD consumption. There is so much interesting stuff in that archive that the leaders of A.A. will not even release a list of what all is really in there.

- **Lie With Qualifiers**
  Make sweeping statements to give the impression you want, but insert so many qualifiers that the statements are meaningless, or downright dishonest. This is also known as "insert loopholes" into statements.

  You get bombarded with advertisements that say,
  "Make up to $6000 per month working from home."
  Up to?Â Why the upper limit? Why not a lower limit? Why don't they advertise,
  "Make at least $3000 per month working from home"?

  And Qwest says,Â "You get free long distance (except for a 10 cents per minute surcharge)."Â

If you have to pay 10 cents per minute, then it isn't free at all.

A bank advertises:Â "We can close your loan in as little as two weeks. Guaranteed."Â
*That isn't a guarantee. That open-ended qualifier.Â **"In as little as"**Â means that they might close your loan in two weeks, or two months, or two years, or whenever...*

2010-05-24: BP (British Petroleum) says that it "will pay all legitimate claims for damage" from their immense oil spill. What is "legitimate", and who gets to decide which claims are "legitimate"? Is BP really going to pay much at all? After the Exxon-Valdez ran aground and dumped its load, Exxon delayed payments for the Prince William Sound disaster for 20 years and then got the Supreme Court to reduce the payments to nearly nothing.

And then of course there is the recent example of the crazy Republican politician Rep. Todd Aiken who ranted about "legitimate rape", and claimed that women wouldn't get pregnant from "legitimate rape". (I guess only insincere rape gets a girl pregnant.)

And A.A. gives us numerous examples:
"It works, if you work it."
"It works, if you make it work."
Yes, andÂ eating vanilla ice cream works,Â **if you make it work**.
Dancing in a ballerina's tutu works, if you make it work.

Likewise,
"The Alcoholics Anonymous program works great for the rare few people for whom it works great."

InÂ *The Promises*, Bill Wilson wrote:

> If we are painstaking about this phase of our development [Step 9], we will be amazed before we are halfway through.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, 3rd Edition, page 83.

So of course if we are not amazed, then we were not painstaking enough...

Another example: the A.A. faithful read this statement out loud at the start of every A.A. meeting:

> RARELY HAVE we seen a person fail who has thoroughly followed our path.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, 3rd Edition, Chapter 5, "How It Works", page 58.

How could Bill Wilson write such a line when A.A. hadÂ a horrendously high failure rate?
Simple: the A.A. program requires people to abstain from drinking alcohol, so if they relapse and drink, then they aren'tÂ ***"thoroughly following our path"***, are they?

With that qualifier, Bill Wilson could have written,
Â Â Â "***NEVER***Â have we seen a person fail who has thoroughly followed our path".

For another example, in the Foreword to the Second Edition of theÂ *Big Book*, page XX, Bill Wilson wrote:

> Of alcoholics who came to A.A.Â and really tried, 50% got sober at once and

> remained that way; 25% sobered up after some relapses, and among the remainder, those who stayed on with A.A. showed improvement. Other thousands came to a few A.A. meetings and at first decided they didn't want the program. But great numbers of these â about two out of three â began to return as time passed.

The impression we get is that A.A. worked great, and sobered up 75% of the alcoholics pretty fast, and that all of the alcoholics benefited at least a little bit, if they just tried. Nothing could be further from the truth.

Later, Bill Wilson told the truth:

> You have no conception these days of how much failure we had. You had to cull over hundreds of these drunks to get a handful to take the bait.
> **Bill Wilson**, at the memorial service for Dr. Bob, Nov. 15, 1952; file availableÂ here.

This quote gives us the impression that A.A. had about a one or two percent recruiting success rate:Â *You have to "cull over hundreds of these drunks to get a handful toÂ take the bait."*Â But that "handful" is people who just "take the bait" and join Bill's club. How many of those gullible joiners actually stayed sober for a year or more?Â *Even less*, for sure. SoÂ the real long-term A.A. success rateÂ wasÂ **under one percent**, even by Bill Wilson's own reckoning.

So how do we reconcile the vastly different numbers in those two statements? Easy. We use qualifiers:

- First off, Bill Wilson began the first quote with a major qualifier about those alcoholicsÂ *"who came to A.A. and really tried"*. If they didn't join A.A., or they didn'tÂ *"really try"*, then they weren't counted.

- And who decided whether they hadÂ *really tried*?
  Well, Bill Wilson, of course.
  Heck, with that qualifier, Bill Wilson could make the numbers into anything he wanted them to be.

- The last qualifier counted only "those who stayed on with A.A.", so those who relapsed and left A.A. and didn't "Keep Coming Back" didn't count either. That conveniently eliminated all of the drop-outs, deaths, and failures from the statistics. So there wasn't a single case "of those who stayed on" that didn't "show improvement" in the statistics that Bill manufactured.

- So we can have the reality that less than one percent of the alcoholics were actually success stories, joining A.A., quitting drinking and staying quit for many years, while,Â in theÂ *Big Book*, after Bill Wilson prettied up the numbers with those qualifiers, it looked like at least 50% of the alcoholics were eventually getting sobered up by A.A. (75% of the two thirds who kept coming back).

Cute, huh? Now that's lying with qualifiers.

(And it's also a fair example ofÂ lying with statistics.)

"Keep Coming Back! It Works! (...If you work it...)"

- **Lie With Statistics**
  Speaking of which, there is the time-honored method of lying calledÂ *Statistics*.

  Both Mark Twain and Desraeli said that there are three kinds of lies:

  - Little White Lies,
  - Damned Lies,
  - and Statistics.

  You can have all kinds of fun with statistics:

  - Ninety-nine percent of all of the people who ate carrots between 1800 and 1900 are dead, so carrots are obviously very hazardous to your health. If you eat carrots long enough, you will certainly die.

  - President Eisenhower expressed astonishment and alarm when he was told that fully half of all Americans had below-average intelligence.

  - Likewise, fifty percent of all Americans have below-average income, or savings, or beauty, or housing, or education. It's no wonder why the politicians don't want to associate with all of those stupid, ugly, poor people, but guess who elects the politicians? If 80% of the stupid people, and 75% of the poor people, and 65% of the ugly people voted for a politician, then 220% of the poor, stupid, ugly people voted for the politician. No wonder that bozo got elected.

  - Another good one: Statistically, men who have survived two heart attacks almost never die from lung cancer or cirrhosis of the liver. There is just something about having heart attacks that protects people from death by cancer or cirrhosis. So, after you have had two heart attacks, you can smoke and drink all you want.

  - Ninety-three percent of the people who use statistics in their arguments just make them up, and the rest get the numbers wrong.

  - Fifty percent of all marriages end in divorce.
    If you think that's bad, consider that the other fifty percent end in death.

  - If you don't buy a lottery ticket, then your chances of winning are zero. If you do buy a ticket (Powerball), your chances of winning are only 0.00000002 â 1 in 50 million. Both numbers are so close to zero that there is little point in your actually handing over your two dollars and buying a ticket â you still aren't going to win.
    On the other hand, if you do buy a ticket, then your chances of winning are infinitely higher than if you don't.

  - Public service announcements on TV and radio declare:

    > "2 out of every 5 fatal automobile accidents was due to drinking. 33% of the drivers involved in fatal accidents had been drinking. 24% of the pedestrians involved in fatal accidents had been drinking. Therefore, alcohol intoxication is a major cause of automobile accidents, and drunk driving must be dealt with harshly."

    That logic sounds impressive, but it's completely wrong. Consider the reverse logic:

> "3 out of every 5 fatal automobile accidents did not involve drinking. 67% of the drivers involved in fatal accidents had not been drinking. And 76% of the pedestrians involved in accidents had not been drinking. Therefore, sobriety is undoubtedly the major cause of fatal automobile accidents, and sober driving must be outlawed immediately, and punished harshly."

- And we could really have fun, starting a big war with statements like, "Forty-five percent of the drivers in fatal automobile accidents were women, therefore women shouldn't be allowed to drive."
  (But if we did that, then 100% of the accidents would be caused by men. So men shouldn't be allowed to drive.)

- Some people often cite statistics like,

> "95% of all heroin addicts smoked marijuana before they graduated to the hard stuff. Therefore, marijuana is a gateway drug that leads to heroin."

That is also false logic. Consider this:

> "Further research has revealed that 99.8% of all heroin addicts consumed the white drug called milk for years before they graduated to the white powder called heroin. Therefore, giving children milk at school turns them into heroin addicts."

Or:

> "99% of all heroin addicts, cocaine addicts, amphetamine addicts, and marijuana users drank alcohol before they graduated to the harder stuff. Therefore alcohol is the universal gateway drug."

(Actually, there is a lot of evidence that alcohol reallyÂ *IS*Â the universal gateway drug, but the cigar-smoking, whisky-guzzling Senators and Congressmen in Washington don't want to hear that. They never tolerate hearing something bad about their own favorite drugs; they just want to hear bad stuff about other people's favorite drugs â preferably other people who are poor, a different color or subcultural type, and not registered to vote.)

- Another piece of propaganda on TV now says,

> **"In roadside tests of reckless drivers after auto accidents, one out of three drivers tested positive for marijuana. Marijuana: It's more harmful than we thought."**

  - They fail to establish any connection between having smoked marijuana some time in the previous 30 days (which is what the drug test detects) and driving recklessly or being in an auto accident today. They could just as well have tested for coffee, and then found thatÂ *"Coffee! It's more harmful than we thought."*

◊ And more harmful thanÂ *who*Â thought?
The anti-drug lunatics have been swearing that marijuana produces instant insanity and addiction ever since they made thatÂ *Reefer Madness*Â movie back in the 'thirties. They have never said that marijuana was harmless. So they are also using theÂ Sly SuggestionsÂ propaganda technique, implying that we thought it was less harmful than it really is.

◊ Also note that two thirds of those reckless drivers managed to get into their accidents without any help from pot. Logically, we must conclude thatÂ *NOT smoking*Â pot causes more reckless drivers to get into auto accidents than smoking it.

◊ That propaganda also did not say that the pot-smoking drivers actually caused any of the car accidents â they were just involved in the accidents. For all we know, they might have been hit from behind by drunk drivers.

◊ Which brings up,Â how many of the drivers involved in the accidents were drunk?
They didn't tell us anything about that, did they? Why weren't they saying, *"Alcohol â it's more harmful than we thought"*?
The propagandists appear to be hiding all evidence of drunk driving (*lying by omission*) and just trying to blame all of the auto accidents on marijuana. But we know from other propaganda, especially that disseminated byÂ ***Mothers Against Drunk Driving***, that alcohol is the major cause of fatal auto accidents. (But that's a different TV commercial.)

◊ One of the factors that really biases such a test is the fact that traces of marijuana will linger in body fat for up to a month, while the evidence of any use of alcohol, speed, cocaine, or heroin disappears within a day or two. That can make it look like there is a lot more pot smoking going on than there really is, while it fails to detect the chronic abuse of other drugs.

◊ Speaking of which, they didn't even say that they tested for those other drugs, did they? They only told us that they tested for marijuana. What else were the drivers on?

Obviously, such propaganda is not designed to tell anyone the truth about drugs. It is just more lying politics as usual.

- **Scream Accusations of Lies and Lying**
  This is just the opposite of telling a lot of lies: When your opponent tells some unpleasant truths that you don't want to hear, scream accusations of lies and lying. Dismiss everything he says as a lie, no matter how true it is.

  Alcoholics Anonymous members use this technique often. Whenever they are presented with really undesired facts, like the fact thatÂ A.A. Trustee and Harvard Professor Dr. George E. VaillantÂ found from eight years of testing A.A. as a treatment for alcoholism, that A.A. was completely ineffective and just produced an appalling death rate,Â A.A. defenders simply complain that that is a lie.

- **Observational Selection**
  Observational selection, also known as "cherry-picking", is a tactic like counting the hits and forgetting the misses. See only what you wish to see. Overlook and ignore evidence you don't wish to

see. And encourage your audience to be equally blind. Observational selection will destroy the validity of any statistical study.

> **All lies and jest,**
> **Still a man hears what he wants to hear**
> **And disregards the rest.**
> **Ooh-la-la-la-la-la-la-la.**
> *The Boxer*, by Paul Simon and Art Garfunkle.

The classic example of this is: Something very unusual happens, and it turns out that a tabloid "psychic" predicted it. So the "psychic" must be the real thing, able to see the future, right? Wrong. It turns out that the self-proclaimed "psychic" made many hundreds of screwy, off-beat "predictions", and just by chance, one of them came true. The "psychic" just doesn't bother to tell you about all of the wrong guesses that didn't come true... Fans of Nostradamus still do this for him.

That "psychic's" stunt can be staged in very convincing ways, like:

- The "psychic" writes his prediction on a piece of paper.
- The paper is put into an envelope, which is sealed by several witnesses who put their seals on the envelope, and sign it and date it, and even add code numbers to later verify that it's the envelope they sealed.
- The envelope is kept locked in a safe or bank vault for a long time, until after The Big Event has happened.
- Then, in a big showy ceremony, in front of hundreds of witnesses and many TV cameras, the safe is opened and the envelope is removed from the safe and opened, and there it is for all to see:Â **unquestionable proof**Â that the "psychic" predicted the event.

You guessed it: the safe is alsoÂ *full*Â of failed predictions, which the con artists happily ignore. (There may even be another envelope in the safe that contains a prediction that is the exact opposite of what just happened... The code numbers on the envelopes tell the con artists which prediction is in which envelope.)

Another way to use observational selection to get desired results is to do many studies or tests, and only report the results that you like. For example, suppose you are a P.R. firm hired to make Buzz Cola look better than Fizz Cola. You could get 1000 people to do a taste test, to see which they liked better, but you don't. You do 100 "tests", each of which have only 10 people in them. In 95 of the tests, the people liked Fizz Cola better. But by random chance, in the other 5 tests, a majority of the people liked Buzz better. So you report,
"In test after test, a majority of the people chose Buzz Cola over Fizz."
Technically, that statement is true, even if it is deceptive as can be. You just don't bother to mention all of the other tests where the people liked Fizz better.

> *I didn't mean to pick on any real cola brand names there. I wrote that paragraph many years ago, and just made up the names "Buzz" and "Fizz" to avoid using names like "Coke"Â® and "Pepsi"Â®. That was years before I ever heard of any Buzz or Fizz Cola. Years later, I was really surprised to find that somebody usedÂ **both**Â of those names for actual brands of soft drinks. Sometimes, reality mimicks satire.*

And obviously, another way to rig any test or study is toÂ *cherry-pick*Â the people who will be in the test. If you want 'Group A' to look better than 'Group B', then put all of the promising candidates in

Group A, and put all of the losers in Group B. (That is why real valid tests must be randomized. You must throw dice, or pick names out of a hat, or something like that, to choose which people go into which group.)

The government uses a subtle form of observational selection and cherry-picking in reporting the national unemployment rate: They only report those people who are actively looking for workÂ *at the unemployment office*. People who have despaired and given up looking for work, or who are still looking but have simply stopped asking at the unemployment office, are erased from the rolls of "the unemployed", and are not counted when the government calculates the national unemployment rate. (Likewise, someone who accepts a menial job for minimal wages out of sheer desperation â even a part-time minimum-wage job â is considered no longer unemployed.) The real unemployment rate is always much higher than the government reports, no matter which political party controls the government. They all misreport the facts.

Another example of observational selection:
Smith:Â "I have here 29 files that describe cases where people went to Alcoholics Anonymous meetings and quit drinking. So we have aÂ *demonstrated relationship*Â between people going to meetings and quitting drinking."
Jones:Â "How many cases of failure were there, where the people went to A.A. meetings but didn't quit drinking?"
Smith:Â "I didn't study them. They weren't interesting, because they were just failures. I'm more interested in what works. Besides, those other people don't count because they didn't keep coming back."

That is just like Bill Wilson only printing selected success stories in theÂ *Big Book*.

And that is just like how Alcoholics Anonymous claims a great success rate today.Â The people who relapse and leave are not countedÂ â A.A. says that they didn't "work the program" right, or they didn't "keep coming back", so they don't count. Only the people who stay in A.A. and attend many meetings (usually because they quit drinking) get counted.

Some treatment facilities use a variation onÂ *Observational Selection*Â â they cherry-pick their patients, drafting into their program as many of the most promising prospective patients as they can get, in order to improve their "success rate":
Â Â Â "You have someone who just quit drinking two weeks ago? You say that he quit once before, and stayed sober for three years, all on his own, without any treatment or A.A. or anything â just going it alone? Quick! Shove him into our treatment program, so that we can 'treat' him, and teach him how to stay sober for six months. Then we can score him as one of our 'success stories'."
(That story isÂ 100% autobiographicalÂ â that's my own personal experience with a "treatment program".)

Likewise, most all treatment centers are very deceptive when they advertize their success rates â they only reveal what percentage of theÂ *program graduates*Â are sober shortly after the end of the program. They ignore all of the people who drop out, flunk out, and relapse and disappear, and do not include them in the reported statistics. (TheyÂ rationalizeÂ that deception by saying,Â "Well, they didn't finish the program, so they don't count.")

If 100 people start a program, and ten of them last until graduation, and 8 of them are still clean and sober a month later, then the treatment center advertizes an 80% success rate. That is obviously false. A mere 8% success rate is obviously closer to the truth. But then the treatment centers do not do a follow-up a year later, to see what the real long-term success rate is. That would reveal even more failures. In the final analysis, the success rate of the treatment programs is little or nothing more

thanÂ the normal rate of spontaneous remissionÂ â the success rate of people who get no treatment at all (approximately 5% per year).

And I know of a drug treatment program that rejects, and will not even try to treat, any and all people who have been treated before and then relapsed â even their own graduates â because the program managers are afraid that those relapsers will relapse again and pull down the program's average "success rate". That program also discounts all of their dropouts and relapsers. When someone "goes out" and uses drugs, or gets arrested for something, the counselors simply erase that person's name from the list of patients, and they do not count him in computing their success rate. Then they claim that their program is very successful and greatly reduces the crime rate of their patients (those few remaining patients who are not currently out stealing to get a fix).

When such a treatment center announces that it has reduced crime in its patients by a certain amount, it is lying with statistics. It is not revealing the resulting average crime rate of all of the clients who started treatment; the T.C. is only revealing the average crime rate of those few successful patients who are still sticking with the program and still abstaining from drugs and alcohol.

Another kind of observational selection is interpreting data in a biased manner, seeing what you wish to see. That is illustrated in this story:

Â Â Â A drug and alcohol treatment center that used acupuncture on its clients (PAAC) wanted to show that acupuncture reduced cravings for drugs and alcohol in patients who were in recovery, so that the treatment center could produce a report that justified continuing to bill health insurance companies and state agencies for more acupuncture treatments. So they conducted a survey where they questioned their patients to see how the acupuncture treatment was affecting them:Â
Â Â Â Counselor: "How are you doing with cravings for alcohol?"Â
Â Â Â Patient: "No problem. I don't have any."Â
Â Â Â Counselor: "That's because of the acupuncture."Â
Â Â Â Patient: "No, it's because I don't have any cravings for alcohol. I am craving cigarettes like mad, because I also quit smoking, but I'm not craving alcohol."Â
Â Â Â Counselor: "That's because of the acupuncture. I'll write down that acupuncture has reduced your cravings for alcohol."Â
Â Â Â Patient: "No, actually it hasn't. I just don't have a problem with cravings for alcohol. I didn't have any cravings the last time I quit drinking, all on my own, without any treatment or acupuncture, and I don't have any this time either. I am too busy crawling the walls for a cigarette to crave alcohol."Â
Â Â Â The counselor wrote "acupuncture reduced cravings" anyway.

That story is also autobiographical, and 100% true.

Later, the city and state agencies received a report that declared that a survey of the patients found that acupuncture was very helpful for reducing their cravings for drugs and alcohol, so the city agencies and the state health plan should continue to fund acupuncture treatment of patients in recovery.

Notice that there was also no control group. That is, there should have been another group of patients who received no acupuncture, who were also surveyed to find out how much they were bothered by cravings. Then you compare the results from the two groups to

determine what effect, if any, the acupuncture actually had on cravings for drugs or alcohol.

Unfortunately, such properly-conducted research is almost never done by substance-abuse treatment centers.Â Their findingsÂ are usually just as phony as theirÂ claimed success rates.

Another good stunt is to take surveys at A.A. or N.A. meetings. Only the faithful members whoÂ *Keep Coming Back*Â will be there to answer the questions. Asking,
"Is there anyone here for whom the Twelve Steps did not work?"
is the same stupid thing as asking,
"Will everyone who isn't here please raise your hand?"
(Never mind the fact that it also immediately leads to an "Emperor's New Clothes" situation where no one wants to confess that he is the only unspiritual one for whom the Steps are not working...)

Observational selection does not have to be deliberate. One of the ever-present dangers to a researcher is accidental or unconscious bias in making observations. InÂ a study of the use of LSD in therapy for alcoholism, the authors also studied the methods that other studies had used. Their observations were disconcerting â it seems that people have an unfortunate tendency to see whatever they wish to see whenever tests are not rigidly controlled. The various psychiatric treatments and medications being tested were successful in 83 percent of theÂ *uncontrolled*Â studies, but only in 25 percent of theÂ *controlled*studies. How curious. It would seem that looking too closely, and measuring too carefully, makes the medicines or treatments suddenly stop working.

That's a good example ofÂ *researcher bias*. The researchers just really wanted their experiments to be sucesses, so that's what they tended to see. But when their studies were rigorously controlled, then the researchers were forced to be more objective, and the observed success rate dropped sharply. (That is also why the FDA prefersÂ *double-blind*Â studies, where neither the patients nor the doctors know whether the patients are getting the real medicine or a placebo.)

A variation on the theme of Observational Selection is getting biased data even when you don't wish to. In one survey, researchers sent out questionaires that essentially asked people to honestly reveal their racist attitudes. Not surprisingly, a lot of the questionaires were simply never returned, and lots more reported that the respondents just didn't have any racist attitudes at all. As you can imagine, the resulting statistics showed that racism and racist attitudes were almost non-existent.

- **The Statistics of Small Numbers**
  Also beware ofÂ *The Statistics of Small Numbers*, which is a different kind of observational selection. It is an error caused by looking at too small of a sample. For instance,Â "They say that one out of every five people on Earth is Chinese. That can't be true. I know hundreds and hundreds of people, and only three of them are Chinese. So Chinese people must be pretty rare, really..."

  A variation of that is: A wildlife program on Public Television says:Â "One out of every four mammals is a bat."
  Well, let's see...Â "I know I'm not a bat, and my wife isn't a bat, and Joe isn't a bat, so Harry must be a bat."Â Variations onÂ *The statistics of small numbers*Â include:

  - Hasty Generalization: Generalizing from too-small a sample.
  - Inductive Generalization
  - Insufficient Sample

- Insufficient Statistics
- Leaping to Conclusion
- Lonely Fact
- Statistical Generalization
- Converse Accident

*The statistics of small numbers*Â problem appears in discussions of A.A. often. People will say things like,Â "We don't have anyÂ nasty thirteenth-stepping sexual predatorsÂ in our group,"Â and imagine that every other group in the whole country must be just the same, and that it doesn't happen anywhere else either. Unfortunately, it does.

Likewise,Â "Nobody in our group has committed suicide, so those stories aboutÂ A.A. SuicidesÂ are ridiculous."

How can you be sure, unless you know every member of your group very well, and keep track of all of them, and check up on them, and know what shape each drop-out, quitter, or disappearance is really in? You don't really expect them to commit suicideÂ *at the A.A. meetings*, do you? And again, you have no idea what is happening in the other A.A. groups that you don't visit. They sure aren't going to email you to broadcast the news about their suicides.

And again,Â "No sponsors in our groupÂ tell the newcomers toÂ quit taking their doctor-prescribed medications, so those stories must be untrue."
I wish they were. (And how do you know what some sponsor is telling his sponsee, if you aren't listening in?)

- **Bury The Lead**
  Burying the lead (pronounced, "leed") is a newspaper term. It means that you hide the most important fact in the story down at the bottom of the article.

  For example, a recent newspaper article about the soaring price of oil tried to explain the price increases in terms of speculators buying oil futures, and political instability in foreign countries causing uncertainty in the market. Then they gradually got around to mentioning that India and China have booming economies that want ever more oil. And then finally, in the last sentence of the article, someone said, "Oil is getting harder to find."

  Historically, one of the best examples ofÂ *Burying The Lead*Â was when the New York Times casually mentioned in a small article on page 9 of an issue, many months after the 2000 election, that if we had counted all of the votes (which is, after all, what you are supposed to do in a democracy), that Al Gore actually won the election.

- **The Big Lie**
  TheÂ *Big Lie*Â is a technique that Adolf Hitler used with great success. The idea is that you just keep repeating the same lie over and over, in spite of all arguments or evidence to the contrary, until people believe it. Massive repetition is essential. (Think: "Why do they keep running the same stupid commercials on TV, over and over and over again,Â *ad nauseum*?")

"Tell a lie enough times and it will become the truth."
â Heinrich Himmler

"A big lie is more plausible than truth."
â Ernest Hemingway

Hitler explained hisÂ *Big Lie*Â technique inÂ *Mein Kampf*,

> The greatness of the lie is always a certain factor in being believed; at the bottom of their hearts, the great masses of a people are more likely to be misled than to be consciously and deliberately bad, and in the primitive simplicity of their minds, they are more easily victimized by a large than by a small lie.... Some part of even the boldest lie is sure to stick.

It's a strange fact of human psychology that giant, totally outrageous lies are sometimes more believable than small lies, just by virtue of their bodaciousness. People feel that there must beÂ *something*Â to it, because the claims are so extreme. People can't help but feel thatÂ *"Where there is so much smoke, there must be some fire."*

In using theÂ *Big Lie*Â technique, Hitler said, essentially,

> The Jews are an inferior race. The Jews have always been the thieving greedy bankers and money-lenders, bleeding the lifeblood out of our country. Everybody knows that the Jews are the cause of all of our problems, and now that we are imposing the Final Solution, we will soon be much better off without them.

Today, the fascist rap is,

> Drug users and dealers are inferior people. They are really low, dirty and disgusting bums who deserve to die because they are drug users and dealers, and they don't care about anything but getting high. Everybody knows that they are the major cause of all of our problems. When we impose the death sentence for more and more drug offenses, we will finally get rid of those dopers, and we will be much better off without them.

And:

> Those poor, long-suffering rich people desperately need a tax cut. They have been treated so badly by the government for so long, it's the least we can do to make it up to them. (Heck, some of them are down to their last billion.) Giving the rich people a tax cut will stimulate the economy so much that soon the wealth will trickle down, and we will all benefit from it.
> *[Just like happened under Ronald Reagan and George Bush â Remember:Â "It's the economy, stupid!"]*

And Donald Rumsfeld, Secretary of Defense, said, in speaking of theÂ *"Shock and Awe"*Â bombing war that he was waging against Iraq (March 21, 2003):
Â Â Â Â **"You don't understand how compassionate our bombing is."**

I'm sure that the children whose heads were blown off by malfunctioning smart bombs really thought that it was compassionate.

On Jan. 27, 2004, NBC Evening News reported that the death toll of civilians killed in Iraq in the Bush vs. Saddam War had reached 10,000. That is a lot more than the 2900 Americans who died on September 11, so that's a lot of pay-back. And Saddam Hussein of Iraq wasn't even the guy who attacked America; it was Osama bin Laden from Saudi Arabia, remember? (The guy whom the CIA armed and funded during the Russia-Afghanistan War.)

A few months later the score was 13,000 dead, and by April 16 it was up to 14,000, because of the battle in Fallujah That's a lot of pay-back to a country that didn't attack us.

In just the two-week period from April 1 to April 15, 90 Americans and 900 Iraqis died, mostly in Fallujah, most of them civilians (punishment for the killing of four American civilian contractors in Fallujah).

If reminds me of the Nazi reprisals during WWII. If one German soldier was killed by The Resistance in an occupied town, the Nazis would get their revenge by randomly shooting hundreds of civilians in that town, just making sure that somebody was always punished, even if it wasn't the people who did it.

When the German S.S. ObergruppenfÃ¼hrer Reinhard Heydrich was assassinated in Czechoslovakia by the Czech underground, the Germans simply totally annihilated a nearby town â Lidice â in reprisal. They immediately shot all of the men, and sent the women and children to concentration camps, where most of them eventually died. Then they burned and blasted and bull-dozed the town until nothing was left but rubble, and then the Germans erased the name of the town from the maps.

When the war ended, the Allies assembled at the Geneva Convention and wrote up the Geneva Accords, which made such group punishment a war crime. (But then Donald Rumsfeld, G. W. Bush's Secretary of Defense, announced that the Geneva Convention was obsolete and that he did not wish to be limited by it.)

So after four Blackwater contractors were killed in Fallujah, 900 residents of Fallujah were killed in reprisals â the vast majority of them being civilians, including plenty of women and children.

On March 19, 2004, on the anniversary of the start of the war, it was revealed by major news networks that the U.S. forces had used cluster bombs against targets located in civilian areas of Bagdad during "Shock And Awe". Such cluster bombing of civilians is a violation of international law. It's a war crime. A U.S. military spokesmen said that the American commanding officers felt that such usage was "appropriate".

As of December, 2004: Now the city of Fallujah has been destroyed to eliminate the resistance, with a loss of Iraqi lives so high that the American officials won't count them and release the count. They will not tell us how many civilians were killed by American firepower. The best study to date estimates that the total Iraqi death toll in the war is now over 100,000 â with most of them being civilians, including many, many children.

As of 4 August 2005, the score was:

- 1825+ U.S. military people dead in Iraq.
- 43,000+ U.S. wounded, maimed, and crippled for life.
- 113,000+ dead Iraqis, most of them civilians, including 30,000 children.

And still, the Bush administration constantly repeats the chant that the war is a good thing.Â "Freedom is on the march."Â That's theÂ *Big Lie*Â technique.

UPDATE: July 2007: Now, of course, the war has gone on for two more years, and all of the body counts are much higher. The British medical journalÂ *Lancet*Â reported last year that their estimation of Iraqi deaths was 600,000. The American deaths were 3546 as of 22 June 2007. And the people wounded, maimed, and crippled are uncountable.

And still, George W. Bush prattles on about "victory in Iraq", and "establishing democracy", and "creating a stable government there", and "when they stand up, we will stand down."

That's theÂ *Big Lie*Â technique.

And A.A. says:

- Alcoholics Anonymous is the best â theÂ **only**Â â way to recover from alcoholism.
- Nobody can do it alone.
- Everybody knows that The Twelve Step programs work, andÂ keep millions of people sober.
- Alcoholics Anonymous is an enormously successful program.
- "RARELY have we seen a person fail, who has thoroughly followed our path..."Â (The Big Book, 3rd & 4th Editions, William Wilson, page 58.)
- Everybody knows that A.A. is spiritual, not religious.
- If you are having a problem with drinking too much alcohol, then you have a disease which only a spiritual experience will conquer.Â (The Big Book, 3rd & 4th Editions, William Wilson, page 44.)
- Alcoholism is an incurable, progressive disease, often caused by an inherited gene, and a disease is respectable, not a moral stigma.Â (The Big Book, 3rd Edition, Marty Mann, Page 227.)
- Nobody can quit drinking until they hit bottom and are ready to surrender to the A.A. program.
- The best thing you can do for a loved one is force him to go to A.A. meetings, for his own good.
- In A.A., nobody has any power over anyone else. In A.A., everybody is equal (but some people are more equal than others).
- So Keep Coming Back! It Works if you work it... You die if you don't. So work it, you're worth it!

In an official A.A. history book, A.A. co-founder Dr. Robert Smith said,

> He said, "Duke, I think this A.A. program will appeal to you, because it's psychologically sound and religiously sane."
> *Dr. Bob and the Good Oldtimers*, Alcoholics Anonymous World Services, Inc., 1980, page 253.

That statement is the exact opposite of the truth:

- A.A. is psychologically unsound.

- A.A. is based on superstition and gross misconceptions about how the human mind and alcoholism actually work.
- A.A. isÂ completely irrational and unscientific, and even brags about it. A.A. even teaches that members can getÂ miracles on demandÂ from any old 'god' or 'higher power' that they chose.
- A.A. is religiouslyÂ *insane*Â â it is justÂ the old fascist cult religion of Dr. Frank N. D. BuchmanÂ with a new coat of paint on it.

And still, A.A. prints and distributes large quantities of propaganda that claims just the opposite.

That's theÂ *Big Lie*Â technique.

Here, Bill Wilson quotedÂ Dr. Harry M. TieboutÂ quoting Bill Wilson, as if that would add authority to Bill's faked numbers:

> "Alcoholics Anonymous claims a recovery rate of 75 percent of those who really try their methods. This figure, coupled with their mushroom growth, commands respect and demands explanation."
> [Reprinted from The American Journal of Psychiatry, January 1944, "Therapeutic Mechanism of Alcoholics Anonymous".]
> *Alcoholics Anonymous Comes Of Age*, William G. Wilson, page 310.

Actually, such a figure commands contempt and derision, because it is a bare-faced lie. Alcoholics Anonymous never had a success rate anything like 75%; they didn't even get a tenth of that. Notice how Tiebout repeatedÂ Bill Wilson's grossly inflated and exaggerated claims of successÂ as if they were true facts, and even cited them in professional journals. That is theÂ *Big Lie*technique, one more time again.

[Also notice how cleverly Tiebout covered his own ass: He started off by saying that A.A. merelyÂ *claimed to have*Â a 75% success rate â a rate which Tiebout had to know was totally untrue, because Tiebout was Bill's psychiatrist, and Tiebout had a number of other patients in A.A., too, so he could see what was going on. But then Tiebout just accepted Bill's grossly exaggerated claims as correct, and declared that they "commanded respect and demanded explanation". If anyone called Tiebout on it later by pointing out just how inaccurate those numbers really were, Tiebout could always just pass the buck to A.A., and say that he was just using their numbers.
And the psychiatrist Dr. Tiebout accepted those inflated numbers as valid, in spite ofÂ his own diagnosisÂ of Bill Wilson's mental state as "immature and grandiose", and stating that Bill Wilson was trying to live out "the infantilely grandiose demands" of "His Majesty the Baby."]

Since then, numerous A.A. shills have parrotted those false numbers without doing any research of their own. The West Baltimore Group of A.A. has a web page on the A.A. success rate that declares:

> Q - What is the success rate of Alcoholics Anonymous?
> A - Of those sincerely willing to stop drinking about 50 per cent have done so at once, 25 per cent after a few relapses and most of the remainder have improved. (N.Y. State J. Med., Vol. 44, Aug., 1944)
> ...
> Of those alcoholics who wish to get well and are emotionally capable of trying our method, 50 per cent recover immediately, 25 per cent after a few backslides. The remainder are improved if they continue active in A.A. ...
> (N.Y. State J. Med., Vol. 50, July 1950)
> *What is A.A.'s Success Rate?*,Â http://www.voai.org/Success%20Rate.htm

Notice how the West Baltimore Group of A.A. quoted the New York State Journal of Medicine as if it were endorsing Alcoholics Anonymous, and reporting the A.A. success rate. But that Journal was actually just publishing a piece of propaganda that was written by Bill Wilson, an article that Wilson got into the Journal with a letter of endorsement byÂ Dr. Harry M. TieboutÂ â "**Basic Concepts of Alcoholics Anonymous**" by William G. Wilson. (So much for anonymity.) That article contained the same false claims as Bill Wilson wrote in the foreword to the second edition of the "Big Book" â lines which were blatant lies when they were written, and which are still lies.

> Of alcoholics who came to A.A. and really tried, 50% got sober at once and remained that way; 25% sobered up after some relapses, and among the remainder, those who stayed on with A.A. showed improvement.
>
> William G. Wilson, in the Foreword to the Second Edition ofÂ *Alcoholics Anonymous*, page XX, 1955.

Those numbers were not even vaguely true, and still aren't. You can read an analysis of those false claimsÂ here.

Likewise,Â Bill Wilson wroteÂ that an A.A. newcomer said:

> "Then I woke up. I had to admit that A.A. showed results, prodigious results. I saw that my attitude regarding these had been anything but scientific. It wasn't A.A. that had the closed mind, it was me."
>
> *Twelve Steps and Twelve Traditions*, William G. Wilson,Â page 27.

- Alcoholics Anonymous does not produceÂ *"prodigious results"*Â â not unless you consider
  - aÂ high death rate,
  - aÂ high dropout rate,
  - aÂ high relapse rate,
  - and aÂ high rate of binge drinking

  to beÂ *"prodigious results"*.
- And it is A.A.'s attitude that is extremely anti-scientific â A.A. claims that its program works inÂ some mystical, magical wayÂ thatÂ cannot be scientifically testedÂ or logically explained.
- When Bill Wilson wrote that paragraph of "12X12" (*Twelve Steps and Twelve Traditions*), he was just lying again.Â Bill Wilson habitually liedÂ about the A.A. failure rate, and routinely covered it up and declared that his program was immensely successful in saving alcoholics. And A.A. is still doing that today.

That's theÂ *Big Lie*Â technique.

Â Â Â And they have been doing that for a very long time, too. This phony "review" of the "Big Book"Â *Alcoholics Anonymous*was published inÂ *The New York Times*Â in 1939. It was actually

written by a hidden A.A. true believer â Percy Hutchison, the New York TimesÂ *poetry editor*Â â who was scheming with Bill Wilson and the other early A.A. members to help sell the new A.A. book, not by any neutral observer or dispassionate critic, or by anybody who knew anything about treating alcoholism:

> Â Â Â Lest this title should arouse the risibles in any reader let me state that the general thesis of "Alcoholics Anonymous" is more soundly based psychologically than any other treatment of the subject I have ever come upon.
> ...
> Â Â Â "Alcoholics Anonymous" is unlike any other book ever before published. No reviewer can say how many have contributed to its pages. But the list of writers should include addicts and doctors, psychiatrists and clergymen.
> ...
> Â Â Â Here, then, is the key to "Alcoholics Anonymous," the great and indisputable lesson this extraordinary book would convey. The alcoholic addict ... cannot, by any effort of what he calls his "will," insure himself against taking his "first dose." We saw how the chap with his whiskey in milk missed out. There is one way for our authors, and but one way. The utter suffusion of the mind by an idea which shall exclude any idea of alcohol or of drugs.
> ...
> The thesis of the book is, if we read it aright, that this all-embracing and all-commanding idea must be religious. ... There is no suggestion advanced in the book that an addict should embrace one faith rather than another. He may fall back upon an "absolute," or "A Power which makes for righteousness" if he chooses. The point of the book is that he is unlikely to win through unless he floods his mind with the idea of a force outside himself. So doing, his individual problem resolves into thin air. In last analysis, it is the resigning word: Not my will, but Thine, be done, said in the full knowledge of the fact that the decision will be against further addiction.
> ...
> The argument, as we have said, has a deep psychological foundation.
> **BOOK REVIEW, NEW YORK TIMES, June 25, 1939. ALCOHOLIC EXPERIENCE**, By Percy Hutchison

Percy Hutchison was actually prescribingÂ *religiomania*Â â maniacal obsession with religion â and faith healing as the best cure for alcoholism. Religiomania and faith healing are not "soundly based psychologically", and they do not have "a deep psychological foundation". Nevertheless, the A.A. true believers persistently claim that A.A. does, even while they simultaneouslyÂ brag that A.A. is not based on science. And they have been doing that for 76 years now.

That's theÂ *Big Lie*Â technique. Just never stop telling the lie, no matter how absurd and contradictory it is..

Percy Hutchison was theÂ ***poetry editor***Â ofÂ *The New York Times*.

- What does a poetry editor know about medicine, alcoholism, or human psychology?

- How could he claim that A.A. was the best cure for alcoholism that he had ever seen? How many others had he seen?
- How could Hutchison claim to know that the problem of alcoholism would just "resolve into thin air" if an alcoholic followed Bill Wilson's instructions?
- What was Hutchison doing reviewing a book about a new cure for alcoholism, and recommending one treatment program over another?
- When did Percy Hutchison become qualified to advise the public about critical life-or-death medical conditions like alcohol addiction? Isn't that the job of the medical editor or the science editor or an actual doctor?

Let me guess â Hutchison suggested the book to the newspaper's editors, and volunteered to review it, because he really wanted people to hear about a "wonderful new fellowship that had a magical new treatment program for alcoholism..."

The June 1940 financial report of "Works Publishing"Â says that the original New York A.A. group used the New York Times Book Review and several other media outlets to publicize and tout the newly-printedÂ *Big Book*Â for free. Obviously, that so-called "book review" was a fraud â a very biased piece of promotional propaganda, a commercial for the book, not a fair objective analysis of the Alcoholics Anonymous program.

That's theÂ *Big Lie*Â technique â just keep saying it, over and over and over again, as often as you can, and in as many places as you can, no matter what, until people believe it.

And here another long-time true believer parrots the lie:

> It is probable that more contemporary alcoholics have found sobriety through the fellowship of Alcoholics Anonymous than through all other agencies combined.
>
> *Alcoholics Anonymous, an interpretation*, by Milton A. Maxwell, Ph.D., contained in Chapter 33 ofÂ *Society, Culture, and Drinking Patterns*, David J. Pittman and Charles R. Snyder,editors, page 577.
>
> (Note that Milton A. Maxwell was a member of the Board of Trustees of Alcoholics Anonymous World Services, Inc..)

Actually, it isn't "probable" at all. The truth is thatÂ the Harvard Medical School saysÂ that 80% of those alcoholics who successfully quit drinking for a year or more do it alone, on their own. That only leaves 20% who could possibly have recovered through Alcoholics Anonymous, and lots of those 20% did it in other ways too, like in Christian brotherhoods or monasteries, the Veterans' Administration program, the Salvation Army, the Catholic DePaul program, Rational Recovery, SMART, SOS, WFS, etc...

ConsideringÂ the immense A.A. dropout rateÂ andÂ high A.A. failure rate, it isÂ **"probable"**Â that very few of the successful sober alcoholics actually recovered through Alcoholics Anonymous.

Today, the A.A. campaign of misinformation continues even in the halls of Congress:

> As the fabulously successful twelve-step program pioneered by Alcoholics Anonymous has conclusively demonstrated, one cannot tackle a crisis until

acknowledging the reality of a genuine problem.

Statement of John C. Hulsman, Ph..D. Research Fellow for European Affairs, the Davis Institute for International Studies, The Heritage Foundation.Â **Committee on House International Relations Europe Subcommittee**Â June 11, 2003.

I sincerely hope Mr. Hulsman knows more about foreign affairs than he knows about alcoholism treatment programs, or else we are liable to find ourselves trapped in a quagmire of unwinnable foreign wars...

[P.S.: A year later:Â *Let's see now, how did that premonition work out?*
Afghanistan? Iraq? The so-called "War on Terrorism"?
"Fabulously successful" easy victories, or quagmires?]

[P.S.: Two years later:Â *Let's see now, how did that premonition work out?*
"Fabulously successful" easy victories, or quagmires?]

[P.S.: Three years later... Four years later...Â Ten years later?Â Need I continue?]

- **Reversal Of Reality**, andÂ **Counter-attack by Reversal of Reality**
Have the nerve to completely reverse reality, and say the exact opposite of the truth.

A young woman wrote: "My roommate 'borrows' my clothes without my permission and she leaves them sweat-stained and stretched out. They are ruined. When I complain about it, she says that I am selfish."

When white women comprise the majority of the women receiving welfare, say that Black women comprise the majority of the women on welfare.

As evidence accumulated that the Bush administration had lied, fabricated evidence, distorted other evidence, and hidden contradictory facts about the Weapons of Mass Destruction in Iraq in order to manufacture an excuse to go to war, Vice President Dick Cheney declared:
Â Â Â Â "The President and I cannot prevent certain politicians from losing their memory or their backbone, but we're not going to sit by and let them rewrite history."
(TIME, Nov 21-27, 2005)

Likewise, when CIA agent Valerie Plame's cover was blown, Bush declared:Â "We are going to find those leakers and take care of them."
Of course, George Bush and Dick Cheney and their White House Chiefs of Staff turned out to be the leakers, but that's okay, Scott McClellan said, because George had already declassified the secret information and approved of the leaks before they leaked it â so George knew who the leakers were even as he swore on TV that he would catch the leakers.

2011.01.10: In the past few years, political rhetoric has become increasingly hostile and vicious. Sarah Palin's web site showed pictures of Democrats' districts with rifle cross-hairs on them, and Palin repeatedly instructed followers to "lock and load" and "reload". And the Tea Party language was even worse, with barely-veiled death threats, and appeals for "Second-Amendment (gun) solutions" to problems.

In the debate following the attempted assassination of Congresswoman Gabrielle Giffords, the local sheriff in Tucson, Arizona, denounced the language of violence, and said that he felt that it had

contributed to the shooting. Republican talking heads immediately responded by saying that his criticism of Right-wing inflamatory speech was "over the top" and "rhetoric", and "inappropriate for an elected official". That is reversal of reality.

2011.01.12: Sarah Palin released a video where she complained about how she had suffered from attacks ever since the shooting, and that she was the victim of a "blood libel". As if she suffered from a bullet through the head, or had lost a daughter or husband in the shooting. That is reversal of reality. That is also a good example of the Prima Donna Ploy, making it all aboutÂ The Drama Queen.

Another reversal of reality: A company that wants to set up a non-Indian casino (a new precedent for Oregon) advertises on TV that they will create millions of dollars â declaring that they will give the community millions of dollars in new taxes, and create thousands of new jobs with health care, and raise millions of dollars for education. The truth is, casinos never create money. They take money from people. Casinos do not manufacture anything of value; they just take money from the mathematically challenged customers. Ultimately, in the long run, casinos make states poorer, not richer. The end product of casinos is more impoverished citizens.

Worse yet, the market for casinos is saturated. Now almost every state has legalized gambling in some form or another, and gamblers no longer need to drive to Las Vegas or Atlantic City to gamble. There is another casino just down the road, or just across the state line. Now the casinos are just fighting over market share, with one casino stealing customers from another. The casino business has become a zero-sum game, where one casino's gain is another's loss. Another casino doesn't make more money for the community; it just makes some for the occasional lucky casino owner while reducing the profits of a neighboring casino.

In another reversal of reality, a political commercial declares that the Democrats are hurting America by raising the debt ceiling and spending money on welfare programs, and that we should "put families first" instead. That is a reversal of reality. Not raising the debt ceiling has resulted in cutting funding for food stamps, which is just the opposite of "putting families first." That is putting families last by taking food out of the mouths of children, and putting billionaires who don't want to pay taxes first.

- **Projection**

  Projection is a psychological technique where someone accuses other people of the sins and crimes of which he himself is guilty. Projection is also a kind of reversal of reality.

  For example, Adolf Hitler cited the forged document calledÂ *The Protocols of the Learned Elders of Zion*Â as proving that the Jews had a secret program to take over the world by using deceit, lies, murder, planned wars, and all sorts of evil conspiracies, but it was actually Adolf Hitler himself who was carrying out such a plan for world domination. Hitler was doing all of the things for which he denounced the Jews.

  Similarly, cult leaders routinely accuse their followers and also outsiders of greed and lust while they steal all of the money and pretty women for themselves. And politicians are notorious for loudly denouncing the decline in national morals while they take bribes, drink like fish, and use their secretarial staff as a stable of mistresses. Some of the most vocal anti-homosexual Congressmen turned out to be closetted homosexuals who were screwing boys in the Congressional gymnasium.

- **Make a Virtue out of a Fault**

Advertise and promote a shortcoming or a fault as a virtue.

For example, ultra-cheap single-use film cameras are advertised as "No Focusing Required." The truth is, no focusing is possible, because those cameras have cheap plastic fixed-focus lenses that won't move and can't be focused. What is a serious shortcoming for a camera â the inability to properly focus on the subject â is sold as a convenience:Â "You don't have to bother with focusing."

Alcoholics Anonymous uses this technique too. When the founder Bill Wilson is shown to have been a fraud, a liar, aÂ felonious thief, aÂ certified nutcase, aÂ philandering sexual predator, and a con artist who sold cult religion as a quack cure for alcoholism, the true believers proclaim,

> "Isn't it wonderful? It just goes to show that Bill Wilson was human. And if he could get sober, then so can we. God wanted Bill to be less than perfect so that he could be a good example for us all."

- **Unsupported Claims**
  Make any grand claims you wish, supported by no facts at all.

The Red-baiter Senator Joseph McCarthy did it in his speeches in the 1950s like this:
"I have in my hand a list of 205 Communists working in the State Department",
as he waved a piece of paper that had no names on it. (He never, ever, revealed that list of names, or any other list of names of Communists, either. McCarthy just went on to make more and more outrageous claims, also supported by no evidence, until the U.S. Senate got fed up with the routine, and censured him.[14])

On June 1, 2004, while talking about the high prices of gasoline, acting President G. W. Bush declared,Â "Had we had drilled in Anwar [National Wildlife Refuge], back in the mid nineties, we would be producing an additional million barrels a day by now."

He doesn't know that. They might have drilled a bunch of dry holes while destroying the wildlife refuge. They might have had technical difficulties. Things might have frozen up. Eco-terrorists or foreign terrorists might have bombed the pipeline. A lot of things could have happened. Predicting alternative futures is always guesswork.

Besides, that is all a smoke screen â Â a diversion of attention from the truth. The real bottleneck in producing more gasoline now is refineries â there have been almost no new refineries built in the USA in the last 30 years. Even worse, the oil companies are actually shutting down refineries to force gasoline prices even higher â so of course the supply of gasoline is tight.

And the Republicans are notorious for killing alternative energy projects. President Carter started a lot of them, and then President Reagan shut them all down. Why don't we talk about what kind of a world we would have today if Reagan had not killed alternative energy?

Bill Wilson did it like this:

> The alcoholic, realizing what his wife has endured, and now fully understanding how much he himself did to damage her and his children, nearly always takes up his marriage responsibilities with a willingness to repair what he can and to accept what he can't. He persistently tries all of A.A.'s Twelve Steps in his home, often with fine results. At this point he firmly but lovingly commences to behave like a partner instead of a bad boy. And above all he is finally convinced that reckless romancing is not a way of life for him.
> *Twelve Steps and Twelve Traditions*, William G. Wilson, Page 119.

- Where is the evidence that some unnamed stereotypical alcoholic reformed himself in that manner?
- Where is the evidence that he got "fine results" from working the Twelve Steps? (And it says that he "often" got "fine results". So did he get miserable results the rest of the time?)
- Where is the evidence that the unnamed alcoholic stopped philandering and hurting his wife?Â Bill Wilson never did.

- **Imaginary Evidence**

Notice the lack of hard evidence in this article:

> Two recent studies support the potential effectiveness of this [12-Step] treatment when carried out by mental health professionals. The first studied alcohol-dependent outpatients. The group of subjects that received 12-step treatment improved substantially. The second study focused on VA inpatients with alcohol and/or other substance use disorders. At the one-year follow up, the group of subjects that had received 12-step treatment improved significantly in many life areas.
> ...Â
> A recent award-winning study conducted at SUNY-Albany lends support to this notion.Â
> *Better Treatment for the MICA (Mentally Ill Chemically Addicted) Patient*, Mark Lazarus, Coordinator, Partial Hospitalization Program, The Holliswood Hospital, NEW YORK CITYVOICES: April/May 2002

Just try to figure out what studies the author is citing. It is impossible. (There was no bibliography.) You have no way of knowing whether the studies were valid or faked or improperly conducted, or whether the author interpreted the results correctly. While such grand statements sound good, they are actually meaningless because they are completely unverifiable, and hence, unreliable.

> Also notice the strange contradiction where 12-Step treatment programs are supposedly effectiveÂ ***IF***Â they are "carried out by mental health professionals." But an often-repeated Alcoholics Anonymous boast is that they don't use professional healers, because the non-professional A.A. sponsors are supposedly much better than professional therapists:
>
> > Here was a book that said that I could do something that all these doctors and priests and ministers and psychiatrists that

I'd been going to for years couldn't do!
The Alcoholics AnonymousÂ *Big Book*, 3rd Edition, page 473.

- **Use Association**
  Association is just linking together two unrelated things. Often, it creates an emotional reaction in the intended audience. It can be anything like Guilt by Association, Honor by Association, or Desirability by Association, depending on what somebody or something is associated with.

  Advertisers routinely associate beautiful women in skimpy clothes with new cars, cigarettes, alcoholic beverages, clothes, and diamond jewelry. TV commercials teach us that we can get laid if we use the right toothpaste and the right under-arm deodorant. So we have been programmed to consciously or unconsciously associate sex with all kinds of strange things.

  Likewise, many commercials teach us to associate sugar consumption with happiness. Children are taught by TV commercials that eating gobs of sugar is really a lot of fun, and parents are taught that giving sugar to children is how they show the children love.

  Politicians also routinely kiss babies, hug children, and hobnob with other, more popular and powerful politicians, to look good by association. They also love to rub elbows with the the rich, the famous, and the beautiful people, like movie stars and sports heroes, for the same reason. And of course they want to be photographed with a good selection of wise men like university professors, Nobel prize winners, and high-ranking religious leaders, to look good by association.

  Politicians will also, occasionally, associate their opponents with some villainous characters, perhaps Adolf Hitler, Mao Tse Tung, Joseph Stalin, or Ghengis Khan, to make their opponents look dangerous and evil. (Sometimes the comparison is unfair, and sometimes it isn't. It all depends.)

  The Scientology propaganda bookÂ *"What Is Scientology"*Â devotes 16 pages (xiv to xxix) to showing you pictures of beautiful, palatial buildings that the organization owns around the world, and the last "building" is really a large ship, theÂ *Freewinds*. What do those beautiful buildings and that beautiful ship have to do with whether Scientology is a good organization, or whether it can help you with your mental problems, or with whether you should give all of your money to Scientology? Absolutely nothing. They are just trying to impress you, to make you think that Scientology is really a big, high-class outfit, not the sleazy, low, money-grubbing con that it actually is.

  A powerful association that I find in my own mind is that, ever since September 11, every time I see a photograph of an American Airlines jet, I see it crashing into a skyscraper, or blowing up as it comes out through the wall of a skyscraper. There is no skyscraper in the picture; my mind just fills it in because of those televised images that were burned into my mind on September 11. That is totally unfair to American Airlines, of course. It wasn't their fault that some terrorists chose to hijack some of their flights. Nevertheless, American Airlines has a real problem with that association that has been planted in so many people's minds.

  Similarly, before September 11, the public perception of firemen was something like "a bunch of adventurous young guys and overgrown boy scouts with too much testosterone, who are living out a childhood fantasy of being firemen and getting their kicks by driving big red trucks real fast." After September 11, the image is "a bunch of heroic guys who rush into burning towers to save people, and die when the building comes down on their heads."

  That's the power of association.

A corollary to association is something that I like to call "reverse association" â basking in reflected glory by honoring others (who may be totally out of your league). An easy way to accomplish that is to hand out "awards", honoring others for something or other. An interesting example of "reverse association" is: Federal Reserve Chairman Alan Greenspan received theÂ *Enron Prize for Distinguished Public Service*Â from Ken Lay in November, 2001, less than three weeks before Enron filed for bankruptcy. Now I'll guess that Greenspan wishes he had never accepted the award.[13]

*Guilt By Association*Â is of course a negative association. It is like,Â "Senator Blowhard had lunch with Ken Lay, Andy Fastow, and Jeffrey Skilling of Enron. Therefore Senator Blowhard is just as corrupt as them."
We do not really know anything about Blowhard's integrity, just from that. He is not automatically guilty just because he associated with those guys one time.
(But if he often associated with them, and took lots of money from them, and rode around in their jet while campaigning for office, like George W. Bush did, then that is another matter.... And if his Vice President then arranged the energy regulations so that Enron could massively rob the State of California with artificially inflated electricity prices, then that is very suspicious.)

- **The Glittering Generality**

*The Glittering Generality*Â is a kind ofÂ *Association*Â technique.

American politicians routinely wave the American flag and praise God, country, Democracy, Freedom, Mom, and apple pie, trying to create links in people's minds (associations) between themselves and those other positive images.

So salt and pepper your speeches with zillions of flowery phrases and wonderful-sounding words and vague glittering generalities:

- "God, country, Mom and apple pie"
- "Patriotism, Freedom, Democracy, and the good old USA"
- "safety and national security"
- "those simple home truths that some of us learned at our mother's knee, and which many of us have forgotten and neglected â honesty, purity, unselfishness and love."
- "inspiration and liberty for all"
- "the great creative sources in the Mind of God"
- "the combined moral and spiritual forces of the nation"
- "Christian values"
- "The Love of Jesus"
- "The Glory of God"
- "The Power of the Almighty"
- "The Will of God"
- "family values"
- "Freedom is on the march."
- "Our wonderful patriotic troops who are fighting for Freedom in Iraq"
- "The wonderful men and women who serve in our volunteer army"

It is really tragic how many innocent people have been murdered in the name of Freedom, Democracy, and Christian family values... (Just recently, 30,000 children in Iraq, and before that, zillions of Nicaraguans,Â GuatemalansÂ and Vietnamese.)

A common variation onÂ *The Glittering Generality*Â is invoking images ofÂ *"The Golden Age"*.

Imply that there was a better time way in the past â "The Good Old Days" â when everything was wonderful â Â "everybody was happy, everybody was kind and decent, everybody obeyed the law, everybody believed in God, the rulers were wise, just and honest, and children obeyed their parents".

Sometimes this Golden Age is embodied in a popular myth, likeÂ *The Tales of King Arthur and Camelot*, where noble knights believed inÂ *Might For Right*Â (not "Might Makes Right"), and the brave knights spent their time rescuing fair damsels in distress. And of course, the wizards ofÂ *The Olden Times*, like Merlin, were much wiser and much more powerful than today's wizards, and their magic was so much better than today's magic... And the maidens in those days were beautiful and pure and chaste, and the knights were all honorable and chivelrous. And the king was the wisest and most noble of kings.

Then the speaker invokes an appeal to return to the Good Old Days â Â *"We must get Back to the Basics, and Back to Traditional Values".*

Adolf Hitler and the Nazis actually used those terms â Â *"Back to the Basics"*Â andÂ *"Traditional Values"*Â â in their propaganda, while campaigning for seats in the Reichstag, and they declared that Hitler could take Germany back to "The Golden Age" if elected. (We all know how that worked out.)

And today, Alcoholics Anonymous leaders also runÂ *"Back to the Basics"*Â meetings that supposedly have the good magic of the olden days.

- **Exaggerate**

You don't blatantly lie; you just stretch the truth a good bit. This also has the advantage that even if you get caught at it, you can always argue that you were telling the truth, and it's all a matter of degree, and people just got the wrong impression, or took it the wrong way... Mark Twain explained that expanding a story wasn't really a lie, just a "stretcher".

For an example of exaggeration, this is one of the faithful followers ofÂ the cult leader Frank BuchmanÂ singing his praises, trying to make him sound like a citizen of the world:

> ...he knows China like the Chinese; he is thoroughly at home in Germany, the Netherlands, India, America, Africa, and Australia.
>
> A. J. Russel,Â *For Sinners Only*, page 82, quoted in
> *Experiment With God; Frank Buchman Reconsidered*, GÃ¶sta Ekman, page 57.

Frank Buchman probably did feel at home in Germany, because he was a native German speaker, the son of German-speaking Swiss emigrants to Pennsylvania. But it is questionable whether he was equally at home in all of those other countries that he visited for short periods of time, unless they just happened to haveÂ five-star hotels, which was really Buchman's favorite environment. And it is absurd to say that Buchman knew China like the Chinese. Frank Buchman only spent a couple of years in China as a missionary, where his behavior wasÂ so obnoxious and offensiveÂ that the Bishop of Hankow finally ordered him to stop working in China.

For another example of exaggeration:

> Japanese business and industry is such an incredible gargantuan efficient powerhouse that it will devour American industry, like Godzilla stomping his way through Tokyo. We'll all end up speaking Japanese and driving Hondas.

> The only hope of survival that we have is to adopt Japanese styles of management, so that we can become more like them. And American workers need to learn how to be more like Japanese workers, too. They need to learn to be more loyal to their companies, and they need to accept wage cuts and roll-backs in benefits to help save their employers.

That was actually a real argument heardÂ *very often*Â during the seventies and eighties, when Japan was having a few good years and taking major chunks of the American consumer-electronics and automobile markets. But after that, the Japanese economy crashed badly, and stayed crashed, and it's still a dead dog. Nobody but nobody now says that we should copy Japanese business, industry, banking, or management styles. In fact, the current pundits proclaim that the Japanese must abandon their traditional ways, dump the good-old-boy system, abandon protectionism and open up their markets, and copy American business and banking styles if they are toÂ *ever*Â have any hope of economic recovery.

The error was in exaggerating the degree of Japanese success in the business world, and in exaggerating the effectiveness of Japanese management and business styles. The speakers extrapolated a world-shaking economic juggernaut from a few spectacular Japanese successes in making TVs, stereos, and cars â successes that used unfair anti-competitive practices that were sponsored by the Japanese government â Â *"Japan, Incorporated"*. The speakers exaggerated those Japanese successes to the point of assuming that those successes were an unstoppable wave of the future that would go on forever, and conquer the whole planet. (And then they told the American workers that was why they must take pay cuts...)

In Alcoholics Anonymous, Bill Wilson made heavy use of exaggeration, especially when discussing the success rate of the Twelve-Step program.

- If a few alcoholics sobered up for a few months, Bill claimed that the A.A. program was a great success, and thatÂ *everybody*Â had benefitedÂ from the program.
- When Bill and Dr. Bob figured thatÂ their success rate was five percent, Bill advertised aÂ fifty percent success rate.
- When Bill and Dr. Bob had collected 40 ex-drinkers for their little club (after two years of intense recruiting efforts, includingÂ cherry-picking,Â deceptive recruiting, andÂ coercive recruiting), Bill grandly announced that "*The First 100*" proved that Bill and Dr. Bob hadÂ invented a new 'spiritual' cure for alcoholismÂ that would sweep the world.
- When a few newly-sober people felt their cravings for alcohol gradually weaken and fade away, Bill wrote thatÂ God miraculously removed the desire for drinkÂ from all of the alcoholics.

- **Confusion of Correlation and Causation**

This is simple and straight-forward: just because two things tend to happen together does not prove that one thing causes the other. The rooster's crowing doesn't really make the sun rise.

Variations on this logical fallacy include:

1. Confusion of coincidence and causation
2. Confusion of association and causation
3. Confusion of correlation and causation
4. Assuming a cause-and-effect relationship between unrelated things

Young women going to church and getting married does not really cause them to get pregnant and have babies, even though there does seem to be a strong correlation there. The real cause of the young

women getting pregnant is something other than the priest or minister reciting some words...

On Saturday morning, May 17th, 2014, National Public Radio did an interview about confusion of causation and correlation that revealed:

- Between the years 1999 and 2009, the more movies that Nicholas Cage acted in, the more people died by falling into swimming pools.
- The more people ate cheese, the more they died by getting tangled in their bed sheets.
- 100% of the people who eat mashed potatoes die.

But then the interviewee also remarked that sometimes correlations are valid, like the correlation between people smoking and getting lung cancer. That correlation got doctors busy investigating the link between smoking and cancer.

Assuming a cause-and-effect relationship between unrelated things includes theÂ **"But it worked for me,"**Â logical fallacy. The speaker just assumes that something worked because he got the desired result. The speaker ignores all of the other efforts that he put into making it happen. The classic example of that is an Alcoholics Anonymous member declaring that the 12 Steps worked for him because he isn't drinking alcohol. The speaker just assumes that the Steps made him quit drinking, and he forgets that he actually quit drinking in detox before he ever went to an A.A. meeting. He also ignores the fact that what the 12 Steps really are is brainwashing and indoctrination techniques for religous conversion. The 12 Steps do not even say that you should quit drinking.

Another false correlation: Some people who tout "spiritual healing"Â routinely cite studiesÂ that show that people who have positive, cheerful attitudes recover from illnesses and surgeries faster than people who have glum, dour attitudes. They then assume that this is proof of the efficacy of "spiritual healing".

- They overlook the obvious fact that those cheerful attitudes may well be caused by the the patients' rapid recovery. People who are rapidly recovering are almost alwaysÂ *much*Â more cheerful than patients who are sick unto death and dying.

- And they overlook the fact that those two factors may correlate â they may happen together: Rapid recovery causes cheerful moods, which cause more rapid healing, which causes more cheerfulness, and so on... Just the act of relaxing and being cheerful increases blood flow through the body, which promotes healing and improves the functioning of the immune system. That is simple medicine, not "the power of spiritual healing".

- They also ignore the fact that any apparent link between recovery and something else, anything else, may be pure coincidence. In any large group of sick people, some will recover and some won't. There isn't necessarily any link between "spiritual attitudes" and people recovering, but the people who wish to believe there is will concentrate their attention on just the recovering "spiritual" people, and ignore everything else. That, in turn, becomes an example of "observational selection", seeing what you want to see, and ignoring the rest.

- And when the investigator has an agenda â a desired outcome â he can be also be fooled by observational bias as well â just tending to see what he wishes to see. The measure of which patients are cheerful, and how cheerful, is aÂ *subjective*Â measurement â it relies entirely on the judgement of the investigator. It is all too easy to rate the recovering patients as very cheerful and the non-recovering patients as very glum when that is what the investigator wishes to see.

Alcoholics Anonymous has plenty of examples of confusion of causation and correlation, or

confusion of coincidence with causation. The most obvious ones are:

- Assuming that attending A.A. meetings makes people quit drinking.
- Assuming that attending A.A. meetings makes people stay sober.
- Assuming that doing the Twelve Steps makes people quit drinking and stay sober.
- Assuming that many years of membership in A.A. causes people to stay sober.
- Assuming that praying makes people quit drinking and stay sober.
- Assuming that doing the Twelve Steps makes people more "spiritual", or more moral.

> *(And of course, that last item will be loaded with observational bias. Who judges? How do you impartially judge just how much more "spiritual" somebody is after doing the Twelve Steps for three or six months? And how do you impartially distinguish between "spirituality" and superstition? How do you distinguish between real spirituality and crazy self-delusion like,Â* ***"Quite as important was the discovery that spiritual principles would solve all my problems."****)*

Just because some people sit in an A.A. meeting room and talk about God and not drinking does not prove that A.A. made them quit drinking, even if they believe it. Nor does it prove that A.A. is keeping them sober.

> Using the goofy A.A. "cause and effect" illogic, we can happily declare that A.A. is totally unnecessary because mothers are the real cause of sobriety. How can we know that? Simple. Show me an alcoholic whose mother didn't tell him to quit drinking so much. Momma tells him to quit drinking, and then he finally does, so mothers are the real cause of sobriety. A.A. is irrelevant and unneeded.

What really happens is: A lot of people quit drinking in order to stop being sick, and a lot of them get pressured or coerced into attending some A.A. meetings, and then a few of them become obsessed with cult religions like the Moonies or Scientology or Alcoholics Anonymous, and their favorite cult convinces them that they are soberÂ *because of*Â the cult â that the cult saved their lives â that involvement with the cult is keeping them sober â so they become committed to the cult and make it their new lifestyle for a while. They confuse coincidence with causation. But, eventually, most of those people wise up and realize that it's all a pack of lies, and quit the cult. In Alcoholics Anonymous, for example, 95% of the newcomers drop out in the first year alone, and, nevertheless, a bit more than half of all alcoholics find lasting sobriety anyway.

And it's easy to see causation where there is simply no evidence to support such an assumption. Often, just wishful thinking is enough to make people see cause-and-effect relationships:

> "And... I believe addictions are also caused by a sense of spiritual separation from God, or one's Higher Power, or union with the All-That-Is."
>
> *Addiction: A Spiritual Crisis*, Judith Wagner,Â *Tampa Bay New Times*, Winter 1991, page 18.

And that belief was based on what facts or observations? Did the authoress actually do even just one good survey of a few hundred addicts, asking them what they believed and how separated from

"Higher Power" they felt?

A common use of this propaganda technique of confusion of causation and correlation is to do polls or surveys of A.A. members, asking them about their drinking habits, and then "discover" that they drink less than some other group of people, perhaps a group of guys at the local bar, or the winos under the bridge. Then the "researcher" declares that there isÂ *"an association between AA attendance and abstinence from alcohol/drug use"*, and he concludes that

> "Weekly or more frequent attendance at 12-Step programs may be effective in maintaining long-term drug and alcohol abstinence. Treatment providers should encourage and assist their clients in 12-Step participation."
> *"12-Step programs help maintain abstinence"*, R Fiorentine,Â **The Brown University Digest of Addiction Theory and Application**, Sept 1999, v18 i9 p1

What the "researcher" won't tell you is that if you repeat that kind of study, comparing the people found at the local Baskin Robbins ice cream parlor to the guys at the local bar, you can, in just the same way, "prove" that eating ice cream reduces alcohol consumption.

The logical conclusion is, of course:

> "Weekly or more frequent attendance at Baskin Robbins may be effective in maintaining long-term drug and alcohol abstinence. Treatment providers should encourage and assist their clients in Baskin Robbins ice cream socials participation."

Also note the use of the propaganda technique called "Sly Suggestions" in that quote. In the first sentence, the author Robert FiorentineÂ *suggested*Â that A.A.Â ***may be effective***. He could only suggest the idea, because he knew full well that the data did not show any cause-and-effect relationship. But in the next sentence, the author suddenly assumed that his suggestion was true, and he stated that treatment providersÂ ***should***Â shove patients into Alcoholics Anonymous groups.

And lastly, note how the author completely ignored the fact that the people at the A.A. meeting were a self-selected group (a biased sample). That is:
So of course the people at the A.A. meetings drank less than the people at the bar. That comes as no surprise. But thatÂ *does not*prove that A.A. is somehowÂ *causing*Â the "meeting makers" to abstain from drinking. It doesn't even "suggest" it. The author did aÂ reversal of a cause-and-effect relationship, because the truth is just the opposite:

People's desire to stay sober makes them go to A.A. meetings.

They go because they have been miseducated and fooled into believing that A.A. is somehow necessary or "helpful for maintaining sobriety".

To be fair, what the author of that "study" really did was conduct interviews with the patients and ex-patients of 26 Los Angeles area "treatment programs" (almost all of

which were based on "Twelve Step Facilitation" â 'TSF'), and compare those who were still attending A.A. meetings with those who were not. He found that those who attended the meetings drank less and took fewer drugs. That should come as no surprise, because, by and large,Â only those people who had not relapsed were still attending A.A. meetings.Â Many of the relapsers really were to be found at the local bars.Â People stopped going to A.A. meetings when they resumed their former alcohol or drug habits.Â Hence Fiorentine used a very biased sample. His claimed results were just another example ofÂ *Lying With Statistics*, as well asObservational Selection â i.e.: 'Cherry-Picking'.

And, alas, we were never told what the success rate of those 26 Los Angeles area treatment programs really was. (They almost never tell the truth about that.) Those so-called "treatment programs" usually have about a 90% failure rate, so the remaining 10% of the patients who were still moderately clean and sober (clean and sober enough to "graduate") were the people whoÂ *really wanted*Â to stay clean and sober.

The so-called "treatment programs" are really just a system for filtering out those few alcoholics and addicts who are ready and willing to quit drinking and doping now â and then the treatment center and A.A./N.A. will take the credit for the successes when they quit, but will refuse to take any of the blame for the other 90% of the "clients" who don't "graduate".

That stunt is pureÂ Observational SelectionÂ â counting the hits and forgetting the misses.

And it's backwards logic to try to conclude that the A.A. meetingsÂ ***make***Â the few abstainers stay clean and sober. FiorentineÂ reversed the cause-and-effect relationship. The truth is:
Â Â Â People's sobriety causes a few of the clean and sober people to go to A.A. meetings.
Â Â Â People's choice to consume drugs and alcohol causes them to not go to A.A. meetings. They go to the meetings at the local dope dealer's house instead.

That is not a joke or an idle suggestion. In her 1988 book that promoted Alcoholics Anonymous, Nan Robertson reported thatÂ most of the newcomers to A.A. had already quit drinking, so it really is sobriety that causes people to go to A.A. meetings:

> About 60 percent of all newcomers â some still drinking at first, most not â who go to A.A. meetings for up to a year remain in A.A.
>
> *Getting Better Inside Alcoholics Anonymous*, Nan Robertson, 1988, page 94.

(You can ignore the funny word game where Nan Robertson declares that most of the people who stay in A.A. "for up to a year" stay in A.A. for a while longer. Actually,Â only five percent of the newcomers stay in A.A. for a year.)

Another way to say it is:
Â Â Â People's desire to stay clean and sober causes some of them to go to 12-Step meetings.
Â Â Â People's desire to get stoned causes them to go to the dope dealer or the liquor store.

So of course the people whom you find at the 12-Step meetings will be a bit less drunk and stoned than those whom you find at the bar or at the dope dealer's house. (Even though 22% of the treatment programs' ex-clients who were going to the A.A. and N.A. meetings were actually still using drugs or alcohol. See the 2nd quote down.)

In another write-up of Fiorentine's Los Angeles study, we also got this misinformation:

> Â Â Â Looking at 262 patients in 26 Los Angeles addiction treatment programs, the researchers found that clients who attended at least one 12 Step meeting per week after completing treatment had much lower levels of drug use at six-month follow-up (22% were using), than those who participated less frequently or not at all (44% were using). Statistical analysis led Fiorentine to conclude that the better rates of abstinence "could not be attributed to differences in motivation or to other post-treatment activities". Regular 12 Step attendance made the difference, prompting the conclusion that 12 Step meetings work well as "a useful and inexpensive aftercare resource that can help many patients to maintain abstinence".
>
> *"12 STEP POWER SHOWN BY SCIENTIFIC METHOD"*, By: Voyles, Claudia,Â *Guidepoints: Acupuncture in Recovery*, 10708200, March 2000, page 5, which cites: R Fiorentine, in NIDA Notes, v. 14, No 5, December 1999.

Fiorentine's conclusions are totally unwarranted and are based solely on his assumption of a desired cause and effect relationship between going to meetings and sobriety, not the facts.

That is, he just wishes that A.A. or N.A. meetings really worked. His "statistical analysis" is worthless because he assumes that the numbers show that 12-Step meetings cause abstinence, rather than that the desire to be sober and unaddicted causes meeting attendance. Fiorentine confuses correlation with cause and effect.

And it was really outrageous to claim that "the scientific method" had proved the effectiveness of 12-Step meetings. Claudia Voyles titled her article:
Â Â Â "12 STEP POWER SHOWN BY SCIENTIFIC METHOD".
There is no truth to that statement. None whatsoever. That was not a valid scientific test. There was no "scientific method" in any of Fiorentine's deceptive propaganda. There was no control group with which to compare the Twelve-Step Facilitation groups, to see what effect the so-called "treatment" and the 12-Step meetings actually had â to see whether the "treatment" really improved on Mother Nature.

The proper way to do such a medical study or scientific experiment is a "Longitudinal Controlled Study". How you do that is get, say, 200 or 2000

convicted drunk drivers or other alcoholics from a traffic court or a hospital, all of whom have been determined to be alcohol abusers by a doctor or competent therapist, and then divide them, randomly, into two equal groups. Send the first group to Alcoholics Anonymous meetings, and do nothing with the second group. Let them go home. Let them drink all they want. They are "the control group". Give them no "treatment" or punishment of any kind.
(It's fair. GettingÂ *no treatment*Â â being a guinea pig in a scientific experiment â Â *IS*Â their punishment.)

In order for any "treatment" or program to claim success, it must do significantly better than the control group.

At the end of the test, at 6 months or a year or two later, count and measure all of them, to see how many are still drinking destructively. Compare the A.A. group to the no-treatment group, to see what the effect of A.A. really was.

Every timeÂ *that*Â experiment has been done, the results were that A.A. didn't work at all, and had no good long-term effects. In fact, the A.A.-treated groupÂ *did worse*Â than the no-treatment group, and A.A. hadÂ an appalling death rate, too.

Likewise, the statement that
Â Â Â "Regular 12 Step attendance made the difference, prompting the conclusion that 12 Step meetings work well..."
is groundless and untrue. Fiorentine merely assumed that 12-Step meetings made a difference. The evidence does not support that conclusion.

Nevertheless, the citation for Fiorentine's article says:

> "A recent study confirms that weekly participation in 12-Step programs, such as Alcoholics Anonymous (AA) or Narcotics Anonymous (NA), help people in recovery to maintain their abstinence for up to two years after completing substance abuse treatment."
> *"12-Step programs help maintain abstinence"*, R Fiorentine,Â **The Brown University Digest of Addiction Theory and Application**, Sept 1999, v18 i9 p1

Note the word game where it says that 12-Step meetings "help" people maintain abstinence. They imply cause-and-effect, but don't say it outright, because they can't. There is simply no evidence of any cause-and-effect relationship between going to 12-Step meetings and abstaining from alcohol and drugs.

We also got a demonstration of the propaganda technique called "Lying With Qualifiers" there. It said that A.A. meetings "helped" people toÂ "maintain their abstinence for up to two years".Â *Up to two years?*Â So does that mean that lots of the "meeting makers" relapsed at the one month point, and more at two months, and more at three, and more at six, etc.? And the very last clean and sober hold-out relapsed at the two-year point? Yes, unfortunately, that must be what it really means, because that's what really happens.

- **The Fallacy of a Single Cause.**
  Claim that a result came from a single cause, when it was really caused by a whole lot of different things.

  Alcoholics Anonymous uses this fallacy often. If someone quits drinking for half a dozen different reasons, like to save his life, career, job, marriage, money and health, A.A. claims that he quit drinking because he attended some A.A. meetings. Or because of the 12 Steps (which he may not have even done).

- **Reverse a Cause-and-Effect Relationship**
  Declare that 'B' caused 'A', when in fact 'A' caused 'B'.

  A recent articleÂ in the British newspaperÂ TelegraphÂ gave us an illustration of this logical error:

> **Intelligent humans evolved because of big-hipped ancestors**
> **Intelligent humans developed because our female ancestors had wide hips which allowed them to give birth to babies with big brains, according to new research.**
>
> By Nick Allen
> Last Updated: 9:13PM GMT 13 Nov 2008
>
> The hips of females from the species Homo erectus, a primitive relative of modern humans, have been found to be wider than was previously thought.
>
> That means they were well equipped for delivering babies with a larger cranial capacity which ultimately allowed intelligent human beings to evolve.
> ...
> Scientists came to their conclusion after reconstructing a 1.2 million-year-old fossil pelvis discovered in Gona, Ethiopia.
> ...
> A narrow pelvis for females would have caused infants to be born with relatively small brains.Â
> http://www.telegraph.co.uk/scienceandtechnology/science/3453980/Intelligent-humans-evolved-because-of-big-hipped-ancestors.html

  That is the exact opposite of the truth. The reality is:

  1. Pre-human ape-men evolved larger brains and higher intelligence in order to survive. The stupid ones either starved or got eaten by lions and tigers, leaving the smarter ones, with bigger brains, to reproduce. (Hint: the ones who were intelligent enough to use clubs, tomahawks, and spears to defend themselves from the predators lived a lot longer. And having the brains to build a fire was a life-saver in cold winters.) So gradually, human intelligence and human brains both increased in size.

  2. Then, the females with wider hips were able to deliver such larger-headed babies without

complications, while the narrowest-hipped females died in childbirth.

3. The wider-hipped females gave birth to more wider-hipped daughters, and the process repeated itself, with the narrowest-hipped females continuing to die in childbirth, and the wider-hipped ones surviving.

4. Carry that process forwards a million years, and you will get a population where all of the females have wide hips.

Later in the article, the author finally got his logic straightened out:

> The need to give birth to large brained infants was probably the primary driver behind the shape of the pelvis.

Alcoholics Anonymous uses this logical error constantly:

1. They routinely infer that A.A. meeting attendance causes sobriety, rather than that the desire for sobriety causes some people to attend some A.A. meetings. (The same desire for sobriety also causes people to quit drinking alcohol.)

2. A.A. infers that doing the 12 Steps causes people to quit drinking, rather than that quitting drinking causes some people to do the 12 Steps of Alcoholics Anonymous. Most of the A.A. members who are actually continously sober really quit drinking before they did the 12 Steps â and often,Â they quit drinking before they even attended very many A.A. meetings. (Many alcoholics quit drinking in a detox center, which then sends them to A.A. meetings, and then A.A. takes the credit for the sobriety.)

3. Again, the desire for sobriety causes some people to waste their time practicing some useless "steps" of an old cult religion. The 12 Steps do not cause people to desire sobriety.

- **Straw Man**

  TheÂ *Straw Man*Â technique is a stunt where you prop up an easy-to-defeat opponent, like a Straw Man, and then attack him and knock him down, to make yourself look big, strong, and victorious.

  For example, politicians and District Attorney candidates running for election brag that they will "prosecute sexual predators to the full extent of the law." But that is what all of the politicians do. Nobody likes sexual predators. They don't get any easy treatment. It isn't like the other candidate is "soft on sexual predators".

  Similarly, you can attack a caricature of what the other person said, rather than arguing against what he actually said.

  A popular variation of the Straw Man technique is theÂ *"What if?"*Â argument. Just prop upÂ absurd hypothetical situationsÂ that never really happened and then demolish them.

During the March 23, 2006 press conference, Washington Post reporter Jim VandeHei asked, "A growing number of Americans are questioning the trustworthiness of you and this White House. Does that concern you?"

> Bush just wouldn't say. "I believe that my job is to go out and explain to people what's on my mind," he replied, launching himself on a rambling discourse on war followed by a straw-man attack on unnamed people who don't take al Qaeda seriously.

> *White House Briefing, News Between the Lines*
> Wednesday, March 22, 2006; 1:00 PM

Nan Robertson used a flavor of the Straw Man trick in her bookÂ *Getting Better Inside Alcoholics Anonymous*. While arguing for the disease theory of alcoholism, she propped up a few reasons why alcoholism should not be called a disease and then knocked them down, and then felt that she had made her point:

- Moral and social objections: "How can the habit of opening ones mouth and pouring alcohol down one's throat be called a disease?"
- Objections that the disease concept interferes with recovery â it provides patients with a ready-made excuse: "Don't blame me, I'm sick".
- Political and social objections â If alcoholism is a disease, it should be treated by doctors, not amateurs.

(SeeÂ *Getting Better Inside Alcoholics Anonymous*, Nan Robertson, pages 196-197.)

Nan Robertson dismissed all of those arguments with a paragraph each, and then concluded that alcoholism was a disease.

- All that Nan Robertson did was disputeÂ *some other people's objections to calling alcoholism a disease*.
- She did not prove that alcoholism was a disease, or even produce any good evidence that there is any such disease as alcoholism.
- What Nan Robertson missed in her broken logic is the simple fact that, even if it was okay, in Nan Robertson's mind, for alcoholism to be called a disease, that still did not make it an actual disease.
  It's just like:Â *Even if it is okay, in the minds of some superstitious people, for the world to be called "flat", that still does not make the world really flat.*

Another example: From the "*Big Book*"Â *Alcoholics Anonymous*, we learn that Bill Wilson was only able to convert brain-damaged morons and pathetic cry-babies to the new Alcoholics Anonymous religion. Wilson used the straw-man tactic constantly, portraying non-believers and the unconverted as the most pathetic self-pitying stupidÂ prejudiced foolsÂ who were unable to see the truth until the brilliant, wonderful Bill Wilson came along and saved them from their stupidity. This quote is from the "Man On The Bed" story in theÂ *Big Book*, where Bill Wilson and Dr. Bob were allegedly recruiting for A.A. in the hospital:

Actually,Â they were really recruiting for Frank Buchman's pro-Nazi Oxford Group cult at that time. There was no such thing as Alcoholics Anonymous in the spring of 1935, only Frank's fascist Oxford Group cult religion, and that is what Bill and Dr. Bob were recruiting new alcoholic members for.

> Two days later, a future fellow of Alcoholics Anonymous stared glassily at the strangers beside his bed. "Who are you fellows, and why this private room? I was always in a ward before."
> Â Â Â Said one of the visitors, "We're giving you a treatment for

alcoholism."
Â Â Â Hopelessness was written large on the man's face as he replied, "Oh, but that's no use. Nothing would fix me. I'm a goner. The last three times, I got drunk on the way home from here. I'm afraid to go out the door. I can't understand it."
The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, 3rd Edition, Chapter 11, "A Vision For You", page 157.

(The answer,Â you blithering idiot, is that you are getting drunk because you are stopping off at the bar on the way home from the hospital, and drinking more alcohol. It's very easy to understand.)

"Bill Wilson, converting a fawning moron."

Bill Wilson posing for a stagedÂ *"Man On The Bed"*Â publicity photograph, whereÂ Bill allegedly performed miraculous faith healings, making the drunks "pick up their beds and walk", just like in the story of Jesus healing the cripple by the pool.
Notice the cross on the wall. This photograph was very carefully staged for best effect.

For another good example of the straw man tactic, consider this quote:

A Peek Into Twenty-First-Century Medicine

The healing power of the spirit, exemplified by the success of the Twelve Steps program in helping overcome a variety of addictions, will be harnessed more fully to treat a wider range of medical problems.

Lawyers boast that when their professional forebears were writing the Constitution and organizing the Supreme Court, doctors were still bleeding patients to remove ill humors and using leeches as medical apparatus.

As medicine moved out of its primitive beginnings and joined the revolution in science, it is easy to understand why the spiritual dimension of healing was absent from serious discussion. Spirituality, with its nebulous connotation, sounded too much like the folk traditions of another era and did not have the clarity of the surgeon's knife or the pharmacist's pill. Today, however, it is only because medicine is on a firm scientific basis that the spiritual dimension of healing can be fairly evaluated. Although modern medicine has been slow to take up the challenge, this healing factor is now too obvious to ignore.
...
The field of medicine is still in its infancy in understanding the spiritual dimension of healing. But it is clear that the power of the mind and the spirit to overcome both chronic and acute medical problems is real. In the

> twenty-first century, this healing force can be harnessed more fully and effectively through scientific persistence and spiritual growth within the discipline of medicine.
>
> **The Spiritual Dimension of Healing**, Jeff Jay,Â *The World & I*, 05-01-2000, Size: 8K. Available on the Internet through your public library's Electronic Library of periodicals.

The author has a bone to pick with modern doctors. He is angry with them because they won't agree with his ideas of "spiritual healing." So he declares, essentially:

> *The reason that modern medicine refuses to approve of "spiritual medicine", faith healing, and magical "Twelve-Step therapy" is because contemporary doctors are still just as blind, stupid, and slow to learn as they were 200 years ago, and they have still hardly gotten beyond using leeches and blood-letting.*

That is quite untrue, of course. Modern medicine is very good, and is far beyond stupidly using voodoo medicine, which is what the author of that quote wants to shove on us.

The author recites the faults of ancient medical practice in order to make current medical practice look bad, because he can't fault contemporary doctors.Â *If you can't attack today's doctors as stupid, then attack the ones who lived 225 years ago. They are easy to criticize and ridicule and knock down.*Â That's the Straw Man tactic.

And the author lies and grossly distorts the facts as well: People studied and tried faith healing and spiritual medicine for thousands of years. It was all they had, so they really wished that it would work. It took us a very long time before we finally learned some things that actually work properly, and what actually works is penicillin, streptomycin, and tetracycline, not occult incantations, prayers, chants, charms, voodoo dolls, magic spells, or sacrificing your first-born son on the alter to appease an angry God.

And the author also misuses the word "spiritual".Â **Bill Wilson constantly confused psychological, emotional, and spiritual things**, and so does this faithful follower of his. (Bill made grand, sweeping proclamations like that all forms of "spiritual diseases" were caused by "resentments"Â â theÂ *Big Book*, page 64.) What isn't obvious from the quote above (see the larger review) is that the author would talk about things like how people having a positive mental attitude towards their recovery from illness coincided with people rapidly healing what ailed them, and then the author would call that "spiritual healing." That isn't spiritual healing; that's just psychology. That's just having a good mind-set â a positive and cheerful attitude. And that positive attitude was often caused by the patient's rapid recovery, rather than the rapid recovery being caused by the positive attitude... That isÂ *"Confusion of Correlation and Causation"*Â again.

And last but not least, the author also gave a good demonstration of theÂ Big Lie technique. That quote is just loaded with Big Lies:

1. "'The healing power of the spirit' is an established fact."
2. "*Everybody knows*Â that spiritual healing works."
3. "The spiritual dimension of healing is an established fact."
4. "The power of the mind and the spirit to overcome both chronic and acute medical problems is real."

5. "The success of 'the Twelve Steps program'Â in helping people to overcome a variety of addictions is an established fact."
6. "Alcoholics Anonymous successfully practices spiritual healing."
7. "Modern medicine is an infant, just barely out of the realm of blood-letting and leaches."
8. "Modern medicine was slow to move out of its primitive beginnings and join the revolution in science." (Not, thatÂ itÂ ***was***Â the revolution.)
9. "'Spiritual healing' has never been properly studied."
10. "The spiritual dimension of healing was absent from serious discussion."
11. "Modern medicine has been slow to take up the challenge of studying faith healing and 'spiritual healing'."
12. "The spiritual dimension of healing is a healing factor that is now too obvious to ignore."
13. "The field of medicine is still in its infancy in understanding the spiritual dimension of healing."
14. â And, by implication, "Sometime in the future, modern medicine will finally get smart enough to discover spiritual medicine and learn how to use it."

â All of which are lies.

For just one example of modern medicine embracing "spiritual healing," consider that 'Native American' or Original American people can and do have their own spiritual healing ceremonies performed for them in hospitals. They get both the medicine man and Western-medicine doctor working on them, simultaneously. (I was tempted to write "white-man doctor", but these days, the 'Western-medicine' doctor is likely to be Jordanian, Pakistani, or Indian â India Indian.)

Another, much less positive, example of so-called "spiritual healing" is this: Here in Portland Oregon there is a fundamentalist sect of people who call themselves "The Church of the Followers of Christ". They do not believe in doctors or medicine. They only believe in prayer and "spiritual healing". When one of their children gets sick, they pray over the child, and they absolutely will not take the sick child to a doctor or a hospital. If the child dies, he dies. They declare that it must be the Will of God. Every few years, they kill another child that way.

Just recently, in May 2010, the parents of one of their dead children were tried for manslaughter, and convicted. The father got two years in prison. The mother got off with probation so that she could care for the surviving children. And then, just a few months later, that crazy congregation killed another child the same way. So nowÂ *those*Â parents are being charged with manslaughter. This has been going on for many years.

The big flaw in their logic is that they are actually so arrogant and delusional that they think they are powerful magicians. They imagine that their prayers are working magical ceremonies. They think

that they can summon spiritual powers and magical forces just by incanting some holy names like "God" and "Jesus Christ". That is actually no different from a sourcerer who imagines that he can get magical powers by summoning up demons by name.

Obviously, their magic is not working very well. (Although they believe that it is: most of the time, the children do recover while being prayed for. Their children's recovery rate from childhood diseases and the common cold is especially good.)

- **Hypnotic Bait and Switch**
  Observe the broken flow of logic between these two paragraphs:

> Â Â Â This world of ours has made more material progress in the last century than in all the millenniums which went before. Almost everyone knows the reason. Students of ancient history tell us that the intellect of men in those days was equal to the best of today. Yet in ancient times material progress was painfully slow. The spirit of modern scientific inquiry, research and invention was almost unknown. In the realm of the material, men's minds were fettered by superstition, tradition, and all sorts of fixed ideas. Some of the contemporaries of Columbus thought a round earth preposterous. Others came near putting Galileo to death for his astronomical heresies.
> Â Â Â We asked ourselves this: Are not some of us just as biased and unreasonable about the realm of the spirit as were the ancients about the realm of the material?
> (TheÂ *Big Book*, William G. Wilson, page 51.)

All of the statements before the last one are true and unchallengeable.Â The listener will be lulledÂ into uncritically accepting more statements, expecting them to also be unquestionably true. That is when the speaker (Bill Wilson) suddenly slips a lie into the speech. The last sentence is an irrational appeal to embrace the very evils, the narrow-minded blind faith, the superstitious "spirituality" and "the realm of the spirit" that the previous sentences had so properly criticized.

Bait and switch.

And it's also a gross distortion of the facts â aÂ *False Analysis Of History*Â â to say that "the ancients" were "biased and unreasonable" about the "realm of the material." They weren't. The medieval Roman Catholic Church authorities were far more "biased and unreasonable" about the "realm of the spirit." They would not tolerate any "spiritual", religious, or philosophical ideas that were different from their own. They asserted that they and the Bible had all of the true answers about everything in the world, and anyone who disagreed with them the least little bit was evil and doing the work of the Devil and trying to lead people to Hell. Their inquisitions ran for centuries, and killed a lot of people. One of the commonest reasons for a death sentence and burning at the stake was "heresy".[1]Â The Church burned Bruno at the stake for declaring that the Earth revolved around the Sun.

- **TheÂ *Either/Or*Â Technique â Bifurcation â the Excluded Middle**
  Present the audience with only extreme either/or, black-or-white choices, while admitting to no gray areas inbetween. Consider only the two extremes in a range of possibilities, to make the "other side"

look worse than it really is. Carl Sagan called this the "excluded middle" technique.

The Excluded Middle technique also includes:

- Short-term versus long-term comparison â a subset of the excluded middle â
  - ◊ "why pursue fundamental science when we have so huge a budget deficit?".
  - ◊ "Why should we believe predictions of global warming when they can't predict the weather two weeks in advance?"
- Slippery slope â another subset of the excluded middle â make unwarranted extrapolations of the effects of a course of action, like: "give 'em an inch and they'll take a mile."

For example:

- "If you're not one ofÂ ***us***, you're one ofÂ ***them***."
  This is called "the sheep and goat distinction".
- "If you aren't a dirty, lying Communist, then of course you agree with us, and you will be happy to join our John Birch Society (or the KKK, or the Nazi party, etc.)..."
- "He who is not with me is against me, and he who does not gather with me scatters." [Matthew 12:30]
- "Those who are not with us are against us." [Comrade Vladimir Ilyich Lenin, Russia, 1917]
- "You are either part of the solution, or part of the problem."
- "Either you are Serving the Lord (as our church defines it) or you are serving the Forces of Evil."
- "Either you are a fanatical true believer like us, or you are an evil hard-boiled atheist."
- "Either you are saved by Christ or you are doomed to suffer the pains of Hell."
- "You guys must either you act like stupid brutish Neanderthals, or else you will look like you are gay and effeminate."
- "Either you are willing to commit your entire life to our great cause or else you are a wimp, a weak hand, and a real loser."
- "Look. You're on board, or you're not on board. Okay. But just, if you're on board, then you're on board just like the rest of us. Period." â Tom Cruise, talking about membership in Scientology.
-

This Nazi propaganda poster from World War II used the Either/Or technique along with a lot ofÂ *Glittering Generalities*. It says:

In the Red War,
Mother or [Communist] "Comrade"?

People or Machines?
God or Devil?
Blood or Gold?
Race [Racial Purity] or Crossbreed [Mixed-race children]?
Folk Songs or Jazz?
National Socialism [Naziism] or Bolshevism?

♦ The Oxford Group/Moral Re-Armament cult leader Frank Buchman said:

> "an extreme of evil must be met with an extreme of good. A fanatical following of evil by a passionate pursuit of good. Only a passion can cure a passion. And only a superior world-arching ideology can cure a world divided by warring ideologies." Â ...Â
> Â Â Â "Whenever men give man the place in their lives that God should have, slavery has begun. 'Men must choose to be governed by God, or they condemn themselves to be ruled by tyrants.' There can be no neutrality in the battle between good and evil."
> Dr. Frank N.D. Buchman, the leader of the Oxford Groupsâ Moral Re-Armament cult, in a speech,Â *"Brave Men Choose"*, given June 4, 1961, at Caux, Switzerland, quoted inÂ *Frank Buchman's Secret*, by Peter Howard, page 141.

What Frank Buchman didn't bother to say there is that those who "chose to be governed by God" were really supposed to be governed by Frank and his lieutenants. The Buchmanites claimed that they, and only they, knew what God really wanted people to do. They, and only they, were "sane" and "Guided by God", Frank said, and everybody else was "insane". So, if you were "Guided by God", then you would do what Frank told you to do... (Frank Buchman was really a fascist.)

♦ Buchman also said,

> "There are only two fronts in the world â the positive front and the negative front, those who obey God and those who refuse to obey Him."
> *Dynamic Out Of Silence; Frank Buchman's relevance today*, Theophil Spoerri, page 117.

But "obeying God" really ended up meaning that you were supposed to obey Frank and his followers. That's the logical fallacy ofÂ *Conflation, False Equality*.

♦ In 1943, Frank Buchman declared:

> "Unless America recovers her rightful ideology nothing but chaos awaits us. Our destiny is to obey the guidance of God.
> Â Â Â The true battle-line in the world today is not between class and class, not between race and race. The battle is between Christ and anti-Christ.
> Â Â Â 'Choose ye this day whom ye will serve.'"
> *Frank Buchman As I Knew Him*, H. W. 'Bunny' Austin, page 110.

Nevertheless, America somehow managed to win World War II without choosing to join Frank Buchman's cult.

- Peter Howard,Â the fascistÂ who succeeded Frank Buchman as the leader of Moral Re-Armament, wrote:

> The choice is moral re-armament or national decay. Â ...
> It is a choice that all of us must make. Christ or anti-Christ, spirit or beast, renaissance or decadence, moral re-armament or a godless, hopeless, purposeless age.
> *Britain and the Beast*, Peter Howard, pages 110 and 118-119.

"Christ or anti-Christ"... That doesn't leave much room in the middle, does it?

- "Either you are with us, or you are with the terrorists."
  Acting President G. W. Bush has repeatedly declared that the world was either "with us or against us" in his war on terrorism that he launched after the September 11 attacks.
  Note that George Bush didn't give the rest of the world any choice in the means, strategies, or tactics that they may choose to use inÂ *their*Â wars against terrorism (which some of them have been fighting for many years). Everybody was supposed to just follow Bush's orders and attack Iraq or else they weren't "with us".

- Likewise, ourÂ *Fearless Leader*Â said of his war against Iraq:
  Â Â Â Â This will not be a campaign of half measures.
  G. W. Bush, 21 March 2003.

- And Bush creates a false choice with this statement:
  Â Â Â Â "When it comes to a choice between defending America or believing the words of a madman, I will always defend America."
  G. W. Bush, July 2004.

Who was the madman?

- Hans Blick (the United Nations weapons inspector) when he said that there were no Weapons of Mass Destruction in Iraq?
- The 9-11 Commission when it declared that there was no connection between Saddam Hussein and the 9-11 terrorist attack?

- Enron came up with a great choice for its some of its employees:
  Â Â Â "Either help us to cook the books so that the CEO Jeffrey Skilling gets the numbers that he wants, or else you are a coward who doesn't have the guts to play with the Big Boys, and you aren't a team player."

Alcoholics Anonymous and Narcotics Anonymous give us many more examples of the either/or technique:

- "Either you will totally abstain from drinking alcohol for the rest of your life, or else you will drink maniacally, consuming such huge amounts that you will die drunk in a gutter."

- "Either totally abstain from all drugs, even the ones the doctor gives you, or else you will be

shoving a needle in your arm next week."

- "Either totally abstain from all medications, even the ones the doctor gives you, or your recovery isn't complete â you aren't really sober. Meds still the small quiet voice of God."

- *'Either you are a true believer or else you are an atheist'*: According to Bill Wilson, if you won't completely accept all of his dogmatic religious beliefs, then you must beÂ a disgusting agnostic or an atheist. No middle ground or independent thinking is allowed â it's literally all or nothing:

> "When we became alcoholics, crushed by a self-imposed crisis we could not postpone or evade, we had to fearlessly face the proposition thatÂ either God is everything or else He is nothing. God either is, or He isn't.Â What was our choice to be?"
> TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *We Agnostics*, Page 53.

- "It's Alcoholics Anonymous â or else!"Â Â Â Â (A.A.Â *Big Book*, 3rd Edition, page 378.)

- "God has either removed your husband's liquor problem or He has not."Â Â Â Â (A.A.Â *Big Book*, 3rd & 4th Edition, page 120.)

- Bill Wilson says that alcoholics must practice the A.A. religion or else they will die:

> "To be doomed to an alcoholic death or to live on a spiritual basis are not always easy alternatives to face."
> TheÂ *Big Book*, William G. Wilson, page 44.

Actually, they are not alternatives at all. There is a third choice: just quit drinking, and live a healthy, happy, and sane life without a cult religion.

- "Either you are dealing with a man who can and will get well or you are not. If not, why waste time with him?"
  TheÂ *Big Book*, 3rd Edition, Henry Parkhurst, Chapter 10,Â *To Employers*, page 142.

- "None of us in Alcoholics Anonymous is normal. Our abnormality compels us to go to AA... We all go because we need to. Because the alternative is drastic, either A.A. or death."
  Delirium Tremens, Stories of Suffering and Transcendence, Ignacio Solares,Â **Hazelden**, 2000, page 27.

- "EitherÂ *work a strong program*Â or else your fate will beÂ *jails, institutions, or death*."Â (Popular A.A. slogan.)

- "Work the Steps or Die!"Â â Â (Popular A.A. slogan.)

- "Even if you abstain from drinking alcohol, you must still practice Bill Wilson's Twelve Steps all of the time, or else you will turn into aÂ *dry drunk*, a person who acts just like an obnoxious drunkard even when sober."

- "You must be willing to go toÂ *any lengths*Â to recover from alcoholism", or else "you aren'tÂ *really trying*."

(A.A.Â *Big Book*, 3rd Edition, pages 58 and XX.)

- Bill Wilson said of alcoholics:
  "Either we insist upon dominating the people we know, or we depend on them for far too much."
  "Either we ... tried to play God and dominate those about us, or we ... insisted on being overdependent on them."
  (*Not-God*, Ernest Kurtz, page 125.)

- A.A. defenders say, "You can't criticize our program unless you have a perfect, fool-proof, never-fails program of your own to offer as an alternative."
  Translation: "Either show us a perfect program of your own design, or else accept our goofy program."

- A.A. promoters ask,

  > "Which would you rather get treatment and advice from â your old drinking buddies, or AA members?"
  > (For me, the answer is, "Neither." Try finding someone who is sane and reasonable and who knows what he is talking about, like a doctor who is good at treating addictions.)

- And even people who are trying to be objective can get caught in traps:

  > "Either addiction is a disease and addicts are powerless over their addictions, or else addiction is a choice and addicts can stop any time they want to."

  Such an argument ignores the middle possibility: that physical addiction to a chemical really messes with the addict's mind and makes quitting extremely difficult (but not impossible). Sometimes, it is true that an addict can quit any time he wants to â he just cannot "want to" intensely enough to overcome the urges, the cravings, the crazyness, and the pain that inevitably accompanies withdrawal. (That is, he can't "want to enough" until something extreme happens to motivate him, like getting sick unto death, nearly dying, or seeing a friend die. Then that can be the stimulus that provides the motivation to finally quit and stay quit.)

- **False Dichotomy**

  TheÂ *False Dichotomy*Â technique is very similar to theÂ *Either/Or*Â technique. A dichotomy is the division of something into two pieces. A false dichotomy is an attempt to divide something with a false dividing line, like:

  1. You can have either quantity, or quality, but not both.
  2. Some people vote for God, and some people vote Democratic.
  3. Some people support the troops, while others want to end the war.
  4. Some people support President Bush, while others are not so patriotic.
  5. Unwanted fertilized human eggs should be adopted, not used for stem cell research.
     {That statement implies that it is an either/or choice, and ignores the fact that there are 400,000 unwanted embryos in freezers around the U.S.A., extras left over fromÂ ***in vitro****Â fertization procedures, and very, very, very few of them will ever get adopted and*

become "Snowflake Babies". So far, only 81 of them have ever been adopted. There really are not a lot of women around who are begging the doctors to shove somebody else's fertilized egg into their wombs. There are more than enough unwanted frozen embryos to go around, and the sad truth is that almost all of those embryos will end up getting flushed down the drain after they have sat in the freezer for too long. They get freezer burn too, you know.}

Variations on False Dichotomy include:

- False Dilemma: The choice presented is only A or B. Rejecting A is selecting B.
- Bifurcation
- Either/Or: Reduce reality to, "Either this is true, or that is true."
- The Enemy Of My Enemy Is My Friend
- Hobson's Choice
- Alternative Advance

Another very common false dichotomy is:Â **"Do you believe in God or evolution?"**Â
But if you believe that evolution was God's method of creating us, then there is no conflict between science and religion. Yes there is a God, and yes, evolution is true.

> The only conflict is between modern observations of reality and the superstitions of some ill-educated Israeli goat-herders who happened to live in the Sinai Desert 4000 years ago. But what did they know? They thought that the Earth was flat, and that the Firmament was a black dome over the Earth, to which all of the stars were glued. (Read the beginning ofÂ *Genesis*, and the part ofÂ *Revelations*Â where the Lord rolls up the Firmament like a Venetian blind and takes it away. There goes the night sky and all of the stars that are glued to it.)

Al Shebab is a terrorist gang in Somalia that is linked to Al Qaeda. They recently carried out a terrorist attack on a shopping mall in Kenya that killed 70 people. OPB Newshour, 2014.01.07, did an article on Al Shebab. In it, an Al Shebab leader Sheik Ali Dehere lectured new suicide mission recruits:Â "When we fight and are martyred, we are hoping to be with God in Paradise. We are hoping for beautiful women. What do the infidels hope for? Nothing."Â
That is a false dichotomy. People who are not murdering terrorists hope for many things, generally good things. They might even hope to go to Heaven. And people who choose to not be murdering terrorists are not necessarily "infidels". That is aÂ *Sheep and Goats*Â distinction.

George Bush uses the false dichotomy technique constantly, framing an argument as a choice between two irrelevant things. While talking about the armed insurgents in Iraq, he said that they had to "choose between freedom or a return to darkness." (23 Aug 2005). The insurgents are not opposed to freedom. They are opposed to the occupation of their country by the United States Army. In fact, those insurgents want to be even freer than they are now, so that they can do whatever they want to do without interference from Americans.

Recently, Tom Cruise appeared on television to promote the movieÂ *War of the Worlds*. Somehow, the interview morphed into a tirade against modern psychiatry, and criticism of psychiatrists for giving tranquilizers to adults and psychotropic drugs to children. He voiced many bitter denunciations of modern psychiatry. Cruise claimed that "You don't know the history of psychiatry like I do." Cruise also said that he believes that Scientology offers a valid alternative to current psychiatric practices.

But Tom Cruise is making the whole issue into a falseÂ *Either/Or*Â choice â a false dichotomy. Is isn'tÂ ***EITHER***modern psychiatry is right,Â ***OR***Â Scientology is right. Cruise ignores the obvious possibility that both could be wrong:

- Some psychiatrists are very much at fault for prescribing entirely too many medications â especially Ritalin â to children just because they are high-energy little live-wires (which a lot of healthy children are). Sitting still in a classroom all day long, year after year, is downright unnatural and unhealthy, and drugging children to make them be quiet is despicable.

- ***AND***Â Scientology is at fault for being a complete fraud and cruel rip-off â just organized crime masquerading as a healing group.

Bill Wilson's favorite false dichotomy was to divide people into those "faithful" people who believed the crazy dogmatic things that he was preaching, and the "atheists and agnostics" who didn't.

And, some alcoholics accepted all of Bill's bull, while others were "unreasoningly prejudiced".

And then A.A. teaches us that there are:
Â Â Â 1) those good A.A. members whoÂ *Keep Coming Back*Â to more A.A. meetings andÂ *Work The Steps*Â in all of their affairs; and
Â Â Â 2) those unfortunates who will die drunk in a gutter.

And,
Â Â Â 1) Good A.A. members are able to grasp a lifestyle that requires "rigorous honesty" (likeÂ *Fake It Till You Make It*Â andÂ *Act As If*), while
Â Â Â 2) Non-members are "constitutionally incapable of being honest with themselves. Â ... Â They seem to have been born that way."

- **The Enemy Of My Enemy Is My Friend**

This is another kind of false dichotomy â an attempt to divide people into just two camps or sides or causes.

Variations:

- *"The enemy of bad must be good."*
- *"Those who are opposed to bad must be good."*
- *"If a bad man hates me, then that proves that I am good."*
- *"If a very bad man is opposed to what Joe is doing, then Joe must good, and Joe must be doing good things."*
- *"The friend of my enemy is also my enemy."*
- *"If I am opposed to something bad, then I must be good."*

Heinrich Himmler and two other S.S. officers collecting wildflowers for a little girl that he is going to visit.

Those are obviously false assumptions, fraught with dangers. Nobody is absolutely bad, or absolutely good, so their enemy cannot be absolutely the opposite, either. Even Heinrich Himmler, the man who

personally managed the halocaust that murdered 6 million Jews, had a soft spot in his heart for pretty little girls, and he doted on them and would pick wild flowers for them. But that didn't make those little girls bad, or our enemies.

Adolf Hitler hated Joe Stalin, and was totally opposed to what Joe was doing, but that didn't make Stalin a good guy. Both Adolf Hitler and Joseph Stalin were world-class murdering monsters.

Peter Howard used this technique to try to claim that the Oxford Group / Moral Re-Armament organization was good. He claimed that he had a secret Gestapo report on the Oxford Groups that the Gestapo had printed during World War II, which condemned the Oxford Groups as a dangerous influence, and ordered Gestapo agents to watch them closely. Thus, Howard concluded, the Oxford Groups must be virtuous, and the allegations that the Oxford Groups were essentially a fascist cult religion must be false. That is bad logic. The leader of the Gestapo, Heinrich Himmler, was againstÂ *all*Â Christian churches, because they encouraged people to be loyal to something other than Adolf Hitler. Also, Himmler dismissed all of Christianity as a "Jewish" religion, and wanted to stamp it out andÂ return to ancient paganism. So Himmler was wary of the Oxford Groups just because they said that they were Christian (which they were not, really, in the final analysis).

Scientology routinely uses a variation on this tactic. Scientology opposes the use of all psychiatric drugs and medications, claiming that Scientology procedures are the only valid treatment for psychiatric problems. Scientologists especially like to complain about children being overmedicated with harmful drugs like Ritalin. Like most successful Big Lies, there is a grain of truth in such complaints. It is despicable to overmedicate children and dope them out just because they are energetic little live wires who don't want to sit still in classrooms when the sun is out and it's a beautiful day outside. But Scientology way overdoes it in opposing all psychiatric medications. And then they use the logical fallacy of "we oppose something bad so that proves that we are good."

And then they go on and on, denouncing drug after drug, finding fault with every tranquilizer and anti-psychotic around, picketing and warning against Zoloft, Paxil, Luvox, Celexa, Lexapro, Seroxat, Prozac, Effextor, etc., and all the while claiming that they great because they are saving people from the bad psychiatrists. And the more they can find wrong with medications or psychiatrists, the more convinced they are that they are right about everything.

Alcoholics Anonymous uses this ploy constantly by declaring, "Alcoholism is very bad, so A.A., which opposes alcoholism, is very good."

The so-called "recovery industry" uses this ploy by declaring that they are very opposed to "addiction", implying that they are good people who are dedicated to helping others, rather than just charlatons with ineffective quack cures who are out to get your money. Their advertisements go on and on, ranting about how bad "addiction" is, without actually showing that they are doing anything good for the problem.

- **"Hobson's Choice"**
  Give a free choice between something or nothing.

  The classic example of Hobson's Choice is "Take it or leave it." Either take the one thing offered, or get nothing.

  The A.A. program is often offered in this manner: Either accept the entire program and believe all of

it, or else get no help: "If you aren't willing to accept this Program, then you should go out and do some more research on the subject."

- **Alternative Advance**
  Provide two or more choices which do not cover the range of possibilities, but which only reflect essentially the same proposition.
  A Jehovah's Witness recruiter may say,
  "If you don't agree with me, let's study this book I've brought along. If you do agree, let's go to the Kingdom Hall this Sunday."
  Both choices expose you to indoctrination in their religion.[10]Â One obvious logical choice is missing:
  "If we don't agree about religion, we can just drop the matter and part company amicably."

  Here is another example:

> In A.D. 640, when the Saracens captured Alexandria, seat of ancient culture, Greek scholars pleaded with them not to burn the scrolls of the great library. Their reply, as recorded by Gibbon in hisÂ *Decline and Fall of the Roman Empire*Â remains a classic in theological logic. "If the writings support the Koran, they are superfluous," ruled the warrior tribesmen. "If they oppose it, they are pernicious; burn them."
> Richard Mathison,Â *God is a Millionaire*, page 33.

- **"Somebody's got it worse"**
  When people complain about something, tell them that they should be happy with the situation because somebody else has it worse.

  - "You should be happy to have Mr. Smith as your slavedriver. He only beats you once a day. Those poor bastards under Mr. Jones get beaten three times a day."
  - "You are lucky to have those shiny new chains and shackles. Look at those poor slobs over there, with rusty old chains. Do you know how those things chafe on wrists and ankles?"
  - "You should be happy to be working for a dollar an hour. The boss is being generous. The guys in Bungeria only get 25 cents an hour."

- **Faulty Syllogism**
  AÂ *Faulty Syllogism*Â is bad logic, pure and simple â a bad chain of logical deduction.

> Technically, a proper syllogism is an argument, the conclusion of which is supported by two premises, of which one (major premise) contains the term (major term) that is the predicate of the conclusion, and the other (minor premise) contains the term (minor term) that is the subject of the conclusion; common to both premises is a term (middle term) that is excluded from the conclusion. A typical form is: "All A is B; all B is C; therefore all A is C."[23]

Whew! A simpler and clearer example of a good syllogism is like this:

> "All Pekinese ducks are white.
> Mister Lee is a Pekinese duck.
> Therefore Mister Lee is white."

A faulty syllogism might be something like this:
"You think as much as college professors, and college professors don't make any money, so if you keep on thinking we won't have any money!"

Another rather popular faulty syllogism is this:

1. A young, aspiring poet has his poems panned, trashed, or ignored by the critics.
2. That young poet recalls that many of the greatest poets were also panned, trashed, or ignored by the critics when they were young.
3. "Therefore," the young poet concludes, "I must also be one of the great poets."

Obviously, the flaw in the logic is to overlook the simple truth that for every young genius artist who gets panned by the critics, there are a hundred incompetents whoÂ *really should be*Â trashed by the critics.

A variation on that faulty syllogism is:
Â Â Â "Jimi Hendrix, Janice Joplin, John Bellushi and James Dean all died young, and they were all great artists. So if I die young â go out in a blaze of glory like a shooting star â then I will also be remembered as a great artist."
NOT!
You have to be a great artist to be remembered as one. Dying young does not make one a great artist.

> *And memory is selective. What you don't remember is all of the non-greats who died young. What were their names?*
>
> *And conversely, what about all of the great old artists? What about the Rolling Stones and the Grateful Dead, and B. B. King and Chuck Berry, and Robin Williams and Dustin Hoffman and Frank Sinatra, and George Burns and Bob Newhart and W. C. Fields? They didn't have to die young to achieve greatness, did they?*
> *(And that was a demonstration of the debating technique called "Refute by Example"...)*

- ***Non Sequitur***

*Non sequitur*Â means "it does not follow" â the logic is broken. If there is a chain of argument, every link in the chain must work.

AÂ *non sequitur*Â can be something like this:
"I supported terrorists today. I did just a little bit of dope. I thought I was just having fun, but I gave money to terrorists when I did that."

That is totally bogus logic. Colombian drug lords did not bring down the World Trade Center on September 11; some crazy oil-rich Saudi Arabians did. A good chain of logic is like this:

"I supported terrorists today. I thought I was just having fun, but I gave money to terrorists. I drove my car down to the gas station and filled up the tank, and went cruising. But the gas station sent the

money to Bush's and Cheney's friends' oil companies, who sent the money to Saudi Arabia, which gave the money to the bin Laden family, who gave some of the money to Osama, who gave it to his terrorist guys. So I supported terrorists when I bought gasoline today."[12]

Likewise, this old argument is completely illogical: At the dinner table, a mother tells her child, "Finish your peas. There are children starving in China."
A precocious child will answer, "So send my peas to China."

A commercial on PBS for a big financial company tells the story of a couple of university professors who put their children through college. The wife stops the narrator and says:
Â Â Â "You don't build up a big nest egg on a couple of teachers' salaries. You need a plan and a financial consultant who isn't afraid to roll up his sleeves."
That is nonsense, anotherÂ *non sequitur*. Obviously, unless that couple robbed a bank or inherited a fortune or took bribes from their students for good grades, theyÂ *really did*Â build up their big nest egg on a couple of teachers' salaries.

Advertisements for some cigarettes brag that the tobacco is completely natural and free from additives and chemicals, so it is somehow less harmful. That is completely non-sensical logic. Tobacco in any form is poisonous, and tobacco kills 430,000 Americans per year, regardless of what chemicals it may or may not have added to it.

Frank Buchman'sÂ *Oxford Group*Â cultÂ came up with this jewel:
'I most hate self, because "I" is the middle letter of SIN.'
(By that brain-damagedÂ *Oxford Group*Â logic â Â *'"I" is the middle letter of SIN'*Â â they should have also hatedÂ *Saints*Â andÂ *Salvation*, because "S" is the first letter of SIN. And perhaps they should also hate Nuts and Noodles, because "N" is the third letter of SIN.)

AnotherÂ *Non Sequitur*, or piece of broken logic, is Carl Sagan's old favorite:
"There aren't any aliens out there. We have been looking for them for 50 years, and we haven't seen any. We would have seen them or made contact or something by now, if they existed."
Carl Sagan's answer is:Â *"Absence of evidence is not evidence of absence."*
In particular, we have explored only the most minuscule part of our Universe, maybe something like only a quintillionth of one percent or less. Even our best telescopes cannot even see the planets orbiting the nearest neighboring stars, so how could we see their spaceships? (Really. We compute the existence of distant planets by watching how the stars wobble a tiny bit as the invisible planets orbit them.) It's outrageously premature to declare that there is nobody out there, just because we haven't seen them yet.

It's kind of like going down to the seashore, and sucking up a drop of water in an eye-dropper, and then looking very closely at the drop, and announcing,Â "I don't see any whales in there. Obviously, whales don't really exist."

Another popular one is:Â "Drafting people and forcing them to serve in the army isn't slavery because everybody is subjected to it."
Of course it's slavery. Whether something is slavery or not has nothing to do with how many people are enslaved.
(By the way, not everybody was subjected to it. Rich men's sons got college deferments and ended up avoiding the draft. Dick Cheney got five deferments because he said he "had other priorities.")

In a TV commercial for the Turbo-TaxÂ® computer program (2004.01.20), the husband asks,Â "What if we made a mistake?"
His wife confidently answers,Â "The calculations are guaranteed accurate."

That is brain-damaged logic, a realÂ *non-sequitur*. The husband asked "What ifÂ *we*Â made a mistake?", not "What if the computer program made a mistake?"...
Sure, the computer's basic calculations like addition and multiplication will be accurate, but that doesn't guarantee that the humans haven't messed everything up. You know the old saying,Â *"Garbage In, Garbage Out"*.
The Turbo-Tax guys cannot guarantee against human error. The reason that it is so hard to make things fool-proof is because fools are so damned clever at thinking of new ways to screw things up.

American Express has a commercial on TV that is similarly illogical. A man who declares that he works as a waiter in a restaurant and also coaches childrens' basketball explains that,

> "I want my players to develop as athletes.
> "I want my players to develop as students.
> "My life isn't just about playing games.
> "That's why my card is American Express."

*What?!*Â There is no logic to that. He has not established any basis for choosing an American Express card over a VISA or Mastercharge. He has not introduced a single fact to support his sentiments. He might as well be saying,

> "My life isn't just about playing games.
> "That's why I drink only expensive imported single-malt scotch."

Crazy anti-environment people who are also religious fundamentalists declare that warning messages about destruction of the environment are untrue because...
Â Â Â Â *"We cannot destroy the world any more than we were capable of creating it."*
That's aÂ *non-sequitur*Â â completely illogical nonsense. Of course we can destroy things that we did not create. Anybody who picks up a gun and kills someone who isn't one of his own children is destroying something that he didn't create. Anybody who is stupid enough to start a forest fire and burn down a forest is destroying something that he didn't create.
Those fundamentalists are trying to imply that only God can destroy this world (so we are safe from such danger), but that is obviously not true at all. That is just so much wishful thinking. Just ask the survivors of Hiroshima.

Curiously, that goofyÂ *non-sequitur*Â is almost a word-for-word repetition ofÂ the illogical argumentÂ that was parroted by the true believers in Frank Buchman's Nazi-sympathizingÂ *Moral Re-Armament*Â cult back in the 1930s and '40s and '50s. They declared that without hearing "The Voice" that Frank Buchman heard (which they claimed was the Voice of God) â

> Without it we are no more capable of saving the world than we were capable of creating it in the first place."
> *Experiment With God; Frank Buchman Reconsidered*, GÃ¶sta Ekman, 1971, page 84.

In another brain-damagedÂ *non sequitur*, G. W. Bush tells the troops:Â *"It is wonderful to bravely, patriotically, serve your country and fight terrorism. I am committed to fighting terrorism. Some of you may die in this war, but that is a sacrifice that I am willing to make. Bring 'em on!"*

The supporters of George W. Bush insist that having investigations to discover the truth behind Bush's many, many mistakes, deceptions, and false statements regarding the war in Iraq would not be good for America:
"We can't discover the truth right now; we are in a war against terrorism."
That is aÂ *non sequitur*.

Recently (Nov. 22, 2006) the elder George Bush was in Dubai,Â where he was harshly criticizedÂ for the foreign policy of the United States and the military adventurism of his son. Papa Bush responded,Â "How come everybody wants to come to the United States if the United States is so bad?"Â That is aÂ *non sequitur*. There are many good reasons for wanting to come to the United States which do not imply approval of George W.'s bombing and invasion of Afghanistan and Iraqi, or his policy of unquestioning support of Israel. One good reason for coming to the USA is to get away from American bombing in Afghanistan or Iraq. Another good reason is to get away from American-trained death squads in military dictatorships around the world.

AnotherÂ *non sequitur*: a cult old-timer declares,Â "I dedicated my life to the cult. I worked hard for 20 years to promote it and recruit new members. Therefore I am noble and selfless and the cult is wonderful, and we all live lives of self-sacrifice to help others."

ThisÂ *non sequitur*Â might be called "proof by delusion":Â "I saw lights, so it was a spiritual experience."

Paul Krugman reported a crazy non-sequitur recently:

> Consider one of Mr. Romneyâ s most famous remarks: "Corporations are people, my friend." When the audience jeered, he elaborated: "Everything corporations earn ultimately goes to people. Where do you think it goes? Whose pockets? Whose pockets? Peopleâ s pockets." This is undoubtedly true, once you take into account the pockets of, say, partners at Bain Capital (who, I hasten to add, are, indeed, people).
> Paul Krugman,Â *Off and Out With Mitt Romney*,Â **The New York Times**, 2012.07.05

The fact that people get money from corporations does not mean that corporationsÂ *are*Â people, entitled to human rights, like freedom of speech or the right to vote. Corporations cannot be imprisoned for their crimes, can they? Or be given the death sentence for polluting children to death. Or die of old age. Or get cancer. Or bleed and suffer. Corporations are actually just legal fictions that allow some people to do business without being liable for the consequences of their actions. If the same people do busness as a partnership, they can be put in prison for their crimes.

Today, commercials on the radio tell you that you need to join Al-Anon or Ala-Teen "to get help" because Daddy drinks too much alcohol â

> "I don't know who he is any more. I don't know who I'll meet â my husband or somebody else..."
> "We are the family and friends of alcoholics. We may be different, but we have one thing in common: We want our lives back."

The broken logic there is:Â "Daddy drinks too much alcohol, and living with him is a nightmare, so you need toÂ go join the 12-Step cult religionÂ where you will be told to confess all ofÂ *your*Â sins and find your part in it andÂ quit being so selfish and quit being such a domineering bitch."
That's a realÂ *non sequitur*Â â there is no logic to it.

For another example of bad logic:

> Both of the co-founders of Alcoholics Anonymous, William G. Wilson and Dr. Robert Smith, were very heavy smokers. So were most of the other early A.A. members. Bill Wilson often said thatÂ members did not need to quit smoking; that smoking was okay, and could even help (in spite of the fact that it was killing him). A coffee pot and lots of ash trays were considered the standard essential equipment for any A.A. meeting. Therefore, smoking lots and lots of tobacco, and drinking lots and lots of coffee, just like Bill W. and Dr. Bob did, is perfectly okay, and it may even help you to quit drinking alcohol, just like they did.

(It may also help you to quit breathing,Â just like they did, but that's another story...)

Another brain-dead non-sequitur:

> "When I went to an A.A. meeting, I was amazed to see that they were all just like me. They really understood. For the first time, I felt like I belonged. Therefore, Bill Wilson was a total genius and right about everything, and the Twelve Steps are the One And Only True Path to Sobriety, Serenity, and God."

A very common argument that one often hears around the "recovery community" is descriptions of the horrors of alcoholism and drug addiction being used to glorify Alcoholics Anonymous and Narcotics Anonymous. The logic is:Â "Alcoholism is bad, so A.A., which is intended to save alcoholics, is good."

But that is just anotherÂ *non-sequitur*. That is no more logical than saying,Â "Alcoholism is bad, so Scientology is good."
Scientology also claims to have a never-fails cure for alcoholism and drug addiction â an allegedly-independent organization calledÂ Narconon. And their magic answer is:Â "GiveÂ *all*Â of your money to Scientology for more 'auditing', and they will fix your mind."

Just because something claims to have good intentions does not make it good. As one wit declared,

"The opposite of 'good' is good intentions."

- ***Post Hoc, Ergo Propter Hoc***Â â "*It happened after 'X', so it was caused by 'X'.*"
*Post hoc, ergo propter hoc*Â means "it happened after..., so it was caused by...". That implies a cause-and-effect relationship where none may exist.

The classic example of this is, "The rooster's crowing makes the sun rise: First the rooster crows, and then the sun comes up over the horizon, so the rooster's crowing makes the sun rise."

A few more examples of false logic:

- A bunch of teenage girls took sex education classes in high school, and then got pregnant. Therefore, sex education classes make teenage girls get pregnant. The classes give the girls ideas.
The fact that young females have been managing to get pregnant for hundreds of millions of

years without any formal education â using only on-the-job training â is considered irrelevant.

- Tommy says, "I was sick. I drank a whole bottle of Dr. Philo T. Farnsworth's Magic Rejuvenation Elixir, and immediately got better. So that Elixir really works good."
  Tommy ignores the simple fact that most people routinely spontaneously recover from all of their illnesses (except perhaps the last one) without any Magic Elixir, so he has no way of knowing whether the Magic Elixir wasÂ responsible for his recovery.

- Sam won the lottery, and immediately went on a huge outrageous binge of celebration that ended in him dying drunk. He had all of the free time and money he needed to drink himself to death, and he did. Therefore, winning the lottery is a terrible thing that will make you die drunk.
  (Likewise, success is also a dangerous thing that will probably ruin you, so don't succeed in life.)

- Joe went to A.A. meetings, and quit drinking. So, going to the meetings caused Joe to quit drinking.

- Henry did the Twelve Steps, and quit drinking. He stopped drinking after he did his Fifth Step. That proves it: doing the Fifth Step makes people quit drinking.

- Jackie relapsedÂ after he did his Twelfth Step. So didÂ Paddy and Lillian and Ebby and Johnny. That proves it: doing the Twelfth Step makes people relapse and die drunk.

- **The Norm of Reciprocity**
  *The norm of reciprocity*Â is a technique that exploits people's natural tendency to want to repay debts. I know that sounds unbelievably Pollyannaish, because you might think that most people want to avoid paying debts, but no matter how cynical you may feel about the human race, people do have a basically cooperative nature,Â *especially in face-to-face relationships*. It dates from our days as primitive members of tribes, just cavemen, who helped each other to survive. When one person does a favor for another, the other feels indebted, and wants to return the favor to even out the score. Even today, there are still a few remaining tribes who have an economic system that is just a complex web of traded favors and debts, and they all manage to remember who owes what to whom...

  The Hari Krishnas discovered that they could increase their haul of money from airports by giving away flowers. That is, if they just tried to shake travelers down for donations, they got rejected a lot. But when they gave travelers a flower, "...because we love you, and you are so beautiful...", and then hit up the traveler for a donation, they got a lot more money. The act of giving the flower made the traveler feel indebted and embarrassed, and vulnerable to the request for money.

  Then they used the same technique for selling their Krishna books in airports: "Give" the book to the traveler "because he looks so enlightened, like someone intelligent enough to appreciate that material", and then hit him up for a big donation to finance the printing and distribution of that cosmic wisdom...

  The one time they pulled that stunt on me, I had just spent my last dollar on the airplane ticket. When I finally managed to convince the woman who was working on me that I really didn't have even just a twenty left in my pockets, she gave me a look of disgust, angrily grabbed the book back out of my hands, and stomped off in frustration... So much for how intelligent and enlightened I look... Oh well.

- **Guilt Induction**
  Guilt is an especially powerful tool for manipulating people's minds.

  A late-night TV infomercial says:

  > *"Don't you think it's time you gave your family all of the things that they deserve? Buy this get-rich-quick scheme right now."*

  Another commercial that sells a panic button service has a woman saying,

  > *"What if something happened to my mother? I don't think I could forgive myself. I'll buy her a medical alert service."*

  They imply that you are neglecting your mother if you don't buy their service, and they make you afraid of what might go wrong. That commercial cleverly combines guilt induction with fear-mongering, so they are using two propaganda techniques on your mind at once.

  People who feel guilty are far more likely to comply with a request than they would be if they didn't feel guilty. Thus, making people believe that they have hurt you, and then pressing a request for them to do something (which offers them a feeling that they can make amends by doing something for you) is an effective way to get people to do what you want.

  Guilt induction and self-criticism (confession) sessions formed the core of theÂ Red Chinese brainwashing program, and they are still used by many cults. Edward Hunter wrote a beautiful book about the Red Chinese brainwashing that was done to the American, British, and other United Nations prisoners of war in North Korea during the Korean War. He explained the mechanics of "brainwashing" this way:

  > The Reds had found that the easiest way to subdue any group of people was to give its members a guilt complex and then to lead them on from self-denunciation to self-betrayal. All that was required to put this across was a sufficiently heartless exploitation of the essential goodness in people, so that they would seek self-sacrifice to compensate for their feelings of guilt. The self-sacrifice obviously made available to them in this inside-out environment is some form of treason.
  > *Brainwashing, From Pavlov to Powers*, Edward Hunter, page 169.

  So, first, the Communist guards would do something like make the prisoners feel guilty for being part of "a rich racist society where they never cared about the fate of the poor Negroes", and then the prisoners had to confess that in self-criticism sessions, and then the only way to atone for such sins was to love and praise the wonderful Chinese Communist society where everyone was equal (but some people were more equal than others).

  Prof. Margaret Thaler Singer also considered inducingÂ *"a sense of powerlessness, covert fear, guilt, and dependency"*Â to be one ofÂ the five essential conditionsÂ for an effective mind-control or "brainwashing" program. The Red Chinese guards were able to accomplish that easily, because all of the prisoners were at the mercy of the guards, who could punish or kill them on a whim, or for no reason at all.

Likewise, many religions and religious cults use guilt to manipulate their members.Â Frank Buchman'sÂ **Oxford Group**Â cult refined guilt induction to an art and a science â Â **"The Five C's"**Â â and used it as a standard part of their recruiting scheme. The Oxford Groups also induced a sense of powerlessness in their victims with the doctrine thatÂ *"Everyone has been defeated by sin, and is powerless over it. Everyone is insane*Â (except Frank Buchman and his lieutenants).Â *Only 'Surrender to God'*[Read: surrender to Frank Buchman's cult]Â *can restore one to sanity."*
All of Prof. Margaret Thaler Singer'sÂ five essential conditionsÂ for an effective mind-control or "brainwashing" program were present in the Oxford Groups.

Guilt induction is also a big part of the Alcoholics Anonymous program.Â The A.A. founders Bill Wilson and Dr. Robert Smith learned it from the Oxford Groups when they were members of that cult. Seven of the Twelve Steps, Steps Four through Ten, dwell on sins,Â *"defects of character", "moral shortcomings"*, offenses, people we have harmed, and wrongs â Â *"the exact nature of our wrongs."*Â Good A.A. newcomers are supposed to do a "moral inventory" and list every sin they ever committed in their whole lives, and then confess it all to another A.A. member and God. Then they are supposed to make another list of everybody they ever hurt, offended, or pissed off, and they have to go apologize or somehow "make amends." And then they are supposed to repeat that whole rigamarole for the rest of their lives. Such constant guilt induction can be very harmful and psychologically damaging. It even sometimes drives people to suicide.

> (And Alcoholics Anonymous also induces a sense of powerlessness with Steps One and Two:
> "1. We admitted we were powerless over alcohol â that our lives had become unmanageable."
> "2. [We] Came to believe that a Power greater than ourselves could restore us to sanity."
> *Implying that you are insane and you cannot heal yourself. Somebody else has to manage your life for you and restore you to sanity.*
> With the guilt induction and inducing a sense of powerlessness, we have two of the most important ingredients for a working brainwashing program.)

Bill Wilson's mania for inducing guilt in others was so intense that he even tried to make people feel guilty forÂ *not*Â being sinners. On page 66 of Bill's second book,Â *Twelve Steps and Twelve Traditions*, Bill described all of the disgusting ways that sinners will sin and then deny it and try to avoid confessing their sins. Then Bill wrote:

> We who have escaped these extremes are apt to congratulate ourselves. Yet can we? After all, hasn't it been self-interest, pure and simple, that has enabled most of us to escape? Not much spiritual effort is involved in avoiding excesses which will bring us punishment anyway.
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 66.

So if you don't commit a lot of sins and crimes, then you should feel guilty for being selfish and pursuing "self-interest, pure and simple":
â You aren't really a good person, and you aren't really spiritual.
â You are just selfishly avoiding punishment.
Poor insane old Bill Wilson really didÂ hate human nature. No wonder he was a chronic depressive.

That's also a good example of aÂ *double-bind*Â â You are damned if you do, and damned if you don't:

- If you commit a bunch of sins and crimes, it's because you are selfish and unspiritual.
- If youÂ *don't*Â commit a bunch of sins and crimes, it's because you are selfish and unspiritual and just selfishly avoiding punishment.

Either way, you are too selfish to be "spiritual." So you should start doing Bill Wilson's Twelve Steps, listing and confessing all of your sins and feeling guilty about everything.

But the best example of Bill Wilson's crazy mania for guilt induction has to be this jewel where Mr. Wilson declared that we wereÂ guilty of all of theÂ *Seven Deadly Sins*, includingÂ **Sloth**, because we work hard:

> And how often we work hard with no better motive than to be secure and slothful later on â only we call it "retiring."
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 67.

So, working hard now, so that we can retire later, in our old age, with some financial security, is contemptibleÂ ***"slothful"***behavior, is it?
Is there anything more ridiculous that Deacon Wilson could possibly try to make us feel guilty about?

- **Play On Emotions, Appeal To Emotions**

We have lots of emotions that can be manipulated by a clever propagandist. We've already mentioned guilt, which is in a category of its own. But there are plenty more to exploit, like: Fear, lust for power, hope, pride, vanity, egotism, insecurity, ambition, machismo, "patriotism", greed, love, loneliness, nostalgia, religiosity, sentimentality, and lust for sex.

- **Fear**, especially fear of death, is a particularly powerful emotion, one that can be manipulated to good advantage:

  - A preacher who wants to increase attendance at his church advertises: "Don't wait for the hearse to take you to church."
  - A cult recruiting leaflet asks,Â "If you died this very moment, do you know where you would spend eternity? If you do not, there is an answer for you. It is _____."Â (Fill in the blank with the name of your favorite panacea...)
  - Believers who confuse religion and politics declare:Â "If we don't line up politically, we Christians shall lose this country. The forces of evil are trying to take America away from us. Winning means that we will protect all that is good and sacred."
  - When San Francisco residents suggested getting their own municipal power company so that they could stop paying for enormously over-priced electricity from PG&E and Enron, they were told,Â "It's too risky, too costly."
    (How could it possibly be more risky and more expensive than handing your wallet to Enron?)
  - Someone who wishes to stop a public debate declares, "The debate must be cancelled, both because it might offend people and because it could stir up racial hatred. There is a potential threat to public order." (BBC News, Monday, 26 November 2007, "The

limits to freedom of speech")

◊ SpreadÂ **Fear, Uncertainty, and Doubt (FUD)**.
Microsoft is a past master of this stunt:

> "If you use some software that was written by someone besides Microsoft, it might not work right with your Micro$uck operating system. It might mess up your machine. You might lose files... We might even have deliberately built in some secret bugs and booby-traps and bombs that will get triggered if we see you using a competitor's software in 'our system'... You don't get any guarantees that it will all work together correctly if you don't buy all of your software from us."

◊ PromoteÂ **Conspiracy Theories**. "They" are all out to get you. (And a paranoid book of disorganized 'facts' proves it.)Â After September 11, 2001, our Commander-in-Empty-Flight-Suit Bush declared,Â "Oceans no longer protect us"as if the oceans protected us from the attack on Pearl Harbor in 1941, or from the first World Trade Center bombing in 1993...

◊ Alcoholics Anonymous often uses fear mongering and death threats to manipulate people:

· A.A. teaches that failure to follow the A.A. program precisely will result inÂ relapses and drinking yourself to death.

· A.A. also teaches that you will either turn into a "dry drunk" and act crazy, or relapse and die, if you don't*"work a strong program"*Â by practicing Bill Wilson's Twelve Steps "in all of your affairs."

· Bill Wilson constantly threatened people with death unless theyÂ followed his instructions exactly:

> Unless each A.A. member follows to the best of his ability our suggestedÂ [my required]Twelve Steps to recovery, he almost certainly signs his own death warrant.
> *Twelve Steps and Twelve Traditions*, William Wilson, page 174.

· They say that if you won't make A.A. or N.A. your new life, that your fate is "Jails, Institutions, or Death."

· Failure toÂ *"Work A Strong Program"*Â in A.A. will end inÂ *"Jails, Institutions, or Death"*.

· Step Eleven teaches us to practice meditation and prayer until we hear God talking to us, but then Bill Wilson tells us not to trust our own minds when we hear God talking â that it is "dangerous" to "go it alone" and could result in "tragic" results â so we should take our received "Guidance from God" to our sponsors for their approval, and let them rewrite God's messages:

> If all our lives we had more or less fooled ourselves, how could we now be so sure that we weren't still self-deceived? Â ... Â Â Going it alone in spiritual matters is dangerous.Â Â ... Â Surely then, a novice ought not lay himself open to the chance of makingÂ foolish, perhaps tragic, blundersÂ in this fashion. While the comment or advice of others may be by no means infallible, it is likely to be far more specific than any direct guidance we may receive while we are still so inexperienced in establishing contact with a Power greater than ourselves.
>
> *Twelve Steps and Twelve Traditions*, William G. Wilson, pages 59-60.

But there are also plenty of other emotions, besides fear, to exploit:

- **Arouse Resentments.**
  Adolf Hitler found a great way to get the German people on his side:Â *Claim that Germany had been attacked by the Jews, and that the Jews had caused World War One, and that the Jews were exploiting the German economy after the war, which was supposedly why all of the German people were poor and unemployed*, which aroused feelings of paranoia, resentment, and anger. And then it didn't matter whether it was the British and French, or the Jews or Communists, or Czechoslovakia or Poland, they had all supposedly attacked Germany or German people in one way or another, at some time or other, so it was supposedly okay for Hitler to strike back in revenge, which he did with a vengeance. That made Hitler look like a great leader, someone who was very strong on national defense while he invaded foreign countries.

  Fat old Nazi Reichmarshall Hermann Goering said,Â

  > "Voice or no voice, the people can always be brought to the bidding of the leaders. That is easy. All you have to do is tell them they are being attacked, and denounce the pacifists for lack of patriotism and exposing the country to danger. It works the same in any country."

  Oddly enough, that is the same technique that George W. Bush and Carl Rove have been using on the American people to promote the war in Iraq. Did Rove study the Nazi propaganda techniques?

  Alcoholics Anonymous often arouses feelings of self-pity and resentment by complaining about how unfairly alcoholics have been treated for so long:

  > Â Â Â Psychiatrist Leo Hennigan, a former alcoholic and author of the bookÂ *A Conspiracy of Silence: Alcoholism*, says that the battles he fought in the South Pacific during World War II were nothing compared to the personal war that he fought with alcohol for 15 years. Hennigan blames this long siege on the medical community's disinterest. It wasn't until 1956 that the American Medical Association labeled the condition a disease rather than immoral behavior, and even now, after four years of training at most medical schools, doctors receive only two hours of instruction about alcoholism. He also blames

societal attitudes that reflect people's misunderstanding about the disease. Most don't realize that the nature of alcoholism causes the alcoholic to drink because he must, not because he wants to. Society is also largely unaware of alcoholism's genetic predisposition. In Hennigan's family, for example, three maternal uncles died before 50 of the affliction.

Â Â Â When Hennigan takes issue with Alcoholics Anonymous, it has nothing to do with its tremendous 75% rate of rehabilitation. Instead, he argues that AA relies too much on the "anonymous" part of its title. When the organization began in the 1930s, the group was small and needed the shield of anonymity, but not so today. "If AA's anonymity is scrapped, the group's ranks will swell by many millions and greatly assuage the effects of alcoholism in America." The most therapeutic role that AA can deliver is to allow struggling members to be encouraged by others who have "been there, done that." In fact, it was the testimony of a recovered alcoholic that influenced the AA founders to begin the organization.

Â Â Â When alcoholics are no longer anonymous, Hennigan contends, the organization will finally fulfill the 12th step of the program which says: "Having had a spiritual awakening as the result of these steps, we tried to carry this message to alcoholics."

"Alcoholism's nemesis", by Robert Selle.Â **World & I**Â magazine, Jun 2000 (Vol 15, No 6). Pages 62-65.

◊ Oh those poor, hard-done-by long-suffering alcoholics. The doctors are stupid and don't know anything and don't care, and nobody understands alcoholism, and society's attitudes are all wrong. The only answer is to cry in your beer and go join a cult religion.

◊ And that declared 75% success rate of Alcoholics Anonymous is a lie, so the author wasÂ assuming facts not in evidence. Bill Wilson was actuallyÂ lying with qualifiersÂ when made that claim â he only counted those peopleÂ "who came to A.A. and really tried".Â (If they didn't quit drinking, then, in Bill Wilson's opinion, they didn't "really try".) Wilson wrote that lie inÂ the forward to the second edition of theÂ *Big Book*, and the A.A. true believers have been repeating it ever since, but it's still a lie. The truth is that even the two founders of Alcoholics Anonymous,Bill Wilson and Dr. Robert Smith, calculated that their success rate was a mere five percentÂ â which is just the same as the success rate of people who do it alone, without Alcoholics Anonymous.

◊ In this sentence, the author used the tricks ofÂ Assume Facts Not In EvidenceÂ andÂ Assume The Major Premise:

"Most don't realize that the nature of alcoholism causes the alcoholic to drink because he must, not because he wants to."

No matter how many people "realize it" or don't realize it, the assumed "fact" is flat-out wrong, period. Alcoholics drink because they want to. Alcoholics have a choice. If alcoholics didn't have any control over their drinking, then they couldn't quit drinking. But they do quit, by the millions, and they do it without any cult "support group".

◊ [Oh, by the way, theÂ **World & I**Â magazine isÂ a front for the Moonies. It is part of Rev. Sun Myung Moon's empire. That's why they publish goofy articles like that.]

♦ **Arouse 'Patriotism'.**
In the nineteen-sixties through the 'eighties, there was a Moral Re-Armament song-and-dance show calledÂ *"Up With People"*, which featured squeaky-clean, well-shorn beautiful young people singing and dancing and waving the American flag in patriotic skits. Although the show never explicitly said that we should go over to the other side of the world and drop bombs on skinny, starving rice farmers in Viet Nam and kill about two million innocent civilians, that was the effective message, and that's what happened. All of that, just from appealing to "love of country", and "love of people" and "the American Way".

♦ **Arouse 'Love' and exploit peoples' loneliness.**

◊ The Moonies (members of Rev. Sun Myung Moon's Unification Church) use "love bombing" to exploit the loneliness and horniness of new prospects:

> Basically I felt a great love and warmth from all sides and I couldn't understand why they were so loving and warm. Why were they so serving? At times I found it a bit oppressive, it was too much for me at some times. I couldn't understand why they were doing it because I'd never met Christians like that before. They were talking about changing the world. Other Christians always talk about the Bible and believing in Jesus Christ and believing faith would do it â and I believed that that wasn't going to do it at all.
> *The Making Of A Moonie: Brainwashing Or Choice?*, Eileen Barker, page 185.

> "Again, there is a strict segregation between the sisters' and brothers' sleeping and bathroom arrangements, but physical contact in the form of (albeit strictly platonic) hugging and hand-squeezing occurs frequently between the sexes. The guests may have their backs and shoulders rubbed during lectures (presumably to keep them awake) or at night (presumably to help them sleep). I received an expert massage from one young woman while she told me about her experiences when her mother, one of the most active anti-Unification campaigners in America, had attempted to have her deprogrammed."
> *The Making Of A Moonie: Brainwashing Or Choice?*, Eileen Barker, page 112.

> A further 'spontaneous' response, towards the end of the weekend, was to break into song:
> *Â Â Â We love you, Eileen (or Johnathan, or Dave, or Jane),*
> *Â Â Â We love you more than anyone,*
> *Â Â Â We don't want you to leave us â*
> *Â Â Â And we don't mean maybe!*
> *The Making Of A Moonie: Brainwashing Or Choice?*, Eileen Barker, page 113.

◊ Alcoholics Anonymous also exploits people's feelings of loneliness or isolation:

· "We offer youÂ unconditional loveÂ and acceptance."
· "Let us love you until you can love yourself."
· "When we reached A.A., and for the first time in our lives stood among people who seemed to understand, the sense of belonging wasÂ tremendously exciting."

Twelve Steps and Twelve Traditions, William G. Wilson, page 57.

♦ **Appeal to Sentimentality and Nostalgia.**
Many successful politicians have a collection of mawkish sentimental stories to tell, real tear-jerkers, to appeal to the voters' emotions. They brag about their retarded kid that they didn't let go of, or their sick kid, or the child that died, or their wife with cancer, or good old Mom, or their grandparents who were such wonderful "God-fearing" people before they died, or the father who mined coal until he died putting his children through college.

There are also the glowing stories of the "good old days", and how wonderful life was in a small town way back when. Andy Griffith built a whole sentimental world,Â *Mayberry*, on such fond remembrances, a small town where life was simple and everybody knew everybody else and the biggest crimes were parking tickets, and the bumbling Deputy Sherrif Barney Fife (Don Knotts) was not allowed to carry a loaded gun. Politicians love to invoke such images as "the Real America", and "the forgotten America".

Of course those nostalgic stories don't really have anything to do with what this politician might do if he gets his hands on some power and taxpayers' money, or whether he will devote his careeer to collecting bribes, but his stories sure sound sentimental.

Alcoholics Anonymous also uses sentimentality and stories of the "good old days" to talk about how wonderful A.A. was way back when... In fact, there is a wholeÂ "Back To The Basics" fundamentalist school of A.A.Â that insists that A.A. worked great in the early days, and that A.A. is having difficulties now only because "the message" has become "watered down". But if we just get back to the basics and practice that old-timey religion properly, then it will work correctly and everything will be wonderful.

Alas, it isn't so.Â A.A. was a failure in the beginning too, and Bill Wilson just lied about it and faked the numbers.

• **Are You Afraid?**
This is a mind game that tricks people into doing whatever you wish by implying that they are afraid to do it, and that's the only reason why they won't do it. This trick arouses several emotions: macho pride, fear of cowardice, fear of being shamed or embarrassed, and it urges people to do something just to prove that they aren't afraid.

Steve Hassan, in his book,Â *"Releasing the Bonds: Empowering People to Think for Themselves"*, described how, as a 19-year-old student at Queens College in New York City, he was approached by three attractive women who said they were also students, and invited him to dinner. He had just broken up with his girlfriend, so he was lonely, and didn't mind having some female companionship. He wound up accompanying his new friends to a few weekend workshops â all in the spirit of being "open minded."

"It dawned on me when I was driving with them to an estate in upstate New York owned by the Unification Church. I'd ask them,Â 'Why are we going there?'Â They would turn it around on me and say,Â 'Why, are you afraid?'" Hassan recounted. AndÂ that deception was the beginning of several yearsÂ of "service" to the cult.

- **Induce and ExploitÂ *Apophenia***

  Apophenia is also known as "seeing through tinted lenses".

  People's brains have an unfortunate tendency to see what they expect to see, and only notice what they want to see. Once somebody buys into a peculiar model of reality, a perceptual filter kicks in where they notice more and more "facts" that appear to reinforce their chosen beliefs, and they ignore any conflicting information that comes along, so they become more and more convinced of the correctness of their beliefs:Â "It's all so obvious to anyone who learns the real truth!"

  > "All of us show bias when it comes to what information we take in. We typically focus on anything that agrees with the outcome we want."
  > "We need to acknowledge our tendency to incorrectly process challenging news and actively push ourselves to hear the bad as well as the good."
  > "Why We Make Bad Decisions", New York Times, 19 October 2013
  > http://www.nytimes.com/2013/10/20/opinion/sunday/why-we-make-bad-decisions.html%29

  1. Fundamentalist Christians see Satan as the cause of all of our problems, and every bad event on the evening news is seen as further evidence of the truth of that belief.

  2. "End-timers" see that the end of the world is coming very soon now. They see all of the end-of-the-world prophesies in the Bible as already coming true, and the end is near.

  3. Communists see those rich capitalists waging class warfare as the cause of all of our problems, and the news 'proves' their viewpoint right.

  4. Other people see it all as conspiracies of the Trilateral Commission and the Illuminati and the New World Order...

  5. The X-Files crowd sees everything in terms of Roswell crashes and government cover-ups and alien abductions and secret organizations and interplanetary plots...

  6. Neo-Nazis see everything as the Jewish Conspiracy to take over the world...

  7. Other rather depressed people see society as degenerating and becoming increasingly immoral, and it's all going to fall apart soon. The evening news tells them that crime is increasing, and everything is just getting worse and worse.

     This is nothing new. Thousands of years ago, an unhappy Assyrian enscribed:

     > The Earth is degenerating today. Bribery and corruption abound. Children no longer obey their parents, every man wants to write a book, and it is evident that the end of the world is fast approaching.
     > Â Â == Assyrian tablet, c. 2800 BC

  A skillful propagandist can use this human logical failing to his advantage. Apophenia helps to create really blinded, convinced, true believers. Radical politicians, extremist preachers, and cult leaders all encourage and exploitÂ *apophenia*Â in their followers. Start off by teaching the followers and believers merely biased and questionable "facts", and then use those non-facts as the basis for

believing more unrealistic ideas, which form the basis for more radical views, which lead to unquestioning belief in even more radical ideas.

- Many years ago, I went to a Pentecostal church service where the preacher read a newspaper article about the Satanic funeral of a Satan-worshipper. The Satanic preacher consigned the dead man's soul to Hell and the care of Satan. Rather than dismissing this story as an example of the stupidity and foolishness of some people, the preacher declared that this was proof that they were locked in mortal combat with Satan and that they must become even more devoted, unshakeable, true believer Pentecostals.

- I was recently watching an episode of the TV programÂ *Uncovered: Alien Files*, where, in just a few minutes, I got statements that assumed the truth of the Bermuda Triangle, Flight 19, Atlantis, alien spacecraft, the Roswell flying saucer crash, and the government coverup. That show is apophenia to the max.

  (Flight 19 was an incident where a squadron of fighter aircraft took off from a base in Florida and flew out over the Atlantic ocean and became disoriented and ran out of fuel and crashed into the sea and were lost. Then a flying boat that went to rescue them also crashed into the ocean and was lost. No traces of the lost aircraft or the flight crews were ever found. The UFO true believers insist that aliens kidnapped them. You can get more details from the Wikipedia page:Â http://en.wikipedia.org/wiki/Flight_19Â)

- Extremist right-wing politicians declare that the sad state of affairs in America is caused by "Liberals" and welfare queens sucking the money out of America. They never mention oil companies getting billions of dollars in tax breaks and ultra-cheap leases of government-owned offshore oil fields. And those policians argue that workers demanding decent wages is driving American companies overseas where cheap Chinese labor will work for less. (There is some truth to that, but making American workers live in poverty is not the answer. If all of the workers are broke, who will buy the products in the stores and make the economy go?) And of course "Big Government" is just messing everything up. (But don't expect those angry right-wingers to give up their lucrative farm subsidies or their fat defense contracts from Washington.)

- Extremist left-wing politicians see every billionaire in America (except George Soros and Warren Buffet) as monstrously selfish and evil criminals who are practically the spawn of Satan â heartless creeps who deliberately steal food out of the mouths of babies, and take away their medical care, and destroy America by outsourcing American jobs and giving them to cheap Chinese wage-slaves. (There is a shred of truth in this, but only a tiny shred. Sufferers from apophenia way over-blow it. There are actually good rich people who really want to do the right thing.)

Also see the Wikipedia page on apophenia:Â http://en.wikipedia.org/wiki/Apophenia.

- ***Ad Hominem*, Launch Personal Attacks On Opponents**

  When you can't refute factual arguments, kill the messenger. Have fun with character assassination. Attack the arguer and not the argument.Â *Ad Hominem*Â includes slurs, slander, libel, innuendo, baseless accusations, irrelevant criticism, groundless denunciations, andÂ name-calling.

For example,

- "Maybe that book you quoted makes a good case, but I heard that the author is a drunk."
- "The author is obviously biased. He is just a pill-pusher."
- "I can't believe what you say because you're just an imperfect human being."
- "You don't get it."
- "You're just arguing to prove to your colleagues that you can change my mind."
- "That came from a guy who has a bathtub in his basement."
- "He still lives in his mother's house."
- "You should learn to be more civil in your criticisms."
- "You are just prejudiced. Who did you vote for in the last election?"
- "You are just partisan."
- "You are on a crusade against [whatever], aren't you?"
- "You are an outsider."
- "You are immoral, unspiritual, and against God."
- "You are just trying to make us look bad."
- "You are just an immature complainer."
- "You are just feeling sorry for yourself."
- "You are just up tight. Don't be so up tight."
- "Don't take yourself so seriously."
- "You are ugly, and your wife is even uglier."
- "You are stupid."
- "You are crazy."
- "You don't know what you are talking about."
- "You have funny hair."
- "You have bad taste in music."
- "You have a bad attitude."
- "You are against religion."
- "You are just in a bad mood."
- "You are just on the rag."
- "You are carrying on like an old woman."
- "You should be on the '10 Worst-Dressed People' list."
- "It seems very unlikely that you wished that the Olympus E-3 camera was a better camera. You are only too happy to criticize the E-3."Â AndÂ dismiss criticism as invalid and "nit-picking":Â "Isn't all that excessive comparison and pixel-peeping going much too far for this forum?"
- And, when you refuse to believe the lies of a thieving con artist, he says,Â "You have some trust issues that you need to work on."
- When a black person or a long-haired old hippie argues that there is something wrong with a society that spends more money on jails and prisons than on schools, the neo-conservatives answer,Â "Oh, you're just worried about getting sent to prison yourself."

When people objected to major credit card companies paternalistically declaring that you could not pay for certain purchases with their credit cards, like medical marijuana, gambling chips, online pornography, or donations to Wikileaks, a defender of the credit card companies declared:

> Paul, you sound like one of those who believe you have the right to do what you want when you want and no mater who it hurts as long as it feels good to you. You probably voted for Obama as well wanting to redistribute the wealth so you can buy more porn, cigs and alcohol then cry foul and leave the card company and the paying world with your problem and by proud of yourself. What a jerk!!

== Petem
http://mtf.news.yahoo.com/mailto/?prop=finance&locale=us&url=http%3A%2F%2Ffinance.yahoo.com%2Fbanking-budg

A blogger described the behavior of Pentecostal recruiters who use theÂ *ad hominem*Â technique on people who disagree with them:

> ...when a Pentecostal cannot get you to agree with his memorized slogans or his procedure to manipulate you into doing and thinking in his way, he will dispense with you as a corrupt, or even as an evil person. Furthermore, if his mind is working even at a deficient level of efficiency, and part of his mind can see that you have a valid point, he will immediately recognize your "logic" as a threat and he is likely to attack you personally, and accuse you of ulterior motives for holding such "logic." However, he cannot see that his response is not a rational response to a respectable argument, but a change in the context â he changes the subject from the topic at hand to you personally, and proceeds with this attack.
>
> This, I assert, is the basis of FRAUD.
>
> It is based upon a faulty system whereby the person is not bound by the ground rules of a logical system. They are not engaging in a debate or discussion with you; they are trying to manipulate you. They might try to deceive you into thinking that they are open to discussion or a respectable debate, but they are not; they are being deceitful, crafty, irrational, and devious. Again, go back and read what I described above. If they talk to you and then proceed to attack you personally instead of focusing upon the subject at hand, they are playing a manipulation game and not entering into a serious discussion. When they accuse you of bitterness without listening to your arguments, they are hustling you; the same goes for any other number of epithets they use to dismiss you and attack you personally, like backslider, reprobate, rebellious, etc.
> http://ex-pentecostal.blogspot.com/

When Jesse Prince, a former leader of Scientology in Denmark, criticized the dishonest financial practices that he had seen in Scientology, a spokesman for Scientology answered,

> To make allegations about the church's finances now, Mr. Prince, who has not been a position of responsibility in the church for nearly 15 years, and who hasn't even worked for the church for more than 7 years, is, uh, very specious. He's not in any position to know.
> ARON MASON, in an interview, reprinted on the Rick Ross website
> http://www.rickross.com/reference/scientology/personal1.htmÂ [Dead Link]

Note that Mason did not actually deny or even answer Prince's statements about Scientology's history of financial dishonesty â Mason just implied that Prince didn't know what he was talking about because Prince couldn't know what theÂ *current*Â facts were. That's a type ofÂ *Ad Hominem*Â attack. (It's also bad logic:Â "If you can't prove that I stole money this week, then what I might have stolen last year doesn't count."Â It's also the propaganda trick ofÂ Creating A DiversionÂ â divert attention to a different time.)

SometimesÂ *ad hominem*Â attacks can be quite subtle. When the Alaska oil pipeline was pierced by a bullet, 275,000 gallons of oil spilled out because the operators of the pipeline took several days to stop the leak. As you can imagine, some Alaskan citizens complained. Aleyesca, the pipeline operator, claimed that it had handled the accident in a competent manner, and thatÂ "The criticism came from a small group of critics who always criticize everything that we do."[22]
That is a kind ofÂ *ad hominem*Â attack on critics.
The oil company did not actually respond to the charges and accusations of incompetence. They did not explain why it took them several days to plug a single bullet hole. They merely attacked their critics, trying to assert that the criticism was invalid because it came from a small group of vocal critics.
But the truth is: It does not matter whether the criticism comes from a small group of diligent watch-dog citizens or a large environmental protection agency â valid criticism is valid criticism, and incompetence is incompetence.

Â Â Â You can use theÂ *Ad Hominem*Â technique to defend Alcoholics Anonymous like this:
If a critic says something like,
"We have a lot of good, valid, scientific and medical studies that show that the Twelve Steps do not cause people to quit drinking or stay sober,"
then you should respond with:

- "Oh yeh? Well I hear that you areÂ just an atheistÂ and a liar, and crazy."
- "You are just in it for the money."
- "You are insane."
- "You are in denial."
- "You aren't an alcoholic, so you can't possibly know what you are talking about."
- "And if you are an alcoholic, then you are just aÂ *dry drunk*."
- "You haven't been a member long enough to know anything."
- "You just don't want to get sober."
- "You are just unspiritual and don't want toÂ *Work The Steps*Â yourself."
- "You are against spiritual principles."
- "You are against God."
- "You hate God."
- "You criticizing A.A. because you just want to drink."
- "That's just your selfishness talking."
- "You don't know what you are talking about because you don'tÂ *Work The Steps*."
- "You have a grudge against A.A., that's all..."
- "Right now your mind is insane, and you can't tell the truth from the falsehood."
- "You are just looking for an excuse to drink."
- "You are angry."
- "You have a 'resentment'."
- "You don't understand A.A.."
- "You don't understand A.A. spirituality because you are an atheist."
- "You don't understand A.A. spirituality because you are a Christian."
- "You don't understand A.A. spirituality because you aren't a member of A.A.."
- "You are too dishonest to understand A.A. spirituality."
- "You just don't get it."
- "You think you know everything."
- "We don't have to listen to you because you don't have any credentials â you aren't a doctor or a professor. You don't know what you are talking about."
- "We don't have to listen to you â you are just a doctor. A.A. knows much more than all of the doctors and priests and ministers and psychiatrists that we went to for so many

years."Â (See theÂ *Big Book*, 3rd Edition,Â page 473.)

- "You just want to sell pills."
- "You think you are smarter than other alcoholics."
- "You are diseased andÂ *in denial*Â if you criticize Alcoholics Anonymous."
- "You just don't want to quit drinking."
- "Screw you! What do you know about sobriety?"
- "You aren't qualified to have an opinion of A.A. yet, because you don't have enough years of sobriety." (And if you do have enough years, then "You are just aÂ *Bleeding Deacon*.")
- "your obviously not equiped to give any advice." (*sic., sp.*)
- "Those critics are often pushing inaccurate information or unintentionally pushing misinformation."
- "You are angry, so we don't have to listen to you."
- "Somebody injured you; that's why you spend so much time criticizing Alcoholics Anonymous."
- "Your posts and your website lead me to wonder why you spend so much energy on this. Don't you have anything better to do than run down a group that has helped many, many people?."Â *(Hint: That line was not about me; it was aimed at Rebecca Fransway in the newsgroupÂ* ***alt.recovery.from-12-steps****, Feb. 8, 2001.)*
- "You are just obsessed with proving Alcoholics Anonymous wrong."
- "You are a chronic slipper who could not grasp AA at all."
- "You will relapse soon."
- "You will fall off of the wagon soon."
- "Nobody can have as many resentments as you have and not drink again."
- "Are you still drunk? Anybody with such a chip on their shoulder will go back out again."
- "You are one of the people who couldn't work the program."
- "You are not really committed to sobriety."
- "Your arguments are more and more like rants. Increasingly technicoloured ones."
- "You just like to hear yourself talk."
- "You don't care how many alcoholics you kill by saying that A.A. doesn't work."
- "You are doing a great disservice to those seeking sobriety."
- "You are doing great harm to alcoholics."
- "You are causing alcoholics to relapse."
- "You are hurting alcoholics by driving them away from Alcoholics Anonymous."
- "Have you saved any lives lately, or do you just sit here and bitch about AA?"
- "That orange guy is getting really REALLY boring."
- "Your anger towards A.A. can't be doing you any good."
- "You spent a lot of time trying to figure out why AA didn't work for you. Which is really just a way of justifying your drinking."
- "You've only paused your drinking, and never genuinely stopped."
- "You must be an agnostic or an atheist if you object toÂ the wonderful spirituality of Alcoholics Anonymous."
- "And I'll bet that youÂ molest little girlsÂ when the moon gets full, too."
- "Somebody must have hurt you. That's why you criticize A.A."

Here is another example of anÂ *ad hominem*. When somebody using the name "King EZ" posted criticism of A.A. to a blog, an A.A. defender counter-attacked with:

> King ez can't spell worth a damn, and places punctuation at random between words so his writing will look like â books he sees; at barnes&noble. Though this % makes his posts hard to read, make no (mistake), he is a genius, both his Son and {Mother} think â so.
> http://kingez.com/blog/2008/11/11/aa-become-the-addiction/

That attack uses bothÂ *ad hominem*Â and sarcasm. But there was not a word of defense of A.A., or any facts relating to the subject of "addiction to A.A.". Just complaints about imaginary errors. And the funny thing is, I couldn't find any incorrect punctuation, and only a few misspellings, in the original post. But who needs facts when you are defending a cult?

And a cute variation on that theme is:
"Oh you poor thing. I'm so sorry to hear that the 12-Steppers hurt you so bad. You are obviously in need of some counselling. Just call 1-234-567-8901 and we'll fix you right up."
In other words,
"Yep, you're insane, so us counselors who push 12-Step meetings on every patient we get can happily disregard everything that you have said about the inefficacy of 12-Step 'treatment'."

- **Engage in Name Calling**
  Name calling is a kind ofÂ *ad hominem*Â attack, but it has a special power and flavor all its own.

"If you can't answer a man's argument, all is not lost; you can still call him vile names."
â Elbert Hubbard

This technique is simple and obvious: you just call your opponents names, preferably really derogatory and slanderous names, like this:

- *"You are an atheist, a liar, a dummy, a drunkard, etc..."*
- *"You are a sexist, a racist, a fascist... not politically correct..."*
- *"You are an elitist, effete, intellectual..."*
- *"You are a Communist, or a socialist, or a Jew, or a Nazi..."*
- *"You are a terrorist..."*
- If someone wants to leave a few old trees standing in the forest, call him a "tree-hugger".
- If someone talks about the inequality of the justice system, where poor blacks get the death sentences, but rich people who can afford a dream team of expensive lawyers get off, call him "a bleeding-heart Liberal."
- When France and Germany declare that they do not wish to participate in unprovoked "pre-emptive warfare", dismiss them as "the old Europe".
- A blogger who insistsÂ that people are not going to wastefully use up the world's remaining oil supply declared on 10 October 2005, when the price of oil declined temporarily:
  "I don't know how low it [the price of oil] will go, but I do know that the frikkin' lunatics over atÂ clusterfucknationÂ are foamin' at the mouth about this. 'Its just temporary. We're still all gonna die.' Kuntsler says it is a 'Make-believe nation'. They just can't take it that the apocalypse is not nigh."

- If someone criticizes Alcoholics Anonymous, answer:
  "People who attack A.A. are just stupid A.A.-bashers. You don't have to pay any attention to what A.A.-bashers say because they are just stupid A.A.-bashers."

  "You're just a dry drunk with a resentment..."

  And when sober old-timers complain about A.A. misbehavior, sayÂ *"You're just a bleeding deacon..."*

Notice that name-calling allows you to actually define your opponent, based on just a few facts, or even on no facts whatsoever.

Also notice the implication that it is okay to kill people if you call them the right name, like "Communist", or "terrorist".

- **Apply Labels**

Apply labels to things or people â especially derogatory labels. This is very similar toÂ *name-calling*.

- If someone talks about universal health care, scream "That's Socialism!"
- If someone talks about peace and freedom and justice, complain, "That's a Liberal agenda."

- **Delegitimize One's Opponent**

Delegitimize one's opponent so as to avoid addressing the substance of his argument. This is another kind ofÂ *ad hominem*attack. The goal is to make it impossible for opponents to be heard respectfully in the debate.

- *"Those protesters are just a bunch of unruly kids."*
- *"Those protesters are just a bunch of unemployed people."*
- *"Those protesters are just a bunch of old people."*
- *"Those protesters are just a vocal minority."*
- *"They are just on a crusade against [whatever]."*
- *"They are all just Socialists."*
- *"They are all just Communists."*
- *"Those people are just religious fanatics."*
- *"They are all cult members."*
- *"They are skinheads."*
- *"They are Tea Party members."*

Sen. Joe McCarthy (R-WI, 1947-1957) accused Gen. George C. Marshall and Secretary of State Dean Acheson of being part of "a [Communist] conspiracy so immense as to dwarf any previous such venture in the history of man. A conspiracy of infamy so bleak that, when it is finally exposed, its principles shall be forever deserving of the maledictions of all liberal men." If a politician can convince the audience that his opponent is a sleazy Commie lying traitor, then it won't matter what the other guy says after that...

When ABC News wroteÂ an article about the Democrat's targets for investigationÂ (Nov. 8, 2006), one Republican apologist responded:

> "It causes me concern that Nancy Pelosi has stated that Halliburton, CIA, and tobacco companies are early targets for them. They need to get on with real business. Voters wanted change. Not adults acting like children."

So, Republicans investigating President Clinton's sex life for two years was okay, but Democrats investigating major crimes like immense corruption and war profiteering, secret CIA kidnappings and "renditioning" to foreign torture prisons, and tobacco companies addicting our children to a killer drug is "adults acting like children."

When the Olympic torch was being carried through London (4 April 2008), protestors denounced China's occupation of Tibet and human rights abuses. Protestors repeatedly clashed with the Chinese security guards and British police. Then a Chinese official criticized the protesters:

> A spokesman for the torch relay's passage around the world, Qu Yingpu, putting a brave face on the protests, said Chinese officials were grateful to the British police "for their efforts to keep order."
> He added, "This is not the right time, the right platform, for any people to voice their political views".Â New York Times, 6 April 2008

As if we should suddenly stop caring about freedom and human rights abuses just because someone declares a sporting event?
And who says that sporting events cannot be the site of a protest about human rights violations?
(And what good did it do to let Adolf Hitler host the 1936 Berlin Olympics without protest?)

When a photography web site (DPreview.com) gave a well-deserved low rating to an Olympus E-510 digital SLR camera, one Olympus fan retaliated with,Â "DPReview can say what ever they want when classifying cameras. I believe they are just bowing to Canon's marketing strong arm."

- As if nobody could possibly criticize a defective, inferior, crippled Olympus camera unless he was paid to do it, and threatened with loss of advertising revenue.
- And notice that the speaker was also usingÂ the propaganda technique of providing feelings or beliefsÂ instead of any actual evidence. The speaker said that heÂ *believed*Â that the rating was unjust.
- Also notice the propaganda trick of "demonization of the enemy". Canon is allegedly a monster that causes people to tell lies, rather than just a company that makes better cameras.

When I complained about how inferior the Olympus E-510 was in so many ways, another Olympus fan-boy responded with the same "Delegitimize One's Opponent" propaganda trick, implying that I was stupid for expecting it to be a good camera:Â "What did you expect in that price bracket? [$1000] You don't get all of the features that you want for that price."Â As if I'm not supposed to expect to get a good camera for $1000.

A.A. members use thisÂ *Delegitimize One's Opponent*Â technique too. When people start discussing the failings and shortcomings of Alcoholics Anonymous and its 12-Step program, some true believer A.A. member often sanctimoniously declares,Â "I am not much of an AA gossip. I'm here to save my ass."Â
That of course also has nice touches of "spiritual one-upmanship":Â *"People who tell the truth about the bad aspects of A.A. are just 'gossips', but I'm better than that."*

Deflect Criticism and Blame By Delegitimizing It

As in, "That's just campaign talk." (So ignore it.)

After the Wall Street melt-down, we heard.

- "I don't think that this is the time to be pointing fingers."
- "We don't want to get into the blame game."

â which just means,

- "Let's not talk about who screwed up big time."
- "Let's not prosecute the criminals."

You heard a lot of that kind of talk in the aftermath of Hurricane Katrina, when nobody wanted to take the blame for the FEMA incompetence. You also hear it in relation to the quagmire in Iraq.

Recently, when someoneÂ listed a dozen things that Apple iOS had copied from Android, someone else responded:

> Oh for the love of God , can we please NOT turn this into another boring Android Vs iOS thread , it's getting so boring with the same people making the same comments over and over again.Â
> Posted by DarkSeptember, June 18, 2012 1:46 PM (PDT)

Well, that's one way to stop criticism of Apple without actually answering the criticism.

On May 18, 2007, former President Jimmy Carter criticized the Bush administration, saying that President George W. Bush's administration is "the worst in history" when it comes to international relations.

Carter, who won a Nobel Peace Prize in 2002, criticized Bush:

> "We now have endorsed the concept of pre-emptive war where we go to war with another nation militarily, even though our own security is not directly threatened, if we want to change the regime there or if we fear that some time in the future our security might be endangered. But that's been a radical departure from all previous administration policies."

Carter's harshest assessment was of the White House's Office of Faith-Based and Community Initiatives, which helped religious charities receive $2.15 billion in federal grants in fiscal year 2005 alone:

> "The policy from the White House has been to allocate funds to religious institutions, even those that channel those funds exclusively to their own particular group of believers in a particular religion. Those things in my opinion are quite

- disturbing. As a traditional Baptist, I've always believed in separation of church and state and honored that premise when I was president, and so have all other presidents, I might say, except this one."

Republican National Committee spokeswoman Amber Wilkerson questioned why Carter, who teaches Sunday School in his hometown of Plains, Georgia, would attack Bush:

> "Apparently, Sunday mornings in Plains for former President Carter includes hurling reckless accusations at your fellow man. It's hard to take a lecture on foreign policy seriously from President Carter considering he's the same person who challenged Ronald Reagan's strategy for the Cold War."

Notice that she did not actually answer any of President Carter's criticisms of Bush's policies and actions. She just attacked the source of the criticism, and tried to imply that Carter had no legitimate grounds for criticizing Bush, and therefore the criticism was invalid.

And of course Ms. Wilkerson also usedÂ theÂ *ad hominem*Â technique, personally attacking President Carter, as well as completelyÂ reversing reality. She accused Carter ofÂ "hurling reckless accusations at your fellow man"Â when she was actually the one who was doing that. Carter did not "hurl reckless accusations"; Carter spoke about the American tradition of never attacking first and never deliberately starting wars and never being the aggressor, and the American tradition of separation of church and state. And Carter spoke about how the current Bush administration had violated those policies. But she didn't want to talk about that, so she attacked President Carter personally, and said that it's hard to take him seriously.

- **Delegitimize Criticism and Rebuttal in Advance**
  Devalue, delegitimize, and reject responses in advance of them happening.

For instance:

1. "Oh, don't mention Prof. Falken's study. Everybody knows he's nuts." (Slander.)
2. "I don't want to start an argument, but..." (So don't contradict the nonsense that I'm saying.)

Bill Wilson used this technique too:

> Some will become quite annoyed if there is talk about immorality, let alone sin. But all who are in the least reasonable will agree upon one point: that there is plenty wrong with us alcoholics...
> *Twelve Steps and Twelve Traditions*, William Wilson, pages 48, 49.

So if you don't want to go along withÂ Bill Wilson's hatredÂ of those disgusting sinful alcoholics, then you are being "unreasonable".

Bill Wilson did it again here, in a different way, as he taught people how to conduct sÃ©ances and

channel God and get messages and work orders and power from God:

> Â Â Â ... Here we ask God for inspiration, an intuitive thought or a decision. Â ... Â We are often surprised how the right answers come after we have tried this for a while. What used to be the hunch or the occasional inspiration becomes a working part of the mind. Being still inexperienced and having just made conscious contact with God, it is not probable that we are going to be inspired at all times.Â We might pay for this presumption in all sorts of absurd actions and ideas.Â Nevertheless, we find that our thinking will, as time passes, be more and more on the plane of inspiration.
> TheÂ *Big Book*, 3rd edition, William G. Wilson, pages 86 to 87.

Bill Wilson declared that if somebody started acting crazy from doing Step 11 because he was convinced that God was telling him to do insane things, that wasn't the fault of Bill's occult practices, or of "God" â that was just a beginner who had not learned how to be a good psychic yet. So don't criticize Bill's superstitious practices; there is nothing wrong with them. It's just the beginners' fault.

- **Spurious Delegitimization of Evidence or Criticism**
  Attempt to delegitimize annoying and inconvenient little facts and evidence by a variety of techniques like bad logic, slurs, and innuendo. Similarly, dismiss criticism as invalid without actually answering it.

  For instance:

  1. "That report has been discredited."Â (Passive voice. Discredited by whom? When? Where?)
  2. "That report is old."Â (Dismiss by Antiquity, reject by age.)
  3. "That information is considered invalid."Â (Passive voice, nobody there. Considered invalid by whom?)
  4. "That's the tenth time you've mentioned that. Will you get off it?"Â (Repetion doesn't make information become untrue.)
  5. "Everybody considers that book worthless."Â (Appeal toÂ "everybody knows".)
  6. "You are criticising the Church's coverups of child-molesting priests because you are bigoted and prejudiced and just against the Church."Â (Use ofÂ *ad hominem*.)
  7. "You are criticizing Israel's mistreatment of the Palestinian people because you are anti-Semitic and racist."Â (Use ofÂ *ad hominem*.)
  8. "Your criticism is hurting the feelings of a billion believers."Â (Use ofÂ *ad hominem*.)
  9. "You criticise Catholics but you wouldn't do the same to religion X..."Â (Use ofÂ *ad hominem*.)
  10. "You criticise Islam but you wouldn't do the same to Christians or Jews..."Â (Use ofÂ *ad hominem*.)
  11. "I'm offended by your accusations."Â (Use of theÂ *Drama Queen Ploy*.)
  12. "Quit trying to stir up trouble."Â (Use ofÂ *SpuriousÂ Delegitimization of Opponent*.)

- **Spurious Rejection of a Question**
  Use invalid or spurious reasons for rejecting a question that you don't wish to answer.

  For example:

- "That question was a trap!"
- "That question is unfair!"
- "That's none of your business!"
- "You can't ask about the A.A. success rate because A.A. is not a treatment program and A.A. doesn't keep records."

- **Demonize the Enemy**
  Make one's enemy into the Devil incarnate. Tell endless stories how evil and monstrous the enemy is.

  For example, as the Bush administration lied us into the War in Iraq, we were told that Saddam Hussein was "the Hitler of the Middle East", and that he used chemical weapons on his enemies (which the USA actually gave him to use on the Iranians), and that his troops were so heartless and brutal that they threw Kuwaiti babies out of incubators and onto the floor as they stole the incubators. The latter story was actually a lie told by the daughter of the Kuwaiti ambassador to incite Americans to go to war on behalf of Kuwait.

  In A.A. circles, those people who criticize Alcoholics Anonymous are demonized with accusations that they don't careÂ how many alcoholics they killÂ (by telling the truth and discouraging people from believing in A.A.).

- **Stroking Ploys**
  This is just the opposite of name-calling â call somebody good things, like: "a patriot, a real American, a great Christian, a real credit to his race, an example to us all, an inspiration."

  A late-night TV infomercial that advertizes an exercise machine introduces the machine's designer as:Â "Here is Joe Blow, one of the hottest men in Hollywood because he gives people what they want â crisp, lean, healthy bodies."

  A radio advertisement for vitamins says, "Dr. Sawbones, a recognized authority on blah-blah..." Recognized by whom? We got no actual evidence that Dr. Sawbones knows anything.

  The true-believer Buchmanite Theophil Spoerri gave us examples of both denigration and stroking ploys in his biased biography of Frank Buchman: Dr. John Hibben, President of Princeton University, was calledÂ *"a well-meaning but weak man"*,and Spoerri said,Â *"fearing for the good name of the university, [he] allowed himself to be stampeded"*,Â when President Hibben banished Frank Buchman and his cult from Princeton. On the other hand, Spoerri called the lady Anneliese von Cramon-Prittwitz, who converted to Buchmanism,Â *"a distinguished and intelligent woman."*Â (*Dynamic Out Of Silence: Frank Buchman's Relevance Today*, Theophil Spoerri, pages 77 and 114, respectively.)

  Bill Wilson gave us an example of this technique inÂ his pro-smoking storyÂ on page 135 of theÂ *Big Book*. The chain-smoking A.A. member who threw a drunken screaming temper tantrum to avoid quitting smoking was calledÂ ***"our friend"***Â andÂ ***"a most effective member of Alcoholics Anonymous"***, while his clean and sober wife who was pleading with him to quit killing himself with cigarettes was calledÂ *"one of those persons"*Â â you know, one of thoseÂ intolerantÂ puritanicalÂ killjoy nagging wivesÂ who are always trying to keep us good old boys from having fun.

Offloading Blame

The propagandist never accepts blame for his mistakes or crimes. Somebody or something else is always to blame. This is especially true of politicians and cult leaders who haveÂ Narcissistic Personality Disorder.

"Now look at what you made me do."
"He started it."
"He did it first."
"It's all because of them."

The following tricks are various ways to offload blame.

1. **Blame A Scapegoat**
   This is a well-known trick: find a scapegoat to blame for all of your group's problems.

   Hitler was of course infamous for blaming the Jews for all of Germany's economic problems after World War One. He even claimed thatÂ a Jewish conspiracyÂ had caused World War One. And Hitler insisted that the Germans would be very happy after the Jews were eliminated.

2. **Blame The Victim**
   If a crime is committed against someone, blame the victim instead of the perpetrator. When something goes wrong, blame the victim rather than the cause of the problem.

   Trial lawyers love to use this one:Â "That bastard deserved to get murdered. He had it coming. His killer did the world a favor."

   Or,Â "She deserved to get raped. She was asking for it. Look at the sexy way she dressed.Â Everybody knewÂ that she was a loose woman."

   That is part of the classic "Nuts and Sluts" defense â claim that the woman who got raped is crazy and a whore (so presumably, it doesn't matter that she claims that she was raped).

   "You were just gullible and asking for it..."

   After somebody gets robbed, tell him,Â "You shouldn't tempt people."

   Another example from politics:Â "John Kerry deserves to get attacked with lies and smears committed by theÂ *'Swift Boat Veterans for Truth'*. He brought it on himself by daring to mention his good war record."

   Sometimes this technique is used very subtley. Get a load of what a merchant says when his company goofs and ships the wrong part to a customer:
   "**RMA #: 106260 - Wrong Item Received**"
   Note â wrong item received by customer, not wrong part shipped by merchant. That stupid

customer went and received the wrong part.

Bill Wilson and A.A. are masters of this stunt. Bill Wilson wrote these lies in theÂ *Big Book*, and they are read out loud at the start of every A.A. meeting:

> RARELY HAVE we seen a person fail who has thoroughly followed our path. Those who do not recover are people who cannot or will not completely give themselves to this simple program, usually men and women who are constitutionally incapable of being honest with themselves. There are such unfortunates. They are not at fault; they seem to have been born that way. They are naturally incapable of grasping and developing a manner of living which demands rigorous honesty. Their chances are less than average. There are those, too, who suffer from grave emotional and mental disorders, but many of them do recover if they have the capacity to be honest.
> ...
> At some of these [steps] we balked. We thought we could find an easier, softer way. But we could not.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, William G. Wilson, Chapter 5, "How It Works", page 58.

If the hocus-pocus voodoo-medicine cult religionÂ program of Alcoholics Anonymous doesn't work, and doesn't really help you to quit drinking, then it's all your own fault because you are so bad, so dishonest and lazy, and selfish and manipulative, always seeking an easier, softer way, and you were born that way:

"The program doesn't fail people; people fail the program."

3. **Blame Somebody Else (Anybody Else)**
   This is the more general version ofÂ *Blaming A Scapegoat*.
   - ◊ You can blame other people for your problems â Â "They are all against me. They have been sabotaging me at every turn."
   - ◊ You can blame subordinates for your poor job performance:Â "No one in the Intelligence Community urged me to step back from my tough talk about a nuclear Iran posing a danger of World War Three."

   A popular variation on this technique is,Â *"Do Whatever You Wish To Do, And Blame Somebody Else For It"*.

   - ◊ "The reason why I must create and enforce such draconian rules and regulations is because some people cause problems."
   - ◊ "We wouldn't need to bug your telephone and spy on you if it wasn't for the terrorists..."
   - ◊ "Now look at what you made me do."

4. **Blame A Non-Factor**
   Blame something that isn't really the cause of the problem. (It's a kind of diversion tactic, diverting attention from what is really wrong.)

- Homer Simpson, refusing a beer: "Can I just have a glass of water?"
  Moe the Bartender: "Water?! That stuff killed my Grandmother."

  George W. Bush recently gave us a good example of this technique. While touring in Biloxi, Mississippi, in early May 2006, Bush declared that he would like Congress to "give me a capacity to raise CAFE standards." (CAFE is "corporate average fuel economy" â the miles-per-gallon standards for new cars.) Well gee, it seems like Bush would have raised the fuel efficiency standards long ago, if it weren't for that nasty Republican-controlled Congress tying his hands and keeping him from doing the right thing.

  ButÂ Bush always had the power to change the fuel standards. Ronald Reagan didn't need the approval of Congress to change the standards (downward). Certainly Congress was under the impression that the President could require cars to get better mileage in the 1990s, since it went out of its way, using annual spending legislation, to prevent President Clinton from doing so. But now that the public is noticing that Bush has done nothing to make the car manufacturers build in better fuel efficiency, Bush claims that he needs Congress to allow him to do his job.

  Likewise, A.A. boosters try to explain away the immense A.A. failure rate by saying,Â "Well, you can't consider those people who drop out of A.A. without working the Twelve Steps to be failures of Alcoholics Anonymous. They don't count. You can't blame A.A. if they won't work the Steps. And you can't blame A.A. for those drunks who didn'tÂ *"work a strong program"*. They don't count."

  Actually, they do count. No matter why people quit A.A. without quitting drinking, A.A. still failed to get those alcoholics sober. They are still a part of the A.A. failure rate. Either the A.A. program works to make alcoholics quit drinking, or it doesn't.

  Something that is so repulsive that it causes 95% of the newcomers drop out within a year cannot claim that it is a great success, or would be a great success, if only people would follow orders.

  And what about all of the people who spent years in A.A., working the Steps and "working a strong program", and who regularly relapsed anyway? The speaker doesn't mention them. He tries to pretend that they don't exist â he tries to claim that all of the A.A. failures and dropouts are solely due to people not working the program correctly.

  (And then they use a self-referential definition of "correctly". Someone who is "working the program correctly" is abstaining from drinking. So by definition, the program "always works if people work it correctly".)

- **Claim That There Is A Panacea**
  Claim that there is, or that you have, a magical cure for all of your listeners' problems.

  Adolf Hitler told the German people that he had a simple sure-fire cure for Germany's economic woes: National Socialism, which really meant fascism, which included getting rid of the Jews and Leftists, and having Germany run by "one strong leader", and getting revenge on Britain and France.... We all know how well that worked out.

  Bill Wilson declared that the relabeled Oxford Group cult religion (which he called "the Alcoholics Anonymous program") wasÂ the answer toÂ *all*Â of an alcoholic's problems:

"Quite as important was the discovery that spiritual principles would solve all my problems."
TheÂ *Big Book*, 3rd edition, William G. Wilson, Chapter 3,Â *More About Alcoholism*, page 42.

- **Claim That There Is A Panmalefic**
  AÂ *panmalefic*Â is just the opposite of a panacea. A panmalefic is supposedly the one big bad cause of all of your problems.

  I just made that word up. A panmalefic is the exact opposite of a panacea. Where a panacea is one simple cure for all of your problems, a panmalefic is the one simple cause of all of your problems.

  The prefix "pan" means "over all" or "entirely covers" or "everywhere", as in pan-American, pandemic, and panacea.Â
  The word "malefic" is in the dictionary, and means "causes evil, bad things, ills, harm, or diseases".Â Put them together, and you have a word that means the cause of all of the world's problems.

  Simple-minded people like simple answers, so they love to hear that everything can be explained in terms of panmalefics and panaceas.

  Historically, plenty of rabble-rousers have used the panmalefic idea to blame one scapegoat or another for everything:

  - "Jews are the cause of all of our problems and are a great threat to our children and our nation and we must find all of the hidden Jews and destroy them before they do great harm to us."Â [Paraphrasing the Nazis in 1932.]
  - "Communists are the cause of all of our problems and are a great threat to our children and our nation and we must find all of the hidden communists and destroy them before they do great harm to us."Â [Paraphrasing Senator Joseph McCarthy (R-MN) in 1952.]
  - "Alcoholics are the cause of all of our problems and are a great threat to our children and our nation and we must find all of the hidden alcoholics and destroy them before they do great harm to us."Â [ParaphrasingÂ *The Secret History of Alcoholism: The Story of Famous Alcoholics and Their Destructive Behavior*, by James Graham, and alsoÂ Doug Thorburn's books.]

- **Flattery**
  Get someone to accept the bulls**t that you are shovelling by flattering and praising them. This is an unabashed appeal to egotism.

  For example, a television commercial tells housewives thatÂ "You are so wonderful â you juggle six jobs at once, take care of three kids, and still manage to look good â so that's why you should buy our junk. A sophisticated person like yourself would settle for nothing less..."

  Another commercial declares,Â "Your life has more than one dimension. That's why you wouldn't consider playing [golf] with anything but..."

  And another commercial says,Â "There is no mass-produced human being. We know that you are

unique, with special tastes."(That's why you should buy the same mass-produced junk that we sell to everybody else.)

The advertising on a box of clove cigarettes says,Â "Their brown wrapping is uniquely created to suit your distinct personality."

- My distinct personality? What is so distinct about being stupid enough to get addicted to nicotine and burn out your lungs?
- And that brown wrapping isn't unique. They crank out those clove cigarettes by the millions, and every last one of them has the same brown wrapping, no matter whether they are being made for me or for the teenage kids down the street.

Alcoholics Anonymous uses this stunt too. If you believe A.A. propaganda, you willÂ *"Come To Believe"*Â thatÂ only unto you has the Lord given the giftÂ of being able to heal other alcoholics â you are that special in the eyes of the Lord â you have been chosen by God:

> God in His wisdom has selected a group of men to be the purveyors of His goodness. In selecting them through whom to bring about this phenomenon He went not to the proud, the mighty, the famous or the brilliant. He went to the humble, to the sick, to the unfortunate â he went to the drunkard, the so-called weakling of the world. Well might He have said to us:
>
> > *Into your weak and feeble hands I have entrusted a Power beyond estimate. To you has been given that which has been denied the most learned of your fellows. Not to scientists or statesmen, not to wives or mothers, not even to my priests and ministers have I given this gift of healing other alcoholics, which I entrust to you.*
>
> Judge John T., speaking at the 4th Anniversary of the Chicago Group October 5, 1943.

Well, God might have said that to them, but God didn't really say that to them, now did He? Nowhere in the Bible, The Talmud, the Koran, the Bhagavad-Gita, the Sutras, the Vedas, the Upanishads, the Dead Sea Scrolls, or any other major religion's scriptures does it say that the alcoholics are God's Chosen People, entrusted with "a Power beyond estimate" â "the only cure" to alcoholism.

- **Proof by Anecdote**

*Proof by Anecdote*Â is a stunt where you make some grand generalization, and then you tell one or more stories that appear to support your generalization, and then you conclude that the point is proven. (You can ignore all of the other stories that disprove your point.)

For example, President Ronald Reagan gave a speech on TV where he told of Sandinista soldiers tying a priest to a tree and beating him. Reagan concluded that this story was proof enough of the evils of the Sandinistas to justify the USA waging an undeclared, illegal, war against Nicaragua for several years, the war that ended with the treasonous Iran-ContraÂ *Arms-for-Hostages*Â and the Oliver-North-ContraÂ *Cocaine-for-Guns*Â fiascoes.Â
(President Reagan didn't bother to give any TV speeches complaining about how many Nicaraguan civilians were killed by the Contras, or how many American inner-city black kids were killed by the

Contras' cocaine. Just a few anecdotal stories of Sandinista soldiers' misbehavior was all of the evidence that Reagan needed or wanted...)

ThisÂ *Proof-by-Anecdote*Â technique is heavily used in advertising:

- "Diets never worked for Susan, but then she discovered the Shrivel-Up ProgramÂ® and lost 50 pounds."
- "My wife and I needed a new dishwasher. Thanks to you we received a $1900 Viking dishwasher for free!"
- "I made $8000 in my first week of trading."
- "He made more money on that trade than he made in a week on his job. And what computer program did he use to trade stocks? The XYZ program from the stock market genius Joe Blow."
- A radio commercial that advertises a service that will deal with the IRS for you says, "I owed the IRS $125,000, and they settled for $22,000." But of course there is no evidence that you will get that lucky.

The plural of "anecdote" is not "evidence".

Lots of organizations like to use poster children to "prove" their point. The homophobic fundamentalist Christians show off one guy who says that he got "converted" from homosexuality or bi-sexuality to straight heterosexuality, and then they claim that their poster-child example proves that all gays are merely "choosing a gay lifestyle", and that they can change if they want to.

Likewise, the entire back two thirds of the Alcoholics AnonymousÂ *Big Book*, with all of its autobiographical stories, is just one long demonstration of theÂ *Proof by Anecdote*Â propaganda technique. Bill Wilson just printed a collection of people's stories, all of which claimed that A.A. had helped them in some great way, and then Bill concluded that the stories proved all kinds of things like:

- that the A.A. program and the Twelve Steps really work for quitting drinking,
- that the A.A. program is theÂ *only*Â thing that works.
- that prayer really works, and that God could, and would, if they asked Him to, answer their prayers, and remove all of their "defects of character", and make them quit drinking.
- that people mustÂ *completely*Â surrender andÂ *completely*Â give themselves to the "simple" A.A. program,
- that if you pray and meditate enough, you can hear God or some other Higher Power talking to you in your head,
- that you can get wonderful results, and recover from alcoholism, by praying to just any old God or "Higher Power", and your "Higher Power" can be anything you wish it to be, including the A.A. group itself.
- that God is actually eager to start doing favors for you and granting all of your wishes, just as soon as you start doing Bill Wilson's Twelve Steps.

â None of which were actually proven, or even demonstrated by a fair sampling of cases. It is obvious that the stories are just another example of cherry-picking â Bill printed only those stories that said what he wanted people to believe, and rejected everything else. A.A. members who didn't get sober did not get to put their stories in theÂ *Big Book*. (And "cherry-picking" is actually just another name forÂ *Observational Selection*.)

This is another example ofÂ *Proof by Anecdote*, used in a slightly different way:

> Step Nine has reclaimed many broken friendships; it has brought peace and

> happiness to the lives of those who suffered because of our alcoholism. Its great rehabilitative power has also affected the lives of thousands of alcoholics through the spiritual awakening they have experienced. Because of this Step, these alcoholics have recovered their self-respect, they have taken on courage and confidence, and they have assumed responsibility. They sense God's presence, and with His presence comes the realization that their lives are again becoming manageable.
> *The Little Red Book*, Hazelden, page 89.

Gee, that sounds pretty fantastic. I guess we should all start doing the Twelve Steps immediately, so that we can get theÂ *Big Experience*Â too, right?

Well, it sounds great, but only until we remember that A.A. claims to be keeping millions of alcoholics sober. If only "thousands" out of millions get the wonderful "spiritual awakening" and "sense God's presence", then the odds of gettingÂ *"The Big Spiritual Experience"*Â are really only one in a thousand.

Now that doesn't sound so awe-inspiring, does it?

Note just how carefully that deceptive, double-talking Hazelden propaganda was constructed. If we read it critically, we will see thatÂ *maybe*Â a few thousand people â out of millions of claimed A.A. members â have benefited in some way from the Twelve Steps that Bill Wilson wrote. But, without hesitation or qualifications, Hazelden says that the guilt-inducing Twelve Steps will give people:

- self-respect
- courage
- confidence
- responsibility
- awareness of the presence of God
- and manageable lives

without offering us any actual evidence or proof of their unfounded grandiose claims that the 12-Step program has "great rehabilitative power."

Which brings up the next item:Â **Double-talk**.

- **Double-talk**
  Confuse your listeners with contradictory, illogical, or incomprehensible jabber:

  - The pigs in George Orwell'sÂ *Animal Farm*Â wrote:Â "All animals are equal but some animals are more equal than others."

  - An Oxford Group leader bragged about the accomplishments of the Groups as,

    > "Men are becoming freed from acquisitive greed into stewardship of property; they are becoming freed from the stagnation of the instinct of curiosity into a new enlightened stewardship of the mind."
    > *Oxford and the Groups*, Rev. G. F. Allen,Â *et al.*, page 40.

- So, apparently, the greedy men get to keep their property, but not their curiosity.
- Since when does curiosity cause stagnation of the mind? It is usually the lack of curiosity that signals a stagnant, dull mind. Curiosity is a common characteristic of most intelligent species, from the cat to the human. â But it is not an "instinct" like sex; it is just a characteristic.
- And what isÂ *"a new enlightened stewardship of the mind"*? In the Oxford Groups, it really meantdiscarding the rational, thinking, mind, and just "having faith" and obeying the orders of the leaders. (It's called fascism.) â So that phrase,Â *"a new enlightened stewardship of the mind"*Â was also reallyÂ a euphemismÂ forÂ "abject, obedient, unthinking slavery". That's another propaganda trick.

♦ More double-talk: In a TV commercial, a merchant promises:

> "We guarantee that we will either have it in stock, or order more."
> But that is no big promise or guarantee. That's what all merchants do: Sell what they have in stock, and then order more.

♦ Speaking of merchants, the immortal all-time classic car salesman's double-talk is:

> We lose money on every car that we sell, but we make up for it in volume.

♦ A radio commercial for a large commemorative silver coin says:

> "It's historical worth far exceeds its massive size in pure silver worth."

Translation: It's over-priced. The cost of the coin far exceeds the value of the silver.

♦ The Alcoholics Anonymous so-called "First Tradition" declares that the A.A. group is more important than the lives of the individual people:

> Each member of Alcoholics Anonymous is but a small part of a great whole. A.A. must continue to live or most of us will surely die. Hence our common welfare comes first. But individual welfare follows close afterward.

That double-talk is just like George Orwell's great line,Â "All animals are equal, but some animals are more equal than others."

Also notice the standard cult statement thatÂ you cannot live without the cult.

♦ A.A. promoters tell us things like:

> Contrary to the belief of many, it [Alcoholics Anonymous] is not a program of conversion to religion, although a religious conversion is probably unavoidable as one becomes positively spiritual.
> *Spirituality: The key to recovery from alcoholism*, Warfield, Robert D. and Goldstein, Marc B.,Â *Counseling & Values*, April 1996, Vol. 40, Issue 3, page 196.

The A.A. Twelve-Step program just sort of accidentally on purpose "unavoidably" converts people to belief inÂ Bill Wilson's favorite cult religion.

♦ This is quintessential double-talk:

"AA is a spiritual rather than a religious program of living; and living this program, for many of us, is our religion."
*Getting right with God*Â (Recovery Life), Father Joseph C. Martin,Â **Alcoholism & Addiction Magazine**, April 1988 v8 n4 p35(1)
Huh? It's not a religion, but it is your religion?
(And notice that a Catholic priest is writing that. What happened to practicing the Christian religion of the Church in Rome? Strange, very strange...)

♦ Essentially, spirituality involves attitudes that are based on beliefs about our relationships with our self, with other human beings, with our world (including our physical and social environments), with life (as to its meaning and purpose), and ultimately, with God, a Higher Power, or 'Universal Consciousness'.
(ibid.)
Apparently, spirituality helps you to cop an attitude.

♦ About half our original fellowship were of exactly that type [atheists or agnostics]. At first some of us tried to avoid the issue, hoping against hope we were not true alcoholics. But after a while we had to face the fact that we must find a spiritual basis of life â or else. Perhaps it is going to be that way with you. But cheer up. Something like half of us thought we were atheists or agnostics. Our experience shows that you need not be disconcerted.
TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *We Agnostics*, page 44.

- Question: Why, if we are true alcoholics, do we suddenly have to find Bill Wilson's "spiritual basis of life"?Â
  Answer: Because Bill Wilson believed thatÂ only Bill Wilson's cult religion could cure alcoholism. So there goes our freedom of religion; we shall have to give it up.
- 'But cheer up.Â "You need not be disconcerted."Â Our experience shows that converting to Wilsonism won't hurt you too much.'
- 'Besides, weÂ *only thought*Â that we were atheists or agnostics, but we were wrong. After Bill's brainwashers fixed our thinking for a while, we discovered that we really did believe in Bill Wilson andÂ his wonderful spiritualityÂ after all.'

♦ Try to figure out the logic in this statement:

Introduction to Alcoholics Anonymous through court ordered intervention is common. The legal system, heavily burdened with drunk drivers, often refers offenders to AA in an attempt to help individuals who may have an alcohol problem. Studies of court ordered participation have indicated that AA is not particularly effective and sometimes markedly less effective than other treatments in dealing with this particular group (Ditman et al. 1967,Â Brandsma et al. 1980), but there is significant, active participation in AA membership among those referred by the criminal justice system.

Alcoholic Thinking: Language, Culture, and Belief in Alcoholics Anonymous, Danny M. Wilcox, page 32.

First the author said that A.A. does not help alcoholics â those studies found that A.A. was oftenÂ *the least effective*Â treatment program for alcoholics, and A.A. made alcoholics binge drink more, and die more â and then the author said that many of the alcoholics who were coerced into A.A. by the criminal justice system became active members of Alcoholics Anonymous. Huh? So what's the point of that? The author already clearly declared that A.A. doesn't work and doesn't help alcoholics.

- **Unprovable Statements**
  Just make up grandiose, completely unprovable statements that say whatever you want people to believe:

  - "You don't have to worry about overpopulation. Overpopulation of the Earth is impossible, because each person is a ray of light from God, and God will only send out so many rays." (That came from some new-age nut or other.)
  - "I lived on Betelguese in my last incarnation. I came here to help mankind through the current crisis." (Another phony guru.)
  - "Body thetans are the spirits of people from another planet who were murdered 60 million years ago in a big purge of excess population. Today, they will cling to your body, and try to get into your body, and cause you all kinds of troubles." (*But, for only $350,000, we can fix yourÂ Interplanetary CootiesÂ problem for you.*Â â Scientology)
  - "We were friends in a previous lifetime."
  - "God appeared to me in a vision and told me that he had a special message that I was to carry to the world." (Many goofy cult religions)
  - "The Purpose of Life is Self-Realization." (ISKCON, the "Hari Krishnas")
  - "The purpose of life is to transform energy from one plane to another."
  - "God guided Bill WilsonÂ to write the Twelve Steps." (A.A., of course.)
  - "Doing these Twelve Steps will please God."
  - "Doing these Twelve Steps causes an increase in spirituality."
  - "God wants you to do this stuff."
  - "The Twelve Steps work in a magical mystical wayÂ that cannot be scientifically testedÂ or logically explained."

- **Undisprovable Statements**
  This is simply the converse ofÂ *unprovable statements*. This technique uses statements that cannot be proven false.

  Peter Howard, the fascist discipleÂ who took over the leadership of Moral Re-Armament after Frank Buchman died, gave us many examples ofÂ *undisprovable*Â statements in his little book of praise for the cult leaderÂ Frank Buchman:

  Frank Buchman liked to recall the story of the time he introduced Joe to a French Cardinal at tea. Â ...
  Â Â Â It was the same Cardinal who said, "MRA is a crack of the whip for Christians who have forgotten their mission, and offers a positive alternative to sincere Marxists."
  Frank Buchman's Secret, Peter Howard, pages 89-90.

Which French Cardinal? When, where? Did he really say that? We only have Frank Buchman's word for it, saying that some unnamed Cardinal praised his organization.

> Senior military men in America have realized the necessity that a nation have an ideology to match the demands of the twentieth century. One of them is an Admiral. He came many times to meet Frank Buchman and to be trained in Moral Re-Armament. Â ...
> *Frank Buchman's Secret*, Peter Howard, page 81.

Who? Which "senior military men"? Which Admiral? When? Where?

> An American General told Frank Buchman two years ago, "Our country is like a dead knight in armor. We have the weapons, but need the spirit and will to prevail."
> *Frank Buchman's Secret*, Peter Howard, pub. 1961, page 82.

Which general said that? "Two years ago" would have made the year 1959, at the height of the Cold War. The U.S.A. was definitely not like a "dead knight without a will" then. (More like a paranoid psychotic, busy building enough H-bombs to blow up the entire world 19 times over.)

> A British Colonel once came to see him. Â ...
> A few days later the Colonel came back. He was smiling. He said, "It's a miracle. Â ...
> *Frank Buchman's Secret*, Peter Howard, pages 99-100.

Once again, which Colonel? When, where?

> At a time when Africa is calling on the white man to leave, leaders of seventeen countries of Africa urged Frank Buchman to come, and bring with him the men and women of Moral Re-Armament.
> Â Â Â An African leader summed up Buchman's work in these words, "Moral Re-Armament is doing for Africa what Abraham Lincoln did for America. It is binding up the nations' wounds and setting the people free."
> *Frank Buchman's Secret*, Peter Howard, page 68.

So, theÂ Hitler-lovingÂ Dr. Frank N. D. Buchman was the "Abraham Lincoln of Africa", was he? Says who?

And once again, which leaders? And how did the author, Peter Howard, define "an African leader"? Those "leaders of 17 nations" who supposedly invited Frank Buchman to come to Africa could have been anything from popularly-elected Presidents to murdering territorial warlords to the chiefs of hungry tribes of cannibals. Just try to prove that 17 of themÂ *didn't*invite the stout, well-fed Frank Buchman to dinner...

You know, Peter Howard's book reads a lot like Hollywood gossip sheets or supermarket tabloids, which are always loaded with unverifiable sources like:

- *"Close friends say...",*

- *"Inside sources say...",*
- *"Knowledgeable persons said...",*
- *"An unnamed official said...",*
- *"It is rumored that...".*
- *"Some people believe that...".*
- *"Confidential informants say...".*

And not to be left out, Bill Wilson used the same stunt in theÂ *Big Book*:

> Many doctors and psychiatrists agree with our conclusions. One of these men, staff member of a world-renowned hospital, recently made this statement to some of us: "What you say about the general hopelessness of the average alcoholic's plight is, in my opinion, correct."
> TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *More About Alcoholism*, page 43.

What unnamed doctors and psychiatrists agreed with Bill Wilson? How many doctors really agreed with Bill Wilson? It wasn't any sizeable percentage of the American Medical Association â what they said about theÂ *Big Book*Â and Bill Wilson's religious cure for alcoholism was:Â *"the book has no scientific merit or interest."*

- **The Language Trap**

Use a word in different ways, but logically treat it as the same concept:
"You say you're looking for truth. Well, we refer to our religion as 'The Truth'. Why do you think we do that?"

The Language Trap is not just a rhetorical device, but a major problem in communication. It is a "trap" because people on both sides of an argument can inadvertently stumble into it if they are not aware that the same word can be used with different senses and connotations.[7]

When a believer and a rational person talk about the truth, they are using the same word but they are talking about very different things. When a rational person says, "Two plus two equals four. That is the truth.", he means that we can clearly demonstrate the truth of that statement by adding things together. We can group objects together and see with our own eyes the truth of two plus two adding up to four. When a believer says that his beliefs are the truth â for example, insisting that everything in the Bible is The Truth, and the unquestionable Word Of God â he means something else. He means that he won't tolerate anyone refuting the validity of his statements or questioning the truth of those stories. He fervently believes that if he fervently believes that some things are true, that they will become true. (And if you don't believe, then you break the spell and ruin the magic.) Alas, all of those beliefs are false. Simply believing that something is true will not make it true. Two plus two will not add up to three or five if you believe it strongly enough.

One of the more humorous examples of the Language Trap was a classic episode of the TV show calledÂ *The Twilight Zone*. A race of space-traveling aliens came to

Earth, and quickly solved all of Earth's problems. There was no more war, or disease, or famine. It was like "the Millenium".

Some people were very suspicious of the aliens and asked what their ulterior motive was. The aliens answered that their only desire was "to serve man". Aliens even took lie detector tests, which showed that they were telling the truth. People began leaving Earth and traveling to the aliens' homeworld in great numbers, to enjoy the marvels of a very advanced civilization.

Meanwhile, a crew of hard-working translators were striving to translate the alien's "holy book", which was simply titled "To Serve Man". At the end of the program, the Earthlings discovered that the book was a cookbook. The aliens wanted to "serve man" alright: baked, broiled, or fried.

Churches and religions stumble into this trap all of the time. They all talk about having "The Truth", and the indisputable "Word of God", but their truths differ from church to church. Nevertheless, the true believers insist that they have The Truth and everybody else is wrong.

A television evangelist constantly declares that you must "plant a seed" by giving him money. He refers to the sentence in the Bible that says, "As you sow, so shall you also reap." The line in the Bible says simply that what you put out is what you get back. If you sow seeds of anger and hatred, that is what you will get back. If you treat other people in an unfriendly manner, that is how they will treat you. But the TV evangelist twisted the meaning of the words and declared that you were "planting a seed with the Lord" by giving him money, and he goes on and on about "What are you going to harvest? If you have planted nothing, then you will harvest nothing." That is really twisting the meaning of that line by changing the meanings of the words "sow" and "reap".

Also, the TV evangelist merely assumes that the viewers will get something back if they "plant a seed" by giving him money. Then he assumes that any good things that happen later in the donors' lives were caused by the "seeds" that they planted. (Assuming a cause-and-effect relationship where none exists.) Then the preacher canÂ use testimonials, reading letters that say things like, "Mrs. Mary B. had cancer, but she planted a seed with the Lord (by giving me lots of money), so the Lord removed her cancer, and now she is healthy and happy and cancer-free. Hallelujah! Praise the Lord!"

In Alcoholics Anonymous, the word "alcoholic" has four distinctly different definitions that are used interchangeably, all too loosely. (Bill Wilson started doing that in the "*Big Book*", and his followers have been doing it ever since.)

1. An alcoholic is someone who habitually drinks far too much alcohol.
2. An alcoholic is someone who is hyper-sensitive to alcohol â something like allergic to it â perhaps because he inherited a gene â and he is someone who will become readdicted to alcohol and go on a binge and drink for years if he drinks even just one beer.
3. An alcoholic is somebody who cannot quit drinking â he is "powerless" over alcohol.
4. An alcoholic isÂ an immoral person who is resentful, angry, manipulative, self-seeking, dishonest, selfish, and a prime example of instincts run wild, self-will run riot, and the Seven Deadly Sins... and on and on and on....

Those are four very different definitions of "an alcoholic", and they are not the same thing at all. And they are not equally applicable to all people who have a drinking problem.

Personally,

1. By the first definition, I stopped being an alcoholic thirteen years ago when I quit drinking alcohol.

2. By the second definition, I will always be an alcoholic â I am and always will be hypersensitive to alcohol, and easily readdicted if I drink any more alcohol.
3. By the third definition, I wasn't an alcoholic, because I could quit drinking, and I did. I even quit drinking without any help from A.A., because I quit drinking two weeks before I was everÂ sent to an A.A. meeting.
4. By the fourth definition, I was never an alcoholic. I was, in fact, a nice, happy, drunk, and people liked having me at their parties because I was fun to have around when I got high. (But, as one friend pointed out, even nice drunks die of cirrhosis of the liver.)

- **Vague, Undefined, Grandiose Language**

Make up all kinds of impressive-sounding grandiose phrases and expressions that are vague and not very precisely defined, so that no one can quite accuse you of being wrong. They can't even really argue with you because everything is so nebulous and intangible. It's like trying to bite fog.

Politicians are past masters of this art:

- The Great Society (*Johnson:*Â the country nearly explodes in civil war.)
- Law and Order (*Nixon:*Â the most criminal administration in history: the President and Vice-President resign to avoid impeachment, and half of the administration goes to prison.)
- Peace with Honor (*Nixon:*Â when defeat is inevitable, be someplace else.)
- A Kinder, Gentler Nation (*Bush the first:*Â start another war, while running up staggering deficits.)
- Compassionate Conservatism (*Bush the second:*Â start another war, spend the Social Security and Medicare money on weapons systems, eliminate civil rights, rape the environment, and give the rich people a big tax cut, all while running up staggering deficits.)
- States' Rights (*"The state has rights only if I think the state is right."*) States can do whatever they want to do, if and only if the White House, the Supreme Court, and Congress happen to like it. Think: racism and segregation, Medical Marijuana, "Right to Choose" vs. "Right to Life", the year 2000 Florida Presidential elections, Physician Assisted Suicide, and Gay Marriage.)
- Selfless Patriotism (serving your political party)
- Public Service (30 years of taking bribes)
- Judicial Restraint (the Republicans on the Supreme Court rig the Y2K election.)
- "...marching to the field of glory" â what politicians say to young men to drum up support for another war.

A current commercial for a politician says,Â "He'll move us forwards."
Huh? He'll move us where?
That's actually so vague that it is meaningless. You have no idea what that scoundrel will do if he gets elected.

Bill Wilson'sÂ delusional disorderÂ gave us a bunch of classic examples of vague, grandiose, bombastic raving:

- "We have come to believe He would like us to keep our heads in the clouds with Him, but that our feet ought to be firmly planted on earth. That is where our fellow travelers are, and that is where our work must be done."
  (TheÂ *Big Book*, 3rd edition, Chapter 9, page 130.)

- "We feel we are on the Broad Highway, walking hand in hand with the Spirit of the Universe."

(TheÂ *Big Book*, 3rd edition, Chapter 6, page 75.)

- "... you can join us on the Broad Highway."
  (TheÂ *Big Book*, 3rd edition, Chapter 4,Â *We Agnostics*, page 55.)

- "This is the Great Fact for us."
  (TheÂ *Big Book*, 3rd Edition, Chapter 11,Â *A Vision For You*, page 164.)

- "Instead of regarding ourselves as intelligent agents, spearheads of God's ever advancing Creation, we agnostics and atheists chose to believe that our human intelligence was the last word..."
  (TheÂ *Big Book*, 3rd edition, Chapter 4,Â *We Agnostics*, page 49.)
  (So just what is "God's ever advancing Creation"? It sounds likeÂ ***"The Blob that Ate Hollywood"****. And where is it advancing to?)*

- "He stood in the Presence of Infinite Power and Love."
  (TheÂ *Big Book*, Bill Wilson, 3rd edition, Chapter 4,Â *We Agnostics*, page 56.)
  (How did Bill Wilson know that it was 'infinite'? Did Bill measure it?)

- "We are not cured of alcoholism. What we have is a daily reprieve contingent on the maintenance of our spiritual condition. Every day is a day when we must carry the vision of God's will into all of our daily activities."
  (TheÂ *Big Book*, 3rd edition, page 85.)
  (Just where did that "vision" come from? Prayer, meditation,Â belladonna,Â delirium tremens,Â LSD, orÂ delusions of grandeur?)

So just what does all of that grandiose nonsense have to do with not drinking any more alcohol?

And Bill wasn't alone. We get this kind of double-talk from other A.A. boosters:

- As the human personality develops from a preoccupation with the survival, passion, and power needs of its "lower self," toward the understanding, compassion, and unity strivings of its higher self, it also grows spiritually.
  (*Spirituality: The key to recovery from alcoholism*, Warfield, Robert D. and Goldstein, Marc B.,Â *Counseling & Values*, April 1996, Vol. 40, Issue 3, page 196.)Â
  Say what?

- Anyone who comes to ten meetings has begun an irreversible process of recovery. Everything in that person's life becomes part of the recovery process, regardless of how chaotic it looks or feels.
  (An ACOA recruiting pamphlet)Â
  Anyone? Irreversible process?Â *Everything*?

- You can go anywhere you want and take risks, because with sobriety and the Twelve Steps of AA you can always correct what has gone wrong and make amends. Your compass will always point you back, even if it feels like you're spinning in circles and have lost your direction.
  (*The Way Home*,Â **Hazelden**, page 245.)
  Which means just what?
  - ◊ That the magic of Bill Wilson'sÂ Buchmanite Twelve StepsÂ willÂ *always*Â protect you? You can goÂ *anywhere*Â and take risks?
  - ◊ That you canÂ *always*Â undo mistakes?Â *"You can always correct what has gone*

wrong"? Â Â Â (I wish...)

◊ That your moral compass willÂ *always*Â point in the right direction?

· Even while you are practicingÂ deceptive recruitingÂ on "the pigeons" and "the babies"?

· Even while you are playingÂ bait-and-switch mind gamesÂ on the newcomers?

· Even while you areÂ lying about the A.A. failure rate?

Note the repeated use of the word "always". That revealsÂ cultish irrational absolute black-and-white thinking. The authors won't say something moderate like that the 12 Steps will often help you, or that they help most of the time, because that would be admitting that the Steps fail some of the time. No, the Hazelden religious fanatics insist that the 12 Steps willÂ ***always***Â work,Â ***anywhere***.Â (That is, of course, absurd. Not even penicillin works all of the time, anywhere. And the real A.A. failure rate is staggeringly high.)

♦ Another A.A. true believer exhorts people to read the A.A.Â *Big Book*Â with this grandiose declaration:Â "Want a new life? Read it! Read the black bits, don't put anything into the white bits and find a freedom you never imagined you could have."

• **Loaded Language, Euphemisms, and Redefined Words**

This item is related to the previous two, but they aren't the same thing. Loaded language is more generic because any words can be redefined for any reason, to support any agenda, and to mask any activity.

Carl Sagan called such terminology "weasel words."

"When I use a word," Humpty Dumpty said in a rather scornful tone, "it means just what I choose it to mean â neither more nor less."Â

Alice in Wonderland, and Alice Through the Looking Glass, Lewis Carroll

"You can always tell when someone isn't telling the truth, because he doesn't speak clearly. Euphemism is a cover for either ignorance or dishonesty. In other words, if you can't state it in a clear simple declarative sentence, then either you don't know what you are talking about, or you are trying to prevent me from understanding what you are talking about, and both bug me."

Tucker Carlson, in an advertisement for his TV programÂ *"Unfiltered"*Â on Public Television, August 6 to 27, 2004.

♦ Adolf Hitler and the Nazis routinely invented euphemistic phrases to disguise what they were doing, like the "Special Handling" that they gave the Jews, sending them to the "Final Solution." "Guest workers" were really foreigners who had been kidnapped at gunpoint and forced into slave labor brigades. Zyklon B, the poison gas used to kill millions of Jews, was called "material for the resettlement of Jews".

Sometimes, the euphemisms became comical. By the end of World War Two, the Germans had 30 euphemisms forÂ **"retreat"**, including "planned withdrawal, successful disengagement, elastic defense, mobile defense, retrocessive maneuver, withdrawing maneuver, unencircling maneuver, according to plan, shortening of the front, systematic evacuation, without enemy pressure, undisturbed by the enemy, and withdrawal to the enemy's surprise."

- Likewise, Mao Tse Tung sent his enemies to slave labor on remote farms for "re-education" so that they would learn to "blossom properly." And all of the Communists were notorious for "liberating" people, like the Tibetans, Latvians, Lithuanians, and Estonians, who did not wish to be "liberated" by the Chinese People's Army or the Soviet Army. And now, of course, George W. Bush is "liberating" Iraq in the same manner.

- Throughout the entire second half of the twentieth century, various United States Presidents used the term "police action", rather than "war", to get around limitations on Presidential powers, and to avoid having to tell the public that we actually were in yet another war.

- In the Oxford Groups and Moral Re-Armament cults, Frank Buchman's "inspired democracy" really meant slavery:

> An increasing number of citizens in democratic states are now unwilling to acknowledge in speech and action those inner authorities on which the life of democracy depends. Each man has his own plan. It's so wonderful each to have his own plan. It's such freedom, such liberty! Everyone does as he pleases. But not in the Oxford Group. There you have true democracy. You don't do as you please, you do as God guides. You do God's plan.
>
> Frank Buchman, speaking at Visby, Sweden in 1938, quoted inÂ *Experiment With God; Frank Buchman Reconsidered*, GÃ¶sta Ekman, pages 44-45.

*Ah, but who gets to say just what God's plan is? The Oxford Group sure didn't hold elections.*Â
The answer is, Frank Buchman declared that he heard The Voice of God better than other men, so everybody should just obey his orders without question. That was "inspired democracy".

- Likewise, Frank Buchman's convert Herbert Grevenius praised Frank Buchman with this bit of Orwellian double-think:

> His enormously active life is built on one thing only â guidance. He openly admits it. He is a sail always waiting to be filled by the wind, a man with a great and warm and humble heart, a democrat who wants to set men free under God's dictatorship.
>
> *Experiment With God; Frank Buchman Reconsidered*, GÃ¶sta Ekman, page 21.

- The most outrageous one I've heard recently isÂ ***"aggressive accounting practices"***. That's whatÂ **Enron**Â used to do things like turn $3 billion of very real losses into $1 billion of phony paper profits, which made the stock price rise, which was very convenient for the executives who were happily dumping their worthless shares of Enron stock on an unsuspecting public in the world's biggestÂ *Pump and Dump*Â stock swindle...Â *"Aggressive accounting practices"*Â indeed.

- Another good one is: George W. Bush's scare stories about how we were all going to be killed by Saddam's Weapons of Mass Destruction which he built with all of that yellow-cake uranium that he was supposedly buying from Niger â Â *"The next warning may come in the form of a mushroom cloud"*Â â were not really exaggerations, fear-mongering, deceptions, and bare-faced lies; they were merelyÂ "less-than-fully-verified" facts;Â (A conservative talking head, defending Bush on National Public Radio, Jan. 20, 2004.)

- Another recent goody from the Bush administration: The poor people are not suffering from hunger any more; they just have "nutritional insecurity".

Alcoholics Anonymous makes extensive use of loaded language and redefined words:

- In Alcoholics Anonymous terminology, the word "sobriety" doesn't mean "not drinking" or "an unintoxicated state"; it has this bombastic redefinition:Â "A special state of Grace gained by working the Steps and maintaining absolute abstinence. It is characterized by feelings of Serenity and Gratitude. It is a state of living according to God's will, not one's own. It is sanity."

- Likewise,Â "Sanity is living according to God's Will, rather than one's own."

- "Recovery" does not mean rebuilding your health, mind, body, and life while not drinking; it means going to A.A. meetings, doing The Twelve Steps, and abstaining from alcohol. According to A.A. dogma, someone can't be recovering from alcohol if he isn't going to A.A. meetings and doing The Twelve Steps; he's "only abstaining".

- By the same broken logic, he's "only dry" but not "sober". According to A.A., you can't enjoy a period of "sobriety" without going to A.A. meetings. Thus, a cultish A.A. member can ask someone,Â "Do you really have a year of sobriety, or are you only abstaining from drinking?"

- Likewise, a "dry drunk" is someone who does not drink alcohol, but who refuses to join A.A. and do the Twelve Steps. He is supposedly still acting like a drunk man, exhibiting all of the objectionable behavior of a drunkard, even though he does not drink alcohol, simply because he won't conform to the A.A. program.

- "Emotional security" means "getting our own way."Â (12X12, page 115.)

- "Humility" is "a desire to seek and do God's will."Â (12X12, page 72.)

See the Cult Test itemÂ *Cult-Speak*Â for many more examples.

A variation on euphemisms is the use of lots of acronyms, which can reduce speech to near total incomprehensibility. This is Scientology jargon:

> ...the New OT VIII C/S was RPFed (Laura Wolfe, wife of Milton Wolfe who was jailed on behalf of the GO and later ended up as CO FSSO (FSSO: Flag Ship Service Org, The service org on board the Freewinds.) The replacement C/S, Sue Walker, wife of Jeff Walker, one of the original Class XII who was Snr C/S Int at the time...
> http://www.whyaretheydead.net/krasel/aff_96.html

What that means is, somebody with the highest rank, OT VIII â Operating Thetan Level 8 â also a C/S â Case Supervisor â was punished â RPFed â Rehabilitation Project Force â and I'm not sure what a GO or CO are...

- **Deception by Renaming**
  If something sounds really bad, orÂ *is really bad*, just give it a new name.

"An important art of politicians is to find new names for institutions which under old names have become odious to the public."

â Talleyrand.

In March of 2013, the small island nation of Cyprus went into a financial crisis. The banks of Cyprus had been acting as low-tax bankers for organized crime in Russia and Mideastern drug traffickers. Hence they had a lot of cash to invest. The Cypriot banks made the giant mistake of investing heavily in high-yield Greek bonds, which suddenly became nearly worthless when the Greek economy crashed. So the banks were bankrupt and deeply in debt.

The EU and Cypriot leaders proposed seizing roughly 8 or 10% of everybody's money in the Cypriot banks to repay the mobsters. The people of Cyprus rebelled, and the Cypriot parliament voted the idea down.

So, on March 25th, the powers that were came up with a new answer, which involved a "haircut" on bank accounts that held more than 100,000 Euros that would confiscate up to 40% of the money in those accounts. The New York Times reported that, "the deal would scrap the highly controversial idea of a tax on bank deposits, although it would still require forced losses for depositors and bondholders." Say, what? In fact, there is no material difference between the so-called "tax" and the "forced losses." That was just semantics.

No matter what you call it, the banks were still violating a sacred trust and stealing depositors' money with the excuse of "We need your money, so we are taking it," (and that caused a panic where people quickly withdrew their money from banks all over Europe). Never before had the "masters of finance" in Europe declared that they could just take money from people because they wanted it.

- **Fluffy Phrases**
  Fluffy phrases are like euphemisms, but have a flavor of their own, sort of like Pollyanna's babble.

  For example, the Allstate insurance company is advertising a "good claim experience", which, when you think about it, is kind of ridiculous. You just suffered a big loss, and it's a happy experience?

  "Yes, it was a terrible car accident. My daughter went to the hospital with a smashed face, and she will never look the same again, but I had a happy claim experience with Allstate."

- **It's Free!**
  The human mind is really funny when it comes to the word "free". People often cannot resist the temptation of something that is free.
  - ♦ Salesmen routinely fool people into buying things that they don't need because they will get a "free gift" with it.
  - ♦ People will pay more for a car that includes "free" accessories.

- An alcoholic who is abstaining from drinking may accept the offer of a free drink when he would not buy a drink for himself.Â *"It's free. How can you resist? Just this one. This one's for free."*

- **Use Self-Referential Definitions â Define Something In Terms Of Itself**
  These are also calledÂ *circular definitions*.

  Alcoholics Anonymous uses a self-referential definition of "working the program correctly", andÂ *"Working A Strong Program"*.

  - Someone who is "working the program correctly" abstains from drinking alcohol, as well as gets a sponsor, reads theÂ *Big Book*, does the Twelve Steps, and attends a lot of A.A. meetings.
  - Then the A.A. promoters claim that the A.A. programÂ "always works if people work it correctly"Â .
  - Works to do what? Well, it supposedly works to make people quit drinking. But quitting drinking was the first requirement for starting to "work the program correctly".

- **Pigeon-holing and Labeling**
  This error in thought comes from stuffing people and things into simplistic categories â "pigeon-holes" â and assigning inaccurate names to them. This can be done without malice, and yet, it still results in erroneous thoughts and wrong conclusions.

  Many simple-minded people want to stuff everything that they don't understand into some simple pigeon-hole, and then they believe that they know what it is.

  People have a natural tendency to want to name things. Once they learn the name of something, they assume that they know what it is. Wrong. They simply have a word, a label. They still do not know what it is. And they don't know whether the name is an accurate description of the thing.

  Alcoholics Anonymous does an outrageous job of pigeon-holing and labeling people:

  - You are an alcoholic.
  - You are an addict.
  - You are a dry drunk.
  - You are a bleeding deacon.
  - You are just a bitter, angry old ingrate.
  - You are unspiritual.
  - You are spiritual.
  - You areÂ *Working A Strong Program*.
  - You are a respected oldtimer.
  - You are a trusted servant.
  - You are in constant conscious contact with God.
  - You are a Friend of Bill.
  - You are not a Friend of Bill.
  - You are sitting on the pity pot.
  - You are in denial.
  - You are a baby.
  - You are a normie.
  - You are selfish.

- You are just a mess ofÂ *unconfessed sins*Â andÂ *wrongs*Â andÂ *defects of character*Â andÂ *moral shortcomings*.
- You are angry, andÂ you have a resentment.

- **Deception Via Mislabeling or Misnaming Things**

A commercial for a get-rich-quick scheme says that the cost of the scheme is inconsequential because:Â "You can take it out of your cash flow."
Wrong. You do not deduct expenses from "cash flow". Expenses come straight out of yourÂ *profits*, and if you don't have any profits, then you are suffering a financial loss, no matter how large your cash flow is, and the cost of that get-rich-quick scheme will be part of your loss. In fact, if you don't have profits, then "cash flow" becomes your enemy â it turns into "burn rate" â the rate at which you are burning up your cash reserves and heading for bankruptcy.

A TV evangelist's commercial declares that you can get his "free" book or DVD "For a gift of $40." If you have to pay $40, then that is a sale of merchandise, not an exchange of gifts.

Similarly, George W. Bush calls his attack on Iraq "a war for freedom". Every time Rumsfeld attacks another city like Fallujah or Najaf or Kut or Sadr City and kills several hundred more people, including women and children, Bush says that it's a victory for "freedom".

Bush also calls the rebels against American hegemony "the enemies of freedom". No, they really want to be free â especially free from our army in their country.

Bush says that they hate us because of our "freedom". No, they hate us because our military forces are destroying their country and killing their children with our "Shock and Awe" bombing.

- **Misuse Words**

Blithely give words a completely different meaning than their usual or commonly-accepted ones.

For example, Bill Wilson wrote this deceptive propaganda while trying to convert people to his religious beliefs (and whileÂ pretending to be a converted agnostic):

> Logic is great stuff. We liked it. We still like it. It is not by chance we were given the power to reason, to examine the evidence of our senses, and to draw conclusions. That is one of man's magnificent attributes. We agnostically inclined would not feel satisfied with a proposal which does not lend itself to reasonable approach and interpretation. Hence we are at pains to tell why we think our present faith is reasonable, why we think it more sane and logical to believe, why we say our former thinking was soft and mushy when we threw up our hands in doubt and said, "We don't know."
> TheÂ *Big Book*, 3rd & 4th Editions, William G. Wilson, Page 53.

There, Bill Wilson misused the word "logical". There is nothing "logical" about blind faith in a cult religion. Logic is a thought process where one examines facts and then draws conclusions from them, using inductive or deductive reasoning. It is not "more sane and logical" to stop thinking critically, and just blindly believe in Bill Wilson's religion.

Bill was also using theÂ hypnotic bait-and-switch trick. He started the paragraph by praising logic and saying that he liked it. But then he switched sides and attacked logic, and praised blind faithÂ *in his beliefs*Â as being more "logical" than logic itself.

And it's almost funny how Bill admitted that he wasÂ "at pains to tell why we think our present faith is reasonable, why we think it more sane and logical to believe..."Â The reason that it is so hard to defend that point of view is because it is completely irrational and illogical. It is based on no facts at all. It is just so much wishful thinking.

Likewise, George W. Bush misuses words like "freedom" and "civil liberties" while he claims that he has the right to spy on people without a judge signing off on the surveillance. Bush says that he is careful of people's "civil liberties" while he spies on American citizens without a court warrant.

Wrong.

The Constitutional protection of the American people from the searches of an intrusive dishonest politician is not "freedom" or "liberty"; it is a Constitutional protection. "Civil liberties" are things like the rights of the citizens to gather together and speak in protest against Bush's actions â something that George W. Bush does not allow anywhere around him. The protesters are confined to "free speech zones" that are far away from Bush.

(By the way, the whole of the United States of America is a Free Speech Zone. George W. Bush should learn that while he is pretending to protect and uphold the Constitution of the United States.)

- **Moving The Goalposts**

This trick is like:

1. Demand that your opponent prove Fact A.
2. When he does, answer, "But you didn't prove Fact B."
3. When he does that, answer ""But you didn't prove Fact C."
4. etc...

This trick is also known as "changing the parameters of the question afterwards", so as to invalidate a true answer. And it's also called "moving the bar".

> For example,Â "BLAH-BLAH is a harm-reduction model rather than an abstinence model. From my observations of those around me, and my own experience, I have the opinion that the harm reduction model doesn't work for most people."
>
> Answer:Â "Every addict who injects heroin with a clean syringe has zero chance of contracting HIV or Hep C, so how can that beÂ *'not working for most people'*?"

The mental diversion was, of course, to assert that harm reduction programs fail because they do not enforce absolute abstinence from drugs or alcohol. But that was never the goal of harm-reduction programs.

Dr. and Prof. George E. Vaillant used the same techniqueÂ in his analysis of Alcoholics-Anonymous-based treatment inÂ *The Natural History of Alcoholism*Â ***Revisited***. Alcoholics Anonymous insists that members mustÂ *totally*Â abstain from drinking alcohol, and if a

member drinks even one single drink, then he looses all of his sober time and immediately starts over at zero. But when Dr. Vaillant tested Alcoholics Anonymous, he found thatÂ the results were "appalling", so Dr. Vaillant changed his definition of "sobriety" to "sober for 51 weeks out of the year", so that some people could be scored as "in stable remission for 3 years". That's moving the goalposts to make the results look better.

Alcoholics Anonymous uses theÂ *Moving the Goalposts*Â trick very often. The whole A.A. program is a Move-the-Goalposts routine:

- In the beginning, the advertised goal of the A.A. program is to quit drinking and save your life.
- But if someone quits drinking without embracing Bill Wilson's version of Dr. Frank Buchman's cult religion, then the A.A. true believers complain that the newly-sober alcoholic has not "found God", and he isn't "working a strong program".
- Then they will complain that the beginner has not "Worked The Steps" properly, and he hasn't listed and confessed all of his sins in Steps 4 and 5, "holding nothing back."
- And he has not "surrendered to God".
- And he has not rid himself of all "resentments" and anger.
- And he isn't correctly hearing God in Step 11.

That is a lot more to do than just quit drinking.

- **Set Low Expections**

Prepare the audience for poor results by setting expectations very low, so that whatever happens, it seems better than they expected.

Corporate executives use this stunt on Wall Street financial analysts all of the time. They cry to the analysts that business conditions are really tough right now, the economy is bad this quarter, and the results won't be very good, so that the analysts predict a low profit-per-share for the current quarter. Then, when the company produces results that are better than expected, the stock price soars.

Alcoholics Anonymous uses the same stunt to explain away the bad behavior of A.A. members. An often-repeated slogan is "We are not saints." Thus, anything from dealing drugs to other A.A. members, to helping oneself to the collection basket, to sexually exploiting the attractive young women who come to A.A. seeking help with a drug or alcohol problem is okay, and easily explained, because "We are not saints."

One A.A. apologist actually arguedÂ that it was wrong to demand moral behavior from rapist A.A. members â to demand that the sexual predators in A.A. stop raping the young female newcomers â because that would be setting expectations too high:

> The problem with what you are doing is that A.A. is a place for sick people to get well. For alcoholics to come recover. It is not a place for nice kind folk to become saints.
>
> If you start making behavior rules, which is in essence exactly what you are trying to do, where does it end? Do you really think people are trying to condone illicit behavior?

> No, that is not what people are saying. What they are saying is that "no matter how far down the scale" you have gone, you are welcome in A.A. If you don't change, well, you won't stick around. You are welcome to come, but why would you? A.A. is for the sick trying to get well, and if you aren't interested in getting well, you won't be around long. That is why the traditions state 'there is no A.A. police'. Get it? That is why A.A. members â and I live in PA â have a hard time listening to you.
>
> If you start trying to make a list of unacceptable behavior, you are essentially making a list of rules for membership, of which there aren't any and hopefully never will be. I fail to see how you can not comprehend this. Our fellowship can not deny even the most unsavory of individuals. Even in the midst of their lowest points, they are welcome.
>
> Posted by: "inventory" â September 13, 2007 07:12 AM, to aÂ *Washington Post*Â readers' comments section, in response to a story about the sexual exploitation going on in the Washington DC "Midtown Group of A.A.".

The writer argues thatÂ "If you don't change, you won't be around long."Â That isn't true at all. The thieves and rapists inÂ the Midtown GroupÂ have been around for more than 20 years, and they show no signs of going away. Why would they quit A.A. when they get money, power, and sex from running a cult?

This A.A. apologist is actually trying to argue that there are no rules in Alcoholics Anonymous, and that it is against "The Traditions" to demand that people behave in a moral manner. Well, the A.A. "Third Tradition" says,

> The only requirement for A.A. membership is a desire to stop drinking.

That is the only requirement for A.A. membership, not the only law. The "A.A. 12 Traditions"Â *do not*Â say that the only RULE that A.A. members must obey in life is "a desire to quit drinking". There are still other rules that are expected of all people: don't rape, don't rob, don't murder... A.A. does not get to suspend those rules because "We are not saints".

- **The Perfect Solution Fallacy, also known as The Nirvana Fallacy**
  This is somewhat the opposite of Setting Low Expectations â this fallacy demands unrealistically good results, or else it isn't worth doing.

  A sex addict might say, "So you need to be totally clean... But you just looked a little bit. Oh, OK, you're not clean anymore. You might as well get on a sex binge now!!"

  For an alcoholic could it be something like: "So you need to be totally sober... But you just thought about drinking... or you accidentally drank a little bit of wine that was offered to you. Oh, OK, you're not clean anymore. You might as well get totally drunk now!"

  (Thanks,Â Mario.)

- **Sliding Adjectives**
  Use a sequence of descriptors, usually adjectives, where the value, quality, and characteristics of what is being described slip and slide from one thing to another, often to the exact opposite.

For example:

- genuine pictures of a fake artifact
- genuine simulated leather
- high-quality plastic
- honest politicians
- really solid guesswork
- anecdotalÂ medical study
- Compassionate Conservatism
- "executive vinyl"Â (That is actually real terminology. I found that label inside of a cheap appointment book with a plastic simulated leather cover.)

- **Vague Adjectives**
  Use adjectives that sound good but don't really tell us what they mean. For example, advertisements for a store offered:
  - "the top digital cameras"
  - "top plasma and LCD TVs"
  - "popular furniture"

  In the first two examples, does the word "top" mean that the equipment is high-quality, or that they are best-sellers? Best-sellers are usually inexpensive and hence low quality.

  The third example more clearly describes best-sellers, but that still does not show that the furniture is actually any good, or worth buying. Attempts to stampede you into buying something because everybody else is buying it is just another recycling of the old propaganda trickÂ *"Everybody knows, everybody says, everybody is doing it"*, also known as "The Bandwagon".

  A spam email advertised: "Strong Programs for Real Estate Risks". Excuse me? What the heck is a "strong program"? They continued, "HOW STRONG ARE YOUR LINKS?" Careful reading revealed that they were selling insurance. They continued: "Discover how our expanding line of comprehensive programs and products can protect your clients from a multitude of real estate exposures at the industryâ s most competitive rates. Become an Appointed Agency Today!" Ah, so they want me to sell insurance for them.

- **Undefined Terms**
  Use words that sound good or bad but are not actually defined and have no concrete meaning.

  For example, a TV commercial for a tooth whitener declares that your teeth will be "nine shades whiter in only ten days." So what is a shade of white? How much of a change in color is "a shade". How much whiter will your teeth actually be? You would think that maybe some artists' institute or the National Bureau of Standards would have a formal definition of "shade", or some color charts to show what is a "shade of white", but they don't. A shade of white could be anything. So no matter what happens from use of the tooth whitener, the advertiser can claim, "What? You can't see any difference? Your eyes just aren't sensitive enough. Believe me, your teeth are definitely nine shades whiter."

  Bill Wilson used this technique in theÂ *Big Book*Â constantly. His sermons and lectures were non-stop streams of grandiose, undefined terms. For example, Bill declared that atheists and agnostics would get "results" if they just started believing in his religion:

> We found that as soon as we were able to lay aside prejudice and express even a willingness to believe in a Power greater than ourselves, we commenced to get results, even though it was impossible for any of us to fully define or comprehend that Power, which is God.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *We Agnostics*, Page 46.

We commenced to get what results? Was it quitting drinking? Was it longer periods of sobriety between relapses? Was it simply drinking less per day? Who knows what "results" they got? Bill doesn't say. We have to just take his word for it that some kind of benefits accrued because people believed something.
(Heck, Bill didn't even really say that the results were good, did he? He just said that they "commenced to get results". The results could have been that they all got drunk and partied their brains out.)

Likewise, Bill Wilson declared:

> As soon as a man can say that he does believe, or is willing to believe, we emphatically assure him that he is on his way.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *We Agnostics*, Page 47.

On his way where? What does that actually mean?

- **Pseudo-intellectual Bull**
  Use lots of big or unusual words and tell your lies with stilted, complicated, incomprehensible sentences that sound very educated.

This item is similar to "Vague, Grandiose Language" and "Double-talk", but this one has a flavor all its own. It is particularly prevalent around universities, and lives in scholarly journals, and is a favorite tool of intellectual wanna-bees.

This example of pseudo-intellectual bull isÂ Dr. Carl G. Jung, telling us how to get a spiritual experience:

> The only right and legitimate way to such an experience is that it happens to you in reality and it can only happen to you when you walk on a path which leads you to higher understanding. You might be led to that goal by an act of grace or through a personal and honest contact with friends, or through a higher education of the mind beyond the confines of mere rationalism.
> C. G. Jung, in aÂ letter to Bill Wilson, quoted inÂ *Bill W.*, by Robert Thomsen, pages 362-363.

Just try to figure out, from reading that, just what you are really supposed to do to get yourself a spiritual experience.

Adam Rafalovich wrote an exemplary piece of such pseudo-intellectual bull that attempted to posit that Narcotics Anonymous meetings actually work and have positive effects on ex-addicts:

> Embedded within the interplay of these moments of recovering-addict identity

> is a technique of identity transformation I refer to as false working. False working denotes a mechanism by which NA members are given permission to "act as if" they truly believe in the NA message regardless of their real sentiments. This technique is exemplified by the aphorismÂ *Fake it 'til you make it.*Â False working proves to be a crucial component for the NA organization to maintain long-term membership and recruit new, skeptical members.
>
> *Keep coming back! Narcotics Anonymous narrative and recovering-addict identity*, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1, p131.

In other words, lie and fake it and pretend to be getting great results fromÂ *"working the program"*, to fool the newcomers into believing that the voodoo medicine 12-Step routine really works. Such deceit is useful for what the author calls "identity transformation" â converting newcomers into good cult members. Note that the author says that such deceit and fakery is even "a crucial component" in keeping the old-timers coming back. So everybody is deceiving everybody else, all of the time. Everybody is re-enactingÂ *"The Emperor's New Clothes"*.

Note the stilted language and the euphemisms that disguise the real meaning of Rafalovich's statements. Instead of saying, "lie and deceive", the author uses the phrases,Â *"false working"*Â andÂ *"permission to 'act as if' they truly believe in the NA message"*.

The author, Adam Rafalovich, gave us many more examples of this pseudo-intellectual bull technique in that article. A few more of them:

- > "Standing most significant in the literature today is the concept of narrative and its effect in creating group cohesion inside and outside 12-Step meetings. It is believed in the study of 12-Step recovery processes that the mutual disclosures of members fosters processes of belonging and commitment to the collective goal of drug and alcohol abstinence. Â ...
  > In addition, the study of story presentation has been shown to be integral in developing moral attachments to a collectivity."
  >
  > *Keep coming back! Narcotics Anonymous narrative and recovering-addict identity*, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

  In other words, use the standard cult recruiting technique ofÂ *Personal Testimonies of Earlier Converts*Â to fool the newcomers and suck them into the cult. Much of the "sharing" is just sales pitches telling newcomers to join the group andÂ *Keep Coming Back*.

  And Rafalovich usesÂ the passive voiceÂ technique to assert unsupported claims:
  "It is believed ... that the mutual disclosures of members fosters processes..."
  Who believes it? What do they know? Why should we care what some nameless, faceless people believe?

- > "By examining the contents of common NA testimony, we can examine data that demonstrate that individual action is as much a result of the NA organization as it is a contributor to it. Therefore when positing a theory of the recovering-addict identity process, it is important to acknowledge the internalization of an organization as a result of becoming a contributor. Interestingly, NA members realize this theoretical notion. Contribution, for example, is a strong ethic within the organization; it is believed that to not participate in the

> narrative environment (i.e., not share during meetings) will harm one's chances of continued abstinence."
>
> *Keep coming back! Narcotics Anonymous narrative and recovering-addict identity*, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

In other words, the way to become one of the group is to start talking the talk in meetings, and telling people that the program is working for you.Â *"Fake It Until You Make It."*Â The more you do it, the more it will warp your thinking and make you feel and act like one of the old-timers.

That is a use of theÂ *cognitive dissonance*Â techniqueÂ â Since you don't want to think of yourself as a lying fake, you will start to imagine that youÂ *really are*Â getting some great results, just like you have been saying... Your subconscious mind will struggle to minimize the pain of the conflict between believing that it is wrong to lie, and the group requirement that you say that you are getting great results from the program â andÂ *coming to believe*Â that the programÂ *really IS working*for you, and that you are telling the truth, is the subconscious mind's answer to the problem.

It's really a very common brainwashing and mind-control technique:
"Makem' say it enough times, and they'll start to believe it."
"Makem' go through the motions enough times, and they'll start to think that such behavior is normal."

And, the author tells us, if you should choose to not engage in such cultish behavior, and do notÂ *"Fake It Until You Make It"*, then you just might leave the cult and not come back.Â (No surprise there.)

Also note the use of two other propaganda techniques in this one line:Â "it is believed that to not participate in the narrative environment (i.e., not share during meetings) will harm one's chances of continued abstinence."
There, we get

1. the use of the passive voice, yet again, citing the opinions of some more invisible, unnamed people, and
2. fear mongering

1. It is believed by whom? Says who?
2. Where is the evidence that anybody should believe such nonsense?
3. What medical or scientific study, survey, or poll showed that telling lies in N.A. meetings â Â *faking it 'till you make it*Â â reduces drug consumption, or reduces relapses?
4. Where is the evidence that refusing to lie and deceive increases drug addiction?

There is no evidence to support such illogical statements. The author tries to shove that cult dogma at us as established fact by declaring that some unnamed people believe it to be true.

♦ > "Solidarity and collective identity in NA are constructed by narrative that depicts qualitative differences between addict and normie worlds. It has been argued that this process of creating difference is socially constructed and is ultimately aimed at fostering a stronger dependency upon the group."
>
> *Keep coming back! Narcotics Anonymous narrative and recovering-addict identity*, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

Meaning: the testimonials of earlier converts emphasize the standard cult attitude of,Â "*Our group is special*. We are special people, and different from theÂ *'normies'*. Only another cult member understands."

And it's also the cult practice of:Â *You must become dependent on the cult.*Â They say,Â *"You really need this 'support group'. You can't make it alone. Nobody can do it alone. You'll die without us."*Â andÂ *"Addicts like us can't be happy in the normie world, so just stay here with us."*

Rafalovich says that the program isÂ *"ultimately aimed at fostering a strongerÂ dependency upon the group."*Â That is really insidious cult behavior. They want you to become dependent on the cult for everything. The cult will become your entire social circle, and your family, and your whole life. You will end up needing the cult to tell you who you are, and what you should think and what you should do. That produces mental cripples who cannot live outside of the cult. That is not 'recovery'.

- "**Leveling**: This initial phase of learning Narcotics Anonymous normativity and adopting a recovering-addict identity involves a homogenization where newcomers become convinced of a common thread between themselves and the rest of those involved with NA. Â ...
  No one member ever stops becoming part of the leveling process. 'Oldtimers' still try hard to discover linkages between themselves and other members of the group. Â ...
  The focus for seasoned members often involves the invocation of the disease concept, its manifestations at the psychic and behavioral levels."
  Keep coming back! Narcotics Anonymous narrative and recovering-addict identity, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

Translation: Newcomers buy the group member stereotype and start to think that they are "just like everybody else" in the cult. Then,Â you can't ever leave the cult,and you can't ever stop using the Procrustean Bed on yourself, trying toÂ force yourself to become the cult's stereotypical "good member". (What the author calls "Leveling".) Even the old-timers have to continue doing it. And you can't ever stop parroting the cult dogma, like the "spiritual disease" concept.

- "**Conclusion**: The presence of a technique like false working gives credence to the relative instability of the addict identity. It is not a technique reserved strictly for those who are new to the NA environment. It is a safety valve for all members, allowing those who have never encountered or are straying away from a sincere attitude of recovering-addict identity to be cynical or skeptical of NA, given, of course, that their actions state otherwise."
  Keep coming back! Narcotics Anonymous narrative and recovering-addict identity, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

Translation: the presence of a technique like "false working" proves that it is a cult that plays mind games on people's heads, including deceiving the newcomers and dishonestlyÂ changing people's concepts of themselves (identity). The fact that even the old-timers are still supposed to beÂ *"faking it until they make it"*Â means that the program doesn't ever start working right â they never make it â but the old-timersÂ can't be honest and actually say that out loud. They too must continue toÂ *"Act As If..."*

- "Twelve-step programs are increasingly recognized as important resources and treatment adjuncts for recovering alcohol and other drug abusers. Â ... Â This paper explores 12-Step programs such as Alcoholics Anonymous in light of Margaret Mahler's conceptualization of the separation-individuation process that leads to object constancy and healthy object relations."

  An analysis of 12-Step programs for substance abusers from a developmental perspective, Shulamith Lala Ashenberg Straussner; Betsy Robin Spiegel,*Clinical Social Work Journal*, Fall 1996 v24 n3 p299(11)

Meaning:Â *If it is totally incomprehensible even to someone with a degree in the hard sciences, then it just might be total bull.*

Also notice how the A.A. propagandists routinely proclaim that A.A. and the other 12-Step groups areÂ *"just being discovered"*Â *(by whom?)*, and areÂ *"increasingly recognized as important"*Â *(by whom?)*, as if those A.A. promoters haven't been pushingÂ the same irrational old 12-Step cult religionÂ and voodoo medicineÂ for the last 75 yearsÂ â and as if Alcoholics Anonymous were not actually an organization in decline. That is the propaganda technique ofÂ *Assume The Major Premise*.

- **Slogans: Simplistic Slogans and Though-Stopping Slogans**

  There just isn't anything quite like a nice, short, snappy slogan. People don't like to have to memorize long pages of boring facts and figures, but they can remember slogans easily. Slogans can just cut through the fog and grab people's hearts and minds in ways that no other kind of speech can. Slogans can become battle cries, like "Remember the Alamo!" A good slogan can make or break a politician's campaign:
  - "Where's The Beef?"
  - "Make My Day!"
  - "It's the Economy, Stupid!"
  - "Ein Volk, Ein Reich, Ein FÃ¼hrer!"

  Dr. Robert J. Lifton, who did much of the original research on Chinese Communist brainwashing techniques, called such slogansÂ *"thought-stopping clichÃ©s"*.Â He found that such slogans constrict human understanding, rather than expand it. They stop people from thinking.

  Thought-stopping slogans can be used to jump to completely illogical conclusions:Â *"People are more important than things. So let's drill for oil in the Anwar National Wildlife Refuge."*

"The answer is Jesus! The answer to everything is Jesus! The answer is always Jesus!"

Yeh, but what if the question was,Â *"What will your monthly payments be if you borrow $100,000 at 7% interest and want to pay it back in 20 years?"*

A.A. hasÂ far too many slogansÂ to list here. Here are just a few examples:

- "Keep Coming Back! It Works!"
- "It Works If You Work It!"
- "Work It, You're Worth It! You Die If You Don't!"
- "Turn It Over."
- "Let Go and Let God."

- "One Day At A Time."
- "Your best thinking got you here."
- "Think, Think, Think!"
- "Stop Your Stinkin' Thinkin'."
- "Keep It Simple, Stupid."
- "Utilize, Don't Analyze."

- **Oversimplify**
  This one is simple: Just oversimplify the issue. Reduce the issue to a few simple sentences that any blithering idiot can understand. Leave out all the complicated facts and confounding factors. Reduce the debate to just a few simple-minded sentences and slogans. Reduce complex multi-faceted issues to simplistic statements that can be expressed in a short sound bite.

For every complicated problem there is a simple and wrong solution.
== H. L. Mencken

"The problem with KISS â Keep It Simple Stupid â is that it often leads to LOVE â Leave Out Virtually Everything."
== credited to "a smart musician"

Adolf Hitler instructed:

> Â Â Â All propaganda must be popular and its intellectual level must be adjusted to the most limited intelligence among those it is addressed to. Consequently, the greater the mass it is intended to reach, the lower its purely intellectual level will have to be. But if, as in propaganda for sticking out a war, the aim is to influence a whole people, we must avoid excessive intellectual demands on our public, and too much caution cannot be exerted in this direction.
> Â Â Â The more modest its intellectual ballast, the more exclusively it takes into consideration the emotions of the masses, the more effective it will be. Â Â ...Â
> Â Â Â It is a mistake to make propaganda many-sided, like scientific instruction, for instance.
> Â Â Â The receptivity of the great masses is very limited, their intelligence is small, but their power of forgetting is enormous. In consequence of these facts, all effective propaganda must be limited to a very few points and must harp on these in slogans until the last member of the public understands what you want him to understand by your slogan.
> *Mein Kampf*, Adolf Hitler, pages 180-181.

Alcoholics Anonymous grossly over-simplifies the problems of alcohol abuse and alcohol addiction. (And Narcotics Anonymous also over-simplifies the issue of drug addiction.) A.A. tries to reduce those problems to just a matter of "resentments" and unconfessed sins causing "spiritual diseases", and "ego" and "self-will" causing "defects of character" and "moral shortcomings". And the cure is supposedly to "work a strong program", and "surrender to God", and do the 12 Steps and attend lots of meetings.

A.A. totally ignores the problem of mental illnesses like Bipolar Disorder and schizophrenia causing people to drink too much alcohol and take too many drugs. And A.A. rarely, if ever, sends people to real doctors and psychiatrists to get those problems fixed.

- **Wrap Yourself In A Higher Power**

The two most popular styles areÂ *"Wrap Yourself in the Flag"*Â andÂ *"Wrap Yourself in the Bible."*Â But wrapping yourself in a generic God without a Bible, and in a generic religiosity, like Alcoholics Anonymous does, also works.

People feel reluctant to attack someone who appears to be so patriotic or religious. They fear thatÂ their criticism will be misunderstoodÂ by others as an attack on God or Country. So you can get lots of cheap and easy advantages by wrapping yourself in the Bible or the Flag, or both.

The absurd lengths to which con artists will go to convince you that they are good, religious people are sometimes mind-boggling. A web page that is supposedly about "Christian" drug and alcohol treatment programs,Â http://www.christiandtc.com/christiandrugrehabprogram/, actually features a lot of garbage that is just failed quack programs with the label "Christian" added on, to make them sound good:

1. The link for "drug rehabs" actually goes to a web page that advertises schemes to beat drug tests:Â http://www.christiandtc.com/drugrehabs/Â actually links toÂ http://www.asmartsourcedrugtestkit.com/prodblood.htm.

2. The link for "drug rehab program",Â http://www.christiandtc.com/drugrehabprogram/, advertises, among other things,*"Alex knows what it takes for you to get a Pharmaceutical / Medical sales position!"*, andÂ *CELEBRITY CRUISE LINE*Â â Drug store, Payday Loan, video poker, and â best of all â "Jeb Bush: Daughter improving in drug rehab".

3. And the most amusing feature of that web page is the second paid link, "Christian Pastor Converts To Paganism" â Â http://www.christiandtc.com/ltrendee.htmlÂ â which actually links to a web page that sells a software package for submitting articles intended to drive traffic to your web site to that you can make money by selling more stuff â http://article-submitter.solidbytes.com/?hop=seishin.Â (Now a broken link.)

   Please don't ask me what that has to do with Christianity or recovery from drug and alcohol problems.

Similarly, a web page that sells colloidal metals as cures or treatments for various aliments decorates its web pages with the American flag, and the quack doctor (a veterinarian and N.D., not an M.D.) is even dressed in a red-and-white striped shirt (with a cowboy hat, just to mix the images). SeeÂ http://www.healthy-ways.com/selenium.htmlÂ andÂ http://www.healthy-ways.com/quest.html.

- **Repeat Old Memes**

There are some old ideas that are so pervasive that they might be called the memes of the society. They may be inaccurate or even quite false, or give a very distorted picture of reality, but people often accept them without thought because they are so old and well-established that they slip into your mind without triggering a critical reaction.

For instance, old Conservatives often love to describe one of their own as a "self-made man", who rose up from poverty in another Horatio-Alger-like rags-to-riches story. The problem is, there is no such thing as "a self-made man".

- The guy's mother would probably have a strong opinion on the subject â pointing out that she distinctly remembers a lot of discomfort and pain that was involved with making him and getting him into this world.
- And then his mama had to work for many years to feed him and clothe him and teach him and give him a good set of values...
- And then this "self-made" boy went to a public school where his education was paid for by the tax-payers...
- And then the guy probably got a lot of other opportunities and lucky breaks, and help from a mentor, and then, yes, I'm sure he worked hard for success, and he was lucky enough (or corrupt enough) to end up rich.

And then the ideologues who have a Wild-West mentality â Â "every man for himself; survival of the fittest; you can build an empire if you are strong and brave and smart and work hard"Â â like to declare that he is a good example of a "self-made man" who did it without any "handouts".

For more on memes, see these links which were suggested by Mary C. Hogan, Ph.D.:

2. http://www.memecentral.com/
3. http://pespmc1.vub.ac.be/MEMIN.HTMLÂ (Dead Link.)

- **Claim Causation By A Higher Power**

Claim that your favorite thing was deliberately put here or created by a "Higher Power" (which is often called "God" or "the Lord", but is also called a lot of different names).

Joseph Goebbels, Adolf Hitler's fawning Minister of Propaganda, declared:

> Destiny has sent us this man [Adolf Hitler] so that we, in this time of great external and internal stress, shall testify to the miracle.
> *The Rise And Fall Of The Third Reich*, William L. Shirer, page 1109.

So who is "Destiny", and how can I meet her? Is she related to that other popular cause, "Fate"?

Likewise, when he heard that President Roosevelt had died, another of Hitler's boot-lickers declared:

> This was the Angel of History! We felt its wings flutter through the room. Was that not the turn of fortune we awaited so anxiously?
> == Count Schwerin von Krosigk
> *The Rise And Fall Of The Third Reich*, William L. Shirer, page 1110.

The Angel of History? I recall Michael, and Gabriel, and Lucifer, and The Angel of Death, and several others, but can't seem to remember any "Angel of History"...

That sounds a lot like Karl Marx's mystical "Force of History" that was supposed to spontaneously bring us a Worker's Paradise. (In spite of his declarations of atheism, Karl Marx was actually a muddled-headed mystic who believed in Higher Powers or Higher Forces that just magically made things happen, and determined the course of history.)

- **Everybody's Doing It, Everybody Knows, and Everybody Says, and The Bandwagon**
  Imply that what you want people to do or believe is what everybody else is doing or believing.

  - "Everybody knows that the world is flat. All of the leading university professors and Church authorities agree that Christopher Columbus is a crazy fool for thinking that the world is round, and that he can get to the East by sailing west. Everybody knows that he will fall off of the edge of the world."
  - "Everybody knows that diseases are caused by evil spirits, and witches putting hexes on people. So if your children get sick, the only cure is to burn the old lady who lives next door, and then your children will get better."
  - "Everybody knows that blood-letting is the best cure for a fever. It worked on George Washington, didn't it?"

  This is also known as "The Bandwagon" â appeal to people to "get on the bandwagon", or "get with the program", or "catch the wave", or "get with it", or "keep up the momentum".

  - "This product is the hottest thing â it has sold out repeatedly."
  - "It's the most popular thing we have."
  - "It's the fastest-growing form of music."
  - "It's definitely the fashion hit of the season."
  - "These beliefs are increasingly being accepted."
  - "A mighty army of the Lord."

  Â Â Â The individual who clings tenaciously to unverified beliefs confuses his beliefs with fact, and often inflicts this confusion on others in his struggle to resolve it in his favor. When many people are persuaded to subscribe to the same pretense, of course, it can gain the aura of objectivity; as British psychoanalyst Ron Britton has observed, "we can substitute concurrence for reality testing, and so shared phantasy can gain the same or even greater status than knowledge." The belief doesn't become a fact, but the fact of shared belief lends it the valuable appearance of credibility. The belief is codified, takes hold, and rises above the level where it might be questioned.
  Bush on the Couch, Justin A. Frank, M.D., page 61.

  A variation on this technique is rationalizing one's own behavior by claiming that:

  - It's what everybody does.
  - That's just how it's done.
  - It's normal.
  - It's standard operating procedure.
  - It's customary.
  - It's standard practice in the industry.

- It's accepted practice.

You can stampede large masses of people into following a certain course of action if they think it's what everybody else is doing, or will do. We see an amusing example of this most every Christmas, when one particular toy, like aÂ *Furby*Â or aÂ *Cabbage Patch Doll*, becomes the fad toy of the season, and all of the childrenÂ *simply must*Â get one because everybody else (all of the other children) is getting one. The parents go nuts trying to find one as the supply sells out and a bidding war sets in, and the parents often have little real idea of what it is they are trying to get. All they know is that it's what the kids want. All that the kids know is that it's what everybody else wants.

The human and social pressures to conform to the group are very strong. People often conform to the group even without realizing it, or admitting it. Some people fancy themselves non-conformists, but they almost always simply adopt an alternate fashion of dress, hair style, speech, and behavior. You can tell who the "non-conformists" are by which uniform they wear.

In fact, to be a "real non-conformist", you have to conform and wear the uniform. If you simply dress and act any way you want to, people will just regard you as a weirdo.

- For more than 20 years that I can remember, McDonald's has been advertising that it is simplyÂ *The*Â place where everybody eats burgers. The commercials tell our children, "It's just the regular American Way. Everybody is doing it." Not to be left behind, Dairy Queen has launched a series of commercials that tries to convince us that we should just refer to Dairy Queen as "D.Q.", as if eating at Dairy Queen is so commonplace that everybody will immediately know what you mean when you just say "D.Q.". So far, that phony chummy familiarity does not seem to have caught on, probably because people know that it's phony and resent the attempt at manipulation of their feelings. Oh well, better luck with the next advertising campaign.

- In a wicked twist on this psychology, organizations like Microsoft or political special interest groups have been caught sponsoring phony "grass roots campaigns" where long tables of tired, frowzy grandmothers were paid to hand write a river of "spontaneous" letters that supported some particular position that their employer liked... The numerous letters were supposed to show thatÂ *everybody*Â favors the sponsor's position.

- On television, advertisements for two TV shows declare that "Everybody is talking about..." and "All of America is talking about..." (Oddly, I had never watched either stupid show and none of my friends said anything about them either.)

- The "Moonies" â the members of the Unification Church of Rev. Sun Myung Moon â use the "Everybody's Doing It" technique in their recruiting and indoctrination routines. Newcomers are invited to lectures or workshops, where they are exposed to Unification Church doctrines likeÂ *The Divine Principle*. The Moonies alwaysÂ pack the audienceÂ with committed true-believer members, making sure that the audience is always more than 50% enthusiastic members, and then they arrange the seating so that each newcomer has an old member on both sides of him. To the newcomer, it seems like the doctrines of the Unification Church must be brilliant, because everybody else is really wowed and amazed at how clear and logical it all is...[6]

- Politicians love to use that stunt too. Richard Nixon and gang packed the gallery at the 1972 Republican National Convention with clean-cut photogenic Young Republican college kids who had been specially bussed in just for the occasion, just so that they could be seen on TV cheering for Nixon â just showing the American people that it wasn't only the old fascists

who loved Nixon...

- In 2004, George W. Bush is using a variation on this stunt: He appears before crowds that are "mostly friendly, invited guests".[16]Â Well that gets rid of the hecklers and the critics, doesn't it?

- Another recent example was onÂ *Meet The Press*Â (NBC TV). Steven Hadley, President G. W. Bush's National Security Advisor, declared on 3 December 2006 thatÂ "I think the American people understand the cost of failure..."Â (So let's all do what George wants.)
  Â Â Â No matter how many Americans understand the cost of failure, there is no evidence that the American people want to see more of their sons' lives wasted in a disastrous misadventure. There is no evidence that the American people agree with George. The results of the last election declare that the American people really do understand the cost of failure, and they are tired of George Bush's failures.

Alcoholics Anonymous and Narcotics Anonymous and Al-Anon use thisÂ *Everybody's Doing It*Â andÂ *Everybody Knows*technique often:

- Everybody recovers through x.A..
- Everybody knows that x.A. works, and has saved millions of lives.
- Everybody who ever overcame an alcohol or drug addiction did it by doing the Twelve Steps.
- Everybody goes to meetings.
- EverybodyÂ ***needs to go***Â to meetings.
- Everybody knows that the answer to every crisis in life isÂ *"Get to a meeting, as fast as possible."*
- Everybody knows that x.A. members are the experts on addiction.
- Everybody is just taking it "One Day At A Time."
- Everybody is in recovery.
- Everybody knows that the Twelve Steps work, and that all of the x.A. religious dogma is true.
- Everybody knows that x.A. isÂ "spiritual", not religious.
- Everybody knows that x.A. is the only way.
- Everybody knows that newcomer alcoholics and addicts are allÂ *"in denial"*, and if they object to anything about the "spiritual" 12-Step program, it is just their addiction talking.
- Everybody knows that the best thing you can do with an alcoholic or drug addict is force him to go to x.A..

- "Twelve-step programs are increasingly recognized as important resources and treatment adjuncts for recovering alcohol and other drug abusers."
  An analysis of 12-Step programs for substance abusers from a developmental perspective, Shulamith Lala Ashenberg Straussner; Betsy Robin Spiegel,Â *Clinical Social Work Journal*, Fall 1996 v24 n3 p299(11)

- "The tremendous fact for every one of us is that we have discovered a common solution. We have a way out on which we can absolutely agree, and upon which we can join in brotherly and harmonious action."
  TheÂ *Big Book*, 3rd Edition, William G. Wilson, chapter 2, "There Is A Solution", page 17.

  (What does "brotherly and harmonious action" really mean? That is yet another one of Bill's manyÂ euphemisms. And it usually it means is,Â "go recruiting"Â and thenÂ "attend A.A. meetings and help to indoctrinate the new recruitsÂ by not quite telling them the truth".)

Alcoholics Anonymous also makes good use of the social pressures to conform to the group. If A.A. can just make peopleÂ *Keep Coming Back*, then those people will eventually get worn down and converted to believing what everybody else is believing. They will end up saying and doing what everybody else is saying and doing. It's just human nature.

The flip side of theÂ *"Everybody's Doing It"*Â coin isÂ *"Nobody Is Doing It."*Â If you don't see it on TV, then it isn't real. If you don't hear an idea espoused on TV, then that idea must be radical or extremist, and can't be true.

For instance, the CIA didn't really perform experiments in mind control and brainwashing on innocent, unaware American and Canadian civilians, including giving them LSD without their knowledge. That can't possibly be true, because we never saw it on TV.[5]

Likewise, television and the movies always portray Alcoholics Anonymous in a positive light, with movies likeÂ *"My Name Is Bill W.", "Clean and Sober", "The Days of Wine and Roses"*, andÂ *"28 Days"*, and positive portrayals in TV programs like*"Cagney and Lacy"*Â andÂ *"ER"*Â andÂ *"The West Wing"*. Nobody on TV ever says that A.A. is actually a stupid superstitious cult religion that is completely ineffective for treating alcoholism, so that can't possibly be true.

- **Pomp, Ceremony, and Ritual**
*Pomp, ceremony, and ritual*Â are effective techniques for manipulation of the emotions of crowds. Everybody uses it, from the President of the United States, to the Queen of England, to the Pope. The Moonies like to have mass weddings where thousands of couples are married at a time. Adolf Hitler raised pomp, ceremony, and ritual to an art form atÂ the Nuremberg rallies.

Nazi Party Day, Nuremberg, 1934
Adolf Hitler is the center guy of the three who are facing us and giving the straight-armed salute.
Heinrich HimmlerÂ is Hitler's right-hand man there.

(click on image for larger version)

Speaking of large, powerful armies of disciplined, unthinking, obedient followers, Alcoholics Anonymous seems to have its own too. These quotes are from books of daily meditations for A.A. members published by the A.A. headquarters and Hazelden:

"I will center my thoughts on a Higher Power. I will surrender all to his power within me. I will become a soldier for this power, feeling the might of the spiritual army as it exists in my life today. I will allow a wave of spiritual union to connect me through my gratitude, obedience, and discipline to this Higher Power. Let me allow this power to lead me through the orders of the day."
Daily Reflections; A Book of Reflections by A.A. members for A.A. members, Alcoholics Anonymous World Services, Inc., 1990, August 27, page 248.

I will lock arms today and move forward in the company of those who need me. I need them also.
The Promise of a New Day: A Book of Daily Meditations, Karen Casey and Martha Vanceburg, Hazelden, November 4.

The interesting thing about pomp, ceremony, and ritual is that it has an irrational appeal. You are asked to accept an organization and its whole package of beliefs and dogma based on beautiful costumes, magnificent surroundings, rituals, ceremonies, and dramatic productions â things that have absolutely nothing to do with whether it is a good or bad organization, has a good or a bad agenda, or has a good or a bad leader.

You shouldn't choose your religion or your politics on the basis of who has the most colorful costumes or the most entertaining ceremonies, but a lot of people do.

A variation on this technique is lots of hoopla, fun, parties, spiritual jet-setting, get-togethers, conventions, and conferences.

Moonies Mass Marriage Ceremony, 13 Feb 2000

(click on image for larger version)

Alcoholics Anonymous has lots of ceremonies and rituals â every meeting is a ceremony where people practice rituals like incanting the Twelve Steps and Twelve Traditions, and praying out loud, as well as reciting several other pieces of standard church dogma at the start of every meeting. Unfortunately (or maybe fortunately), the ceremonies of A.A. are not nearly as dramatic or colorful as those of the Nazis or the Moonies.

- **Humor and Ridicule**
  Satire is a time-honored political weapon, and a devastating one. Few pompous, stuffed-shirt politicians or other phony leaders can stand much of it. A good joke can be deadlier than a gun when it comes to killing off bad politicians.

  Unfortunately, Alcoholics Anonymous doesn't have any good jokes about itself. A.A. pretends to have a lot of humor by laughing and joking about everything and anything except the stuff that really matters â like the faults and shortcomings of A.A. itself. A.A. claims to have rules like,Â "Rule #62: Don't take yourself too damn seriously."Â (12X12, page 149.)

  But what that really means is,Â "You can and should put yourself down, and tell jokes about yourself, and laugh at how stupid you are, butÂ don't you dare ridicule A.A. or its doctrines, or its founders." (I hear that the A.A. true believers go non-linear when you tell themÂ my jokes about A.A.... Too bad; they are missing out on some fun.)

- **Assume The Major Premise**
  People's minds have this peculiarity: Only the most thoughtful of listeners examine major premises â the premises upon which an argument is based. When a doubtful assertion is made, most people will plunge into arguing about the assertion without further thought about the underlying assumptions.

For example: in the early part of World War Two, before the U.S.A. had gotten into the war, the Nazis desired to convince the American people that Germany would defeat Britain and win the war. But if they had stated such an idea directly, it would have aroused the suspicions of the American people, who would have argued the point.

So, what the Nazis did was spread many stories and arguments about how the U.S.A. should go ahead and trade with a victorious Germany after the war was over:

- "Whether we like Hitler or not, we will have to deal with him."
- "If the Nazis win, let's not be sentimental â business is business. It is all an imperialist war anyway."
- "Europe is just too big for us to ignore, and not trade with, even if Germany is running the whole thing."

The listeners may have immediately launched into arguments over whether we should trade with Germany, but few challenged the underlying assumption, the major premise, that Germany would defeat Great Britain.

Another example:Â *"Why does America have the best government in the world?"*
No evidence has been supplied to support the idea that the United States (not "America") has the best government. Many European democracies from Denmark and Sweden to Switzerland would challenge that arrogant assumption.

In March of 2005, we are seeing the use of this technique of assuming the major premise in the tragic case of Terri Schiavo, a woman who 14 years earlier suffered a heart attack that stopped the flow of blood to her brain that caused most of her brain to die. Her husband favors stopping life support and letting her go, but Terri's parents and brother (the Schindler family) constantly talk about "saving her" and "keeping her alive" by re-inserting the feeding tube. That is assuming a fact that has not been established â that her brain is still alive â that she can be saved.

Her brother has even gone so far in his sadly deluded wishful thinking as to interpret some of her moans as speech declaring that she "wants to live". That isÂ *really*Â assuming a lot. Her moans of "Aaaah waaaah" could just as easily mean "I want you to leave me alone and let me die" (although in truth they don't really mean anything at all).

Those who favor keeping Terri on life support call it "judicial murder" for the courts to order the feeding tube to be removed in compliance with her husband's wishes. And out in the streets, protesters campaign for the governor or congressmen or judges or the President to "save the life of Terri".

What all of those activists erroneously assume is the major premise â that Terri Schiavo can in fact "be saved" and be "kept alive" and that she actually is alive and has a functioning brain â that there is something or somebody left in that body to save. But 14 years of debates and court cases and doctors' examinations and medical tests, as well as the failure of Terri's medical condition to improve in 14 years, have shown beyond a shadow of a doubt that the higher parts of her brain died and liquefied a long time ago, and that she isn't in there any more. There is nobody left to save. The real Terri Schiavo died 14 years ago.

[Update: June 2005: The autopsy of Terri Schiavo revealed that her brain had been hopelessly destroyed, and she was brain-dead for 14 years.]

(Also note that somebody is using the propaganda technique ofÂ *Observational Selection*Â on you when they choose what you will see on television. Out of the many, many hours of videotapes that the Schindler family has made, you get to see only a few seconds of images that appear to show Terry Schaivo reacting to her environment or responding to people stroking her face. But a judge who watched 14 hours of the videotapes concluded that she was not aware of her surroundings, and that she was not reacting to stimuli in any conscious manner.)

Also seeÂ *The Effectiveness of the Twelve-Step Treatment*Â for an example of A.A.-Trustee Professor George Vaillant's use of this technique.

For another example of "assuming the major premise", at Narcotics Anonymous meetings, the group secretary always asks:
"Can we see a show of hands of those who have a year or more of clean time to show that this program works?"
They never ask,
"Can we see a show of hands of those who have a year or more of clean time without doing Bill Wilson's Twelve Steps, to show that his bombastic cult religion nonsense is completely unnecessary?"
FYI: I am one of those hands. Â :-) Â Â And I'm not the only one...

- ***Petitio Principii*Â â Assume Facts Not In Evidence**

*Petitio Principii*Â is similar to "Assume the major premise".

*Petitio Principii*Â is "a logical fallacy in which a premise is assumed to be true without warrant, or in which what is to be proved is implicitly taken for granted." In court, lawyers will scream,Â "Objection, Your Honor! The counsel is assuming facts not in evidence!"

> "I don't believe in astrology. But then again, I'm a Capricorn, and Capricorns don't believe in astrology."

Another facet of "*Petitio Principii*" is asking questions that are really veiled statements. One of the most famous examples of that is the question, "Have you stopped beating your wife yet?" It doesn't matter whether you answer yes or no, you are confessing to having beaten your wife.

One of the most annoying things about religious recruiters and proselytizers is how they assume that you are a hopeless sinner, before even bothering to ask about your actual spiritual condition. Their tracts advertise "How To Get On Target", without asking where you are currently aimed. They just assume that you are a disgusting sinner, headed for perdition, going to Hell in a bucket. (And they rationalize their behavior by declaring "All are sinners" â which they conveniently interpret to mean that they are entitled to lecture you about religious matters.)

Alcoholics AnonymousÂ uses this techniqueÂ in many ways. For instance:

- First, Bill Wilson tried to get prospective recruits to sign blank checks, and promise to go to "any length" to quit drinking:

> Wait for the end of the spree, or at least for a lucid interval. Then let his family or a friend ask him if he wants to quit for good and if he would go to any extreme to do so. If he says yes, then his attention should be drawn to you as a person who has recovered.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 90.

What if he saysÂ "No, I won't go toÂ *any extreme*. There are all kinds of things that I won't do to get sober, including lie, cheat, steal, and rape little girls when the Moon gets full. I won't join a crazy cult religion, either."?

> "If you have decided you want what we have and are willing to go to any lengths to get it â then you are ready to take certain steps."
> *Alcoholics Anonymous*, William G. Wilson, "How It Works", 3rd & 4th Edition, page 58.

But then, some pages later, Bill Wilson suddenly assumed a big fact not in evidence:

> Remember it was agreed at the beginningÂ *we would go to any lengths for victory over alcohol.*
> *Alcoholics Anonymous*, William G. Wilson, "Into Action", 3rd & 4th Edition, page 76.

Nowhere does it say that all of the alcoholics agreed in the beginning to go to "any length" to quit drinking. Bill Wilson just asked a question in one place, and then, in another place, he assumed the answer that he wanted.

- "When they choose a sponsor, beginners should usually choose someone with four to eight years ofÂ *Time*. Someone with less time may not be experienced enough, while someone with much more time may be too spiritual to relate well to a beginner's problems."

If you want to argue with that statement, the usual human thing to do is to start arguing about how many years the ideal sponsor will have, rather than whether one should get a sponsor at all, or whether having many years ofÂ *Time*Â makes someone more spiritual.

That "advice" has many underlying assumptions â premises â none of which are supported by any evidence (and none of which are even true):

- Beginners should get sponsors.
- Beginners will benefit from having sponsors.
- Suitable sponsors will be able to relate to the beginners' problems and help them with those problems.
- People grow increasingly spiritual from more years of practicing the Twelve Steps and going to A.A. meetings.
- People with lots ofÂ *Time*Â are so spiritual and holy that they have moved up to another plane of existence, one that is just too lofty for a beginner to handle, and one from which the terribly holy old-timers may have difficulties relating to the common rabble.

None of those assertions have been proven or even clearly stated and supported by evidence and facts. The speaker just shoves it all at us, "under the table", so to speak, as assumed facts that are just incidental to the question of how many years of sobriety a good sponsor should have.

In fact,Â recent research has shownÂ that newcomers do not benefit at all from getting sponsors. In a recent controlled study, a group of new Narcotics Anonymous and Alcoholics Anonymous members who got sponsors did no better than another group who didn't get sponsors. But strangely enough, the elder membersÂ *who chose to become sponsors*Â did better than the other members who did not choose to act as sponsors. (The sponsors were a self-selecting group; not randomly chosen.) It seems that getting their egos stroked, acting as puffed-up, all-wise, all-knowing sponsors, ordering the wimpy newcomers around, helps the sponsors to stay clean and sober, even if it doesn't help the newcomers any.

- In his second book, Bill Wilson wrote about confessing all of one's sins (Step Five) by saying:

> The real tests of the situation are your own willingness to confide and your full confidence in the one with whom you share your first accurate self-survey.
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 61.

First accurate self-survey? Says who? Bill Wilson was assuming a lot in declaring that newcomers to A.A. hadÂ *never*done an accurate self-assessment before. How would he know? But then, Bill always assumed that alcoholics were justÂ immoral bumsÂ who needed to be reformed withÂ his version of spirituality. Bill Wilson assumed that all A.A. newcomers were strangers to real religion, people without any real morals or spirituality â they were even atheists or agnostics â who knew nothing about God and who had never done any introspection before. Bill also wrongly assumed thatwallowing in guilt and only listing negative thingsÂ â all of one's "defects of character", "moral shortcomings", and "wrongs" â constituted "an accurate self-survey".

Also see theÂ *Bait And Switch Con Game*Â web page forÂ an example of Bill Wilson usingÂ *Petitio Principii*Â to convince people that they must believe in his beliefs.

- **Hidden Assumptions**

Hidden assumptions are much like the previous two kinds of assumptions,Â Assume The Major Premise, andÂ Assume Facts Not In Evidence (*Petitio Principii*), but in this technique the assumption is so subtle that it isn't even mentioned.

Television infomercials that sell stock market trading computer programs, or options or FOREX trading programs, all try to foist numerous hidden assumptions on the viewers:

- They assume that stocks, contracts, or other pieces of paper will routinely go up and down in price in neat cycles, and that you will be able to choose a stock, option, or futures contract that will conveniently do so for you.
- They assume that you or their computer program will be able to pick the correct stock or option and buy it at the lowest price, and then sell it at the highest price. In other words, they assume that you or their program will be able to "time the market".
- They assume that there is something called a "cash flow" that you can just dip into, as if it were a river of money, and you can just scoop out buckets for yourself. There is no such thing in the financial markets. The reality is that there are a lot of sharp, experienced, professional traders who are buying and selling pieces of paper while haggling over every penny.

- They often tell you that you can place stop losses on every order. That is true, but you still lose money before the stop loss takes effect.Â *It stops the loss from getting even worse; it doesn't stop you from losing money.*Â And stop loss orders don't always take effect as soon as you wish. In big stock market crashes (like 1929 and 1987), people had to wait a long time, a seeming eternity, while they watched their stock sink like the Titanic, before their sell order was finally filled by a willing buyer â filled at a very low price. (Often, there just aren't a lot of willing buyers around in a stock market crash. Everybody is trying to sell. And you can't sell something until someone else wants to buy it from you.) That infomercial implies that you will only lose a little bit on bad trades because of stop loss orders, while making big profits on lucky trades. (*"Stop your loses; let your winnings run."*) But that isn't necessarily true or always even possible. And they assume that if you lose a little on one trade, that you will make it up on the next trade. That isn't necessarily true, either. If your luck is bad, you can stumble from one losing trade to another until you run out of money.

- The infomercial makers assume or imply that the computer program is looking at the same things as the market. It isn't. Computer programs track current trends in prices â in other words, by analyzing the past, up to just a few seconds ago â but the big institutional investors and traders are always buying and selling things based onÂ *their vision of the future*, as determined by such arcane factors as the prime interest rate, the price of oil, housing starts, unemployment figures, retail sales, and various other economic measurements like business profit predictions and the Consumer Confidence Index, and even rumors and whispered tips and insider trading information. The big boys are always looking at the future and trading on the basis of what is going to happen in the future, while the computer program in your dinky little computer is reacting to the present and past prices.

- The infomercial makers assume or imply that their computer program can predict the future. Oh really? If it can, why isn't everybody using it?

- They assume that your trades won't ever influence the market â that your buy and sell orders won't drive prices up or down, no matter how large your orders are. They even assume thatÂ *ALL*Â of the buy and sell orders of all of the other people who also bought the same computer program won't drive the prices up or down, and that you won't end up in a race with them to see who can get their orders executed first. The infomercials don't mention the fact that if the computer program tells every program user to buy the same stock or option at the same time, the price of the stock or option will jump sharply, and then it won't be a bargain any more.

- The talking heads in infomercials assume that leverage is good, and that you will profit from it. They happily declare that you can buy stocks, options, and futures contracts on margin â meaning, putting up, in cash, only a small fraction of their actual cost, and borrow the rest. That allows you to profit by several times as much money if your gamble pays off big. But it also allows you to lose several times as much money if the trade goes sour. In highly-leveraged deals, you can easily lose more than your total investment, and end up owing the broker large sums of money. (Remember Long Term Capital Management.) The salesmen don't mention that ugly fact.

- The infomercials assume that you can win at the financial markets trading game, even if you are a beginner, just because you bought an easy-to-use computer program. Those TV commercials imply that the big boys in the financial markets are too stupid to buy the same computer program and use it (if only to see what the dumb thing says), and that the big boys are too stupid to hire lots of smart young computer programmers to write even better programs for them (which they have already done).

- ♦ The infomercials assume that it is easy to be right.
  Many billions of dollars worth of stocks, bonds, options, and futures contracts are bought and sold every day, and every trade is between two people or companies, one of whom buys and one of whom sells.
  Curiously, both parties in every trade believe that what they are doing is the best thing to do.
  Every time you buy, the guy who is selling is convinced that you are making a mistake.
  Every time you sell, the buyer is convinced that you are making a mistake.
  If you are a beginner who is trading against experienced professionals at big market-making brokerages, who is more likely to be right?

- **Assume Futures or Future Results**
  Stack the deck in an argument by assuming that certain future events or future results will occur.

  For example, a political candidate can be dismissed with this argument:Â "Sure, Joe Blow is a great guy and he has some good issues and he says some good stuff. But he can't win, so there is no point in seriously considering him as a candidate."

  Obviously, if nobody will seriously consider Joe as a candidate, he can't win.

  (And now, in 2009, do you remember how many people said that the young, black, Junior Senator from Illinois couldn't possibly really win the Presidency, so his campaign was just a joke, and shouldn't be taken seriously?)

- **Fallacy of Presupposition**
  Ask for an explanation of something not yet established:
  "If evolution is true, then..."
  Since the study of evolution is a work in progress, one can always find a point of controversy, and challenge the other person to demonstrate that it is true, while assuming that failure to do so proves the entire matter false.

- **Affirmation of the Consequent**
  Improperly validate the key element of an implication:
  "The Bible says God's people will be happy; we are happy; therefore the Bible speaks truthfully."

  A.A. does it like this:
  Â Â Â "RARELY HAVE we seen a person fail who has thoroughly followed our path. To thoroughly follow our path requires absolute abstinence from drinking alcohol. If somebody drinks, then he isn't thoroughly following our path.
  Â Â Â "But this one guy didn't drink, so he did thoroughly follow our path, and he stayed sober, so that proves that the program works to keep people from drinking."

- **Irrelevant Conclusion (*Ignoratio Elenchi*)**
  It's a conclusion that does not follow from the argument:
  "Jehovah's Witnesses have the true religion because only we do so much door-to-door preaching."
  If you point out that Mormons also preach in this way, you'll be told that they don't do as much of it,

or that their religion isÂ ***obviously***Â false.[9]

Likewise,Â *"Alcoholism is bad, really bad, so A.A., which is intended to save alcoholics, is good."*
That is bad logic. There is no evidence that the A.A. cult religion actually saves anyone.

That bogus logic is no different than,

- *"Drug addiction is bad, really bad, so Scientology is good."*
  (Scientology has a front group called "Narconon" that claims to save drug addicts by using Scientology "principles" on them.)

- *"Cancer is bad, really bad, so the Nazi Party is good."*
  (The Nazis really did want to wipe out cancer. SeeÂ *The Nazi War on Cancer*Â by Robert N. Proctor.)

Â Â Â A.A. missionaries like to brag about the scientific studies that have found that there is a genetic factor in alcoholism. They then claim that those studies support the A.A. disease theory of alcoholism. That is anotherÂ *irrelevant conclusion*.
Â Â Â The fact that some genes affect a person's susceptibility to alcohol addiction does not make alcoholism a disease any more than my genes for blue-green eyes prove that Blue-Eye-ism is a disease. And I also have the genes for premature graying of the hair, and that isn't a disease either.
Â Â Â Just because someone is more prone to alcohol addiction does not make him powerless over alcohol or unable to control his actions, and it does not make habitual alcohol consumption a disease.

- **Confusion of Beliefs with Facts**

This includes

- *Substitution of Beliefs for Facts*,
- *Insistance that "Beliefs Trump Facts"*, as ifÂ *"It's what I believe"*Â is the final answer to an argument,
- andÂ *"Belief Equals Truth"*, as if something is true because somebody believes it.

Dogmatic religious sects with bizarre beliefs are notorious for using this logical fallacy. When you present a true believer member of such a church with facts that contradict his beliefs, he answers, "Well, what we believe is...", and that is supposed to be the end of the argument â the final answer on the subject. The fact that they believe something supposedly makes contradictory facts irrelevant and invalid â contradictory facts are just minor irritants to be ignored and discarded.

An aspirin commercial portrayed a man declaring,Â "Last year I had a heart attack, right there where she is standing. If it hadn't been for Bayer aspirin, who knows? I believe that Bayer aspirin saved my life."
No actual medical evidence is supplied to show that aspirin really saved him from death by heart attack, and the commercial doesn't actually say that Bayer aspirin saved the guy's life. In fact, the commerical does not even say that the man took any aspirin. We just get his uninformed "belief". Besides, is that guy for real, or is he just an actor reading a script?Â
Note that this is also an example ofÂ *Sly Suggestions*Â andÂ *Proof By Anecdote*.

A woman who was campaigning for John McCain in Florida declared,Â "You've got to understand how bad it will be if we get Obama, and I firmly believe that."
NPR (National Public Radio), Morning News, 3 November 2008.Â
That woman's firm belief is not evidence of anything â other than evidence of what her strongly-held opinions happen to be.

When a person who is skeptical of Alcoholics Anonymous declares,Â "The Bible does not say that God will make you quit drinking and restore you to sanity and take care of your will and your life for you and remove all of your defects of character just because you 'turned your life over' and confessed all of your sins to your sponsor,"Â a 12-Step believer answers,Â "What, don't you believe that God cares about you and wants you to be healthy and happy?"

The answer is,Â "It doesn't matter what I believe about God's feelings and desires, the fact remains that the Bible still does not say that God will do the 12 Steps for you."

(In fact, the Bible actuallyÂ specifically bans several of the practicesÂ that are embodied in the 12 Steps.)

Another A.A. advocate declared:

> "I am a firm believer that if someone is ready and is truly an alcoholic of the desperate sort that I was, within this program there is a solution that works."
> http://www.soberrecovery.com/forums/alcoholism-12-step-support/149124-aa-cult.html

There, the writer uses bothÂ *Lying with Qualifiers*Â andÂ *Confusion of Beliefs with Facts*Â to declare that the 12-Step program works, he believes, if...

A variation on this logical fallacy is,Â "I'm sure that...", as in,
"I'm sure that President Bush had the legal authority to spy on thousands of Americans and tap their phones without a warrant."
One political hack's convinced opinion, no matter how sure he is, doesn't change the facts of the matter, or change what is actually in the laws of the USA.

- **Substitute Feelings For Facts**
  Declare that youÂ *feel*Â that something is true, and act like that is supporting evidence.

  - "I feel that he is a good man. He has a good heart."
  - "I feel that it was the right thing to do. I don't have any qualms about it."

  The "good heart" argument is one that George W. Bush uses often. When one of Bush's political appointees proves himself to be totally incompetent and unqualified for his job, Bush answers,Â "He has a good heart."

  Likewise, President Ronald Reagan used this technique when he declared,Â "My heart tells me that we did not trade arms for hostages, although my head tells me that we did."

  And G. W. Bush did the same thing again: After the Intelligence Community released a National Intelligence Estimate that clearly stated that Iran was not building nuclear weapons, and had abandoned their nuclear weapons program many years ago, Bush declared,Â "I still feel that Iran is a threat."

- **Confusion of Abstractions with Reality**
  This includesÂ *Confusing the Map with the Territory*. (The territory is the real land; the map is an

abstraction drawn on a piece of paper.)

We humans are very good at making abstractions to reduce big complex things to small manageable simple ideas. Unfortunately, we are prone to making the error of confusing our abstractions with the actual thing that they represent. Then,

- "Fighting for the Flag" equals defending one's country from an enemy. (They are not the same thing at all.) Likewise, burning a flag is not burning down America.
- An ardent young Nazi wrote a letter to his girlfriend, explaining that he did not wish to die in the coming war (WWII), but if he did, it didn't matter, because "What is my death compared to the Greatness of Destiny?" Obviously, with 20-20 hindsight we can see that Adolf Hitler offered no "Greatness of Destiny" that was worth dying for. (It is an immense human tragedy that for thousands of years, young people have been conned into fighting and dying for such meaningless grandiose language.)
- A funny colored area on a paper map (an abstraction) is suddenly worth fighting for, even if "we" do not own it (like Vietnam and Iraq).
- In a stock market television program, a pundit declared that the current condition of the stock market was,Â "Liquidity seeking things of value."
  *"Liquidity"*Â is an abstraction, a relative measure of how much money is easily available for loans or purchases of stocks and bonds.Â *Liquidity*Â is not a hairy animal like a bear or a bull that prowls Wall Street seeking something to eat.

  Now there may have been a few people or institutional investors who were seeking something of value to buy â there are usually at least a few bargain-hunters around â but "Liquidity" was definitely not roaming "The Street", searching for something to buy. In fact, the sub-prime mortgage debÃ¡cle soon shattered the confidence of "The Market", and left it very illiquid. (In other words, those people who had some money decided that they would rather keep it than give it to some fast-talking con-artists.)

- **Circular Reasoning (*Circulus in Demonstrando*)**
  Support a chain of arguments by the arguments it contains, as in:
  "The Bible is true because it is written by God. The Bible tells us how God wrote the Bible. God doesn't lie, as the Bible tells us, so He wouldn't write a book that is false, would he?"

  Likewise,
  "If reading were not supposed to be illegal, then it wouldn't be against the law, would it?"

  Or,
  "Smoking marijuana is bad because it is against the law.
  Smoking marijuana is against the law because it is bad."

  Or,
  "You can get rid of the excessive noise from the Olympus E-510 camera's small Four-Thirds sensor by running a noise-reduction program that will unfortunately also erase all of the fine picture details along with the noise. After all, noise reduction programs are really just blurring programs."
  "But you can get the fine detail back at the expense of increased noise by sharpening or turning off the noise reduction."

"Besides, the noise isn't that important."

Or,
"The Alcoholics Anonymous program works great for the rare few people for whom it works great."

Or,
"It is okay to lie andÂ exaggerate how many lives A.A. really saves, in order to promote A.A. and get people to join A.A. â Â the end justifies the meansÂ â because A.A. is a wonderful organization that has saved so many lives...."

Variations on Circular Reasoning include:

- Begging The Question
- The Chicken and Egg Argument
- Circular Definition
- Ciruculus in Demonstrando
- Petitio Principii
- Reasoning in a circle

- **Appeal to Evil**
  Appeal to and arouse the worst parts of people's character. Hate-mongering, demagoguery, rabble-rousing, and similar methods of crowd manipulation can best be accomplished by appealing to the low, base, worst side of people's character â to the faults, vices, fears, and weaknesses of the audience. Various crowds can be wooed by appealing to their greed, anger, jealousy, vanity, fears, racism, sexism, hatred, or lusts.

  - In his classic book on mass religious movements,Â *The True Believer*, Eric Hoffer wrote:

    > Hatred is the most accessible and comprehensive of all unifying agents. It pulls and whirls the individual away from his own self, makes him oblivious of his weal and future, frees him of jealousies and self-seeking. He becomes an anonymous particle quivering with a craving to fuse and coalesce with his like into one flaming mass. Heine suggests that what Christian love cannot do is effected by a common hatred.[1]
    > Â Â Â Â Mass movements can rise and spread without belief in a God, but never without belief in a devil. Usually the strength of a mass movement is proportionate to the vividness and tangibility of its devil. When Hitler was asked whether he thought the Jew must be destroyed, he answered: "No.... We should have then to invent him. It is essential to have a tangible enemy, not merely an abstract one."[2]Â F.A. Voigt tells of a Japanese mission that arrived in Berlin in 1932 to study the National Socialist movement. Voigt asked a member of the mission what he thought of the movement. He replied: "It is magnificent. I wish we could have something like it in Japan, only we can't, because we haven't got any Jews."[3]

1. Heinrich Heine,Â *Religion and Philosophy in Germany*Â (London: Trubner & Company, 1882), p. 89.
2. Hermann Rauschning,Â *Hitler Speaks*Â (New York: G. P. Putnam's Sons, 1940), p. 234.
3. Fritz August Voigt,Â *Unto Caesar*Â (New York: G. P. Putnam's Sons, 1938), p. 301.

The True Believer, Thoughts on the Nature of Mass Movements, Eric Hoffer, pages 89 to 90.

- Senator Joseph McCarthy and his lawyer Roy Cohn used fear of Communists to terrorize the nation and build their careers. They became such vicious demagogues with their "black lists" of names and their accusations of people being Communists, or "Communist sympathizers", or "fellow travelers" that fear of Senator Joseph McCarthy and his staff of mad-dog anti-Communists replaced fear of Communism in many people's minds...

- Racists inflame their audiences by complaining about all of the "special privileges" that the blacks get through government programs, and complaining that the blacks are "taking over."

- White Supremacists and Neo-Nazis routinely preach hatred of blacks and Jews, and arouse fear of them by accusing them of giant conspiracies and horrible crimes.

- Some other politician might appeal to a crowd by arousing their laziness and greed, by promising pork-barrel projects that will put them on easy street. This tactic is routinely used on millionaire industrialists who are promised more lucrative government contracts and lower taxes.

- Preachers routinely use fear of death and fear of Hell to manipulate their audiences.

- Some preachers seek to induce disgust and homophobia in their audiences, to make them hate and fear homosexual people. Note that there is always a veiled game of one-upmanship going on in those tirades: "We are special. We are more holy than those other people because we don't do the disgusting things that homosexuals do..."

- Other evangelists preach hatred of abortionists and women who get abortions, and incite followers to shoot doctors and bomb clinics, in the name of "Preserving Life."

A.A. appeals to some bad characteristics, too:

- Arouse fear of death:
  - "You must eitherÂ *work a strong program*Â or else you will die drunk in a gutter."
  - Unless each A.A. member follows to the best of his ability our suggested Twelve Steps to recovery, he almost certainly signs his own death warrant.
    Twelve Steps and Twelve Traditions, William G. Wilson, page 174.
  - To one who feels he is an atheist or agnostic such an experience seems impossible, but to continue as he is means disaster, especially if he is an alcoholic of the hopeless variety. To be doomed to an alcoholic death or to live on a spiritual basis are not always easy alternatives to face.
    TheÂ *Big Book*, William G. Wilson, page 44.
  - "None of us in Alcoholics Anonymous is normal. Our abnormality compels us to go to AA... We all go because we need to. Because the alternative is drastic, either A.A. or death."
    Delirium Tremens, Stories of Suffering and Transcendence, Ignacio Solares,Â **Hazelden**, 2000, page 27.
- Appeal to vanity, egotism, and lust for power:

◊ "We Alcoholics Anonymous people are special, very special.Â We are so special that we areÂ God's Chosen People. Only unto us has God given the magic gift of healing alcoholics."

◊ "I'm so holy that I spend all day, every day,Â ***'Seeking and Doing the Will of God'***Â and practicing these principles in all my affairs (includingÂ all of my affairs with my mistresses, just like Bill Wilson did)."

◊ "After you have 10 or 20 years ofÂ *Time*, you are like unto a saint, respected, obeyed, and admired by the young. You can have an entire stable of young sponsees doing your bidding."

◊ "We really are Chosen. Our years of getting beaten down by alcoholism have prepared us for leadership roles. Now that we number in the millions â not just us, but all of the Twelve-Step groups â we can become a force for change."

â One of the A.A. faithful, "sharing" at a meeting.

(Presumably, after the peaceful, non-violentÂ *coup d'etat*, we can have a wonderful alcohol-free country run by a fundamentalist theocracy, just like Iran. Our new Fearless Leader will be the Ayatollah Anonymous, who will enforce the teachings of the Prophet, Bill Wilson.)

By the way, did anyone else notice the conflict between "becoming a force for change" and the ban on getting involved in outside issues â Tradition Ten? ThatÂ *"we number in the millions"*Â phrase means just one thing: enough registered voters to swing an election. That's politics, not recovery.

Did anyone else notice the embedded egotism and arrogance? Only the alcoholic 12-Steppers are qualified for leadership roles, because of their years of bottle-training. Only they can be "a force for change".

And why do we need such big changes now? Apparently, it's because the normal people who were running the world, and keeping things together, for all of those years while we were busy drinking ourselves to death weren'tÂ *"The Chosen People"*, and they weren't religious enough, and they haven't been doing a good enough job of running the country in a moral fashion. But just watch the changes after us brain-damaged alcoholics and drug addicts and religious fanatics seize power. *"Boy, will the ordinary people have to kiss our asses now. The shoe's going to be on the other foot now... We're really gonna be a force for change now..."*

The part that I still haven't been able to figure out is: "Exactly how does excessive alcohol consumption prepare us for leadership roles?"

And which is better for future leadership, whiskey, wine, or beer? What did Dubya drink?

Oh, and do you get bonus points for 20 years of snorting cocaine?

♦ Indulge theÂ *true believers'*Â love of absolutes:

- ◊ "Bill Wilson was inspired by God when he wrote the Twelve Steps and theÂ *Big Book*Â â Bill asked for, and received,Â *Guidance from God*, so every word in theÂ *Big Book*Â is unquestionably true."
- ◊ "A.A. practicesÂ the Oxford Groups'Â *Four Absolutes*Â â Â *'Absolute Honesty, Absolute Love, Absolute Unselfishness, and Absolute Purity'*."
- ◊ "Alcoholics Anonymous is the only possible way to overcome a drinking problem."
- ◊ "You must totally abstain from drinking, or you will be a drunkard â 'One drink, One drunk.'"
- ◊ Alcoholics Anonymous isÂ ***The Only Way***.

♦ Indulge lust for sex:

- ◊ "Newcomers are easy marks. They are just freshly detoxed, their heads are still cloudy, and they are very shaky and confused and insecure, so they are easy to fast-talk and pick up."
- ◊ "Every meeting is a cattle call. It's a good place to pick up women even if you aren't an alcoholic or an addict."
- ◊ "Once you have (or can claim to have) enough years of sobriety, you can start sponsoring all of the delicious young things that you want in your bed. Just walk up to them after their first meeting, and ask them if they wantÂ the help of a sponsor. And if anyone objects to your behavior, just point out that you have moreÂ *Time*Â than they do."
- ◊ "Heck,Â in Mike Q's Midtown Group, the old-timers get their pick of the new underage girls. The girls are even assigned to their new sponsors by the group's elders."

With all of those great selling points, do you think we can attract some new members to our "little fellowship"?

- **Appeal to Higher Principles**

You must do something, or we must support a certain course of action, because some Higher Principle requires it:

♦ Social Darwinism teaches us that the big and strong people should eat the small and weak people, because it will improve the species. It's Mother Nature's sacred law,Â *The Survival of the Fittest*. There is no sense in helping the small, weak, sickly people, because it will only let them reproduce and pollute the gene pool.

♦ The Pope declared that Spain and Portugal should seize all of the native American people's lands because they were heathens and "in rebellion against The One True God", and Spain and Portugal had the moral duty to Christendom and God to convert the natives to Christianity.

♦ Manifest Destiny teaches us that white men in the U.S.A. should kill Indians and steal their land because it is the white man's God-given destiny to dominate the continent and build a great nation (â a great white Christian nation, that is).

♦ Likewise, Israel currently argues that they have God-given right to steal the Palestinian people's land and water because God gave that land to some Jewish ancestors 4000 years ago â and they didn't lose the deed to the Romans 2000 years ago, like Moses and Jeremiah predicted that the Lord would make happen, if the Israelites weren't good enough:

"If you ever make idols, the LORD will be angry, and you won't have long to live, because the LORD will let you be wiped out. Only a few of you will survive, and the LORD will force you to leave the land and will scatter you among the nations."Â (Deuteronomy 4:26-27)

"Israel, today I am giving you the laws and teachings of the LORD your God. And if you don't obey them all, He will put many curses on you. Â ...
The LORD will let you be defeated by your enemies, and you will scatter in all directions."Â (Deuteronomy 28:15,25)

They sacrificed their sons and daughters in the fire. They practiced divination and sorcery and sold themselves to do evil in the eyes of the LORD, provoking him to anger. So the LORD was very angry with Israel and removed them from His presence ...
2 Kings 17:17,18

The LORD said,
Â Â Â People of Judah, I am the LORD your God, but you have refused to obey me, and you didn't change when I punished you. And now, you no longer even pretend to be faithful to me. Â ...
Â Â Â You have disobeyed me by putting your disgusting idols in my temple, and now the temple itself is digusting to me. At Topheth in Hinnom Valley you have built alters where you kill your children and burn them as sacrifices to other gods. I would never think of telling you to do this. So watch out!
Jeremiah 7:28 and 7:30-32

The LORD said,
Â Â Â I destroyed the land because people disobeyed me and rejected my laws and teachings. They were stubborn and worshiped Baal, just as their ancestors did. So I, the LORD All-Powerful, the God of Israel, promise them poison to eat and drink. I'll scatter them in foreign countries that they and their ancestors have never heard of. Finally, I will send enemy soldiers to kill every last one of them.
Jeremiah 9:12-16

Speaking of which, in chapters 2, 3, 7, 13, 17, 20, and 25 of the Book of Deuteronomy, Moses says that the Lord our God commands us faithful followers to practice religious bigotry, racism, mass murder, genocide, and ethnic cleansing, in order to keep people from worshipping the wrong God (which meant, "any God besides the blood-thirsty monster that Moses liked").

- "We met Sihon and his army in battle at Jahaz, and the LORD our God helped us defeat them. We killed Sihon, his sons, and everyone else in his army. Then we captured and destroyed every town in Sihon's kingdom, killing everyone, but keeping the livestock and everything else of value."Â (Deuteronomy 2:32-35)
- "The LORD our God helped us destroy Og and his army and conquer his entire kingdom of Bashan, including the Argob region. His kingdom had lots

of villages and sixty towns... We completely destroyed them all, killing everyone, but keeping the livestock and everything else of value."Â (Deuteronomy 3:3-7)Â

- ◊ "... you must destroy them without mercy."Â (Deuteronomy 7:3)
- ◊ "... you must stone them to death. ... Don't show any pity."Â (Deuteronomy 13:8-10)
- ◊ "You may hear that some worthless people there have talked everyone there into worshipping other gods... ... you must take your swords and kill every one of them..."Â (Deuteronomy 13:13-15)
- ◊ "... kill all the men. Take the women and children as slaves..."Â (Deuteronomy 20:14-15)
- ◊ And then the book ofÂ *Numbers*Â gives us helpful instructions at this point â it tells us to kill everyone in a neighboring city, even the baby boys, except for the virgin girls, whom we shall keep and turn into our sex slaves:
  "Moses became angry with the army commanders and said, "I can't believe you let the women live! They are the ones who followed Balaam's advice and invited our people to worship the god Baal-Peor. Â ... Â You must put to death every boy and all of the women who have ever had sex. But do not kill the young women who have never had sex. You may keep them for yourselves. Â ...
  Moses and Eleazar followed the LORD's instructions, and listed everything that had been taken from the Midianites. The list included Â ... Â 32,000 young women who had never had sex.Â (Numbers 31:14-35)

> If Moses' army kept 32,000 young virgins for themselves, then they must have slaughtered at least three or four hundred thousand other people â older married women, widows, younger girls, men, boys, and infants, because virgin young women were pretty rare, because the girls married very young, soon after puberty. There wasn't much of a time window during which girls were virgin young women. If Moses were alive today, he would be taken to the Hague in chains and put on trial for war crimes, right beside Slobodan Milosevik and Robert Mugabe.Â *"Genocide"*Â is the only name for such racist immoral conduct.

- ◊ "Whenever you capture towns in the land the LORD your God is giving you, be sure to kill all the people and animals. ... If you allow them to live, they will persuade you to worship their disgusting gods, and you will be unfaithful to the LORD."Â (Deuteronomy 20:16-18)
  Now that is downright wacky. The livestock will persuade you to worship false gods? Somebody is insane.
- ◊ "The LORD your God will help you capture the land, and He will give you peace. But when that day comes, you must wipe out Amalek so completely that no one remembers they ever lived."Â (Deuteronomy 25:19)

And then chapter 21 of Deuteronomy, verses 11 to 14, handily teaches us how to make sex slaves out of the surviving enemy women: If she is beautiful enough to make you want her, then cut her hair and fingernails, dress her in Israelite clothes, and give her a month to mourn for her dead husband or father (whom you killed). Then you can drag her into your bed and keep her as your sex slave for as long as you wish (they call it, "marry her"). If you grow tired of her, you can get rid of her at any time you wish (they call it "divorce her"). But if you have had sex with her â "if you have slept with her as your wife" â then you have destroyed her cash value â you have "dishonored her", and you cannot sell her into slavery

any more. You will have to give her her freedom â just boot her out into the streets when you are done with her.

Oh well, I guess that's just the price of getting laid while keeping people from worshipping the wrong god.

- Old Nazis tell us that the S.S. hadÂ a noble spiritual missionÂ to elevate the human race by protecting and enhancing the purity of the white, blue-eyed, Aryan race. Eliminating the Jews, Blacks, Gays, and Gypsies, and preventing them from further contaminating the gene pool, was only a part of that great program.

> *"And then did the heroic S.S. soldiers smite the disgusting Jewish villages in the land of the Ukraine, completely destroying them all, killing everyone, but keeping the livestock and everything else of value, for the LORD was with them:Â* ***Gott Sei Mit Uns****."*

- Communism teaches us that we must overthrow the rich people and seize all of their property and kill them all and spread Communism everywhere because Dialectical Materialism teaches us that the Revolution of the Proletariat is inevitable â the "Force of History" cannot be stopped.

- For the sake of "Welfare Reform" and "Compassionate Conservatism", we should kick all of the single mothers off of welfare. It will "teach them to be responsible."

- In Alcoholics Anonymous, you must quit drinking because God wants you to, so that you can then spend the rest of your life "seeking and doing the Will of God." (Which,Â according to the Old Testament, might be "*Kill all of your neighbors who are not Jewish, except for the virgin girls, whom you may keep as your sex slaves.*")

- **Appeal to Authorities (*Argumentum ad Verecundiam*)**
  Cite and quote all kinds of authorities to support your statements. Also seem to obtain support from famous people who are not present to state their actual opinions.
  - In Herman Melville's classic novelÂ ***Moby Dick***, the crew begged Captain Ahab to stop his suicidal monomaniacal persuit of the white whale. Captain Ahab dismissed the crew's sane advice with the statement:
    Â Â Â "There is one God who is Lord over all the seas, and there is one Captain who is lord over all the Pequod. Now get back to your post."
  - Religious proselytizers argue, "Einstein believed in God. Do you think you are smarter than Einstein?"
  - "The Bible says that there were giants in the Earth in those days, so of course dinosaurs lived at the same time as people."
  - Another appeal to an authority: "Professor I.M.A. Bore of the Philadelphia Institute of Phrenology states that Green Eggs and Ham is the most beneficial breakfast there is. Who are you to claim that you know more than Professor Bore?"
  - A radio advertisement for vitamins says, "Dr. Sawbones, a recognized authority on blah-blah..." Recognized by whom? What medical school or university or council of doctors recognized Dr. Sawbones as an authority on anything? We got no actual evidence that Dr. Sawbones knows anything, just a passive-voice declaration that Dr. Sawbones has been "recognized".
  - "It's the World Of God."

Â Â Â I want to conclude with a word about "You gotta believe it 'cause it's in the Bible." You can bet your bottom dollar that the person saying it is not referring to the Sermon on the Mount. Rather he has in mind a passage you have no business believing in â one, for instance, supporting homophobia or gender inequality.
Â Â Â No one says, "You gotta believe it 'cause it's in Shakespeare" or Dante or Goethe or Pushkin. Although not as much as the Bible, these writings still have a lot of authority for a lot of people. The difference is they have noÂ *doctrine*Â of authority.
Â Â Â Why, for Christians, should the Bible alone have a doctrine of authority, especially when such doctrines demand either a literalist approach which is unacceptable or something which waffles hopelessly?
Â Â Â Why does the Bible need a doctrine of authority? To compel our allegiance? To make us believe something our reason, experience and conscience reject? How can anything outwardly command us that has not first inwardly claimed us? Besides, nobody thinks all biblical passages are of equal worth, that each represents an axis on which our whole faith pivots.
William Sloan Coffin,Â *The Heart Is A Little To The Left; essays on public morality*, page 50.

William Sloan Coffin served for eighteen years as Chaplain of Yale University, was Senior Minister of Riverside Church, and is President Emeritus of SANE/FREEZE: Campaign for Global Security.

And yes, I know, that is another appeal to authorities.

A variation on theÂ *Appeal To Authorities*Â trick is a bogus appeal to authorities â city phony or questionable or non-existent authorities. For example, a sensational TV show about UFOs described an unknown object as, "...but many experts considered it a UFO." Excuse me? What "experts"? They were never named. And how does someone become an expert on UFOs? Can you get a Ph.D. in Ufology? Will the U.S. Air Force or NASA or the CIA or NSA certify you as an expert on UFOs? For the purposes of that TV show, it seemed that an expert was anyone that they wished to call an expert.

Another kind of appeal to authorities isÂ *Name Dropping*, where the speaker liberally salts and peppers his speech with the names of the famous, rich or powerful people, as if movie stars and millionaires have all of the wisdom of the world.

In A.A. history, Dr. Frank Buchman was of course the champion name dropper. He spent his whole lifeÂ in pursuit of the rich and famous, and dropped their names all over the place.

In A.A., the rap is:

- "Well, Bill Wilson wrote in his second book that if you don't do the Twelve Steps, you areÂ signing your own death warrant, so you had better do all of the Steps all of the time if you want to live.
- "Joe Blow has twenty years of sobriety, so when he says that six times seven is 48, you'd better believe he's speaking from a wealth of experience."
- "Bill Wilson wrote in theÂ *Big Book*Â that alcoholism is a spiritual disease, so it's a proven fact.
- "Dr. William D. Silkworth" said that alcoholism is a disease coupled with an allergy, so there is no question about it."

- "Professor George E. Vaillant of Harvard University says thatÂ all alcoholics should join A.A., even though it doesn't work, so they should, of course, for their own spiritual well-being."

A variation onÂ *Appeal to Authorities*Â is to get a fake expert to say what you want people to hear. Use some bozo who got his Ph.D. from a diploma mill, and call him the greatest expert on the subject in the country, and have him spout your party line. That's what the current anti-abortion movement is doing with their pseudo-scientific claims that abortions harm women's health and drive them to suicide. Their "expert", the "greatest authority on the subject", got his degree from a "non-accredited institution", and his "research" is little more than a collection of anecdotes. (See Bill Moyers, PBS, 20 June 2007.)

Another variation on theÂ *Appeal to Authorities*Â technique is to use the passive voice to award bogus honors to bogus authorities, as in, "Mr. Ima Bore has been recognized as the greatest authority on Chinese vitamins." Has been recognized by whom? (Half a dozen ignorant sycophants?)

Another variation on theÂ *Appeal to Authorities*Â technique is to falsely quote things that were never said or written, as inÂ "Professor Bore declared in his encyclopedicÂ *History of Western Thinkers*Â that unthinking obedience to the Powers That Be was the easiest path to happiness", when Prof. Bore never said any such thing.

Bill Wilson used this stunt when he declared that William James wrote in hisÂ *Varieties of Religious Experience*Â that spiritual experiences came from "compression at depth". James never said anything like that. (Bill Wilson was justÂ stoned out of his gourdÂ when he read theÂ *Varieties of Religious Experience*.)

Bill Wilson also declared that the famous psychiatrist Carl Jung said that the only cure for alcohol addiction (dipsomania) was religiomania â religious fanaticism.Â Jung never said any such thing either.

- **Cite Credentials**

This trick uses real credentials, titles, ranks, certificates, diplomas, or positions to create the appearance that someone is an authority of some kind, and is right.

"Professor Ima Bore has 17 degrees from the Philadelphia Institute of Phrenology, including a Masters in Egg-Juggling."

Degrees and credentials are all well and good, but do not necessarily make someone right. Our history is full of disasters brought on by people with degrees. Degrees are not wisdom. Most of the people in government have some kind of credentials, and they still make horrible mistakes and get us into unnecessary wars and economic crises.

- **Use Fake Credentials**

This trick uses false or faked credentials, titles, ranks, certificates, diplomas, or positions to create the appearance that someone is an authority of some kind when he is not.

- The use of fake diplomas from a diploma mill immediately comes to mind. Then the charlaton assumes the title of "Doctor", and pretends to be a recognized authority on some

subject.

- Speaking of "getting recognized", that leads to setting up phony "councils" or "committees" or other organizations to issue fake credentials. For example,Â a child-abusing fake teen rehabilitation center, the "Pacific Coast Academy" in American Samoa, is not licensed or registered in the United States. The academy's only accreditation, the academy's owners say, is with the "Samoan Youth Rehabilitation Agency". But the "Youth Rehabilitation Administration Agency of Western Samoa" is a fake organization that the child-abusers set up to give themselves credentials. That fake agency basically does not exist, and it is not even listed in the telephone directory.

- A vitamin salesman says that his product is approved by "The Vitamin Council". What the heck is "The Vitamin Council"?

- **Appeal to Force (*Argumentum ad Baculum*)**
  It is an exploitation of fear:Â *"If you don't believe what we're saying, you will be destroyed by God!"*

  > Â Â Â "You must have faith. It's very important that you believe. Little Susie didn't believe in Santa Claus, so God got mad at Susie and turned Susie's father into an alcoholic who got drunk and beat her. So you'd better believe in Santa if you don't want that to happen to you."

  (And yes, that example also uses theÂ *Proof by Anecdote*Â propaganda technique, andÂ Argue from Adverse ConsequencesÂ as well. See how easy it is to combine several techniques into just a few lines?)

  Similarly, if you won't join Alcoholics Anonymous, then the Big Bad Booze Bogeyman will get you:

  - *"Alcohol is cunning, baffling, and powerful" and wants to kill you.*
  - *Your addiction wants to kill you.*
  - *Your disease wants to kill you.*
  - *You are powerless over alcohol, so you will relapse and die drunk in a gutter.*
  - *Alcohol will destroy you.*
  - *Your inevitable fate outside of Alcoholics Anonymous is "Jails, Institutions, or Death".*

- **Appeal to Popularity â Appeal to the People (*Argumentum ad Populum*)**
  Claim that something is obviously true because many people are convinced that it is true.
  "Can you deny that the Bible is the most widely distributed book of all time? Can you deny that most people in this country are Christian? That proves that what we are saying is true."

  And:
  "A.A. is considered to be the most successful sobriety program of all time. Most people believe that A.A. is the best solution for alcoholism."

  Ignore the facts that there was a time when most people believed that the snake pit was the best treatment program for mental illness, and that there was a time when most people believed that the Earth was flat.

- **Appeal to Numbers (*Argumentum ad Numerum*)**

*Argumentum ad Numerum*Â maintains that the more people who are convinced about something, the more likely it is to be true, and the more people who do something, the more right it is. This trick is close to the trick ofÂ *"Everybody knows"*Â â "Everybody knows that we are right."

- "He is admired by thousands of loyal followers."
- "Millions of bottles sold."
- "As seen by millions on TV."
- "More than 1,000,000 sold."
- "Over six million people just like you have already called."Â (This one also usesÂ "Appeal to Common Folk".)
- "Billions of burgers served."
- "They sold over 20,000,000 bottles. That proves Lipozene really works."
- "When a diet pill sells over 20 million bottles, it's time to try it."
- "With over 15 million tablets sold, you owe it to yourself to give xxx a try."

Frank Buchman and his Oxford Groups / Moral Re-Armament organization used this propaganda technique constantly â they invariably bragged about how manyÂ thousands of people had attendedÂ their latestÂ *house party*Â or convention, and aboutÂ how many people had been convertedÂ by their latest mission.

> Â Â Â I am speaking today to the millions across the world who in these anxious days are increasingly looking to Moral Re-Armament as the one hope for the future.
>
> Frank Buchman, 29 October 1939,Â *Remaking the World: The Speeches of Frank Buchman*, Frank Buchman, pages 151-154.

But there was a flaw in their logic:

> "In their recent American tour, the Groups on at least three occasions â Detroit, Louisville, and Phoenix â found the work of conversion far harder inÂ *towns where they had previously worked:*Â still more significant, at Louisville, where two years previously hundreds had made their surrender, they found only eleven who had remained in any sense active members."
>
> *The Groups Movement*, The Most Rev. John A. Richardson, pages 26-28.
> Morehouse Publishing Co., Milwaukee, Wis., 1935.

Likewise, A.A. supporters claim that Alcoholics Anonymous has more thanÂ 2 million members in more than 153 countries world-wide, and they say that more than 13 million copies of theÂ *Big Book*Â have been printed, and then they say that those numbers prove that A.A. is a really good organization, and that all of Bill Wilson's religious beliefs must be true and correct, and that the Twelve-Step program must really work great.

Such an illogical argument ignores the fact that Hitler had far more than 2 million Nazis, and Stalin had far more than 2 million Communists, but those weren't good organizations, out to save the world. They also sold lots of copies of their books,Â *Mein Kampf*Â andÂ *The Communist Manifesto*, but neither Communism nor Nazism was a good philosophy for the betterment of the world, in spite of their many fanatical true believers. And neither of their systems worked, either, in spite of their large numbers of members.

Likewise, Scientology and the Moonies also have large numbers of members, and they also sell lots and lots of books, but that doesn't make them good cult religions, either.

The large numbers proved nothing except that it is possible to hoodwink a lot of people.

And A.A. is a complete failure as a treatment program for alcoholism. It hasÂ a very low success rate and a very high death rate. All of the bragging about how many people attend the A.A. meetings is pretty meaningless in the face of the A.A. failure rate and death rate.

- **Dismiss by Numbers**
  This is just the opposite ofÂ *Appeal To Numbers*: Dismiss facts or arguments that you don't like by claiming that they represent very small numbers of people or things.

  For example, when I complain that a certain computer program or feature or piece of hardware does not work correctly with the Linux operating system, the manufacturer invariably answers that not very many people run Linux, so he doesn't need to bother making his product work right with Linux.

  Likewise, when I ask for other things to work correctly, and have all of the features that I need to make them useful, the maker often answers that not very many people care about that feature.

  The same thing applies to politics. Politicians say (in so many words):
  Â Â Â Â "Not very many people really care about that issue, so we won't bother to do anything about it."Â
  (Never mind what is actually right or wrong...)

- **Appeal to Averages**
  The speaker appeals to an average that is false or irrelevant.

  For example, a serial killer might declare,Â "I may have kidnapped, raped, and murdered half a dozen pretty girls, but there are 150 million American women whom I did not harm in any way, so I really have a very good record, on average."

  A Congressman or Senator might declare,Â "Okay, so I got caught taking 100 bribes. But there were 10,000 bribes that I did not accept. (The other Congressmen got them.) So I'm really 99% honest. Really. Honestly."

  A.A. members use the same technique often:Â "Oh, yeh, there may be a few cases whereÂ sponsors rape their sponsees, and there may be a few thirteenth-steppers preying on the newcomers, and there may have been a few cases where the sponsors told their sponsees not to take their medications, and then the sponsees died, but on average most people get through A.A. without getting raped or killed."

- **Appeal to Fame**
  Claim that something is good because it is famous. This is a kind ofÂ *Appeal to Numbers*.

    - This is the famous Joe Blow, well-known for...

- Featured in newspapers and magazines...
- As seen on TV...
- Recognized by millions...
- Miss Blondie Starlette, the famous actress, says you should buy these cosmetics.

- **Dismiss by Lack of Fame**
  Claim that something is bad or inferior because it is not famous or well-known.

  - I never heard of you before.
  - Never heard of it...
  - Nobody's ever heard of that one.
  - ...Completely unknown outside of his own village...

- **Appeal to Antiquity (*Argumentum ad Antiquitatem*)**
  Validate a proposition by its age.

  - "Give me that Old Time Religion."
  - "People have been worshipping this way for thousands of years."
  - *"The Bible has survived for so long that itÂ **must**Â be true!"*
    Compare the Bible to the Illiad, Gilgamesh, or the Vedas. They are all older.

  By the logic ofÂ *Argumentum ad Antiquitatem*, we should all be worshipping the ancient Egyptian gods likeÂ ***Ra***Â â He's far older than Jesus Christ.

- **Dismiss by Antiquity**
  This is the opposite of the previous technique. Dismiss, discount, invalidate, or reject something because it is old. This technique falsely assumes that things are bad or untrue or invalid just because they are old.

  - "I can't believe that you are still using that old stuff."
  - "Man, that's really old. You don't still believe that stuff, do you?"
  - "That's really out of date. Why don't you get some recent studies?"

- **Appeal to Novelty â Newness (*Argumentum ad Novitatem*)**
  Claim that the newness of a statement proves its validity. This is just the opposite of Appeal to Antiquity. This stunt assumes that the newest thing is the truest thing.

  Jehovah's Witnesses say:Â *"Yes, there have been errors in the past, but we receive 'New Light' from Brooklyn, and so 'the light keeps growing brighter'. You see how this brings us closer to truth?"*

  Bill Wilson and other A.A. boosters often used this trick to argue that Alcoholics Anonymous was wonderful because it wasÂ *a great new method*Â of treating alcoholism; not that it was justÂ a recycled old cult religionÂ thatÂ had nothing new or original.

> In all, about two hundred cases of hopeless alcoholism have been dealt with. As will be seen,Â about fifty percent of these have recovered. This, of course, is unprecedented â never has such a thing happened before.
> *THE ONE HUNDRED MEN CORPORATION Prospectus*

> We are going to know a new freedom and a new happiness.
> TheÂ *Big Book*, 3rd Edition,Â *Into Action*, pages 83-84.

> ... the A.A. group is to be understood as an unusually intimate primary group which sponsors, in a potent learning situation, a new way of life â a new subculture.
> *Alcoholics Anonymous: An Interpretation*, Milton A. Maxwell, Ph.D., writing in *Society, Culture, and Drinking Patterns*, David J. Pittman and Charles R. Snyder, editors, page 582.
> Milton A. Maxwell was a member of the Board of Trustees of Alcoholics Anonymous World Services, Inc..

Cult religion is not a new subculture. It'sÂ a very, very old thing.

> What is really funny is that today A.A. boosters also like toÂ call A.A. treatment of alcoholism "traditional treatment", and declare that it is the dependable, old, tried-and-true method, so they are trying to use bothÂ *Appeal to Novelty*Â andÂ *Appeal to Antiquity*Â on us at the same time. They are simultaneously trying to claim that Alcoholics Anonymous is the latest, greatest, and best new invention and also the dependable traditional safe old thing.

- **Dismiss by Novelty**
  This technique is just the opposite of the previous one. Invalidate a proposition by its newness. This technique falsely assumes that things are bad or untrue or invalid just because they are new.

  - "Oh no, I'm not going for any of that new nonsense. If it hasn't been tested and proven true for a very long time, then it can't be trusted."
  - "People haven't been using that new method for very long, have they?"
  - "And that was invented, when, last year?"
  - "And how many millions of people has that medicine cured so far?"

- **Appeal to the Exotic**

  Try to make people believe that something is good because it came from distant lands or secret traditions or foreign cultures. Like it was hidden in the Cave of the Ancients in the Himalayan Mountains by celibate monks for ages, but now we have the secret.

For example: "American tourist discovers an Ancient Herbal treatment for hair loss on a chance trip to India".
Funny that India has even more bald old men than the USA does.

Similarly, women are bombarded with ads that proclaim that the French women have secret skin treatments that make them look forever young. I wish it were true....

And a cream for cracked, dry, skin advertizes: "a skin-softening formula known to ancient Mid-Eastern civilizations." So haven't we madeÂ *any*Â improvements in skin softeners since ancient times?

- **Appeal to Tradition**

Argue that people should do something or believe something because that's the way it has been done for a very long time â it's traditional.

- *"It's the way we've always done it."*
- *"It's our culture."*
- *"It's customary."*
- *"It's traditional."*
- *"It's an ancient belief among our people."*
- *"You can't upset everybody by breaking with tradition."*
- *"It's a process that's been going on for a long time."*
- *"If it was good enough for grandpa, it's good enough for us."*
- *"It's the stuff that made America great."*
- *"The Founding Fathers believed it."*
- *"Give me that old-time religion, it's good enough for me."*

The saying, "It's our culture," is often synonymous with, "Yes, we are doing stupid things. we do stupid things because we have always done stupid things." Even the Nazis noticed that logical fallacy: "When I hear people speak of culture, I reach for my pistol." â Heinrich Himmler.

Treatment centers that use 12-Step quackery on alcoholics and drug addicts like to call 12-Step-based treatment "traditional treatment", even though Alcoholics Anonymous is really only 70 years old, which makes it far from traditional. Burning girls at the stake for witchcraft, and putting the town drunkard in stocks and pillory, now that's traditional treatment.

- **Appeal to Normality**

Argue that:

- "It's normal."
- "It's policy."
- "It's standard operating procedure."

A close relative to the argument that "It's Traditional" is the declaration thatÂ *"It's Policy"*, orÂ *"It's Corporate Policy"*. The speaker gives no good reason for his behavior; he just says that "We do it this way because we do it this way."

National Public Radio recently (2013.05.15) came up with a good example of this: A tourist rip-off ice cream shop in Rome charges 18 Euros ($21) for a large ice cream cone. When the owner of the business was asked about the price, he rationalized, "I don't understand what the big deal is. It's normal." Of course the local Italians declared that there was nothing normal about paying $21 for an ice cream cone, and they would never do it.

- **Appeal to Poverty (*Argumentum ad Lazarum*)**
  Exploit the misconception that money corrupts.
  (The real proverb is,Â *"**The Love of Money**Â is the root of all evil."*)

  "A.A. is just a poor non-profit organization, so it must be a good organization."
  (Actually, A.A. has a lot of money, and isÂ committing serious crimes to get more.)

- **Appeal to Wealth (*Argumentum ad Crumenam*)**
  This item is just the opposite of the last one â argue that something is right because it is so rich and powerful and successful:
  "Well, Micro$uck software must be great stuff â just look at how rich Bill Gates is."

  The converse is:
  "If you're so smart, then why aren't you rich?"

- **Appeal to Common Folk**
  A politician argues that he is just a regular guy, and what he says is just common folk wisdom.
  "There ain't nobody here but us good old boys."

  George W. Bush uses this technique often, in claiming that he is not "an elitist" and not "one of the elite" (in spite of the fact that he was born into a very rich family, attended Yale University, and joinedÂ *Skull And Bones*, one of the most elite, exclusive and powerful fraternities in the world), and was molly-coddled and protected all of the way to the White House.

  Bill Wilson used this stunt often:

  > We are average Americans. All sections of this country and many of its occupations are represented, as well as many political, economic, social, and religious backgrounds.
  > TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 17.

  Then Bill tried to pass offÂ his crazy cult religionÂ that he got fromÂ the fascist Hitler-praising Dr. Frank BuchmanÂ as "regular American":

  > We represent no particular faith or denomination. We are dealing only with general principles common to most denominations.
  > TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 17.

- **Appeal To Stupidity**
  Flaunt an anti-intellectual attitude, and belittle knowledge, wisdom, intelligence and education.

  This technique is closely related toÂ *"Common Folks"*Â â Â *"There ain't nobody here but us stupid*

common folks. I'm just a regular ignorant Joe, just another man of the people."

Radio and TV commercials say,

- "I'm no brain surgeon."
- "I'm not a rocket scientist."
- "I don't know how it works, but I know that it works."
- "I'm no computer whiz but..."Â (But I'm smart enough to figure out how to give my money to a fast-talking salesman.)
- "I'm so stupid that I can't tell the difference between margarine and butter."
- "I'm so stupid that I can't tell the difference between real wood siding and plastic, or between real leather and plastic."
- "I'm so stupid that I can't tell the difference between real orange juice and chemical soup."
- "My dog is so stupid that he can't tell the difference between soy beans and bacon."

A corollary to this technique is contempt for people who have some intelligence or education. Preachers have been known to declare,Â "Those elitist people have fancy talk and big words and clever arguments, and they try to make us feel like fools â but they are the real fools â simple faith is better."

Unfortunately, lots of politicians win elections with this one:
"Ah'm no intellectual. Ah'm just a hard-workin' man of the people. Mah voters don't know nuthin', and neither do Ah. Ah wouldn't be caught dayed with any fancy book-larnin' in me. Back home in Muckshoe, Tayexus, we don't need nuthin' but that good Old-Time Religion..."

Acting President George W. Bush was born an instant millionaire and went to Yale University and the Harvard Business School, but now he cleverly pretends to be just a "common folk" dumb hick from Texas, just one of the down-home common people, not one of those digusting "effete" Democrats who know how to read books. Bush says,Â "I don't read newspapers"Â andÂ "I don't do nuance."

And Alcoholics Anonymous says,

- *"Nobody is too stupid to get the Program, but some people are too intelligent."*
- *"Stop Your Stinkin' Thinkin'."*
- *"Your best thinking got you here."*
- *"Utilize, Don't Analyze."*
- ... we agnostics and atheists chose to believe that our human intelligence was the last word... Rather vain of us, wasn't it?
  TheÂ *Big Book*, 3rd Edition, William G. Wilson,Â *We Agnostics*, page 49.

- **Antirationalism**

Antirationalism is another propaganda trick that is similar to anti-intellectualism, but it's different in an important way. Antirationalism promotes the idea that there are no such things as valid, reliable facts or hard evidence, just various conflicting opinions. Speakers who are pushing antirationalism argue thatÂ "It's just my opinion versus your opinion, and it's all so controversial that we can't really know anything for sure."

A variation on this technique is the old line,
"Oh heck, you can never really know for sure what caused it... Maybe it was this, or maybe it was that...",
or
"Who knows? Maybe it's true. You can never know anything absolutely for sure."

That is just a dodge to avoid admitting the truth. Yes, we can know some things for sure:

- The earth is round, not flat.
- The Moon is not made of green cheese.
- Bacteria, not evil spirits, cause strep throat and tuberculosis.
- Sour milk is not caused by witches casting nasty spells.
- Penicillin works better than faith healing for curing streptococcal infections.
- Alcoholism is not a "spiritual disease"Â which can only be cured by a "Higher Power"Â (or not even cured, but just postponed).

Life isn't all just a vague mystery where maybe one thing is true, or maybe a different thing is true, and everybody has their own opinion, and nobody knows anything for sure.

SeeÂ Tim Minchin'sÂ *Storm*Â video. The girl "Storm" was the personification of antirationalism:Â *"Life is a mystery. We never know anything for sure."*

- **Fake Philosophy:Â *"It's all just an illusion."***
  Obfuscate the issue with fake philosophy, claiming thatÂ "It's all just an image. It's all just an illusion. We don't actually see reality. You never really know anything for sure."

  For example, a scheming defense lawyer might tell a witness to a murder, "Isn't it true that we don't actually see reality? In fact, our two eyes don't even see the same image. Light plays on our retinas, causing electrical impulses to flow through the optic nerves into the brain, where the impulses are amplified, inverted, filtered, disassembled, reassembled, and formed into what we interpret as three-dimensional images of something. But what we think we see bears little resemblance to what actually happened in front of our eyes, out there in the objective world. In fact, it's all nothing but a play of vibrating atoms. Even interpreting those atoms as being divided into separate, individual, objects is an illusion. In truth, it's all just a single unified Universe of vibrating atoms. So you didn't really see my client murder someone, did you? You only thought you saw it. You experienced an illusion."

  The obvious answer to that is, "Since it's all just an illusion, you shouldn't have any objection to the jury finding your client guilty, and the state executing him for murder. He isn't really being executed. It's all just an illusion. You only think you are watching him get executed."

- **Appeal to Desperation**Â andÂ **Argument from Impotence**
  Argue that weÂ *must do something*, that we cannot just do nothing, and since we don't know what to do, let's do what I want.
  Or, since we can't do what is really the right thing, let's do what I suggest as an alternative.

  Twelve-Step-oriented recovery counselors use this strategem a lot. They argue thatÂ *"Perhaps the Twelve-Step programs aren't giving usÂ as high a success rateÂ as we would like, butÂ they are the only game in town. We can't just stop treating the alcoholics and drug addicts â Â **we have to do something**Â â so let's continue to push all of our patients into 12-Step meetings, because it's the only thing we've got."*

  Actually, the 12-Step meetings are not the only thing available. There areÂ SMART,Â SOS, andÂ WFSÂ meetings, just for starters. And the most successful program of all is peopleÂ simply quitting alone, on their own, saving their own lives by themselves. But the 12-Step true believers stubbornly ignore that. And of course the counselors ignore that â their jobs are threatened by the

successful do-it-yourselfers.

- **Argue from Ignorance (*Argumentum ad Ignorantiam*)**
  Claim that an idea should be considered valid because there is nothing to prove otherwise:
  *"Nobody ever proved that the miracles in the BibleÂ **didn't**Â occur, did they?"*

  And A.A. members argue,Â *"Well, nobody has ever proven that the Twelve Steps cause people to commit suicide, have they? So the Twelve Steps can't be harmful to people's mental health."*

  > Actually, Dr. and Harvard Prof. George E. Vaillant, Class A Trustee of Alcoholics Anonymous World Services, came pretty close to proving it. He showed that A.A.-based treatment of alcoholics producedÂ a higher death ratethan any other method of treating alcoholics.
  >
  > AndÂ the list of A.A. suicidesÂ just keeps on growing.

- **Appeal to Pity (*Ad Misericordiam*)**

  A clever defense lawyer will argue, "Look at the poor defendant. He has already suffered so much, there is no point in convicting him of his crimes, in spite of the evidence against him."

- **Exploit Wishful Thinking, and Tell Them What They Want To Hear**

  Tell the audience whatever they wish to hear, rather than some unpleasant truths. Many a politician has won an election by using this technique.

  - A weight-loss commercial says: "You don't have to diet. You don't have to exercise. Just take these pills and lose weight. Best of all, 75% of the weight that you lose is fat, not water."
  - Other people who areÂ *in denial*Â say: "Oh heck, the oil isn't going to run out. There is an unlimited supply of oil down there, just waiting for us to find it. You don't need to start planning for a future without cheap oil."
  - "Globalism will bring us a worker's paradise where everybody is happy and rich. It doesn't matter if all of the factories in America get shut down and sold to China. We don't need those old "smoke-stack industries". We can all make a good living by shuffling around pieces of information on computer screens in the wonderful new 'Information Age'."
    (Except for all of the "service workers", like the janitors and burger-flippers, who will get minimum wage...)
  - "Global warming? What global warming? We don't need to worry about our enormous rate of burning fossil fuels. It's wonderful, how much we get to use. Our standard of living is defined by how much energy we use up. The more, the better."

- "If we fight the terrorists and other Moslems over there, it will keep them from attacking us over here. We are safe."

- "Jesus is on our side. He isn't even disturbed by the 30,000 children we have killed in Iraq, because we are in a holy war against Islam and a little collateral damage is unavoidable." (Jesus didn't really say,Â *"Whatever you do unto the least of these, you do unto me."*)

- "*Calerpa taxifolia*Â isn't going to destroy the entire ecology of the Mediterranean Ocean. Don't worry. There is nothing to get excited about."

- Many a guy has gotten laid by using this technique too:
  Â Â Â "Oh yeh, baby. Of course I'll love you forever. No doubt about it. Let's do it."

Konrad Heiden explained how Adolf Hitler used this technique:

> Â Â Â Sometimes Hitler could not decide whether to heap the blame for everything on France or on the Jews.Â
> Â Â Â Â [Then Heiden gave examples of Hitler giving speeches where he contradicted himself.]Â
> Â Â Â Thus the prophet falsifies his own words. With the deepest conviction he contradicts his deepest convictions. It is as though the various heads of a many-headed beast were biting one another.
> Â Â Â The truth is irremediably buried beneath these deceptions and contradictions. How, then, can the speaker expect to put through a single incisive, suitable lie, when from speech to speech, from sentence to sentence, he changes even the lies? Whom does he expect to persuade that he himself believes a single one of these mutually contradictory lies? And to what purpose does he try to spread an opinion among the people, when on the very next day he is going to sacrifice that opinion?
> Â Â Â Such questions are asked by those who do not understand propaganda, who regard propaganda as the art of instilling an opinion in the masses. Actually it is the art of receiving an opinion from the masses.
> Â Â Â The usual conception of the great propagandist is the commanding, purposive mind, who by magic suggestion subjects an empty animal mass to his will; Marc Anthony, who in a single speech makes a thousand friends out of a thousand enemies. It is in this light that most of our contemporaries view the greatest propagandist of our day, Adolf Hitler, and this is Adolf Hitler's own idea of himself. With the authority of success, he has put over a false theory of the world; the theory that he dominates the minds of millions by tirelessly hammering the same simple statement into them. But this only shows that he never listened to himself very closely, and was never too eager to illuminate his own success. He does not hammer the same simple statement into the minds of millions; on the contrary, he played with the masses and titillated them with the most contradictory assertions. It is this art of contradiction which makes him the greatest and most successful propagandist of his time. He does not dominate the minds of millions, his mind belongs to them. Like a piece of wood floating on the waves, he follows the shifting currents of public opinion. This is his true strength.
> Â Â Â The true aim of political propaganda is not to influence, but to study, the masses. The speaker is in constant communication with the masses; he hears an echo, and senses the inner vibration. In forever setting new and contradictory assertions before his audience, Hitler is tapping the outwardly

shapeless substance of public opinion with instruments of varying metals and varying weights. When a resonance issues from the depths of the substance, the masses have given him the pitch; he knows in what terms he must finally address them.

Â Â Â Rather than a means of directing the mass mind, propaganda is a technique for riding with the masses. It is not a machine to make wind, but a sail to catch the wind. The mass, however, is a phenomenon of deepest world importance â this leveled conglomeration of fools and wise men, heroes and cowards, proud and humble, the unusual and the average. This mass, with its anonymous intellectual pressure, its unexpected moods and unconscious desires, mirrors and echoes the commanding force of prevailing conditions; it embodies and personifies the necessities and resistances of the objective world; it expresses the silent command of Fate in a mysterious murmur. It is the art of the great propagandist to detect this murmur and translate it into intelligible utterance and convincing action. If he can do this, his utterances and actions may be full of contradictions â because the contradictions lie in the things themselves; they may be deceptive and misleading. The lies of the propagandist reveal the deeper truth of the whole world's cynicism and dishonesty. By his lies the great propagandist involuntarily shows himself to be an honest, self-revealing prophet of the Devil.

Der Fuehrer, Konrad Heiden, pages 139-141.

- **It Ought To Be True, So It Is.**

This logical fallacy is a form of wishful thinking, where people are willing to believe that things are true just because it seems like theyÂ *ought to be*Â true.

People routinely believe in a wide variety of screwy things just because they like the sounds of them, and think that they ought to be true:

- Higher beings who ride around in flying saucers are here to save us (from our own stupidity).
- Ghosts of dead saints come and help some people, and save some children from disasters (while letting many others die).
- Ghosts of dead pets come back and save their former owners from various accidents.
- The ghost of the Virgin Mary routinely goes around the world making statues bleed, just to increase the faith of the wavering doubters.
- God has nothing better to do with his time than save alcoholics from themselves by punishing them and "beating them with the whip of alcoholism" and forcing them to join the 12-Step religion.

Clever politicians and propagandists will exploit peoples' willingness to believe such things by repeating such stories, which makes the gullible members of the public think that the politician must be really good, and really spiritual.

- ***It's Too Terrible To Tell***

The essense of this technique is:
"We know a truth, but it is too terrible to tell, and to do so would harm too many innocent people, so we can't say it, and you shouldn't say it either."

This argument was used by the Church in Rome during the Middle Ages to declare that you couldn't tell the truth about all of the crimes and sins of the Church â burning millions of women and girls as witches, molesting the alter boys, selling everything from indulgences to Bishop's offices, and using the Grand Inquisition and heresy trials to silence the critics â Â *"You can't criticize the Church, because if you do, it will destroy the faith of the weak people, and then they won't be able to get into Heaven."*

Politicians routinely use this technique, too. They believe that we can't hear the truth about things like global warming or peak oil, because if the people really knew the whole truth about what is going on, the people would panic and society would fall apart. The powers that be think that the truth about those things is too terrible to tell, so the politicians don't tell us the truth.

Contemporary politicians also use this trick to avoid telling the truth about what the U.S. Government has been doing in a variety of areas: "It's too terrible to tell, and if it was publicly known, it would help the terrorists. So don't ask what we have been doing."

Today, with A.A., the rap is:
"You can't tell the truth about Alcoholics Anonymous. You shouldn't expose:

- the deceptive recruiting,
- the bait-and-switch stunts,
- the perjury,
- Bill Wilson's insanityÂ andÂ dishonesty,
- the goofy, unscientific, grossly wrong ideas about alcoholism,
- the grossly inflated 'success rate',
- the complete failure of A.A. as treatment for alcoholism, or
- the cult religion nonsense,

â because if you do, it will make a bunch of the weaker alcoholics relapse and die drunk, and it will all be your fault. If you tell the truth, you will beÂ ***'doing an immense disservice to those who are trying to achieve sobriety'***."

- **Argue from Adverse Consequences**
  Put pressure on the decision maker by pointing out the dire consequences of an "unfavorable" decision. This includes theÂ *Slippery Slope*Â argument.

  - "If we let Viet Nam go, then all of Southeast Asia will fall to Communism like a row of dominoes going down. Then we won't be able to stop Communism. We will lose the whole world."

  - If we curb the power of corporations, we will destroy the American business environment. We can't tell corporations that they don't have God-given civil rights like freedom of speech and freedom to influence voters, or else all of the corporations will flee to foreign countries that treat them better. (Countries like China, Malaysia, Indonesia, Korea, Singapore, Thailand, Mexico, Guatemala, and El Salvadore â the countries to which they haveÂ *already*Â moved their factories.)

  - Likewise, we can't enforce environmental protection laws against those same corporations, or else they will move to foreign countries that have no such laws, and that will be the end of America.

Bill Wilson used this technique a lot, and Alcoholics Anonymous still does â constantly. Do what they say, or else you will die in agony:

- Unless each A.A. member follows to the best of his ability our suggestedÂ [MY required]Â Twelve Steps to recovery, he almost certainly signs his own death warrant. His drunkenness and dissolution are not penalties inflicted by people in authority; they result from his personal disobedience toÂ [MY]Â spiritual principlesÂ [cult religion practices].
  Twelve Steps and Twelve Traditions, William G. Wilson, page 174.

- "You must go to meetings for your entire life, do the Twelve Steps, and get a sponsor, or else your fate will invariably be 'Jails, Institutions, or Death'."

- If we skip this vital step, we may not overcome drinking.
  TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 72.

- In theÂ *Big Book*, Bill Wilson described a man (who lookedÂ *an awful lot*Â like Bill Wilson) who became an obsessed religious maniac, spending all of his time with A.A. busy-work, going to meetings and recruiting more members (and not getting a job):

  > Though the family does not fully agree with dad's spiritual activities, they should let him have his head. Even if he displays a certain amount of neglect and irresponsibility towards the family, it is well to let him go as far as he likes inÂ helping other alcoholics. During those first days of convalescence, this will do more to insure his sobriety than anything else. Though some of his manifestations are alarming and disagreeable, we think dad will be on a firmer foundation than the man who is placing business or professional success ahead of spiritual development.Â He will be less likely to drink again, and anything is preferable to that.
  > TheÂ *Big Book*, 3rd edition, William G. Wilson, Chapter 9,Â *The Family Afterwards*, pages 129-130.

  In other words, the solution is to let him act crazy, even if his behavior is "alarming and disagreeable."

  - ◊ Don't bother him with mere reality, or ask him to be sane and responsible.
  - ◊ Don't nag him to go get a job.
  - ◊ Just let him neglect his family and irresponsibly devote his entire life to Alcoholics Anonymous.

  â Because if you don't, he might drink again, andÂ *"anything is preferable to that."*

- The so-called "First Tradition" of Alcoholics Anonymous contains this veiled threat:

  > A.A. must continue to live or most of us will surely die.
  > == the A.A. "First Tradition" (long form)

- **Argue from Beneficial Consequences**
  This is just the opposite ofÂ Argue from Adverse Consequences. In this case, argue that people

should do what you wish because they will benefit if they do so.

For example,

> "You should believe in God because it will be beneficial to you to do so. You will get feelings of peace and serenity from knowing that you are on the right side of the question. You will get into Heaven after you die."

That is bad logic. The reason for believing in God is because one believes that there is such an entity. What benefits someone might get from such a belief is a very different issue.

Alcoholics Anonymous uses this technique too:

- "You should just accept and believe all of the A.A. teachings, andÂ *Work A Strong Program*, no matter how strange, outlandish, illogical, or heretical the A.A. practices really are, because working the A.A. program will make you sober, happy, and spiritual."
- "It doesn't matter whether the Steps make sense to you. Just do them and you will get a new life."
- "Keep Coming Back! It Works!"

- **Apply Time Pressure**
  Apply time pressure to get someone to do something.

  Advertisements and commercials use this trick all of the time:

  - "This offer is only good for 5 days."
  - "Don't miss this unique opportunity."
  - "This sale ends on Sunday."
  - "This invitation will expire if we don't get a response before the end of the weekend."
  - "We really need a response back before the end of Friday."
  - "Only three days left."
  - "Can you give before midnight?"
  - "Supplies are limited."
  - "There is talk of a national shortage."
  - "Buy XYZ today. The price will go up tomorrow."
  - "First come, first serve. The early birds will get the best items."
  - "All of our mortgage experts are waiting to help you, but you must call right now."
  - "If you call in the next ten minutes, you get a free gift."
  - "If you call in the next fifteen minutes, you can get two for the price of one."
  - "Hurry. When it's gone, it's gone."
  - "Call now. Callers get priority."

  Bill Wilson used this trick to tell prospective recruits thatÂ they had better join A.A. quickly, before they were killed by their "severe affliction" without even realizing what was happening â Â "many are doomed who never realize their predicament."Â (The*Big Book*, 3rd & 4th Editions, William G. Wilson, page 92.)

- **Argue For Delay**
  This is just the opposite of applying time pressure: Argue that
  - *"We must not be hasty."*

- *"Let's reconsider,"*
- *"Let's think about it some more."*
- *"It's too early."*
- *"The time isn't right."*
- *"Let's form a committee and do a study."*
- *"We need more information before making a decision. We need to be sure."*
- *"We haven't gathered enough evidence."*
- *"That isn't in the current budget. Maybe next year."*
- *"We don't want to do anything right now."*
- *"The timing isn't good."*
- *"People aren't ready for that yet."*
- *"I'm sure that will happen sometime in the future, but not this year."*

Alcoholics, drug addicts, and cigarette smokers use this propaganda technique to avoid actually quitting their bad habits:

- *"Frankly, I'm not ready to quit just yet."*
- *"I'll think about it."*
- *"Let's not be hasty."*
- *"Let's think about it some more."*
- *"Let's reconsider."*
- *"This is a big step. I need to prepare myself."*
- *"Maybe next month."*
- *"I'm under too much stress to quit right now."*
- *"Let's not do anything right now."*
- *"I'm not ready just now."*
- *"I need time to get ready."*
- *"I'm not prepared to do anything."*
- *"Not today."*
- *"I've got too many other things going on right now."*

- **Stall**

This is just the physical application ofÂ *Argue For Delay*. Really do delay. Use every possible excuse for not doing something.

A reputable study committee reported to TEPCO (the Tokyo Electric Power Company) that the tsunami protection at the Fukushima Nuclear Power Plant was inadequate. TEPCO responded by doing nothing. (Fixing the problem would have been expensive.) When asked why they had done nothing about the problem, TEPCO replied, "We are still reviewing the matter."

And TEPCO was still reviewing the matter two years later when the earthquake and tsunami struck, disabling the cooling systems in the reactors and causing the worst nuclear meltdown in the history of mankind.

- **The Real Scotsman Fallacy**

This logical fallacy discards facts that conflict with a sweeping generalization by using the word "REAL" as a qualifier. It is a kind of observational selection that uses twisting of the meanings of words to apparently change the facts.

The Real Scotsman Fallacy works like this:

Joe:Â "All Scotsmen play golf."
Fred:Â "But look at Brian MacGregor over there. He's a Scotsman, and he doesn't play golf."
Joe:Â "Ah, but if he were aÂ *real*Â Scotsman, he would play golf."

Alcoholics Anonymous uses that fallacy like this:

- Stepper:Â "Alcoholics Anonymous is the only way for an alcoholic to overcome alcoholism. All alcoholics simplyÂ *must*join A.A. and work a strong program if they wish to live.
- Critic:Â "But look at Terry over there. He didn't join A.A., but he recovered from alcoholism anyway. He has more years of sobriety than lots of you steppers."
- Stepper:Â "Oh, but he isn't aÂ *real*Â alcoholic. If he were a real alcoholic, then he wouldn't be able to quit drinking without Alcoholics Anonymous and doing the Twelve Steps. If you can get sober, and stay sober, without Alcoholics Anonymous, then you were never really an alcoholic, just a 'heavy drinker'."

Likewise:

1. All alcoholics must get a "higher power" and "surrender to it" in order to quit drinking and stay sober.
2. If someone quits drinking and stays sober without "surrendering to a higher power", then he wasn't a real alcoholic.

- **Inverse Real Scotsman Fallacy**
This is very much like the Real Scotsman Fallacy, but works "backwards".

"Steve B." explained it this way:

> If I say I can spot homosexuals because they wear pink shirts, and it turns out they are homosexuals, then I'm right and that proves my system of identification is sound.
>
> But if I'm wrong and they turn out not to be homosexuals, then I just say "Yes they are, because all people wearing pink shirts are homosexual, no matter whether they show any actual signs of homosexuality or not!" So I'm still right.

Similarly:

1. Declare that Joe Blow is an alcoholic because he acts like an alcoholic.
2. If someone responds, "No, he isn't an alcoholic. He doesn't drink alcohol at all. He never drank."
3. The answer is, "Yes, he is so an alcoholic, even if he isn't 'a practicing alcoholic', because he is displaying 'alcoholic thinking'."

Some crazy A.A. parents have told their childrenÂ that the children are alcoholics because they are "acting alcoholically", even though the children have never drank alcohol.

- **Inconsistency**
The way that data is analyzed, or logic is applied, is inconsistent.

For example,

- Congress bases military budgets on worst-case scenarios, but it thriftily ignores scientific projections of environmental dangers because those dangers are not "adequately proven".

- Likewise, marijuana and LSD are outlawed, and dealers of those drugs receive very harsh prison sentences, because "they might be dangerous", or "they might lead to harder drugs." But dealers of tobacco and alcohol, the two deadliest drugs in America, do not even get a traffic ticket, in spite of the fact that:
  - The annual death toll from tobacco is 420,000 Americans per year.
  - The annual death toll from alcohol is 100,000, plus about 17,000 in drunk-driving automobile accidents (40% of all fatal automobile accidents).
  - The annual death toll from LSD is zero.
  - The annual death toll from marijuana is zero.
- Rich people argue that we should not give money to poor people, because it acts as a disincentive for them to work hard and accomplish things for themselves. But those same rich people demand repeal of the inheritance tax so that their children can inherit hundreds of millions of dollars untaxed, and they don't see that as a disincentive for their own children to work hard and accomplish things for themselves.

-
  - The dogmatic fundamentalist true believers say that our scientists are all wrong â even evil â when they talk about evolution;
  - and the believers say that our scientists are immoral when they want to use stem cells to cure our diseases;
  - but then they expect our scientists to be a bunch of real geniuses whose ingenuity and technology is going to save our lives when the world's oil supply runs out. (*"Don't worry, they will come up with another great invention and another technological quick fix, just like always."*)
  - And, when those true believers get sick, they don't hesitate to run to the hospital and get medical care from those doctors who believe in science, evolution, and stem cell research.
- America is a land of freedom and inalienable rights that are listed in the Bill of Rights. But if the acting President or the Attorney General labels you an enemy of the people, then you don't have any rights.
  That is not written in the Constitution, but that's how Bush and Ashcroft read it anyway.

- Poor young black men who steal $5000 worth of stuff are put in prison for several years because "they are a danger to the community", while rich white men in expensive business suits who steal $50,000,000 get a year of hard time plus some community service because they were "non-violent" when they stole all of the little old ladies' retirement money.

  Think: Ivan Boesky and Michael Milken.
  Boesky, who was the bigger villain of the pair, got reduced time by snitching on Milken, and then both only served about two years... (Ironically, Boesky is now retired to his yacht in the Caribbean, while Milken has been doing a lot of social work, apparently trying to make some amends.)

  Watch theÂ **Enron**Â investigations for some new villains who will be forced to retire to their winter palaces in Aspen, rich, now that their bigÂ pump-and-dump stock swindleÂ is over,

  - Ken Lay with at least $37,683,887[2]Â (perhaps as much as a few hundred millions of dollars),

◊ Jeff Skilling with something between $63,000,000 and $70,000,000,[2]
◊ Andrew Fastow with $60,600,000,[2]
◊ Michael Kopper with $10,000,000,[2]
◊ Lou Pai with something between $62,936,552 and $250,000,000,[2]
◊ Rebecca Mark with $79,000,000,[2]
◊ Tom White (acting Pres. G. W. Bush's Secretary of the Army) with $14,000,000,[2]
◊ Ken Rice with $70,000,000,[2]

while the employees of Enron and the subsidiaries likeÂ *Pacific Gas and Electric*Â (in Portland, Oregon) that Enron bought and sucked dry, now have no retirement funds at all left. Nothing. And many of those retirees are just too old to go back to work. So what do they do? Join the homeless people, I guess.

But those smiling, well-dressed, suit-and-tie, white-collar criminals weren't "violent" when they stole Grandma and Grandpa's retirement funds.

And the U.S. government isn't going to replace their retirement funds is it? â Not even the part that was given to the politicians, mostly Republicans, in "campaign contributions". The Republicans are talking about spending the wealth of the nation on a war with oil-rich Iraq, not on taking care of our own old people.

The Republicans were all for an extremely expensive bailout of the savings and loan institutions, which happened after, and was caused by, the Republicans deregulating banking, but they won't do a thing for the retirees who got burned by Enron after the Republicans deregulated the natural gas industry.

♦ I haveÂ many more, far too many to put on this page.Â *Inconsistency*Â just seems to beÂ *The Way of the American Politician*. Benjamin Franklin once quipped that consistency was the hum-drum of little minds. If that is so, then our politicians in Washington D.C. must be world-class geniuses.

A.A. dogma and literature are loaded with inconsistencies and contradictions. For example,

♦ We learn from theÂ *Big Book*Â that if someoneÂ abstains from drinking for thirteen yearsÂ without going to A.A. or doing the Twelve Steps, and then relapses, it proves that you can't do it without A.A.. But if someone quits drinking for only six months by going to meetings and doing the Twelve Steps, then that proves that A.A. and the Twelve Steps work. (Even though the vast majority of Bill Wilson's new A.A. membersÂ either did not quit drinking or soon relapsed, and even though half of the authors of the originalÂ *Big Book*Â stories returned to drinking, Bill still insisted that his "spiritual" program for sobriety worked great. And Bill Wilson considered all of the non-members who didn't quit drinking as proof that you can't do it alone.)

♦ Likewise, according to A.A., if someone does the Twelve Steps and quits drinking, then that proves that the Twelve Steps work for making people quit drinking. But if someone does the Twelve Steps and then relapses, it doesn't prove that the Twelve Steps make people drink.

♦ If someone killed himself with alcohol, Bill Wilson considered him a failure and a real loser. But if someone killed himself with tobacco, Bill Wilson considered him "a most effective member of A.A.", someone whose "more serious ailments were being rapidly cured".

♦ When someone comes to A.A. meetings and then quits drinking and stays quit, A.A. gleefully claims the credit for the success. But when someone comes to A.A. meetings and then drinks

himself to death, A.A. says that it isn't responsible for the failure.

- AndÂ I have plenty more...

- **Compare Apples To Oranges**

This is similar to the previous item, inconsistency, but has special twists of its own.

In a radio commercial for a tax preparation service (Spring 2005), we heard:

> "Jackson-Hewitt's average refund is $400 more than the average IRS refund."

Well of course it is. They are comparing apples to oranges. The average refund from the IRS includes all of the poorest people in the country. You have to actually make some money before you need a professional tax accountant to prepare your tax forms for you, and can pay for it. The average Jackson-Hewitt customer is lots richer than the average minimum-wage janitor or burger-flipper, so of course they get larger refunds. The commercial tries to imply that the larger refund is due to the Jackson-Hewitt accountants' skill in finding deductions, but I suggest that it is due to their customer's higher incomes and higher withholdings, and hence, larger refunds due.

Over in "the recovery community", one A.A. defender announced:

> I am appalled at such blatant misconstrual of the program of Alcoholics Anonymous. AA is Spiritual, true, but not religious. An edition of Webster's defines the two as follows:
>
> 1. Religion - any system of faith or worship; the outward manifestation of belief in a Supreme or Superior Being; love and obedience toward God; piety; monastyic vow or state; conformity to Biblical precepts; devotion; fidelity.
> 2. Spiritual - incorporeal; not material; possessing the nature of qualities of a spirit; mental or intellectual; pure; holy; heavenly-minded; not lay or temporal; ecclesiastical; relating to matters of a sacred nature; not worldly; the spiritual nature as oposed to physical.
>
> Another edition of Websters (which leaves the Biblical concept out) says:Â
>
> 1. Religion - The worship of God or gods. A belief; a system of doctrines of faith and worship.

2. Spiritual - Not material; Relating to the moral feelings; Pure, holy, sacred.

But note that the writer was comparing a noun to an adjective. So of course the noun "religion" sounds much more solid and material than the adjective "spiritual".

If we compare the adjective "religious" to the adjective "spiritual", some of the important distinctions vanish. In fact, the words become synonyms:

religious:Â (The American Heritage Dictionary, Second College Edition, 1982.)

1. Of, pertaining to, or teaching religion.
2. Adhering to or manifesting religion, pious.
3. Extremely faithful, conscientious:Â *religious devotion to duty*.

spiritual:Â (The American Heritage Dictionary, Second College Edition, 1982.)

1. Of, relating to, consisting of, or having the nature of spirit; not tangible or material.
2. Of, concerned with, or affecting the soul.
3. Of, from, or pertaining to God.
4. Of or belonging to a church or religion; sacred.
5. Pertaining to or having the nature of spirits; supernatural.

And Random House says:

SpiritualÂ (Random House Unabridged Dictionary, Second Edition, 1993.)

7. of or pertaining to sacred things or matters;Â religious; devotional; sacred.

As the judge said in the case ofÂ *Grandberg v. Ashland County*, a 1984 Federal 7th Circuit Court ruling concerning judicially-mandated A.A. attendance:

> The distinction between religion and spirituality is meaningless, and serves merely to confuse the issue.

The converse of comparing apples to oranges is equating them â declaring that they are the same thing â the logical fallacy ofÂ *Conflation, False Equality*.

- **Special Pleading**

Special pleading typically refers to the Will of God. There are other "special pleadings," like the

Communist's "Force of History" or a misguided environmentalist's "Mother Nature", butÂ *God's Will*Â is still the most popular excuse for doing some horrible things.

Don't do something because I tell you to do it, but rather, do it because it is the Will of God, and God will be happy if you do it for Him.

- "Quit drinking",
- "Do The Twelve Steps",
- "Shove the Twelve Step religion on every sick person you can get",
- "Blow Up The World Trade Center and kill thousands of innocent people",
- or "Launch aÂ *Blitzkrieg*Â *'Shock And Awe'*Â bombing campaign on Bhagdad and kill thousands of innocent Iraqi civilians with cluster bombs and the indiscriminate use of overwhelming American firepower"

... Heck, everybody's just doing the Will of God.

An Israeli newspaper even quoted George W. Bush as saying that God told him to attack Afghanistan and Iraq...

> "God told me to strike at al Qaeda, so I struck them; then God told me to strike at Saddam, so I did."

Usually, if someone says that God told him to go kill somebody, and then he actually goes and does it, we lock that dangerous nut-case up in a mental hospital for a very long time...

- **Self-Sell**

This one is so simple and slick that it is brilliant: Instead of trying to cram a particular attitude or belief down the throats of some unwilling recipients, get them to convince themselves of the validity of your ideas. Do something like ask them for their help in promoting a good thing, so that they ask themselves,

- "How can we convince the general public of the virtues of this program?"
- "How can we get people to support this worthwhile cause?"

They will sell themselves on the idea as they try to sell it to others.

For a humorous example of this, see the movie "*Cold Turkey*" which starred Dick Van Dyke, who acted as a preacher who had to make his whole town quit smoking. The local Neo-Nazis were a particularly tough bunch to get to quit. Van Dyke won them over by enlisting them asÂ ***smoking-ban enforcers***. Their only request: "Can we wear arm-bands?"

Another twist on Self-Sell is that whenever a cult sends members out recruiting, those recruiters will end up selling themselves on the cult's dogma when they try to convince others of the truth of the cult's teachings. Smart cult leaders know this, and get new converts out recruiting, fast. It's called "Actionizing." A.A. calls it your "Twelfth Step."

TheÂ *Big Book*Â gives us a clear example of that in the autobiographical storyÂ *The Vicious Cycle*. The author, James Burwell, a former skeptic and unbeliever, described setting up a new A.A. group in Philadelphia, after having been a member in New York City:

> When I started to tell the boys how we did it in New York and all about the spiritual part of the program, I found that they would not believe me unless I was practicing what I preached. Then I found that as I gave in to this spiritual or personality change I was getting a little more serenity. In telling newcomers how to change their lives and attitudes, all of a sudden I found I was doing a little changing myself.
> TheÂ *Big Book*, 3rd Edition, Jim Burwell,Â *The Vicious Cycle*, page 249.

(Yes, that brainwashing program is powerful and works well, doesn't it? It even works on you while you are using it on others...)

- **Repetition for Emphasis (*Argumentum ad Nauseam*)**
  Drive home an unproven point by repeating it so often that it might become accepted by rote.

  Adolf Hitler declared inÂ *Mein Kampf*Â that effective propaganda must confine itself to a few points and repeat them over and over. Hitler wrote:

  > It [propaganda] must repeat those points over and over again until the public believes it. The principles behind propaganda are the same principles of mind control, hypnotic suggestion, and mental programming: distraction and repetition. With propaganda, distraction draws attention away from information that is true and directs attention to information that is false. Repetition of the false information imbeds it in your subconscious mind so that your acceptance of its truth becomes a conditioned response. You accept this information as true without thinking whenever it is presented to you again.

"If you tell a lie big enough and keep repeating it, people will eventually come to believe it. The lie can be maintained only for such time as the State can shield the people from the political, economic and/or military consequences of the lie. It thus becomes vitally important for the State to use all of its powers to repress dissent, for the truth is the mortal enemy of the lie, and thus by extension, the truth is the greatest enemy of the State."
Joseph Goebbels, Nazi Minister of Propaganda

"See, in my line of work you got to keep repeating things over and over and over again for the truth to sink in, to kind of catapult the propaganda."
George W. Bush

Alcoholics Anonymous has a standard list of unproven (and evenÂ *disproven*) assumptions that they constantly repeat:

- A.A. is the best, the time-tested,Â *the proven way*Â to recover from alcoholism.
- Keep Coming Back, It Works! (If you make it work...)
- Alcoholics need the Twelve Steps to teach them spirituality. They didn't know anything about God before they met the Alcoholics Anonymous recruiter.
- The Twelve Steps are a great program for quitting drinking.
- Nobody can do it alone. You need your support group.

- ♦ Alcohol is cunning, baffling, and powerful, and wants to kill you.
- ♦ The Twelve Steps are "simple spiritual principles" (rather thanÂ cult practices).
- ♦ God is pleased when you do Bill Wilson's Twelve Steps.
- ♦ "RARELY have we seen a person fail, who has thoroughly followed our path..."

- **Antimetabole**

An antimetabole is a rhetorical device where you reverse a phrase to get a simplistic slogan that sounds profound, but isn't, like:

- ♦ "Unless you learn to master your rage, your rage will become your master." (from the movieÂ *Mystery Men*)
- ♦ "When the going gets tough, the tough get going."

Alcoholics Anonymous uses this device often, as in,

- ♦ "The program doesn't fail people, people fail the program."
- ♦ "The Steps don't work unless you work the Steps."
- ♦ "The Steps don't work to make you quit drinking; you must quit drinking to work the Steps."
- ♦ "Working the Steps won't make you quit drinking right; quitting drinking will make you work the Steps right."
- ♦ "You don't work the Steps to quit drinking; you quit drinking to work the Steps."
- ♦ "AA does not leave US â We leave AA."

- **Reification**

Treat somethingÂ ***abstract***Â asÂ ***real***.
"I know there's a God; I've felt him in my life."
This statement can be explained in several ways that do not require an actual god to exist.

By that faulty logic, it would be equally valid to say that if I feel nervous while walking in creepy dark alleys in bad parts of town at night, that proves that Satan and vampires are real:
"I know they are real; I've felt them breathing down the back of my neck at night."

What if someone said to you, "My Satan is real. I feel him with me in everything that I do. I can feel his presence right now."? Would you take that person's statements as valid information, and consider that person a reliable source of wisdom about God, Satan, religion, life, the universe, and everything?

Or would you conclude that he is a raving lunatic?

Now what if somebody says, "My Jesus is real. I feel him with me in everything that I do..."?

- **Take Undeserved Credit**

This is a favorite of politicians. If anything good happens while they are in office, they are quick to take credit for it. (TheyÂ rationalizeÂ that they might as well, because if anything goes wrong, they get the blame for it.)

Using this technique, Republicans like to claim that Ronald Reagan somehow 'caused' the fall of the Berlin Wall and the break-up of the Soviet Union, not internal weakness, corruption, and a crumbling infrastructure in the Soviet empire.

Frank Buchman's cult used this technique often. Even today, their web site says:

> Buchman's story starts with a small-town American who sets out "to remake the world" and in the attempt affected the moral and spiritual condition of thousands of people at every level of society throughout the world. From war-torn Europe to civil war in China, from the rise of black nationalist independence movements in Africa to the civil rights hotbed in the U.S, in the lives of great leaders such as Mahatma Gandhi, Konrad Adenauer, and Harry Truman â Buchman's remarkable influence kept turning up.
> Advertising forÂ *Frank Buchman, A Life*, by Garth Lean
> https://secure.iofc.org/shop/en/resources/shop/?room=3&product=47

Frank Buchman does not get the credit for every civil rights movement in the world just because one of his followers showed up there and parrotted slogans. And Mahatma Gandhi, Konrad Adenauer, and Harry Truman were not followers of Frank Buchman. The truth is that the social-climbing Frank Buchman sought them out, and only talked to them for a few minutes. Buchman only met Gandhi once, in 1915, and Adenauer perhaps a couple of times. Harry Truman declared that he had never talked to Buchman. Truman had sometimes helped Buchman's organization with draft problems, butÂ Truman dropped Buchman like a hot potatoÂ when he learned about Buchman's history and Nazi sympathies and draft dodging. Nevertheless, Buchman forever after tried to imply that Mahatma Gandhi, Konrad Adenauer, and Harry Truman were his followers, world leaders who had learned their "spirituality" from Frank Buchman. (See GhandiÂ hereÂ andÂ here, andÂ here, and AdenauerÂ here.)

Bill Wilson and A.A. use this technique constantly. If anybody quit drinking after having attendedÂ even just a few A.A. meetings, Wilson and A.A. were quick to claim or imply that the recovery was caused by A.A. and the Twelve Steps. But when those people relapsed later, A.A. had nothing to do with that. "A.A. caused the sobriety, but it didn't cause the relapse." Bill Wilson even took the credit for the sobriety of peopleÂ who finally quit drinking several years afterÂ Bill encouraged them to quit.

Likewise, another A.A. promoter, Nan Robertson,Â wrote in her book,Â *"Getting Better Inside Alcoholics Anonymous"*, that most of the newcomers to Alcoholics Anonymous had already quit drinking, but she credited their sobriety to A.A. anyway.

- **Create A Granfalloon**
  A granfalloon is some distinction or difference which sets members of a group apart from other people who are not part of the group. The purpose of creating a granfalloon is to engender a feeling of "Us versus Them."

> "He's not one of us."

A granfalloon can be any distinguishing difference. Race, religion, and nationality have been used for thousands of years. It can be as simple as the jocks versus the nerds.

Sometimes a granfalloon can be a small, trivial difference, and still work. When Hitler was still just a minor fledgeling politician, just beginning to build up his Nazi party, he dressed his followers in brown shirts. Some critics laughed and pointed out that they looked ridiculous. But rather than discouraging Hitler's followers, the criticism made them cling to their group and made them feel more

committed to Hitler. Hitler gained a loyal, hard-core cadre just for the price of a few brown shirts.

In the bookÂ *Soul of A New Machine*Â by Tracy Kidder, the author describes how a smart manager organized teams of young computer geniuses, and set them to competing against each other in the creation of a new computer. The hardware designers were called "The Hardy Boys", and the programmers of the machine's internal software, the microcode, were called "The Micro-Kidders." The competition between them was so intense that they worked day and night, seven days a week, to finish the design and make the machine work. All of them argued that they weren't going to let the other guys on their team down, and they weren't going to let the other team outdo them. But the only real difference between the two groups was which part of the design they were working on. But that one tiny difference was enough to cement their loyalty to their group.

Andrew Carnegie demonstrated the same cleverness in eliciting greater output from one of his steel mills. He asked the foreman how many units of steel the day shift had produced. Carnegie wrote the answer with chalk in large numbers on the sidewalk where the workers entered the plant, and then simply walked away without explanation. When the night crew came to work, they saw the number on the sidewalk, and asked what it was. Someone told them. The night crew beat that number by a little bit. Early in the morning, Carnegie erased the day crew's number, and chalked in the night crew's output. The day crew saw that number on the sidewalk when they came to work. They worked even harder, and beat the night crew's output. Carnegie chalked in that number. The following night, the night crew beat the day crew again, and Carnegie chalked in that number. That contest of playing off the day crew against the night crew continued for weeks, while output steadily rose. Carnegie never said a word about the workers having to increase their productivity â he just played one group off against another, using no distinction between the two groups except that one worked during the day, and one worked at night.

In a beautiful demonstration of creating a granfalloon, teachers who wanted to educate a class about racism created a new, artificial, racial distinction: they separated the class into blue-eyed and brown-eyed people, and declared that the brown-eyed people were superior to the blue-eyed people. "Everybody knows" that blue-eyed people are dishonest and lazy, and can't be trusted, and lie a lot, while "everybody knows" that brown-eyed people are hard-working, honest, and trustworthy... By the end of the day, the two groups almost hated each other, even though it was just a mild one-day demonstration of discrimination. (It's enough to make you wonder about our two-party system of Democrats and Republicans hating each other â how much of their hatred and partisan bickering and investigation of sexual affairs is based on nothing more than the political equivalent of eye color?)

A current television commercial for PrilosecÂ® uses a variation of this trick: They ask,Â "So which day are you on?"Â and a bunch of people proudly hold up several fingers. The commercial creates a feeling of being "one of the club" among those people who take the medicine. The granfalloon is taking Prilosec.

Alcoholics Anonymous obviously uses alcoholism as a granfalloon, to separate their group from everybody else. Every member introduces himself like, "Hi, my name is Harry, and I'm an alcoholic." Then outsiders, non-alcoholics, are called "normal people", "regular people", "normies", or "earth people", andÂ *everybody knows*Â that you can't trust them to be accepting or understanding...

Likewise, A.A. uses membership in A.A. itself as a granfalloon. Those who do The Twelve Steps are "one of us", the people who understand, the members of the right religion,Â *"The Friends of Bill"*, while those who don't do The Steps areÂ ***the other people***, those "dry drunks" who aren't our friends and who cannot be trusted.

In theÂ *Big Book*, an A.A. member says of a non-member:

> "You poor guy. I feel so sorry for you. You're not an alcoholic. You can never know the pure joy of recovering within the Fellowship of Alcoholics Anonymous."
> TheÂ *Big Book*, 3rd Edition, page 334.

- **Spin Doctoring**
  Often, how people take the news depends on how you present it.

  The TV seriesÂ *The West Wing*Â recently gave us a beautiful illustration of that. The administration had a problem with some new, improved equations for computing the threshold of poverty. The problem was that the new equations said that there were two million more poor people than the old equations did. Nobody wanted to face the next election with two million more poor people than there were when the President took office. Everybody around the White House was stuck in a loop of, "We want to fix the equations, but we don't want there to be more poor people." Then they took the problem to Toby, the resident political hack spin doctor:

  > Â Â Â "Did I ever tell you about the guy who had a batch of pink salmon that turned white? He canned it up and printed on the label,Â *'Guaranteed not to turn pink in the can.'*
  > Â Â Â "So the equations have been broken for fifty years? What was the matter with all of the previous administrations? Why didn't those lazy bums fix the problem? This is outrageous! Thank God we finally have a President who is doing his job!
  > Â Â Â "Remember: 'White Salmon, guaranteed not to turn pink!' By God, I can sell anything!"

  Â Â Â In March of 2006, Microsoft found that its new operating system, Vista, was so buggy that they wouldn't be able to bring it to market for the 2006 Christmas season. They publicly announced yet another postponement of the release date until after January of 2007, the umpteenth one in four years of slipping schedules. Putting the best spin-doctor's smiley-face on the situation, Microsoft spokesman and project manager James Allchin said that the Vista delay was the "right thing" to do.Â (NY Times, 2006.03.27)
  Â Â Â As if they had any choice in the matter.
  Â Â Â The most unintentionally hilarious quote, however, came from Microsoft marketing executive Brad Goldberg, who told Ziff Davis Media's Microsoft Watch blog that, since people won't be able to get new Windows computers for Christmas in December, there will be another Christmas in January: "January has emerged as almost a second Christmas, with gift cards, sales, etc. It's a new trend."Â (Washington Post "Personal Tech" 2006.03.27)
  Â Â Â Oh yeh, right.

  In 2006, the Washington Post hired an unqualified college flunk-out as a reporter for "the Right-wing viewpoint", because he was the son of a Bush administration White House official. He was fired, or "allowed to resign", when Internet bloggers discovered that he was plagiarizing his writings. A Washington Post editor declared, in a fine example of spin doctoring:

  ### Ben Domenech Resigns

  > In the past 24 hours, we learned of allegations that Ben Domenech plagiarized material that appeared under his byline in various publications prior to washingtonpost.com contracting with him to write a blog that launched

Tuesday.

An investigation into these allegations was ongoing, and in the interim, Domenech has resigned, effective immediately. When we hired Domenech, we were not aware of any allegations that he had plagiarized any of his past writings.
Jim Brady, Executive Editor, washingtonpost.com, in "post.blog", March 24, 2006,Â *Ben Domenech Resigns*.

One of the commenters just nailed it:

"When we hired Domenech, we were not aware of any allegations that he had plagiarized any of his past writings."
Is that the same as not being aware of any facts?

- **The Semi-Attached Figure**

"If you can't prove what you want to prove, demonstrate something else and pretend that they are the same thing."
â Darrell HuffÂ (*How to Lie with Statistics*, p. 74.)

For example, if you can't prove that your nostrum can cure the common cold, advertise that a well-known "independent testing laboratory" has proven that it can kill umpteen zillion germs in a test tube in just a few minutes. Advertise those results by showing a picture of a doctor in a white coat reporting the results. Don't bother to mention the bothersome little fact that killing germs in a test tube isn't the same thing as killing them inside of people. And don't bother to mention the fact that the germs that got zapped in the test tube were something other than cold germs... The real meaning of the one true fact â that the nostrum simply killed some unidentified germs in a test tube, gets lost in the hype. That's a semiattached figure.

(And, if you think about it for a minute, plain old Clorox bleach is great for killing germs in a test tube, but if you drink the stuff to get over a cold, you won't...)

Similarly, you can easily think of some popular household cleaners whose advertisements imply that your family will be much healthier and more disease-free because their product kills lots of germs on contact. Nobody asks whether those unfortunate germs were actually harmful to humans. The vast majority of bacteria and microbes are really totally harmless, which is why we are still alive. In fact, recent studies have shown that the constant, habitual use of germ-killers on everything, everywhere, is just breeding super-bugs who are immune to our antibiotics, which is a real medical disaster. But an ad that says,Â "Laboratory testing has shown that our kitchen cleaner kills 300% more germs on contact"Â sure sounds good, doesn't it?

Darrell Huff noted:

There are often many ways of expressing any figure. You can, for instance, express exactly the same fact by calling it a one per cent return on sales, a fifteen per cent return on investment, a ten-million-dollar profit, an increase in

> profits of forty per cent (compared with 1935-39 average), or a decrease of sixty per cent from last year. The method is to choose the one that sounds best for the purpose at hand and trust that few who read it will recognize how imperfectly it reflects the situation.
> **How to Lie with Statistics**, Darrell Huff, page 82.

For example, if you run a store, and buy an item for 99 cents every morning, and sell it for $1.00 every afternoon, you are only making a 1% profit on sales, which sounds terrible. But in a year of doing that, you make a 368% return on investment (365*100/99), which sounds like you are making out like a bandit.

In another example of the semiattached figure, in a management-labor dispute, the management questioned the workers about their gripes against the union. They collected every trivial complaint that had ever been lodged against the union, added up the numbers, and announced that 78% of the workers were "against the union." Obviously, there is a huge difference between disagreeing with the union about something or other, at one time or other, and being against the union representing the workers.

"Flying in airplanes must be growing increasingly dangerous, because 500 times as many people were killed in airplane crashes last year (2001) as were killed in 1910."
That completely ignores, of course, the truth that the Wright Brothers and friends were the only people flying in 1910, and the September 11, 2001 terrorism that caused multiple airplane crashes was an exceptional situation.

My all-time favorite in this category is,Â "Eating carrots is very dangerous to your health, and will eventually kill you. 100% of the people who ate carrots between 1860 and 1900 are now all dead."

Recently, the NBC Evening News used this trick to sensationalize a story about teenagers buying alcohol over the Internet (9 August 2006). They declared thatÂ "One in 10 teenagers knows another teenager who has illegally ordered liquor online."
That sounds pretty impressive, and it hints that one in 10 teenagers is getting supplied alcohol by another teenager who gets it through the Internet. It sounds impressive, until we realize that if the average teenage knows 100 other teenagers, then only 1 in 1000 teenagers needs to have bought alcohol through the Internet just once in order for that NBC statement to be true. (And if the average teenager knows more than 100 other teenagers, then even fewer teenagers need to have bought alcohol through the Internet.) And just because a teenager knows someone who once bought alcohol through the Internet doesn't mean that he got any of it.

When Peter Howard defended the cult leader Frank Buchman and his Moral Re-Armament organization in the bookletÂ *Fighters Ever*Â (November, 1941), Howard used the trick of theÂ *Semi-Attached Figure*Â in his story about theÂ controversy over drafting Buchman's Moral Re-Armament followersÂ into the British army during World War II. The Buchmanites claimed that the MRA men were all "lay evangelists of an established religion", and as such, should not be drafted, and they got 174 Members of Parliament to sign a motion that asked that the MRA men be given special exemptions to the draft. Peter Howard wrote in his book thatÂ "the elected representatives of more than 11,000,000 people"Â opposed drafting MRA members. Peter Howard implied that all 11 million of those British people were unanimous in their support of draft exemptions for the MRA men, which was nowhere near the truth.[15]

Furthermore, those 174 Members of Parliament had been elected on the basis of other issues than drafting MRA members, so those 11 million represented British people had never really voted on that particular issue at all. And then, when the whole of the British Parliament voted, and decided not to

give the MRA men any special exemptions, Peter Howard did not bother to write thatÂ "the elected representatives of all 40 million Britons decided to draft the MRA men just like everybody else".

- **Use Exact Numbers**

The human mind has the funny peculiarity that exact numbers sound so much more valid than round numbers, even if they aren't accurate, or can't really be applicable. So use exact numbers in arguments, when you wish to impress people.

Compare these two statements:
1.) The average American made about $25,000 last year.
2.) The average American made $24,979.37 last year.

Which sounds truer? Which sounds more like somebody who knows what he is talking about? (But who was that one "Average American" who made exactly that much, really?)

- **Avoid Specific Numbers**

This is just the converse of the previous item â Avoid giving specific numbers whenever it would be disadvantageous to do so.

Advertisements often do a fancy tap-dance around the prices, and never tell you what it actually costs:

- "...Installed for less than you would think."
- The price is "half of what you would expect to pay."

(Actually, things never seem to be only half of what I would expect to pay. I am always appalled by the high new price of everything â twice what I would expect to pay.)

- **Hide Behind Others**

You can mask your intentions and your egotism (or your stupidity) by hiding behind others. Use words likeÂ *we, us,*Â andÂ *our*, instead ofÂ *I, me*Â andÂ *my*. You can say "We want" instead of "I want," and "We think" instead of "I think." You sound more important if you sound like you represent a group of people, rather than just being one person speaking for yourself. You also sound less selfish when you make demands.

Politicians routinely say, "The American people want...", rather than "I want..." when they win an election, but they don't say "The American people want..." when the vote goes against them. Then they just complain that somebody cheated and stole the election, or their opponents took a lot of improper campaign contributions, or the voters got fooled, or something.

Politicians make statements like,Â "The American people don't want government controlling their health care options."Â (Never mind the fact that the FDA already does, in many ways.) You aren't supposed to notice that it's the politician who objects to government involvement in health care, not the American people who have little or no health care. They very much want the government giving them some health care options.

The cult leader Dr. Frank N. D. Buchman gave us an example of this propaganda techniqueÂ when he said, in 1936,

Â Â Â I thank Heaven for a man like Adolf Hitler, who built a front line of defense against the anti-Christ of Communism...
Â Â Â My barber in London told me Hitler saved all Europe from Communism. That's how he felt.

So what on earth does the opinion of Frank Buchman's barber have to do with anything? Well, Buchman could put forth the opinion that Hitler had saved all of Europe from Communism while pretending that it was someone else's opinion besides his own. It tended to add weight to his own statements:
"See, it isn't just my opinion. My English barber thinks so too."

Likewise, when Acting Vice President Dick Cheney cursed and used obscenity on the Senate floor, (19 June 2004), telling Senator Lahey to "Go f**k himself" (or "Go f**k off"), he later tried toÂ rationalizeÂ his behavior by explaining that many other Republicans agreed that it was about time that he said that â that they felt that it was "long overdue" (in spite of the fact that using foul language on the Senate floor is against the Senate rules).

On Dec. 11, 2003, when Acting President George W. Bush announced that countries which had not participated in the coalition to blow up Iraq would not be able to bid on contracts to rebuild Iraq, heÂ rationalizedÂ his actions by saying,

"That's what the U.S. taxpayers expect."

No, actually, it wasn't what they expected.
G. W. Bush didn't bother to mention the extremely dangerous, threatening, Weapons of Mass Destruction ("45 minutes to launch") which the U.S. taxpayers reallyÂ *did expect*Â him to find.
Nor did he mention the claimed connections to the al Qaeda terrorists which he had claimed threatened Americans ("Sadam will give al Qaeda a nuke or something.")
And the U. S. taxpayersÂ *really*Â didn't expect Dick Cheney's friends at the Halliburton corporation to get multi-billion-dollar contracts on a no-bid basis.
And the U. S. taxpayers didn't expect war profiteers to empty the national treasury while deceived young men in uniform died for a lie.

A variation on this trick ofÂ *Hiding Behind Others*Â is to imply that lots of people are with you, or lots of people agree with you:
Â Â Â Â "Thanks for proving to all of us what a fool you are."
That sounds far more impressive than,
Â Â Â Â "I think you are a fool."

Bill Wilson constantly used the stunt of hiding behind others:

- He had the habit of hiding behind others by saying things like "Miss Hock and I" or "Dr. Bob and I."

- He used to say "A.A. has saved these men and their families," instead of "I, Bill Wilson, saved these men and their families."
  (Which led to, "So send money to the A.A. office", which really meant "So send money to me.")

- He used to sayÂ that the groups had to send money to the New York headquartersÂ *"to pay for our office"*Â instead ofÂ *"to pay for my living"*. (In the early days, supporting Bill Wilson in comfortÂ *was*Â the major office expenseÂ of Alcoholics Anonymous.)

- When Bill and Lois Wilson were evicted from their house at 182 Clinton Street in New York for non-payment of the mortgage, Bill started a campaign that he called the "Lois W. Home Replacement Fund", and Bill went around trying to con all of the other A.A. members into signing pledges to donate. Bill didn't admit that he wanted the other A.A. members to supplyÂ *him*Â with a new house; no, it was just for poor old Lois.

- Bill Wilson would sayÂ "You should doÂ *our suggested*Â Twelve Steps if you wish to recover"Â when he really meant,Â "You must doÂ *my required*Â Twelve Steps, which I wrote, if you wish to live".

  > Unless each A.A. member follows to the best of his ability our suggestedÂ [MY required]Â Twelve Steps to recovery, he almost certainly signs his own death warrant. His drunkenness and dissolution are not penalties inflicted by people in authority; they result from his personal disobedience toÂ [MY]spiritual principlesÂ [cult religion practices].
  > *Twelve Steps and Twelve Traditions*, William G. Wilson, page 174.

- Bill Wilson wrote in theÂ *Big Book*Â that the first ten alcoholic members of Bill's new temperance movement would meet each evening, "constantly thinking how they might present their discovery to some newcomer."Â (Page 159.)
  "Their discovery"Â really meantÂ **"Bill Wilson's adaptationÂ of Frank Buchman's cult religion."**

- **The Preacher's We**
  Veil accusations of others by sayingÂ *"We"*Â orÂ *"Us"*Â when you really meanÂ *"You"*.

  This is the flip side of hiding behind others â accusing others of things by accusing "us". A preacher will say "we" when he really means "you", as in
  "We are all sinners; may God have mercy on us"
  when he really means,
  "***You***Â are sinners; may God have mercy onÂ ***your***Â miserable worthless asses."

  It's just human nature for people to defend themselves from direct attacks, and to resent accusations, but they are much more open to what sounds like some sincere talk about "us" and "our shortcomings".

  Bill Wilson used the preacher's "we" constantly. He wrote:

  - "At some of these [steps] we balked. We thought we could find an easier, softer way. But we could not."
    TheÂ *Big Book*, William G. Wilson, page 58.

  - "We temporarily cease to grow because we feel satisfied that there is no need for all of A.A.'sÂ [Bill's]Â Twelve Steps for us.
    Twelve Steps and Twelve Traditions, William G. Wilson, page 113.

- We "constructively criticized" someone who needed it, when our real motive was to win a useless argument. Or, the person concerned not being present, we thought we were helping others to understand him, when in actuality our true motive was to feel superior by pulling him down. We sometimes hurt those we love because they need to be "taught a lesson," when we really wanted to punish. We were depressed and complained we felt bad, when in fact we were mainly asking for sympathy and attention. This odd trait of mind and emotion, this perverse wish to hide a bad motive underneath a good one, permeates human affairs from top to bottom.
  Twelve Steps and Twelve Traditions, William G. Wilson, page 94.

  Such a negative, poisonous view of human life. When Bill Wilson wroteÂ *Twelve Steps and Twelve Traditions*, he was in the middle of an 11-year case of chronic, deep, crippling, clinical depression. It's easy to see why.

- If our tempers are consistently bad, we arouse anger in others. If we lie or cheat, we deprive others not only of their worldly goods, but of their emotional security and peace of mind. We really issue them an invitation to become contemptuous and vengeful. If our sex conduct is selfish, we may excite jealousy, misery, and a strong desire to retaliate in kind.
  Â Â Â Â Such gross misbehavior is not by any means a full catalogue of the harms we do.
  Twelve Steps and Twelve Traditions, William G. Wilson, page 94.

  This is just a never-ending assault on any shreds of self-respect or feelings of self-worth that members may have left. It's cultish guilt induction to the max.

- There is one more twist to the "we are guilty" accusation, the "I am guilty, but I meanÂ *YOU*" accusation. Bill Wilson did not use that particular trick himself, but you will hear plenty of it in A.A. meetings:

  "It took me years to learn to do all Twelve of the Steps, and really work a Strong Program. I just goofed off for my first few years in A.A.. I thought I was doing fine. I thought I knew everything. It took me a long time to wise up and realize that I had to workÂ *all*Â of the StepsÂ *all*Â of the time."

  And by implication, you â you stupid beginner â are doing the same thing. You also need to learn that youÂ **must**Â *work all of the Steps all of the time*.

  But the speaker never offers us any explanation for how he was able to stay dry for so many years without bothering toÂ *"Work The Steps"*Â properly. That would be good to know. We could save a lot of lives with that technique:
  *"Just abstain from both alcohol and Alcoholics Anonymous. It'll save both your lifeÂ **and**Â your mind."*

- **Put Words Into Other People's Mouths**

  This is a form of hiding behind others, where you make other people appear to be saying what you are really saying.

  Frank Buchman used this technique in his quote above â Â "My barber in London told me Hitler

saved Europe from Communism. That's how he felt."Â â and he used it again here:

> Â Â Â Â A Swedish steelworker told me: "Only a spiritual revolution goes far enough to meet the needs of men and industry."
> Â Â Â Â A Labor leader said: "I have seen the Labor Movement triumph and felt in the midst of triumph an emptiness. The Oxford Group gave my life new content. I see in its message the only key to the future of the Labor Movement and of industry the world over."
>
> Frank Buchman, speaking at East Ham Town Hall, 29 May 1938, quoted in
> *Remaking the World, the speeches of Frank Buchman*, Frank N. D. Buchman, 1949, pages 85-87.
> Also quoted in:
> *Britain and the Beast*, Peter Howard, 1963, pages 107-109.
> Also see:
> *Drawing-Room Conversion; A Sociological Account of the Oxford Group Movement*, Allan W. Eister, Duke University Press, 1950, page 47.

- **Tokenism**

This is a well-known stunt. A company that does not wish to be accused of racism or sexism hires one Token Negro, or one token woman, and prominently displays the token right out front. Some firms hire a black woman for the receptionist, thus killing two birds with one stone.

Bill Wilson published Doctor Silkworth's letter in theÂ *Big Book*, and used it to imply that the medical establishment strongly approved of Bill's wonderful new plan to cure all of the alcoholics with cult religion. Dr. Silkworth was A.A.'s token doctor. Then Bill added an appendix to the second edition,Â *"The Medical View on A.A."*, which listed five more doctors who said something nice about Alcoholics Anonymous.

Bill Wilson didn't bother to mention the fact that the American Medical Association reviewed the bookÂ *Alcoholics Anonymous*when it was first published, and they found it to be a bunch of useless old garbage with no merit. That was the real "Medical View" on Alcoholics Anonymous.

On October 14, 1939, the Journal of the American Medical Association published the following review ofÂ *"Alcoholics Anonymous: How More Than One Hundred Men Have Recovered from Alcoholism"*:

> The seriousness of the psychiatric and social problem represented by addiction to alcohol is generally underestimated by those not intimately familiar with the tragedies in the families of victims or the resistance addicts offer to any effective treatment. Many psychiatrists regard addiction to alcohol as having a more pessimistic prognosis than schizophrenia.

For many years the public was beguiled into believing that short courses of enforced abstinence and catharsis in "institutes" and "rest homes" would do the trick, and now that the failure of such temporizing has become common knowledge, a considerable number of other forms of quack treatment have sprung up.

The book under review is a curious combination of organizing propaganda and religious exhortation. It is in no sense a scientific book, although it is introduced by a letter from a physician who claims to

know some of the anonymous contributors who have been "cured" of addiction to alcohol and have joined together in an organization which would save other addicts by a kind of religious conversion.

The book contains instructions as to how to intrigue the alcoholic addict into the acceptance of divine guidance in place of alcohol in terms strongly reminiscent of Dale Carnegie andÂ the adherents of the Buchman ("Oxford") movement. The one valid thing in the book is the recognition of the seriousness of addiction to alcohol. Other than this, the book has no scientific merit or interest.

The doctors at the American Medical Association immediately saw that Bill Wilson's "new spiritual program" was just a clone of Frank Buchman's cult religion.

Bill never mentioned any of that. He just said,

> This work has claimed the attention of prominent doctors and institutions who say without hesitation that in a few years time, as it gains impetous, thousands of hitherto incurable cases may recover. Such people as the chief physician of Charles B. Towns Hospital and psychiatrists of the Johns Hopkins Hospital at Baltimore express such opinions.
> **The One Hundred Men Corporation Prospectus**, December 1938, page 4.

Note that "the chief physician of Charles B. Towns Hospital" was none other than Dr. William D. Silkworth, the doctor who gave Bill Wilson the quack medicine "belladona cure" while Bill was detoxing from alcohol. So basically, Bill's grandiose claim of many endorsements from the medical community really boils down to just one from his own doctor and a couple from psychiatrists at Johns Hopkins. (Then Bill got a few more for the appendix added onto the second edition of theÂ *Big Book*Â â including an endorsement from Dr. Harry Tiebout, Bill's psychiatrist, who also said that Bill Wilson wasÂ immature, narcissistic, and grandiose.)

And, speaking of tokens, Rev. Sam Shoemaker was Bill's token Protestant minister, and Father Edward Dowling, S.J., was Bill's token Catholic priest. Bill used both of them to try to imply that the theology of A.A. was notÂ bizarre and heretical.

- **Testimonials and Stories**

This is well-known too. Everybody is doing it. Forest Gump was paid $25,000 to tell everybody that he just loved to play ping-pong with his Flexo-Lite Ping-Pong Paddle, which wasn't true, but Momma said that just a little white lie wouldn't hurt...

Sports heroes and movie stars are constantly telling us that we can be so much happier if we just do like they do, and use a certain product...

It is an advertising truism that stories sell. A commercial that just tells the true facts about a product will often be a real failure, but a commercial that tells a story can be very convincing â

- "I just couldn't lose weight; none of the diets worked for me; I was miserable. I didn't dare to go to the beach and appear in public in a bathing suit. Then I discovered the ShrinkFit Diet ProgramÂ® and now I can wear a size twelve..."

- I signed up withÂ *Insta-match*Â®Â and in just one day they found me a girl who couldn't wait to jump in bed with me. I recommend that you give your money toÂ *Insta-match*Â®Â too, and you'll be happy just like me...

- "This product is everything that I ever wanted. This product is just what I was looking for."

> By the way, you can tell that you are getting a scripted testimonial when you hear the word "product". Real people don't buy "products". They may buy diet pills or other drugs or low-calorie drinks, or hair conditioner, or all kinds of stuff, but they don't go shopping for "product". I never bought "product" in my life. I never went to the store to get "product", and I never went online to buy "product". When people start talking to you about "product", you know that you are getting just another standard canned sales pitch.
>
> Also notice how interchangeable the commercials are. When the women in infomercials sit around talking about how happy they are now that they got their husbands to use "this product" (which might be a weight-loss formula in this case), just a little retitling could make the same testimonial into an advertisement for something entirely different, like a hair-restoration product or an erectile disfunction drug.

In an infomercial for a stock market trading program, a man declares,Â "I traded stocks for two hours and made $7000."Â Wow. That sounds great. We should get in on that right away, shouldn't we, if it is that easy to make big money?

Ah, but they didn't tell us how many other times the guy traded stocks for two hours and lost $7000, did they? They just imply that the guy is a very successful trader who is consistently making big profits. And they didn't tell us anything about how the average trader fares.

So that also makes it an example of "cherry picking" â just publicizing a few hand-picked spectacular success stories, while ignoring the many more stories of failures.

A study of such trading programs conducted by the SEC found that more than 90% of the people who trade stocks and options with such computer programs lose their money, but the advertisers don't tell us that. They just keep broadcasting exciting stories like,Â "My best trade was when I made $10,000 in three trading days."

Cults are notorious for trotting out a chorus line of poster children who all give testimonials about how the cult is just the greatest thing since sliced bread, and it has done such wonderful things for them, and their leader is God's gift to mankind.

Alcoholics Anonymous is non-stop testimonials. The last two-thirds of theÂ *Big Book*Â is all testimonials,Â all people telling storiesÂ about how they just love A.A. and the Twelve Steps, and how it made their lives so wonderful... But the book does not tell any stories about the millions of other people whom the faith-healing 12-Step religion did not help. TheÂ *Big Book*Â tells us nothing aboutÂ all of the people who relapsed and went back out and died drunkÂ â it doesn't even mention theÂ *Big Book*'s co-authorÂ Henry Parkhurst, who died drunk. Such a "proof" with testimonials is very one-sided, and only tells half of the story.

In addition, there is no actual evidence that those people who did get sober actually got soberÂ *because of*Â Alcoholics Anonymous. There is no demonstration of any cause-and-effect relationship between joining A.A. and getting sober. That critical factor is just assumed and glossed over.

And every A.A. meeting is more testimonials, people telling their stories, and claiming that A.A. saved their lives, not that they saved their own lives by quitting drinking...
And of course you will not hear from any of the other people who found the A.A. program to be of no help, and quit coming back.

- **The Fallacy of One Similarity**

Two different things are declared to be the same thing based on just one point of similarity (or just a few).

For instance,
"Your father is authoritarian. The cult leader is authoritarian. Therefore they are just the same, and you should trust the cult leader just like you trust your father."

Obviously, you could continue that through a number of other characteristics like,

- ♦ both are men
- ♦ both are balding
- ♦ both have fat bellies

but that would still overlook the single most important difference between the two men: The father probably has the best of intentions towards his child, while the cult leader is a psychopath who abuses and exploits people.

It's easy to see how this logical fallacy can get extended into stereotyping groups on the basis of just one characteristic:
"All of those tree-huggers are opposed to logging this stand of old-growth trees. Therefore, they are all eco-terrorists who will do anything to block progress."

Bill Wilson had a dramatic "religious" or "spiritual" or hallucinatory experience, and thought he saw God, when he was sick and detoxing from alcohol in Towns Hospital and getting Dr. Silkworth's "Belladonna Cure" (which was a hallucinogenic drug cocktail), andÂ while also being tormented and indoctrinatedÂ by recruiters from Frank Buchman's Oxford Group cult. After reading in William James' book,Â *The Varieties of Religious Experience*, that some people have profound religious experiences when they are really down, in despair and great pain, Wilson decided that using the Oxford Groups techniques to put people down, crush their egos, and make them feel powerless and hopeless would recreate his "religious" experience in them. He was wrong. It doesn't work.

Bill Wilson made the big mistake of seizing upon a few points of similarity between what happened to him and what he read in James' book, while ignoring the many large differences:

- ♦ James' subjects weren't on hallucinogenic drugs,
- ♦ they weren't suffering fromÂ *Delirium Tremens*Â while detoxing from alcohol,
- ♦ and they weren't having their minds "changed" byÂ Oxford Group recruiters.

- **The Fallacy of One Dissimilarity**

This technique is simply the converse ofÂ *The Fallacy of One Similarity*Â â find one difference between two things, and then declare that they are completely different.

For example,Â "Alcoholics Anonymous cannot be a cult because there isn't a strong leader who commands and controls everybody."

That illogic ignores the fact that there areÂ many dozens of different defining characteristics of a cult, andÂ *A Charismatic Leader*is just one of them.

Besides, Alcoholics AnonymousÂ *did have*Â a charismatic leader as its founder â Bill Wilson. The founder Bill Wilson is now dead, but A.A. is still ruled by the occult practices and customs that he established, and throughÂ the crazy things that he wrote in his books.

And a cult does not stop being a cult just because the leader dies. Scientology, the Hari Krishnas (ISKCON), the Moonies (Rev. Sun Myung Moon's Unification Church), Jim Jones' People's Temple, The Branch Davidians of "David Koresh", and Alcoholics Anonymous are all cults that now worship dead founders. And yes, the People's Temple and the Branch Davidians churches still exist and they still have some followers and true believers, in spite of the fact that the majority of both cults died in spectacular mass suicideâ mass murder blowouts.

- **If It Looks Like X, Then It Is X.**

When you find a snake that has red, yellow, and black bands all around it, it's obviously just a harmless King Snake, isn't it? So you pick it up to take it home as a pet. It turns around and bites you and you die. What was the logical error? A Coral Snake also has red, yellow, and black bands all around it, and it isn't harmless. The two snakes look very similar, but they are not the same thing at all.

The key thing to look at to distinguish King Snakes from Coral Snakes is which color is adjacent to the red bands on the snake:

Â Red and black, friend of jack.
Red and yellow, kill a fellow.

Similarly, if a politician looks like a respectable and honest man, he must really be one, right? I mean, he's dressed in a fine suit and tie, isn't he? And he gives rousing speeches, doesn't he? â Speeches full of fine words like God, country, patriotism, and freedom. So he must be a great statesman, right?

If a TV evangelist has a Bible in one hand, and a cross in the other, and dresses impecably and speaks softly and piously and says all of the right slogans and prays a lot and looks just like a real holy man, then he must be one right? ...Even if he is preaching hatred and the advocating the assassination of somebody he doesn't like. All in the name of Jesus.

Conversely, if a young black man with a knit cap looks like a hoodlum gang member, then he must be one, right?

Many animals take advantage of this confusion of appearances by appearing to be a venomous

animal. There are harmless flies that look just like bees or wasps. The predators leave them alone because they don't want to get stung.

- **A Distinction Without A Difference.**

  As in, "He was just a heavy drinker, not a real alcoholic. Okay, he was drinking enough alcohol to wreck his health and his brain and eventually kill himself, but he wasn't a real alcoholic, because he managed to quit drinking without A.A. or the 12 Steps."

  When Vice President Dick Cheney's former Chief of Staff I. Lewis "Scooter" Libby declared that Cheney and Bush had authorized and approved the surreptitious leaking of classified nuclear intelligence information to get back at Joseph C. Wilson IV for reporting that Saddam Hussein didn't get any yellow-cake uranium from Niger,Â "A senior administration official, speaking on background because White House policy prohibits comment on an active investigation, said Bush sees a distinction between leaks and what he is alleged to have done."Â (Â Washington Post, 2006.04.06)

  What distinction? Is it not treason if it is the President who subverts national security? Something that would get an ordinary citizen locked up for years in Leavenworth is okay if it is sneakily done by the President for political reasons?

- **Sly Suggestions**
  Plant sly suggestions. Do not make solid statements which can be proven wrong; rather, just suggest that your ideas may be true. Then, often, perhaps a little while later, you might suddenly start assuming that all of your suggestions are really true.

  This technique is basically the old strategy of first just getting your toe in the door, and then later gradually working your way in. With this technique, the speaker first gets his toe into the door of someone's mind by merelyÂ *suggesting*Â that an ideaÂ *may be true*Â (which isn't too hard to accept, because it's only a suggestion that might be true), and then the speaker gradually pushes further in by assuming that the suggestion really is true.

  For instance:

  - "You may be a winner..."
  - "You may have already won $10,000,000. Just subscribe to a bunch of magazines and see..."
  - "You may be the next winner..."
  - "Your opinion may be worth $1000."
  - "This diet plan may be the one that works for you..."
  - "This cream may be a make-up artist's dream come true..."
  - "This get-rich-quick scheme may be the answer to all of your problems..."
  - "Science and astrology: Are they really at odds?"
  - "Could a Chinese Herb Replace Life-Threatening RA Drugs?"

  - Con artists who tout stocks on the stock market say of their latest "hot stock" that a "Big move could happen."
    (Yes, but will the move be in the direction that you want? It might go down like the Titanic.)

  - "I am predicting, that this web site may be part of a major corporate buyout by Microsoft,

Google, or Yahoo in the next 18 months."
(First it's a prediction, and then it's just a maybe.)

- A commercial for a weight-loss pill says, "If your weight loss is too rapid, then cut down and only take one pill per day."
  The sly suggestion is, of course, that those pills really work great. Too good, in fact. You will loose weight too fast.

- The back cover of Dr. Arthur Janov's ridiculousÂ bookÂ "*TheÂ **New**Â Primal Scream: Primal Therapy After 20 Years*" advertises:
  "Scientific Research World-Wide Proves Primal Therapy May Prolong Life by Reducing Stress".
  Yes, and the discovery of the coelacanthÂ *PROVES*Â that Nessie the Loch Ness sea monsterÂ *MAY*Â be real too, but it's extremely unlikely, for about a dozenÂ good scientific reasons.[4]Â I'm not holding my breath.

  Notice the broken logic:
  Scientific blah-blah PROVES that Janov's garbage MAY work.
  You get an absolute certainty â "proof" â followed by a vague, uncertain, possibility.
  And note that the opposite logic is equally valid:
  Scientific blah-blah PROVES that Janov's garbage MAY NOT work.

- On December 5, 2005, Condoleeza Rice used the same word game in her attempt to explain to the European countries the illegal American practice of "rendition" â kidnapping people and shipping them to other countries that permit torture, where they will be forcefully interrogated. Condoleeza said that we had always had a problem with "what to do with these individuals whom weÂ *know*Â are believed to be terrorists."
  We get an absolute certainty â she spoke the word "know" with strong emphasis â followed by a vague belief. Condoleeza usedÂ the passive voiceÂ to declare that some unnamed personÂ *believes*Â that some guy is a terrorist.
  *"Yeh, weÂ **know**Â with certainty that Joe Blow the village idiot thinks that Abdul is a terrorist."*
  That is Condoleeza's lame-brained justification for violating international law and besmirching the reputation of the United States of America.

  By the way, IÂ *know*Â that some people believe that George W. Bush is a terrorist. And so are Dick Cheney, Donald Rumsfeld, and General Jerry Boykin. They murder innocent people.

- A commercial on TV says,Â "Two years ago, I had a heart attack. Right there where Tina is standing. If it weren't for Bayer aspirin, who knows?"
  They did not say that Bayer aspirin actually did anything good for the guy. They didn't even say that the guy actually took any aspirin. They just want to strongly hint that aspirin saved the guy's life, because he presumably took some of it while having a heart attack.

Bill Wilson was a past master of this technique, and used it frequently:

> If, when you honestly want to, you find you cannot quit entirely, or if when drinking, you have little control over the amount you take,Â you are probablyÂ alcoholic.Â If that be the case, you may beÂ suffering from an illness which only a spiritual experience will conquer.
> Â Â Â To one who feels he is an atheist or agnostic such an experience

> seems impossible, but to continue as he is means disaster, especially if he is an alcoholic of the hopeless variety.Â To be doomed to an alcoholic deathÂ or to live on a spiritual basis are not always easy alternatives to face.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 44.

Bill neatly tap-danced and segued from a diagnosis ofÂ "youÂ mayÂ be sick"Â andÂ "youÂ mightÂ need a spiritual experience"Â toÂ "you are doomed to an alcoholic death if you don't join my 'spiritual' program", without a single new fact to support the sudden change in medical diagnosis. He just started assuming that all of his previous suggestions were unquestionably true. Then Bill Wilson used theÂ *Either/Or*Â propaganda trickÂ to present the reader with only two limited choices â join his cult or die:Â "To be doomed to an alcoholic death or to live on a spiritual basis are not always easy alternatives to face."

In his second book, Bill Wilson used aÂ *Sly Suggestion*Â this way:

> By now the newcomerÂ has probablyÂ arrived at the following conclusions: that his character defects, representing instincts gone astray, have been the primary cause of his drinking and his failure at life...
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 50.

Actually, by now, the newcomer hasÂ *probably*Â come to the conclusion that Bill Wilson was a raving lunatic, and the newcomer has quit going to Alcoholics Anonymous meetings altogether. (At least ninety-five percent of theÂ newcomers to A.A. drop outin the first year.)

> *Oh, and Bill Wilson's "primary cause" of drinking is bogus and just so much delusional nonsense â Â "character defects, representing instincts gone astray". Bill Wilson had a zillion such goofy "primary causes" of drinking and alcoholism, and they were all wrong.*

Notice how Bill Wilson usedÂ *Sly Suggestions*Â in this paragraph of instructions to the wives of alcoholics, where Bill did a clever tap-dance and slipped and slid from talking about how the husbands must quit drinking to declaring that the husbands must "discover"Â Bill Wilson's Oxford Group version of God:

> There is another paralyzing fear. YouÂ mayÂ be afraid your husband will lose his position; you are thinking of the disgrace and hard times which will befall you and the children. This experienceÂ mayÂ come to you. Or youÂ mayÂ already have had it several times. Should it happen again, regard it in a different light.Â MaybeÂ it will prove a blessing! ItÂ mayÂ convince your husband he wants to stop drinking forever. And now you know that he can stop if he will! Time after time, this apparent calamity has been a boon to us, for it opened up a path which led to the discovery of God.
> TheÂ *Big Book*, 3rd edition, William G. Wilson,Â *To Wives*, page 116.

- Bill Wilson started off talking about how bad itÂ *might*Â be if the husband lost his job.
- Then Bill declared that itÂ *might*Â be a blessing... â that such a calamityÂ *might*Â provide the impetus for the husband to quit drinking.

◊ Then Bill suddenly assumed that his suggestions were true, and totally changed the subject and declared that the husband could quit drinking if he wished to, which means that the husband is not "powerless over alcohol" like Step One says, and then Bill Wilson concluded that everything was wonderful because so many husbands had found Bill's Buchmanite version of God.
So that also makes itÂ a bait-and-switch trick: First the goal is to get the husbands to quit drinking, and then the goal is to get the husbands to "come to believe" in Bill Wilson's religion.

Even the commandment toÂ *"Work The Steps!"*Â was delivered in this sly back-door manner. On the second page of chapter five of theÂ *Big Book*Â (page 59), it says that the Twelve Steps are merelyÂ *"suggested as a program of recovery."*Â Bill Wilson didn't want to write that. He wanted the Twelve Steps and all of the rest of his dogmatic cult religion to be requirements of membership in A.A., just like how, back in the early days,Â "surrendering to God" was required before an alcoholic could attend Alcoholics Anonymous meetings. But more moderate A.A. members strongly objected to that because they clearly foresaw that Bill Wilson's extreme religiosity was going to drive away many of the very alcoholics whom the program was supposed to help.

So, after a loud and long screaming contest, Bill was forced to compromise and write that the Twelve Steps were just "suggested as a program of recovery" (TheÂ *Big Book*, page 59).

Bill Wilson did his best to put a smiley-face on the situation by later declaring that his critics "had opened the A.A. door wide to all, even the atheists and agnostics", but Bill was really secretly nursing a resentment. So, on the very first page of the next chapter that he wrote, chapter six, Bill planted a sly suggestion that also usedÂ the fear-mongering propaganda technique:

"If we skip this vital step, weÂ may notÂ overcome drinking."
(TheÂ *Big Book*, William G. Wilson, page 72.)

Then again, we might. Heck, I did. In fact,Â the vast majority of successfully recovering alcoholics do.

Bill gave us lots more examples of this mind-bendingÂ *Sly Suggestions*Â technique. TheÂ *Big Book*Â is loaded with them. To list just a few more:

> We asked ourselves this: Are not some of us just as biased and unreasonable about the realm of the spirit as were the ancients about the realm of the material?
> TheÂ *Big Book*, 3rd Edition, Page 51.

If you won't swallow Bill's bull, thenÂ maybeÂ you areÂ prejudiced, biased, and unreasonable as all get-out.

> And be careful not to brand him as an alcoholic. Let him draw his own conclusion. Â ... Â But insist that if he is severely afflicted,Â there may beÂ little chance he can recover by himself.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 92.

"MaybeÂ you are gonna die. I'm not saying for sure, butÂ maybeÂ you are gonna die if you don't join my 'little fellowship'Â *real soon now.*"

> MaybeÂ you have disturbed him about the question of alcoholism. This is all to the good. The more hopeless he feels, the better. He will be more likely to follow your suggestions.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 94.

MaybeÂ we are really messing with his mind now.

AndÂ maybeÂ the whole family should go joinÂ the Al-Anon branch of the cult:

> One more suggestion: Whether the family has spiritual convictions or not, theyÂ mayÂ do well to examine the principles by which the alcoholic member is trying to live.Â They can hardly fail to approveÂ these simple principles, though the head of the house still fails somewhat in practicing them. Nothing will help the man who is off on a spiritual tangent so much as the wife who adopts a sane spiritual program, making a better practical use of it.
> TheÂ *Big Book*, 3rd edition, Chapter 9,Â *The Family Afterward*, page 130.

Bill Wilson says that the whole familyÂ *may do well*Â to join his religion, because Father is acting crazy again.
*"MaybeÂ they will really benefit from Bill's version of Buchmanism."*Â (The religious cult that just drove Daddy crazy.)
Bill imagines thatÂ *they can hardly fail*Â to agree with his program, once they see how wonderful his "simple principles" really are. (Actually, Bill Wilson's so-called "simple principles" were not really "principles", they wereÂ Oxford Group cult recruiting and indoctrination practices.)

Then Bill WilsonÂ lectured the wives of alcoholics, telling them in several different ways not to nag their husbands to quit drinking, andÂ not to nag their husbands to quit smoking,Â *or else*, and Bill then made a few moreÂ *Sly Suggestions*:

> Our next thought is that you should never tell him what he must do about his drinking.Â IfÂ he gets the idea that you are a nag or a killjoy, your chance of accomplishing anything usefulÂ mayÂ be zero. Â ... Â ThisÂ maylead to lonely evenings for you. HeÂ mayÂ seek someone else to console him â Â not always another man.
> *Big Book*, 3rd Edition,Â *To Wives*, page 111.

Bill was also using the propaganda trick ofÂ *Argue From Adverse Consequences*Â there, to put the little woman in her place â Â *"Don't nag your husband to quit drinking,Â **or else**Â he may go off with another woman."*

> We know these suggestions are sometimes difficult to follow, but you will save many a heartbreak if you can succeed in observing them. Your husbandÂ mayÂ come to appreciate your reasonableness and patience.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, Chapter 8,Â *To Wives*, page 111.

(Then again,Â maybeÂ he won't appreciate you at all.Â MaybeÂ he'll just continue to take advantage of you, like Bill did to Lois.)

> If this kind of approach does not catch your husband's interest, itÂ mayÂ be best to drop the subject, but after a friendly talk your husband will usually revive the topic himself. ThisÂ mayÂ take patient waiting, but it will be worth it. Meanwhile you might try to help the wife of another serious drinker. If you act upon these principles, your husbandÂ mayÂ stop or moderate.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, Chapter 8,Â *To Wives*, page 111.
>
> ***So the husbandÂ mayÂ quit drinking if the wife stops being a shrill nag? Why, it must be her fault that he drinks.***

And while you are out recruiting, here is how you handle a drinker who is perhaps not a disgusting atheist:

> Your prospectÂ mayÂ belong to a religious denomination. His religious education and trainingÂ mayÂ be far superior to yours. In that case he is going to wonder how you can add anything to what he already knows. But he will be curious to learn why his own convictions have not worked and why yours seem to work so well.Â HeÂ mayÂ be an example of the truth that faith alone is insufficient.Â
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 93.

That's a cute twist in the logic:Â "HeÂ *may be*Â an example of one of Bill Wilson'sÂ *unquestionably-true*Â religious beliefs."Â Bill is subtly slipping in another propaganda technique there:Â *Assume the Major Premise*. Just assume that something is true, and talk like it is unquestionably true, because you wish to fool others into believing that it is true, and then divert attention away from that assumption by arguing about something else, likeÂ *why*Â it is true:
HeÂ mayÂ be an example of the truth that faith alone is insufficient.Â
Then again, heÂ mayÂ be an example of the truth that religious beliefs really have very little to do with drinking beer...

Bill managed to pack more lies into that paragraph. This one sentence contains no less than two lies:Â
But he will be curious to learn why his own convictions have not worked and why yours seem to work so well.Â

- Who says that the other guy's own convictions have not worked?
  Who says that the goal of all religious beliefs is to keep people from drinking alcohol?
  I don't remember any of the Ten Commandments saying,Â *"Thou Shalt Not Drink Wine, Beer, Or Hard Liquor".*
    - In fact, Christ's first miracle was making wine out of water, wasn't it?
    - Didn't Jesus drink wine at the Last Supper?
    - And don't many Christians drink wine at Communion?
    - Don't Jews drink wine at Seder?

  So having religious beliefs or convictions does not always bar one from drinking alcohol. And drinking alcohol does not prove that someone's religious convictions have failed.

- And religious convictions don'tÂ *"work"*. They are not supposed to "work". That is, religious

convictions areÂ *beliefs*. They are not machines like cars or computers that areÂ *supposed*Â to do things, andÂ *supposed*Â to function in a certain manner. And it is not really the job of religious convictions to control people's indulgence in food, sex, drugs, or alcohol.

- The recruiter's convictions "seem to have worked so well"? ThatÂ mayÂ well be a slick deception. The recruiterÂ could bedoing theÂ *"Fake It Until You Make It"*Â routine. HeÂ may wellÂ relapse and die drunk after doing a bunch of enthusiastic recruiting, just likeÂ Jackie didÂ in theÂ *Big Book*, and just likeÂ Paddy did, and just like Bill Wilson's own recruiter,Â Ebby Thacher, did.

- Lastly, note the underhanded suggestion that the religious beliefs of the A.A. members are better than the beliefs of other religions, because the other religions didn't keep their people from drinking.

You know, Bill WilsonÂ just might have beenÂ one of the greatest, slickest, most consummate American con artists, when it comes to lies, deceit, and propaganda techniques.

The A.A. headquarters is still cranking out the same style of propaganda today:

> Spirituality is an awakening â or is it all the loose ends woven together into a mellow fabric?
> It's understanding â or is it all the knowledge one need ever know?
> It's freedom â if you consider fear slavery.
> It's confidence â or is it the belief that a higher power will see you through any storm or gale?
> It's adhering to the dictates of your conscience â or is it a deep, genuine, living concern for the people and the planet?
> *Came to Believe*, Page 5, A.A. World Services, Inc.

Does the A.A. headquarters teach real spirituality, or is it just a load of bombastic bull droppings?

- **Misleading Inference**

Somebody who is selling a get-rich-quick scheme on late-night TV shows you an accountant's statement that certifies that he is worth more than a million dollars. But there is no evidence that the guy actually made that much moneyÂ by using his get-rich-quick scheme. He probably made the money byÂ *selling*Â the scheme on late-night TV.

Likewise, in an infomercial for a stock market trading program, a woman says,Â "I feel bad when I don't make $1000 a trade."
Well okay, but how often does she feel bad? They didn't say anything about that. They imply that she is so successful, and making so much money, that it's an unusual and unhappy day when she doesn't make $1000. But they actually presented us with no evidence to support that assumption. For all we know, that poor woman could be feeling 'really bad' every day.

- **Unsubstantiated Inference and Groundless Claims**

Peter Howard complained bitterly about the criticism that his favorite cult religion â Frank Buchman's Moral Re-Armament â was getting:

> Â Â Â Â So many people are snobs of intellect. They write well, make money, gain titles or preach splendidly but are helpless and barren when they meet a man in need. They shine before men but change nobody.
> *Britain and the Beast*, Peter Howard, 1963, page 112-113.

Peter Howard tried to imply that members of his religion really did do a good job of helping people and changing them for the better, while his critics did not. But Peter Howard provided no evidence to support that inference. Actually, Frank Buchman's cult was notorious for alsoÂ *not*Â changing people. People would loudly proclaim that they had been "changed" or "saved" at a big emotional rally or revival meeting or house party, but they were very soonÂ back to their old bad habits, same as usual.

- **Introduce Irrelevant Information as Supporting Evidence**

Here is an example of using irrelevant information as supporting evidence. The cult leader Frank Buchman was working on converting a college student, and...

> ...finally the student said: "I'm not going to be a Christian." Â ...
> Â Â Â Then Frank asked him what he believed.
> Â Â Â "Confucius," came the unusual answer.
> Â Â Â "Wonderful!" said Frank, deciding to humour him. "Tell me about Confucius."
> Â Â Â Frank says his friend did not seem to know much on that subject. But Frank had been to China, and knew that Confucius said he could tell people how to be righteous, but he hadn't the power to make them righteous. Moveover, he had been to Confucius' grave, and been entertained at tea by the seventy-sixth descendant of the Chinese sage and seen the seventy-seventh descendant on the day when he had to wear four coats because of the cold.
> Frank Buchman, quoted inÂ *Experiment With God; Frank Buchman Reconsidered*, GÃ¶sta Ekman, page 90.

The information that Frank Buchman visited the grave of Confucius is totally irrelevant. It does not mean that Buchman knew anything more about Confucianism than the student or anybody else. Likewise, having had tea with a very distant descendant of Confucius is also completely irrelevant trivia, even though it sounds good on the surface. And to talk about having seen an even more distant descendant on a very cold day is absurd.

The author also used the propaganda technique of making anÂ *Unsubstantiated Inference*, implying that Frank Buchman, unlike Confucius,Â *did*Â haveÂ *"the power to make people righteous"*. Alas, Frank Buchman had no such power, either. Frank Buchman was able to fool a few young college students and eccentric rich people and make them think that they had been changed for the better, but

when it came to the people who really mattered the most and whoÂ *really*Â needed to get "changed", like Heinrich Himmler, Hermann Goering, Joseph Goebbels and Adolf Hitler,Â Frank Buchman totally failedÂ to make good Christians out of them. So much for Frank Buchman's "power to make people righteous".

(Besides, what happened toÂ free will? If Frank Buchman really had "the power to make people righteous", then wasn't he over-riding other peoples' ability to chose good or evil for themselves?)

A variation on this propaganda trick of introducing irrelevant evidence is to state a bunch of irrelevant obvious platitudes, and then claim that they support your program. Yammer a few trite hackneyed irrelevant clichÃ©s and slogans like,Â *"People are more important than things"*, and then conclude that your cult is right about everything. (That was what "Up With People" did.)

- **False Analogy**

They show you a fried egg and say,Â "This is your brain. This is your brain on drugs..."
No, that isn't my brain. But considering the stupidity of their arguments, that just might really be their brain...

Bill Wilson wrote:

> Near you, alcoholics are dying helplesslyÂ like people in a sinking ship.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, William G. Wilson, Chapter 11, "A Vision For You", page 152.

No, alcoholics are not like helpless people on a sinking ship. Alcoholics are not powerless over alcohol. They can quit drinking, with or without Alcoholics Anonymous. (Now whether theyÂ *will*Â quit drinking and save their own lives is another matter.)

One A.A. member reported:

> "My sponsor used to enliken the steppers to survivors of a shipwreck, who all had to row in the same direction, in order to survive. This related to a group conscience. 'What would it look like if everyone rowed in different directions?' was his analogy."

Again, that is a bad analogy. Recovering or recovered alcoholics are not trapped in a lifeboat together. They don't have to spend the rest of their lives in an A.A. meeting room, conforming to the group. They can all go in their own directions and get on with their lives.

Bill had a zillion false analogies:

> We areÂ like men who have lost their legs; they never grow new ones.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, William G. Wilson, Chapter 3, "More About Alcoholism", page 30.

So, Bill says, you can't ever recover from alcoholism, and you can't ever leave Alcoholics Anonymous. Actually, if alcoholics suffer from an allergic reaction to alcohol, like Doctor Silkworth suggested in theÂ *Big Book*Â (page xxvi of 3rd edition; page xxviii of 4th edition), then we are not at all like men who have lost their legs. We are like people who are allergic to a poisonous chemical, so we are better off if we don't consume that poison.

Bill continued:

> The Wright brothers' almost childish faith that they could build a machine which would fly was the mainspring of their accomplishment. Without that, nothing could have happened. We agnostics and atheists were sticking to the idea that self-sufficiency would solve our problems. When others showed us that "God-sufficiency worked with them, we began to feelÂ like those who had insistedÂ the Wrights would never fly.
> The A.A.Â *Big Book*,Â *Alcoholics Anonymous*, William G. Wilson, Chapter 4, "We Agnostics", pages 52-53.

No, I don't feel like a stodgy old fool when I hear some superstitious cult members proclaim that they have found a magical panacea â that the cult hasÂ solvedÂ *all*Â of their problems. (Especially not when I read what theirÂ real failure rateÂ is.)

> The alcoholic isÂ like a tornadoÂ roaring his way through the lives of others.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 82.

That was the behavior of Bill Wilson, not all alcoholics.

> They suspect father is a bit balmy!
> Â Â Â Â He is not so unbalanced as they might think. Many of us have experienced dad's elation. We have indulged in spiritual intoxication.Â Like a gaunt prospector, belt drawn in over the ounce of food, our pick struck gold. Joy at our release from a lifetime of frustration knew no bounds. Father feels he has struck something better than gold. For a time he may try to hug the new treasure to himself. He may not see at once that he has barely scratched a limitless lode which will pay dividends only if he mines it for the rest of his life and insists on giving away the entire product.
> The A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 9, "The Family Afterward", pages 128-129.

No,Â a giddy manic-depressive who has become obsessed with a cult religionÂ is not like a prospector who has just found gold.

- **Conflation, False Equality**
  Say or imply that two things are equal, and the same thing, when they are not.

"We pretend being religious makes us moral and charitable."
When You're Riding Alone, You're Riding With Osama, Bill Maher, page 117.

The serious issue is the conflation of the nation with one, and only one, political party. When Palin says "pro-American", she means pro-Republican. When McCain's banners pronounce "Country First", they mean Republican party first.

And this is serious because such conflation is a hallmark of dictatorial regimes â recall the Communist Party or the Nazis. In each case, the party logo (hammer & sickle or swastika) became the national symbol.
== Ed Robertson, Bloomington IN

Adolf Hitler and the Nazis used this propaganda trick often. They conflated "patriotism" with all kinds of crimes:

- If you are patriotic, you will support killing the Jews.
- If you are patriotic, you will never criticize Adolf Hitler or his policies.
- If you are patriotic, you will support invading foreign countries like Czechoslovakia and Poland, and then Belgium, the Netherlands, Denmark, France, and the Ukraine.
- If you are patriotic, you will always vote for the Nazi Party.
- If you are patriotic, you will agree with Hitler about everything, and worship Hitler's words as the ultimate in wisdom. You will readÂ *Mein Kampf*Â as your new bible.
- If you are patriotic, you will gladly join the Army and help Hitler to conquer and occupy all of Europe.

In modern times, American politicians have used the same tricks for the same things:

- If you are patriotic, you will support the War in Vietnam, and not criticize it.
- If you are patriotic, you will support invading Iraq.
- If you are patriotic, you will not complain about the fact that there were no weapons of mass destruction in Iraq.
- If you are patriotic, you will not notice that the wars in Afghanistan and Iraq did not make America more secure.
- If you are really patriotic, you will support the troops (rather than criticizing the war).

It is possible to support the troops while objecting to an illegal war. Criticizing lying politicians is not the same thing as criticizing the troops, but the politicians don't want you to know that.

Politicians often use this trick to try to equate patriotism with not criticizing the President:

- If you are patriotic, you will never disagree with the President.
- If you are really patriotic, you will support the President.

Those things are not the same things at all, of course. Sometimes the highest patriotism requires criticizing the elected leaders, rather than just going along with their program, and letting them get away with anything. Today, we regard those "disloyal" Germans who fought against Adolf Hitler as the greatest of German patriots.

More conflation: We routinely hear that the economy is improving because a bunch of new jobs were created â as if all jobs are equal â "a job is a job, and just having one is wonderful." The people who are trying to fool you with faked statistics try to equate low-paying jobs with high-paying jobs. Someone who lost a high-paying manufacturing job and is now forced to take a low-paying janitorial

or burger-flipping job won't agree.

We can easily find plenty of examples of this stunt in Bill Wilson's writings:

- Quitting drinking = joining Alcoholics Anonymous.
- Quitting Alcoholics Anonymous = returning to a life of drinking, and dying drunk in a gutter.
- A.A. activities = "recovery".
- A.A. activities = "spiritual progress".Â (*Big Book*, pages 100 and 127.)
- The A.A. program = "treatment" of alcoholism.
- AndÂ Professor VaillantÂ used the reverse equality: "treatment" of alcoholism = sending patients to Alcoholics Anonymous.
- Doing Bill's Twelve Steps = "spiritual development".
- Doing Bill's Twelve Steps = "spiritual growth".
- Believing in God =Â agreeing with Bill Wilson's cult religion beliefs.
- "Having faith" = believing Bill's bull.
- Choosing sobriety = accepting Bill Wilson's Twelve Steps (and vice versa).Â (*Alcoholics Anonymous Comes Of Age*, p. 28.)
- A.A. = sobriety. When they tell you "Don't let anything come before your sobriety", that really means "You must put A.A. before everything else in your life."
- "Helping others selflessly" = going recruiting for A.A.Â (*Big Book*, page 97.)
- "Putting other people's welfare ahead of your own" = going recruiting for Alcoholics Anonymous.Â (*Big Book*, page 94.)
- "Keeping spiritually active" = going recruiting for Alcoholics Anonymous.Â (*Big Book*, page 156.)
- Behavior of which 12-Steppers disapprove = "spiritual disease".
- Surrendering your mind and your will to the cult = "transcendence of ego".
- Slavish dependence on A.A. equals "true independence of the spirit."Â (*Twelve Steps and Twelve Traditions*, William G. Wilson, page 36.
- Bill Wilson's "spiritual principles" = God's spiritual principles.
- Bill Wilson's cult practices = God's spiritual principles.
- Bill Wilson's strange ideas of God = God.
- Bill Wilson's favorite cult religion = "simple principles".
- "Having faith in God" =Â believing what Bill Wilson says.
- The voices in Bill's head =Â the voice of God.
- Or, the voices in Bill's head =Â the voices of spirits of long-dead peopleÂ â medieval priests and Nantucket whalers.
- Bill Wilson's funny state of mind = "restored to sanity by God".
- Accepting the authoritarian structure and extreme demands of a pro-Nazi cult religion = "getting good".
- Using your own intelligence and will power to run your own life and take care of yourself = "playing God".
- Rejecting Bill's bull = being "unreasoningly prejudiced".
- Being a slave of the A.A. God = freedom:

> First of all, we had to quitÂ playing God. It didn't work. Next, we decided that hereafter in this drama of life, God was going to be our Director. He is the Principal; we are His agents. He is the Father, and we are His children. Most good ideas are simple, and this concept was the keystone of the new and triumphant arch through which we passed to freedom.
>
> A.A.Â *Big Book*, 3rd Edition, William G. Wilson, Chapter 5,Â *How It Works*, page 62.

- Many years of drunkenness = expertise about alcoholism and sobriety.

Â Â Â At an A.A. meeting, a member declares that A.A. is good for achieving sobriety, because:Â "There's an aggregate of two thousand years of drinking experience in this meeting room. If we don't understand alcoholism, then nobody does."
Wrong. Bad logic.
Expertise in getting drunk does not equal expertise in getting other people sober.
Heck, just look at the guys drinking under the bridge â they might have even more years of experience in drinking, because they never stopped â they mustÂ *really*Â understand drinking â but they haven't gotten anybody else sober lately, have they?

- **Double Bind**

AÂ *double bind*Â is a trap where you are damned if you do, and damned if you don't.

The classic double binds are the tests for whether a woman is a witch:
Throw her into a river or pond, and ....
Â Â Â If she sinks and drowns, she was innocent.
Â Â Â But if she floats and lives, then she's guilty (because the Devil is holding her up), so she gets burned at the stake.

Likewise,
Â Â Â If she confesses (under torture) to being a witch, then she is one.
Â Â Â If she denies being a witch, then that proves that she is an evil witch who lies about being a witch.

Closer to home, Alcoholics Anonymous says that
Â Â Â If you say that you are an alcoholic, then you obviously are one.
Â Â Â If you deny being an alcoholic, then that proves that you are a dishonest alcoholic who isÂ *in denial*.

The HazeldenÂ *Little Red Book*Â teaches us that this is a "symptom" that indicates "mental illness":

> â Taking that first drink with the idea that "this time I'll control it."
> *The Little Red Book*, Hazelden, page 28.

Oh? Is the opposite true? Is it a sign of good mental health if you thinkÂ *"This time I won't control it. This time I'll just get totally smashed, drunk as a skunk, and righteously ripped..."*?

Bill Wilson gave usÂ another good exampleÂ of a double bind earlier, when he declared that we were selfish and unspiritual if we committed a bunch of sins and crimes, and we were also selfish and unspiritual if we didn't commit a bunch of sins and crimes, because, in the second case, we were just selfishly avoiding punishment.
Damned if you do, and damned if you don't.

Another common Alcoholics Anonymous double bind is:Â "If I don't feel like going to a meeting, I usually NEED to."

1. If you feel like going to a meeting, you should go to a meeting.
2. If you don't feel like going to a meeting, you should go to a meeting.

Damned if you do, damned if you don't. Either way, they insist that you should spend your evening at one of their meetings.

Danny M. Wilcox teaches us, in his book of A.A. dogma, that alcoholics are "people pleasers":

> They spoke of the things they had been willing to do to please other people in their lives.
> Â Â Â The need to please others and the perceived failure to do so were often cited as among the main reasons they drank. Generally, these members exhibited obvious anxiety concerning the opinion of other people, which really emphasizes our social needs as human beings.
> *Alcoholic Thinking: Language, Culture, and Belief in Alcoholics Anonymous*, Danny M. Wilcox, page 86.

But five pages later, Wilcox also wrote that being selfish and not caring how other people feel is a sign of alcoholism:

> "Selfishness, self-centeredness! That is the root cause of all our problems" (AA 1976: 62). Everything revolves around self-centeredness. Â ... Â Amazingly, when first introduced to AA most members said that they did not think that they were especially self-centered. Some of them thought it patently ridiculous to suggest that they were interested only in themselves, since they could cite plenty of examples of their generosity and concern for others. Â ...
> Â Â Â Most members said that their selfishness just got worse as their dependence on alcohol increased.
> *Alcoholic Thinking: Language, Culture, and Belief in Alcoholics Anonymous*, Danny M. Wilcox, page 91-92.

So,

- you are an alcoholic if you care what other people think and feel,
- and you are an alcoholic if you don't care what other people think and feel.

Damned if you do, and damned if you don't.

They use the same trap on those people who are children of alcoholics:

- If you strive to please yourself, that proves you are a selfish, self-seeking alcoholic, and you need to join Alcoholics Anonymous and do the Twelve Steps.
- If you strive to please other people, that proves you are a neurotic "people-pleasing" Adult Child Of an Alcoholic, and you need to joinÂ Al-Anon or ACOAÂ and do the Twelve Steps.

Damned if you do, and damned if you don't. You can't get out of it without joining some 12-Step group and doing theÂ guilt-inducing Twelve Steps.

For that matter, as Bill sees it, you can't ever escape from the Twelve Steps. Just being related to an alcoholic dooms you to having to do Bill Wilson's Twelve Steps for the rest of your life:

- If you drink alcohol, like your relative, you have to join Alcoholics Anonymous and do the Twelve Steps.
- If you don't drink alcohol, you have to join Al-Anon or ACOA and do the Twelve Steps to treat your "spiritual disease" of "codependency".

- **Project Future From Past**
  Assume that history repeats itself, and just because something happened before, it will happen the same way again. Especially, make the mistake of attributing the causes of events to only one or two factors, while ignoring a lot of other factors.

  For instance,Â "The last three times we had a full moon in Aquarius, the stock of XYZ went up. So let's bet big on XYZ the next full moon. It's aÂ *can't-lose deal*."Â The people who use astrology to try to predict the stock market die broke, just like all of the other cycle-trackers and wave-finders.

  A corollary to projecting the future from the past is the notion that history repeats itself. You will often hear someone arguing that we must do a certain thing, or follow a certain path, because that was the best thing to do back in 1938 in response to Hitler (or some such thing). While it is wise to learn from history, it is also wise to learn that history does not necessarily repeat itself.

  One wit declared that history doesn't repeat itself, it rhymes.

- **False Analysis Of History**
  Misinterpret history to make it look different than it really was, to create the impression that something happened which didn't.

  For instance, some people say that Adolf Hitler was a military genius, who just went too far in killing the Jews. He was only beaten, they say, because America overwhelmed Germany with supplies and equipment.

  Fact: Adolf Hitler was a military fool. He constantly over-rode the decisions of his generals, who grumbled about the war being run by Corporal Hitler. Hitler lost battle after battle, and lost millions of troops, by stupidly attacking the wrong places at the wrong time, and refusing to retreat and save his armies when necessary.
  Â Â Â And the Russians bore the brunt of the war, not the Western Allies. The fighting on the Russian Front was an unbelievable nightmare, featuring Russian human-wave attacks by the "punishment brigades". They lost many, many millions of people â something like 14 million â and gave a whole new meaning to the term "cannon fodder", while the USA only lost about a quarter of a million men.

  The Moral Re-Armament cult leader Frank Buchman declared:

  > "We finance our work as [George] Washington financed his revolution â on our knees."
  > *Moral Re-Armament: What Is It?*, page 106.

  That is just so much nonsense. George Washington most assuredly did not finance the American revolution on his knees. He often had to beg the Continental Congress to cough up some more cash and guns and supplies, but he didn't do it on his knees.

  And the old painting that portrays George Washington praying on his knees at Valley Forge perpetuates a myth. What George Washington

> really said was,Â "I have examined the religion of the Christians, and the Jews, and the Musselman (Islam), and in none of them do I find any virtue."Â So much for financing the American Revolution on his knees.

The Buchmanites repeated that false analysis of history while they continued to harangue people to donate more money to Frank Buchman's cult:

> Maybe you should give everything you've got.Â People did two hundred years ago when this country had to finance the Revolution.
>
> *Born To Upturn The World: The people who are making the Sing-Out explosion, "Up With People"*, David Allen, pub. 1967, Pace Publications, page 71.

No, they didn't.

Similarly, the often-heard claims that the United States of America is a nation that was founded on "Christian Principles" or is "based on Christianity" are also false. The Founding Fathers were very careful toÂ *not*Â incorporate any religion into the Constitution of the United States. They had already tasted a State-enforced religion in England â the Church of England â and they didn't want any more of that, so the Founding Fathers created the "absolute firewall" of separation between Church and State. And where some colonies like Massachusetts and Maryland already had laws that enforced one religion over another (death to Jews), they had to nullify those laws in order to be part of the United States.

Another popular misinterpretation of American history is to say that the Vietnam War happened because America was defending democracy in Vietnam... There wasn't any democracy in Vietnam. There were a bunch of murdering heroin-dealing generals running the southern half of the country. The USA was fighting to keep control of the country, and keep its puppet dictators in power, and to protect American investments, but not to protect democracy or freedom. The truth is that there was never a free and fair election while the USA dominated Vietnam. President Eisenhower wrote in his memoirs that it was obvious that Ho Chi Minh would win any fair popular election by a landslide, so the promised elections were not held. Years later, they held some "elections" that were just stage-managed affairs with only American-approved condidates allowed to run. And of course the American selection, like the murderous Colonel Nguyen Kao Ky, was always the winner.

Even today, we still have a few racists in the USA whose analysis of history is a bit warped â they will tell you that the kindly Southern slave owners took good care of their slaves and gave them everything that they needed. Why, those poor pathetic blacks would have been lost without their kindly masters taking such good care of them... Al Jolson's most popular song, "Swannee", depicted a black man sentimentally pining away for his beloved plantation on the Swannee River, where kindly massuh made life so good. Ah, the good old days.

A popular variation on false history is to proclaim that current society is decadent and immoral, not at all like the good old days when everything was wonderful. But any reasonable analysis of history shows that things have often been far worse than they are now, no matter whether you are talking about sexual looseness, drug addiction, lawlessness, violent crime, wars of conquest, cruel and oppressive rulers, plagues, alcoholism, or social upheaval. One of my favorite quotes on this subject was found in an ancient Egyptian tomb, built 4000 years ago:

> "Alas, the whole world is derelict. Children no longer obey their parents."

From dogmatic religious moralists, we often get raps like,
Â Â Â "The Roman Empire collapsed because of immorality and bread and circuses for the masses."

The speaker ignores the fact that the whole premise of the Roman empire was immoral. It was basicallyÂ *"Rob, enslave, and murder others because you can get away with it â you are bigger and stronger and more vicious than they are, and you have better steel swords. Such conquest of other people is 'glorious'."*
Â Â Â The Romans even invented crucifixion to punish and terrorize those people who objected to being slaves of the Romans and giving all of their wealth to the Roman soldiers.

Â Â Â The "immorality" argument also ignores many other possible causes of the decline of the Roman Empire, particularly the fact that most of the later Roman Emperors appear to have been suffering from lead poisoning and were insane. Lead dishes were fashionable for the rich back then, and they even piped in their running water in lead pipes, so many of them suffered from brain damage caused by a lifetime of lead poisoning. Some of those Roman emperors were raving lunatics. It shows, when you read their history. But the "immorality" argument ignores all of those other important facts, and just tries to substitute a simplistic cause for a complex process.Â

Â Â Â And then there was the problem that Rome had a big silver mine in Spain. They mined it heavily for a long time, and used the silver to pay the entire Roman army. But when the miners dug to a certain depth, they hit an underground stream and the mine flooded. They could not ever get the water out of the mine, and the mine was finished. No more silver for Rome; no more silver for the army. When they got no more pay, the Roman soldiers deserted. Then the Vandals walked into Rome, and that was the end of the Roman Empire. Somehow, the "immorality" seems to have been largely irrelevant.

UPDATE: 2005.02.14:
Â Â Â It's Valentine's Day, from which we learn another bit of the history of Rome: Emperor Claudius outlawed marriage because he believed that unmarried young men made better warriors. (At least they were in a much nastier mood because they weren't getting laid much.) A courageous priest named Valentine performed secret marriages for young couples of lovers anyway. When Claudius found out, he had Valentine killed. And much later, Valentine was declared to be a saint, the patron saint of lovers.

Â Â Â Nero fiddled while Rome burned... Caligula killed everybody who bothered him, including his favorite teacher and his own mother. Constantine suffocated his wife and murdered his son. Claudius outlawed marriage... Those later Roman Emperors were mad as hatters.

Â Â Â â Which in turn is another example of insanity caused by heavy metal poisoning: English hatters used vials of mercury as weights to shape hats, and after 20 years of inhaling mercury vapors, their brains were gone and they were raving lunatics. SeeÂ *Alice in Wonderland*Â for the story of one mad hatter.

And what will really tweak the noses of the religious fanatics is pointing out the fact that the Roman Empire did not collapse and fall apart until it adopted Christianity as the official state religion. As long as the Romans kept throwing the Christians to the lions, they were okay. But when the Emperor Constantin converted to Christianity and made Christianity the official state religion of Rome, and suppressed all other religions,[20] *the days of the Roman Empire were numbered.*

Apparently God was okay with the Roman Empire being Pagan, but when they turned Christian, God got rid of them.

Does that mean that if the United States adopts Christianity as its official state religion, that the American empire will decline and fall too?

Bill Wilson similarly misinterpretedÂ the history of temperance movements. He declared that organizations like the Washingtonian Society and Women's Christian Temperance Movement were failures that didn't sober up any drinkers, and that Bill's Alcoholics Anonymous program was the first working sobriety program in history. Nothing could be further from the truth. Bill wasn't the first, andÂ A.A. doesn't work.

And the reason that those other temperance organizations didn't spread like cancers is because they were not evil mind-controlling cults that convinced their followers thatÂ they absolutelyÂ *must*Â go recruitingÂ or else they will die.

Also see the example ofÂ Hypnotic Bait And SwitchÂ for another example of the false analysis of history.

- **It's Never Happened Before**
  This is also an appeal to a false analysis of history. Imply that something just cannot happen because it has never happened before.

  Variations:

  - "It can't happen here."
  - "It hasn't happened yet."
  - "It always happens this way, so it can't happen that way."
  - "*These people*Â have never done such a thing before, so they won't do it now."

  Note that the statement that "It never happened before" does not really need to be true. This technique will work just fine if your audience is ignorant of the fact that "it" actually did happen before.

- **I Didn't See It Happen, So It Never Happened**
  Claim that something never happened, or something does not exist, because you have not seen it.

  As Carl Sagan said, "Absence of evidence is not evidence of absence." Just because you haven't seen any intelligent extra-terrestrials yet doesn't prove that they don't exist.

  Sexual exploitation is a problem in Alcoholics Anonymous. The evidence is overwhelming. The criminal behavior of A.A. groups likeÂ the Midtown Group in Washington DCÂ has even been reported on television and in national magazines like Newsweek. Nevertheless, A.A. members who are in denial about the whole thing use the argument "I never saw it happen. It never happened in our group, so it never happened."

  This logical fallacy also ignores the logical problem that you cannot prove a negative. Just because you haven't seen something does not prove that it doesn't exist. For example, you cannot prove that Santa Claus does not exist. Just because you didn't see him doesn't prove that he doesn't exist. Even if you went to the North Pole looking for him and didn't find him, doesn't prove that he doesn't exist. Santa could have been vacationing in Hawaii then.

I have never seen Sophia Loren, Dustin Hoffman, or Robert Redford either, so I guess they don't exist. Oh sure, I've seen pictures of them, but those pictures could have been faked, just like the photos of Santa Claus. You see the problem. This could go on forever.

- **Argue Inevitability**
  Declare that something is inevitable, or unavoidable. This technique can weaken opposition to a certain plan or suggested course of action. (Â "If it is going to happen anyway, there is no sense in wasting a lot of time and energy fighting it.")

  - *"It's Our Destiny."*
  - *"It's fate. It's inevitable."*
  - *"It's the unavoidable consequence of things that have already been done."*
  - *"It's the Force Of History." â Â "Communism teaches us that we must overthrow the rich people and seize all of their property and kill them all and spread Communism everywhere because Dialectical Materialism teaches us that the Revolution of the Proletariat is inevitable â the 'Force of History' cannot be stopped."*
  - *"History is on our side."*
  - *"It's God's Will."*
  - *"We are stuck with continuing the war, now that we have started it."*
  - *"A clash between the Christian and Islamic cultures was inevitable."*

- **Pollyanna's Ploy â Unbridled Optimism**
  Just proclaim that everything is wonderful, wonderful, wonderful, no matter what is really happening.

  - Back in 1978, the U.S. Government General Accouting Office investigated the Saudi Arabian oil supply, just trying to figure out whether we were in any danger of insufficient oil supplies sometime in the future:

    Search for New Oilfields or New Wells

    The GAO investigative team was told that "prospects for additional oil discoveries were considered to be good." Â ...
    Â Â Â In hindsight, Aramco's optimism about exploration prospects would prove unfounded. After 25 years of increasingly intense geological and geophysical efforts and equally intense exploratory drilling, Saudi Arabia failed to discover any significant new fields other than the series of complex, lower-productivity, tight reservoirs in the Hawtah Trend. History would prove, absent some major new discovery beyond 2005, that the last great oilfield in Saudi Arabia was found close to a decade before the GAO report was submitted to Congress.

    Rate of Oil Production

    Aramco's [the Arab-American oil company's] management, however, assured the GAO inspectors that most oilfields in Saudi Arabia were not rate sensitive, and that the rate at which each Saudi giant field

was produced would not reduce the ultimate oil recovery from the field. The only risk Aramco's management saw from accidentally overproducing a field was an increase in the field's final production cost.
Â Â Â The Aramco experts who spoke to the GAO team confidently told these investigators that current production in at least some key fields could possibly be increased by as much as 50 percent or more without significantly affecting the ultimate volume of recoverable oil. This optimism also proved unfounded.
Twilight in the Desert, Matthew R. Simmons, page 73.

In 1982, OPEC stopped reporting oil production data.

- And politicans are currently yammering,Â *"The Surge is working. Things are wonderful in Iraq. Victory is just around the corner. Just a few more years..."*

- And need I even mention how the economy is always improving so much (under both Republican and Democratic Presidents) that we are all going to be living in luxury real soon now?

- **Chicken Little's Pessimism**
Scream that we live in the worst of all possible worlds and things are still getting even worse. We are all going to Hell in a bucket.

This technique is of course simply the opposite of the Pollyanna Ploy. Ignore all good news and emphasize the negative.

The Earth is degenerating today. Bribery and corruption abound. Children no longer obey their parents, every man wants to write a book, and it is evident that the end of the world is fast approaching.
== Assyrian tablet, c. 2800 BC

- **Generalize, and the Sweeping Generality**
Project grand, sweeping generalizations from minimal information:

- Extrapolate sweeping generalities from just a few facts.
"I know three Martians, and all three of them are sleazy and dishonest and underhanded and will cheat you whenever they get a chance. Therefore all Martians are dishonest and untrustworthy."

- Claim that a few examples characterize the whole. When a few Catholics attended meetings of Frank Buchman'sÂ *Oxford Group*Â cult religion, Buchman declared that Catholics had no problem with his version of Christian theology, and that the Catholic Church approved of his organization. (Not so,Â the Vatican banned Buchman's groups, repeatedly.)

- Apply general patterns or stereotypes to specific cases:
  "You are a skeptic, so you just can't understand how people experience God."

The Sweeping Generality is a kind of exaggeration â Take something that is partially true, or only true in some cases, and make a universal statement out of it. For example, the former Miss USA got out of a rehab facility, and with her head still full of cult slogans, went on the Jay Leno show and annnounced:

> "Everything that comes out of the mouth of an alcoholic or an addict is a lie."
> == Miss USA, Tara Conner, on the Jay Leno Show, 2 February 2007.

Now it is true that addicts or alcoholics who are in a bad way, in the depths of their addiction, will often lie to get more of whatever their favorite drug is. But no way isÂ *everything*Â that they say a lie. Nor is their addiction theÂ *only*Â motivation in their lives. Nor areÂ *all*Â addicts and alcoholics so desperate, and lying to get something.

> What is funny there is that Miss Conner invokedÂ *"The Cretan's Paradox"*Â without realizing it.
>
> That is the paradox created by Epimenides, a Greek from Crete, who went before the Spartans and announced, "All Cretans are liars." The Spartans thought that was pretty funny, but they didn't realize the gotcha:
>
> · The speaker Epimenides was himself a Cretan, from Crete.
> · Therefore he must be a liar.
> · But if he is a liar, then he was lying when he said that all Cretans are liars.
> · So Cretans are not liars.
> · So Epimenides must have been telling the truth when he said that all Cretans are liars.
> · Therefore, Cretans must be liars.
> · Therefore Epimenides must be a liar...
> · So Epimenides was lying when he said that all Cretans are liars.
> · So Cretans are not liars.
> · ... etc. ... 'Round and 'round forever.
>
> When Tara Conner confessed to Jay Leno that she was an alcoholic, and then declared that everything that comes out of the mouth of an alcoholic or an addict is a lie, she was creating the same paradox. And Jay Leno knew it. He was actually wincing in pain as Tara Conner went on and on about how bad alcoholics are.

Likewise, A.A. makes sweeping generalizations about alcoholics:

- "I know of a hundred alcoholics who simply cannot learn to drink moderately. Their drinking always spins out of control. Therefore no alcoholics can ever learn to drink moderately and we should not even discuss the subject."

- Bill Wilson and a few of the other early A.A. members had arrogant, domineering, egotistical, grandiose personalities, so Bill declared thatÂ *all alcoholics in the world*Â had gigantic puffed-up self-centered strutting-peacock egos who thought that they were too big and too

good to need God.Â Dr. Harry Tiebout, Bill Wilson's psychiatrist, said of Bill:Â "he had been trying to live out the infantilely grandiose demands of 'His Majesty the Baby.'"Â So Bill wrote of all alcoholics in general:

> When A.A. was quite young, a number of eminent psychologists and doctors made an exhaustive study of a good-sized group of so-called problem drinkers. The doctors weren't trying to find how different we were from one another; they sought to find whatever personality traits, if any, this group of alcoholics had in common. They finally came up with a conclusion that shocked the A.A. members of that time. These distinguished men had the nerve to say that most of the alcoholics under investigation were still childish, emotionally sensitive, and grandiose.
> Â Â Â How we alcoholics did resent that verdict!
> *Twelve Steps and Twelve Traditions*, William G. Wilson, pages 122-123.

> The primary fact that we fail to recognize is our total inability to form a true partnership with another human being. Our egomania digs two disastrous pitfalls. Either we insist upon dominating people we know, or we depend on them far too much. Â ... Â When we habitually try to manipulate others to our own willful desires, they revolt, and resist us heavily. Then we develop hurt feelings, a sense of persecution, and a desire to retaliate. Â ... Â Of true brotherhood we had small comprehension.
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 53.

> ...our crippling handicap has been our lack of humility. Â ...
> That basic ingredient of all humility, a desire to seek and do God's will, was missing.
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 71-72.

♦ And Bill's disciples make the same mistake:

> In most Twelve Step literature, the addictive self is called the "ego." Whenever I hear or read the wordÂ *ego*, I substitute the wordsÂ *addictive self*.
> Â Â Â The goal of a Fourth Step is to deflate the ego â or, in other words, to deflate the addictive self. The addictive self is marked by grandiosity (addicted people feel that they are more than or better than everyone else) and self-centeredness (they believe that they are the center of the universe and there is little room left for anyone or anything else).
> *Understanding the Twelve Steps*, Terence T. Gorski, page 81.

> ... those addicted to alcohol behave as though they were the center of their universe or their own God.
> *Spirituality: The key to recovery from alcoholism*, Warfield, Robert D.; Goldstein, Marc B.,Â *Counseling & Values*, April 1996, Vol. 40, Issue 3, page 196.

> A.A. members agree that while it is not necessary to believe in a personal God, it is important for alcoholics to realize thatÂ *they themselves are not God!*Â That is, they are not the center of the universe, nor are they running the show.
> *Drug-Impaired Professionals*, Robert Holman Coombs, Page 217. (Italics in the original.)

Apparently, none of those authors can see the simple obvious fact that it really is possible to feel bad, and want to consume some alcohol or other drug to feel better, without suffering fromÂ delusions of grandeurÂ and believing that you are God. Alcoholics are not all clones of Bill Wilson. Alcoholics don't all have Bill Wilson's mental illness. Alcoholics are not all the same.

- **Take Quotes Out Of Context**

It's like this:
Suppose that the police are interrogating a guy about a bank robbery. He responds with,Â *"What?! Are you trying to claim that I shot the bank teller?"*

If you lift just the five wordsÂ "I shot the bank teller"Â out of that sentence, it turns the question into a confession of guilt. It completely reverses the meaning of the words. That is quoting out of context.

Here is a good example of quoting out of context to create a desired impression:

In August of 1936, the religious cult leaderÂ Frank Buchman gave an interview to William A. H. Birnie, a newspaper reporter from the New YorkÂ *World-Telegram*, wherein he stated,Â "I thank heaven for a man like Adolf Hitler, who built a front line of defense against the anti-Christ of Communism."

Read the entire interview here.

While writing their history of Alcoholics Anonymous and biography of the founder William G. Wilson, the staff at Alcoholics Anonymous World Services, Inc. used the propaganda technique ofÂ *taking quotes out of context*, as well as some other propaganda techniques, to cover up the fact that Bill Wilson's spiritual teacher was a Nazi sympathizer. Charles Bufe described the AAWS machinations this way:

> It's worth noting that Bill Wilson and his fellow AAs-to-beÂ *must*Â have known about this interview, which caused a public furor, yet they continued to work as part of the Oxford Groups for more than another year in New York and another three years in Akron.

It's also worth noting that AA, in its official "Conference-approved" biography of Bill Wilson,Â *Pass It On*, treats this matter in what can only be described as a dishonest manner. This is all the more surprising and disappointing in that the book's dust jacket proclaims, "Every word is documented, every source checked."

In the section ofÂ *Pass It On*Â dealing with Buchman's remarks, the anonymous author states:

Â Â Â In August [1936], the New YorkÂ *World-Telegram*Â published an article about Buchman, charging that he was pro-Nazi. The newspaper quoted Buchman as saying: "Thank Heaven for a man like Adolf Hitler who built a front-line defense against the Anti-Christ of Communism. Think what it would mean to the world if Hitler surrendered to God. Through such a man, God could control a nation and solve every problem. Human problems aren't economic, they're moral, and they can't be solved by immoral measures."

Â Â Â While most discussion of the incident, even by Buchman's critics, have since vindicated him, the article brought the group into public controversy.

[*PASS IT ON: The story of Bill Wilson and how the A.A. message reached the world*, authorship credited to 'anonymous', actually written by Alcoholics Anonymous World Services, Inc. staff, pages 170-171.]

There are several remarkable features in this passage. The first is that theÂ *World Telegram*Â piece is referred to as an "article" when in fact it was anÂ *interview*Â in which Buchman's comments comprised well over half the text, with almost all of the remaining text consisting of descriptive passages, transitions between Buchman's statements, and uncontroversial background information on Buchman and the Oxford Group Movement. There is a tremendous difference between an "article" in which Buchman was "charged" with being pro-Nazi and anÂ *interview*Â in which he himself clearly expressed pro-Nazi opinions, a fact which undoubtedly was not lost on the author of AA's official Wilson biography.

Another remarkable feature of the passage just quoted fromÂ *Pass It On*Â is that Buchman's statements are carefully edited to put his best possible face forward. The anonymous AA author took fragments separated by hundreds of words and patched them together as if they were a single statement, while dropping a number of words within the fragments. For example, by dropping the word "But" before the words "think what it would mean ... ," the author made the fragments appear to fit together snugly â thus hiding the fact that the "statement" is a patchwork.

In normal literary practice, it's considered proper to separate patched-together fragments with ellipses if the intervening material doesn't alter the meaning of the quoted material. If the intervening material does alter the meaning, as it does in the "statement" cited inÂ *Pass It On*, it's considered unethical to quote it even with ellipses, and blatantly dishonest to quote it as if it were a single unitary statement. It should also be noted that the author ofÂ *Pass It On*Â quoted Buchman's "statement" in such a way as to leave the impression that it was theÂ *only*Â such "statement" in the "article."

Perhaps most remarkably, the anonymous AA author concludes that, "most discussions of the incident, even by Buchman's critics, have since vindicated him." One remarkable aspect of this statement is its deliberate fuzziness. What was Buchman "vindicated" of? Of making pro-Nazi statements? Of being pro-Nazi? Our AA author leaves that crucial matter unresolved.

Further, I've done my best to readÂ *all*Â of theÂ widely circulated criticismsÂ of Buchman's remarks, andÂ *none*"vindicate" him of making pro-Nazi statements.

â Charles Bufe, in his bookÂ *Alcoholics Anonymous: Cult or Cure*

Oh well, so much for the A.A. practice of "rigorous honesty" (*Big Book*, page 58).

- **Claim That Quotes Are Taken Out Of Context**
  This is just the opposite of taking quotes out of context: Try to reject all quotes that you don't like by screaming,Â "You are quoting out of context!"

  No matter how long and detailed the quote is, and no matter how much context is included with the quote, just dismissÂ *all*quotes that you don't like as being "taken out of context."

  Politicians use this trick whenever they are caught in a lie or a flip-flop.

- **Begging The Question**
  Get the desired answer by how the question is phrased.

  Consider these two questions:

  - Do you favor reducing property taxes?
  - Do you favor drastically reducing funding to schools and emergency services?

  Most people will answer "Yes" to the first question, and "No" to the second.
  The problem is, they are the very same question, as the citizens of Oregon are now painfully discovering. The Oregon voters answered "yes" to the first question in past elections, and now they are faced with the consequences: not enough money for schools and emergency services.

  Similarly, A.A. recruiters ask alcoholics,
  "Well, wouldn't you like to escape from your addiction and be healthy and happy and free?"
  â But they really mean,
  "Wouldn't you like to join Alcoholics Anonymous and go to our meetings for the rest of your life?"

  Variations on Begging The Question include:

  - The Chicken and Egg Argument
  - Circular Definition
  - Circular Reasoning
  - Ciruculus in Demonstrando
  - Petitio Principii
  - Reasoning in a circle

- **Meaningless Question**
  Ask meaningless questions, like:
  "What happens when an irresistible force meets an immovable object?"

  The Japanese Zen masters had a great answer for such questions: "Mu." "Mu" means neither "yes" nor "no"; it means something like, "I reject your bogus question."

For example, one student asked the master, "Does a dog have Buddha-nature?", and the master simply answered, "Mu!"

- **Play the Victim, and Self-Victimization**
  Claim that you are the victim, not the offender. No matter what happened, or who did what to whom, claim that you are the victim of all kinds of attacks, and nasty conspiracies, and slander and libel, and on and on.

  Politicians use this trick often. A politician will attack his opponent with all kinds of criticism, denunciations and slander, and even blatant lies, and when the opponent fights back and counter-attacks, the first politician takes on a wounded look and complains how unfair it is for his opponent to be so vicious.

  Other examples:

  - "She seduced me. It's all her fault. She came on to me. It's her fault, and now I'm getting all of the blame."
  - "Poland attacked Germany. We are just defending ourselves." â Adolf Hitler, 1939.
  - "The Gays are demanding special rights and priveleges. They are undermining the institution of marriage. They are an attack on our family values."Â
    All of those Hollywood stars and "celebrities" who repeatedly get married and divorced two weeks later couldn't possibly be underminding the institution of marriage, could they?

- **Claim to Have Special or Secret Knowledge**
  Claim to have knowledge that isn't available to the listeners, or to ordinary people.

  If you disagree with the way a crazy preacher is completely distorting and twisting the meaning of a Biblical passage, he might sneer at your ignorance and declare, "Well, you'd understand it if you read it in the original Greek." (SeeÂ *Elmer Gantry*, by Sinclair Lewis.)

  While running for President, Richard Nixon bragged that he had a secret plan for ending the War in Vietnam. He couldn't tell anybody what it was, because it was a secret. But if you would just vote for him, he would end the war. Well, he did eventually end the war, but in the final analysis, his secret plan was justÂ *"Kill another million Vietnamese and Cambodian civilians, and then give up and go home."*

  Other handy claims are:

  - "You'll never understand; you weren't there."
  - "You are the wrong generation; you can't know how it feels."
  - "You don't know; you have never experienced... (whatever)."
  - "You don't have access to my sources of information (which I can't tell you about because it's all classified)."

  In speaking about patterns of cult behavior in many of our government institutions, Dr. Arthur Deikman wrote:

Â Â Â Secrecy supports cult-like behavior, as we saw in the Life Force group, where the hierarchy was maintained through limiting access to information. Secrecy functions not only to cover up unethical activities from outside eyes, but also to increase authoritarian control over the larger group. By promoting the idea that the leader or the in-group have special information and expertise, they remove themselves from criticism and justify the exclusion of others from the decision-making process.
Â Â Â In the case of religious cults the special information and expertise is described as divine inspiration or enlightenment. The cult leader's presumed higher state precludes lower beings from judging his or her actions. Similar claims are made in government where special knowledge of the enemy or secret technical information is said to justify decisions that would otherwise be objected to on moral or even practical grounds.

The Wrong Way Home, Uncovering the Patterns of Cult Behavior in American Society, Arthur J. Deikman, M.D., page 145.

The former pretender to the throne in Washington D.C. claimed to have special knowledge of what Saddam Hussein had been doing that required that we eliminate him in a "pre-emptive" attack that resembled Adolf Hitler's 1939 "defense of Germany" from Poland and its horse-mounted cavalry... But we don't get to see what that special information is, before we attack... Will it be any better than Nixon's plan to end the war in Vietnam? Only the body count will say for sure.

And now that the war is over (Shrub said so on that aircraft carrier, remember?), we still haven't seen the "special intelligence" that warned Bush that he had to invade Iraq to defend America, nor have we seen the Weapons Of Mass Destruction that allegedly threatened America. So just what was the real reason for the invasion?

Don't accept, "To liberate Iraq." The USA does not have the right to bomb and invade countries whose leaders we do not like, to "liberate" them. That is what the Communists used to say â that they were "liberating" countries. Like how Stalin liberated Poland, Latvia, Estonia, Lithuania, Hungary, Czechoslovakia, Romania. And like how Khrushchev then liberated Hungary again. "Liberate" is what China says it did to Tibet. Besides, that is not what the Bush administration said in the beginning, to get us into the war. They were claiming that Saddam had lots of yellow-cake uranium from Niger, remember? Well he didn't. And stockpiles of Weapons of Mass Destruction, which he didn't.

UPDATE, 2004.06.19, The September 11 Commission released their report that said that there was simply no evidence that Saddam Hussein had ever cooperated with Al Queda to commit terrorist acts against the United States. So acting Vice President Cheney went on television and said that they were wrong, and that he knew more about it than the Commission did.
Oh? Did Dick Cheney withhold critical facts from the 9/11 Commission? Did he lie to them? No wonder he refused to give his testimony under oath...
The 9/11 Commission immediately asked for the vital information that Cheney had withheld from the Commission, but Cheney refused to give them anything more. What a great patriot.

Likewise, Alcoholics Anonymous old-timers tell newcomers thatÂ "You don't know, and can't understand, how the magical Twelve Steps make people quit drinking"Â (because the newcomers are too new in their sobriety, and their thinking is alcoholic). Only the experienced old-timers understand it. But if the newcomers will just practice the Twelve Steps for a few years, then they will begin to see...

That is really a very common line that many cults use. They are forever explaining thatÂ you just don't know, and can't understand, the peace and tranquility and happiness and serenity and cosmic

wisdom and divine enlightenment that comes from doing the cult's practices for years and years.... "But if you just faithfully do all of our practices â thoroughly follow our path â for a year, then you will see the light..."

Look at this emotional claim that A.A. old-timers know more than other people:

> ### Re: Should interventionists use the word
>
> Decon, One of the signs of an intelligent â well educated person is their ability to use tact and deplomacy, yes when I type I have typos for two reasons because I don't see well, and I don't spell well. Neither one of which have one darned thing to do with my knowledge or ability to deal with alcoholics and drug addicts â You ask what qualifies me to speak for other alcoholics. 40 years of drinking and 17 years of helping others get off of it. You know what statistics you either read or make up I don't know which. But untill you hold a seizuring alcoholic under a bridge, praying to God the ambulance gets there before it's too late. When you start sitting up all nite with a alcoholicin DT's strapped down to a hospital bed in a county hospital because he had no insurance to go anywhere else. When the police call you in the middle of the night to come down and ID a body of a drug addicted prostitute,that has no identification but has your card from a faith based rehab in her pocket â because you gave it her the last time she got out of jail. And no one know anything but her street name. When a addict strug out on drugs and alcohol calls you to come because they need you and by the time you get there they are dead on the bath-room floor of a cheap motel room. When you get a call from a thirteen year old child who's parents have already introduced her to drugs and alcohol and has her out on the streets hooking for them, and one of the other girls gives her a phone# to call for someone who will help her. When you live all of this for 17 years then you can ask me what my qualifications are. Untill then I suggest you put a sock in it, because you know nothing about the real face of addiction.
>
> http://community.aetv.com/service/displayDiscussionThreads.kickAction?as=119137&w=267410&d=341884&d-1169404-p=11

The writer claimed to have special knowledge â many years of experience in dealing with addicts and alcoholics â but he provided zero information about how well his methods of treating those problems actually work. From the list of deaths, apparently not very well. And his emotional lecture begs the question: "How many of those people might still be alive if he had offered them something better than cult religion?"

- **Bad Math**
  Use bad mathematics in calculating things.

  One recent Internet hoax was a statement that listed a whole lot of crimes committed by members of Congress. The unknown author then calculated the crime rate of Congress as being several times higher than the average crime rate of the American people, ostensibly proving that all of those politicians are a bunch of crooks.

  Be that as it may, the error was: The author listed all of the crimes ever committed by anyone who had been a member of Congress in the recent past, but calculated the crime rate as if all of those

crimes were committed by just the current 535 members of Congress in just one year. Hey Presto! The result was a grossly inflated crime rate for the members of Congress.

We could listÂ lots of examples of Bill Wilson's bad mathematicsÂ in computing the A.A. success rate, but we have already covered that in several other places.

- **The Gambler's Fallacy**
  Imagine that objects must obey the law of averages.

  If you toss a coin and it has come down heads three times in a row, you believe that it must come down tails the next time, because "The Law of Averages" dictates that the coin has to even things out.

  Wrong. The odds of the coin coming down heads again are still 50-50. The coin has no memory. The coin does not remember how it came down the last several times, and so choose to come down the other way the next time. The coin is just an inanimate piece of metal that spins and comes down one way or another.

  What people often misunderstand about "The Law of Averages" is that the Law of Averages only explains history, it does not cause things to happen. That is, the Law of Averages says that over the long haul, the dice will come up certain numbers certain percentages of times. But the dice do not have to obey the Law of Averages. They do not have to roll a certain way so as to satisfy the Law of Averages in the short term. The Law of Averages just says that over the long haul, certain numbers tend to come up certain percentages of times.

  Similarly, the Law of Averages says that over the long run, a roulette wheel will tend to come up red and black an even number of times. But the wheel does not have to produce an equal number of reds and blacks in a short period of time. And if the wheel comes up red ten times in a row, a gambler has no way of knowing that this run merely balances out a run of ten blacks that the wheel did last week.

  That brings up another interesting phenomenon: Brownian Motion. That is the motion observed in a particle resting on the surface of the water. If you place a really tiny, almost microscopic particle of something on the surface of water, it will jiggle around from being randomly struck by molecules of water that are whizzing around in the liquid. (And the warmer the water is, the more and the faster the molecules whiz around.)

  In theory, you would expect the particle to stay still. That is, because it is randomly hit by water molecules coming from the left or right, front or back, the particle should just jiggle left and right, forwards and back, and stay in the same place. At least, you would think it should, theoretically. But that isn't what happens. What really happens is that the particle will get shoved around over long distances because the random strikes are not even. For a while, it may get hit by more molecules from the left than the right, so it gets shoved to the right. Then it gets hit from behind more than from in front, so it creeps forwards. It will do a random walk that can cover suprisingly large distances, and it may never return to its original position. Someone who believes that the water molecules must obey the Law of Averages will watch in frustration as the particle just wanders off in another direction, and never returns to its starting point, even though the strikes from the left and right and front and back are "supposed to even out".

  There are some obvious easy exceptions to the "Law of Averages". If a certain district has voted Republican for the last 40 years, there is no reason to believe that they will suddenly vote Democratic, just to even things out. And the solid Democratic district will not suddenly vote Republican just to

even things out. In those cases, the "Law of Averages" just does not apply. Other factors, like habit and entrenched attitudes, determine the outcome. So that brings up another logical fallacy: Mistaken Assumption of Randomness.

- **Mistaken Assumption of Randomness**
  This fallacy is the mistake of assuming that things are random when they are not, and that the odds are even when they are not.

  As described in the example above, the outcome of elections in certain districts is anything but random, and it would be a mistake to assume that Democrats and Republicans have an even chance in every district. There are many non-random factors that determine outcomes, like tradition, custom, habit, ingrained beliefs and preferences, culture, and even style and fashion.

  There are many non-random things that determine why people do things, and it would be a big mistake to assume that their behavior is random.

- **Use the Passive Voice**
  Instead of using the active voice and directly declaring who did what or who said what, use the passive voice where stuff just sort of happens, where something gets done by an invisible unnamed somebody...

  - "Mistakes were made."
  - "It is believed that..."
  - "It is rumored that..."
  - "It is often said that..."
  - "Huge gains are predicted for..."

  Obviously, we have to ask,

  - Who is doing what, who is saying what, and who believes what?
  - What are their credentials? Do they really know anything?
  - Do they lie or tell the truth?
  - What ax do they have to grind?
  - What reason do we have to care what they think or what they say?

  The true-believer Buchmanite T. Willard Hunter tried toÂ rationalize awayÂ the issue of Frank Buchman's homosexuality â that is, the sexual orientation ofÂ Frank the vicious homophobeÂ â with these words:

> Because he never married and because of some aspects of appearance and manner,Â innuendoes would turn upÂ in the press about his own orientation. Â Â Â He was in good company. SimilarÂ charges have been leveledÂ against Ruth and Naomi, David and Jonathan, Jesus and John, Paul and Timothy. Â ... Â Whether or not the suggestions have a basis in fact,Â it is possible a case can be made thatÂ some of the most powerful and creative personalities in history have had this predilection.Â It is sometimes said thatÂ the greatest saints were the most highly sexed.
>
> *World Changing Through Life Changing: The Story of Frank Buchman and Moral Re-Armament; A Thesis for the Degree of Master of Sacred Theology at Andover Newton Theological School*,Â T.

Willard Hunter, 1977, pages 130-131.

Hunter used the passive voice a lot:

- ...innuendoes would turn up... Â Â Â Â *All by themselves?*
- ...charges have been leveled... Â Â Â Â *By whom?*
- ...a case can be made that... Â Â Â Â *Made by whom?*
- It is sometimes said that... Â Â Â Â *Said by whom?*

Mr. Hunter would have us believe that because some unnamed people allegedly accused Jesus Christ of homosexuality, and because some other unnamed people supposedly claimed that the greatest saints were highly sexed, that it was okay for Frank Buchman to be a vicious hateful homophobic hypocrite.

A radio advertisement for vitamins says, "Dr. Sawbones, a recognized authority on blah-blah..." Recognized by whom? What medical school or university or council of doctors recognized Dr. Sawbones as an authority on anything? We got no actual evidence that Dr. Sawbones knows anything, just a passive-voice declaration that Dr. Sawbones has been "recognized".

In the recent flap over the U.S. military secretly paying for propaganda stories to appear in Iraqi newspapers, we got these lines:
"Faults Are Acknowledged in Program That Pays Iraqi Newspapers."
"Secret Program May Have Erred, Pentagon Says"
'A top Pentagon official said Friday that "transgressions" may have occurred in a secret military program that pays Iraqi newspapers to publish information ...'
Mark Mazzetti, Los Angeles Times, 3 December 2005.

"Secret Program may have erred..."Â â Gee, the program erred all by itself?

Alcoholics Anonymous propaganda uses this technique often:

- "...it is widely believed that not including a Twelve-Step program in a treatment plan can put a recovering addict on the road to relapse."
  The Recovery Book, Al J. Mooney M.D., Arlene Eisenberg, and Howard Eisenberg, pages 40-41.

  It is widely believed by whom, besides a few hard-core true-believer A.A. members? It is certainlyÂ not believed by the doctors who know the facts.

- "AA has burgeoned and today is widely considered the most successful existing method for supporting sobriety..."
  http://www.naturalhealthnotebook.com/

  Is widely considered successful by whom? (The web site largely touts natural herbal cures and alternative healing practices, so I guess it must be the same people as the ones who buy things like diluted homeopathic remedies...)

- "It is believed in the study of 12-Step recovery processes that the mutual disclosures of members fosters processes of belonging and commitment to the collective goal of drug and alcohol abstinence."
  Keep coming back! Narcotics Anonymous narrative and recovering-addict identity, Adam Rafalovich,Â *Contemporary Drug Problems*, Spring 1999, v26, i1.

  Again, who believes it?

- **Use Slanted Language**

Recently (2012.02.20), the FBI raided a house in Portland, Oregon, for cyber-crimes. When the FBI wouldn't give the story to a TV news reporter (KOIN, Channel 6), he declared, "The FBI failed to give further information..." Not, "the FBI chose to release no further details," or "The FBI chose to maintain case confidentiality for now," no, the FBI "**failed**Â to provide information." How's that for getting back at someone who won't give you a juicy story?

When Princeton University President John Hibben banned Frank Buchman and his organization from the Princeton campus for explicit sexual confessions and sensational sexual revelations,Â Hibben explained his actionsÂ to newspaper reporters in a press conference. Peter Howard, a fanatical follower of Buchman, wrote of the event this way:

> At Princeton, when the opposition appeared, the President, Dr. Hibben, allowed himself to be quoted as saying that so long as he was President there was no place for Dr. Buchman's work in the University.
> *Innocent Men*, Peter Howard, page 89.

President Hibben did not passively "allow himself to be quoted" â he deliberately, clearly declared his position in a public statement to the press.

Also notice the use of passive language, where some vague "opposition" supposedly just mysteriously "appeared" from somewhere, rather than it being a case of intelligent people strongly objecting to Frank Buchman's behavior and treatment of students, and teaching bizarre occult theology, and all of the lurid talk about sex.Â Some of Buchman's critics commentedÂ that the sexual confessions at Oxford Group meetings were "as satisfying to the listeners as the original sin was to the confessors."

- **Use Inflamatory Language**

Use terminology and words that are guaranteed to excite passions and raise emotions.

Think of Mark Antony's classic speech at Caesar's funeral in Shakespeare's playÂ *Julius Caesar*:

> Good friends, sweet friends, let me not stir you up
> To such a sudden flood of mutiny.
> ...
> I come not, friends, to steal away your hearts.
> I am no orator, as Brutus is...
> ...
> For I have neither wit, nor words, nor worth,
> Action, not utterance, nor the power of speech
> To stir men's blood; I only speak right on.
> I tell you that which you yourselves do know,
> Show you sweet Caesar's wounds, poor poor dumb mouths,
> and bid them speak for me. But were I Brutus,
> and Brutus Antony, there were an Antony

Would ruffle up your spirits, and put a tongue
In every wound of Caesar that should move
The stones of Rome to rise and mutiny.

DEBATING TECHNIQUES:

- **Refute By Example**
  This is a valid debating technique. Find exceptions to the rule or generalization to prove it false. If, for example, someone declares that "All ducks are white", you can answer, "No, that's wrong. Think of Mallard ducks, or Ringnecks, or Harlequin Ducks, or Wood Ducks. None of them are white."

  Similarly, when A.A. people recite the line,
  "RARELY HAVE we seen a person fail who has thoroughly followed our path",
  we can answer:
  "No, Bill Wilson was lying when he wrote that. Think about:

  - theÂ *Big Book*Â co-authorÂ Henry Parkhurst,
  - and the second A.A. womanÂ Florence Rankin,
  - and the enthusiastic A.A. recruitersÂ JackieÂ andÂ Paddy,
  - andÂ Lillian Roth, the famous childhood movie star and singer who founded Alcoholics Anonymous in New Zealand, only to die drunk herself,
  - and Doctor Bob's son-in-lawÂ Ernie Galbraith, "A.A. Number Four", the constantly-relapsing older philanderer whom the autocratic Doctor Robert Smith forced on his adopted daughter Sue Smith,
  - and then think about Bill's own recruiterÂ Ebby Thacher, who sucked Bill into the Oxford Group cult, only to relapse and die drunk himself,

  â just to name the first half-dozen failures who come to mind.

  We can also say:

  Â Â Â "Lois Wilson's private secretary, Francis Hartigan, reported thatÂ more than half of the authorsÂ of the autobiographical stories in the first edition of theÂ *Big Book*Â relapsed and returned to drinking, and Bill Wilson knew it, because he kept the first copy of theÂ *Big Book*Â that came off of the presses, in which he checked off the names of the authors as they relapsed and left A.A..

  Â Â Â "Dick B., the well-known A.A. historian, reports that the entire New York group, the one run by Bill Wilson, hadÂ a horrendous relapse rate.

  Â Â Â "And in more modern times we have many scientific studies, includingÂ those by Prof. George Vaillant of Harvard University, who is a member of the Board of Trustees of Alcoholics Anonymous World Services, Inc., which reveal that A.A. has a terrible failure rate â basically, 100% â and an 'appalling' death rate to go with it."

  What Bill Wilson really should have written is:
  "RARELY HAVE we seen a personÂ *succeed*Â who has thoroughly followed our path."

- **Refute By Exposing Contradiction**
  This is another valid debating technique. Show that a statement is false or at least unreliable by exposing a contradiction with other statements or facts.

  For example, Bill Wilson wrote in theÂ *Big Book*Â that 75 percent of the newcomers to A.A. got sobered up:

  > Of alcoholics who came to A.A. and really tried, 50% got sober at once and remained that way; 25% sobered up after some relapses, and among the remainder, those who stayed on with A.A. showed improvement.
  > Bill Wilson, in the Foreword to the Second Edition of "The Big Book",Â *Alcoholics Anonymous*, page XX, 1955.

  ButÂ Bill Wilson contradicted himself many times:

  - At a memorial service for Dr. Bob, Bill Wilson actually bragged about the pathetically low success rate of the whole A.A. program. (Bill was making himself out to be a long-suffering hero, working tirelessly to promote Alcoholics Anonymous.) Bill described the early days of A.A. this way:

    > You have no conception these days of how much failure we had. You had to cull over hundreds of these drunks to get a handful to take the bait.
    > **Bill Wilson**, at the memorial service for Dr. Bob, Nov. 15, 1952; file availableÂ here.

  - When he wrote his history of Alcoholics Anonymous in 1957, Bill Wilson admitted that the early A.A. program had been a disaster:

    > At first nearly every alcoholic we approached began to slip, if indeed he sobered up at all. Others would stay dry six months or maybe a year and then take a skid. This was always a genuine catastrophe.
    > *Alcoholics Anonymous Comes Of Age*, William G. Wilson, (1957), page 97.

  - And Nell Wing, a secretary of Alcoholics Anonymous for 35 years, and Bill Wilson's personal secretary for many of those years, as well as A.A.'s first archivist, reported:

    > "There were alcoholics in the hospitals of whom A.A. could touch and help only about five percent. The doctors started giving themÂ a dose of LSD, so that the resistance would be broken down. And they had about fifteen percent recoveries."
    > *Alcoholics Anonymous Comes Of Age*, William G. Wilson, (1957), page 370.

  (It would appear that LSD is three times as effective as Alcoholics Anonymous for treating alcoholism. Unfortunately,Â that doesn't work either, in the long run.

Minimization and Denial
Go into denial and refuse to face the truth, or admit the truth. Believe in fantasies or fairy tales rather than the facts. Try to minimize undesired facts.

Minimization and denial is a kind of dishonesty. Criminals often use it to try to explain away the seriousness of their crimes: "That's no big deal. It's nothing new. Doesn't everybody do that?"

*Minimization and Denial*Â is the technique that a lot of alcoholics and cigarette smokers use to declare that they don't really need to quit drinking or smoking â they minimize the seriousness of their problem â *"Maybe I'm over-doing it a little bit right now, but frankly I'm not ready to quit just yet*" â or they deny that they even have a problem â Â *"Problem? What problem? I can quit any time I want."*

Another name for denial is "The Ostrich Syndrome" â that behavior where someone just sticks his head into the sand and refuses to see the problem. â And where someone just refuses to see and to take responsibility for a situation. The ultimate personification of such mental midgetry was Sgt. Schultz, the immortal bumbler of TV's "Hogan's Heroes": "I know nothing! I see nothing! NOTHING!"

For example, Alcoholics Anonymous claims that you can have "any God of your understanding", and A.A. members brag and joke about worshipping a doorknob, a rock, a mountain or a motorcycle, and some even use a cat or a parakeet as their "god". When this was mentioned in a discussion, an A.A. defender replied:Â "I would never pray to a doorknob and I never got that other than it simply means something other than yourself. I rather suspect that got started as a tongue in cheek reference."

That is denial.

A variation on theÂ *Denial*Â is the line, "There is no evidence..." â just denying and ignoring all unwanted evidence â as in,Â *"There is no evidence that eating genetically-modified food crops causes health problems."*Â Oh yes there is. The safety assurance studies submitted to show the safety of GMOs actually suggest hepatobiliary and renal toxicity:
http://www.ncbi.nlm.nih.gov/pubmed/?term=hammond+safety+assuranceÂ
And an additional strategy is to prevent any undesired evidence from coming into existence, like how Monsanto refuses to allow research to be conducted on their patented genetically-modified crops, to see whether they are really harmful to wildlife, honeybees, livestock or humans.

Cults use this technique a lot, to explain away their every fault and flaw. Occasionally, they will even mention that their "enemies" have accused them of being a cult, and laugh and explain,Â "It's just that some of our recruiters have been really enthusiastic about getting new people to come to meetings. That's all there is to it."Â (That is the rap I heard in Nichiren Shoshu Buddhism, which really is a cult.)

When cult members, orÂ *true believers*Â in any cause, for that matter, are confronted with information that is contrary to their beliefs, they go through a predictable set of reactions:

1. **Denial**. They will deny that the information is true, and reject it:Â "That can't possibly be true. No, I don't believe that. Where did you hear that?"

Arianna Huffington described a fanatic as someone who simply rejects and disregards all information that conflicts with his chosen beliefs.

Â Â Â If you give them enough supporting evidence to make denial impossible, then they will progress to stage 2:

2. **Minimization and rationalization**. They will minimize the importance of the information, and claim that it doesn't matter, or just try toÂ rationalizeÂ it all away:
Â Â Â Â "Well, it doesn't matter anyway. That's just a trivial detail. Don't most religious leaders do that? Churches, schools, corporations, everything is a cult, so it doesn't matter. Besides, he deserves a few of the simple pleasures of life, after all..."
(Like all of the money, all of the girls, all of the drugs, and then all of the boys â Â Rev. Jim Jones, People's Temple.)

Â Â Â If you present them with convincing information that it really is an important point, and does matter, then they will progress to stage 3:

3. **Blanking**. True Believers will just blank their minds, and turn off, and refuse to hear anything more that you say. Sometimes they will even physically leave, walking or running away, to avoid hearing anything more.
Â Â Â Jon Atack described how blanking is taught to Scientologists:Â 'If the criticism cannot be silenced, then the scientologist should cease all communication with the critic, or "disconnect".'[19]

Â Â Â Alternatively, if they don't blank out, then they will experience a change in viewpoint where they begin to see things from your viewpoint. They will suddenly wake up and "see the light." Whether they will blank out or change their minds depends on their willingness to change their opinions and beliefs, and willingness to accept the truth.
(The fanatic says,Â *"I won't allow my opinions to be swayed by mere facts."*)

Notice how when cults and other dogmatic organizations teach blanking to their members, they diguise it as a self-defense technique:
"Those critics are trying to hurt you (by telling you the truth).
They are trying to make you lose faith (in the leader or the cult).
Don't let them do it to you."

Amway teaches its soap distributors that their worst enemies are their friends and family members who try to talk a little common sense into them:
"Don't let them plant doubts in you."
"Don't let them steal your dreams."

There are a zillion flavors of minimization and denial.

♦ Dismiss undesired information as trivial nit-picking. For example, when people point out the flaws of a program or design, a defender of that program or design may answer:Â "Isn't all of

that comparison and scrutiny with a magnification glass going much too far for this forum?"

- Dismiss information as unimportant.Â "That's old hat. Everybody knows that. It doesn't matter."

- When someone complained about black dots and artifacts that a digital camera inserted into his pictures, a defender of the camera posted:Â "Make a print and tell us how much of a problem it is."Â That is minimizing and denying the problem. Making prints on paper is not the ultimate goal of all photography. Just because a cheap low-resolution printer will mask defects in images does not make those defects okay.

- When members of a group or organization behave abominably, defenders of the group will argue that the problem is "just a few bad apples".

- In his recent Washington Post article about the murderous Khmer Rouge campaign of mass murder unleashed in Cambodia from 1975 to 1979, Alex Hinton wrote:

> "I interviewed former prison guards who told me with downcast eyes that they didn't do anything and, besides, they were only following orders."
>
> Alex Hinton, "Â We Can't Let the Khmer Rouge Escape", The Washington Post, Friday, August 4, 2006; A17

Politicians and pundits for political parties often use variations of theÂ *minimization and denial*Â technique:

- "Oh heck, all politicians lie and deceive. It just comes with the territory. It's part of the job. You just have to do it. It's no big deal."
- "Oh heck, all politicians take bribes and gifts and agree to vote a certain way in trade for money. It's called 'campaign contributions'. You have to do it, or you won't get re-elected. It's no big deal."

Rush Limbaugh gave us a great example ofÂ *minimization and denial*Â in trying to dismiss the torture and murder of prisoners atÂ *Abu Ghraib*Â prison as a trivial matter â Â "It was just like a college fraternity prank. ... You ever heard of emotional release? You ever heard of the need to blow off some steam? ... Who died?"
(Actually, several prisoners died from overdose of torture, and the Pentagon reported that two more were deliberately murdered.)

Rush Limbaugh also used minimization and denial to explain away his own addiction to pain-killers, after recommending the death sentence for junkies:

> "I'm not like a junkie. I only took legal prescription pain-killers."

Yes, but Limbaugh didn't have a prescription for all of those drugs, so the drugs weren't legal. And they were bought on the black market, just the same as how every other junkie gets his illegal drugs.

George W. Bush, on his failure to capture Osama bin Laden:

> "I don't know where he is. I don't think about him much any more."

During the U.S. Senate Hearings on theÂ *Abu Ghraib*Â torture and abuse (2004.05.11), theÂ *Al-Jazeera*Â news network showed a video tape of hooded men executing an American prisoner â Nicholas Berg â by chopping off his head with a big knife. The killers declared that the execution was done in retaliation for the torture and killing of prisoners inÂ *Abu Ghraib*.
A Republican Senator respondedÂ "I don't believe this happened in a 'one-for-one'. That kind of stuff happens anyway."
The Senator ignored the simple fact that such a ceremonial execution of an American prisoner had never happened in Iraq before. The Iraqis even hospitalized Jessica Lynch until she was rescued, remember?

UPDATE: 2004.06.18 â Now the Al Queda terrorists in Saudi Arabia have announced that the Americans whom they kidnap will be treated in the same manner as the prisoners inÂ *Abu Ghraib*Â prison...

Meanwhile, the Washington weasles had a truckload of minimization and denial and rationalizations to offer us:

- It wasn't really torture. It wasn't that bad. It was just some forceful interrogation.
- It was justified.
- It was necessary to get intelligence.
- They are the bad guys. It's okay to do it to them.
- It wasn't anything like the other side's beheadings.
- It's just being overblown by the Democrats.

â All of which simply declare that torture of prisoners is really okay now, and that the Geneva Convention is "quaint" and obsolete. We used to consider countries that tortured prisoners of war to be barbarians, and declare that they needed to learn some Christian morals. Now it's the so-called "Christians" who are doing it.

In March of 2006, a videotape came out that clearly showed White House officials receiving emphatic warnings that Hurricane Katrina could and would top the levees and flood New Orleans and cause a major disaster â warnings that the Bush Administration blithely ignored. G. W. Bush went on vacation, and went to a birthday party in Arizona where he pretended to play a guitar.
A White House spokesman responded to the tape by saying,Â "There is nothing new or insightful on the video."Â White House, 2 March 2006.

During a debate on the PBS News Hour with Jim Lehrer, about the firing of Mary McCarthy for revealing the existence of secret CIA prisons in foreign countries, to which people were "disappeared" â secretly kidnapped, renditioned, and tortured, which is several war crimes â one Republican talking head, Richard Kerr, a former CIA deputy director, declared:
"Well, first of all, I'm not absolutely sure that I agree with the idea that these are crimes, an international crime."Â (PBS News Hour, 24 Apr 2006).
So, kidnapping people who might be innocent, and imprisoning them without a trial, and torturing them, even torturing them to death, is not a crime under the Bush administration? When did we rewrite those laws?

Declaring that "it's over, and nobody cares" is another kind of minimization. Politicians use this one whenever they can get away with it, to try to stop debate on a touchy subject. For example, when the American people discovered that George Bush had lied about the extent of warrantless surveillance of

Americans that was going on â that the NSA was even collecting information about millions of phone calls made purely within the USA and between loyal Americans, not involving Al Quada, even while huge class-action lawsuits were being filed against the phone companies who gave out the phone records without a court warrant, the Republican talking heads went on the political talk shows Friday night on PBS (2006.05.12) and declared that "It's over. The furor has died down. It's all a big nothing. The American people don't care."

Likewise, in the current furor (1 October 2006) over Congressman Mark Foley (R-FL) sending very sexually explicit homosexually invitational emails to very young male Congressional pages â messages that one page described as "Sick, sick, sick, sick, sick, ... (for 13 'sicks') â Republican leaders have declaredÂ **"It's time to move on"**, when Democratic Congressmen asked for the resignations of those Republican leaders who knew what was going on because the under-age pages reported it to them, but the Republican leaders just convered it all up and allowed Foley to continue that behavior.

And, using the minimization tactic some more, the Republican leaders are now describing Rep. Foley's predatory homosexual emails as merely "overly friendly" and "acting as a mentor." White House Press Secretary Tony Snow said it was merely an issue of "simply naughty emails."

Another kind of denial isÂ *depersonalization*Â â personally detaching from a problem or situation â the attitude that the big problem has nothing to do with you, or isn't really your responsibility. Donald Rumsfeld half-admitted that the U.S. military campaign in Iraq was not going well:Â "If I were grading, I would say we probably deserve a D or D+ as a country."Â (TIME, Apr 3-9, 2006) *Excuse me Rummy, but the failure is yours, not America's, and yes, this test counts.*

A.A. defenders use theÂ *minimization and denial*Â technique a lot to explain that A.A. doesn't really haveÂ a dishonesty problem, and doesn't really need to get off it and start telling the truth. And A.A. doesn't really haveÂ a humongous failure rate. And A.A. isn't reallyÂ a cult religion.

Likewise, A.A. true believers attempt to dismiss the A.A. 95% drop-out rate in just the first year as "the myth of the 5% retention rate", as if the drop-out rate had been somehow disproven and wasn't real. (It's real.)

In a debate, you can use theÂ *Minimization and Denial*Â technique to defend Alcoholics Anonymous like this: Whenever your opponent says something that you don't like, or don't want to hear, just reply with one of these standard answers:

- "It's unimportant because it happened so long ago."
- "People have been criticizing AA forever; what's new there?"
- "Just because you found a hundred groups whereÂ sponsors sexually harass the new pretty women membersÂ doesn't mean that it is a universal characteristic of A.A., or thatÂ it happens everywhere, or that you can fault all of A.A. for it. You can't generalize like that. No group has any control over any other group."

- "Each A.A. meeting is a little different. Look around and you'll find one that suits you..."
- "What appears to be a contradiction is just a paradox, just a wonderful paradox."
- "I suspect that the whole story is a hoax made up by the anti-A.A. people, just to discredit A.A.."
- "But the A.A. program is free. Where else can you find such a good recovery program for free?"
  [Answer:Â SMART, WFS, MFS, orÂ SOS.]
- "That's just another A.A.-basher, on an anti-A.A. pogrom again."
- "That doesn't matter â it's irrelevant â it isn't the real A.A., because it isn't a Council-approved activity."
  [Actually, everything that A.A. members do at an A.A. meeting, or while recruiting and proselytizing, or in a sponsor/sponsee relationship, is "the real A.A.".]
- "That doesn't matter â it's irrelevant â it isn't the real A.A., because it's against The Traditions."
  [Again, the real A.A. is everything that A.A. members really do at an A.A. meeting, or while recruiting and promoting A.A., or in a sponsor/sponsee relationship, not what the Traditions say they areÂ *supposed to be doing*.]
- "That doesn't matter â it's irrelevant â it isn't the real A.A., because not all groups do it."
- "That does not happen in our group."
- "I never saw that."
- "That is not the real AA."
- "We are not aware of any dangerous situation."
- "That's beside the point..."
  (WhenÂ *it is the point.*)
- "You can't blame A.A. for the harm that some members do. They aren't supposed to be doing those things."Â ("But we will gladly take all of the credit for the good things that some other members do.")
- "What you are complaining about isn't the real A.A.. Â A.A. has just gone downhill a little lately. What you were exposed to is what AA has turned into, not what it used to be."
- "So what if it's a cult?Â All religions are cults. Everything is a cult. It doesn't matter."
- "That misbehavior is being done by the treatment centers, not A.A., so you can't blame A.A. for that."
  (But the treatment centers are staffed and run by true-believer 12-Steppers who are using the treatment centers to shove the 12-Step religion on vulnerable sick people, so that is also another part of "the real A.A.".)

- "That [13th-stepping, rape, murder, abuse, exploitation, robbery] was just an isolated incident."

- "We don't take any position on outside issues."Â ("And we will call anything that we don't want to hear about an 'outside issue'.")

- "I cannot think of any belief, doctrine, institution or philosophy of any kind that is free from abuse."

- "I understand that the numbers are flat and the success rate has deteriorated over the last few decades. But that's just because people are not 'working the program' right."
  Rather than admitting that 'the program' never ever worked right, and thatÂ Bill Wilson's bragging about a great success rateÂ was just another lie.

- "That is of no interest to anyone but some A.A.-bashers. You people just keep digging up hundreds and hundreds of pieces of garbage like that because you are trying to discredit A.A.."

- "That story is just a hoax. It's full of factual errors. Somebody with a resentment cooked it up and sent it out. It would be a waste of time to even respond to it."
  [Which saves the speaker from having to come up with any actual facts to back up his sweeping statements. Now he can run away without having to prove his statements, which also makes it aÂ hit-and-run attack.]

- "That hasn't been proven. There hasn't been enough scientific research. That has never been fully proven."

- "That can't be confirmed." Â "That hasn't been fully verified."
  [No matter how much supporting and corroborating evidence there is, just stubbornly maintain that the point can't be confirmed, or hasn't been "fully verified", or hasn't been proved.]
  [Ah, but if Bill Wilson said something, then A.A. true believers consider it automatically "confirmed" and unquestionably true.]

- "I don't even know how we got side-tracked into wasting our time talking about this trivial detail."

- "I don't know why he spends so much time on this stuff. What's he trying to prove?"

- "The A.A.-bashers just hate us, that's all."

- "So what if the founders of A.A. committed all kinds of crimes and offenses and promoted cult religion and fascism? Every successful group makes mistakes in its infancy."

- "You are quoting out of context!"
  [No matter how long and detailed the quote is, and no matter how much context is included with the quote, just dismiss*all*Â quotes that you don't like as being "taken out of context."]

- "When I read your statement about young people seeking new answers while old people want to preserve the values that they have, I knew you were nuts. You must be a very young and foolish person to believe such a thing."

- ♦ "I've got 20 years in A.A., and while I can't speak for A.A. because nobody speaks for A.A., I must say..."
  (First he establishes his credentials, 20 years, to give himself the authority to speak for A.A., and then he spends the next five minutes speaking for A.A., and singing the praises of A.A., while claiming that he is "not speaking for A.A.".)

- ♦ "I wasn't trying to win an argument with you, but one more thing I have to say is..."

- ♦ "Yes, BUT!..."

- ♦ "I'm not paying any attention to what you say."
  (That is an example of blanking.)

- ♦ When you are losing an argument badly, ignore your opponent's points, and terminate the discussion by using a quote from Bill Wilson,Â "I'm resigning from the debating society!"Â which implies that you are superior to your opponent because you aren't wasting your time arguing over trivialities any more.
  (That is another example of blanking.)

- ♦ And so is:Â "You are still going on about this several hours later, and I don't really give a shit about it at present."

- **Instant Denial**
  A variation on the denial technique isÂ *Instant Denial*: Say something, and then immediately deny that you said it.

  Peter Howard,Â the fascist discipleÂ of Frank Buchman who assumed the leadership of the Oxford Groups/MRA organization after Buchman's death, attacked Frank Buchman's critics with these words:

  > ...Christians forget that Christ was crucified not because he was wrong but because He was right. There was one of Christ's contemporaries who, while agreeing that the work being done was good, always disagreed with the methods and thought he could do things better. He was critical of the way money was spent, critical of the company Christ kept, critical of his comrades. His name was Judas.
  > Â Â Â This is not to suggest that Buchman was like Christ or that all his critics are like Judas....
  > *Britain and the Beast*, Peter Howard, 1963, page 106.

  Peter Howard clearly suggested that Frank Buchman's critics were acting just like Judas, and then Howard immediately denied it, and declared that he wasn't suggesting it. Howard also implied that Frank Buchman was right, just like Jesus was, and then Howard denied that too.

  People who are promoting Alcoholics Anonymous use the sameÂ *Instant Denial*Â technique, too. Here, the speaker denies it before he says it:

  > "This is not a commercial for A.A. Frankly, A.A. is not for everybody. But A.A. saved my life, and only through A.A. was I able to learn how to survive my disease."

SoÂ *it is*Â a commercial for A.A., and A.A.Â *is*Â the only way after all.
(And the speaker was alsoÂ assuming a couple of major premisesÂ â that alcoholism is a disease, rather than behavior, and that A.A. has a working cure for that disease, rather thanÂ a horrendous failure rate.)

A variation on thisÂ *Instant Denial*Â technique is to say something and then immediately declare that you didn't mean it.

Another variation is the one that you see lawyers using in TV shows all of the time: A clever lawyer asks an improper question, and then immediately withdraws it. A lawyer will attack a witness with a question like,
"Isn't it true that you hated your husband and wanted him dead?"
The opposing attorney will scream,Â "Objection, your Honor!"
And the first lawyer answers,Â "I withdraw the question, your Honor."
Even if the judge says,Â "Let that question be stricken from the record. The jury will disregard the question.", the harm has already been done.

- **Understatement**
  Understatement is a kind of minimization.

  When news reporters discovered that New Mexico Governor Bill Richardson was making false claims on his resumÃ©, and had been for forty years, when he claimed that he had been drafted to pitch for the Kansas City Athletics in 1966, allegedly before "an injury compelled him to bow out of baseball", Richardson answered:
  Â Â Â Â "After being notified of the situation and after researching the matter... I came to the conclusion that I was not drafted by the A's."
  (TIME, Nov 28 to Dec 4, 2005)

- **Not As Bad As**
  TheÂ *"Not As Bad As"*Â ploy is a kind of minimization and denial. The debater declares that whatever is being criticized is not nearly as bad as something really awful:

  - That isn't nearly as bad as what the Nazis did to the Jews.
  - The censorship of the press that we have to endure isn't nearly as bad as what goes on in Russia.
  - Our politicians aren't nearly as corrupt as the ones in Africa and Asia.
  - Alcoholics Anonymous isn't nearly as bad as the People's Temple or the Branch Davidians or Heaven's Gate. Now those were really some nasty cults.

- **Admit a Small Fault to Cover a Big Denial**
  Likewise, confess a small error to cover a large one. Or confess a minor vice to create the appearance of having no bad ones. Confess small transgressions to create the appearance of humility and repentence and honesty.

  Some "pious" people are often eager to loudly confess their small shortcomings in order to fool others into believing that they have no larger ones.

> We confess our little faults to persuade people that we have no large ones.
> == FranÃ§ois de La Rochefoucauld

In the Oxford Group confession sessions,Â members routinely confessed to having been jealous of someone, or having smoked a cigarette, or having worn makeup, or any of several other petty imperfections, but they just didn't confess any large crimes like grand larceny or fraud or murder or treason (likeÂ killing Leftists in street fighting in Oxford and London, andÂ supporting Adolf HitlerÂ before and during World War II, andÂ dodging the draftÂ to avoid serving in the British Army and fighting the Nazis...)

Similarly,

> President Bush today said mistakes were made in planning for the Iraq invasion, but he defended the troop level he ordered in the initial strike, saying he would have committed the same number if given a second chance.
>
> Recalling his pre-war conversations with Gen. Tommy Franks, who led the invasion and is now retired, Bush told a business group in Irvine, Calif.: "The level that he suggested was the troop level necessary to do the job, and I support it strongly."
> (Â http://www.washingtonpost.com/wp-dyn/content/article/2006/04/24/AR2006042400850_pf.html)

Also notice the use ofÂ the passive voice: "mistakes were made..." What mistakes? Were made by whom? Was George actually admitting that he screwed up? Or was he just shoving the blame onto Gen. Tommy Franks?

- **False Comparison**
  You can make something appear to be larger or smaller, or better or worse, by comparing it to something else.

  Late-night TV infomercials and shopping channel "auctions" habitually declare,Â "You would expect to pay $XXX, but here the cost to you is only $yyy."

  Wrong. I would never "expect" to pay the numbers that they announce. I always think that their phony "expected" prices are absurdly high.

  A variation on that rap is "value" â Â "This complete package is a $200 value, but now, in this special offer, it will only cost you $34.95."

  A similar advertising trick is to compare your product to a competitors worst low-end model â the wimpy, weak, lowest-price shoddy loser model â and then call your product "high power" and "superior" (when it is really only average).

- **Give a Non-reason Reason**
  Give reasons for things that are not reasons for things.

  For example,

- "That's just the way it is."
- "Because."
- "That's the way it's always been done."
- "I'm sure the Leader has his reasons." (Or the Elders, or the Priests, or whomever...)
- "It's a tradition."

- **Divert Attention â Change the Subject**

If you have nothing to say, distract them. Misdirect attention.

- The old saying is, "Drag a Red Herring across the trail."
- The Madison Avenue advertising gurus say, "If you have nothing to say, sing it."
- When you are losing a point, change the subject. Start talking about something else, anything else, where you at least can't lose because there isn't anything to lose.
- When asked a very embarassing question in a political debate, claim that you have already fully answered that question before, and change the subject.
  (Like, "Did G. W. Bush desert from his Air National Guard unit in a time of war? Why didn't he show up for his flight physical? Why did his commanding officer ground him?" Was young Lt. Bush busted for cocaine in Texas and forced to do community service? ...And then the whole thing was covered up because Daddy was a Congressman...)
  - Claim, "I've already dealt with that", and change the subject.Â
    or
  - Claim, "I already apologized for that", and change the subject.
- Dismiss a critic and change the subject with a condescending remark like, "Why don't you quit stirring the pot and move on?"

If a conversation or debate leads into a discussion of the American use of chemical weapons during the Vietnam War, immediately bring up the story ofÂ *"Yellow Rain"*, a rather paranoid rumor about the U.S.A. spraying poison from the air on American defectors, a story that turned out to be groundless. Ignore the much larger, undeniably true story of tens of thousands of Vietnamese women giving birth to deformed babies as a result of being sprayed with the poisonous defoliantÂ *Agent Orange*. Also ignore the many American G.I.s who came back from Vietnam suffering from Agent Orange poisoning. Just keep mentioningÂ *"Yellow Rain"*, as if the falseness of that one story proves that the American forces didn't use chemical weapons on Vietnam.

Senate investigators have been trying, for more than two years now, to get information about Enron's involvement with the White House and national energy policy planning. The White House has consistently refused to hand over the information. When the Senate investigating committee issued subpoenas, a White House spokesman replied,Â *"Such subpoenas are premature. The investigation is just politically motivated."*

Question: When would the Administration feel that it wasÂ *not*Â "premature" or "political" to investigate the actions of the occupants of the White House while they were helping a criminal gang like Enron? A hundred years from now?

Some of the key phrases that indicate a change of subject are:

- "Well, let's get down to the real issue..."
- "The bottom line is..."

- "Now look at the real facts here..."

When used in response to a question, all of them mean,Â "I'm not going to answer your question. I'm changing the subject and diverting attention and won't even talk about your question."

A good one that I heard on Al Franken's radio show (20 April 2004) was: A ditto-head was claiming that rich Democrats do not really care about the poor. When asked for proof of that statement, he answered,Â "Well, let's look at the results of their programs."
*Whoops!*Â Stop right there. That's a different issue. That is changing the subject. The effectiveness of any help-the-poor program does not prove or disprove how much someoneÂ *cares*Â about the poor.

Now one could claim that an ineffective program shows that someone was inept or incompetent at designing or administering programs, but that is a very different issue. That does not prove how much someone cares or doesn't care.

And such an accusation may be groundless because it completely ignores issues like funding. Was the program really ineffective or badly designed or poorly managed, or was it just grossly underfunded by the Republican Congress that even cut Veteran's benefits and closed V.A. hospitals while it sent the troops off to war in Iraq?Â (Hint: It's the later cause.)

The U.S. Senate hearings on the torture of prisoners atÂ *Abu Ghraib*Â prison (2004.05.11) provide us with another example of misdirection of attention: Instead of talking about the horrors that the pictures showed, one Republican Senator went off on a tangent complaining about how the pictures had been taken improperly by a soldier who had no authority to do so â he had used his own privately-owned digital camera, and had no orders from his superiors to take the pictures, so his taking of the pictures violated the military regulations regarding how military prisons were to be operated....

Never mind the fact that torturing, raping, and murdering prisoners was also against those same military regulations....
(And that political stunt is also an obvious attempt to "Kill the Messenger" â just attack the whistle-blower who dared to document the illegal abuses.)
Ah politics, isn't it wonderful?

Not to be outdone, another Republican Senator started waxing eloquent about what a great job our soldiers are doing, and how we shouldn't distract our men, or the Secretary of Defense Donald Rumsfeld, fromÂ "the more important job of defending America from terrorism."

Right. Stopping the practice of war crimes is just an annoying little distraction keeping us from doing what is really important. Our efforts to stop terrorism won't be undermined by the entire Arab and Moslem world seeing us as a bunch of vicious, racist, religious-bigot Nazis who torture innocent men and women; no, not at all....

Over in the A.A. arena, one of Bill Wilson's standard stunts was, when someone likeÂ Clarence SnyderÂ wouldÂ criticize WilsonforÂ massive fraudÂ andÂ felonious dishonesty, Wilson would reply with something like, "My, how those alcoholics love to squabble and argue. Being theÂ argumentative lotÂ that they are, they just love toÂ challenge authority."

Doctor Bob also gave us a great example of diverting attention, back in the early days of the Oxford Group, before Alcoholics Anonymous got started. Henrietta Seiberling was trying to get Doctor Bob to quit drinking. She said that she had receivedÂ *"Guidance"*Â that "Bob must not touch one drop of alcohol", and she told Doctor Bob about it.

Â Â Â He answered, "Henrietta, I don't understand this thing [alcoholism].Â *Nobody*Â understands it."[18]

Doctor Bob changed the subject from "not drinking alcohol" to something abstract and inconsequential like "understanding alcoholism", because he didn't want to talk aboutÂ *actually really quitting drinking*. He also tried to imply that because "nobody understood alcoholism", it wasn't possible to quit drinking, so there was no sense in even wasting any time trying. Cute avoidance technique, huh?

Similarly, if a critic of A.A. says:

> "An awful lot of state and federal courts have now ruled that Alcoholics Anonymous is a religious organization, or engages in religious activities, as defined by Constitutional law. The most interesting one happened just a few months ago, whenÂ a judge threw out a murder convictionÂ because the killer confessed to the murder in an A.A. meeting, and one of the other members reported it to the police. The judge ruled thatÂ *'sharing'*Â in an A.A. meeting is a form of protected confession in a religious ceremony, just like confessing your sins to the priest in a Catholic Church."

a Stepper can divert attention by answering:

> "I don't think that is an appropriate subject of discussion in this context. We don't get involved in outside issues. I was just getting to how to use the Seventh Step to cureÂ people's instincts for security and society. Let's concentrate on that."

Or:

> "It isn't fair of you to attack A.A. when no one can answer, because nobody speaks for A.A.. Go pick on somebody who can fight back."

If someone starts talking aboutÂ the corruption and dishonesty at the A.A. headquarters, a Stepper can change the subject by saying,Â "Well, that's a different issue. Let's not get into that now. Let's just read page 49 of theÂ *Big Book*Â and talk about that."

And don't forget obfuscation. That is also an effective way to divert attention, by confusing and clouding an issue, and muddying the waters so thoroughly that you can't even see it:

> "The judge was completely off base, and his judgement was totally wrong, because there are no priests in Alcoholics Anonymous. I mean, who's the priest in a meeting, and who are you confessing your sins to?"

That bogus argument ignores the obvious fact that you can confess something to someone besides an ordained priest. (Just ask any criminal who ever confessed something to the police.) And you can have a religious ceremony without a priest. Lots of churches, like the Quakers, for instance, don't have any ordained clergy. Everybody in the church is free to speak when the spirit moves him.

You can also divert attention with slogans. A.A. does that a lot. If someone is asking pointed, critical questions about the illogical parts of the A.A. program, trying to understand how the whole thing is

supposed to work, the old-timers answer:

- "Utilize, Don't Analyze."
- "Stop Your Stinkin' Thinkin'."
- "Your best thinking got you here."
- "You know, sometimes you can be too smart for your own good."
- "You don't have to understand how electricity works in order to use it."
- "Nobody is too stupid to get the program, but some people are too intelligent."

All of those slogans are designed to keep newcomers from thinking, and discovering how flawed, crazy, illogical and irrational the A.A. program really is.

Another common A.A. diversion is to accuse the speaker of being angry. A.A. true believers actually think that someone is automatically wrong if he is at all angry,Â no matter how outrageous the sins or crimes that have angered the speaker, because*"Nothing, absolutely nothing happens in God's world by mistake."*Â (*Big Book*, 3rd Edition, page 449.)

Bill Wilson wrote thatÂ you are always wrong if you are "disturbed", and that alcoholics cannot handle anger:

> It is a spiritual axiom that every time we are disturbed, no matter what the cause, there is something wrongÂ *with us*. If somebody hurts us and we are sore, we are in the wrong also.Â
> *Twelve Steps and Twelve Traditions*, William G. Wilson, page 90.

["Gee, duh... somebody just shot my friend dead in the middle of the street, and raped my girlfriend, and kicked my dog. But I'm not going to get disturbed about it, because Bill Wilson says that if I did, it would axiomatically mean that there is something spiritually wrong with me... Duh..."]

So the point of the discussion gets lost in an argument about whether the speaker is angry, and whether it is okay to be angry. Where it really gets funny is when the believers cop an attitude like, "Well, you're angry, so that makes everything you say invalid. That takes care of you. We don't have to listen to anything else that you say, because you admitted that you were angry."
(*LookÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ hereÂ andÂ her*

- **Prove Something Else**

This is a kind of diversion tactic.

> "If you can't prove what you want to prove, demonstrate something else and pretend that they are the same thing."
> == Darrell Huff,Â *How to Lie with Statistics*, p. 74

Alcoholics Anonymous uses this trick often. If someone criticizes A.A. for failing to sober us alcoholics, A.A. members cite the large sales figures for the A.A.Â *Big Book*, and claim that those numbers prove that A.A. is a big success.

Likewise, they also cite the membership numbers â a claimed 2 million â as proof that A.A. works. They supply no evidence to show what percentage of those members are sober, or newcomers, or repeat relapsers, or insane...

- **"Well, all I know is..."**

When you list a bunch of points for your side, your opponent says,Â *"Well, all I know is..."*Â That is a diversionary tactic â an attempt to ignore all of the facts that you just mentioned, and divert attention to something else that he or she would rather talk about.

- **The Positive Accomplishments Sidestep**

This is a kind of diversion tactic. When criticized, avoid the point and change the subject by citing some positive accomplishments.

When George W. Bush is criticized for his failures in war, like, "You didn't catch Osama bin Laden, and you didn't find any Weapons of Mass Destruction, and Iraq is degenerating into civil war!", he answers:

1. "But we got rid of the Taliban."
2. "But we established democracy."
3. "But we got rid of a dictator."
4. "But we established freedom. Freedom is on the march."

- **Declare Victory**

When facing criticism, like for incompetence and failure, just suddenly, arbitrarily declare victory. Another name for this behavior is "triumphalism".

For instance, on December 10, 2008, Secretary of the Treasury Henry Paulson had to explain to the Congressional Oversight Panel how TARP had been implemented, and what had been accomplished with the $350,000,000,000 that had been allocated so far. Never mind the facts that unemployment was still going up â a lot â and nationwide, the economic conditions were worsening â a lot. And middle-class homes were still being foreclosed on â a lot. Paulson just declared victory and announced that things wereÂ *much*Â better because the TED spread was smaller.

The TED spread is the difference between the interest rate on the 3-month U.S. Treasury bills and on the 3-month "LIBOR" â the interest rate that commercial banks charge for lending each other money in Europe. It is basically a measure of how nervous the big financial players are about lending each other money. So, because Americans weren't much more nervous than Europeans this month, Paulson declared victory and implied that we had gotten good results from our $350 billion worth of bailout to Wall Street banks and gamblers.

- **Red Herring**

AÂ *Red Herring Fallacy*Â is a distraction technique where you talk about one subject and then immediatly blame an unrelated topic or group as a cause or correlation to it.

Another explanation of theÂ *Red Herring*Â is: A Red Herring is a fallacy in which an irrelevant topic is presented in order to divert attention from the original issue. The basic idea is to "win" an argument by leading attention away from the argument and to another topic. This sort of "reasoning" has the following form:

1. Topic A is under discussion.
2. Topic B is introduced under the guise of being relevant to topic A (when topic B is actually not relevant to topic A).
3. Topic A is abandoned.

This sort of "reasoning" is fallacious because merely changing the topic of discussion hardly counts as an argument against a claim.

Examples of Red Herring:

1. "Teachers shouldn't make students wear school uniforms. The Nazis made children wear uniforms too!"

2. "We admit that this measure is popular. But we also urge you to note that there are so many bond issues on this ballot that the whole thing is getting ridiculous."

3. "Argument" for a tax cut:
   "You know, I've begun to think that there is some merit in the Republican's tax cut plan. I suggest that you come up with something like it, because if we Democrats are going to survive as a party, we have got to show that we are as tough-minded as the Republicans, since that is what the public wants."

4. "Argument" for making grad school requirements stricter:
   "I think there is great merit in making the requirements stricter for the graduate students. I recommend that you support it, too. After all, we are in a budget crisis and we do not want our salaries affected."

(*Thanks to "Dr. Herring" for that one.*)

- **The Personal Loyalty Red Herring**

This is another kind of diversion tactic. Change the issue into a test of loyalty. When George Bush is criticized, he declares,

1. "You're either with us or you're against us."
2. "Who are you going to side with, the patriotic Americans, or the terrorists?"

A variation on this tactic is demanding promises of loyalty from others as a way of manipulating them. When the future Nazi Minister of Propaganda Joseph Goebbels married his sweetheart Magda, Adolf Hitler said, "I wish you a lifetime of happiness and hope you will remain my good friend." It was supposed to be Goebbels' day of happiness, but Hitler managed to turn it around and make it about himself.

(Goebbels replied that he would remain Hitler's friend, and that Magda would help him keep that promise. Goebbels did keep it too, right up to the minute in the bunker in Berlin when he killed his wife and children and then committed suicide at the same time as Hitler and Eva Braun did.)

- **The Story Sourcing Distraction**
  This is yet another kind of diversion tactic. Instead of answering cricism, attack the source of the information:

1. Bush declared: "Who leaked that? We are going to find those leakers and take care of them." (Ignore the fact that George Bush and his staff turned out to be the leakers.)
2. "You read that in the liberal media?"
3. "This is Washington. People say all kinds of things."
4. "That's the kind of language you might expect to hear from the sovereign leader of an Arab country." â That was Joshua Bolten, the White House Chief of Staff, explaining why the Prime Minister of Lebanon objected to Israel bombing his country. (*Meet The Press*, NBC, 23 July 2006)

When six retired U.S. generals criticized Secretary of Defense Donald Rumsfeld for incompetence and demanded his resignation (April 2006), the White House shills complained that it was "inappropriate" for retired generals to criticize Rumsfeld's conduct of the war â trying to imply that the criticism was somehow invalid because it came from retired generals â and that they were too late, anyway. Oh really?

So whenÂ *is*Â it appropriate for generals to raise objections and condemn politicians' stupidity?

- ♦ While they are still in uniform? (Thus violating the sacred American principle that the U.S. military always obeys civilian authority so that we don't degenerate into a banana republic that is run by a murdering Colonel Manuel Norriega or General Augusto Pinochet?) General McArthur was fired by President Truman for criticizing the President and his policies while still serving in uniform.
- ♦ Or never? Do men lose the right to criticize bumbling conduct of a war if they once served in the military?
  Actually, who would be more entitled to have an opinion on the subject?

- **The Drama Queen, the Prima Donna Ploy**

This ploy is also a kind of diversion of attention. Switch the focus to oneself and one's own immense problems.

"People always come up to me and say that my smoking
is bothering them... Well, it's killing me!"
== Wendy Liebman

For example, if a captain of industry is accused:

ACCUSATION:Â "You are polluting the water and air and land and destroying the very ability of the biosphere to continue supporting human life."Â
ANSWER:Â "Hey! Don't you think I'm trying? Do you have any idea how hard it is to balance the interests of profit and ecology?
Why are you always blaming us CEOs?
Do you have any idea how demanding the stockholders are?
Do you realize how quickly they will replace me if I don't produce the maximum profit?"

â None of which answers the accusation of him being a polluter.

Bill Wilson used this stunt like this:
When they wrote the opening chapters of the "Big Book"Â *Alcoholics Anonymous*, Henry Parkhurst and Bill Wilson were partners. But Wilson refused to give Parkhurst fair credit for what he wrote, and eventually cheated Parkhurst out of everything.Â Disillusioned and disappointed at the betrayal, Parkhurst relapsed.

When Henry Parkhurst came around drunk and begging for money, asking to be paid for some furniture that he had left in the office, Wilson talked him out of his shares in the publishing company that would publish theÂ *Big Book*Â â shares that would have eventually made Parkhurst a moderately wealthy man. Wilson also denied Parkhurst any share in the royalties from theÂ *Big Book*, using the excuse that Parkhurst had returned to drinking.

And Wilson didn't try to save his friend's life. Henry Parkhurst was the friend that Bill and Lois turned to when they were homeless because the bank foreclosed on their 182 Clinton Street house. Henry was their friend then, and Bill and Lois moved in with Parkhurst. But when Parkhurst needed some friendship and help in return, Wilson robbed Parkhurst and then left him to die drunk and pennyless, alone. Which he did.

Then Wilson complained about how hard it was to take, that Parkhurst was gone.

> ...At length he broke down completely and went on a terrific bender after four years of sobriety. He never again showed any real sign of recovery, and he went on drinking until his death recently. Considering what he had done for the book, and the further fact that he was one of our first New York members, this was hard to take.
> *Alcoholics Anonymous Comes Of Age*, William G. Wilson, page 179.

What about how hard it was for Henry Parkhurst to take?

Bill Wilson really was a drama queen.

- **"I'm so offended."**
Reject an opponent's point by claiming to be offended. This is a kind of drama queen ploy.

During a Presidential debaite, candidate John Kerry mentioned the fact that Liz Cheney was a Lesbian, and argued for a more tolerant world. That was after Liz Cheney had revealed her Lesbian sexual orientation to the whole world in the press and on radio and TV.

Liz Cheney and her mother both immediately went on TV and complained that they were "so offended" that John Kerry would say such a thing.

- **Claim that "It's unfair."**

For example, Romeny defenders complain: "It's unfair of the Obama campaign to demand that Romney release a dozen years of his tax returns, like Obama did."

This petulant complaint goes well withÂ the Drama Queen Ploy "**I'm so offended**."

- **Answer A Question That Was Not Asked (To Avoid Answering One That Was Asked)**
  When asked an embarassing question, answer a different question.

  This technique is closely related to the previous item "creating a diversion", but it has twists of its own. Politicians routinely use this trick to avoid answering the tough questions. Really skilled politicians actually use this technique to turn hard questions to their advantage â they will answer the question that they really wish had been asked, so that they can go on and on about how great their accomplishments have been lately.

  For example: The Oxford Group cult leader Frank Buchman attracted a lot of attention and criticism back in the nineteen-thirties for associating with high-ranking Nazis likeÂ the Gestapo chief Heinrich Himmler. Buchman's faithful follower and apologist Peter Howard wrote that Buchman never met Hitler (which was probably untrue), and then added:

  > Nor was Buchman an intimate of Himmler or of any other member of the Nazi hierarchy.
  > *The Mystery of Moral Re-Armament; A Study of Frank Buchman and His Movement*, Tom Driberg, 1965, page 66.

  Nobody was asking whether Frank Buchman and Heinrich Himmler got in bed together; they were asking how sympathetic Frank Buchman was to the Nazi philosophy and goals. But Peter Howard didn't want to talk about that, so he just declared that Buchman and Himmler were not "intimate".

  Peter Howard used this technique after World War II when he triumphantly produced a letter from the Secretary of the U.S. Air Force that declared that the Moral Re-Armament organization (the renamed Oxford Group) was not a bunch of pacifists. Nobody had accused MRA of being pacifists. (Not ever, that I know of.) They were accused of being fascists,Â Nazi-like,Â Nazi-sympathizers,Â draft dodgers, andÂ chicken-hawk "super-patriots", but not pacifists. Peter Howard's "proof" that MRA was not pacifistic did not prove that MRA was not fascistic in nature, or that they weren't chicken-hawk draft-dodgers or Nazi sympathizers.

  For another example, at a press conference, when George W. Bush was asked about the torture of prisoners inÂ *Abu Ghraib*prison, Bush answered the question by talking about how wonderful freedom is, and how "we" are bringing freedom to the people of Iraq, and how just a small minority of the Iraqi people hated freedom... That's changing the subject and answering a different question.

  > The press conference is a duty the president [G. W. Bush] generally avoids, and approaches only with apparent great discomfort. As he casually confessed at the Associated Press annual luncheon on April 21, 2004, "I kind of like ducking questions, and I would be glad to duck any questions, like my mother once told me to do." His responses generally conform to a number of different input-control strategies. He turns his awkward and memorized answers to any question into a question itself, and then answersÂ *that*Â instead of the original one.
  > *Bush On The Couch*, Justin A. Frank, M.D., page 125.

- **Answer a Question With A Question**
  Do not â simplyÂ *do not*Â â answer your opponent's question. Immediately counter-attack with another question that may or may not be relevant to the subject under discussion.

  In a recent discussion in a newsgroup, one fellow was declaring that Alcoholics Anonymous had been designed to make people quit drinking. I responded by pointing out that A.A. had not been "designed" that way at all â that in fact Frank Buchman had developedÂ those cult religion practicesÂ to grow his own cult, and Bill Wilson simply split off and took over a branch of Buchman's cult â the "Alcoholic Squadron of the Oxford Group".

  The other fellow replied,Â "Do you go to A.A. meetings?"

- **Monopolizing the Question (*Hypophora*)**
  Ask a question and then immediately give the answer.

  "Who was sent to us to redeem us? Jesus, of course!"

  "What is the only solution for alcoholism? It's Alcoholics Anonymous, of course."

- **Surfeit of Questions (*Plurium Interrogationum*)**
  Demand a simple answer when this is not possible:
  "Okay, if God didn't create the universe, tell me how it got here."
  (The obvious answer is another question:Â *"But who created God? How did God get here?"*)

- **Obfuscate**
  Confuse and cloud an issue, so that the original point gets lost. This can often be accomplished by overloading the listeners with myriad details or irrelevant facts. False facts are especially good. Then you can get distracted by arguing over the validity of the false facts.

  - "You don't know what the technical issues are. The fix that you desire may not be as simple as you think. Don't assume that you are smarter than the Olympus Corporation's engineers. I mean, if they haven't done that fix in all of these years, what makes you think that it's easy to do?"
    (Answer: It was Olympus corporate policy to not fix or enable camera features like Focus Confirmation and Image Stabilization with legacy lenses, not an engineering problem. Olympus just wanted to force people to buy new Olympus lenses, by making the old lenses harder to use.)

  - "A.A. meetings can't be confession sessions. I mean, who is the priest? You can't be confessing if there isn't a priest."
    (Answer: You can confess things to anybody, not just a priest. Like, you can confess to the police, or a wife, or a friend...

- **Obfuscate With Bureaucritese**

  Bureaucrats and politicians have a special incomprehensible language all their own, which makes communicating with them, or understanding them, difficult or impossible. They are skilled at using it to not answer questions and not give real explanations:

  - We will take that under advisement.
  - We will look into it.
  - Top people are investigating it.
  - We are working on a contingency plan.
  - We will consider that a priority issue.
  - The Subcommmittee For Superwidgets is working on that.
  - That will be addressed in the next five-year plan.

- **Confuse With Technicalese**
  This one is pretty obvious â just confuse the issue with a lot of technical-sounding garbage that means little or nothing.

  "Today's Terrorist Level Color isÂ ***Chartreuse with Pink Polka-Dots****. Do not panic. In fact, do nothing."*

  (The only Terror Color I'm really sure about is Yellow. That's the level where George W. Bush parks his ass safely 5000 miles behind the front lines and then bravely yells,Â "Bring 'em on!")

- **Attack Without Appearing To Attack By Using Paralipsis or Apophasis**
  *Paralipsis*Â is a rhetorical figure of speech wherein the speaker or writer invokes a subject by denying that it should be invoked.
  *Paralepsis*Â is almost the same thing â a pretended or apparent omission where a speaker artfully pretends to pass by what he really mentions, as in:Â "I will not speak of my adversary's scandalous venality and rapacity, his brutal conduct, or his treachery and malice."
  *Apophasis*Â is denial of one's intention to speak of a subject that is at the same time named or insinuated, as in,Â "I shall not mention Caesar's avarice, nor his cunning, nor his morality."

  - "I don't want to stoop to calling my opponent names like bribe-taker and war-profiteer, so I won't."
  - "I would tell you about my opponent's predilection for under-age girls, but it would be unkind of me to publicly embarrass those innocent girls."
  - "It would be unfair of me to bring my opponent's family into the debate by telling you things like the fact that my opponent's wife is an alcoholic and his lesbian daughter smokes crack cocaine, so I won't talk about those things."

- **Passive-Aggressive Attack**
  Use subtle passive attack modes.

- "Oh, it isn't like I need my fair share of the credit. That would just inflate my ego."
- "Did I say that you are an ungrateful child? Don't worry about me. I'll just sit here and freeze and starve in the dark."
- "So go ahead and refuse to attend Al-Anon meetings. It isn't like I need any support from my family or anything. It won't be your fault if I relapse again."

- **Sarcasm, Condescension, and Patronizing Attitudes**

This is easy to understand.

- A debater declares, "Oh dear. Another ill-informed critic. Would someone please explain it to him?"
- Dismiss a critic with, "You really like the sound of your own voice, don't you?"
- Adopt an attitude of moral superiority. "I'll pray for you. I forgive you. I'm above doing that. I hope you will see the light eventually."
- Arnold Schwartzenegger used to sneer at his political opponents and call them "girly-men". (He doesn't any more; it back-fired.)
- OnÂ *Meet The Press*, Sunday, December 21, 2003, Representative Tom Delay (R-TX) was asked about General Wesley Clark's statement that he would have persisted in hunting for Osama bin Laden, rather than get distracted chasing Saddam Hussein [who did not attack the U.S.A. on September 11), and that he, Clark, would have gotten Osama by now if he had been in charge.

  Tom Delay's answer:Â "Sometimes it is easier to find Osama [bin Laden] than it is to find Wesley Clark's foreign policy. ... What he says doesn't hold a whole lot of weight with me." Note that Rep. Delay didn't actually answer any of General Clark's statements; he just tried to dismiss them with a condescending sneer.
- Ronald Reagan is famous for having used this technique in the Presidential debates with Jimmy Carter. After Carter made a point, Reagan laughed it off with,Â "There you go again."Â Reagan didn't bother to actually refute Carter's statement, because he couldn't. Note that laughing something off (or pretending to laugh) is a subtle form of the Condescension technique.
- When British reports of a leaked document from a meeting of George W. Bush and Tony Blair revealed that Bush had expressed an interest in bombing the headquarters of the Arab television news networkÂ *Al Jazeera*, White House spokesman Scott McClellan answered,Â "We are not interested in dignifying something so outlandish and inconceivable with a response."Â When critics called this a classic non-denial denial, a White House official said the allegations were false and "absurd". (TIME, Nov 28 to Dec 4 2005)
- In comments to a Washington Post story about limiting tax deductions for charitable contributions (2012.12.13), various debaters wrote:
  - "You may have been drinking the government kool-aid way toÂ [*sic.*]Â fast. Slow down."
  - "I see yrevatrr and towiron1 have just finished watching the latest Disney channel

movies..."

- ◊ "You morons won. That you aren't sorry yet only means you're still a moron."
- ◊ "Hairless, I have a feeling these cowards will crawl back into their holes when asked to suffer for their cause."
- ◊ "Yrevatrr, you bring the zeal of a Marxist ideologue to economics, bereft of sound economic analysis."
- ◊ "If you feel you're being demonized because you're affluent, you might want to spend some of your declining-spending-power dollars on a psychiatrist."
- ◊ "You poor thing! You're wealthy and resentful because somebody said something bad about rich people?"
- ◊ "Liberals are mathematically Illiterate."
- ◊ "You silly conservatives, always longing for an America that never really was, never will be again, and exists now only in your foolishly nostalgic, over-nationalist memories."
- ◊ "Wow, you must have a truly grim existence."
- ◊ "Poor libs! No ability to think. :("
- ◊ "Get an education you dimwit."
- ◊ "Just a typical liberal. Of no value or benefit to society."
- ◊ "Must be tough trying to breath up where your nose is."
- ◊ "Planned Parenthood! You mean testing women for cancer? The horror? Idiots."
- ◊ "Now that Obama has been empowered by an uninformed electorate..."
- ◊ "I have to say, with all the Winger name calling, it is clear they are still bitter about the fact that an intelligent, charming competent man of non-European descent, Barack Hussein Obama, is their President for the next four years. Poor fellas. I can see just see thereÂ [*sic.*]Â faces, red and twisted with rage as they pound away at their keyboards, when all of sudden: POP! goes the Winger's head."

♦ When a photographer complained in an Internet forum that his Canon camera does not have in-body image stabilization, a defender of Canon cameras declared, "Take a breath joe!! Really man, you don't need in-body IS, you just have to cut down on the caffeine." (Notice the failure to capitalize the name "Joe". That is also a subtle condescension and put-down.)

♦ Alcoholics Anonymous provides us with a wealth of examples of this technique â A.A. is almost "Condescension Incorporated".

- ◊ If you are picky and hesitant about deciding which old-timer you wish to have as your sponsor, they will slap you with condescending remarks like: "Maybe she's trying to break all known records of the time it's taken somebody to find a sponsor."
- ◊ An Al-Anon slogan: "It's what you learn after you know it all that counts."
- ◊ "You think you are qualified to criticize A.A.?Â How many millions of drunksÂ have you sobered up?"
- ◊ "He is suffering from terminal uniqueness."
- ◊ "Nobody is too stupid to get the program, but some people are too intelligent."
- ◊ "You think too much."
- ◊ "Your best thinking got you here."

◊ "Now you know everything, huh?"

◊ "You need to pray more."

◊ "My, my. Don't we have a resentment?"

◊ "You are in denial."

◊ "Damn, Brennan! Did A.A. run over your dog or something?"

◊ "Gosh. Calm down. Maybe a drink would help?"

◊ "You are so full of bologna or yourself or something..."

◊ "This has to be a joke post."

◊ "You'll eventually learn and join us."

◊ "He's one of those people who wants to spend the rest of his life crying about how much A.A. hurt him."

◊ "I read your criticism of A.A.. Very cute. Now why don't you buy a copy of theÂ *Big Book*Â and find out what it's all about?"

◊ "Go back under your bridge."

◊ "He has collected a wealth of anti-A.A. material on his web site. Maybe next year he'll get a life."

◊ "Oh God! Just what we need. Another Ken Ragge clone!"

◊ "You anti-AA guys are a bunch of pussies who couldn't handle the responsibility that goes with being a member of AA."

◊ When someone angrily criticizes A.A. for harming sick people, say, "I admire your level of serenity."

◊ When presented with annoying facts, respond: "OhÂ *that guy*! Do you expect me to believe anythingÂ *he*Â says?"

◊ This exchange occurred in a newsgroup:

> Q: Friends, I am scheduled to make a presentation on the 3rd Tradition this month, and so far, I have been unable to find out when the word: "sincere" was removed from the text of the Tradition. Can any of you be of help?
>
> A: What difference does it make? Are you "presenting" to a bunch of lawyers?
> http://groups.google.com/group/alt.recovery.addiction.alcoholism/msg/2d9a96d050fadbe4

Is the message there that new members are not supposed to ask too many discerning questions about the history of Alcoholics Anonymous?

◊ A critic who thought that I was an atheist wrote:

> Some suggest that only those truly freed by the possession of exceptional intelligence can find peace in the absence of faith, yet so many intellectual giants â Hawking, Einstein, Bohr, MacLuan, Marquez, Rushdie, Friedman et al. all possess and follow their own brand of faith, and worship (gasp!) in loose cults â such as Catholicism, Judaism, Islam etc... despite the attendant irrational and delusional qualities required thereto.
> Â Â Â I suspect you must be smarter than them all. God/Allah/Tao/Buddha/Vishnu et al. bless you.

(Curiously, when I explained to the critic that I was neither an atheist nor an agnostic, he then switched sides and declared that he was actually a skeptic. Go figure.)

Another form of the superior condescending technique is giving people nicknames, especially demeaning nicknames. Call a black woman "Brown Sugar". A guy who wears glasses is "Four-eyes". A man who belongs to any of several Eastern religions is "Rag-head". And so on.

- **Adopt an air of superiority**
  Claim that you are better-educated and more intelligent than your decadent and immoral opponent. Claim that you are a far superior example of manhood (or womanhood). Adopt a superior Puritan attitude, or a superior "open-minded" attitude. Flaunt your church membership, or your business connections, or your friends in high places.

  This technique is a natural for people who suffer fromÂ Narcissistic Personality Disorder.

  > *"I am much more intelligent than my opponent. And more moral. And more respectable. And more trustworthy. Also better educated. And better-looking. And more charismatic. And more fun. I don't know why my opponent in this debate even bothers to open his mouth and embarrass himself."*

- **Damn with Faint Praise**
  Praise someone, but make the praise so small that it is actually a subtle criticism. Or praise only some small unimportant aspect of a person's endeavor, leaving an implied criticism of the endeavor.

  - *"What I really like about my opponent is that she can make me laugh."*
  - *"While running a billion-dollar government program, he keeps a tidy desk, and his hair is always neatly groomed, and his shoes are shined."*

- ***Reductio Ad Absurdum***

This means, "reduce to absurdity." Take a point, and exaggerate it until it is ridiculous, to show that the original idea was stupid or wrong. For example,Â start with this storyÂ from theÂ *Big Book*:

> Â Â Â Whether the family goes on a spiritual basis or not, the alcoholic member has to if he would recover. The others must be convinced of his new status beyond the shadow of a doubt. Seeing is believing to most families who have lived with a drinker.
> Â Â Â Here is a case in point: One of our friends is a heavy smoker and coffee drinker. There was no doubt he over-indulged. Seeing this, and meaning to be helpful, his wife commenced to admonish him about it. He admitted he was overdoing these things, but frankly said that he was not ready to stop. His wife is one of those persons who really feels there is something rather sinful about these commodities, so she nagged, and her intolerance finally threw him into a fit of anger. He got drunk.
> Â Â Â Of course our friend was wrong â dead wrong. He had to painfully admit that and mend his spiritual fences. Though he is now a most effective member of Alcoholics Anonymous, he still smokes and drinks coffee, but neither his wife nor anyone else stands in judgement. She sees she was wrong to make a burning issue out of such a matter when his more serious ailments were being rapidly cured.
> TheÂ *Big Book*, William G. Wilson, page 135.

And then attack it like this:

Notice the powerful hidden assumption in this sentence:
"He admitted he was overdoing these things, but frankly said that he was not ready to stop."
Oh? Somebody can continue doing whatever he is doing just because heÂ *frankly*Â says that he isn't ready to stop?

- When was the last time that you heard an A.A. member accept that as a good excuse for someone to continue drinking? Can the alcoholic say, "I know I'm over-doing it right now, butÂ *frankly*, I'm not ready to stop just yet", and keep right on drinking forever?
- If you catch someone robbing your house, can the burglar say, "I know I'm over-doing it right now, butÂ *frankly*, I'm not ready to stop just yet" and keep on robbing forever?
- And, if the guy next door has a bad habit of molesting 10-year-old little girls during full moons, can he say, "I know I'm over-doing it, butÂ *frankly*, I'm just not ready to stop right now" and keep on molesting children forever?

Logically, there is not any connection between molesting little girls and smoking cigarettes, or between smoking and robbing houses, but there doesn't need to be. The point is to exaggerate theÂ *"Frankly, I'm not ready to stop"*Â excuse to the point where it becomes absurd, to show the falseness of that argument.

Also note the use of another technique in that quote, one that we might callÂ *Context Shift*Â orÂ *Biased Viewpoint*:

- The author Bill Wilson usedÂ *Slanted Language*Â â he refered to the man in the story as "our friend" and "a most effective member of Alcoholics Anonymous", even after he got drunk and threw his angry screaming temper tantrum. (So it's also aÂ *Stroking Ploy*.)
  His clean and sober wife, on the other hand, was called "one of those persons." You know,Â one of those nagging wivesthat you get away from by going to an A.A. meeting...

- Likewise, Bill wrote that "her intolerance finally threw him into a fit of anger."
  Wanting your husband to live and be healthy is "intolerance"?
  Was she also "intolerant" when she wanted him to quit drinking himself to death?

- And she didn't throw him into a fit of anger; he willingly walked right into it by his own choice, to put on a big loud drunken show of anger that would scare her off and make her quit "nagging him" to quit smoking.

Bill Wilson's goal was to promote a feeling of "us good old boys versus the nagging wives", which isÂ just one of Bill's many attacks on his wife.[3]Â And it's also an example of the creation of a "granfalloon", a distinguishing characteristic that will define and unite a group.

And also note the use of yet another propaganda technique:Â *"Assume The Major Premise."*Â Look at this sentence:
"She sees she was wrong to make a burning issue out of such a matter when his more serious ailments were being rapidly cured."
Wilson actually managed to do it twice, and pack two lies into one sentence:

1. She was wrong to try to get him to quit smoking.
2. His more serious ailments were being rapidly cured.

First off, she wasn't wrong. Bill Wilson was just a hard-core chain smokerÂ who didn't ever quit smoking, not even when he had burned out his lungs and gotten fatal emphysema, and he hated his wife Lois nagging him, so he said that she was wrong to try to get him to quit smoking. (For that matter, Bill also said thatÂ his wife Lois was wrong to nag him to quit drinking.)

Then, what "more serious ailments were being rapidly cured"? His alcoholism? No way. He just used alcohol as a blackmail weapon when she tried to get him to quit smoking. He used alcohol to get his own way, and he holds that weapon in reserve for use against her again. At any time, he can blackmail her with more threats to relapse and drink if she doesn't let him have his own way. He is still using alcohol as an easy solution to his problems. But Bill Wilson arbitrarily declared that "his more serious ailments were being rapidly cured", because Bill wanted to make the A.A. program look good.

- **Rationalize**

This one is great, an old classic. Rationalization. No matter what you or somebody else did, you can always rationalize it, and justify it somehow, and put a happy face on it.

For instance,

- "Tommy did it. O.J. got away with it. So I should be able to do it too."

- "I did it for the children."

- "Well, he did his best."

- When politicians are caught telling lies about their opponents, they rationalize,
  "Well, the other side did it first."
  Or,
  "Well, my opponents do it all of the time. I have to fight fire with fire or else I'll lose."

- Politicians also rationalize their lies and distortions by saying,
  "But we will lose the election if we tell the voters the truth. We are using dirty tricks for the good of America."
  They overlook the obvious objection that if they will lose elections by telling the American people the truth, then maybe they are pushing the wrong programs. They certainly are not supporting democracy â democracy requires that the voters know what they are really voting for.

- And when they get caught with their hand in the cookie jar, they say,
  "Well, it's the system. That's just how it is done. Everybody's doing it. You have to cooperate with the system and not make waves. Go along to get along..."

The Bush administration is having to do a lot of rationalizing, lately.Â *"We have to invade Iraq and take out Saddam Hussein because he threatens us with an imminent attack with Weapons of Mass Destruction,"*Â they said. Tony Blair even said that Saddam had a 45-minute-to-launch capability.

But you know what happened. No WMD. Nothing. Not even close. No yellow-cake uranium from Niger. Not even one missile that could hit England, never mind the USA. So they rationalized,Â *"Well, we had to stop Saddam from giving WMD to al Qaeda. It's because of September 11."*

But there were no such weapons. And even more importantly,

- Saddam Hussein hated al Qaeda and al Qaeda hated Saddam.
- They never worked together, and Saddam Hussein had nothing to do with September 11.
- Osama bin Laden is a fundamentalist religious fanatic, and Saddam Hussein was a secular military dictator who killed the Islamic religious extremists who made trouble for him. They didn't get along at all.
- Osama bin Laden even made a videotape shortly before the USA attacked Iraq, telling the Islamic radicals to ignore Saddam Hussein because he wasn't a friend.

So the Bush administration rationalized,Â *"Well, at least we got rid of a bad guy. Now Iraq can have democracy and freedom."*

But you know what happened. Ayatollah al Sistani demanded real democracy and an elected government, immediately. You know, one man, one vote, and all of that old American stuff. But the Bushies said,Â *"Oh, noooo! You can't do that! You will elect the wrong people! I'll tell you what: You can have an election where you can only vote for the candidates that we choose. On second thought, why don't we just forget about that whole democracy thing for a while. We will just appoint a council of rulers for you."*

So they rationalized,Â *"Well, at least we got rid of the bad guy. Saddam Hussein was torturing and*

killing his own people."

But you know what happened.

- Torture of prisoners inÂ *Abu Ghraib*Â prison.
- Rapes of women prisoners.
- The homosexual rape of a teenage boy.
- At least 35 deaths of prisoners while under interrogation (overly enthusiastic questioning), and 2 known deliberate murders.
- Lots of pictures.
- Naked men stacked in pyramids.
- Sadistic torture.
- Police dogs biting them.
- Photographs of naked women prisoners taking showers.
- A 70-year-old Iraqi woman stripped naked, shoved to the floor, and ridden like a donkey by a British soldier.
- Unreleased video tapes, perhaps even showing Iraqi women being raped and Iraqi male prisoners being murdered.
- Pornography films: Reports of a video tape showing a certain U.S. Army woman having consensual sex with her boyfriend in front of Iraqi prisoners.
- Snuff films. Really hot stuff, much better than what you can get at your local adult bookstore.

[Wow, the U.S. Army snuff films are even better than the Mexican ones. Heck, they're even better than Mel Gibson'sÂ *The Passion of the Christ*Â â you know,Â *"Mad Max and Jesus Meet the Road Warrior in the Thunderdome, and the Road Warrior Wins"*.]

How will they rationalize their way out of this one?Â *"Well, they were bad guys. We grabbed them off of the streets because they looked at us cross-eyed. Maybe his second cousin took a pot-shot at us. They don't appreciate the freedom we are giving them. Besides, we need to get information out of them. It's just part of the 'softening-up' process, before interrogation."*

But you know what happened. The U.S. military generals admitted, in the U.S. Senate Hearings (2004-05-11), that 70 to 90 percent of the prisoners inÂ *Abu Ghraib*Â prison were innocent, just grabbed by mistake in sweeps of the streets.

So how will they rationalize their way out of this one?
"Well, those abuse things were only done by a few bad apples."

- â In spite of the fact that it was done by both American and British soldiers in several different prisons over a long span of time, and there areÂ *thousands*Â of pictures that document an on-going program of abuse, and now an American colonel has sworn that the commanding general in charge of intelligence watched it being done.

UPDATE, 2004.05.11:Â *Oh heck, now al Qaeda is making snuff films too. They just chopped the head off of Nicholas Berg, as revenge for abuses inÂ* ***Abu Ghraib****, they say. What a bunch of disgusting copy-cats.*

Alcoholics Anonymous also teaches us how to rationalize.

- For example, if a critic says,Â *"Bill Wilson cheated on his wife Lois a lot, both before and after sobriety. He took sexual advantage of sick women who came to A.A. seeking help to avoid death from alcohol. Bill even had the gall to be routinely unfaithful to Lois while she was working in a department store to support his lazy ass. And Bill even used the Alcoholics Anonymous headquarters as an employment agency for his many mistresses who couldn't even type. That is hardly what I would call a good spiritual role model."*

  You can answer,Â *"It just goes to show that Bill Wilson was human, and not a saint, and that's wonderful, because it means that ordinary people like you and I can recover, too. SoÂ Bill Wilson had to be human, and not a saint, so that he could help others. It was the Will of God."*

- Likewise:Â *"All of that vague, confusing, grandiose, contradictory stuff that Bill Wilson wrote in theÂ Big BookÂ is okay. Even if Bill wasn't a great writer, that book will still save your life. Eventually, you will be able to figure out what it means."*

- And:Â *"Bill Wilson had to steal theÂ Big BookÂ publishing fund and the copyright of theÂ Big Book,Â in order to keep Henry Parkhurst from stealing it. It's what the other A.A. members wanted Bill to do."*

- **Exchange A Term**
  Exchange a term in your opponent's argument, thereby redefining the debate to better suit your own prejudices.

  Back in the nineteen-sixties, when proponents of psychedelic drugs spoke of visions of paradise, critical newspaper editors changed the wording to visions of an "inferno".[17]

  Those women who desire control over their reproductive lives call their goal "Pro-Choice", and they call their opponents "anti-abortion". The opponents of abortion, on the other hand, call themselves "Pro-Life", while calling their opponents "pro-abortion people".

  Con artists who are trying to get people to participate in illegal chain letters and pyramid sales schemes brag, "I made $3000 in my first week." What we call criminal fraud, they call "making money".

  When the Chinese People's Army attacked and conquered Tibet, and brutally murdered great numbers of innocent people, the Chinese leaders called it "the liberation of Tibet", while we call it "the invasion of Tibet".

  Likewise, George W. Bush calls the invasion of Iraq "giving them freedom" and "liberating them from a dictator" (accompanied by a only a little "collateral damage"), while the Iraqi resistance calls it the invasion and occupation of their country, accompanied by the murder of their families, children, and neighbors by the massive use of firepower and dropping cluster bombs in civilian neighborhoods during Donald Rumsfeld'sÂ *Shock And Awe*Â bombing.

  G. W. Bush complains that "foreign fighters" and "terrorists" have come into Iraq from the outside and are making trouble. The Iraqis say that they are the "freedom fighters", and that the Americans are

the "foreign fighters" and the "terrorists" who came from other countries to enforce the will of the Bush family and their oil company friends with "Shock and Awe" bombing.

Likewise, in Israel:

> The formula is simple: suicide in the West is thought to be caused by despair, hoplessness, panic, and mental illness, so we assume that such must be the case among Moslems. To date, we have been unable to see the issue through any but Western eyes, and so have missed recognizing that the young Palestinian bombers are seen by large numbers of Muslims as heroes who are willing to sacrifice their lives â in martyrdom, not suicide attacks â for a cause that is greater than themselves and sanctioned by their God. What the West sees as tragic brutality practiced by despairing or deviant individuals is perceived in much of the Moslem world as a heroic act of self-sacrifice, patriotism, and worship, an act to be greeted not with condemnation and revulsion, but with awe, respect, and a determination to emulate. Moreover, it is an act Muslims deem a just military response to Israel's fifty-plus-year occupation of Palestine and its relegation of three generations of Palestinians to refugeeÂ [concentration]Â camps.
> Â Â Â Thus, American's evil suicide bombers can also be seen as Islam's martyr-heroes, men and women following in the steps and under the guidance of their prophet and according to the revealed word of their God.
> *Imperial Hubris: Why the West is Losing the War on Terror*, Anonymous, pages 135-136.

In March of 2006, there was a flap at the Washington Post about a right-wing blogger, Ben Domenech, getting hired to write opinion pieces for the online edition. Some critics who investigated his background quickly discovered a history of plagiarism in his writings.

A Washington Post spokesman commented that he "wasn't aware of those allegations."

Someone posted to a forum,Â

'Is not being "aware of allegations" the same as not being aware of the facts?'

In another recent example, a local politician declared, "My opponent has spent $400 million on his political agenda." The so-called "political agenda" was health care for people, and unemployment compensation for the unemployed people, and other social services like that. (Portland, Oregon, KGWÂ *Straight Talk*, 2011.04.10)

Alcoholics Anonymous constantly uses this technique. Talk to them about the harmful cult practices that are embodied inÂ the Twelve Steps, and they will respond by calling the Twelve Steps "spiritual principles".Â The Twelve Steps areÂ *practices*, not*principles*. The Twelve Steps are specific practices for people to do, things like surrendering your will and confessing your sins, and hearing the voices of spirits or gods or something whileÂ conducting sÃ©ances, not guidelines for a spiritual life.

Frame The Argument
This is very closely related toÂ *Exchange A Term*; in fact, they are often identical. You can re-frame an argument by exchanging a term and redefining the debate in terms that you like better.

When someone says that conservative politics should be about preserving the Constitution Of The United States and the Bill Of Rights that our Founders gave us, twist the argument around to "defending the country from terrorists who don't deserve Constitutional protections". Suddenly it becomes okay to violate loyal Americans' rights because terrorists don't deserve any rights.

Comcast uses this technique when they cry about heavy users of the Internet stealing bandwidth from other users, as inÂ "Those people who download movies are slowing down the Internet for everybody else."Â
Â Â Â The truth is, Comcast is saddled with a very limited technology: sharing a cable â trying to cram all of the data communications of a neighborhood into one single thin cable, which means that the available bandwidth is inherently very limited. You can only cram so much data through one piece of wire. And the more customers who share that cable, the less bandwidth each customer gets, so the slower it gets.Â
Â Â Â But rather than admit that Comcast cannot supply sufficient bandwidth to meet their customers' needs and desires â to whom Comcast has sold "high speed connections" â Comcast frames the argument as some heavy users taking too much.Â "They are taking more than their fair share. Things would be fine if nobody used very much."Â
(That also smacks of finding a scapegoat to blame:Â *It isn't Comcast's fault for not investing in infrastructure and building a good network; it's the fault of users who want to actually use the connection that they paid for.*)

Propaganda Trick of the Day: President Obama's press conference, 20 December 2013:

While he was trying to minimize the damage caused by revelations that the NSA is spying on everybody's phone calls all of the time, and a Federal judge declared that the NSA surveillance program was an illegal violation of the American peoples' Constitutional protection against unwarranted searches, President Obama said, "...Whatever benefits this program has, may be outweighed by the concerns that people have..." (about their privacy and rights). Obama didn't say, "outweighed by the gravity of egregious violation of our Constitutional rights", he only said that some nervous nellies were "concerned". As if there was really nothing wrong going on, it's just those silly people who worry, and now Obama has to soothe their hurt feelings.

Those childish worrying twits are such a bother. Having secret police spying on everybody all of the time didn't hurt the people in Nazi Germany or Communist Russia, now did it? Didn't the Gestapo and the KGB do a good job of defending their countries, and respecting their peoples' rights?

You can trust the secret police. Really. They always have your best interests at heart.

Alcoholics Anonymous likes to frame opposition to A.A. in terms of "the atheists versus the Christian believers". But they are framing the argument in false terms. Alcoholics Anonymous theology is not Christian at all â Â it is grossly heretical, and conflicts with Christianity in many major ways.

Opponents of Alcoholics Anonymous would do well to re-frame the argument in terms of "the heretical anti-Christian nonsense of A.A. versus everyday common sense."

- **Argue with Unrealistic Hypothetical Situations**

  Imagine a guy who is in the process of committing suicide by hanging himself. He is standing on a chair, and tying the noose up to something. His cross nagging wife looks on and asks, "Where would we be if everybody did that?"

- **Misrepresent Your Opponent's Position, or Mischaracterize Your Opponent, or Mischaracterize His Statements or Questions**

  For example: The Committee for Scientific Investigation of Claims of the Paranormal (CSICOP) is an organization that does just what its title sounds like: it investigates claims of the paranormal. That often results in its debunking some phony psychics and quack healers and various other fakes and charlatans.

  That really annoyed some people who didn't like to see their favorite scams exposed. They fired back by declaring that,

  > "CSICOP [is] a defensive league of American Scientists whose basic aim is to argue that the paranormal does not exist, and is an invention of cranks and wierdos."
  > *Skeptical Inquirer*, Nov/Dec 2001, page 67.

  That is a mischaracterization of CSICOP.

  Such mischaracterization is standard behavior for the Bush administration. In April, 2007, when Congress put into a funding bill a non-binding resolution asking for the withdrawal of troops from Iraq, George W. Bush declared,Â "I will strongly reject an artificial timetable withdrawal, and/or Washington politicians trying to tell those who wear the uniform how to do their job."

  1. As if there was a "non-artificial" or "natural" time-table for withdrawal from Iraq?

  2. And isn't George W. Bush the biggest politician in Washington who is telling the generals what to do? Isn't he the Commander In Chief, as well as "the decider"?
     (Bush routinely hides behind the generals, and says that he is "supporting them" when things aren't going well. But he is the one who is giving the orders.)

  Likewise, Vice President Cheney declared:Â "Some Democratic leaders seem to believe that blind opposition to the new strategy in Iraq is good politics."

  1. Is opposition to the administration's policies "blind", or a well-informed and well-thought-out, considered, rational response to four years of failure?

  2. What new strategy? "The Surge" is just sending in a few more troops. This "new strategy" comes from the administration that, way back at the beginning of the war, fired the generals who said that Secretary of Defense Donald Rumsfeld wasn't sending in enough troops to do the job properly. Remember General Shinseki, who was fired for declaring to Congress that Rumsfeld was not sending in nearly enough troops to accomplish the job?

(Will those generals who were right all along get their jobs back and get another star for being right? Not likely. G. W. Bush gives more stars to those generals who say that he is right about everything.)

3. And Cheney declares that the opposition must be rooted in "politics". The opposition couldn't possibly be based on principles and intelligent, realistic, well-thought-out decision-making, presumably because reasonable American people cannot possibly have good cause for disagreeing with the administration, even after four years of shifting goals and lies and incompetence, and cover-ups and misinformation and fabricated stories, and secret prisons and renditions and torture and war crimes and declaring the Geneva Convention "quaint", and the loss of far more troops in Iraq than Americans killed and maimed on 9/11.

- **Nit-Pick and Split Hairs**
  This is easy to understand. Everybody knows what nit-picking is:

  > "Hah! You misspelled Henrietta Seiberling's name! That totally blows your credibility. Now I'm not going to believe anything else you say."

  Yeh, right. As if you were planning to before that unfortunate misspelling... :-)

- **Quibble**
  Quibble over irrelevant tiny details, quibble over the definitions of words, quibble over anything you can find that will divert attention from your opponent's points.

  For example, when Alexander Litvinenko, the Russian defector, former Russian spy, and author of tell-all books about the new Russian spy agencies, wasÂ poisoned with the rare radioactive metal PoloniumÂ for persistently criticizing the Russian president/dictator Vladimir Putin, Putin claimed that he didn't do it, that he had nothing to do with it, because the British medical documents did not show "that it was a result of violence, this is not a violent death, so there is no ground for speculations of this kind." To argue that poisoning somebody with a radioactive substance is not a "violent" act is quibbling over the definitions of words. It was still murder most foul.

  Another kind of quibbling is quibbling over terms, like "legitimate", as in "legitimate rape", or "legitimate claims" against BP. We all remember the flap over a Republican candidate (Aiken) arguing that women didn't get pregnant from "legitimate rape". And earlier, BP, the British oil company, declared that it was paying for all "legitimate claims" of damage from their oil spill. But they didn't explain what kinds of hoops ruined people had to jump through to prove that their claims were "legitimate". And how does a girl prove that her rape was "legitimate", rather than illegitimate?

  On another note, one critic of mine actually spent several letters quibbling over whether President Lincoln ever told a jokeÂ that contained the word "ass", as inÂ *"maybe those generals will get off of their asses and do something"*... That critic tried to claim that everything I said in my web site was all wrong because he was sure that Abraham Lincoln â the rough home-spun frontiersman â would never use crude words in jokes.

- **Hit And Run**
  Launch an attack on your opponent, and then run away before your opponent can counter-attack or

ask you to prove your accusations.

"That story is all wrong. It's full of factual errors. It is so stupid that would be a waste of time to even respond to it. It doesn't even warrant an answer. I'm not going to waste any more time on this stupid argument. I'm out of here."

Now you can run away without actually answering any of your opponent's points, or supplying any facts to back up your sweeping statements and denunciations.

(And, if your opponent refutes your statements after you have left, and supplies a lot of facts to prove that he is correct, you can later accuse him of talking about you behind your back, and of attacking you when you couldn't defend yourself, which implies that he is a coward. That stratagem has sweet touches ofÂ *ad hominem*Â andÂ blame the victimÂ in it.)

- **Hifalutin' Denunciations**

Denounce your opponent with vague, grand-sounding generalized accusations that don't have very specific meanings:

- "the proposal shows a failure of initiative"...
- "his program shows a failure of imagination"...
- "he exhibits a lack of vision"...

What the heck does any of that really mean, in plain English?

- **Make Unreasonable Demands**

For example: Demand that your opponent write his whole autobiography to show us that his life is okay without doing the Twelve Steps.

The Oxford Group cult leader Frank Buchman used this trick this way:

> The world needs a miracle. Miracles of science have been the wonder of the age. But they have not brought peace and happiness to the nations. A miracle of the spirit is what we need.
> Frank Buchman, speaking at Kronberg, Denmark, Whit Sunday, 1935, quoted in *Remaking the World, the speeches of Frank Buchman*, Frank N. D. Buchman, page 157.

For Frank Buchman to demand that science do everything from end the Great Depression to prevent World War Two was unreasonable. It isn't the job of "the miracles of science" like penicillin or the light bulb to do that. Nevertheless,Â Buchman then declaredÂ that his religion was the only answer, because "science" didn't meet his demands.

One contemporary booster of Alcoholics Anonymous used that trick like this: When I stated thatÂ 93% of the drug and alcohol treatment facililities in the USA use the 12-Step approach, he demanded a list of all of those facilities, including the names of the owners, addresses, and phone numbers.

- **Make False Demands**

  For example: Demand that your opponent prove that his life is still full ofÂ *"Serenity and Gratitude"*, in spite of his not doing the Twelve Steps.

  That demand is false because normal, sane, people do not judge their lives by how much "Serenity and Gratitude" they have; nor do they believe that a good life must be emotionally flat, without any of the other emotions like the passions, the love and the anger, the agony and the ecstasy, that make us greater than the rocks.

- **Shift the Burden of Proof Onto Your Opponent**
  Make all kinds of unsubstantiated statements and claims, and when your opponent objects and challenges those statements, say,Â "Do some research on the subject and you will see that what I am saying is true."
  It is the job of the person who is making the statements and claims to do the research and supply the evidence to support his assertions.

- **Double Standards**
  This is a well-known propaganda and debating technique. One standard or set of rules applies to one group, and a very different set of rules applies to another group. Also known asÂ ***hypocrisy***, when the easier, looser, standards apply to oneself.

  For example:

  - Men who philander are called "real ladies' men", while women who philander are considered whores.
  - Men are "demanding bosses", while similar women are "bitches".
  - Men who climb the corporate ladder while sleeping with several women are "normal, healthy, hard-working achievers", while women who do the same are guilty of "sleeping their way to the top."
  - Poor people who get money from the government are "takers", and "leeches getting handouts", but rich people who get millions or billions of dollars from the government are "smart businessmen".
  - The extremist Right-winger Senators and Congressmen say that extending unemployment benefits for poor unemployed people removes their incentive to go get a job. (Ignore the fact that there are not enough jobs to go around.) But giving hundreds of billions of dollars to Wall Street gamblers to bail them out after they lost gigantic bets does not remove their incentive to act responsibly, and stop gambling with other people's money.
  - Similarly, "Conservative" politicians say that giving money to poor people in various aid programs removes their incentive to strive and succeed in life. Those lazy poor people won't

work hard and accomplish great things if they aren't hungry. But letting rich people's children inherit millions or billions of dollars tax-free does not remove their incentive to work hard and excel.

- Poor people whose houses are foreclosed were financially irresponsible, and they deserve to lose their homes. But ultra-rich bankers who gambled and bet everything and lost and bankrupted their banks are "too big to fail", and must be bailed out with the poor taxpayers' money "for the good of us all."

- Police officers and judges who take bribes are corrupt criminals, but Senators and Congressmen who take bribes to vote a certain way are "great statesmen who are serving their nation".

- A.A. members talk constantly about God and "Higher Power", and declare that God is keeping them from drinking, and doing all kinds of wonderful things for them, granting their wishes and doing favors for them, and they don't consider that excessive, or obsession with religion. But when somebody else talks about God, and even dares to mention Jesus Christ,Â the A.A. members attack himÂ as a "Bible-beating fundamentalist", and tell him to "take it to Church".

  (Conversely, if somebody does not talk about God, and declare that "Higher Power" and "A.A. spirituality" are keeping him sober, then he is accused of being an agnostic or an atheist. That is aÂ *Double-Bind*.)

- When A.A. membersÂ lie, cheat, and thirteen-step under-age girlsÂ who came to A.A. seeking help for a drug or alcohol problem, that's okay, becauseÂ "We are not saints."Â But when a non-member does those things, he is a criminal who should go to jail.

- **Demand an Uneven Burden of Proof**
  Use very different standards of proof for opposite sides of an argument.

  For example: Exhaustively fact-check and nit-pick an opponent's statements, but do not challenge outrageous claims made by friends and allies.

  Another example: demand very strong, iron-clad, absolute proof for an opponent's statements, while insisting that the flimsiest of evidence proves one's own statements to be true.

  Alcoholics Anonymous is a past master of this stunt. In the opinion of Alcoholics Anonymous pundits:

  1. ◊ If one person quits drinking while attending A.A. meetings, then that "proves" that A.A. works.
     ◊ The numerous A.A. members who relapse do not prove that A.A. doesn't work.
  2. ◊ If one person relapses, even once, whileÂ *not*Â attending A.A. meetings, then that "proves" that nobody can do it alone.
     ◊ The numerous "do-it-yourself" people who succeed in getting sober and staying sober without A.A. meetings do not prove that people can get sober without Alcoholics Anonymous, because those peopleÂ *might*Â relapse some day. A.A. boosters do not ask whether the other sober A.A. members are likely to eventually relapse. (Nor do they bother to keep count of those who did.)

3. ◊ If someone has a bad drinking problem and he quits drinking while going to A.A. meetings, then that proves that he was a real alcoholic and A.A. works.
◊ If someone has a bad drinking problem and he quits drinking without going to A.A. meetings, then that proves that he was not a real alcoholic. (*The Real Scotsman Fallacy*) It doesn't prove that alcoholics can quit drinking without A.A.

- **Demand Uneven Standards of Acceptance**
Demand very different standards of acceptance and tolerance for statements and beliefs from opposite sides of an argument. This is a variation on the technique ofÂ *demanding an uneven burden of proof*.

  For example,

  - Demand that your opponents accept your statements and illogical beliefs in the name of open-mindedness and tolerance, while simultaneously attacking and shredding your opponents' statements and beliefs, and being very intolerant of other peoples' opinions.
  - Call other peoples' criticism of your policies and attitudes "prejudiced, narrow-minded, and intolerant", while freely criticizing your opponents' policies and attitudes.
  - Harshly criticize other people's religions and beliefs, while demanding that people respect your religion and not criticize it. (Alcoholics Anonymous does this one often.)
  - Complain that your opponents are inconsiderate and don't care whose feelings they hurt with harsh criticism, while having no such problems with criticizing others. (That is also an example of hypocrisy.)

- **Specious Argument**
When you can't think of anything better to say, make a specious argument.

  For example, during a debate about Mary McCarthy, the CIA analyst who revealed the existence of illegal secret CIA prisons in foreign countries where kidnapped people were held incommunicado and tortured, Ray McGovern, a former CIA analyst, called such activities war crimes and declared that McCarthy was obligated to reveal the existence of such activities. Richard Kerr, a former CIA assistant director and current Bush administration apologist, argued that if McCarthy had moral objections to such projects, she should have resigned her position and then criticized the policy but without revealing any classified information. Kerr didn't bother to mention that even if she resigned, McCarthy would still be barred by the National Secrets Act from revealing the existence of the secret illegal prisons and torture centers, so her resigning in silent protest would accomplish nothing.Â (PBS News Hour, 24 Apr 2006).

- **Spurious Agreement**
An utterance, typically with a strong emotional content, designed to establish a false sense of agreement:Â "Don't youÂ ***want***Â to live forever?"Â This is an attempt to placate an opponent in a debate.

  Amway recruiters ask, "Don't you want financial security?"

Bill Wilson taught Alcoholics Anonymous recruiters to use this technique on prospects who had religious beliefs that were different from Bill's:

> Your prospect may belong to a religious denomination. His religious education and training may be far superior to yours. In that case he is going to wonder how you can add anything to what he already knows. But he will be curious to learn why his own convictions have not worked and why yours seem to work so well. He may be an example of the truth that faith alone is insufficient.
> ...
> Admit that he probably knows more about it [religion] than you do, but call to his attention the fact that however deep his faith and knowledge, he could not have applied it or he would not drink.
> TheÂ *Big Book*, 3rd Edition, William G. Wilson, page 93.

Bill Wilson does not think that the prospect knows more about religion than he does â Bill thinks that the prospective new recruit is wrong about everything. Bill only pretends to agree with the prospect long enough to sell him on the A.A. religion.

Bill Wilson is actually saying that the other guy's religion is worthless because it didn't keep him from drinking. Bill stubbornly ignored the obvious implication that, by that logic,Â all of the relapsers in AlcoholicsÂ Anonymous prove that Bill Wilson's religion is also worthless.

- **Escape via Ignorance**
  When stuck with an unanswerable question, allude to an existing answer unknown to either party:Â *"Maybe I can't answer your point, but any of the Elders at our congregation could."*Â (But then the elders forget to come and answer the questions...)

  Similarly, you can dismiss all arguments put forth so far by arguing,Â *"I wish we had an expert here, who really knew about these things."*

- **Escape to the Future**
  When stuck with an unanswerable question, allude to an answer that will allegedly become known at a future date.

  Jehovah's Witnesses argue:Â *"Maybe I can't answer your point, but we Witnesses are told to 'Wait on Jehovah' when we encounter things we can't understand. He eventually provides us with the answers."*[8]
  Note that no time limit is specified.

  A defender of a particular brand of camera deflected criticism of the camera with the remark,Â *"Just pick up the camera and shoot with it and then decide."Â* â Which did not actually answer the questions and criticisms at all. The speaker imagined that people would like the camera, and not notice the defects and shortcomings, if they just handled and used the camera.

Escape via Relativism
Dismiss an irrefutable argument as simply a point of view:
"Well, that's just your opinion."
This can interrupt and sabotage a chain of logic.

Another common phrase is,
"Everybody has their own opinion"
â as if every opinion is backed up with equally valid or equally compelling evidence.

And another is,Â *"Anyone can present a pro/con to an argument."*

"Every point does not have equal weight. Lies should not get the same weight as truth."
== Daniel Zwerdling, PBSÂ *ExposÃ©*, 2007.08.28

"All opinions are not created equal."
== Tavis Smiley, PBS, in interview with Mary Wilson, 2012.12.14

A native who didn't understand how genetic analysis of people revealed the origins and migrations of the earliest human races said,Â "You have your creation myths, and we have ours. Why should your myths be more true than ours?"Â
The logical fallacy there is of course trying to assert that studying and decoding the human genome is merely a "creation myth".

A letter from an A.A. memberÂ criticized my analysis of treatment programs (A.A. versus non-A.A.) by writing:

> If there are 10 interpretations of an event, you ... accept the one that suits your beliefs, and ignore all the others.

The writer simply assumed that all opinions had equal merit, and that all interpretations of failed treatment programs' results were equally valid. He even ignored the fact that a Trustee of Alcoholics Anonymous World Services, Inc.,Â Doctor George E. Vaillant, Professor of Psychology at Harvard University, was the doctor who reported that his A.A-based treatment program had failed to help the alcoholics, and that, by Vaillant's own admission, for eight years his A.A.-based treatment program had an "appalling" death rate in spite of his persistent attempts to make A.A. produce good results. The critic also ignored the obvious fact that whether people are dead isn't just a matter of someone's opinion.

Other examples:

- "Leave AA on the table for those who choose to try it."Â â as if A.A. is just as good as any other treatment for alcohol or drug problems, and should get equal consideration.
- "The goal is to get sober â you can take 45 to Dallas or you can take 35 to Dallas â you still get to Dallas anyway."Â â as if A.A. is just as effective as any other treatment. It isn't.

There are several variations on thisÂ *escape via relativism*Â technique:

1. Declare that both sides of any issue should get equal representation, as if arguments for or against slavery or freedom have equal merit, and should get equal time and space. So should arguments for and against justice or injustice, peace or war, celibacy or child-molestation, racial discrimination or equality, or good or evil. Just demand that everything gets equal consideration. "We have to consider both sides of the issue now. The other side might have a point."

2. Demand that presentations and news coverage not be "biased". Again, both good and reprehensible positions should be given equal time and consideration, in the interest of "fairness". If one side has overwhelming evidence and good arguments in its favor, just don't mention all of that stuff â only feature a few arguments from each side, for "balanced" coverage.

3. Declare that the issue is "controversial". The goal is to leave the impression that we can't really decide the issue and arrive at a conclusion, and determine the truth, because there are just too many conflicting opinions. (As if all of those different opinions were equally valid and really worth considering.)

   That ploy usesÂ ***antirationalism***. Antirationalism is the idea that there are no such things as valid, reliable facts or hard indisputable evidence, just various conflicting opinions. Speakers who are pushing antirationalism argue thatÂ "It's just my opinion versus your opinion, and it's all so controversial that we can't decide anything for sure. You never really know anything for sure, do you?"

   And the people who don't wish for anything to be decided are the people who do not have enough facts, or any facts, to back up their arguments and support their opinions, and who are losing the debate.Â "So let's agree to disagree, and not decide anything,"Â they say.

   For example, when an A.A. booster was presented with evidence that A.A.-based treatment does not work, he replied:

   > "Yes you are rite [*sic*.] you can find almost anything on the internet, but just because it there doesn't mean it's true. There are many who claim there was not Holocaust, that it was all in the Jews imagination. I got in a rather heated conflict with someone over that. I said that I guess the numbers tatooed on my father's arm was his imagination. I am of the belief that I could care less how you get sober as long as you get there. If you believe that sitting in a corner 3 hours a day repeating multiflication tables will get and keep you sober â you try it and it works then repeat all you want â it's ok â however if it dosn't work then try something else â till you find what does. Everyone is different â and everyone should be able to choose for themselves which type of recovery road they want to take."
   >
   > http://community.aetv.com/service/displayDiscussionThreads.kickAction?as=119137&w=267410&d=341884&d-1169404-p=10

   Yes, everyone should be able to choose their recovery program â I'm very opposed to sentencing people to A.A. meetings â but people should be told the truth about A.A. recovery, and the truth about the other treatment modalities too. Telling themÂ *Rarely have we seen a person fail who has thoroughly followed our path*Â is just lying to sick people.

4. Claiming that experiences are relative is another variation on the same escape:

- "Oh, that was just your experience. Other people experienced the opposite."
  As in,
  "Maybe you got robbed and raped by that cult, but that was just your experience. Tom, Dick, and Harry say that they really like the organization."Â
  (Yeh, and they especially like itÂ when they get to be the privileged old-timer guys who are doing the robbing and raping of newcomers...)

5. Another variation on this technique is dismissing criticism of something by saying,Â "Your mileage may vary...", as if someone's bad experiences with something are just a personal problem, irrelevant to other people.
   As in,Â "Sally may not have liked it, but Joe liked it..."

6. And another variation on this technique is to dismiss someone's statements or complaints as "just an opinion", or "just a viewpoint". Recently, a Veterans' Administration spokesman dismissed the complaints of a crippled, blinded veteran of the Iraq War who was not getting full benefits for his disabilities with this condescending statement,Â "Well, it's perfectly understandable that he would have that view."Â (National Public Radio,Â *All Things Considered*, 25 June 2007)

- **Escape via Irrationality**
  Dismiss an irrefutable argument by claiming a magical or non-logical answer.

  Claim that,

  - *"Of course it defies simple logic â it's miraculous."*
  - *"It's a paradox."*
  - *"It's spiritual."*
  - *"It's supernatural."*
  - *"It can't be explained in normal terms."*

"I find every sect, as far as reason will help them, make use of it gladly; and where it fails them, they cry out, 'It is a matter of faith, and above reason.'"
John Locke,Â *An Essay Concerning Human Understanding*, 1690

One Alcoholics Anonymous propagandist wrote:

> Certainly, however, the spiritual dimension that is so strong in AA is at odds with the scientific, medical tradition. Says Dr. Ken: "We [physicians] tend to be analytical. Spirituality is a gut or heart-felt experience that certainly can't be scientifically studied and falls outside our training."
> Â Â Â Dr. Whitfield agrees that AA's effectiveness can't be explained in scientific terms, or tested in controlled studies.
> *Doctors in A.A.; the profession's skepticism persists, but MDs in Alcoholics Anonymous say the 12-Step program could benefit all physicians*, C. Thomas Anderson, American Medical News, Jan 12, 1990 v33 n2 p33(2)

But the simplest, most obvious reason that A.A.'s effectiveness cannot be explained or measured in valid scientific or medical tests is becauseÂ ***there is no effectiveness to measure***Â â A.A. doesn't work at all. To explain that A.A. works in some mystical, magical manner that cannot be measured or explained is dishonest. If A.A. works, then groups of alcoholics who get A.A.-based "treatment"

should have a lower death rate than other groups of alcoholics who get no "treatment" at all.Â They don't. And A.A. members should have a lower binge-drinking rate.Â They don't.

Inducing pleasant "gut or heart-felt experiences" is not at all the same thing as curing alcoholism or saving the alcoholics' lives â which is supposed to be the goal of A.A., but which A.A. does not actually do. So the author is also using the propaganda tricks of changing the subject,Â diverting attention away from the point, and pulling a bait-and-switch stunt there: First the goal is to save the lives of alcoholics by making them quit drinking, and then suddenly the goal is to induce "gut or heart-felt experiences" that can't be measured.

- **Pack the House**

â with crowds of sycophant followers, shills, and hand-picked audiences.

Politicians and phoney gurus often come attended by an entourage of fawning sycophants, because it makes them look much more important, like a real leader.

In November of 1922, the Lauzanne Conference was assembled to revise the Turkish Peace Treaty. When the British and French representatives, British Foreign Secretary Lord Curzon and French Prime Minister M. PoincarÃ©, went to see the very new Italian Prime Minister Benito Mussolini (who had been in office only a few weeks),

> Â Â Â There, in the Hall of the Grand Hotel, Mussolini awaited them. He held in his hand a thick black stick, which at that time never left him, and was surrounded by a phalanx of young Fascist secretaries of pugnacious appearance, dressed in black shirts and black fezes with long tassels.
> Â Â Â It was a situation for which nothing in the past experience of the French and British statesmen had prepared them. An exchange of glacial salutations took place. Then followed a constrained silence. The Duce broke this by suggesting that his visitors might like to dine after their journey.
> *I Know These Dictators*, George Ward Price, page 217.

Politicians also like to pack audiences. Richard Nixon was infamous for bussing in loads of Young Republicans to pack the stands at the Republican National Convention so that the TV cameras would see crowds of enthusiastic young people cheering for Nixon. George W. Bush always packs audiences with hand-picked, loyalty-checked sympathizers â he refuses to allow dissenters anywhere near his rallies and conventions. He isolates them in small fenced so-called "Free Speech Zones" a mile or so away. (G. W. Bush has somehow forgotten that all of the United States of America is supposed to be a free speech zone.)

The cult leader Frank Buchman used a variation on this trick: Move the debate to a favorable forum. When someone was arguing with him, Buchman declared:
Â Â Â Â "If you have any objections, the proper place to raise them is on the convention floor. I will debate you there."[21]
But the Moral Re-Armament convention was packed with Buchman's loyal followers, of course. No matter what Buchman said, the audience would cheer and yell its approval. With the audience acting as the judge and jury of the debate, Buchman couldn't lose.

Politicians also like to use planted shills to ask favorable questions in fake town hall meetings or press conferences. George W. Bush is notorious for doing that. Recently, Bush's favorite White House shill â "James Gucker" or "James Gannon" â was a total fraud â a male homosexual "escort", not a

news reporter â who attended White House press conferences while using an aliasÂ *(really great White House security there, yes?)*, and then asked G. W. Bush easy cream-puff questions likeÂ "How do you manage to deal with the Democrats who are out of touch with reality?"

Over in the Alcoholics Anonymous world, Bill Wilson collected sycophant followers like a dog collecting fleas. AsÂ Henrietta Seiberling complained:Â "he has his henchmen & ingratiates himself with those in the dark..."

- **Embarrass Your Opponent**
  Especially, ask embarrassing questions that your opponent cannot answer.

Back in the 1930s, the Oxford Group cult was notorious for self-promotion and recruiting by using vicious tactics like Beverly Nichols bragged about in this story. (The embarrassing questions that Oxford Groupers liked to ask usually pertained to people's private sexual habits, like masturbation.) Here, Nichols was trying to sellÂ the Oxford Group practice of public confessionsÂ to a vicar:

> ... We will assume that we are addressing somebody who is, at least in theory, a Christian, in order to emphasize the importance of the Group's attitude to confession and the consciousness of sin.
> Â Â Â They have a practice they call 'sharing,' which means that they confess to one another and not only to God. A lot of cheap laughs have been gained at the expense of the Group through a misunderstanding of this practice.
> Â Â Â 'I regard it as pernicious,' said a very bright young vicar to me, after I had come down from Oxford. 'It might lead to very great abuses.'
> Â Â Â 'Have you ever tried it?'
> Â Â Â 'Certainly not.'
> Â Â Â 'Why not? Because it's so unpleasant?'
> Â Â Â He began to grow red in the face. 'Are you suggesting that I shirk confessing my sins in prayer?'
> Â Â Â 'No. But will you give me a quite honest answer to a question?'
> Â Â Â 'Yes,' he said rashly.
> Â Â Â 'Very well. And when you've answered it, I'd be glad if you'd tell me, equally honestly, whether it was easier to tell the truth to me, to a man, face to face, or whether it would have been easier to shut your eyes and mumble a few polite phrases to God.'
> Â Â Â 'You are extremely offensive,' said the vicar.
> Â Â Â 'Not nearly so offensive as I'm going to be.'
> Â Â Â I then asked the question.
> Â Â Â I did not get an answer. But by the horror in that man's eyes, I knew the answer he would have given if he had dared.
> *The Fool Hath Said*, Beverly Nichols, page 163-164.

Beverly Nichols did not actually prove that there was any virtue in the Oxford Group's practices; nor did he even supply a good argument; he merely shut down the debate by embarrassing the other fellow.

(The Oxford Group taught Beverly Nichols how to be a really insufferable arrogant little prig who smugly asserted that he had unquestionable truths and who didn't care how much he hurt other

people's feelings in his pursuit of victory in arguments. But later, Nichols completely reversed his opinion of the Oxford Group. He discovered that his conversion to the Oxford Group had all been based on a fraud â thatÂ the Oxford Group had deceived him into joining, and that the whole cult was just a big con.)

- **Obtuseness â Refuse to See the Point**

Just stubbornly refuse to see your opponent's points, no matter how good his arguments may be. When an opponent makes a point, just ignore it and pretend that it doesn't exist. Pretend that you didn't hear it; do not in any way recognize that it even exists.

The psychological escape devices ofÂ *Minimization and Denial*Â figure in here too. When confronted with undesired facts, just declare that it's all a pack of lies, and those are just unimportant details, and that stuff doesn't matter anyway.

- When presented with irrefutable facts, a stubbornÂ *true believer*Â declares,Â *"I see it another way."*Â Or,Â *"I do not find the evidence convincing."*

- *"There is still room for doubt. Somebody else might have done it. You cannot prove that the crime was not really committed by little green men from Mars."*

- **fake it til ou make it lying? again , example please**

  You didn't give me an example of how faking it til you make it is bad/lying. I know all your other "facts" â you really don't need to repeat yourself â seriously â you have made your points clear. I would like an example, however, on the faking ... part. Because I really do use this technique often and am wondering how it is lying.
  http://community.aetv.com/service/displayDiscussionThreads.kickAction?as=119137&w=267410&d=341884&d-1169404-p=7

- When presented with actual documented facts, argue:

  "What I see here is opinion â the same thing can be printed on a web site for the other side. There is no proof of anything here."

- "I Have never once heard the word God in four years and hundreds of meetings. I live in NYC and maybe it's different here."

  â when every A.A. meeting is begun by reciting the religious dogma fromÂ *Big Book*Â pages 58 through 60, which includes the 12 Steps, where people surrender their wills and their lives to God and beg God to save them and remove their defects, and God supposedly talks to them in sÃ©ances and gives them power... and also restores them to sanity. Six of the 12 Steps refer to "God" or "Him" or your "Higher Power", and the 12 Traditions refer to "God" some more, but this woman insists that she never heard the word "God" in four years of A.A. meetings.Â
  http://community.aetv.com/service/displayDiscussionThreads.kickAction?as=119137&w=267410&d=341884&d-1169404-p=8

- Well, all I know is, I like it.
  Well, all I know is, it worked for me.

That line attempts to disregard all of the facts, and just stubbornly cling to one sentiment as the final word on the matter.

- In the last days of Mitt Romney's Presidential campaign, he attacked President Obama's bail-out of the auto manufacturers, and declared that Jeep was going to move its manufacturing to China. The president of American Motors gave a press conference where he refuted the claim and said that the American factories were staying where they were, and even adding workers.

  The Romney campaign responded, ""I stand by my claim."

*Willful ignorance*Â is another flavor of such obtuseness.

This technique naturally leads intoÂ *create a diversion*: Just change the subject and talk about something else.

- **Laugh It Off**

When somebody says something that you don't like, just laugh it off. Refuse to take it seriously. Imply that whatever your opponent just said is silly, absurd, ridiculous, brain-damaged, or just awfully darned funny.

This technique is obviously closely related toÂ *Obtuseness*, and also toÂ *Humor, Ridicule and Satire*, but it isn't quite the same as either of them.

Back in the 1930s,Â the Bishop of Durham told a storyÂ about a foolish member of the Oxford Group who pledged his love to one girl on Friday, but who suddenly believed that he had received "Guidance" from God to propose marriage to a different girl on the following Monday. The father of the first girl complained to the Bishop:

> Â Â Â "*The young man had written a love-letter to his daughter on the Friday, but on the Monday he had been 'guided' to propose to another girl.* Â Â Â 'The father said he wanted a horse-whipping, for his sense of decency should have come in to check such ungentlemanly conduct. Â ... Â When I told my story at the Group meeting, it raised a laugh; but it is a serious objection, none the less, for the story is true."
> *One Thing I Know*, A. J. Russell (1933), pages 291-292.

The other Oxford Group members did not wish to seriously consider the flaws in theirÂ occult practice of GuidanceÂ (imagining that they were receiving infallible messages from God), so they just laughed at the sad story of a girl who was hurt by an Oxford Group member who thoughtlessly and inconsiderately followed the sudden impulses that he believed he had received through psychic means. They just wouldn't, or couldn't, sincerely consider the merits of the criticism, so they just laughed.

A.A. members use this technique too:

- "Â BUT ON THE LIGHTER SIDE, THIS WAS SUCH OUTRAGIOUS IT MADE ME

LAUGH.

- "It got absurd. I was laughed at, literally laughed at, by this counselor who sounds nothing short of a hyenna when I called what they're doing to people sad and ridiculous.

- "When i tell peopleÂ in meetings that Bill Wilson died of nicotine addiction which does not sound too spiritual (most are shocked) and the womanizing thing, they just laugh about it."

- "I went to a meeting one dayÂ a bit late late. I was the only newcomer there. It had been decided not to hold a regular meeting because there were no newcomers. I sat at the table with a bunch of toking smokers who had been around the program for a while. I stated I did not understand how they could smoke if they were leading spiritual lives. I can't remember what was said in response, but I can tell you they belittled me and laughed at me. These people say they are in the business of saving lives. But I guess not their own."

- "But I thank youÂ for making me laugh and see how fucked up one single man can be."

- "Thanks So much! ... For the morning laughter with my coffee this morning!

- "I found your web siteÂ to be the funniest thing I have seen in a while.

- "the minute you sayÂ that you have recovered from alcoholism you get laughed at, sneered at, and told you're heading for relapse haha.

- "Your bait and switch con game page gave me the best laughsÂ I've had all week."

- "As soon as I divulged that "The God of my understanding" is God AlmightyÂ (God The Father, God The Son, God The Holy Spirit) â I noticed a HUGE change. I experienced being ostrasized, I was keenly made aware that I was the "joke in the room".... people laughed when I "shared" anything. I saw people in the room nodding their head, rolling their eyes at the ceiling, snickering, putting their finger up to their nose and looking in my direction.

- "You gotta be kidding me? Snitches to report who is attending or not attending??? Hahaha!!

- "Finally, your criticism of the founders of AA is laughable.Â They're human beings for god's sake.

- "I doubt seriously if you have many believers in what you write. It is so off the wall as to be laughable.

- "All you've done is give me a good laugh and a quick way to waste 15 minutes by replying to your response.

- "I get a laugh out of your paper every time I find my self searching for answers on the Internet. Your attempt to bam the 12 step program and the fellowship in the same content is laughable

- "I have just read through "The Orange Papers" and am intermittently laughing my ass off or shaking my head saying, "God, that poor f-ed up soul who wrote this needs help!".

- "Subject: Too funny
Your site cracks me up.

The amount of misinformation and your obvious lack of understanding of A.A. and alcoholism is laughable.

- "No one makes you believe anything either. It is no cult.either. To say it is is ludicrous and laughable.
- "YOU have labelled our fellowship.... "Nazi Cult Religion". Everyone laughed and then we proceeded to discuss more important issues
- "thank you for the great laugh by calling aa a cult.
- "Bill acknowledged he wasn't a saint. Why are you pointing that out after he did? (I am laughing as I write this)
- "Really a cult? How funny- thanks for the laugh though.
- "As usual, you have succeeded in making us all laugh.
- "Thanks for the good laughs, now why don't you get a copy of the big book and study it and find out what AA is really about.

- **Dominate the Conversation, Talk Non-Stop, and Interrupt Constantly**
  Just never quit talking, never let up, never give your opponent a chance to get a word in edgewise. Even shout and scream to drown out the voice of your opponent.

  A variation on this technique isÂ *Constant Interruptions*Â â just interrupt your opponent every time he starts to make a point. For example, shout "Hold it a second! Hold it a second!" whenever your opponent starts to make a point, and then shout a stream of other things â anything â to keep him from finishing his sentence.

  This technique is closely related toÂ *Obtuseness*. It is a technique for simply not hearing your opponent, and it is an attempt to keep anybody else from hearing him either.

  This technique is not allowed in formal debates, but you hear it in talk radio and TV panel shows a lot.

  This debating technique can be combined with other debating techniques toÂ *Talk Non-Stop*Â ANDÂ *Interrupt Your Opponent*whenever he starts to make a point, ANDÂ *Divert Attention*Â by changing the subject ANDÂ *Launch Another Personal Attack On Your Opponent*Â to change the subject and keep him from making his point.

  This technique also works well with the next technique,Â *Bullying and Intimidation*.

- **Escape via Bullying and Intimidation**

  Whenever you are losing an argument,

  - Bluster, yell, scream, act threatening, make menacing gestures.
  - Glare, growl, and make other hostile facial expressions.

- Use hints of violence to intimidate and silence your opponent.
- Make your opponents think that you are dangerously mentally unhinged and will explode in a homocidal rage if they say something that upsets you.
- Act like Bill O'Reilly and scream,Â *"Shut up! Just shut up!"*Â whenever someone says something that you don't want to hear.

> The Argument from Intimidation is a confession of intellectual impotence.
> == Ayn Rand (1905â 1982)

This technique works best when your debating opponent is half your size. Be very careful when trying this technique on people who are much larger than you are â they might not put up with it.

- **Shut Down the Debate**
  When you can't win the debate, just stop it:

  - "Don't be disrespectful."
  - "I'm not going to argue with you."
  - "Don't be sacreligious."
  - "Quit wasting my time with your nonsense."
  - "That isn't worth discussing."
  - "I don't have the time for this bullshit."

  Obviously, this trick works best in an uneven situation where one side has the power to shut down the debate, as in a parent arguing with a child, or a boss with an employee, or a powerful politician with a common citizen.

Footnotes:

1)Â RE: The "ancients", meaning the Roman Catholic Church authorities in the Middle Ages, were "biased and unreasonable" about the "realm of the spirit." They would not tolerate any "spiritual", religious, or philosophical ideas that were different from their own. They opposed science because science described the world in a different way than the Bible did, like Galileo saying that Jupiter had moons, which the authors of the Bible failed to mention, and science asked people to use their own eyes and brains to see the world for themselves, rather than to have blind faith in what was written in the Bible, or to have blind faith in what some priest said.

If Jupiter really has moons, and Galileo is right and the Bible is wrong, then that destroys the Church's claims that the Bible is the infallible, indisputable Word of God, and that the Church has a monopoly on God and Truth.

The ideas, "Think for yourself", "see for yourself", and "trust your own senses, rather than what the 'elders' tell you" were revolutionary ideas â revolutionary in both the religious and political spheres. They led to the overthrow of absolute authorities like The Church and The King, and eventually led to the establishment of the European democracies. Perhaps the most subversive idea that Martin Luther came up with was the idea that you could communicate with God directly, rather than having to use a priest as an intermediary. That was the kind of stuff about which the Church wasÂ *really*"biased and unreasonable," because that would ultimately break the power of the Church â the Church would lose its monopoly on God.

2)Â *Insiders Cash Out*,Â *Newsweek*Â Magazine, Jan 21, 2002, page 23.
Also: the NBC Evening News, and ABC Evening News, both on February 7, 2002.
And: theÂ *60 Minutes*Â television news program, April 14, 2002.
The Newsweek article gives these figures:
Ken Lay with $37,683,887,
Jeff Skilling with $14,480,755,
and Lou Pai with $62,936,552.
The NBC Evening News listed Andrew Fastow with $30 million, and the ABC Evening News listed Michael Kopper with $30 million, and stated that Jeffrey Skilling had gotten $70 million from the sale of his worthless hyped Enron stock when he quit Enron.
*60 Minutes*Â described how Rebecca Mark cashed in her Enron shares for $79 million after robbing the nation of India for everything she could get.
The National Public Radio morning news on May 8, 2002, reported that Senate testimony the previous day revealed that Andrew Fastow had made $45 million from deals with off-the-books Enron subsidiaries.

The fascinating bookÂ *The Smartest Guys in the Room*Â by Bethany McLean and Peter Elkind gave the following numbers:

- Ken Rice, $53 million (page 299), later up to $70 million (page 335)
- Tom White (G. W. Bush's Secretary of the Army) $14 million (page 302)
- Lou Pai sold $250 million worth of Enron stock, more than anybody else at the company (page 334)
- Jeff Skilling $70 million (page 350)
- Andy Fastow got $60.6 million out of his "Special Purpose Entities" (off-the-balance-sheet limited partnerships) which he used to hide Enron losses from stockholders and investors. He had earlier said that it was $45 million, but he was understating the facts. (page 366)

TheÂ *Nightly Business Report*Â on public television, 19 February 2004, stated that Jeffrey Skilling was charged in the government's indictment with getting $63 million from the sale of his Enron stock just four months before Enron collapsed in bankruptcy.

That's quite aÂ pump-and-dumpÂ scheme they pulled...

---

3)Â Bill Wilson really had a thing about his wife nagging him. In theÂ *Big Book*, he also wrote these instructions to wives of alcoholics:

> The first principle of success is that you should never be angry. ...
> Â Â Â Our next thought is that you should never tell him what he must do about his drinking. If he gets the idea that you are a nag or a killjoy, your chance of accomplishing anything useful may be zero. Â ... Â This may lead to lonely evenings for you. He may seek someone else to console him â not always another man.
> TheÂ *Big Book*, 3rd Edition, page 111.

So don't nag your hubby about his drinking, or else he might become moody and resentful and go spend the night with his mistress (like Bill did).

---

4)Â You want logic about Nessie? How about:

1. The small coelacanth had two entire oceans to hide in, while the large Loch Ness monster only has a small lake. (Loch Ness is small, compared to the American Great Lakes, or Lake Victoria in Africa, or Lake Baikal in Russia, none of which seems to host a living dinosaur.)
2. The same problem applies to their food supply. Nessie would only have the fish in a lake to eat, while the coelacanth had an entire ocean to munch on.
3. Then the food supply problem gets much worse: To avoid extinction, there would obviously have to be at least two living Loch Ness monsters at all times, so they would need twice as much fish to eat. But then they would have offspring, and those kids need to eat too, so now they need even more food. Somebody did the math on it and figured out that they would strip the lake of all fish pretty quickly. There goes the monster. Starvation will kill it.
4. The population problem is much worse than that, even. A species that is reduced to two adults and two offspring will probably die out. Lack of genetic diversity. Or some random disease, sometime in the last 60 million years. Or just bad luck â lose one of the breeding pair due to an accident, and it's all over. Or a drought for a few years, or something. Or what if, for just one generation, they have only male offspring? That's almost a certainty, eventually. Lots of families have 3 or 4 sons, and no daughters, just by random chance. If that happens to the Loch Ness family just one time, ever, at any time in history, then they are extinct. The real rules of the game of life say that you have to have lots of individuals, at least thousands, and preferably millions or billions (like us), if you want your species to continue.
5. The Loch Ness has been searched, very thoroughly searched, using fancy electronic equipment, and still, no monster.
6. On the other hand, once some ichthyologists learned that coelacanths really did exist, by seeing just one dead, decomposing one, they posted a reward for some more, and within a dozen years, the fishermen brought them several. Seek ye and ye shall find, if it exists. People have been looking for Nessie for a long time, and still, no Nessie.
7. If Nessie is really left over from the age of the dinosaurs, she would probably be a cold-blooded reptile. But the Loch Ness is a very cold lake, not a tropical swamp. Nessie would freeze up and be stiff as a board, unless she evolved anti-freeze blood. If Nessie is a warm-blooded animal, then she needs to eat and burn even more fish to keep her body warm. Now we are back to the food supply problem.
8. If Nessie really lives in the North Sea, and just visits Loch Ness through the river that flows from the Loch to the North Sea, then it is unlikely that no one ever saw Nessie in the river. The river isn't big or deep, so it isn't a good hiding place for a large dinosaur. And the North Sea is notorious for being very cold, so now we are back to the body temperature problem.

9. Animals die and leave corpses or bones. Nobody has ever found even one little bone from any Loch Ness monster.

Really, it would be a lot easier to believe in the Tahiti Lagoon Monster, or a Guamanian Godzilla that hides at the bottom of the Marianas Trench, but nobody is talking about one of them.

---

5)Â card-carrying Communists".
Several days later, the number was 81.
McCarthy never produced any of those lists, not even when he was pointedly asked to do so by the Senate subcommittees that were investigating McCarthy's charges. Eventually, after a period of national terror that hurt a lot of innocent people, Joe McCarthy was censured by the U.S. Senate for bad conduct.

15)Â Tom Driberg,Â *The Mystery of Moral Re-Armament*, pages 112-113.

16)Â The Chris Matthews Show, NBC, 6:30 AM Saturday Morning, May 8, 2004. George W. Bush went to Ohio and spoke before a friendly, invitation-only crowd. Obviously, that creates the appearance that Bush is popular and everybody likes him.

17)Â Jay Stevens,Â *Storming Heaven*, page 8.

18)Â Ernest Kurtz,Â *Not God*, page 28.

19)Â Jon Atack,Â *Scientology: Religion or Intelligence Agency? The view from the lion's den*, A paper by Jon Atack, delivered at the Dialog Centre International conference in Berlin, October 1995.

20)Â Cornel West,Â *Democracy Matters*, page 147.
West gives us a good discussion of how much Emperor Constantin actually damaged and perverted Christianity when he made it the official state religion of Rome.

21)Â Arthur Strong,Â *Preview of a New World*, page 126.

Bibliography:

"*The Big Book*", really:
Alcoholics Anonymous, Third Edition.
(written by William G. Wilson, Henry Parkhurst, Joe Worth, and 40 or so others; published as 'anonymous.')
Alcoholics Anonymous World Services, Inc. New York, NY.
ISBN: 0-916856-00-3

Dewey: 362.29 A347 1976

Alcoholics Anonymous, Fourth Edition Â Â published as "anonymous", but really written by William G. Wilson, Henry Parkhurst, Joe Worth, and many other people.
Alcoholics Anonymous World Services, Inc. New York, NY, 2001.
ISBN: 1-893007-16-2
Dewey: 362.29 A347 2001

"12X12" =
Twelve Steps and Twelve Traditions, by 'anonymous' ; (The real authors were William G. Wilson andÂ Tom Powers.)
Alcoholics Anonymous World Services, Inc. New York, NY, 1952, 1953, 1984.
ISBN: 0-916856-01-1 (larger older hard cover edition, 1984)
LCCN: 53-5454
also:
Alcoholics Anonymous World Services, Inc. New York, NY, 2000.
ISBN: 0-916856-06-2 (smaller hard cover edition, 2000)
LCCN: 53-5454
Dewey: 362.2928 T969 1965

*Not-God: A History of Alcoholics Anonymous*Â Â Â Ernest Kurtz
Hazelden Educational Foundation, Center City, MN, 1979.
ISBN: 0-899-486065-8 or ISBN: 0-89486-065-8 (pbk.)
LC: HV5278
LCCN: 79-88264
Dewey: 362.2/9286 or 362.29286 K87 1979
This is a very pro-A.A., toe-the-party-line history of Alcoholics Anonymous, but it is still a valuable resource for a wealth of historical facts and details.

*The Demon Haunted World: Science as a Candle in the Dark*Â Â Â Carl Sagan
Random House, New York, 1995.
ISBN: 0-394-53512-X
Dewey: 001.9 S129d
This book is a beauty. Carl Sagan always was easy to read, highly informative, and clear, and this book lives up to his reputation. This book includes "the baloney detector", which is a list of deceitful propaganda techniques that gave me the idea for this web page.

*How To Lie With Statistics*Â Â Â Darrell Huff
W. W. Norton & Company, New York and London, 1954, 1982.
ISBN: 0-393-31072-8
Dewey: 519.5 H84
This is a beautiful little classic that explains a lot of the deceptions and propaganda stunts that you can pull with statistics, and some other methods, too, like "The Gee-Whiz Graph", "The One-Dimensional Picture", and "Post Hoc Rides Again". Recommended.

*Propaganda, the Formation of Men's Attitudes*Â Â Â Jacques Ellul
Alfred A. Knopf, New York, 1965.

Brainwashing, From Pavlov to Powers, Â Â Edward Hunter
Originally published by Farrar, Straus, & Cudahy, Inc., 1956.

Reprinted by The Bookmailer, Inc., 30 West Price Street, Linden, New Jersey, 1958, 1965.
LCCN: 56-7817 and 60-53397
Dewey: 131.33 H91
This book is very good. It is a classic. And the book is fascinating and a good read. It really gives you the feeling of being there and going through the brainwashing to which the American, British, and other United Nations soldiers were subjected during the Korean War. It also clearly explains just how the brainwashing worked and how some men succumbed to it, and some successfully resisted it. It also turns out that this was the first book on Communist brainwashing published, and Hunter was actually the author who coined the term "brainwashing" â it's just a translation of the Chinese phraseÂ *Hsi Nao*, which Mao Tse Tung (aka Mao Zhe Dhong) and gang used to denote the idea of washing away the vestiges of the old system (literally "cleansing the mind") in the process of being re-educated to assume one's place in the new Communist society.

*The Hidden Persuaders*Â Â Â Vance Packard
David McKay Company, Inc., New York, 1957.
Dewey: 659.1 P12
This book is an old classic. It was quite revolutionary in its day. It particularly exposed how the modern mass media, like TV, were using sophisticated psychological manipulation of the audience's minds to sell products. (Gasp! You mean they do that?)

*Age of Propaganda, The Everyday Use And Abuse of Persuasion*Â Â Â Anthony Pratkanis and Elliot Aronson, University of California at Santa Cruz.
W. H. Freeman and Co., New York, 1992.
ISBN: 0-7167-2210-0 (hardcover), ISBN: 0-7167-2211-9 (paperback)
Dewey: 303.375 P912a
This book is especially clear and readable. Recommended.

*The Bush Dyslexicon, Observations on a National Disorder*Â Â Â Mark Crispin Miller
W.W. Norton and Company, New York and London, 2001.
ISBN: 0-393-04183-2
Dewey: 973.931 M649b 2001

*The Betrayal of America, How the Supreme Court Undermined the Constitution and Chose Our President*Â Â Â Vincent Bugliosi
Thunder Mouth Press / Nation Books, New York, 2001.
ISBN: 1-56025-355-X
Dewey: 342.075 B931b 2001

*Supreme Injustice, How the High Court Hijacked Election 2000*Â Â Â Alan M. Dershowitz
Oxford University Press, Oxford and New York, 2001.
ISBN: 0-19-514827-4
Dewey: 342.075 D438s 2001

*Stupid White Men... and other Sorry Excuses for the State of the Nation*Â Â Â Michael Moore
ReganBooks, an imprint of HarperCollins Publishers, New York, 2001.
ISBN: 0-06-039245-2
Dewey 973.929 M823s 2001

Funny, true, a good read. Michael Moore's slant on everything from the Bush family coup to the Dumbing of America.

*The True Believer, Thoughts on the Nature of Mass Movements*Â Â Â Eric Hoffer
Harper & Rowe, Publishers, New York and Evanston, 1951.
Dewey: 301.1582 H69
This book is a blockbuster. Hoffer wrote it half a century ago, but it reads like a description of this afternoon's latest cult. This is one of those beautiful all-time classics that we see too seldom. Quotes:

- hatred as a unifying force
- effective cult doctrines

*In the Sleep Room*Â Â Â Anne Collins
Key Porter Books Limited, Toronto, Ontario, Canada, 1988, 1997.
ISBN: 1-55013-937-0
LC: RC339.52.C34C64
LCCN: C97-932042-9
Dewey: 616.89'0092 or 616.89 C712i 1997
Quite a blockbuster. Documents immoral and illegal research into mind control and brainwashing financed by the CIA in Canada. See theÂ description above.

*Acid Dreams: the CIA, LSD, and the sixties rebellion*Â Â Â Martin A. Lee and Bruce Shlain
Grove Press, 1985.
ISBN: 0394550137
ISBN: 039462081X (1st Evergreen ed.)
LC: HV5822 .L9L44 1985
and
*Acid Dreams: the complete social history of LSD: the CIA, the sixties, and beyond*Â Â Â Martin A. Lee and Bruce Shlain
Evergreen Press, 1992.
ISBN: 0802130623
LC: HV5822 .L9L45 1992
This book is fascinating. It tells how the CIA was one of the first investigators of LSD. They hoped it would make a great truth serum, or at least a good incapacitating agent â something that would render enemy soldiers helpless, and give us "war without killing". They did a lot of experimenting with it, trying it on everybody from themselves to unaware civilians in San Francisco. They even gave Ken Kesey his first dose. So bone up on your history, kiddies. Before there was the Grateful Dead and the Merry Pranksters, there was the CIA.

*Storming Heaven: LSD and the American Dream*Â Â Â Jay Stevens
The Atlantic Monthly Press, New York, 1987.
ISBN: 0-87113-076-9
LC: HV5822.L9S74 1987
LCCN: 87-1191
Dewey: 306.1
A large and complete history, from a fair and balanced viewpoint. A fascinating stroll down memory lane for some of us.

*The Making Of A Moonie: Brainwashing Or Choice?*Â Â Â Eileen Barker
Basil Blackwell Publisher Ltd., Oxford, UK, 1984.
ISBN: 0-631-13246-5
LC: BX9750.S4B37 1984
LCCN: 84-12414
Dewey: 289.9 B225m
Quite good. Rather than just sensationalizing the Moonies, or grandly proclaiming that cults can brainwash people in a few days, like some extremist anti-cult people and professional "deprogrammers" do, the author really delves into how the recruiting and indoctrination mind games work, and how much the victim cooperates with the program (or doesn't cooperate). The author also reveals that the recruiters' success rate was actually only about 0.005%Â (page 147). Obviously, most people had no problems resisting the mind games. The author even gets into psychoanalyzing the members, revealing that many of them had mental problems before joining the Moonies, and suggesting that that was why they joined. This book is a breath of sanity in a field that needs more.

*Frank Buchman's Secret*Â Â Â Peter Howard
Doubleday & Company, Inc., Garden City, New York, 1961.
Dewey: 248 H85f
More praise of Frank Buchman from Peter Howard. Peter Howard is the man who took over the leadership of Moral Re-Armament when Frank Buchman died. As you can imagine, he was a true believer and had nothing but praise for Buchman. This book is some of the most outrageous, grandiose, propaganda you will find â cult propaganda written by one of the cult leaders. Some pretty intense garbage. If you wish to look straight into the mouth of the Beast, this book will give you a good view. Some quotes:

- either/or propaganda technique
- unprovable statements

*Dynamic Out Of Silence: Frank Buchman's relevance today*Â Â Â Theophil Spoerri
Grosvenor Books, London, 1976.
Originally published asÂ *Dynamik aus der Stille*, Caux Verlag, Luzern, Switzerland, 1971.
ISBN: 0-901269-19-0
Pure propaganda. A falsified and sanitized history of Frank Buchman and his various "movements".

*"12-Step programs help maintain abstinence"*Â Â Â R. Fiorentine
The Brown University Digest of Addiction Theory and Application, Sept 1999, v18 i9 p1.

*"Debating with Jehovah's Witnesses"*Â Â Â Timothy Campbell
http://members.aol.com/beyondjw/dwjw.htm

*Oxford and the Groups*Â Â Â Rev. G. F. Allen, John Maud, Miss B. E. Gwyer, C. R. Morris, W. H. Auden, R. H. S. Crossman, Dr. L. P. Jacks, Rev. E. R. Micklem, Rev. J. W. C. Wand, Rev. M. C. D'Arcy, S.J., Prof. L. W. Grensted; Edited by R. H. S. Crossman
Basil Blackwell, Oxford, 1934.
LC: BV4915.C7
This is a great little book; very informative. It consists of essays from both leaders of the Oxford Groups like Rev. G. F. Allen, and criticisms of the Groups from critics like R. H. S. Crossman. It gives you a first-hand

look at the Groups from several viewpoints, a snap-shot in time of the thinking of contemporaries, before Buchman's public praise of Adolf Hitler.

*The Fine Art of Propaganda: a study of Father Coughlin's Speeches*Â Â Â The Institute for Propaganda Analysis; editted by Alfred McClung Lee and Elizabeth Briant Lee
Harcourt, Brace and Company, New York, 1939.
LC: HM263.I54
A great little book that disectsÂ the hate-mongering speeches of Father CoughlinÂ and exposes the propaganda techniques that he used. They reduce the list of the many possible logical fallacies and propaganda tricks to just this short list that was in Father Coughlin's toolbox:

1. Name Calling â giving an idea or a person a bad name
2. Glittering Generality â create over-generalized positive images and stereotypes
3. Transfer (also known as Association) â gaining respectability or admiration by association with something else that is widely admired or respected
4. Testimonial â people tell stories that praise the propagandist's favorite cause
5. Plain Folks â it's just us regular plain good-old-boys; nothing to get upset about
6. Card Stacking â also called Monopolistic Card Stacking â it's stacking the odds in your favor by carefully arranging the "facts" while excluding undesired facts
7. Band Wagon â the same thing as "Everybody's doing it", or "Everybody knows", or "Everybody believes"...

*The Smartest Guys in the Room; The Amazing Rise and Scandalous Fall of Enron*Â Â Â Bethany McLean and Peter Elkind
Portfolio, The Penguin Group, New York, 2003.
ISBN: 1-59184-008-2
Dewey: 333.79 M163s 2003
LC: HD9502.U54E5763 2003
A great book, a fascinating story of brilliance, greed, ambition, arrogance, and dishonesty.

*Cold Turkey*Â Â Â A movie starring Dick Van Dyke and Bob Newhart
A great comedy, a classic. The basic plotline is that a backwoods town is dying because the military base closed. Bob Newhart plays an evil tobacco executive who wants to become the 'Alfred Nobel' of smoking by offering an huge prize to any town that totally quits smoking for a month (which he doesn't believe any town will ever be able to do). Dick Van Dyke plays the preacher of the dying town, who decides that winning the prize is the only way to get the town back on its feet. The results are both very funny and very true. It's a great spoof on smoking and addiction.Â See ref here.

*McCarthy, The Man, The Senator, The "ISM"*Â Â Â Jack Anderson and Ronald W. May
The Beacon Press, Boston, 1952.
LCCN: 52-11115
Dewey: B M1225A
A pretty good analysis of Senator Joe McCarthy and his methods. Because this book was published in 1952, it does not tell the end of the story â the Army-McCarthy hearings and the Senate's censure of McCarthy.

*Democracy Matters; Winning the Fight Against Imperialism*Â Â Â Cornel West
The Penguin Press, New York, 2004.

ISBN: 1-59420-029-7
LC: JC423.W384 2004
Dewey: 321.8 W516d 2004
A great book. Gives about the clearest analysis that I've seen of the current predicament and threats to the survival of our democracy. Also offers a higher, clearer, moral vision of the future than I see anybody else offering.

*Sleeping With The Devil; How Washington Sold Our Soul For Saudi Crude*Â Â Â Robert Baer
Crown Publishers, New York, 2003.
ISBN: 1-4000-5021-9
Dewey: 327.538 B141s 2003
Robert Baer is a former CIA agent who has a lot of expertise about the Middle East. He has written a very disturbing and revealing book here, which basically says that the days of the House of Sa'ud are numbered, and when it goes, so does our dependable oil supply.
Â Â Â Baer says that the Saudi royal family is paying off the terrorists and extreme Islamic fundamentalists to keep them from attacking the royal family, but that is an "end game" â only a matter of buying time while the terrorist organizations grow richer and more powerful, and the non-royal population of the country becomes poorer and increasingly dissatisfied with the extravagant profligate behavior of theÂ *thousands*Â of high-living Saudi princes. Baer says that there are 30,000 royals in Saudi Arabia, and they have a population explosion problem: each prince has a dozen or two wives, and many have 50 to 70 children, and all of the royal children expect and demand a life of opulent luxury while the common people can't even get a job. At that birth rate, in another generation, there could be many hundreds of thousands of royals for the oil dole to support â and the money has actually already run out.
Â Â Â The hey-day when Saudi Arabia had more money than sand is gone. Now they are borrowing money to keep the circus going. Sooner or later, the situation will become unstable and blow up. And Baer shows us many reasons why the time will probably be sooner than later.
Â Â Â And yes, the money that financed the 9/11 attacks on the USA came from Saudi Arabia. And the Washington politicians know it, or should know it, but they are too busy taking big campaign contributions and other huge payoffs from the Saudis to make a fuss about the situation in Saudi Arabia â "sleeping with the devil". But the times they are a'changin'.Â See quotes above.

Imperial Hubris: Why the West is Losing the War on Terror, Anonymous Â Â Â (His real name is Mike Shoyer â he later broke his anonymity.)
Brassey's Inc., Washington, D.C., 2004.
ISBN: 1-57488-849-8
LC: HV6432.I47 2004
Dewey: 973.931 I3445 2004 or 973.931â dc22
A fascinating and disturbing book. The author, a CIA agent who prefered to remain anonymous, makes a very good case for the USA being in big trouble because of arrogance, ignorance, and stupidity in the highest offices. He says that we do not clearly see our enemies because we insist on stereotyping them and seeing them through Western eyes, rather than on their own terms. What we call suicide bombers they call heroes who are going straight to Heaven. The author says that our conduct of the wars in Afghanistan and Iraq is so incompetent and unrealistic that defeat is inevitable â that in Afghanistan, it has already happened. Monumental hubris and insane arrogance led American leaders to think that they could easily defeat, with just a few troops, a little precision bombing, and a short war, the very Afghani freedom fighters who had just defeated the Soviet Army. The Soviets had already learned the hard way that it isn't that easy, but the arrogant Washington neo-Cons didn't listen, look, or learn. This is a good book for those who are interested in current politics and the "war on terrorism".
Quote:Â here.

THE U.S. DEPARTMENT OF ENERGY'S BIG CRIME COVER-UP

THE U.S. DEPARTMENT OF ENERGY CLEANTECH CRASH

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business. On top of that, every applicant, who was not a friend of the politician, was considered a competitor, and was attacked and sabotaged using state and federal resources. This was a felony-class crime that has cost taxpayers trillions of dollars in losses. Evidence proving this, as fact, many times over, is available to be presented before the Special Prosecutor in a public hearing.

THE U.S. DEPARTMENT OF ENERGY'S BIG CRIME COVER-UP

THE "HIT-LIST"

We hired CIA and FBI-Level experts to identify and hunt down (100% Legally) every single person and organization that used taxpayer resources to try to attack, kill, damage and sabotage us and now we are getting every single one of them fired, exposed, sued and placed under surveillance for the rest of their lives!

CRIME DOESN'T PAY.

THE ARM OF JUSTICE IS QUITE LONG!

THERE WERE MANY SOLYNDRA'S. OBAMA LOST ANOTHER $400 MILLION ON A TEXAS "GREEN" ENERGY COMPANY TOO

Weeding Out Waste and Fraud at Federal Agencies

By H. Sterling Burnett

"...Some recent inspector general reports from within various federal agencies show that the Trump administration is attempting to weed out abuse, fraud, and waste in government programs.

.....A second report, this one from the Department of Energy (DOE)'s I.G., found that in its push to commercialize the capture and storage of carbon dioxide from coal-fired power plants, the Obama administration failed to exercise proper oversight over more than $400 million it gave to a now bankrupt Texas company. This was a case of incompetence rather than malfeasance.

Summit Texas Clean Energy (Summit) partnered with DOE on the Texas Clean Energy Project, which promised to capture 2 million tons of carbon dioxide per year from a coal plant, or 90 percent of its annual emissions, and bury them underground. The project never became operational.

Because the project was continually beset with delays and Summit proved unable to attract private financing to finish it, the Energy Department stopped supporting the deal in June 2016, but not before it spent approximately $450 million in taxpayer money. Summit filed for bankruptcy in October 2017.

The I.G. report noted that under the terms of the project, DOE was supposed to obtain invoices from Summit prior to allowing expenses or reimbursing the company, but the I.G. found that DOE had approved more than $38 million in reimbursements without receiving proper documentation. Among the expenses the IG deemed "potentially unallowable" were bills sent by Summit to DOE for more than $1.2 million in lobbying costs and $1.3 million in "questionable or prohibited" travel-related expenses.

Under federal law, companies partnering with the federal government are disallowed from charging the government for their lobbying activities. The travel-related expenses included more than $650,000 paid to a consultant for Summit, which the consultant spent on items such as a spa service, alcohol, first-class travel, limousine services, receipts in foreign currency, and business meals.

The I.G. said the Energy Department under the Obama administration was to blame for these prohibited expenses being reimbursed because it had not implemented required "invoice review controls" and that "[the Office of] Fossil Energy had not always exercised sound project and financial management practices in its oversight of the project." That's the understatement of the year!

One lesson to draw from these two cases is that government regulatory agencies are just too big for Congress or even their own auditors to exercise proper oversight. Because bureaucrats aren't held accountable when they undertake illegal activities or exercise inept financial controls, they play fast and loose with taxpayers' money, resulting in poor program results and squandered resources.

It's good to see the Trump administration attempting to rein in out-of-control agency officials. However, I believe that to really have a far-reaching effect, punishment for such activities must ensue. Only when bureaucrats lose their jobs and pensions or spend some time behind bars for their malfeasance will they take seriously their charge to serve the public and spend taxpayers' dollars wisely.

H. Sterling Burnett, Ph.D. (hburnett@heartland.org) is a senior fellow on energy and the environment at The Heartland Institute, a nonpartisan, nonprofit research center headquartered in Arlington Heights, Illinois.

THE "HIT-LIST"

We hired CIA and FBI-Level experts to identify and hunt down (100% Legally) every single person and organization that used taxpayer resources to try to attack, kill, damage and sabotage us and now we are getting every single one of them fired, exposed, sued and placed under surveillance for the rest of their lives!

CRIME DOESN'T PAY.

THE ARM OF JUSTICE IS QUITE LONG!

THE U.S. DEPARTMENT OF ENERGY CLEANTECH CRASH

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business. On top of that, every applicant, who was not a friend of the politician, was considered a competitor, and was attacked and sabotaged using state and federal resources. This was a felony-class crime that has cost taxpayers trillions of dollars in losses. Evidence proving this, as fact, many times over, is available to be presented before the Special Prosecutor in a public hearing.

THIS CASE IS ENTIRELY ABOUT BRIBERY

If you thought that Mossack Fonseca and the Panama Papers was "The Story": IT WAS ONLY THE BEGINNING AND THE BRIBES, STOCK MARKET RIGGING AND CORRUPTION ARE STILL INCREASING!!!

In the USA; Mofo, Wilson Sonsini, Perkins Coie, Covington & Burling, and other firms, do the same corruption today that Mossack Fonseca did when they got caught.

THIS IS ABOUT THE U.S. SENATORS AND THEIR CRONY DARK MONEY POLITICAL BRIBES AND CRIMINAL KICK-BACKS, THE TECH OLIGARCHS WHO DEPLOYED THE BRIBES AND THE VICTIMS OF THESE CRIMES.

- Google, Tesla, Facebook, Linkedin and their VC's (and deeply bribed Senators) ordered and operated hit-jobs on the public and their competitors, supported by the Obama White House and U.S. Dept. of Energy. The FBI raided their scheme and the investigations tracked all the way back to the Oval Office!

- How Obama's U.S. Department of Energy Defrauded Americans Out Of Their Life Savings In A Massive Dark Money Crony Crime Cover-up

- "DARK MONEY" IS THE WAY THAT CORRUPT POLITICAL CRIMINALS EXCHANGE COMPENSATION, BRIBES AND INFLUENCE WITHOUT THE FBI CATCHING THEM

- For these politicians to say: "We are excluded from the law for these crimes because we changed the laws in order to exclude ourselves" is like the Mafia saying: "Killing people isn't illegal only if we do the killing".

- This is about a group of tech oligarchs, and their corrupt Senators, who commit crimes in order to manipulate over a trillion tax dollars (YOUR MONEY) into their, and their friends pockets.

- They create fake issues that they hype-up through their controlled media. They use media monopoly tricks to try to shut out any other viewpoints. They push pretend issues that they believe will get more tax money allocated to "issue solutions" that they, and their friends, happen to already own the monopolies for.

- They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to solve the problem.

- Some of the largest bribes in American history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

https://pilotonline.com/news/government/politics/article_c6836711-70ed-588c-b73f-547d6d82cb62.html

==========

HOW SILICON VALLEY'S "SCALED" CRIME CARTEL WORKS:

- A crime with hookers and a very big shark

There are millions of sharks in the ocean but only "Jaws" was big enough to earn himself (The Shark) so many feature films about trying to kill him. It was simply because he was so big and so hungry. Judging by the endless sequels, Jaws seems pretty hard to kill.

This is about the biggest sharks. They are from Silicon Valley.

Google, Facebook, Amazon, Linkedin, Netflix, et al; exist because they operate under the criminal umbrella of the tech Cartel frat boys.

These guys are addicted to sex, and they are also huge assholes, so they can't keep any partners around unless they pay them to be trophy wives or "beard" wives. Buying sex from Italian escorts, young girls and New York Rent Boys is really, really expensive. This drives them to do anything to suck up huge amounts of cash.

These guys are also addicted to power, so they buy East and West Coast U.S. Senators, British Parliament members and partner with corrupt Russian oligarchs. Buying Senators is also really, really expensive. This also drives them to do anything to suck up huge amounts of cash.

These guys need, and spend, massive amounts of cash. Being a tech oligarch is really, really expensive. They can't have the IRS cutting into their hooker-budgets. They spend massive amounts on big law firms to hide money in real estate, trusts, fake charities and in a huge array of off-shore spider holes.

These guys can't afford to get caught so they hire In-Q-Tel, Gawker Media, Black Cube, Fusion-GPS, and a huge army of other attackers, to destroy anybody who questions their motives.

Their Cartel exists because they own all of the main servers, banks, venture capital firms, tech law firms, K Street lobbyists and tech HR firms.

They control their entire eco-system and black-list anybody that offends them.

They own the internet and they delete anybody who steps in their circle.

Nobody can operate outside of it.

No start-up can compete with them without getting a hit-job put on it.

Since the year 2000, together, they have put over a million smaller companies out of business.

They exist because of "Scaling": the ability to use monopolized networks to reach everyone on Earth, have lower prices, and destroy all competition because they control all infrastructure. Scaling is all they talk about at their AngelGate "power lunches" in the back rooms of Restaurants on University Avenue in Palo Alto.

The FBI can't stop them because they owned James Comey, the head of the FBI.

The SEC, FEC and FTC can't stop them because they own the regulators at those agencies.

They Obama White House could not stop them because most of the Obama Administration was staffed by, and directed by, the staff of Google, Amazon and Facebook, et al.

The Silicon Valley tech Cartel makes the Mafia look like small potatoes.

They are a criminal organization!

==========

If certain politicians are as 'impassioned to serve the public' as they say, then shouldn't they volunteer for office and allow the public to see all of their bank accounts?

Of course they will never do that because many of them are getting "DARK MONEY" covert payola and they are in office only to serve criminal kick-back schemes.

Politician's Dianne Feinstein, Barbara Boxer, Nancy Pelosi, Harry Reid and 42 others, sent out letters, emails, meeting requests and pitches to solicit members of the public to join a cause. The top staff of the U.S. Department of Energy (DOE) sent out the same pleas. They promised a "wonderful new opportunity for all" in the first market break for outsiders in 30 years.

In meetings, on camera, they promised to give members of the public a fair shot at a group of new Department of Energy funds that Obama had put in place.

They failed to mention one key fact: ALL OF THE TAXPAYER MONEY HAD ALREADY BEEN SECRETLY PROMISED ("Hard Wired" it is called) TO OBAMA'S, AND THE DOE BOSSES, FRIENDS, IN ADVANCE.

That is a felony violation of the law. A crime which FBI Director James Comey, and his staff covered up and which DOE Boss Steven Chu and his staff actively implemented. Our team knows this, as fact, because they reported directly to Comey, Chu and their offices.

It was not an 'accident', it was not an 'oversight', it was not 'an agency just overwhelmed with paper'. It was a precision controlled, coordinated organized crime effort designed to rape, both, the U.S. taxpayers and the non-crony applicants for these funds.

The crime used the traditional bribes, crony payola contracts, revolving doors, sex worker payoffs and other political corruption but it mainly used a new tactic called "Dark Money'.

Our team knows this because some of them were solicited to participate in these crimes and some of them had close personal relationships with the politicians who are now known to have operated these crimes. Some of our witnesses and insiders have been involved with the DOE since before 2000. They have 'seen it all'.

Companies, their executives and their investors were induced by California and New York Senators, White House Staff and the top staff of the U.S. Department of Energy to invest many years of their lives, and tens of millions of dollars of their personal cash in a fake government program which only existed to pay off Obama's political financiers.

American taxpayers were lied to and ruined by the U.S Department of Energy and their damages are increasing monthly. The DOE never apologized, offered fixes or provided anything other than Fusion-GPS kinds of attacks on those who asked for help or who reported the crimes.

This scam happened in 2008. History has proven that the DOE funds, since then, were rigged. Congress, the news media and special investigations have proven that these crimes happened. Nothing has ever been done to help the victims (over 100 companies and over 1800 individuals) recover from their state-sponsored losses.

Former House Speaker Nancy Pelosi bought stock in initial public offerings (IPOs) from the very Cleantech companies that earned hefty returns (ie: Solyndra, Tesla, Abound, etc.) while she had access to insider information that would have been illegal for an average citizen to trade with â even though itâ s perfectly legal for elected officials, CBSâ s "60 Minutes" reported Sunday night.

In a piece relying on data collected from the conservative Hoover Institution, "60 Minutes" revealed that elected officials like Pelosi are exempt from insider trading laws â regulations that carry hefty prison sentences and fines for any other citizen who trades stocks with private information on companies that can affect their stock price.

In the case of elected officials â this secret information ranges from timely details on lucrative federal contracts to legislation that can cause companiesâ stocks to rise and fall dramatically.
Editor's Note: Repeal Obamacare? Vote Here Now

How do they get away with it? Lawmakers have exempted themselves from the laws that govern every other citizen.

Pelosi, D-Calif., and her husband have participated in at least eight IPOs while having access to information directly relating to the companies involved. One of those came in 2008, from Visa, just as a troublesome piece of legislation that would have hurt credit card companies, began making its way through the House.

â Undisturbed by a potential conflict of interest the Pelosis purchased 5,000 shares of Visa at the initial price of $44 dollars. Two days later it was trading at $64. The credit card legislation never made it to the floor of the House,â Steve Kroft of "60 Minutes" reported.

Kroft confronted Pelosi at a regular press conference after she declined an interview.

Kroft: Madam Leader, I wanted to ask you why you and your husband back in March of 2008 accepted and

participated in a very large IPO deal from Visa at a time there was major legislation affecting the credit card companies making its way through the â through the House.

Nancy Pelosi: But â

Kroft: And did you consider that to be a conflict of interest?

Pelosi: The â y â I â I don't know what your point is of your question. Is there some point that you want to make with that?

Kroft: Well, I â I â I guess what I'm asking is do you think it's all right for a speaker to accept a very preferential, favorable stock deal?

Pelosi: Well, we didn't.

Kroft: You participated in the IPO. And at the time you were speaker of the House. You don't think it was a conflict of interest or had the appearance--
Pelosi: No, it was not â

Kroft: â of a conflict of interest?

Pelosi: â it doesn't â it only has appearance if you decide that you're going to have â elaborate on a false premise. But it â it â it's not true and that's that.

Kroft: I don't understand what part's not true.

Pelosi: Yes sir. That â that I would act upon an investment.

â There are all sorts of forms of honest grafts that congressmen engage in that allow them to become very, very wealthy. So it's not illegal, but I think it's highly unethical, I think it's highly offensive, and wrong,â he told Kroft.

â â ¦ Insider trading on the stock market. If you are a member of Congress, those laws are deemed not to apply,â Schweizer added. â The fact is, if you sit on a healthcare committee and you know that Medicare, for example, is â is considering not reimbursing for a certain drug that's market moving information. And if you can trade stock on â off of that information and do so legally, that's a great profit making opportunity. And that sort of behavior goes on.â

Pelosiâ s office issued a statement Sunday saying, â It is very troubling that â 60 Minutesâ would base their reporting off of an already-discredited conservative author who has made a career out of attacking Democrats.â

Schweizerâ s books include â Do as I Say (Not as I Do): Profiles in Liberal Hypocrisy,â and â Architects of Ruin,â according to Schweizerâ s page on the Hoover Institution website.

What happened when the victims of these crimes reported the incidents to authorities? The Obama Administration ordered and operated attacks on the victims. Those attacks included the following reprisal, retribution and revenge efforts:'

- DOE solicited the victims with false promises and caused them to expend millions of dollars and years of their time for projects which DOE had covertly promised to their friends and were using the victims as a â smokescreenâ to cover their illegal DOE slush-fund for the victims competitors and personal enemies.

- Social Security, SSI, SDI, Disability and other earned benefits were stone-walled. Applications were â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ took place in order to seek to hide information and run cover-ups.

- DOEâ s Jonathan Silver, Lachlan Seward and Steven Chu contacted members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade Victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony.

FOIA requests were hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees played an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers were called, and faxed, and ordered to fire Victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produced attack articles and defamation videos and locked them on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world, at a cost of over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from this attack proved that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, were embedded with negative keywords in order to prevent them from gaining future employment.

- Our associates: Gary D. Conley, Seth Rich, Rajeev Motwani and over 30 other whistle-blowers in this matter, turned up dead under strange circumstances. They are not alone in a series of bizarre deaths related to the DOE investiagtions.

- Disability and VA complaint hearings and benefits were frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal and other on-line payments for on-line sales were delayed, hidden, or re-directed in order to terminate income potential for Victims who competed with DOE interests and holdings.

- DNS redirection, website spoofing which sent Victims websites to dead ends and other Internet activity manipulations were conducted. All commercial storefronts and on-line sales attempts by Victims, had their sites hidden, or search engine de-linked by an massively resourced facility in order to terminate revenue

potentials for those victims.

Over 50,000 trolls, shills, botnets and synth-blog deployments were deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors IN-Q-Tel, Think Progress, Black Cube, Podesta Group, Stratfor, Fusion GPS, IN-Q-Tel, Media Matters, Gawker Media, Gizmodo Media, Syd Blumenthal, etc., were hired by DOE Executives and their campaign financiers to attack Victims who competed with DOE executives stocks and personal assets.

- Covert DOE partner: Google, transfered large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Mortgage and rental applications had red flags added to them in databases to prevent the targets from getting homes or apartments.

- McCarthy-Era "Black-lists" were created and employed against Victims who competed with DOE executives and their campaign financiers to prevent them from funding and future employment.

- Targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

==========

How does DOE Dark Money work? Let's take a look:

In the politics of the United States, dark money is funds given to nonprofit organizationsâ and include 501(c)(4)(social welfare) 501(c)(5) (unions) and 501(c)(6) (trade association) groupsâ that can receive unlimited donations from corporations, individuals, and unions, and spend funds to influence elections, but are not required to disclose their donors.[3][4] Dark money first entered politics with Buckley v. Valeo (1976) when the United States Supreme Court laid out Eight Magic Words that define the difference between electioneering and issue advocacy.

According to the Center for Responsive Politics, "spending by organizations that do not disclose their donors has increased from less than $5.2 million in 2006 to well over $300 million in the 2012 presidential cycle and more than $174 million in the 2014 midterms."[3] The New York Times editorial board has opined that the 2014 midterm elections were influenced by "the greatest wave of secret, special-interest money ever raised in a congressional election."[5]

The term was first used by the Sunlight Foundation to describe undisclosed funds that were used during the United States 2010 mid-term election.[6][7] Its practical effect has been described by Donald Trump as Congress "being under the magical spell of the donors."[8]

In some elections, dark money groups have surpassed traditional political action committees (PAC) and "super PACs" (independent-expenditure-only committees) in the volume of spending.[4] In 2014, the group Freedom Partners was identified as the "poster child" for the rise of dark money.[4] In 2012, Freedom Partners had the ninth-highest revenues among all U.S. trade associations which filed tax returns that year, more than "established heavyweights" such as the American Petroleum Institute, PhRMA, and U.S. Chamber of Commerce.[4] Freedom Partners largely acted as a conduit for campaign spending; of the $238 million it spent in 2012, 99 percent went to other groups, and Freedom Partners itself did not have any employees.[4] This was a major distinction between other high-revenue trade associations, which typically have many employees and devote only about 6 percent of spending to grants to outside groups.[4]

The rise of dark money groups was aided by the U.S. Supreme Court decisions in FEC v. Wisconsin Right to Life, Inc. (2008) and Citizens United v. FEC (2010).[4] In Citizens United, the Court ruled (by a 5â 4 vote) that corporations and unions could spend unlimited amounts of money to advocate for or against political candidates.[9]
2010 election cycle

According to the Center for Responsive Politics, dark money (which it defined as funds from outside groups that did not publicly disclose donors, plus groups that received a substantial portion of their contributions from such nondisclosing groups) accounted for nearly 44% of outside spending in the 2010 election cycle.[10]

In the 2012 election cycle, more than $308 million in dark money was spent, according to the Center for Responsive Politics.[11] An estimated 86 percent was spent by conservative groups, 11 percent by liberal groups and 3 percent by other groups.[11]

The three dark money groups which spent the largest sums were Karl Rove's American Crossroads/Crossroads GPS ($71 million), the Koch brothers' Americans for Prosperity ($36 million) and the U.S. Chamber of Commerce ($35 million), all conservative groups.[11][12] Aside from a complex, and still highly covert network created by The Clinton Foundation, Media Matters and The Podesta Group, the three liberal groups with the largest dark-money expenditures were the League of Conservation Voters ($11 million), Patriot Majority USA, a group focusing on public schools and infrastructure ($7 million), and Planned Parenthood (almost $7 million).[11]

The 2014 election cycle saw the largest amount of dark money ever spent in a congressional election; the New York Timeseditorial board described 2014 "the greatest wave of secret, special-interest money ever."[5] On the eve of the election, Republican-leaning dark money groups dominated, with $94.6 million in expenditures, exceeding dark money expenditures by Democratic-leaning dark money groups ($28.4 million), and by expenditures that could not be classified ($1.9 million).[13] Karl Rove's dark money group Crossroads GPS alone spent over $47 million in the 2014 election cycle.[14]

In the Senate elections, dark money spending was highly concentrated in a handful of targeted competitive states, and especially in Alaska, Arkansas, Colorado, Kentucky, and North Carolina.[15] In the eleven most

competitive Senate races, $342 million was spent by non-party outside groups, significantly more than the $89 million spent by the political parties.

In the 2014 Kentucky election, a key player was the "Kentucky Opportunity Coalition," a group supporting Mitch McConnell, Republican of Kentucky,[16] whom the New York Times editorial board has described as "the most prominent advocate for unlimited secret campaign spending in Washington."[5] The Kentucky Opportunity Coalition, a 501(c)(4) "social welfare" group,[17] raised more than $21 million, while McConnell raised about $32 million and McConnell's opponent, Democratic candidate Alison Lundergan Grimes, raised about $19 million.[17] According to a Center for Public Integrity analysis of data provided by advertising tracking firm Kantar Media/CMAG, the group ran more than 12,400 television advertisements.[17] Every Kentucky Opportunity Coalition's television advertisements mentioned either McConnell or Grimes; overall, about 53 percent of the group's ads praised McConnell while the rest were attack ads against Grimes.[18] The Kentucky Opportunity Coalition relied heavily on political consultants in Washington, D.C. and Virginia linked to Karl Rove's Crossroads groups,[19] and received $390,000 in a grant from Crossroads GPS.[17] Described as "mysterious," the group was listed by a Post Office box,[17] and the only name formally associated with the group was political operative J. Scott Jennings, a deputy political director in the George W. Bush administration, a worker for McConnell's previous campaigns.[18] Melanie Sloan of the watchdog organization Citizens for Responsibility and Ethics in Washington said that the Kentucky Opportunity Coalition was "nothing more than a sham."[17]

In North Carolina, the pro-Tillis group "Carolina Rising" received nearly all (98.7%) of its funds from Crossroads GPS; the Center for Responsive Politics highlighted this as an example of how Crossroads GPS, a 501(c)(4) group, "evades limits on political activity through grants" to other 501(c)(4) groups.[16][21] In the 2014 cycle, Crossroads GPS also gave $5.25 million to the U.S. Chamber of Commerce, $2 million to the American Future Fund, and $390,000 to the Kentucky Opportunity Coalition.[21] In total, Crossroads GPS spent more than $13.6 million on grants to other groups, which it described as being for the purposes of "social welfare."[21]

In 2014, the Democratic Party-aligned dark money group Patriot Majority USA, a 501(c)(4), spent almost $13.7 million on "direct and indirect political campaign activities," airing 15,000 television ads in targeted Senate races.[22] About half of the $30 raised by the group came from five anonymous donors.[22] The group was led by Craig Varoga, "a staunch ally" of Senate Minority Leader Harry Reid, Democrat of Nevada.[22]

In Alaska, Mark Begich was "one of the few Democratic candidates to come close to receiving as much support from dark money as his Republican opponent."[15] The pro-Begich Alaska Salmon PAC, funded entirely by the League of Conservation Voters and its Alaska affiliate, spent funds in support of Begich.[15]

According to the Center for Responsive Politics, by October 2015, $4.88 million in dark money had already been spent for the 2016 election cycle, "more than 10 times the $440,000 that was spent at this point during the 2012 cycle."[11] The money was spent by six groups - five conservative groups (including the U.S. Chamber of Commerce, which spent $3 million, and Americans for Prosperity, which spent $1.5 million) and one liberal group (Planned Parenthood, which spent just under $75,000).[11]
According to Richard Skinner of the Sunlight Foundation, "the focus of early dark money being spent in the 2016 cycle" is on competitive U.S. Senate elections and some U.S. House of Representatives races.[11] However, dark money also is playing a role in the 2016 Republican presidential primaries; by June 2015, at least four Republican presidential candidates were raising funds via 501(c)(4) organizations: Bobby Jindal's America Next, Rick Perry's Americans for Economic Freedom, John Kasich's Balanced Budget Forever, and Jeb Bush's Right to Rise.[23]

501(c) "dark money" groups are distinct from super PACs.[25]While both types of entity can raise and spend unlimited sums of money, super PACs "must disclose their donors," while 501(c) groups "must not have politics as their primary purpose but don't have to disclose who gives them money."[25] However, a single

individual or group can create both types of entity and combine their powers, making it difficult to trace the original source of funds.[25][26] ProPublica explains: "Say some like-minded people form both a Super-PAC and a nonprofit 501(c)(4). Corporations and individuals could then donate as much as they want to the nonprofit, which isn't required to publicly disclose funders. The nonprofit could then donate as much as it wanted to the Super-PAC, which lists the nonprofit's donation but not the original contributors."[25] In at least one high-profile case, a donor to a super PAC kept his name hidden by using an LLC formed for the purpose of hiding their personal name.[27] One super PAC, that originally listed a $250,000 donation from an LLC that no one could find, led to a subsequent filing where the previously "secret donors" were revealed.[28]

During the 2016 election cycle, "dark money" contributions via shell LLCs became increasingly common.[29] The Associated Press, Center for Public Integrity, and Sunlight Foundation all "flagged dozens of donations of anywhere from $50,000 to $1 million routed through non-disclosing LLCs to super PACs" backing various presidential candidates, including Marco Rubio, Hillary Clinton, Ted Cruz, John Kasich, Jeb Bush, and Carly Fiorina.[29]
Bradley A. Smith, a former FEC chairman who is now with the Center for Competitive Politics, a group that opposes campaign-finance reform, argues that this practice is not problematic, writing that "it is possibly the making of a campaign contribution in the name of another," a violation of existing law.[30]

According to Kathy Kiely, managing editor of the Sunlight Foundation, "untraceable dark money is a preferred tactic of conservatives, while Democrats tend to use traceable super PACs."[31]

The first federal law requiring disclosure of campaign contributions, the Federal Corrupt Practices Act, was passed in 1910. By the late 1970s, virtually all states and the federal government required public disclosure of campaign contributions and information on political donors. Most states and the federal government also required public disclosure of information about donors and amounts spent on independent expenditures, that is, expenditures made independently of a candidate's campaign.
In January 2010, at least 38 states and the federal government required disclosure for all or some independent expenditures or electioneering communications, for all sponsors.[32]

Yet despite disclosure rules, it is possible to spend money without voters knowing the identities of donors before the election.[33][34]In federal elections, for example, political action committees have the option to choose to file reports on a "monthly" or "quarterly" basis.[35][36][37] This allows funds raised by PACs in the final days of the election to be spent and votes cast before the report is due.

In addition to PACs, non-profit groups ranging from Planned Parenthood to Crossroads may make expenditures in connection with political races. Since these non-profits are not political committees, as defined in the Federal Election Campaign Act, they have few reporting requirements beyond the amounts of their expenditures. They are not required by law to publicly disclose information on their donors. As a result, voters do not know who gave money to these groups. Reports have disclosed instances where non-profits were managed by close associates, former staff, or a candidate's family member, and this has led to concern that the candidates benefiting from their expenditures would be able to know who donated the funds to the non-profit group, but the public would not.[38] [39]

For example, in the 2012 election cycle, one organization, the National Organization for Marriage, or NOM, operated two non-profit arms that received millions in donations from just a few donors. It in turn funded several different PACs. While these PACs had to disclose that NOM contributed the funds, they were not required to disclose who gave money to NOM.[40]

On March 30, 2012 a U.S. District Court ruled that all groups that spend money on electioneering communications must report all donors that give more than $1,000.[41][42] However, this ruling was overturned on appeal.[43]

Legislative and regulatory proposals and debate over dark moneyAccording to Columbia Law School's Richard Briffault, disclosure of campaign expenditures, contributions, and donors is intended to deter corruption.[45]

The Federal Elections Commission, which regulates federal elections, has been unable to control dark money. According to the Center for Public Integrity, FEC commissioners are voting on many fewer enforcement matters than in the past because of "an overtaxed staff and commissioner disagreement."[12] The IRS (rather than the FEC) is responsible for oversight of 501(c)(4) groups.[12] The IRS "found itself ill-prepared for the groundswell" of such groups taking and spending unlimited amounts of money for political purposes in the wake of the U.S. Supreme Court's decision in Citizens United v. Federal Election Commission in 2010.[12] The agency particularly "struggled to identify which organizations appeared to be spending more than the recommended 50 percent of their annual budgets on political activitiesâ and even to define what 'political spending' was."[12] When the IRS began looking at nonprofit spending, it was accused of improper targeting in a 2013 controversy.[12]

"With the FEC and IRS duly sidelined" advocates for disclosure turned to the Securities and Exchange Commission (SEC); nine academics from universities across the U.S. filed petitioned the SEC in August 2011 for the agency to "develop rules to require public companies to disclose to shareholders the use of corporate resources for political activities."[12] The petition received over a million comments in the following month, "a record amount for the SEC, with the overwhelming majority of voters asking for better disclosure."[12] According to Lucian Bebchuk, a Harvard professor of law, economics, and finance who helped draft the petition, the request had drawn the support of "nearly a dozen senators and more than 40 members of the House."[12] Under current SEC regulations, public corporations must file a Form 8-K report to publicly announce major events of interest to shareholders.[46] The Sunlight Foundation, a group which advocates for a comprehensive disclosure regime, has proposed that the 8-K rule should be updated to require that aggregate spending of $10,000 on political activities (such as monetary contributions, in-kind contributions, and membership dues or other payments to organizations that engage in political activities) should be disclosed and made publicly available via the 8-K system.[46]
In 2015, Republicans in Congress successfully pushed for a rider in a 2015 omnibus spending bill that bars the IRS from clarifying the social-welfare tax exemption to combat dark money "from advocacy groups that claim to be social welfare organizations rather than political committees."[47]

Other provisions in the 2015 bill bar the SEC from requiring corporations to disclose campaign spending to shareholders, and a ban application of the gift tax to nonprofit donors. The Obama administration opposed these provisions, but President Obama eventually acceded to them in December 2015, with the White House declining to comment. The nonpartisan Campaign Legal Center said in a statement that the dark-money provision ensures "that the door to secret foreign dollars in U.S. elections remains wide open through secret contributions to these ostensibly 'nonpolitical' groups that run campaign ads without any disclosure of their donors."[47]

The Center for Competitive Politics (CCP), chaired by former FEC chairman Bradley A. Smith, opposes legislation to require the disclosure of dark-money groups, saying: "Our view is that many people will be driven out of politics if they are forced to disclose their names and their personal information. The purpose of disclosure is to help people monitor the government, not for the government to monitor the people."[12] The Center for Competitive Politics views "dark money" as a pejorative term, stating that the phrase "evokes an emotional, fearful reaction" and contending that "many of the statistics published on the topic aim to mislead rather than enlighten."[48] The CCP maintains that dark money "comprises a very small percentage of total campaign spending," calculating the percent of money spent in federal elections by organizations that did not provide itemized disclosure of their donors as 4.3% in 2012 and 3.7% in 2014.

The U.S. Department of Energy was complicit in the processing of Dark Money payola cycling to Obama's financiers as a 'hand-on' operator of a RICO-class crime.

All of the ruckus with Donald Trump and California/DOE VS. Trump is almost entirely based on West Coast and New York corrupt senators, and their insiders, freaking out about their Dark Money organized crime payola scam coming apart and getting exposed.

Thereâ s a reason why David Brock chooses to house an unregistered Professional Solicitor in his office to raise money for his conglomerate of Super PACs and non-profits.

Professional Solicitors are required to disclose their active solicitation contracts. Brock wants his unregistered solicitor, the Bonner Group, to keep their client list hidden for a very specific reason.

DAVID BROCK IS LAUNDERING MONEY AND RUNNING A CHARACTER ASSASSINATION SERVICE. WHY HAS HE NOT BEEN ARRESTED?

David Brock has 7 non-profits, 3 Super PACs, one 527-committee, one LLC, one joint fundraising committee, and one unregistered solicitor crammed into his office in Washington DC.

Uncovered records expose a constant flow of money between these organizations.

The Bonner Group, his professional solicitor, works off a commission. Every time money gets passed around, Bonner receives a 12.5% cut.

FOLLOW THE MONEY

Nonprofits are required to disclose who they give cash grants to.

But they arenâ t required to disclose who gave them cash grants.

This weak system of one way verification is being abused by Brock. Heâ s been cycling money between his organizations for years, and the Bonner Groupâ s 12.5% commission gets triggered after every pass.

In 2014, Media Matters for America raised $10,021,188.

The Bonner Group was credited for raising these funds. Media Matters paid them a $1,147,882 commission.

That same year, Media Matters gave a $930,000 cash grant to David Brockâ s Franklin Education Forum, an organization that shares office space with Media Matters.

In 2014, the Franklin Education Forum reported $994,000 in total contributions. 93.6% of that total came from Media Matters!

Surprisingly, though, the Franklin Education Forum gave full credit to Bonner for raising that money. They paid the fundraiser a $124,250 commission in 2014!

NOTICE WHAT HAPPENED?

David Brockâ s Media Matters gave a $930,000 cash grant to David Brockâ s Franklin Education Forum
David Brockâ s Franklin Education Forum credited the Bonner Group for raising those funds, triggering the 12.5% commission
David Brock paid the Bonner Group a $124,250 commission to solicit a cash grant â ¦ from himself!

IT DOESNâ T STOP THERE

After the Franklin Education Forum retained $869,750, they sent a $816,224 cash grant to David Brockâ s The Franklin Forum:

franklin-education-forum-grant-to-franklin-forum

Note: The â Franklin Education Forumâ is a 501(c)3, and â The Franklin Forumâ is a 501(c)4. They are not the same company.

Since The Franklin Forum 501(c)4 paid Bonner a commission in 2013, itâ s safe to assume fundraiser received a $102,028 commission in 2014. Unfortunately, itâ s hard to tell for sure. They still havenâ t filed their taxes for 2014!

LETâ S RECAP

Say, for example, you donate $1,062,857 to Media Matters for America. This is how David Brock would have used your charitable donation in 2014:

In the end, Brockâ s solicitor would have pocketed $350,825, almost a third of your initial donation! Thatâ s a far cry from the advertised 12.5% commission.

As bizarre as that scenario may sound, this is exactly what David Brock did in 2014.

HOW CAN WE BE SURE THIS IS INTENTIONAL?

David Brock is the Chairman for each of these organizations! How could he not know whatâ s going on?

Heâ s a hands-on Chairman. According to their tax returns, Brock allocates time, weekly, to his organizations:

Furthermore, the New York Times reports that David Brock shares a summer rental in the Hamptons with Mary Pat Bonner, the President of the Bonner Group!

David Brock will have a hard time claiming ignorance on this. These transfers are intentional. He vacations with his solicitor. Case closed.

STILL NOT CONVINCED?

David Brock didnâ t even bother to give his organizations different phone numbers. They all share the same phone number!

WHAT IFâ ¦?

We even located the Bonner Groupâ s solicitation agreement with Media Matters on Floridaâ s Gift Giversâ Guide. Clarification on their commission can be found on page 2:

In English: Contractually, David Brock has the option to exclude certain contributions from triggering the commission. In spite of this option, he intentionally chooses to trigger the 12.5% commission for money grants between his organizations.

Note: Yes, we are making the assumption that all of Brockâ s organizations have the same solicitation agreement with the Bonner Group. Given that his organizations share the same address, board members, and

telephone number, we feel itâ s safe to assume they also share the same solicitation agreement.
THIS BARELY SCRATCHES THE SURFACE

Utilizing public facing tax returns, along with records submitted to the FEC, we mapped out all the significant money transfers from 2014 that took place in Brockâ s office:

This is all from just one year! No further commentary required.

We understand this may be hard to believe. We first came across this in July, and are still having a hard time wrapping our heads around it.

All of the data referenced in this article originated from publicly accessible sources. Check for yourself â we provided links to the source material in our article exposing the organizations operating in Brockâ s office, This data has been sitting out in the open, gathering dust for years!

If it looks like a duck, swims like a duck, and quacks like a duck, then it probably is a duck.

Weâ ve spent months trying to find some sort of loophole to justify this activity. But there arenâ t any loopholes. David Brock has something to hide. Just last week, The Daily Callerreported the following:

â Brockâ s former long-time live-in boyfriend William Grey (whom Brock has thanked in several of his books) threatened to go to the IRS with damaging information about how Brock was running his Media Matters empire. What did Brock do? He paid Grey $850,000 to keep quiet. Brock reportedly had to sell his home in Rehoboth, Delaware to come up with the money. This certainly seems to indicate that Brock was terrified about what the authorities would uncover.â

Weâ d also like to partner with you if youâ re interested in reposting our content on your own site. Please send an email to Andrew@TheCitizensAudit.com to get started.

19. BMO Capital Markets
20. Mitsubishi UFJ Financial Group

Many of the largest crooked banks are considered among the "Bulge Bracket banks" and as such underwrite the majority of financial transactions in the world.[5] Additionally, banks seeking more deal flow with smaller-sized deals with comparable profitability are known as "Middle Market investment banks" (known as boutique or independent investment banks).[1]

Financial conglomerates

Large financial-services conglomerates combine commercial banking, investment banking, and sometimes insurance. Such combinations were common in Europe but illegal in the United States prior to the passage of the Gramm-Leach-Bliley Act of 1999. The following are large investment banking firms (not listed above) that are affiliated with large financial institutions:[6]

- ABN AMRO[7]
- BBVA
- Banco Bradesco
- Banco Santander
- BB&T (BB&T Capital Markets)
- Bank of China (BOC International Holdings)
- Bank of Communications (BOCOM International Holdings)
- Berenberg Bank
- Canadian Imperial Bank of Commerce (CIBC World Markets)
- China Construction Bank (CCB International Holdings)
- China CITIC Bank
- CIMB
- Commerzbank
- CrÃ©dit Agricole
- Daiwa Securities
- DBS Bank (Capital Markets Group)

- Desjardins Group (Desjardins Capital Markets)
- Handelsbanken
- ICICI Bank
- Industrial and Commercial Bank of China (ICBC International Holdings)
- ING Group
- Intesa Sanpaolo (Banca IMI)
- Ä°Å BankasÄ± (Is Investment)
- ItaÃº Unibanco (ItaÃº BBA)
- KBC Bank
- KeyCorp (KeyBanc Capital Markets)
- Kotak Mahindra Bank
- Laurentian Bank of Canada (Laurentian Bank Securities)
- Lloyds Banking Group (Lloyds Bank Wholesale Banking & Markets)
- Macquarie Group
- Maybank
- Mediobanca
- Mizuho Financial Group
- Banca Monte dei Paschi di Siena (MPS Capital Services)
- M&T Bank
- National Bank of Canada (National Bank Financial Markets)
- Natixis
- Nordea
- PNC Financial Services (Harris Williams & Company)
- Rabobank
- RHB Bank
- Sanlam (Sanlam)
- SEB
- Sberbank
- Scotiabank (Scotia Capital)
- SociÃ©tÃ© GÃ©nÃ©rale
- Standard Bank
- Standard Chartered Bank
- State Bank of India (SBI Capital Markets)
- Stifel Financial (Stifel Nicolaus)
- Sumitomo Mitsui Financial Group
- SunTrust (Robinson Humphrey)
- TD Securities
- UniCredit (UBM)
- VTB Bank (VTB Capital)

Private placement firms

Private placement agents, including firms that specialize in fundraising for private equity funds:[8][9]

- Almeida Capital
- Atlantic-Pacific Capital
- Campbell Lutyens
- Cogent Partners
- Helix Associates
- J.P. Morgan Cazenove
- Park Hill Group
- Probitas Partners

Previous Notable former investment banks and brokerages we are tracking all clients from

The following are notable investment banking and brokerage firms that have been liquidated, acquired or merged and no longer operate under the same name.

Firm	*Fate*
Alex. Brown & Sons	ultimately part of Deutsche Bank, survives as minor business unit
A.G. Becker & Co.	acquired by Merrill Lynch in 1984
A.G. Edwards	acquired by Wachovia in 2007
The Argosy Group	acquired by Canadian Imperial Bank of Commerce in 1995
Babcock & Brown	collapsed 2009, liquidation of its assets
BancAmerica Robertson Stephens	acquired by NationsBank in 1998 and integrated into NationsBanc Montgomery Securities to form Banc of America Securities.
Barings	collapsed 1995; assets acquired by ING Bank
Bear Stearns	collapsed 2008; assets acquired by JPMorgan Chase
Bowles Hollowell Connor & Co.	acquired by First Union in 1998
Blyth, Eastman Dillon & Co.	merged with Paine Webber in 1979
Brown Bros. & Co.	merged with Harriman Brothers & Company to form Brown Brothers Harriman & Co.
BT Alex. Brown	acquired by Deutsche Bank to form Deutsche Bank Alex. Brown
C.E. Unterberg, Towbin	acquired by Collins Stewart in 2007
Commodities Corporation	acquired by Goldman Sachs and renamed *Goldman Sachs Princeton* in 1997
Dain Rauscher Wessels	bought by Royal Bank of Canada in 2000
Dean Witter Reynolds	merged with Morgan Stanley to form Morgan Stanley Dean Witter, subsequently the Dean Witter name was eliminated
Dillon, Read & Company	acquired by Swiss Bank Corporation, and is ultimately part of UBS AG
Donaldson, Lufkin & Jenrette	acquired by Credit Suisse in 2001
Drexel Burnham Lambert	liquidated 1990
E.F. Hutton & Co.	acquired by Shearson Lehman/American Express in 1988, ultimately part of Lehman Brothers
First Boston Corporation	merged with Credit Suisse in 1988 to form CS First Boston, renamed "Credit Suisse First Boston" in 1996 and "Credit Suisse" in 2006
First Union Securities	acquired by Wachovia in 2002 to form Wachovia Securities
G.H. Walker & Co.	acquired by White Weld & Co and ultimately part of Merrill Lynch
Giuliani Capital Advisors	the investment banking division of Giuliani Partners was sold to Macquarie Group in 2007
Goodbody & Co.	merged into Merrill Lynch in 1970

Gruntal & Co.	acquired by Ryan Beck & Co. in 2002
H.B. Hollins & Co.	liquidated in 1913
Halsey, Stuart & Co.	ultimately part of Wachovia
Hambrecht & Quist	acquired by Chase Manhattan Bank and ultimately part of JPMorgan Chase. H&Q name continues as investment advisor
Hambros Bank	acquired by SociÃ©tÃ© GÃ©nÃ©rale
Hayden, Stone & Co.	acquired Shearson Hammill & Co. in 1974 and assumed the Shearson name. Ultimately acquired by American Express in 1981
Harriman Brothers & Company	merged with Brown Bros. & Co. to form Brown Brothers Harriman & Co.
HBOS	acquired by Lloyds TSB to form the Lloyds Banking Group in 2009
Hill Samuel	acquired by Trustee Savings Bank (TSB) in 1987 later Lloyds TSB
Hornblower & Weeks	investment bank acquired by Loeb, Rhoades & Co. and ultimately part of Shearson/American Express
J.&W. Seligman & Co.	investment bank ultimately part of UBS AG; continues as asset manager
J.C. Bradford & Co.	acquired by PaineWebber in 2000, ultimately part of UBS AG
John Nuveen & Co.	IBD acquired by Piper Jaffray in 1999; company continues as asset management house under Nuveen Investments, which is controlled by private equity firm Madison Dearborn Partners
Keefe, Bruyette & Woods	acquired by Stifel in 2012, still maintain independent branding
Kidder, Peabody & Co.	acquired by General Electric Corporation in 1986, subsequently resold to PaineWebber in 1994 and ultimately part of UBS AG
Kleinwort Benson	acquired by Dresdner Bank in 1995
Kuhn, Loeb & Co.	ultimately part of Lehman Brothers
Llama Company	ultimately defunct after departure of Alice Walton
L.F. Rothschild	ultimately part of C.E. Unterberg, Towbin, with parts sold to Oppenheimer. Not to be confused with Rothschild & Co (the result of a merger of the British N.M. Rothschild & Sons with the French Rothschild & Cie); see Rothschild family
Lee, Higginson & Co.	liquidated 1932
Lehman Brothers	bankrupt in 2008, asset sold to Barclays Capital and Nomura Holdings
Loeb, Rhoades & Co.	acquired by Shearson Hammill & Co. to form Shearson Loeb Rhoades in 1979 which was later acquired by American Express in 1981 to form Shearson/American Express
McColl Partners	acquired by Deloitte in 2013 to form Deloitte Corporate Finance
Mendelssohn & Co.	aryanized by the Nazis in 1938, sold in parts to Deutsche Bank
Merrill Lynch & Co.	acquired by Bank of America in 2008 and integrated into Banc of America Securities to form Bank of America Merrill Lynch
Miller Buckfire & Co.	acquired by Stifel in 2012, still maintains independent branding
Montgomery Securities	acquired by NationsBank in 1997 and integrated into NationsBanc Capital Markets to form NationsBanc Montgomery Securities
Morgan & Cie	acquired by Morgan Stanley in 1967 and incorporated as Morgan et Compagnie International in Morgan Stanley International Incorporated in 1975
Morgan Grenfell	acquired by Deutsche Bank in 1990
Morgan, Harjes & Co.	renamed Morgan & Cie in 1926 and acquired by Morgan Stanley in 1926
Paine Webber	acquired by UBS AG

Park Ryan	liquidated 1979
Prudential Securities	acquired by Wachovia in 2003
Reynolds Securities	merged with Dean Witter & Co. to form Dean Witter Reynolds, subsequently merged with Morgan Stanley
Robert Fleming & Co.	acquired by JPMorgan Chase
Robertson Stephens	acquired by BankAmerica in 1997 and integrated into BancAmerica Securities to form BancAmerica Robertson Stephens. Sold again in 1998 to BankBoston (later FleetBoston Financial and would operate as Robertson Stephens from 1998â 2002, when the firm was shuttered after the collapse of the Internet bubble
Roosevelt & Son	Broken up into three firms in 1934: Roosevelt & Son (liquidated), Roosevelt & Weigold (today operates as Roosevelt & Cross); and Dick & Merle Smith
Ryan Beck & Co.	acquired by Stifel in 2007
S. G. Warburg & Co	ultimately part of UBS AG; not to be confused with M.M. Warburg or Warburg Pincus; see Warburg family
Salomon Brothers	acquired by Travelers Group in 1997, ultimately part of Citigroup
Schroders	investment bank bought by Citigroup; continues as asset manager
Shearson/American Express	acquired Lehman Brothers Kuhn Loeb in 1984 to form Shearson Lehman/American Express, later Shearson Lehman Hutton and Shearson Lehman Brothers
Shearson, Hammill & Co.	renamed Shearson Loeb Rhoades after the 1979 acquisition of Loeb, Rhoades & Co. in 1979. Acquired by American Express in 1981 to form Shearson/American Express
Shearson Lehman Hutton	renamed Shearson Lehman Brothers in 1990 and split up in 1993 with the IPO of Lehman Brothers and the sale of the retail and brokerage operations to Primerica
Soundview Technology Group	ultimately part of Charles Schwab
Swiss Bank Corporation	merged with Union Bank of Switzerland to form UBS AG
Union Bank of Switzerland	merged with Swiss Bank Corporation to form UBS AG
Wachovia Securities	acquired by Wells Fargo in 2008 and renamed Wells Fargo Securities
Wasserstein Perella & Co.	bought by Dresdner Bank
Wertheim & Co.	acquired by Schroders, and ultimately by Salomon Smith Barney
White Weld & Co.	bought by Merrill Lynch
Wood Gundy	acquired by the Canadian Imperial Bank of Commerce in 1987, operating as CIBC Wood Gundy before becoming CIBC World Markets in 1997

The tech oligarchs and U.S. politicians employ a "Magic Circle" of crooked law firms to operate their schemes. The term is a derivation of the widely recognised London "magic circle" of top law firms, and is widely used in the offshore legal industry.[2][3][4][5] The term has also become used to describe the offshore legal industry in a more pejorative sense (e.g. when the general media reports on paradise papersâ type offshore financial scandals),[6][7][8][9] and is therefore more sparingly used, or found, in major legal publications (e.g. *Legal Business*).

There is no consensus definition over which firms belong in the offshore magic circle. A 2008 article in the publication *Legal Business* (Issue 181, *Offshore Review*, February 2008) suggested a list, which has been repeated by others,[10] and is simply the top 10 offshore law firms, but excluding Gibraltarâ specialist Hassans.[11][a]

- Appleby

- Bedell
- Carey Olsen
- Conyers Dill & Pearman
- Harneys
- Maples and Calder
- Covington And Burling
- Mourant Ozannes
- Ogier
- Walkers

Mofo, Brobeck, Wilson Sonsini, Perkins Coie and other tech Cartel "dirty firms" are under specific and deep investigation by both public and FBI teams. A 2017 study published in Nature into offshore financial centres (see Conduit and Sink OFCs), showed the depth of legal connections between classic "offshore" tax havens (called Sink OFCs), and emerging modern "onshore" corporate tax havens (called Conduit OFCs).

All of these entities partner with crooked CPA and Financial Planning firms ranging from:

- Arthur Andersen (until its closure in 2002 for a conviction related to the Enron scandal which was later overturned by the US Supreme Court)[4]
- Arthur Young (Arthur Young, McLelland, Moores & Co from 1968 to 1985)
- Coopers and Lybrand (until 1973 Cooper Brothers in the UK and Lybrand, Ross Bros., & Montgomery in the United States)[5]
- Deloitte Haskins & Sells (until 1978 Haskins & Sells in the United States and Deloitte & Co. in the UK)
- Ernst & Whinney (until 1979 Ernst & Ernst in the United States and Whinney Murray in the UK)
- Peat Marwick Mitchell (later Peat Marwick, then KPMG)
- Price Waterhouse
- Touche Ross
- Etc....

...to the smaller **Mossack Fonseca** & Co (Panama Papers) kind of boutique tax evasion and money laundering firms, of which there are thousands. A political family such as the Feinstein's, The Pelosi's, The Musk's, etc. employ nearly a hundred of the types of entities listed on this page. Google's venture capitalists and executives employ one of the largest networks of these kinds of obfuscation experts in the world.

Dense the legal relationships have become between modern economies and "offshore" tax havens via Conduit OFCs, and the rise in offshore magic circle firms setting up offices in modern corporateâ focused tax havens, like Dublin.[12][13][14]

Taxpayer Funded Chevy Volt Costs Taxpayers Up to $250K Per Vehicle And Now It Is Gone. Chevy Grabs Govt Cash Then Kills Car.

Analyst: 'This might be the most government-supported car since the Trabant or the Tesla'

By Tom Gantert |

(Editorâ s note: This article has been updated with a reaction from a General Motor's official.)

Each Chevy Volt sold thus far may have as much as $250,000 in state and federal dollars in incentives behind it â a total of $3 billion altogether, according to an analysis by James Hohman, assistant director of fiscal policy at the Mackinac Center for Public Policy.

Hohman looked at total state and federal assistance offered for the development and production of the Chevy Volt, General Motorsâ plug-in hybrid electric vehicle. His analysis included 18 government deals that included loans, rebates, grants and tax credits. The amount of government assistance does not include the fact that General Motors is currently 26 percent owned by the federal government.

The Volt subsidies flow through multiple companies involved in production. The analysis includes adding up the amount of government subsidies via tax credits and direct funding for not only General Motors, but other companies supplying parts for the vehicle. For example, the Department of Energy awarded a $105.9 million grant to the GM Brownstown plant that assembles the batteries. The company was also awarded approximately $106 million for its Hamtramck assembly plant in state credits to retain jobs. The company that supplies the Voltâ s batteries, Compact Power, was awarded up to $100 million in refundable battery credits (combination tax breaks and cash subsidies). These are among many of the subsidies and tax credits for the vehicle.

Itâ s unlikely that all the companies involved in Volt production will ever receive all the $3 billion in incentives, Hohman said, because many of them are linked to meeting various employment and other milestones. But the analysis looks at the total value that has been offered to the Volt in different aspects of production â from the assembly line to the dealerships to the battery manufacturers. Some tax credits and subsidies are offered for periods up to 20 years, though most have a much shorter time frame.

GM has estimated theyâ ve sold 6,000 Volts so far. That would mean each of the 6,000 Volts sold would be subsidized between $50,000 and $250,000, depending on how many government subsidy milestones are realized.

If those manufacturers awarded incentives to produce batteries the Volt may use are included in the analysis, the potential government subsidy per Volt increases to $256,824. For example, A123 Systems has received extensive state and federal support, and bid to be a supplier to the Volt, but the deal instead went to Compact Power. The $256,824 figure includes adding up the subsidies to both companies.

The $3 billion total subsidy figure includes $690.4 million offered by the state of Michigan and $2.3 billion in federal money. Thatâ s enough to purchase 75,222 Volts with a sticker price of $39,828.

Additional state and local support provided to Volt suppliers was not included in the analysis, Hohman said, and could increase the level of government aid. For instance, the Volt is being assembled at the Poletown plant in Detroit/Hamtramck, which was built on land acquired by General Motors through eminent domain.

â It just goes to show there are certain folks that will spend anything to get their vision of what people should do,â said State Representative Tom McMillin, R-Rochester Hills. â Itâ s a glaring example of the failure of central planning trying to force citizens to purchase something they may not want. â ¦ They should let the free market make those decisions.â

â This might be the most government-supported car since the Trabant,â said Hohman, referring to the car produced by the former Communist state of East Germany.

According to GM CEO Dan Akerson, the average Volt owner makes $170,000 per year.

Tesla's Semi-Truck Would Require Energy Of 4,000 Homes To Recharge- It is a BS Distraction Ploy

by Tyler Durden

0

SHARES

Elon Muskâ s reliance on shock-and-awe tactics and unjustifiably lofty performance projections is creating serious problems for the so-called visionary as **a growing number of experts have come forward to explain that many of his claims would defy the laws of physics.**

The latest group to call bulls--- is Aurora Energy Research, a European consultancy which estimated that Teslaâ s electric haulage truck will require the same energy as up to 4,000 homes to recharge â a stunning claim that would seem to raise serious questions about the projects viability, according to the Financial Times.

According to these scientists, modern battery technology is incapable of supporting anything close to the 30-minute charging time Musk has promised for the new Tesla semi-truck.

> **The US electric carmaker unveiled a battery-powered truck earlier this month, promising haulage drivers they could add 400 miles of charge in as little as 30 minutes using a new â megachargerâ to be made by the company.**

> John Feddersen, chief executive of Aurora Energy Research, a consultancy set up in 2013 by a group of Oxford university professors, said the power required for the megacharger to fill a battery in that amount of time would be 1,600 kilowatts.

> **That is the equivalent of providing 3,000-4,000 â averageâ houses, he told a London conference last week, 10 times as powerful as Teslaâ s current network of â superchargersâ for its electric cars.** Tesla declined to comment on the calculations.

> Elon Musk, Teslaâ s chief executive, has previously said the megachargers would be solar-powered but the company has not confirmed whether they will also have a grid connection for when it is not sunny.

> Many of Teslaâ s current superchargers are powered in part by renewable energy. The company is also experimenting with storage batteries to ease demands on the grid.

Tesla has promised to begin delivering its trucks in late 2019. Electric battery capacity has been improving at a rate of roughly 8% per year â and some have posited that Muskâ s lofty claims are merely just him trying to anticipate what will be possible as the first batch of trucks are being assembled. **However, if Auroraâ s assessment is accurate, then the technological advancements needed to enable a 30-minute charging time for a semi-truck are still years, if not decades, off.**

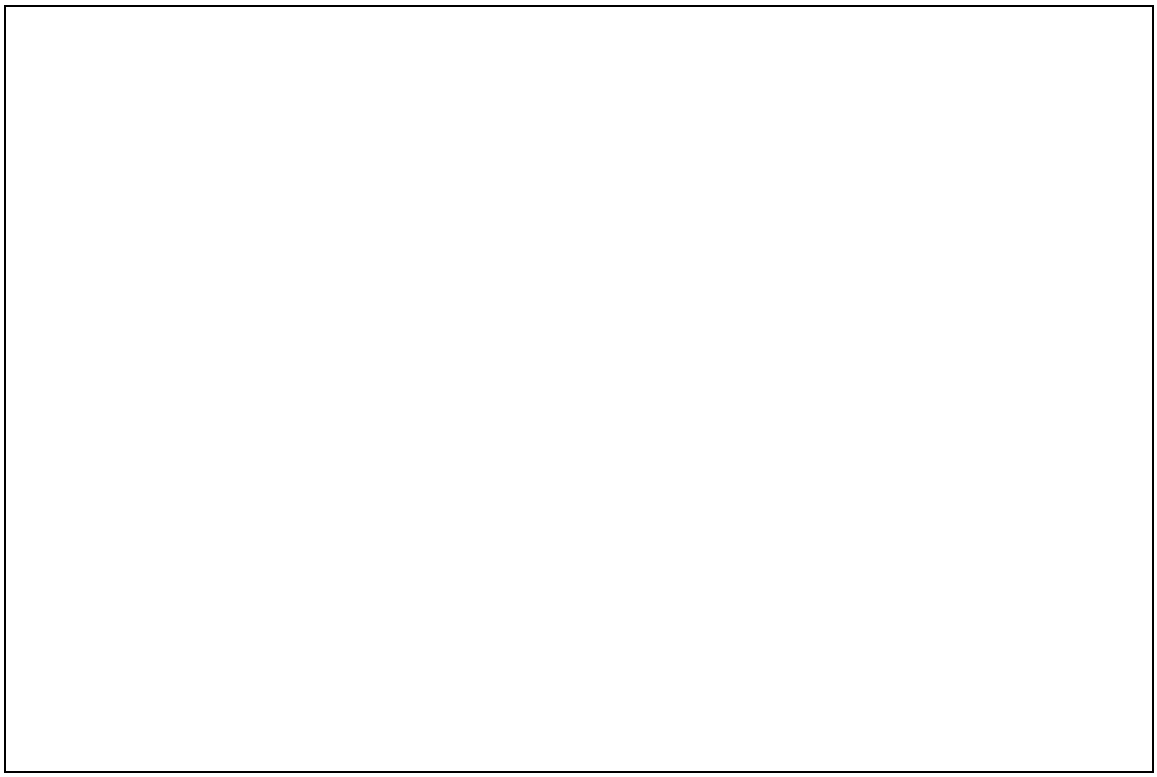
Furthermore, Musk has said little about the enhancements to the power grid that would be needed to power fleets of Teslaâ s semi-trucks.

> **â There are smart and dumb ways to incorporate this level of capacity requirement into the system, but either way, fully electrified road transport will need a large amount of new infrastructure,â** Feddersen told the Financial Times.

National Grid, which oversees Britainâ s electricity system, has suggested that in the most extreme scenario, electric vehicles could create as much as 18 gigawatts of additional demand for power at peak times in the UK by 2050.

This is the equivalent capacity of nearly six nuclear power stations on the scale of the Hinkley Point project under construction in the south-west of England.

Aurora posits that Tesla could try an engineering solution called segmenting â but that approach would come with technological hurdles of its own.

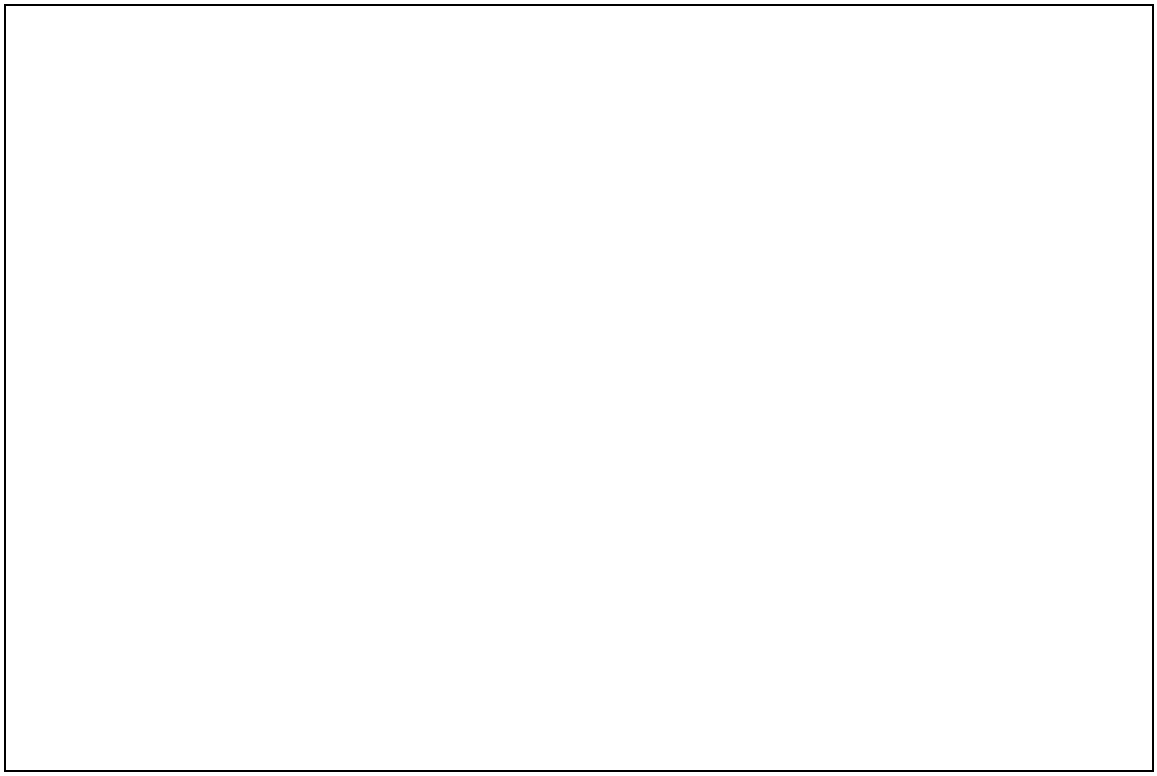


> â The fastest chargers today can support up to around 450kW charging, so itâ s not clear yet how Tesla will achieve their desired charging speeds,â said Colin McKerracher, head of advanced transport at Bloomberg New Energy Finance, a consultancy.

> **â One option may be to segment the battery somehow and actually charge different segments simultaneously. This adds additional costs and we haven't seen anything like that done at anywhere near this power output.â**

Tesla employees admit automaker is churning out a high volume of flawed parts requiring costly rework and casing deaths in crashes

- Tesla employees say the company is manufacturing a high ratio of flawed parts and vehicles that need rework and repairs.
- The electrical vehicle maker has had to ship some flawed parts to remanufacturing facilities to avoid scrapping them, rather than fixing them in-line, according to sources; Tesla denies this.
- CEO Elon Musk is under pressure to ramp up production of the Model 3 sedan, Tesla's first mass-market electric vehicle.

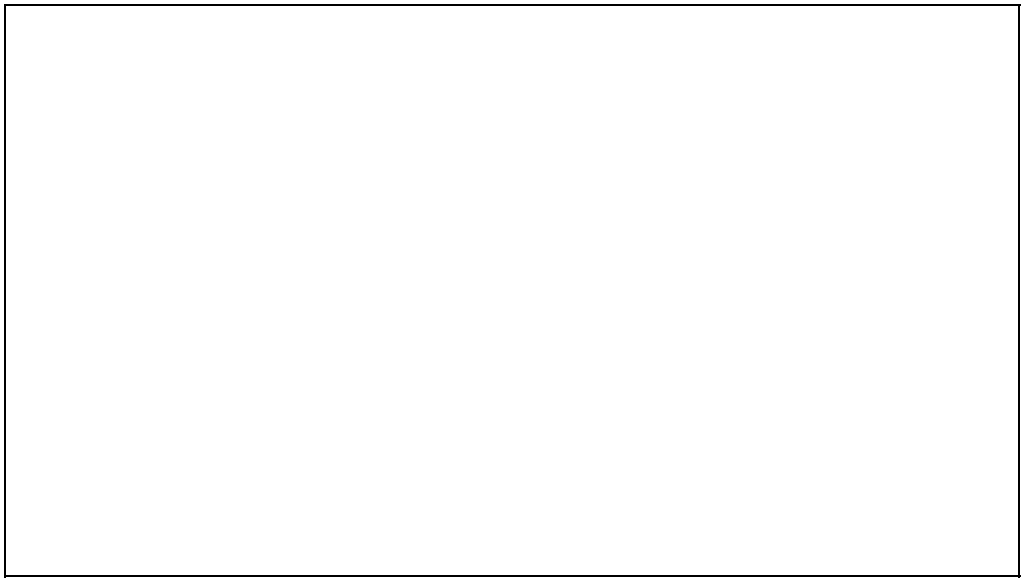


Lora Kolodny | @lorakolodny CNBC.com

Tesla churning out flawed parts, leading to more repairs 44 Mins Ago | 01:11

Luxury automaker Tesla is manufacturing a surprisingly high ratio of flawed parts and vehicles, according to several current and former employees, leading to more rework and repairs than can be contained at its factory in Fremont, California.

Tesla's future as a mass-market carmaker hinges on efficient, automated production of the Model 3, which more than 400,000 people have already reserved, paying $1,000 refundable fees to do so. Musk said in July 2017 that Tesla would probably be making 20,000 Model 3s per month by December.



Options traders betting on big Tesla rally 6:35 PM ET Mon, 12 March 2018 | 01:04

The company then later downgraded those expectations. It currently says it will make 2,500 per week by the end of this month and 5,000 per week by the end of June.

One current Tesla engineer estimated that 40 percent of the parts made or received at its Fremont factory require rework. The need for reviews of parts coming off the line, and rework, has contributed to Model 3 delays, the engineer said.

Another current employee from Tesla's Fremont factory said the company's defect rate is so high that it's hard to hit production targets. Inability to hit the numbers is in turn hurting employee morale.

To deal with a backlog of flawed parts and vehicles, said these current and former employees, Tesla has brought in teams of technicians and engineers from its service centers and remanufacturing lines to help with rework and repairs on site in Fremont.

Troy Harvey | Bloomberg | Getty Images

Jeffrey Straubel, chief technical officer and co-founder of Tesla Motors Inc., center, speaks as billionaire Elon Musk, chief executive officer of Tesla Motors Inc., left, and Yoshihiko Yamada, consultant at Panasonic Corp., look on during a press event at Tesla's new Gigafactory in Sparks, Nevada, U.S., on Tuesday, July 26, 2016.

They also said that sometimes the luxury EV maker has taken the unusual measure of sending flawed or damaged parts from Fremont to its remanufacturing facility in Lathrop, California, about 50 miles away, instead of fixing those parts "in-line."

The current and former employees declined to be named because they are not authorized to talk to the press.

Tesla flatly denies that its remanufacturing teams engage in rework. "Our remanufacturing team does not 'rework' cars," a spokesperson said. The company said the employees might be conflating rework and remanufacturing. It also said every vehicle is subjected to rigorous quality control involving more than 500 inspections and tests.

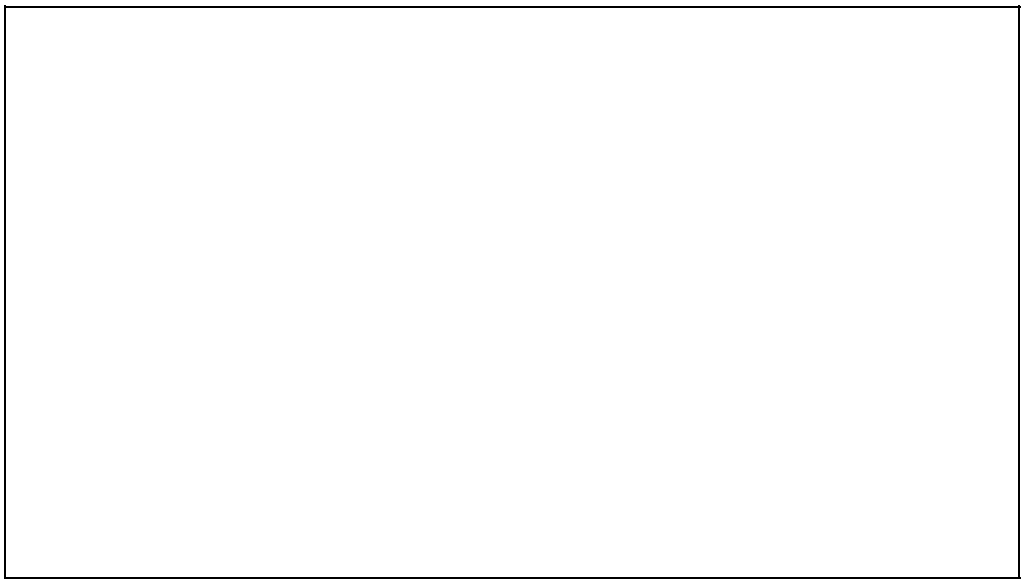
Lean manufacturing specialist Matt Girvan, founder of MAG Consulting, said: "Even during what is considered 'launch' mode, if a company is selling its cars to customers, it should not be experiencing large amounts of rework. This speaks to an internal quality issue that is on a magnitude that is not normal for most car manufacturers."

Tesla said that cars coming off the end of the line are reviewed in detail in an effort to "produce perfect cars for every customer." It said that most calibrations made at the end-of-line inspection are minor and resolved in minutes. Tesla also said that the efficiency of production has improved significantly: "Whereas before it took three shifts with considerable overtime to produce our target annual production of 100,000 Model S and X vehicles, now it can be done with only two shifts and minimal overtime."

Tesla has acknowledged problems with production of batteries, but said it is still on track to meet its target of 2,500 Model 3s per week by the end of March, and 5,000 Model 3s per week by the end of the second quarter.

Over the weekend, Tesla revealed that it halted its Model 3 production lines in February to give the company time to make improvements.

A company spokesperson said temporary downtime for equipment maintenance and commissioning is "common in production ramps like this." She said that there may very well be other periods of downtime on the line in coming months.



Tesla shares fell more 4 percent on Wednesday in a mixed market.

Remanufacturing and rework

In general, engineers involved in remanufacturing will evaluate and repair used vehicle parts, making them as good as new. Remanufactured parts usually go into certified pre-owned vehicles or into vehicles awaiting repairs.

While most car companies do remanufacturing to some degree, the majority outsource this work or leave it to parts suppliers today.

Tesla is different from most other carmakers because it's "vertically integrated" â meaning it owns and operates its dealerships, service centers and factories.

Joe Skipper | Reuters

SpaceX founder and Tesla CEO Elon Musk.

There isn't a big network of suppliers who can make or refurbish the parts that go into a Tesla, or any other electric vehicle, says Xavier Mosquet, a senior partner with Boston Consulting Group in Detroit. For those reasons, it's not surprising that Tesla runs "reman" lines of its own.

However, current and former employees say that Tesla leverages its remanufacturing group to deal with new car production problems, which is unusual. Tesla denies this is happening.

Job descriptions show that remanufacturing at Tesla includes a much broader set of responsibilities than refurbishing used parts.

One recent listing said candidates should have the "ability to identify and analyze new failures [sic] modes from both the field and manufacturing lines," suggesting that Tesla's remanufacturing line deals with parts coming off its own assembly lines.

Another for a team process leader in the "Vehicle Reman Center" in Fremont, California, where Tesla makes its new cars, said the candidate would "lead the Value delivery system created to repair and remanufacture Tesla electric vehicles," and "lead daily operations...on large volume, electric vehicle repair and reconditioning value streams."

Tesla claims that these job listings reflect the fact that remanufacturing experts evaluate and analyze a wide range of factors to figure out why a particular part failed in the field. These experts then sometimes feed this information back to other groups, including manufacturing groups.

Tesla also told CNBC its remanufacturing group included only 40 employees. However, at least one Tesla employee profile on LinkedIn references a team within the remanufacturing department that is comprised of 130 employees.

Mag Consulting's Girvan evaluated Tesla's remanufacturing job descriptions on sites including Tesla's careers page, LinkedIn and Glassdoor.

He said, "Problems are unavoidable in any factory. 'Rework' does happenâ ¦These listings speak to what is probably a large amount of product that has either not been built to specification or that has been built to an incorrect specification where the error wasn't found until later."

In autos, there is a widespread philosophy of "right the first time," Girvan added. Usually, automakers spend a lot of time on planning and prototypes before going into full production. One reason for a cautious approach is that too much scrap, and a high portion of parts that need rework, can eat into the already-challenging profit margins of auto assembly.

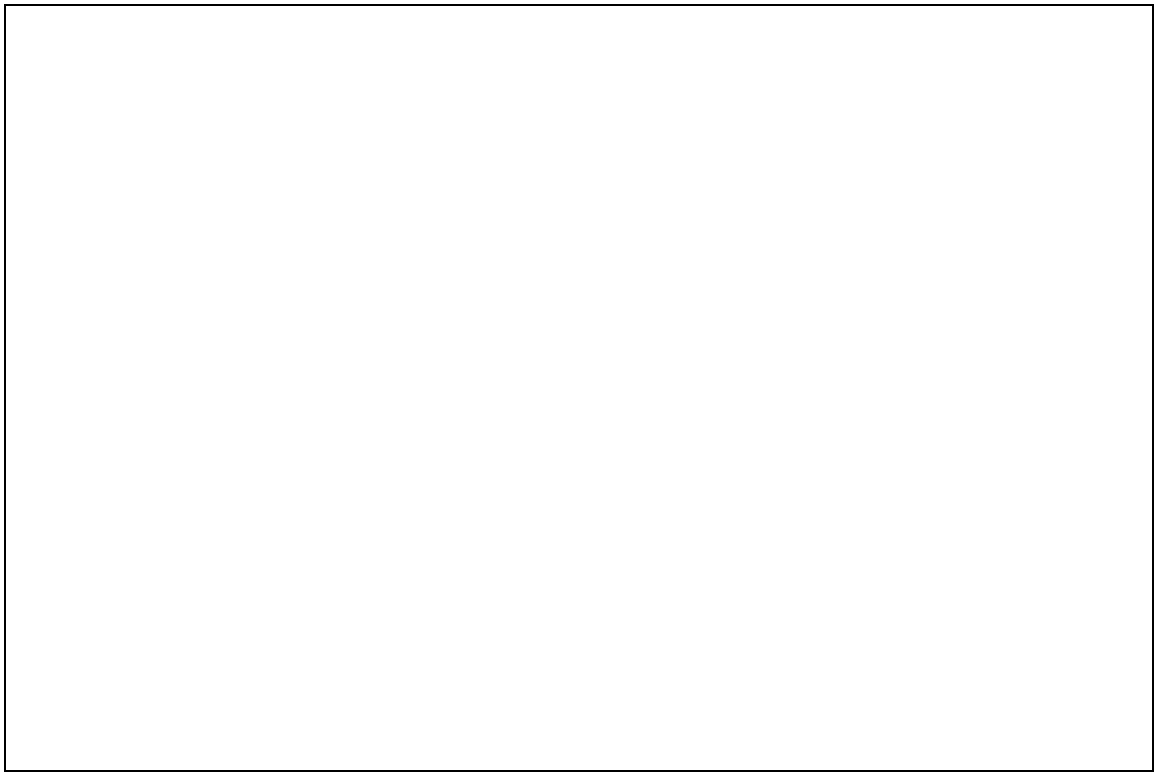
CNBC shared Girvan's analysis with Tesla. The company wrote, in response:

> "Remanufacturing is not unique to Tesla, it is something that other manufacturers do too. Remanufacturing involves taking older parts and reconditioning them so they can be used for cars when they eventually come in for service. Rather than making new parts from scratch, this is good for the environment and if done well, is equally good for the customer. Any 'expert' claiming there is something unusual about this or that it has something to do with the quality of cars that come off a production line is either very confused or just completely wrong."

Tesla did not disclose its "first pass yields" to CNBC.This number indicates what portion of a manufacturer's new cars were created using standard processes, not requiring the extra effort and expense of rework.

At least, Girvan said, "It's better to catch a defect in the factory and fix it -- far better than something occurring in the field involving a customer's vehicle."

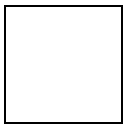
Regarding the overall quality of its cars coming off the line, Tesla issued the following statement:



> Our goal is to produce perfect cars for every customer. Therefore, we review every vehicle for even the smallest refinement. We care about even the smallest imperfection like a slight paint gloss texture or a wheel alignment check. We then feed these improvements back to production in a pursuit of perfection. This is reflected in the overall efficiency of the factory, which has improved dramatically. For example, the number of labor hours needed to complete a Model S or Model X vehicle has decreased. Whereas before, it took three shifts with considerable overtime to produce our target annual production of 100,000 Model S and X vehicles, now it can be done with only two shifts and minimal overtime. Nothing speaks to this more than the fact that Tesla has the highest customer satisfaction levels and the highest

> percentage of customers who say that their next car will be a Tesla in the entire global auto industry.

In terms of the line stoppage in February, Tesla issued this statement:



> Our Model 3 production plan includes periods of planned downtime in both Fremont and Gigafactory 1. These periods are used to improve automation and systematically address bottlenecks in order to increase production rates.

WATCH: Tesla's $2.6B stock award for Musk too high, per ISS

Tesla's $2.6 billion stock award for Musk is too high: ISS 11:31 AM ET Fri, 9 March 2018 | 01:16

Correction: *One reference in this article misstated Tesla's current production projections. Tesla says it will be making 2,500 Model 3s per week by the end of March, and 5,000 per week by the end of June.*

The Circle of Green Payola â Big Money, Big Democrats, Big Bribes and Climate Change

D. Acker, E. McGregor, Z. Gukai, R. Perry, N. Tam, A. Wong, S. Jennings, iStock/Getty

James P. Pinkerton

The Green Fleecing of America

Remember the Beatles song, â Day Tripperâ ?Â You know, the 1965 tune, forever in rotation somewhere, that includes the lyric, â It took me so-o-o long, to find out.Â And I found out.â Â Well, thatâ s the way I feel about green energy. *I found out.Â* Call me slow if you wish, but I can explain.

You see, I was always puzzled as to why the greensâ starting from the top with Joe Biden and his must-hire from the donor class, climate envoy John Kerryâ have been so adamant about â de-carbonizingâ the U.S. and yet have been so uninterested when the rest of the world keeps â carbonizing.â Â If someone wants to use a gas stove in the U.S., the greens are noisy in opposition, and yet when China builds a slew of new coal plants, they are silent. And, as some say, silence means consent.

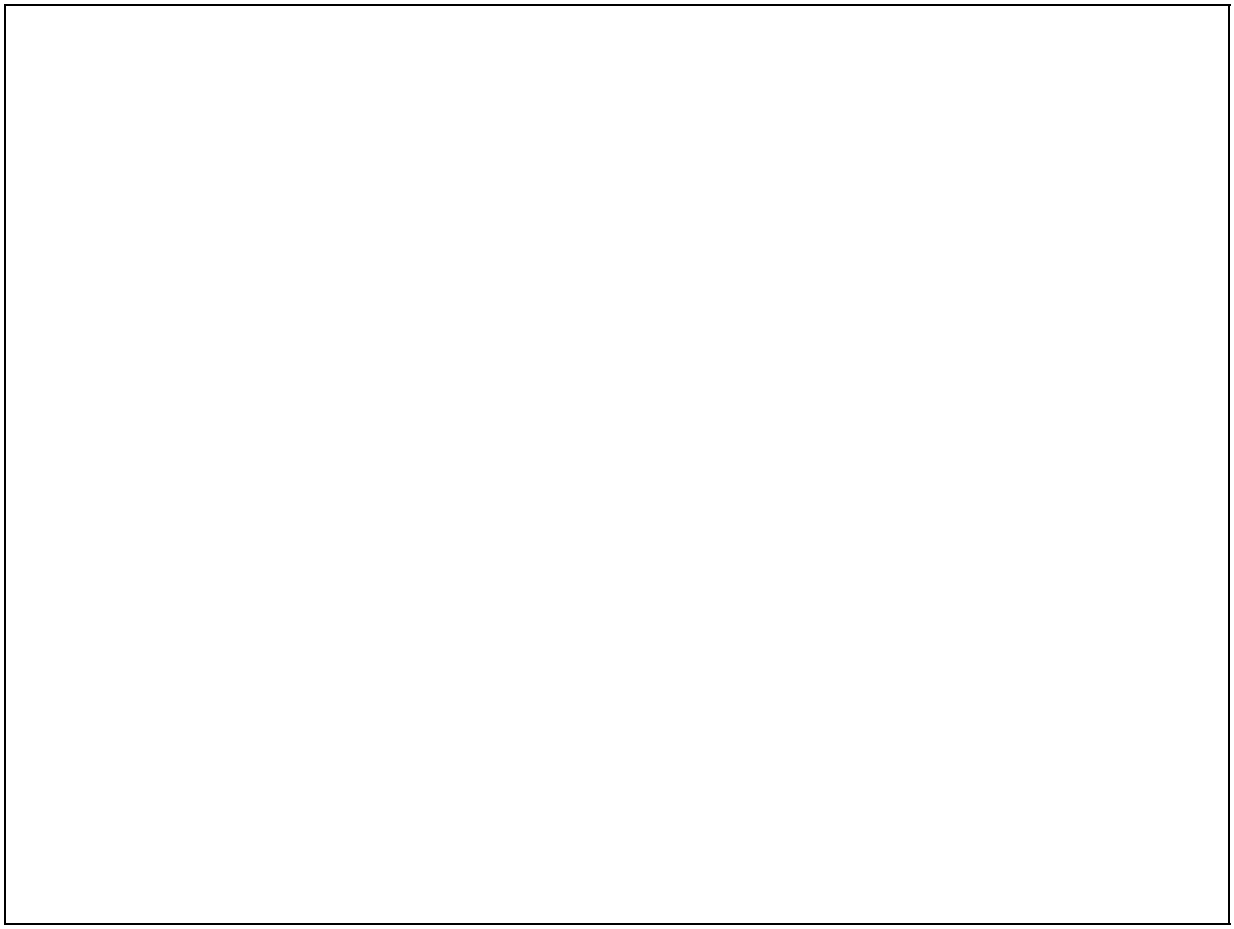
According to a new study from the Centre for Research on Energy and Clean Air, China permitted 50 gigawatts of coal-fired electricity in 2022, up 50 percent from the year before.Â (A gigawatt is a billion watts, enough to power a few hundred thousand homes, depending on the weather.)Â And *Semafor* adds â all signs indicate that the surge will continue this year,â such that China will be building new coal plants, every two years, equivalent to existing U.S. capacity.

So whatâ s the Biden administration doing about this coaling up? *Nothing*! (Unless you count waiting a week before shooting down an intruding Chinese balloon as something.)

Smoke and steam rise from a coal processing plant in Hejin in central Chinaâ s Shanxi Province on Nov. 28, 2019. (AP Photo/Olivia Zhang)

But seriously, why the silence?Â If, as Biden likes to say, â Climate change is literally an existential threat to our nation and to the world,â doesnâ t that call for doing something drastic? And shouldnâ t China be equally alarmed?Â Doesnâ t Beijing Â *follow the science?*

Yet the Chinese communist regime has managed to stay calm, even as it engages in what *Semafor* calls a â frenzyâ of coal-plant building. The Chinese communists *say* theyâ re going to deal with climate change, on their own timetable.Â In 2021, maximum leader Xi Jinping said to the United Nations, â China will strive to peak carbon dioxide emissions before 2030.â Â Got that?Â He said they â will strive.â Â *As in, weâ ll â striveâ to stop. You trust us, right?Â Now, no more questions.*



When the Chinese communist regime talks like this, what does the Biden administration do in response?Â It says something nice about Chinaâ s good intentions, albeit maybe they still have some work to do.Â Thatâ s it.Â And then the Bidenites go back to work on what they *really* care aboutâ killing carbon energy in the U.S.

Just on February 24, PJM, a consortium of power companies from the Mid-Atlantic to the Midwest, supplying 65 million customers, issued a report finding that new Biden environmental rules would force the â retirementâ of coal and natural gas plants between now and 2030.Â (You know, the way Blade Runners â retiredâ Replicants in the 1982 Harrison Ford movie.)Â As PJM put it, â Retirements are at risk of outpacing the construction of new resources.â Â Other close observers make the same finding; as Brian GittÂ says, â Expect soaring electricity prices & more frequent power blackouts.â

> We're witnessing a slow motion train wreck.
>
> Expect soaring electricity prices & more frequent power blackouts.
>
> Over reliance on wind & solar cause suffering to the poorest among usâ a high cost for false moral comfort. https://t.co/i0MdUMRi9c
>
> â Brian Gitt (@BrianGitt) March 4, 2023

And thereâ s still more zealotry from the greens, of course. We are supposed to get rid of our gas stoves, and our cars (even the electric ones) and adjust all our appliances. Again, why?Â So we can reduce our CO2 by a piddling amount while the Chinese are swamping the atmosphere with oodles more CO2?Â Whatâ s up with that?Â What sense does that make?

Hereâ s what I used to think about green thinking: I thought they were sincere but misguided, focusing on strange distant goals as opposed to real-world needs.Â Furthermore, I thought many of them were moved by a kind of spiritual belief.Â In fact, back in 1997, I wrote a piece in which I argued that the greens were ensorcelled by New Age romantic poetry, which I dubbed â enviromanticism.â We all know, or have read about, green activists who are genuinely moved by some lyrical, mystical faith.Â Itâ s hard to argue with them, for the same reason itâ s hard to argue religion with anyone.Â And we can add that this sort of metaphysical thinking has penetrated deep into the elites, and even into middle-class suburbia.Â Â And of course, some areÂ simplyÂ hysterical, as in the case of Rep. Alexandria Ocasio-Cortez (D-NY), who blurted out in 2019,Â â The world is gonna end in 12 years if we donâ t address climate change.â

Rep. Alexandria Ocasio-Cortez (D-NY) speaks at a news conference in front of the U.S. Capitol on February 7, 2019. (Alex Wong/Getty Images)

But if the green movement were nothing but hippies, housewives, heiresses, and hysterics, it wouldnâ t be nearly as strong or as big as it actually is. One green consultancy calculated in 2020 that the green economy was worth $1.3 trillion and projected it to increase by 2050 to $10.3 trillion.Â You donâ t get to that kind of money by thrumming in a drum circle or carrying a picket sign. And just on March 1,Â Elon Musk, in cheerleading words of Bloomberg News, â outlined his vision for a switch to electric vehicles; as Bloomberg News put it, â driven by $10 trillion in spending to develop sustainable energy worldwide.â Hmmm. One guess as to where that $10 trillion is going to come from. (Hint: The rich get richer by risking other peopleâ s money.)

So maybe itâ s time think some more about Uber-Green motivations. And, as they say, *Follow the money.*Â

Tesla Motors CEO Elon Musk speaks at a press conference in Hong Kong on Jan. 25, 2016. (Nora Tam/South China Morning Post via Getty Images)

Like others at Breitbart News, Iâ ve written a lot about BlackRock and other big finance outfits.Â How theyâ ve used ESG (environmental social governance) investing, as well as other opaque tricks, to deploy some $17 trillion in Â a green direction. For a look at how these companies operate, we can consider BlackRockâ s â Investment StewardshipÂ Annual Report,â released in September 2020. The report pats itself on the back for all the good deeds BlackRock had done and will do:

> In 2020, we identified 244 companies that were making insufficient progress integrating climate risk into their business models or disclosures. Of these companies, we took voting action against 53, or 22%. We have put the remaining 191 companies â on watch.â Those that do not make significant progress risk voting action against management in 2021.

Such wokeness might be fun power tripping for BlackRock, but it is not the same thing as green money for investors as a whole. For instance, Sen. Dan Sullivan (R-AK) warned last month that ESG was costing investors money:Â

> [A] studyÂ conductedÂ byÂ the University of California-Los AngelesÂ andÂ New York UniversityÂ found that,Â over the past five years,Â ESG funds underperformed the broader market, averaging a 6.3percentÂ return compared to 8.9Â percentÂ return respectively. Additionally,Â in comparison to other investment plans, ESG investors generally end up paying higher costs for worse performance.

Gee, is it possible that BlackRock and the rest have been getting less returns for their investors by seeking out woke green investments? Messing with, maybe, their *fiduciary duty*? Such corporate wokeness is a puzzlement.Â For sure, it doesnâ t work to disinvest from proven energy sources and invest instead in speculative energy sources that donâ t provide power in a crunch.

BlackRock CEO Larry Fink speaks virtually during the Bloomberg Green Summit on climate change on April 26, 2021. (Daniel Acker/Bloomberg via Getty Images)

But all that begs the question: Doesnâ t work for *whom?* Perhaps *overall* returns are lowerâ so the retired school teacher in Dubuque may see less money in her pension checkâ but perhaps at the same time certain *sectoral* returns are higher. And so perhaps certain insiders are doing better even as outsiders are doing worse.

Woke Is Not Broke If You Play It Right

Similarly, maybe the *overall* health of the economy is not important to these green high financiers.Â

Maybe what *is* important to them is the value of their *own portfolios*. That is, if their holdings consist of solar power, then they need to sell solar power, and thatâ s all there is to it.Â Is the worldâ all 190 or so countriesâ buying it?Â Maybe not. But the U.S. has a big market, and so does Europe.Â ObviouslyÂ thatâ s good enough to make money. The green capitalists would like it all, sure.Â But if they canâ t get it it all, theyâ ll take what they can get.

If one thinks this way, then all of a sudden, the pieces fit together better.Â Letâ s consider the dynamic at play here: The Chinese are building coal plants?*Â Okay, we werenâ t going to to sell anything to China anyway; now, back to solar here.Â* The American economy is hurt by carbon-fuel restrictions?Â Workers, at say, the Keystone Pipeline lose their jobs?Â *Too bad.Â My solar stocks are up.Â* Mines get shut down in Minnesota while slave labor is used in Africa to dig the same minerals and metals?Â *Thatâ s okay, Iâ m not invested in Minnesota, but I do want to see a steady supply of imported cobalt, etc., for my battery company.*

So we can see: The people driving these decisions in America are not dumb. They know that they canâ t give John Kerry-type orders to the world, because most other countries donâ t want to impoverish themselves. Â But theyâ re hoping that *weâ re* dumb. Â That is, by sounding the climate alarm, they figure they can bamboozleâ or simply orderâ us into buying their stuff, even as the rest of the world is not interested in buying it. Yes, itâ s breathtakingly audacious, what theyâ re tying to do.

But asÂ the song goes, â I found out.â Â I might not be as fast someâ you, dear reader, might well have been ahead of meâ but I get there eventually.

U.S. climate envoy John Kerry (L) speaks with Chinaâ s special climate envoy Xie Zhenhua during a session at the World Economic Forum annual meeting in Davos on May 24, 2022. (Fabrice COFFRINI/AFP via Getty Images)

So hereâ s what I think now:

The green movement still has all those hippies, housewives, and heiresses (and heirs, and any other gender you can imagine), and they provide visibility and votes.Â And yet the real steel in the â movementâ is not cultural nor mysticalâ itâ s *financial*.Â And the financial has begotten a hard-edged kind of *political*.Â That is, politicians and political activists who are intensely focused on delivering green goods for their financialist paymasters.

So this new breed of green-financed pols *says* that itâ s worried about overall atmospheric CO2.Â But thatâ s just a cover.Â TheyÂ donâ t really worry about China, or India, because they know that they canâ t affect those countries. They have minds of their own, and theyâ re strong.Â What American green polsÂ *really*Â care about is guaranteeing that green capitalists can sell green energy to America and to Europe.Â You know, solar panels, windmills, electric vehicles, batteries.Â And to sell whatever theyâ re wanting to sell to you and me, they hire politicians, mostly Democrats, to make laws that make us buy it.

Am Iâ m being too cynical?Â Thatâ s a hazard of living here in Washington, D.C.Â As they say inside the Beltway, â The cynicism here is terribleâ itâ s so hard to keep up!â Â However, cynicism is also a survival skill, and so Iâ m glad that my CQ (Cynicism Quotient) improved after reading this article in *The Washington Free Beacon*, bluntly headlined, â How Bidenâ s â Green Energy Economyâ is Benefiting Left-Wing Billionaires.â Â Reporter Collin Anderson gets right to the point:

> President Joe Bidenâ s taxpayer-funded push to build a â clean energy economyâ is benefiting the leftâ s most prominent billionaire megadonors, including Bill Gates and Laurene Powell Jobs . . . Bidenâ s Energy Department has in the last two months announced nearly $3 billion in loans to two electric battery companies, Redwood Materials and Ioneer, which are backed by seed funding from Gates, Jobs, and other left-wing billionaires. Now those billionaires, who have poured millions into the effort to win Democrats power in Washington, are likely set to see a handsome profit from their initial investment. Ioneer, for example, won a $700 million loan from Biden and saw its stock price increase by 33 percent after the announcement.

The key entity here is the Energy Departmentâ s Loan Program Office (LPO) which had been best known in the past for loaning money at concessionary rates to Solyndra, which went bust in 2011, and to Fisker, which went bust in 2013.Â (And by the way, Fisker was going to make cars in Delaware; and yes, Hunter Biden was nearby.)

Emerson Collective Founder and President Laurene Powell Jobs speaks during TechCrunch Disrupt SF 2017 on September 20, 2017, in San Francisco, CA. (Steve Jennings/Getty Images for TechCrunch)

But now, thanks to the hilariously misnamed Inflation Reduction Act, LPO has $300 *billion* to push out the door; Sen. Tom Cotton (R-AR) dubs LPO â a green energy slush fund.â Â (Of course, what Cotton calls a â slush fundâ is what a green capitalist calls â my nest egg,â and what a green-bought politician calls â vital to our energy future.â) Anderson continues:

> Bidenâ s green energy grants are going to groups funded by the same people who poured money into dark money groups that helped get Biden elected. In July 2021, Redwood raised

> $700 million from a â carefully selected group of strategic investors,â including Gates and Powell Jobs, who participated in the fundraising round through their investment firms. . . . In 2020, Gates sent $127 million to a liberal dark money network working to elect Democrats, while Powell Jobs gave left-wing candidates and political groups more than $2 million.

In comparison to Gatesâ $127 million, Powell Jobsâ $2 million might seem like petty cash, but we should keep in mind that she paid $100 million to buy a 70 percent stake in the left-leaning, Biden-and-Democrat-supporting *Atlantic* magazine.Â Once she bought the mag, she went on a hiring spreeâ it was the Trump era, and Democrats needed jobsâ and so it now loses $10 million a year.Â In other words, while Powell Jobs is not up at the Gates level, she has real skin in the game in helping the Democrats.Â That ought to count for something, right?Â And is it so wrong to speculate that maybe she should be compensated for her help by having the feds give her a nice E-Z money loan?Â It would seem that the Biden administration thinks thatâ s perfectly fair.Â Why not?Â After all, itâ s the governmentâ s money, not their money, that theyâ re handing out.

President Joe Biden speaks during the COP26 climate talks in Glasgow on Nov. 2, 2021. (Robert Perry/EPA/Bloomberg via Getty Images)

Green capitalismâ the fusion of greenism and cronyismâ is a proven model.Â Ask former vice president Al Gore.Â His net worth has risen from $2 million in 2001 to $330 million today.Â Not bad, and do not think for a minute that he ever flies commercial. Â ut still, Gore isnâ t even a billionaire.Â Other greens aspire to a lot more green.Â And with the Biden administrationâ s help, theyâ re getting it.Â So now, how to keep the green circle of money flowing?

Iâ m guessing that Bidenâ s re-election campaign is going to be well funded.Â So, all looks good for him and his rich green clients.Â Unless, of course, the American people find out.

Dept. of Energyâ s Steven Chu: Not As Dumb As He Says!

By Randall Evers

The massive number of horrific corruption incidents, payola, company failures, uranium and lithium mining scandals and crony kickbacks that occurred under the leadership of Secretary of Energy Steven Chu has been called *â The accidents of a feeble mindâ* . Chuâ s backerâ s claim that he was *â ...just too technical to notice all of the corruption around him...â*

That is just a load of BS!

Steven Chu planned and organized the crimes that he was involved in.

The Crony Corruption Political Payola Quid Pro Quo In The U.S. Department of Energy

By Amy Lester, Brad Conners, Steven Reed

- Bribes and crony quid pro quo political payola payments are paid to politicians in Washington DC and Sacramento, California to keep tech monopolies in power!!!

- Citizen groups are making certain that FinCEN and the FBI are coming for each of these Tech Scum!

- The victims are Filing Federal Charges And requesting that the FBI Investigate Every One Of These Crooks Using Digital Forensics!

The United States Department of Energy runs a political crony payola slush fund operation. They don't "*support green cars*"; they support "*greenbacks for crony insiders who financed political campaigns*". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. Most observers think that the Department of Energy needs to be sued by the government on behalf of the citizens that were harmed and defrauded by the agencies schemes.

The DOE non-crony victims were specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives who they knew, and their Silicon Valley oligarch financiers.

Dept of Energy officials and operatives attacked applicants because those applicants cooperated with investigations would not cooperate with their sex trafficking, tax evasion, off-shore money laundering, political bribery quid-pro-quo, revolving door payola scams, foreign nation-sponsored domestic manipulations, stock market rigging, internet censorship and search engine manipulation and other crimes. They attacked him because he reported their crimes to federal police. They attacked him because his products obsoleted their products. They attacked him using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. He is owed damages compensation, witness fees and back-pay.

- The FBI and other law enforcement organizations define a "cartel" as: 'An association of industrialists and business firms organized covertly to establish a national, or international monopoly, via price fixing and ownership of controlling stock, to operate a trust or monopoly to reduce competition between themselves by allocating markets, censoring public knowledge, manipulating governments or controlling the price and production of media, products and/or services.' This case is about a criminal "cartel". The Silicon Valley Cartel is an organized criminal enterprise!

In 2007, if someone said: â The Social Security Administration and other government offices have been weaponized to provide revenge, retribution, reprisal and retaliation attacks against witnesses, whistle-blowers and journalists...â you might have laughed. Over 2000 victorious lawsuits and IG investigations later: That statement has irrefutably been proven, in courts, to have been totally true.

It is now well documented in Court and in federal investiagtions that Over 120 companies (listed by name, below, sell attack services to well known politicians. Applicantâ s investigators have proven that â kill servicesâ were hired by public officials and aimed at Applicant, and other citizens.

In this case, one Applicantâ s Senators have made many tens of millions of dollars in profits and bribes off of Google. Google is applicantâ s competitor, patent infringer and operator of the largest of the attacks. Google, Literally, controlled and staffed, The White House in 2008. The financing, command and control, deployment and beneficiaries all point directly to the perpetrators in this case. The FBI, FinCEN and other investigators have â no doubtâ about who attacked Applicant and the scope of the spy agency tactics that were used.

"Government officials and their Silicon Valley cartel financiers are refusing to pay our damages, blocking our legal rights, operating spy agency-type reprisal attacks and running cover-ups. We demand that they pay us for our damages back fees and harms from their felony crimes.. - Ask the FBI to show you the 302 reports on this case. Demand that we get a fair Jury Trial. End these bribes and payola schemes. U.S. Government : PAY OUR DAMAGES!... 'Hundreds of millions of dollars of crony bribe cash uncovered in covert family trusts, stealth real estate holdings, shell corporations, Cayman Islands hidden accounts, false-front Goldman Sachs accounts, and nepotism deals held by Harris, Boxer, Feinstein, Pelosi, Reid, Biden, etc. They were was supposed to protect us and, instead, lied to us, ran hit-jobs against us and competed with us! We found out that our political representatives own the stocks and assets of our competitors, have sex and party with our competitors, get tens of millions of dollars of election manipulation services from our competitors and use government spy and public services agencies to screw us over. Most of our political representatives work for corporations who abuse the public and they do it out of pure mercenary greed and lust for power. It is now well documented in Court and in federal investigations that Over 120 companies (listed by name, below, sell attack services to well known politicians. Applicantâ s investigators have proven that â kill servicesâ were hired by public officials and aimed at Applicant because of his effective law enforcement cases. Police records prove that the arrested and/or charged financiers (Howard Rubin, Ed Buck, Roger Boas, Jeffrey Epstein, Joe Lonsdale , Eric Schmidt, Andy Rubin, Sergy Brin, Steve Bing, Michael Goguen, Forrest Hayes, Tom Perkins, etc.) of these public officials ran a national sex cult in which some victims were murdered and many were underage. The depth of their sick depravity proves that the perpetrators will stoop to any crime, using the highest levels of government resources, to cover-up their crimes. The Complainant helped

investigate some of these perverted perpetrators and has had government agencies deployed to attack him in reprisal, retribution, retaliation efforts as payback. "

SPECIAL FOLLOW-UP REPORTS:

"They put HIT-JOBS on us!"(LINK) say the victims.

EACH CITY, STATE, COUNTY AND FEDERAL OFFICIAL CHARGED IN THIS MATTER WAS RECEIVING STOCK MARKET ASSETS, DIRECT CASH PAYMENTS, POLITICAL CAREER EXCLUSIVES, SEX WORKER EXCHANGES, REAL ESTATE PERKS, PROMOTIONS AND OTHER BRIBES; AND THOSE OFFICIALS HAD INVESTMENT, PERSONAL AND POLITICAL AFFILIATIONS WITH THE ADVERSARIES CHARGED HEREIN; AND THOSE OFFICIALS HAVE BEEN FOUND, BY FEDERAL INVESTIGATORS, TO HAVE USED SPY AGENCY RESOURCES TO ATTACK PLAINTIFF IN REPRISAL AND IN ANTI-COMPETITIVE BUSINESS INTERFERENCE.

Don't Be A Sucker! GOOGLE IS A CRIME EMPIRE! Stop Falling For Alphabet's Lies! (LINK)

Most of the money in the 2008 and 2021 "Stimulus" funding has been steered to companies who are political friends and financiers of The White House! We are an ad hoc crowd-sourced team of: citizens, federal agency investigators, news journalists, crime victims, forensics experts, insiders, whistle-blowers, and others, seeking justice and an end to the cover-ups!

(LINK 4) (LINK 5) (LINK 6) (LINK 7) (LINK 8)

MOVIE TRAILER PREVIEW INTRO:

Victim's engineering team, as early as 2005, had informed the Department of Energy, in writing that, as Lithium ion batteries age, the dendrite defects in their internal chemistry cause the batteries to constantly increase their tendency to blow up.

External forces, moisture, ambient energy waves and other factors, increase their tendency to self-ignite. Department of Energy Secretary's of Energy, their staff, White House and CIA executives have been proven, via their public stock brokerage records, to own lithium ion battery companies and child labor rare earth mining interests.

That is why they cover up the dangers of toxic lithium ion (the burning smoke of which causes cancer, brain and fetus damage) and sabotage efforts to market fuel cells, ultra caps, nicad batteries and competing alternative energy storage: in violation of anti-trust laws.

Proterra Buses are now blowing up, Tesla is known for blowing up, Boltâ s are now blowing up. Ener1 batteries destroyed millions of dollars of Fiskerâ s when they got wet... The Department of Energy has hundreds of reports proving this to be a fact.

Citizens demand an end to this cover up that allows corrupt politicians to profiteer on the death of Americans!

How The Social Security Administration And The IRS have been ILLEGALLY Weaponized For Payback Revenge Reprisals Against Our Whistle-Blowers And Journalists

â ¦ Social Security, SSI, SDI, Disability and other earned benefits were stone-walled. Applications for benefits for the Plaintiffs were intentionally â lostâ like a â Lois Lerner hard driveâ . Files in the application process â disappearedâ . A U.S. Senator ordered Plaintiffs benefits to â never be approvedâ even though Plaintiffs worked 60 hour+ weeks for decades in service to their nation and their community. A SSA official in the local SSA office, who had a devout expressed hatred against one United States President ordered a benefits blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the White House.

Forensic evidence and backgrounders on every person who worked on, or had access to, Applicants files, records, benefits decisions and related data sets shows that a number of those employees and contractors were members, financiers, web promoters or supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type groups. In San Francisco and Marin Counties SSA offices, in employees workspaces and on their Facebook and MySpace sites, many employees proudly display pictures of themselves wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records and IG investigations show that SSA has the highest percentage of political activist employees of any federal agency.

Such persons are inclined to become drunk with power when allowed access to the trillions of dollars of government technology on the SSA file and decisions systems. A number of these persons have worked for, or with, U.S. Senators and other politicians who targeted Applicant in political reprisal. At least 3 persons in the San Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons in Marin SSA office are known to have engaged in such actions. Applicants funding and benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his provision of testimony to federal investigators in a trillion dollar political corruption matter involving famous political figures featured in global news coverage. A vast number of agency abuse cases and lawsuits are now on public record in the Inspector General's offices and federal courts.

It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders from certain corrupt politicians. These actions are felony violations of the law.

Federal and State Agencies including SSA, FEC, DOE, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens.

In the Congressional investigation published by the United States Congress in review of the U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was used as a slush-fund by some DOE executives in order to pay off campaign financiers by attacking and sabotaging their competitors.

The DOE Paducah Gaseous Diffusion Plant under contracts with the Department of Energy and the government-owned U.S. Enrichment Corp paid $5M whistle-blower awards to those whistle-blowers who were attacked, using government agency resources, for reporting a crime.

Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for $4.1 million. The settlement in the whistle-blower case comes almost one year before the case was set for a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him, by DOE officials, in retribution for reporting a crime.

VA officials attacked hundreds of citizens who reported corruption, ie:
https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution.

As shown in this report:
https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-departmen

, Agencies attack often and harshly.

CIA and NSA executives have been widely shown to use spy tools to attack domestic citizens they don't like, ie:
https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating
, and hundreds of other news links that can be provided.

Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed attacks on business competitors.

In Civil Action No. 1:13-cv-00777-RBW GOVERNMENT AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS AND PUNISHED IN THE COURT AND THE MEDIA!

The IRS, and hordes of other government agencies have been caught and proven, IN COURT, to target and attack people for presumed political differences.

Why should we assume that the Social Security Administration is not ALSO doing this too to harm citizens who speak out?

The Lois Lerner IRS attacks took many years to resolve. In an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the Obama Administration, because of their political viewpoints and issued an apology to those people for doing so.

In addition, the IRS is consenting to a court order that would prohibit it from ever engaging in this form of unconstitutional discrimination in the future.

In a proposed Consent Order filed with the Court, the IRS has apologized for its treatment of U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials, the agency now expressly admits that its treatment of our clients was wrong and a total violation of our Democracy..

As set forth in the proposed Order:

â The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to heightened scrutiny and inordinate delays, and demanding of some Plaintiffsâ information that TIGTA determined was unnecessary to the agencyâ s determination of their tax-exempt status, was wrong. For such treatment, the IRS expresses its sincere apology.â

Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agencyâ s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast.

The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRSâ s express acknowledgment of â and apology for â its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future.

Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers.

In addition to the IRSâ s admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs the following:

- A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entityâ s name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint;

- A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entityâ s name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and

- A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights. Disparate treatment of taxpayers based solely on the taxpayersâ names, any lawful positions the taxpayers espouse on any issues, or the taxpayersâ associations or perceived associations with a particular political movement, position or viewpoint is unlawful.

In the Order, the IRS has also agreed that (unless expressly required by law) certain actions against the Plaintiffsâ i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an organizationâ s officers, etc.) â would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for exposing the targeting scheme.

Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., â policy positionsâ) and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just â inappropriateâ â as TIGTA found â but, as alleged, blatantly unconstitutional.

To ensure consistency and uniformity within the agencyâ s operations going forward, the IRS is required, pursuant to the Order, to inform all employees within the Exempt Organizations Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the Orderâ s terms.

This Order not only validates allegations about their treatment at the hands of the corrupt Obama-era IRS but also provides important assurances to the American public that the agency understands its obligation to refrain from further such discriminatory conduct. As Attorney General Sessions acknowledged in this regard, â [t]here is no excuse for [the IRSâ s] conduct,â as it is â without questionâ that the First Amendment prohibits the conduct that occurred here, i.e., subjecting American citizens to disparate treatment â based solely on their viewpoint or ideology.â Sessions further confirmed his Departmentâ s commitment to ensuring that the â abuse of powerâ in which the IRS engaged here â will not be tolerated.â

It is impossible to overstate the importance of this victory. This marks a years-long fight for justice in defense of the constitutional rights of the public.

This is an extraordinary victory against abuse of power and corruption.

It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution and manipulate the IRS, SSA and other agencies in order to silence and shut down those who speak out about political corruption crimes.

In the wake of Wisconsin Watchdogâ s investigation into SSA staff allegations of incompetence, misconduct, and retaliation in Social Security disability appeals offices, several employees have taken their complaints to a Senate committee led by Wisconsin Sen. Ron Johnson.

An official with knowledge of the complaints said the Senate Homeland Security and Governmental Affairs Committee, chaired by the Oshkosh Republican, has received emails and other contacts from â certain peopleâ inside the Social Security Administrationâ s Office of Disability Adjudication and Review.

The initial complaints came from an employee inside the Milwaukee office following Wisconsin Watchdogâ s opening investigative report that found some claimants waiting more than 1,000 days for an appeals decision on their disability benefits claim.

Following Wednesdayâ s story of a whistleblower in the Madison ODAR office, the committee has received more specific complaints about retaliation against employees, the source said.

Committee staff members sent the latest Watchdog piece to SSA administrators hoping they will â cooperate,â the source said. To date, the agency has been less than cooperative.

â This is an ongoing process, and they are not always as forthcoming as weâ d like them to be,â the source said. â Hopefully with your continued reporting, this is an issue they canâ t duck.â

A Senate committee member said officials there are working with the Office of Special Counsel on â multiple whistleblower retaliation claims.â The committee continues to request information from the SSA.

The whistleblower in the Madison office claims management retaliated against her after she was called to testify in a misconduct case. The incident involved â inappropriate behaviorâ by an administrative law judge, she said.

â They are so corrupt. Itâ s absolutely horrible,â said the woman, a lead case technician in the Madison Office of Disability Adjudication and Review.

She spoke on condition of anonymity, fearing more retribution from her supervisors. While she said recounting her particular experiences will more than likely betray her identity anyway, the ODAR case worker insisted she has had enough.

â Iâ m at point where they donâ t care about me, I donâ t see why Iâ m protecting them. This is my last resort,â she said. â I want to do my work without fear of retaliation.â

She said she has contacted the Senate committee.

â I forwarded my information to them and I got an email back from them. They said people are coming out of the woodwork with their complaints (about ODAR) following your story,â the whistle-blower said.

Ronald Klym, a long-time senior legal assistant in the Milwaukee ODAR office, alleges he has been retaliated against by supervisors for going public with his charges of incompetence and misconduct in the agency.

The federal employee, who has worked for SSA for 16 years, provided Wisconsin Watchdog with documents showing extremely long wait times for claimants appealing their denied applications for benefits.

Doug Nguyen, SSA regional spokesman, in a previous story said the agency acknowledges that Milwaukee ODAR has a â high average processing time for disability appeal hearings, and we are working to address the issue.â

Beyond the delays is what Klym calls the â shell game,â the wholesale transferring of cases to other parts of the country by administrators to make the Milwaukee officeâ s numbers look better than they are.

The Madison office whistle-blower confirmed Klymâ s allegations, saying at one point she saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation.

There are over 10,000 SSA disability manipulation charges against SSA executives and staffâ ¦.â

SEE THE TRUTH ABOUT ELON MUSK

WHAT DOES THE FBI NEED TO INVESTIGATE AND REPORT TO THE PUBLIC ABOUT:

Ever since 2004, a group on insiders in Department of Energy programs have warned that at the very moment the United States will be ramping up electric vehicle development manufacturers will be running up against the weakest link in the supply chain â a shortage of battery materials combined with a scheme to put the few

sources of battery materials under the monopoly control of Silicon Valley tech oligarchs who hate hydrogen fuel cells because they obsolete batteries. The financiers of Presidential political campaigns own and control all of the TRILLIONS of dollars of lithium and rare earth mining in the world. U.S. Energy Secretary's Jennifer Granholm and Steven Chu work for those tech oligarchs and own parts of their companies. They only shovel money to their friends. They hate the perfectly-operational fuel cell cars that Hyundai, Kia, Honda and Toyota sell because fuel cell cars don't explode and set their owners on fire, like Elon Musk's lithium batteries do. Fuel Cell cars can go wayyy further on less energy and they weigh a huge amount less.

Why it matters: The bottleneck puts the United States at a major disadvantage to China, which controls most of the world's battery minerals mining and processing.

- Without further action, the U.S. risks becoming as dependent on imported batteries as it was on foreign oil â or repeating mistakes of the past with solar panels or smartphones which are now made primarily overseas.

The big picture: Amid tougher emissions regulations worldwide, automakers are racing to add more EVs to their lineup, while phasing out internal combustion engines.

- Planned EV investments jumped 41% in the past year, to $330 billion globally by 2025, according to AlixPartners.
- In the U.S., President Biden has made vehicle electrification a core element of his clean energy strategy.

Those EV goals are at risk, however, without a secure supply of advanced lithium ion batteries â and the raw materials like lithium, nickel, cobalt and graphite that go into them.

The state of play: The U.S. recently laid out a national blueprint for lithium batteries, which aims to establish a secure supply chain for battery materials and technology by 2030 in ways which only benefit DNC insiders.

- "It will take a strategic investment by the federal government, in concert with industry, to stand up more domestic manufacturing capability," U.S. Rep. Mike Doyle (D-Penn.) said at the DOE roundtable.
- Compared to other countries which invest in manufacturing through public-private partnerships, "we are bringing a knife to a gun fight," said U.S. Energy Secretary Jennifer Granholm.

What's happening: The Energy Department said June 14 it would channel $200 million in funding over the next five years to U.S. national labs to support EV- and battery-related research.

- The DOE also said that battery projects can qualify to borrow from the $17 billion available under the Advanced Technology Vehicle Manufacturing loan program, created during the Obama era.

A lawsuit filed by Louisiana shows that an obscure nonprofit organization operated as part of a larger nonprofit founded and largely funded by Silicon Valley billionaire Pierre Omidyar attempted to manipulate local election officials to apply for grants from the Mark Zuckerberg-funded Center for Technology and Civic Life (CTCL) where those officials were "hard wired" to get the money as bribes to put DNC candidates in office who would funnel taxpayer cash back to tech billionaires in Silicon Valley.

They filed the lawsuit on behalf of the State of Louisiana against CTCL, New Venture Fund DBA Center for Secure and Modern Elections, Dawn Maisel Cole, a private individual; and Full Circle Strategies LLC, â to

prevent the injection of unregulated private money into the Louisiana election system.â But these Silicon Valley oligarchs are doing this in every state, organized by David Plouffe, Steve Westly, Steve Spinner, John Podesta and related parties.

The lawsuit alleged:

- The New Venture Fund, operating in Louisiana under the trade name Center for Secure and Modern Elections (CSME), partnered with CTCL to solicit applications and information from Louisiana officials in connection with proposed grants [from CTCL as part of the $350 million in grants made nationwide in the 2020 election].
- CTCL and CSME worked their grant scheme in the State of Louisiana through a lobbyist by the name of Dawn Maisel Cole, owner and operator of Full Circle Strategies, LLC, as their Louisiana representative and agent to target registrars of voters, clerks of court, and local election officials.
- The scheme targeted 13 parishes, some to receive contributions of more than $500,000, accompanied by a request for detailed information about the operations, conduct and expenses of the registrars/clerkâ s office.
- Ms. Cole directly solicited registrars and clerks of courts to accept contributions from CTCL and New Venture Fund for the operation of their respective offices.

These practices were prohibited, the lawsuit argued, because:

> â ¦private contributions to local election officials are unlawful and contrary to the methods for election funding established by law in the State of Louisiana, and such contributions by these defendants should be declared illegal and permanently enjoined.

The lawsuit was significant in part because it highlighted the role an obscure organization called the Center for Secure and Modern Elections, which describes itself as a â fiscally sponsored project of the New Venture Fund,â played in advancing the efforts of the Mark Zuckerberg-funded CTCL in privately funding the administration of the 2020 election.

The New Venture Fund, in turn, is part of Democracy Fund, whose website says it is â an independent and nonpartisan, private foundation that confronts deep-rooted challenges in American democracy while defending against new threats.â

Pierre Omidyar, a Silicon Valley billionaire who founded Ebay, also founded and financially backs Democracy Fund:

> Democracy Fund has committed more than $150 million to support a healthy democracy. Established by philanthropist and eBay founder Pierre Omidyar in 2011 and incubated inside Omidyar Network, Democracy Fund launched as an independent foundation in July 2014 and is a part of The Omidyar Group.

Civitas, a well connected public affairs firm founded and staffed by Democrat activists, counts CSME among its clients, but its website is unclear what services it provides the group.

According to the Form 990 Democracy Fund filed for 2019, the organization provided a $275,000 grant to CTCL that year.

As was reported:

> Private funding of election administration was virtually unknown in the American political system until the 2020 presidential election, when Facebook CEO and founder Mark Zuckerberg and his wife Priscilla Chan donated $350 million to the Center for Technology and Civic Life (CTCL), which provided funding to county and municipal governments around the country for election administration, and $69 million to the Center for Election Innovation and Research (CEIR), which provided funding to 23 state governments, primarily through the Secretary of Stateâ s office, also for the funding of election administration.

In late October, a Louisiana judge ruled against Landry and in favor of the defendants, as The Advocate reported:

> Judge Lewis Pitman, of the 16th Judicial District in St. Martin Parish, ruled against Landry in the lawsuit last week. Landry said in an interview he would appeal the ruling. . .
> In Louisiana, the clerks of court and registrars of voters had applied for around $7.8 million [in CTCL grant money], which the local officials said they would use to help pay for additional costs brought on by the pandemic. That includes equipment, personal protective gear and wages for election workers staffing early voting sites for longer hours.
> The local officials have since backed off the grant money and wonâ t be tapping into the funds before the Nov. 3 election. Early voting is already underway.

According to the CTCL website, not a single Louisiana parish or city ended up with funding from CTCL in the November 2020 election.

But the previously obscured relationship between CTCL and CSME highlighted in the October 2020 lawsuit by Louisiana Attorney General Landry suggests that the relationship between these two groups may have extended to many states beyond Louisiana.

The two groups, for instance, delivered a joint presentation on election administration issues in January 2019. Scott Seeborg, the CSME contact in that January 2019 presentation, was hired in April 2020 as the Pennsylvania State Director for All Voting is Local, a non-profit whose mission statement says, â We fight to dismantle barriers to the ballot well before the next election, so that every voter can cast a ballot that counts.â

According to its website, â All Voting is Local Action is a campaign of The Leadership Conference on Civil and Human Rights. We fight for the right to vote in eight states with distinct assaults on the right to vote.â

Those eight states are Georgia, Arizona, Florida, Pennsylvania, Ohio, Wisconsin, Nevada, and Michigan.

The Leadership Conference on Civil and Human Rights website states:

> The Leadership Conferenceâ s founders came together in 1950 out of the belief that the fight for civil rights could not be won by one group alone, but needed to be waged in coalition.
>
> Our members â which have grown from 30 civil and human rights organizations at our founding to more than 200 today â differ in size, scope, and structure. But what transcends our differences and unites The Leadership Conference coalition is our enduring common purpose: full equality for all.
>
> That common purpose gave our leaders the wisdom to see that civil rights are womenâ s

> rights and LGBTQ rights and immigrant rights and workersâ rights and disability rights and human rights. That common purpose is our coalitionâ s inheritance. It is a living legacy that binds us together â in cause and community.

According to the website of the Leadership Conference Education Fund, â All Voting Is Local [is] housed within Access Democracy, an incubated project of The Leadership Conference Education Fund, [and] fights to protect and expand the right to vote for every American.â

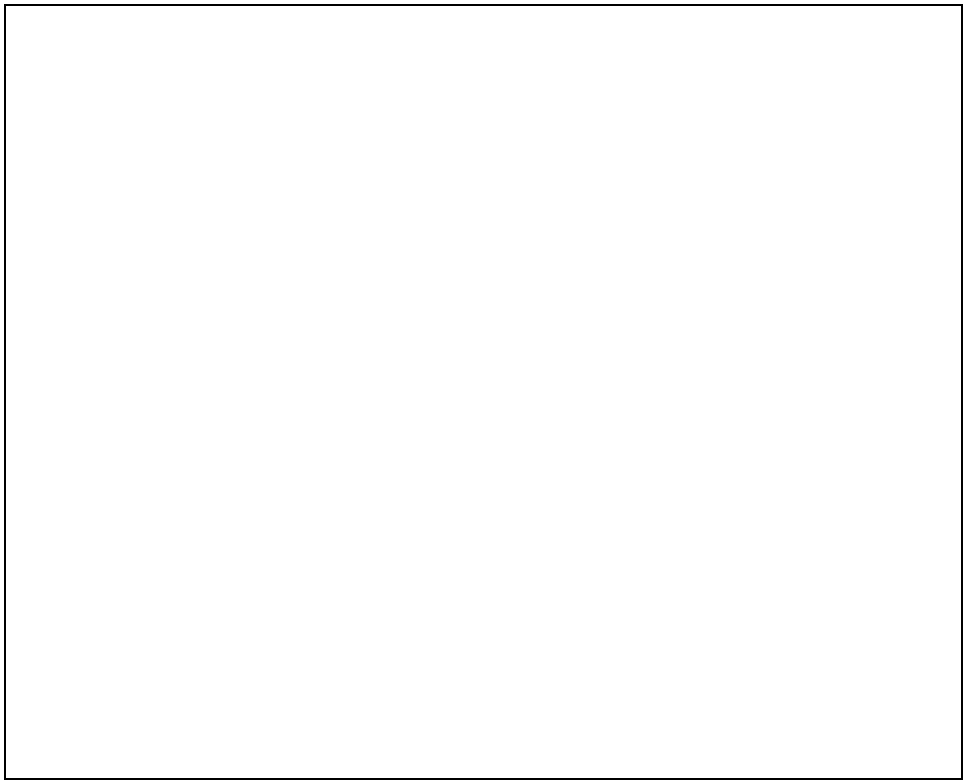
Investigators will explore the relationship between CTCL, CSME, All Voting is Localand the Silicon Valley Cartel's national election manipulations.

Tesla And Lying Elon Musk Asked Chinese Government To Help Censor Social Media Posts Critical Of Musk

We have been tracking Elon Musk's fading relationship with the Chinese Communist Party for the better part of the last 18 months. And while we can barely guess what the temperature of the ever-changing relationship is today, one thing seems to be certain: Musk and the Chinese government are growing closer.

And for proof of that, look no further than a new Bloomberg Businessweek article profiling Elon Musk's struggles in China. While the content of the article isn't entirely new - our readers are likely very familiar with the story - one portion of the report was stunning: Musk, in true CCP form, reportedly asked the Chinese government to censor the company's critics.

In speaking about how Tesla is trying to create relationships with journalists in China, Bloomberg buried the lede in dropping this bomb:



> Previously focused on state-run media, Tesla is now trying to build relationships with auto-industry publications and influencers on platforms such as Weibo and WeChat, for example by inviting them on factory tours, and conducting group â discussion sessionsâ with policymakers, consumers, and media outlets. According to people familiar with the matter, itâ s also complained to the government over what it sees as unwarranted attacks on social media, and asked Beijing to use its censorship powers to block some of the posts.

It appears to be more proof positive not only that Musk is working closely with the CCP, but also that Musk may be adopting their tactics for "holding the narrative together".

Recall, we were first, with the help of well-known short seller Montana Skeptic to ask in April of 2020 whether or not Musk risked becoming a Chinese asset, due to how much of a necessity China was becoming to Tesla's business operations.

Things were mostly quiet until the beginning of 2021, when in January, Musk called the Chinese government "more responsible" to its citizens than the U.S. government. In March we noted how Musk continued to kiss the ass of the CCP, singing the praises of the country and its government.

Then, in April 2021, a spat emerged between Musk and the CCP, supposedly after a protestor at the Shanghai Auto Show in April "went viral" after standing on top of a Tesla vehicle and decrying the car's brakes. This led to intense shaming by Chinese media, who called Tesla's handling of the situation a "blunder" and suggested it could "inflict serious damage" on Tesla with the Chinese market.

Since then, we noted that the Chinese government still didn't seem amused by Musk until May of this year, when Musk made a public about-face on Bitcoin and was then immediately praised by China's state owned Global Times. In fact, the Global Times then published a piece stating that "work at Tesla's Shanghai Gigafactory is going smoothly," just days after it was reported that Tesla was halting its expansion in China, seen as key to its plans to export from its Asia headquarters.

As of July, deliveries in China have picked back up and Musk is back to his old self, praising China, even in response to Chinese state-owned media:

> In case anyone was wondering who is pulling the strings: https://t.co/9WAAkwI1PA
> â Quoth the Raven (@QTRResearch) July 1, 2021

Recall, our initial April 2020 report on China and Musk referenced Montana Skeptic's blog called "Tesla's Transformation Into A Chinese Company Seems Unstoppable", which sought to critically examine why the company's Shanghai factory could be a negative for Tesla, how Tesla's China operation could ultimately compete with Fremont and what the Chinese may ultimately gain from having Musk as an ally.

The article first addressed the questions of:

- Who calls the shots at Tesla Shanghai?
- What are the interests of the Chinese leadership?
- Whom does the Shanghai factory actually benefit?
- How will Shanghai affect Teslaâ s operations elsewhere?
- When will Teslaâ s security filings reflect the economic reality?

And now it looks like the mainstream media is getting around to asking these very same questions. We can't wait for the answers...

Nancy And Paul Pelosi Making Millions In Crooked Payola Stock Trades In Companies She Actively Regulates - Stock Tips As Bribes

BIG TECH'S ORGANIZED POLITICAL CORRUPTION OPERATION

Most politicians, today, go into politics in order to scam money via bribes and payola. Their corruption is easy to prove with a simple spread-sheet, but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you could easily see how they only get a salary of $190K per year but put hundreds of millions of dirty dollars in their accounts. That Dark Money all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day....BUT, These Senators have "rules" that delay investigations against themselves. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate!

The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.

As an analogy: If you wanted to plan one of the largest crimes in history, you could use street 'Stop Signs', for example.

You know that the government pays for all of the stop signs. You could have your friends buy all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories in advance. You then bribe your politicians and fake news outlets to proclaim that there is a global crisis of people running stop signs and killing school children. You manufacture this "stop sign running crisis" that will "kill all of the children within 15 years" if we don't stop it. You claim that the stop sign running is "man made" and caused by your political opponents because they make whiskey and that causes stop sign running. You get your politicians to create a giant "stimulus" that ends up almost exclusively giving all of the stimulus money to you and your corrupt crony friends who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

The people who make yellow warning lights and other traffic control devices are cut-out of all those funds because they are competitors to the insiders who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

In the pretend "stimulus" the government treasury funds are used to payola your friends monopolies and cut all of their competitors. If you had done these "stimulus scams" in 2008 and 2021 and evaded paying taxes like Elon Musk did....you would have pulled off a trillion dollar crime with you and your friends.

In actuality, when federal and private investigators traced the instigators and beneficiaries of some other notorious "crisis" things: they and their politicians turned out to all be the exact same handful of people who owned all of the exclusive "solutions" to the manufactured "crisis".

The Silicon Valley Cartel began in California. Elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road in Palo Alto and start an insider venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal 'old boys club' manner.They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime".

In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPAâ s shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Teslaâ s, etc.

The 2008 and 2021 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts!these mobsters (Google, Tesla, Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes.

The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than $100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over $15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes.

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars;

Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities!

LITHIUM AND RARE EARTH CORRUPT CHILD LABOR MINES FOR ELON MUSK'S DEADLY BATTERIES

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL!

NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid,

Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one.

Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins". It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

Mining lithium poses environmental risks. The Biden ...

https://dailyiowan.com/2021/06/15/mining-lithium-poses-environmental-risks-the-biden-administration-isnt-ignorin

Biden and his Democratic Party offer themselves as environmental defenders. It would be a big deal if they sacrificed local environmental safety in the quest to meet national or global climate change goals. Most lithium mining comes with an environmental cost, and a major new Nevada project has drawn lawsuits from environmental groups.

These are the "Khaki Pants Mobsters Of Palo Alto"! The "Silicon Valley Mafia" is comprised of The Sand Hill Road venture-capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) facade (Greylock Capital; Kleiner Perkins Caufield & Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, Linkedin, etc.) that they control.

They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control and who own stock in their operations. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds.

They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America Foundation, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders.

They collude with black-lists, valuation payola, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife trades, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts.

They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. In the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers.

They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis practitioners, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths.

They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Some of the top crooks and bribe-payers include: Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Andy Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Richard Blum, Jeff Epstein, Tim Draper, Steve Jurvetson, etc.

They order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution.

THE SCAMS OF ELON MUSK AND TESLA MOTORS

The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets.The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources! We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects. Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded.

Now the damages must be paid for, one way, or another. Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess. Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing.

If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds. Tesla is known as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk's racism and sociopath behaviors. He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. Space-X is just a domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-reading chips.

GOOGLE'S ABUSES OF THE PUBLIC AND OF DEMOCRACY

Google exists to mass manipulate populations and run stock market scams for Google's owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend': Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception.Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking... This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. Google is a criminal operation.

It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies on competitors and steals their technology - Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk - Google lies to the public about what they really do with the public's data - Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes - The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door

jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities.

Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day - In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks.

Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent $30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations - Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds.

Google, and itâ s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Googleâ s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

THE TECH CARTEL

The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control;

they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing.

These are massive crimes! The perpetrators operate a massive and abusive n Nancy And Paul Pelosi Making Millions In Stock Trades In Companies She Actively Regulatesational sex cult. The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals,The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over $30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg.

At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved this these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book:

THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. - 90% of these guys came from 100% of the fraternity houses involved in the recent college rape cases.

THE HIRED CHARACTER ASSASSINS AND KILLING THE WHISTLE-BLOWERS

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How A Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. - How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? - In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: Candiru (DNC); IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. - These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! - These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. - This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press. - Timm writes: â Today, we are revealingâ for the

first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls â SPYGATEâ . - It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â) - In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: - Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.-

Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together

to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups. - Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony.

The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. - Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions. - Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target.

These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. - Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a "buzzing sound" in your

head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head".- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ .

Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds. - Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject. - Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth.

The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will â Fair Useâ , SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, WikiPedia and other protective rights apply. get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. - Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal. - There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and

incapable of fighting back, against even the smallest version of one of these "kill orders".

A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. - Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

Whistle-blowers reporting this corruption have adopted a Silicon Valley "Insurance Policy". If attacked or harmed again, the victims will use 100% legal eye-for-an-eye tactics on a scale so massive it will be recorded in history books. If you look at A.) their United States Federal Patent awards (proving they think of new technologies first) and B.) the news coverage of what exotic technological aerospace, internet, media and other things they have built in the past and, C.) the well known technologists that they work with, and, D.) the headline-making federal investigations and lawsuits that they have launched you will see that: 1.) They can produce technological developments that nobody has seen before and that affect millions of users. 2.) They can out-create most any government official. 3.) You can't imagine what they can build or have already built. 4.) Even if they are killed, the thing they deploy will still self-function autonomously. This will all be done using things that are currently totally legal and massively effective. ie: Don't kill the messengers and they won't shame you into oblivion! â Fair Useâ , SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, WikiPedia and other protective rights apply in this reporting.

The Department Of Energy Is Obama Slush Fund Even With Obama Out Of Office

Bob Beauprez

Newly released communications regarding the loan approval for Solyndra, the now failed California solar energy company, show direct intervention by an Energy Department adviser and Obama campaign fundraiser, and raise new questions of possible involvement by Rahm Emanuel and the President. As more is learned, it becomes increasingly clear that the Administration used the Stimulus, and specifically the green energy loan program, as a campaign slush fund to distribute billions of dollars like party favors to supporters and to grandstand for re-election to a perceived constituency.

By mid-2009, the White House was obsessing to make headlines with an announcement of a $535 million loan to Solyndra as the first of many green energy loans in the DOE's pipeline that would be funded by the recently passed Stimulus. Initially the staff tried to schedule an announcement by Obama, and later as approval was delayed, they shifted to the Vice-President.

"Ron said this morning that the POTUS definitely wants to do this (or Rahm definitely wants the POTUS to do this?)," a White House staffer told an Obama scheduler on August 17, 2009 according to *The Washington Post*. This was a reference to Ron Klain, Chief of Staff at that time for the Vice-President. "Rahm" refers to Rahm Emanuel, Chief of Staff to the President.

CARTOONS | AF Branco

View Cartoon

The Solyndra loan was finally approved in September 2009 over a plethora of warnings and objections from within the Department of Energy, the Office of Management and Budget, and numerous private and solar industry experts. Following the company's collapse, questions have haunted the White House of possible political corruption and cronyism as investigations revealed that executives and investors in Solyndra were also significant donors to the Obama campaign with repeated access to top White House officials. In addition, critics charge that the administration disregarded objective financial analysis, and blindly threw billions of taxpayer dollars at green energy companies like Solyndra with little chance of success.

Oblivious to the warnings from his own White House advisers that the company was in serious trouble and would run out of cash in September, 2010 (and it did), Obama visited the Solyndra headquarters in May 2010 and hailed it as "leading the way toward a brighter and more prosperous future."

The Washington Post is also reporting that Steve Spinner, a major Obama 2008 campaign fundraiser, later appointed by the White House to "advise" the Department of Energy regarding the green energy loan program, applied heavy pressure on DOE officials for approval of the $535 million loan guarantee for Solyndra.

"How (expletive) hard is this? What is he waiting for?" Spinner wrote to a DOE official by email on Aug. 28, 2009 questioning why the Solyndra application was not already approved. "I have the OVP (Office of the Vice-President) and the WH (White House) breathing down my neck on this. They are getting itchy to get involved."

Later the same day, Spinner asked the same DOE official to "walk over there and force him to give you the answer."

In another exchange just minutes after getting an email from Solyndra, Spinner fired off a message to the DOE officials asking if the White House budget office (OMB) had completed their review. "Any word on OMB? Solyndra's getting nervous," he wrote.

The loan was pushed through, and on September 4, 2009 Joe Biden announced by video link the deal as the "unprecedented investment this Administration is making in renewable energy and exactly what the Recovery Act (Stimulus) is all about."

Spinner's involvement is in direct contradiction of previous representations by the DOE. Spinner had specifically recused himself from the Solyndra application because his wife's law firm, Wilson Sonsini Goodrich & Rosati, represented the company on the DOE loan and pocketed $2.4 million in legal fees for their efforts.

The AP reports that an administration official, speaking on condition that he not be identified because of ongoing investigations in the evolving scandal, said that Spinner "clearly was actively involved in facilitating between DOE and OMB."

Joe Biden was partially correct â unfortunately. Solyndra is typical of what the billions of Stimulus dollars tossed around by the Obama Administration was "all about" â about waste, cronyism, and corruption. The taxpayer is on the hook for $535 million, but before this is done some once big shots in Washington will deservedly be cut down to size.

This summer, the Ukrainian government awarded the rights to develop a huge complex of oil and gas fields in the country to an American company that is co-owned by a former campaign donor to then-Energy Secretary Rick Perry. The decision annoyed the heads of the state-owned Naftogaz conglomerate, which had competed and lost the bidding for the contract. Now, Naftogaz has filed a lawsuit seeking to overturn the deal, two sources familiar with the matter tell TIME, casting a spotlight on Perryâ s role in Ukraineâ s oil and gas industry.

The suit was filed on Friday afternoon in the District Administrative Court of Kyiv, the sources tell TIME, and has not been previously reported. In a draft of the complaint obtained by TIME on Monday, Naftogaz alleges that the government of Ukraine acted illegally and with bias in July when it granted the oil and gas fields to an American company that is co-owned by Michael Bleyzer, one of Perryâ s longtime allies and financial backers.

Bleyzer, a Ukrainian-born energy investor from Texas, insists that his company won the oil and gas exploration rights in Ukraine fairly and without any political influence. He says that the committee of government officials that made the decision was advised by outside experts who saw broader advantages in doing business with the U.S.

â The bid submitted by our company was judged as superior by the interagency committee as advised by a group of independent experts,â Bleyzer wrote in an email to TIME. â It was and is Ukraineâ s goal to bring in much needed-foreign expertise and investment to find new fields, a goal advanced by this award.â

The Department of Energy (DOE) denied that Perry advocated for the business interests of any specific individual or company during his tenure as Energy Secretary, which ended this month. Rather, a department spokesperson said, Perry advanced the general interests of the U.S. energy sector. â Throughout his tenure at DOE, Secretary Perry championed the American energy industry all over the world,â Shaylyn Hynes, a spokesperson for the Department, said in a statement on Sunday. â [T]hroughout his engagements with

Ukrainian officials Secretary Perry consistently called for the modernization and reform of Kyivâ s business and energy sector in an effort to create an environment that will incentivize Western companies to do business in Ukraine.â

Perryâ s efforts to shape the energy sector in Ukraine have played out alongside the Trump Administrationâ s campaign of political pressure in the country. Starting this spring, Perry was part of a trio of senior U.S. officialsâ dubbed the â three amigosâ â who took the reins of American policy in Ukraine. A whistle-blowerâ s complaint about Trumpâ s pressure campaign resulted this fall in an impeachment inquiry by Congress, which ended last week with the drafting of two articles of impeachment against the President.

Though Perry has played a relatively minor role in the impeachment saga so far, he was at the forefront of the parallel, and possibly intertwined, effort to influence the Ukrainian energy sector. During a meeting in May, Perry presented the President of Ukraine, Volodymyr Zelensky, with a list of Americans who could advise Zelenskyâ s government on energy policy. Among the people he suggested was Bleyzer, who has supported Perryâ s political campaigns over the years, including with a reported $30,000 contribution to Perryâ s campaign for governor of Texas in 2010.

At the time of Perryâ s visit to Kyiv in May, Zelensky was seeking a meeting with Trump in hopes of bolstering Ukraineâ s alliance with the U.S. against Russia, which invaded Ukraine in 2014 and continues to occupy parts of the country in Europeâ s only active war.

The Associated Press reported in October that Perryâ s proposal was part of an effort to install new leadership at Naftogaz. Some of the advisers Perry recommended were meant to join the companyâ s supervisory board, the AP reported. Bleyzer and the Department of Energy both denied pushing for changes to the board. In his email to TIME, Bleyzer wrote that Perry never suggested appointing him or anyone else to the board of Naftogaz. â For the record no one ever discussed this position with me, and I never would have considered it,â he wrote.

However, Bleyzer was advanced by the Department of Energy as a possible advisor to Ukraine on energy policy. â I participated in a couple of conversations with the DOE staff where they expressed an interest in creating an informal group that could help the DOE develop energy independence strategy for Ukraine. I would characterize these conversations as brainstorming in nature,â Bleyzer added. â Nothing ever came out of that idea.â

About two weeks after Perry proposed Bleyzer as an energy adviser to Ukraine, a company that Bleyzer co-founded, Ukrainian Energy, put in a bid for the rights to explore for oil and gas in a vast complex of fields known as Varvynska, the largest of nine energy licenses that the government put up for auction this year. Bleyzerâ s only competitor for that field was a subsidiary of Naftogaz called UGV, whose bid appears to have been higher, at least in terms of the price it offered and the investments it promised to make, according to bidding documents reviewed by TIME. The Associated Press reported the apparent disparity in the bids last month.

â We know our offer was better,â Andriy Kobolyev, the CEO of Naftogaz, told TIME in an interview on Nov. 22.

Still, when the government decided the results of the tender on July 1, Bleyzerâ s company won out, securing the exclusive rights to develop the complex of oil and gas fields for up to 50 years. â We are very annoyed with this,â Kobolyev, the Naftogaz CEO, told TIME last month. â Very annoyed, to say the least. And when we are annoyed, we usually do act, and we will.â Asked whether he intended to take legal action, Kobolyev answered, â Canâ t comment.â

But lawyers for Naftogaz were then already at work preparing a lawsuit that seeks to overturn the results of

the auction, according to the two sources with direct knowledge of the claim. UGV, the subsidiary of Naftogaz, is listed as the plaintiff in the lawsuit, according to the draft of the complaint. The document asks the court to nullify the governmentâ s decision to award the fields to Bleyzerâ s company, and to order the government to hold a new competition for the licenses to those fields. The defendants are listed as the Cabinet of Ministers of Ukraine, the Ministry of Energy and Coal Mining of Ukraine and the government commission that awarded the rights to the fields this year. Neither Perry nor Bleyzer is named in the draft complaint.

May 24, 2019Stephen Colbert assembles a team of experts to investigate the whereabouts of the world's most elusive creature: Secretary of **Energy** Rick Perry. #LSSC #Colbert #RIckPerry Subscribe To "The Late ...

According to this article, in 2011 former Secretary of Energy Steven Chu appointed Lauren Azar to a position at the DOE in order to carry out the administration's political agenda.

> Chu's selection of Azar was largely seen as a sign of the Obama administration's intense interest in expanding the grid to support renewables and tackle climate change, sources said.

Azar got the finger pointed at her as the impetus for a controversial memo that urged federal power marketing agencies (PMAs) to use their authority to help get privately funded transmission projects built.

> As laid out in the memo, she also championed Texas-based Clean Line Energy's application to partner with DOE through its never-before-used authority under Section 1222 of the Energy Policy Act, which would allow a PMA with federal authority to site the line and overcome state opposition.

It's not about reliability or economics of the grid, it's about federal support for certain companies with personal ties to the DOE:

> Jimmy Glotfelty, founder of Clean Line Energy Partners and a former senior electricity adviser for President George W. Bush, said Azar should be remembered for trying to build infrastructure and integrate renewables in a thoughtful and cooperative manner.
>
> "The customers of PMAs are pretty protective, and if you ask a lot of people who have been in her shoes -- including myself -- it's not uncommon to get into debates with customers of PMAs," he said. "They're tough negotiators."

Clean Line, with its DOE-connected "vice president," became the only transmission company to take advantage of Sec. 1222 of the Energy Policy Act of 2005 during a very convenient RFP process run by the DOE in 2010. But the pre-Azar DOE just wasn't aggressive enough:

> Azar brought that same spirit to DOE. She helped bring together the "federal family" in 2011 -- nine agencies key to streamlining federal permitting of major new power lines that could have taken up to 15 years to garner approval (Greenwire, Oct. 5, 2011). DOE already had existing authority to do so under 216(h) of the Energy Policy Act of 2005, language that allows the agency to coordinate federal and environmental reviews.

> "DOE, until I got there, implemented [the rule] in somewhat of a tepid manner," she said. "I came in like gangbusters as I always do and not only helped to lead the rapid respond team for transmission but helped DOE draft some rules for 216(h), negotiate with the nine agencies."

Shortly after Azar was appointed, Clean Line submitted an "updated" application under Sec. 1222 in order to use the federal power marketing agencies to take land for its private gain and override state denials.

> The Honorable Lauren Azar
> Senior Advisor to the Secretary
> U.S. Department of Energy
> 1000 Independence Avenue SW
> Washington, D.C. 20585
>
> August 17, 2011
>
> Dear Lauren,
>
> With development efforts well under way, the Plains & Eastern Clean Line is positioned to help meet President Obama's call for 80% clean energy by 2035. The Plains & Eastern Clean Line will provide affordable, renewable power to millions of customers in the southeastern United States. Regulatory and permitting approvals at the state and federal levels are the critical path items. Since submitting a proposal in July 2010, the Plains & Eastern Clean Line has made substantial development progress, strengthening the case for a partnership with the Department of Energy (DOE) and Southwestern under Section 1222 of the Energy Policy Act of 2005.
>
> The attached document provides an update on our efforts, including the widespread support the project has received from a diverse group of stakeholders. It also supplements the original application with respect to how the project is necessary to accommodate the increase in demand for transmission capacity and how the project is consistent with needs identified in transmission plans or otherwise by the appropriate transmission organization.
> Projects like the Plains & Eastern Clean Line have the potential to return the United States to a global leadership position in clean energy. **The private sector has the resources and the desire to invest in our aging infrastructure and we respectfully ask that the DOE exercise its authority to make it possible**. **We appreciate the attention you are giving the Plains & Eastern Clean Line.** We will be in Washington, DC regularly in the coming months and would like the opportunity to sit down with you and your team to review the project materials and respond to any questions.

Magically, the DOE entered into an Advance Funding and Development Agreement with Clean Line in early 2012, despite the fact that Clean Line did NOT meet all the statutory criteria in Sec. 1222. Sec. 1222 requires that a project:

> 2) is consistent with--
> (A) transmission needs identified, in a transmission expansion plan or otherwise, by the appropriate Transmission Organization (as defined in the Federal Power Act [16 U.S.C. 791a et seq.]) if any, or approved regional reliability organization

Clean Line's projects are not a part of any transmission expansion plan, therefore they cannot be "consistent with" a plan that does not include them.

Instead, the DOE relied on:

> DOE has emphasized the need for additional high voltage transmission capacity to deliver renewable resources from transmission-constrained areas, stating in its "20% Wind Energy by 2030" Report that "If the considerable wind resources of the United States are to be utilized, a significant amount of new transmission will be required."

GRID2030 is probably the highlight of Clean Line "vice president" Glotfelty's career at the DOE. And then Glotfelty leaves the DOE after setting the stage, and personally invests in Clean Line Energy Partners?

Clean Line brags:

> Jimmy worked for George W. Bush, for almost eight years, at both the gubernatorial and presidential levels. He led the Bush Administrationâ s efforts on electricity issues with Congress and the electric utility industry. In this capacity, **he founded Office of Electric Delivery and Energy Reliability at the Department of Energy (DOE) and served as its first Director**.

Let's see... which office is undertaking DOE's consideration of Clean Line's application under Sec. 1222?

> The Department of Energyâ s (DOE) Section 1222 Program is administered by the **Office of Electricity Delivery and Energy Reliability** (OE).

Wow! What a coincidence! A DOE appointee uses his office to set up a scheme whereby private investors can override state authority and regional transmission planning processes, and then leaves his position to personally invest in just such a scheme? And the office he "founded" is now in a position to approve his financial scheme?

Something stinks here...

Maybe this guy should investigate and clear up the appearances of federal actions undertaken for private profit?

> Whether the department will take the same approach under Chu's successor, MIT nuclear physicist Ernest Moniz, remains unclear.

I don't think that Moniz has a clue what his underlings are up to, but that's no excuse to let this federal land-taking scheme continue.

Clean Line's plans are a for-profit initiative masquerading as a political agenda. And DOE's political agenda is favoring corporate interests over the interests of the citizens and consumers it is supposed to serve. Let's clean the stink out of our federal Department of Energy!

The Department of Energy Is Just A Scam Agency

"*Abolish the Department of Energy*", urged Ronald Reagan during his presidential campaign. Citing it as a signal example of bureaucratic waste, inefficiency, and ineptitude, Reagan made DOE'S termination a symbol for the new direction he hoped to bring to Washington. To Reagan, DOE was archetypal of the sort of federal interventionism he was pledging to stop.

Created from components of existing agencies on October 1 1977, the Department of Energy had a first-year operating budget of $6.9 billion. By Fiscal Year 1982, projected DOE outlays are expected to rise to $13.7 billion person bureaucracy, DOE has between 100,000 and 130,000 contract employees on the payroll. These "Gold Check workers, so named because their paychecks are colored gold instead of the green used for regular federal paychecks, are employed even for such routine tasks as filing. While unusual , this arrangement might not raise eyebrows if the Department were widely viewed as efficient and well-run. This, however, is not the case. In fact the Department's most serious problem is that there is widespread doubt that it is doing its job well. Although the Department has spent tens of billions of dollars and its ranks teem with experts the agency has made little if any headway in solving U.S. energy problems making the problems worse In addition to its 20,000 In a number of instances, it is actually blamed for The Department, however, has its backers. Some key Senators for example, feel that the agency's failure to perform well is not due to any inherent flaw in the Department but to the policies it has been given to implement. The agency's supporter s believe that it is in the national interest to concentrate all energy related programs and functions of the federal government in a single

organization and that the organization should be of Cabinet 2 rank They claim that the dispersal of energy programs among a variety of federal agencies led to a lack of coordination during past emergencies, thus weakening national security.. They also believe that the lack of a point of focus for energy programs led to duplication and waste.

In truth, the Department of Energy undermines America's ability to achieve its energy goals.

The central problem is not found in any specific deficiency of the agency, but rather in the concept that such an agency is needed in the first place. This concept has its basis in the contention that the government can and should play a major if not dominant role in the management of the energy market; a contention we flatly reject Given this point of view, it may be said that the major deficiency of the Department of Energy is found in the fact of its existence.

The message of this passage is that the market provides the best solution to America's energy problems if only the market is allowed to function. The existence of a federal agency solely concerned with the energy sector of the economy virtually assured that market imperfections would be created Perhaps the most serious Department interference with the normal functioning of the market is its distortion of how Americans view the energy sector and thus often overestimates energy problems. This leads to policies which overreact, often creating new problems or making problems worse than they would have been.

Typical is the way the Department dealt with the effects of the Iranian revolution. By coercing refiners into producing far more heating oil and diesel fuel than they normally would have DOE caused a reduction in gasoline production immediately prior to the summer peak driving season tons of supplies are widely recognized as being directly responsible for the gasoline lines which plagued the nation in the summer of 1979. The nominal loss of 5 percent of U.S. crude oil supplies was translated in many cases into local shortages of as much as 30 percent at the gasoline pump The agency views energy in isolation. Had the market been allowed to function so that supplies This point was underlined in 1979 at could move to where they were needed and refiners could adjust their product mix to meet customers' demands, the results would have been quite different the start of the war between Iran and Iraq, when a similar drop in world crude oil supplies was hardly noticed was that the market was allowed to function without regulation inspired panic buying to artificially drive up prices The key difference 3 Another inherent flaw is that a Department of Energy provides a focal point for public pressure on Washington to intervene in the marketplace. It was the pressure to Itdo something" about the 1973 emb argo, for example, that resulted in the price and alloca tion controls on petroleum products that now are widely acknowledged as having failed dismally. In fact, the failure of these rules supplied much of the initial impetus for creating the DOE.

Having a Department of Energy makes it easier for sentiment favoring greater market intervention to coalesce A final basic flaw in the notion that the U.S. should have a Department of

Energy is that it creates a perceived need for an energy llpolicy.lf Congress an energy policy can only exist through a continuing flow of legislation mandating federal programs to do everything from regulating the price of gasoline to subsidizing solar energy.

This impression is further reinforced by the electronic and print media In the ,minds of the public and much of the In a new study of television news coverage of the 1973-74 and 1978-79 oil interruptions, the Washington-based Media Institute I found that nearly fifty percent of those solutions considered by the networks were r ationing and conservation of the time did the discussion focus on domestic oil. In discuss ing the possible solutions, government was consulted 77 percent of the time. Such media focus on government intervention as a solution to energy problems certainly r einforced greatly the public's tendency to equate energy policy with an activist federal role in energy. So long as DOE exists, the media will look to it for information and answers Only eight percent Some functions performed by DOE, of course, are necess a ry and even desirable. This is why proposals to dismantle the Department focus on transferring rather than eliminating compo nents. This will allow government to fufill its historic role without unwarranted and burdensome interference in the market's norm a l operation THE HISTORY OF FEDERAL ENERGY POLICY During the latter half of the 19th and early 20th century the federal role in energy evolved in parallel to the evolution of the domestic petroleum industry. In the preceding quarter century, America's popu l ation had doubled and a network of fac tories rose along a network of some 9,000 miles

of railroads. As the nation's industrial base grew, so did America's need for energy In 1859, Edwin L. Drake, a former railroad conductor, drilled in Titusville, Pennsy l vania, what was to be the nation's first oil well and ushered in the age of petroleum of Drake's first well was less than a barrel a day, by the end of the century the United States was producing more than 60 million barrels of oil a year While the output I 4 As the oil industry expanded, so too did government involve ment in this industry. At first, government regulation was mainly state agencies setting product standards for the infant industry covering such things as minimum quality standards for refine d products sold within their borders and minimum safety standards for handling and storage of petroleum products generally had additional regulations governing capping of wells, handling of natural gas, and other safety-related aspects of production By the end of the century nearly every state had laws Producing states The federal role was limited initially to matters concerned with the leasing of land in the public domain and the collection of royalties. Toward the end of the century, though, a new element began influencing federal energy activities movement. In 1906, oil pipelines were brought under the jurisdic tion of the Interstate Commerce Commission, and a suit was filed in Missouri alleging that Standard Oil of New Jersey was violating the Sherman An t itrust Act. Three years later, the Supreme Court ruled against Standard, forcing the breakup of the company in what was the most sweeping antitrust decision in U.S. history the antitrust Except for the antitrust actions, however, the federal role in energ y remained minimal, essentially limited to regulating oil pipelines and leasing land. During the mid-l920s, however, fears grew that oil

reserves were being exhausted.

Scandal and investigations by Wisconsin Senator Robert La Follette fueled these fears, p rompting President Calvin Coolidge to create the federal Oil Conservation Board The Teapot Dome While the incipient shortage was ended by the discoveries of the huge Oklahoma and Texas oilfields, the Oil Conservation Board made a number of important contr ibutions to improving oilfield efficiency and identifying wasteful production techniques.

Board's findings sparked state and regional regulatory efforts which remain in effect today.

It was Franklin Roosevelt's New Deal, however, that initiated The signif icant federal involvement in the energy sector. Petroleum production was extensively regulated for the first time during the ear1.y 1930s under section 9c of the National Recovery Act TVA, the Rural Electric Cooperatives, and the Regional Power Authoritie s were created; and the jurisdiction of the Federal Power Commission was extended. The New Deal initiatives represent ed a sudden departure from the laissez-faire tradition which had guided federal actions in the energy sector did not represent a total rej e c,tion of the free market as the optimum way to manage energy resources related projects were actually designed as much to stimulate jobs for unemployed Americans as to produce power Even FDR's unprecedented intervention in the energy sector Many of the e nergy 5 After the initial New Deal flurry of intervention, federal encroachment in energy slowed but did not stop

completely.

Perhaps the most significant federal action during the period before 1970 was the extension of the Federal Power Commission's auth ority to regulate the interstate sale of natural gas. In 1971, federal intervention expanded enormously when President Richard Nixon imposed federal wage and price controls. Included among the commodities subject to regulation was the wellhead price of cr ude oil. Although it was not anticipated at the time these controls would be extended in 1973 and would remain in effect until President Reagan took office in 19

81. Coupled with the earlier controls on natural gas prices, the crude oil controls were the m ost important causes of the decline in domestic oil and gas exploration which led to U.S. dependency on foreign oil for a significant amount of its needs. These rules also provided the primary rationale for the creation of the Federal Energy Admini strati on, the predecessor of the Department of Energy. It is the elimination of the regulatory morass which grew out of these moves that dismantling DOE seeks to achieve.

DOE did not just inherit programs from the Federal Energy Administration. Most of its nuclear energy programs, for example actually began under the Manhattan Project of World War I1 fame and were further developed by the Atomic Energy Commission and its s uccessor, the Energy Research and Development Administration.

The programs in DOE'S Fossil Energy Division came largely from the Interior Department. Many of the Fossil Energy division's alternate energy programs were funded by the National Science Foundat ion. In every case, however, programs took on a very different tenor when transferred to DOE. Whereas previous federal efforts were relatively limited and allowed the market to deter through subsidies, regulations, and federal fiats s mine the U.S. energy mix, DOE frequently.disturbed the market Many of the programs were initiated for good reason task facing the Congress thus is to determine which programs should be saved and where those programs should ultimately be placed. Making this determination will n ot be easy; many en trenched interests will resist changes in the status quo. The most difficult problem facing the Congress, however, is how to reduce the task of evaluating the programs to manageable propor tions. Perhaps the best course is to begin by e stablishing broad criteria which would outline the appropriate role for government in the energy market in a general sense. Then specific programs could be measured against them assessment would be with the programs that address energy regula tion The A g ood point to start such an I ENERGY REGULAT I ON Prior to the 1973 Arab oil boycott, it was generally accepted that energy was best left to the economy's private sector.

Although federal controls were instituted for the interstate sale 6 of natural gas in 1954, the rest of the energy market was essen tially free of government interference. Even the 1971 imposition of price 'controls by the Nixon Administration was viewed as a temporary and extraordinary action. What few

government activi ties there were fo cused primarily on the leasing of federal lands and some research and development projects. The Arab embargo however, changed public perceptions of the appropriate federal role.

Americans long had been accustomed to cheap plentiful energy supplies. Therefo re, the gasoline lines and shortages that followed in the embargo's wake came as a profound and bitter shock. Its faith in the private sector shaken, the public pressed the government to "do something" about the energy crisis.

Congress responded by enacti ng a complex set of price and allocation rules for crude oil and refined products, and a so called entitlements program intended to equalize the price refiners paid for crude oil. In practice, the entitlements program caused refiners using domestic oil to subsidize those who did not.

While intended as a "temporary" measure, the regulations became a permanent fixture, until Reagan ended them by Executive Order on January 28, 1981.

During the intervening period, the price ceilings seriously distorted the en ergy market, hindering efforts to bring about a greater reliance on domestic energy sources. Yet controls on crude oil and refined products were not the only federal impediment to energy development in the 1970s. Congress also extended federal price controls to the interstate natural gas market under the Natural Gas Policy Act (NGPA) and severely

limited access to federal lands for energy development.

The result of these federal measures was to prevent an early end to America's energy crisis, for they bl ocked America's ability to capitalize on its rich energy endowment. The U.S. has nearly half of the free world's known coal resources; it is now the free world's largest oil producer reserves and substantial uranium deposits. The problem was that federal r egulations prevented full utilization of these resources that the market provides the best means for ensuring adequate energy supplies. The market for energy is so large and complex that no individual or group of individuals can manage it efficient Americ a has huge natural gas The lesson to be learned from the experience of the 1970s is ly.

Take gasoline as an example. There are currently about 140 million privately owned vehicles in the U.S. which use 260.4 million gallons of gasoline per day has a 20-gallon tank capacity, motorists typically purchase gasoline when the tank is half empty. billion individual transactions each year result from retail gasoline sales alone Since the average automobile This means that about 9.5 To this must be added additional transac 7 tions at the wholesale level, home heating oil sales, and so forth. The magnitude of the market becomes clear. As such, the notion that any federal agency or combination of agencies could direct it efficiently seems absurd. Those aspects of the D epart ment of Energy concerned with regulating the energy market are thus among its least desirable components relating to health and safety rather than market operations. instance, the government needs to regulate the safety-related aspects of the

nuclea r power industry and maintain some control over the production of nuclear fuels. Activities such as these are justified because they involve what economists call "external ities These are effects caused by an activity whose costs are difficult to assign to a particular individual or sector of the economy. The costs, however, must be borne, and government becomes the only efficient mechanism to bear them. The classic example of Ilexternality'l is national defense: individual or small group could afford on it s own Few of DOE'S regulatory activities fall into this category.

Rather, they are aimed at attempting to impose a bureaucrat's judgment on the market are the Economic Regulatory Administration and the Office of Hearings and Appeals concerned with enforcin g the price and allocation rules, and played major roles in interfering in the operation of the free market. DOE also has intervened in the market through its program to set federal leasing targets for coal and through its efforts to mandate conservation. The particular irony of all of these programs is that for the most part, they undermine the very goals they were intended to achieve. Given this fact, they should certainly be abandoned Some federal regulatory role, however, is necessary, mainly For a nee d which no Among the worst offenders in this regard Both of these organizations are primarily ENERGY SUPPLY While regulatory aspects of the Department's activities hinder energy development, other government programs are intended to foster the creation of additional supplies. Here too, however it would seem that the market would have performed far better.

The federal government's role in ensuring adequate energy supplies was initialy confined to issuing leases on federal lands. With the New Deal, though, the government became involved in the direct production of energy through the Regional Power Authorities and Tennessee Valley Authority. Still, the goal of the programs establishing these entities was more to employ the unemployed of the Depression than to produce energy and development through the Manhattan Project. Again, the program's energy aspect was secondary to its main objective.

Project and the establishment of the Regional Power Authorities During World War 11, the government moved into energy research The Manhattana however, defined the areas in which the federal government later would be most closely associated with energy tion of supplies and the research and development of new energy sources the direct produc The Regional Power Authorities and T VA have faced the same problems confronting the private utility industry. Since federally-run facilities need not justify their operations to stockholders or make a profit, they have been slower than the rest of the utility industry in seeking solutions. T his particularly is the case involving new facility construction; both TVA and the Regional Power Authorities have persisted in embarking on costly construction projects though electricity demand has been decreasing. The result has been the recent announ cements of plant cancellations by the Washington State Power Supply System and the Tennessee Valley Authority cancellations made well after projects were started and huge sums of money invested.

Were these utilities required to meet the criteria of profitability, however, it is likely that the cancellations would have occurred much earlier and at far less cost to the taxpayer.

What then should be done about the plants? Ideally, they should be sold to private investors. In the case of the Regional Power Authorities, however, this may prove particularly difficult as their source of power is primarily the system of federal dams co n structed for flood control. What could be done is to sell the transmission system over which the federal power flows. There would be an added benefit,in that this move would create an experiment in deregulating the electric utility industry economists who specialize in the utility industry suggest that the current structure of the utility industry, in which the same firms generate and transmit electric power, leads to inefficiency.

They believe that separating these activities would lead to greater competition and allow power generation to be deregulated.

Selling the transmission system for federal power would allow a demonstration of its feasibility on a broader scale of energy supplies should remain in federal hands. This is the Uranium Enrichment progra m. In addition to providing fuel for nuclear power reactors, the enrichment facilities provide material for nuclear weapons. Since national security interests require close supervision of this activity and strict controls on access to enriched uranium, continued federal intervention in this area is appropriate. The enrichment program, moreover, pays for itself

through sales to the utility industry and even turns a profit for the government Some One area of government involvement in the direct production Th e second broad area of federal involvement in the energy supply sector is research and development. While the public is most familiar with nuclear energy development under the Atomic Energy Commission and its successor, the Energy Research and Development Administration, the federal government was involved in energy research as early as the 1920s when it launched initial 9 demonstration projects to prove the feasibility of extracting oil from shale.

There can be significant benefits to society from public investment in high-risk, long-term research and development. In many instances, as, for example, the development of fusion energy the eventual payoff of a research program is so far in the future that no private firm could justify the necessary investment. At the same time, however, the potential benefits to society from successful development of a new energy resource such as fusion are so enormous that the research is.warranted. It therefore follows that a federal role is appropriate.

In recent years, however, the focus of federal efforts in Especially since the creation of the Department of research and development has not been on such long-term, high-risk endeavors.

Energy, federal programs have been concentrating on the near to intermediate term. Exampl es include various solar energy programs the massive outlays for synthetic fuels (now an

agency of its own, the Synthetic Fuels Corporation), and the alcohol fuels programs. By and large, these initiatives constituted congres sional responses to the threa t of a Middle East embargo None has contributed to U.S. domestic energy supplies.

The near-term focus has diverted resources from long-term issues. The recent pattern, therefore, should be reversed and federal research should return to that for which it is best suited: the long-run Crash programs" seldom pay off; often they fail program is based on the assumption that if nine women become pregnant simultaneously, one of them will have a baby in a month Said Werner Von Braun about such endeavors: "A crash E N ERGY CONSERVATION The third category of activity at DOE is little disputed in principle: energy conservation. What is questioned is the extent to which the Department's programs have helped Americans conserve. Since 1973, great strides have been made in r e ducing energy waste and improving efficiency. The private sector took the conservation lead, but in the last three years the general public has begun to follow suit. The result has been a reduction in oil imports (excluding those for the Strategic Reserve) to their lowest level since 1971. The question remains nonetheless Did the government have anything to do,with these impressive conservation accomplishments?

Between 1947 and 1979, the U.S. increased its average oil consumption each year except 1970 and 1974. More important, the share of U.S. oil needs furnished by imports increased every ye'ar between 1973 and 1979. This in spite of federal

regulations exhortations, and subsidies. Yet, following the price increases triggered by the Iranian revoluti on, demand has fallen precipitous ly, dropping 11.8 percent since 1980 alone. In the latest report10 ing period, demand averaged nearly 21 percent les's than the same monh in 1979.

What these figures demonstrate is that only when prices were allowed to ri se did real conservation begin to take place of the measures enacted before the price increase appears to have had any effect on demand None The change in the public's attitude toward conservation is underscored by data developed at General Motors regardi n g automo bile fuel efficiency. Prior to the 1979 price increases, GM was afraid that their fleet would not meet the 1985 fleet efficiency standard'of 27.5 miles per gallon required by law the public seemed uninterested in buying efficient cars. In the aft e rmath of Iran, however, the public's buying'habits changed radically. Prior to the Iranian revolution, GM projected an average mileage rating of 26 mpg for its 1985 fleet. This figure has been revised to 30.5 mpg, an improvement of more than 17 percent. B y contrast, in Canada, where controls have kept prices relatively low compared to the U.S GM expects its fleet mileage to average 26 mpg in 1985 The reason Put simply, conservation cannot be mandated by the government as long as the U.S. remains a free soc iety. Conservation entails too many individual decisions and involves too many different elements to be neatly enshrined in a program or set of programs.

On the other hand, the market induces conservation with dis patch. The highly touted goal of federal conservation programs

was to reduce demand for oil by 2.5 million barrels per day in 1985. The marketplace already has taken care of this, achieving and surpassing the target. The moral is clear: to encourage conservation impediments to the market's operation must be eliminated.

EMERGENCY PREPAREDNESS A fourth area in which the Department of Energy has been active is Emergency Preparedness. Here again, the question is not so much whether there is a federal role, but rather how well that role has been executed to date.

By and large, the emergency preparedness function of the Department has been associated with protecting the nation from the potentially disastrous impact of a cutoff of oil imports.

The Strategic Petroleum Reserve is t he cornerstone of any emergency preparedness program. Although this view is widely accepted in Congress and among the general public, the program to establish the SPR had been one of DOE'S greatest failures prior to the Reagan Administration.

Horror stori es told of oil stored in facilities from which it could not be removed, of the mixing and thus ruining of different types of crude oil, and of excessive foot dragging in oil 11 purchases. The rate of acquisitions of oil for the reserve was so slow that Congress even mandated a minimum level of purchases.

During 1981, though, the situation improved markedly as Energy Secretary James B. Edwards made filling the Strategic Reserve a high priority. The SPR is not the only potential tool for dealing with oil su pply interruptions. Members of Congress seem, regrettably, ever tempted to toy with price and allocation controls.

Perhaps the irony of price and allocation controls is that This they do not solve the problem they are intended to address: the sharp price increases that normally accompany an embargo is because they cannot be applied to imports overconsumption during times of shortage and reducing the incen tives for the development of additional domestic supplies, the controls actually tend to strengthen t h e position of those nations imposing the embargo And by encouraging There are, of course, other areas of emergency preparedness that ought to be a federal responsibility. The problem with their remaining in a Department of Energy is that emergency measure s tend to be triggered prematurely. A solution may be the transfer of this function to an adjunct of the National Security Council. This would allow for a broader view of energy questions and ensure that all Cabinet agencies affected by an energy emer genc y could coordinate their efforts. Since White House staffs are relatively small, the potential for bureaucratic empire building in non-emergency times would be minimized. Though the emergency preparedness function focused largely on interruptions of the fl ow of imported oil is appropriate for government, it does not warrant a full-scale cabinet level department.

ENERGY INFORMATION Under the Carter Administration, "energy informationn1 was one of the most rapidly growing portions of the energy budget.

This was in part due to the proliferation of outreach efforts on energy conservation, but was also in part the result of an explosive growth in the amount of data government required of industry.

While some of the information gathered.and disseminated by DOE has served useful purposes, a substantial amount was designed to publicize and popularize the sociopolitical views of the agency's political appointees.

The literature, by and large, has tended to promote what were termed llsoft path" technologies and to condemn more tradi tional energy forms ly implicit in the texts of documents prepared by DOE, so much so that a congressional committee issued a report condemning the practice Attacks on nuclear energy have been frequent 12 The Department's data collectio n requirements are also the source of growing controversy the security of proprietary data demanded by the Department and have questioned the need for the detailed information DOE required to be gathered and disseminated, the Department's efforts in this a r e clearly excessive be performed by the Department of Commerce. Of all the functions DOE performs, this would be the most readily eliminated Firms are gravely concerned over I I Although it is clear that there is some need for information I What data coll e ction is necessary could CONCLUSION Continued existence of a Department of

Energy may actually impede America's ability to provide itself with adequate energy supplies. Though it deals with a specific sector of the economy as do the Departments of Commerce, Labor, and Agriculture, unlike them DOE has an adversary relationship with the interests it is supposed to represent It teems with a regulatory mentality, exactly the opposite of that needed to promote domestic energy production new energy secretary Jam es Edwards is committed to the'free market, no individual or group of individuals can redirect the agency toward the free market. would remove them from bureaucrats with a regulatory mentality.

The central difficulty of the Department lies in its very existence by which it encourages an activist federal role in the energy market decade, it is that the free market provides the best means of ensuring America's future energy security operate, the Department of Energy must disappear Among the Department' s worst failings though, is attitude.

The Energy Loan Guarantee Program is Worth Reforming

Philip Rossetti

Executive Summary

- The Loan Programs Office (LPO) was created under the Energy Policy Act of 2005 to create a source of capital for early stage energy technologies that may struggle to attract loans. The program was designed to pay for itself by having applicants pay for their expected subsidy.
- After its creation, the Obama Administration expanded LPO by funding the expected subsidy costs of LPO loan guarantees via federal appropriations. As some high profile projects such as Solyndra failed, the economic stimulus rationale for the program was proven to be faulty, and some have called to end LPO altogether.
- The program still offers value in accelerating the deployment of innovative energy technologies, and it is worth reforming. A comprehensive pro-innovation energy policy should pare back existing late-stage renewable energy subsidies and use that revenue to turn LPO into a more transparent and competitive program that could better attract applicants. Absent reform, LPO would remain a revenue-neutral or revenue-positive loan guarantee program with few applicants.

Introduction

The Loan Programs Office (LPO) is an obscure federal agency within the Department of Energy (DOE), but many people have heard of one of its biggest failures: Solyndra. Solyndra was a solar panel manufacturer that was meant to be the exemplar for the Obama Administrationâ s 2009 economic stimulus package. â We can see the positive impacts right here at Solyndraâ ¦Before the Recovery Act, we could build just 5 percent of the worldâ s solar panels. In the next few years, weâ re going to double our share to more than 10 percent,â said President Obama in May of 2010. Not long after President Obama said this, Solyndra went bankrupt.

Solyndra epitomized much that was wrong with President Obamaâ s â green jobsâ strategy for growth: Companies that are supported by taxpayer funds to satisfy a policy objective are not as efficient as companies that succeed in the market without support. Ever since Solyndra, conservatives have frequently called for the elimination of LPO. To be sure, the office has significant flaws and is open to abuse. But Solyndra has been a distraction from a deeper truth about LPO: There is an appropriate role for the government to play in supporting energy and environmental innovation.

Reforming LPO to play this roleâ and not to be some sort of economic stimulus programâ would require several discrete reforms as well as broader reforms to other federal energy policies. Such reforms would not prevent another Solyndra, exactlyâ the government would still support risky ventures that could fail, as supporting ventures too risky for the private sector is the pointâ but they would focus the program around a specific mission while increasing the possibility of successfully supporting breakthrough technologies at a lower risk to taxpayers.

What is the Loan Programs Office?

The DOEâ s LPO began under Title 17 of the Energy Policy Act of 2005 (EPAct), which created a governmental program to offer loan guarantees with the express objective of reducing pollution, and specifically greenhouse gas (GHG) emissions. The program predominantly supports cutting-edge innovations in electricity production: Under Title 17 regulations, only new technologies with fewer than three commercial implementations are eligible for a loan guarantee.

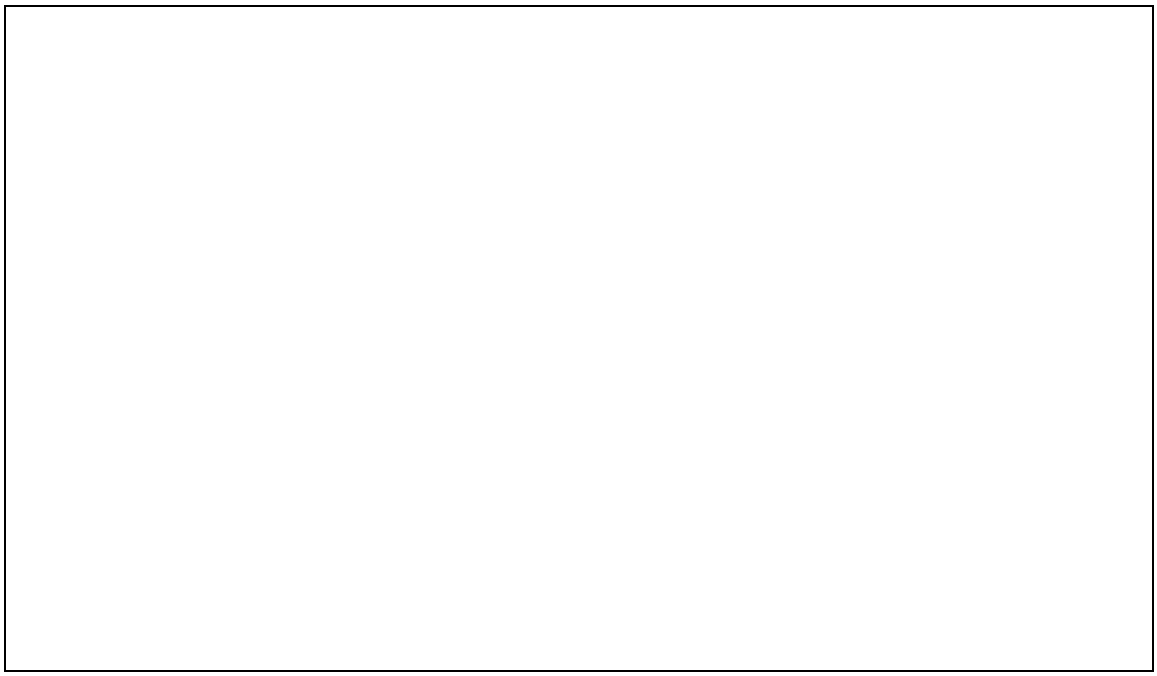
The rationale behind LPO was that the private sector has little economic incentive to pursue clean energy innovation on its own, creating a market failure as there is no market incentive to address the externalities of pollution. Several factors underscore this reality. Electricity production is extremely capital intensiveâ it costs a lot up-front to build a generation facilityâ which creates considerable exposure in a capital lenderâ s portfolio. Furthermore, determining whether a new technology will work as intended requires significant engineering expertise, so the due diligence required for an innovative electricity generating technology is much greater than that for other technologies. Simply, because electricity is a commodity, a private sector lender is afforded little-to-no advantage for supporting an innovative electricity generating technology over a commercially proven incumbent technology, and Title 17 loan guarantees are intended to relieve the private sector of some of the costs (particularly due diligence) and risks associated with them.

The LPO initially issued loan guarantees with little government money, instead recouping the risk and costs through various fees. Conventionally, a loan guarantee is effectively a subsidy because it moves the risk of the loan from the private sector to the taxpayers, allowing for more favorable rates. In the case of LPOâ s Title 17 loans, however, the loan guarantee applicant pays for this subsidy through a fee equal to the â credit subsidy cost (CSC),â or estimated total cost to the federal government (called a credit subsidy fee). Fees of $100,000 to $350,000 are also paid for the due-diligence that LPO performs, in addition to a $50,000 application fee. In other words, a loan applicant must pay $150,000 to $400,000 worth of fees even before the CSC is calculated, and then the applicant must continue to pay for due diligence throughout the life of the loan. And these fees are on top of the interest that the applicant is already paying to the lender.

LPO was created to provide loan guarantees at virtually no cost to taxpayers. Not surprisingly, since Title 17 loans did not offer any subsidy, and the private sector had no incentive to pursue innovation that may not offer much reward for many years, the program struggled to attract applicants.

This all changed, however, during the Great Recession.

The Mission Drift of LPO During the Recession



Shortly after President Obama took office, his administration and Congress sought to fund government programs to stimulate the economy, which was in the midst of a recession. As part of the American Recovery and Reinvestment Act (ARRA), LPO received a hefty appropriation to cover the CSC of some applicants (these ARRA supported loan guarantees became known as section 1705 loans, which are different from the unsubsidized section 1703 loans where the CSC is not paid for by government), which turned the program into a substantial subsidy for innovation. This injection of money effectively added a prong to LPOâ s mission, turning it into an economic program as much as an environmental or innovation one. LPOâ s objectives dovetailed nicely with the Obama Administrationâ s stated goal of creating â green jobsâ as a panacea for both the recession and the environment. But this mission drift of the LPO revealed some big problems and created some others.

One big problem was that the promise of economy-boosting â green jobsâ never materialized. For example, the solar-panel manufacturer Solana received a subsidized Title 17 loan guarantee for an amount of $1.45 billion, but only expected to support 90 permanent jobs.

Another, potentially bigger problem was the influence of the administrationâ s policy priorities on what was originally an innovation-focused program. Documents released in 2011 showed that the Obama Administration was seeking information on specific projects to tout on the campaign trail. Vice President Joe Biden heralded Solyndra as â so importantâ to powering the world of tomorrowâ yet soon after Solyndra went bankrupt and defaulted on its government-guaranteed loans. The hopes for funded projects did not match economic realityâ and taxpayers ended up footing the bill.

The ARRA might have heightened the pressure for using LPO as an economic stimulus tool, but the potential for LPO to be repurposed for other policy issues was already present. The Secretary of Energy has an unduly large amount of authority in the acceptance or rejection of applicants (by statute). As a result, risky-but-popular projectsâ such as Solyndraâ might be accepted, or potentially innovative technologies that do not align with the administrationâ s priorities (or fear that they do not) could decline to apply.

To put in context LPOâ s place in government energy policy, below are the biggest consumers of government spending on what can be described as â clean energyâ or â innovationâ objectives. Included is basic and applied research conducted by the DOE, as well as development and the Advanced Research Projects Agency-Energy (better known as ARPA-E), the Production Tax Credit (PTC) and Innovation Tax Credit (ITC), and budget authority for Title 17 loan guarantees (minus collected fees).

Source: DOE Budget Requests, FY2009-FY2019.

What the chart above shows is that LPO was a huge (and ultimately not very successful) part of the governmentâ s innovation strategy as part of the ARRA, but since then has played very little role while the costs of the PTC and ITC continue to rise.

Why did LPO struggle to attract applicants or fill a gap in private sector financing? Put simply, with government money it created an artificial government preference for specific technologies, yet without any government money it is not attractive to many potential applicants. While LPO was originally intended to pursue innovative technologies as an environmental program, the government repurposed LPO to take tax money and fund the administrationâ s sanctioned projects as an economic stimulus that would only support a small number of jobs. The result was that LPO accomplished neither of its goals: It did not stimulate the economy, and it did not meet expectation as a major driver of innovation.

Since the ARRAâ s budget authority for covering CSCs has mostly ran out, the number of new Title 17 applicants for LPO has plummeted, and the Trump Administration has requested the elimination of LPO in its budget requests. But such a move ignores the potential benefits that a refocused LPO could have.

Restoring LPO as a Pro-Innovation Environmental Program

Earlier this year, Chairwoman of the Senate Energy and Resources Committee Lisa Murkowski said, â I donâ t want Title 17 programs eliminated. I want them reformed.â The senatorâ s statement reflected a view that is starting to take holdâ that LPO still has value to offer in seeding innovation. The same market dynamics that instigated LPO initially are even more pronounced today, as electricity demand has stagnated. Further, the political rationale for reducing GHG emissions remains strong.

LPO must return to its original mission of supporting environmental innovation. As an environmental program, LPO and its Title 17 program hold considerable potential (if reformed), but it cannot be part of any so-called â green jobsâ or other economic growth strategy. Government redistribution does not spur economic growth, and LPO is no exception to this rule: A government-directed environmental program will not directly boost the economy. Yet this fact does not mean that there is not a role for LPO, as the government has goals besides strengthening the economy. Politicians seek GHG reductions, and, as outlined above, existing technology in the market is unlikely to deliver them. There is therefore a role for a program that can provide capital to innovative technologies. LPO could be that invaluable environmental program.

The reasoning behind pursuing innovation as an environmental policy is premised on the projection that a future technology will be able to achieve better environmental outcomes at a lower cost than the technology available today. LPO could help to make such technology a reality. Other government programs show that government does have a valuable role to play in seeding innovation. The National Labs, for example, have supported the development of such valuable technologies as lasers and directional drilling (which has facilitated the shale revolution in the natural gas industry). Reframing LPO as an environmental innovation program, and reforming it with that mission in mind, could make the program into a valuable success.

Key Reforms

Three major changes need to be made to LPO to focus it squarely on its primary mission of being an innovation program.

First, the potential for mission drift of LPO need to be minimized. It is antithetical to the goals of the Title 17 program to have a loan-guarantee program that is contingent upon the approval of the administration in power. Proper innovation policy should absolutely be as technology-neutral as possible, since any government preference could potentially prohibit or delay the commercialization of a technology that could be economically competitive.

Approval or disapproval of loan guarantees should therefore not be under the authority of the Secretary of Energy, but rather up to a commission or nonpartisan entity within DOE. Transitory policy issues should not affect LPO oversight and loan guarantee approval or disapproval, and decisions of approval or disapproval should be made purely on the technological potential of a project, its potential GHG reductions, and the ability to repay. There certainly is no way to insulate LPO completely from the oversight of political appointees, but these steps would help to insulate it from an administration using it as an electioneering tool.

Second, there needs to be more transparency in what an applicant can expect as a CSC fee. The CSC is a reflection of both technological and financial risk, and thus the ability of an applicant to repay. A low-risk loan guarantee will have a low CSC, and a high-risk one a higher CSC. Given the relatively low rate of default among Title 17 projects, one would expect the CSCs to be quite low, yet the Government Accountability Office notes that the expected appropriations under the ARRA to cover the CSCs (that is, section 1705 loan guarantees)were approximately 11.4 percent of the total loan guarantee volumesâ indicating a fairly high subsidy cost. And such high subsidy costs have continued: The estimated CSC for Vogtle, a major nuclear power plant supported by LPO loan guarantees, was $1.6 billion, or about 20 percent of the loan guarantee amount (the CSC has since been zeroed out, as the project is in a regulated market with guaranteed cost recovery).

Considering that fees even before the credit subsidy fee can reach up to $400,000, (not even counting the legal fees incurred in navigating the process) it seems unreasonable to expect that a company with an innovative technology would expend resources pursuing a loan that they know will be expensive and might not even be affordable. If applicants have a range of what CSC they can expect to pay if their project is accepted, it might increase the pool of applicants. LPO could set a maximum CSC that would be accepted, which would have the dual purpose of rejecting projects that would struggle to repay and let loan guarantee applicants know the maximum they could expect to pay in fees *before* they apply.

Third, the program needs to be more competitive, which requires spending money. Recall that the program is currently designed to cost taxpayers nothingâ but the result has been a program that struggles to attract applicants. To wit: The current remaining LPO loan guarantee authority (i.e. guarantees it is authorized to make, not money it is spending) is approximately $40 billion, and the total volume of all Title 17 issued loan guarantees was approximately $21 billion. (LPO authority can also be used for Advanced Technology Vehicle Manufacturing loans, which are not discussed in this piece).

LPO would function better if it were a prize-based system. In other words, the terms of the loan guarantees should be very attractive but only a few projects should then be supported. Such a structure would constrain the overall costs of the program by taking only the projects most likely to be truly innovative and commercially disruptive. LPO could implement such a reform to be more competitive by setting targets that are tied to specific awards. As an example, if a project were expected to achieve a certain threshold for emissions reductions via its â Life Cycle Assessmentâ of GHG impacts, it could have the credit subsidy fees waived (up to a certain value). Industry participants with specific needs could also offer to cover the credit subsidy fees of projects that promise to fulfill the requirements of contract (such as a power marketing agreement or manufacturing delivery), which may be an easier lift than providing capital directly. For example, the new renewable portfolio standards in California encourages electricity providers in that state to fund the commercialization of technology that can comply with new regulations.

Yet such competitiveness means companies are competing for something in particular: government funds. The current structure is expensive for those applying and doesnâ t offer enough benefits. Spending money means that the government is more likely to support innovations in clean energy production.

Reforming LPO Should Coincide with Other Energy Policy Reforms

The above reforms to LPO, though, would mean little absent broader reforms to how both the federal government and state and local governments approach innovation and energy policy. Companies that receive LPO loan guarantees often can double-dip in other programs, discouraging any incentive to contain costs. For example, Vogtle has received $8 billion of loan guarantees via LPO, but the state where the plant is being deployed, Georgia, is a cost-of-service marketâ meaning Vogtle can charge for power whatever it cost them to produce it. Because Vogtleâ s cost-recovery is guaranteed by captive ratepayers, and the risk associated

with their debt is subsidized by LPO, the cost of the project does not matter to Vogtleâ s owners. The dynamics are similar when considering wind and solar projectsâ which make up most of LPOâ s Title 17 portfolioâ as they are supported beyond their loan guarantees with the ITC and PTC after commercialization.

The ability of projects to â double-dipâ for government support creates a poor incentive structure. The ITC and PTC (to take two problematic policies) create market-distorting incentives for particular technologies (solar and wind), which in turn affects the credit worthiness of particular loan-guarantee applicants. Such a distortion compromises the neutrality of the loan guarantee program.

Looking more broadly, any reforms of LPO should be done in light of the federal budget. As mentioned above, a vibrant Title 17 loan guarantee program will likely require federal funding to cover at least a portion of the CSC, but in the current deficit environment, an increased appropriation for energy innovation is difficult to accept. Reforming LPO, then, should be done in a revenue-neutral manner that pays for appropriations to LPO by cutting other energy subsidies.

Future tax credits for wind and solar via the Production Tax Credit (PTC) and Investment Tax Credit (ITC) are projected to cost more than $60 billion over the next 10 years. Curtailing these would mostly be untenable, as much of the provisions are baked in and promised to existing projects that secured financing based on the subsidies. The Joint Committee on Taxation, however, estimated when scoring the Tax Cuts and Jobs Act that ending the inflation provision of the PTC for *future* wind turbines would save $12.3 billion. It should also be noted that subsidies for the oil and gas industry remain, such as the â excess of percentage over cost depletionâ credit which is estimated to cost $6.4 billion over the next 10 years.

The significance of these cost estimates is that serious reforms to how the federal government treats energy and innovation policy could identify subsidies worthy of curtailing, and those revenues could fund reforms to LPO to turn it into a more attractive and competitive offering. Recall that GAO estimated that the CSC required for loan guarantees (in other words, the subsidy required), was around 11.4 percent. That means funding LPO reforms via ending the excess of percentage over cost depletion would allow for a loan guarantee authority of $56 billion. Clearly, serious policy reforms that aim for a more technology-neutral and pro-innovation treatment of energy sources have opportunities for revenue-neutral reform that could hold taxpayers harmless.

Conclusion

LPOâ s Title 17 loan program can, and should, play a greater role in the governmentâ s energy innovation policies, which even without LPO represent $16.3 billion of spending in 2017. But the programâ s struggles in the past show the program is desperately in need of reform. The program needs to be redesigned to remove the unduly large amount of authority that political appointees have over accepting or rejecting applicants. There also needs to be a better value proposition for applicants; without any real incentive to direct their capital towards innovation in energy, investors will likely seek better returns elsewhere. Finally, the program needs a competitive process for approving applicants, which will increase the likelihood that companies with approved loan-guarantees will have higher economic value.

Merely reforming LPO, though, is not enough to fundamentally improve the U.S. governmentâ s energy innovation policies. The governmentâ s innovation policies interact in unhelpful ways, and it would be important to reform other energy and environmental policies at the same time as revamping LPO. Making existing tax incentives more neutral would also have the effect of making LPO more neutral, and would also provide more than enough revenue to the government to fund an LPO.

LPO should be reformed to focus it purely on supporting innovations in clean energy production. To be sure, the result could be, in a sense, more Solyndrasâ funding innovation is risky, and some projects could fail. But the result could also be breakthrough technologies that transform how we produce power.

The Obama Green-Energy, Crony-Corruption

Marita Noon

|

Everyone who pays any attention to the news knows the name Solyndra. It has become synonymous with the overall failed green energy program administered by the Obama team. Politicos know there are many other companies that have received loan guarantees for various green energy projects that have since become a source of ridicule for the White House. Some might even be able to name a few. There is the now-bankrupt company that made batteries for electric cars: Ener1. The plug-in electric sports car company, Fisker, that made its cars in Finland and has troubles too numerous to cite. And, of course, we know about the Chevy Voltâ that our taxpayer dollars bailed out only to have demand so low that Chevrolet had to pull the plug on the production line and lay off workers for five weeks earlier this year. But few know the full story.

Connecting the dots will make your head hurt. There are various programs and special tax breaks and different kinds of companies that received green energy loans: solar, wind, and geothermal; and car companies, battery manufacturers, and biofuel producers. While the projects differ, they have several startling similarities. The vast majority of the green energy loan guarantees were given to companies that could not obtain enough financial backing from private investors. Their â junkâ or â speculativeâ grade kept people from putting their own money into them â yet your money and mine was given to them, and we had no say in the matter. Of the 27 loans issued through the 1705 Loan Guarantee Program to 21 firms, virtually all of them have â connectionsâ to either President Obama or other high-ranking Democratsâ or both! The loans were made to fill a market created not by free-market demand, but by government mandates. And, all of the â special sevenâ got fast-tracked approvals through the Department of Interior with little scrutiny over environmental damages that would have taken any other energy company months, if not years, to get, and EPA regulations were applied selectively.

Many of the companies that received the funds had involvement with large donors and/or bundlers for the Obama campaign, and there is an amazing revolving door through which the players pass many times. They worked, for example, for Senator Harry Reid. Then they are on the staff of an investment firm that invested in one, or more, of the companies. Next you find he or she is on some White House commissionâ or worse, became part of the Obama Department of Energy team. Some 460 companies applied for DOE loans, but only 27 projects, 21 companies, got the funds. And 85% of these have been found to have â connections.â The remaining 15% may well have connections too, albeit more guarded or hidden.

These are not wild assertions. I have the data to back them up.

Following the publication of my column a couple of weeks ago on crony capitalism, I was connected with Christine Lakatos. Sheâ s a private citizen and a single mom with a nose for research. Beginning in 2009, she was hired to work on investigative projects, following the green energy money. But when those projects were completed, she didnâ t stop digging. She kept finding more and more. With no outlet for her work, she started a blog where she â brain dumpsâ her findingsâ which for a total unknown has received an impressive number of readers. For anyone but the most stalwart, her Green Corruption Blog is like getting a drink of water from a fire hydrant.

On Sunday, some of Lakatosâ research was presented in my weekly column. The response prompted us to begin a collaboration.

For each of the next 17 weeks, we will expose one green-energy, crony-corruption story after another (though my travel schedule may require me to skip a week here and there). It will be a â bookâ released chapter-by-chapter. If you like what you find, we hope youâ ll let us know and come back the following week for the next installment.

Some single stories of what weâ ll expose are â out thereâ â though surely not covered by the mainstream media and not all in one place or all connected as weâ re doing. If you made a study of the green-energy, crony-corruption story your passion, you likely found out a lot of what weâ ll share. If you read the report from the House Oversight and Government Reform Committee (HOGRC) on the Obama Administrationâ s green energy gamble word-for-word, or watched the incriminating hearings, youâ ll already know some of what weâ ll present. Or, if youâ ve read the chapter in Peter Schweizerâ s book ***Throw Them All Out*** that addresses alternative energy and â how the game of funneling taxpayer money to friends has exploded to astonishing levels in recent years,â you have a good idea of the big picture. If you have made this your passion, have studied the report, and have coordinated with Schweizer, as Lakatos has, you are encouraged to help make these reports as complete as possible. Together, weâ ll connect the dots and present it here in bite-sized pieces.

Each of the energy projects we will profile in the â special sevenâ section were recipients of billions of taxpayer dollars through the 1705 Loan Guarantee Program (LGP) and many will be receiving millions more through the 1603 Grant Program. The 1705 LGP is an expansion of the 1703 program that was approved in 2005 under President Bushâ increasing the expenditures from $17.9 billion in 2007 to $37.2 billion in 2010. The 2009 American Recovery and Reinvestment Act significantly expanded the DOEâ s authority, under Energy Secretary Steven Chu, through the newly created 1705 LGP. (Under the Recovery Act, $86 billionâ approximately 10% of the stimulus packageâ was earmarked for green energy projects.) The LGP means that companies get risk-free money. If the company succeeds, the low-interest loan gets paid back. If they failâ as many haveâ we, the taxpayers, lose. In contrast, the 1603 Grant Programâ implemented as part the Obama stimulusâ â is administered by the Treasury Department, with the goal of reimbursing eligible applicants for a portion of the costs of installing specified energy property used in a trade or business or for the production of income. Basically 1603 gives billions in favored businesses tax-free cash gifts that do not have to be paid back.

While we can prove that cronyism has run amok within the majority of 1705 LGP, we'll stay focused on the Special Seven. Here, in Part 1, we present a complete overview of the connecting dots on one project: SolarReserve, LLC. With this introduction made, weâ ll likely address several companies, with a common denominator, in subsequent releases.

In Sundayâ s column, the following thumbnail was presented: â SolarReserveâ s Crescent Dunes project is a solar thermal power tower plant utilizing the advanced molten salt power tower technology with integrated storage located in Tonopah, NV. The company's Fitch rating is BB, yet in September 2011, it was the recipient of $737 million in DOE loan guarantees. Obamaâ s law school buddy and 2008 Obama campaign bundler, Michael Froman, was managing director of alternative investments at Citigroupâ which became a major investor in SolarReserve. Froman currently serves on the White House staff. Additionally, other high profile Democrats are involved with SolarReserve.â

But there is more.

More about Michael Froman. Peter Schweizer reports that â When Obama ran for president, Froman helped raise large sums of money on Wall Streetâ for the 2008 campaign. The HOGRC report (page 47) confirms Peterâ s findings and adds that Froman was a $200,000 bundler: â Michael Froman currently serves as the

Deputy Assistant to the President and Deputy National Security Advisor for International Economic Affairs. He was a friend of President Obamaâ s from law school, and supported his political career by bundling over $200,000 for his 2008 presidential candidacy. Prior to his arrival at the White House, Froman was the Managing Director of Alternative Investments at Citigroup, where he managed infrastructure and sustainable development investments. Citigroup became a major investor in SolarReserve, which ultimately received a $737 million loan guarantee in September 2011.â

The Citigroup connection is tighter. Richard Parsons was Chairman for Citigroup from 2009 until he announced stepping down in March 2012. Citigroup was a top Obama donor in 2008. Parsons served on the Obama Transition Team and on the Economic Advisory Board. In 2011, Parsons was appointed to the Presidentâ s Council on Jobs and Competiveness.

Next, David Sandalowâ who is currently â the Assistant Secretary for Policy and International Affairs at DOE, where he acts as Secretaryâ s Chuâ s principal adviser on energy policy, as well as coordinating DOEâ s foreign policy involvement.â (HOGRC report page 49) â Sandalowâ s ties to the White House date back to the Clinton Administration, during which he worked with President Clinton on environmental issues. After having gained this experience, Sandalow became the influential Chair of the Energy & Climate Working Group of the Clinton Global Initiative. He went on to advise President Obamaâ s presidential campaign in 2008. Prior to joining the Obama Administration, Sandalow was a senior advisor to Good Energies, Inc., an energy-focused venture capital firm. Good Energies is an investor in SolarReserve.â

Other SolarReserve connections to the Democratic Party include:

Ronald Pelosiâ Former Speaker of the House Nancy Pelosiâ s brother-in-law, Ronald Pelosi, holds a leadership position with Pacific Corporate Group Asset Managementâ which is an investor in SolarReserve. Additionally, his colleague, Jasandra Nyker, has served as a member of SolarReserveâ s board of directors.

George Kaiserâ Argonaut Private Equity is an investor in SolarReserve. Argonaut Private Equity is owned by major Democratic fundraiser and a 2008 Top Obama bundler George Kaiser, who also invested in Solyndra. Kaiser made multiple visits to the White House in the months before the company was granted a $535 million loan from the government. The Managing Director for Argonaut Private Equity, Steve Mitchell, serves on SolarReserve's Board of Directors.

Tony Podestaâ OpenSecrets.org shows that SolarReserve paid hundreds of thousands of dollars in lobbying fees to the Podesta Group. Tony Podesta is the principal at the Podesta Groupâ which he started with his brother John. John Podesta ran Barack Obamaâ s presidential transition team and is the Director of the Center for American Progressâ which is â reportedly highly influential in helping to craft White House Policy.â Both Tony Podesta and his wife Heather (a Washington power couple) are frequent White House visitors that share high ranks in "lobbying power," and Democrat bundling as well.

Lee Baileyâ SolarReserveâ s Chairman of the Board is Lee Bailey, a Managing Director with U.S. Renewables Group, who holds a significant financial stake in SolarReserve. Bailey has donated$21,850 since 2008 to Democratic candidates, including President Obama, Senate Majority Leader Harry Reid, California Sen. Barbara Boxer and then-presidential candidate Hillary Clinton.

James McDermottâ SolarReserve board member James McDermott is also a Managing Director with U.S. Renewables Group. He contributed $61,500 to various Democratic campaigns since 2008, including $30,800 to Obamaâ s presidential election campaign. U.S Renewable Energy Group has ties with Senator Harry Reid.

If there were only one connect-the-dots story, it would be easy to dismiss it as coincidence. But here, with just one company, you can see the dots connect, and connect, and connect. As you will continue to see, they keep on connecting. In this case, connect-the-dots is no innocent childhood game. It is a high-stakes gamble and

only those with connections get to play. Obama and his Democratic friends are the winners. We, the taxpayers, the losers. We lose the financial investment of our tax dollars and our electricity rates go upâ all to support the discredited ruse of man-made climate change.

The Panama Papers And The Green Car Boondoggle (VIDEO)

You have probably heard of ***â The Offshore Leaksâ , â The Panama Papersâ , â The Pandora Papersâ , â The Swiss Leaksâ , â The Sony Pictures Hackâ , â The Luanda Leaksâ , â The Bahamas Leaksâ , â The Paradise Papersâ ,*** etc.

What you might not know is that EVERY bank and international CPA firm has been hacked. Different state agencies, seeking to embarrass each other, have a leaking war going on. The public has only seen 10% of what the international journalists (Like ProPublica, ICIJ, Transparency International, The Guardian, etc.) have in their hands.

The Government hired a team to build America's back-up energy plan "*in case the Middle East had problems*". The Government convinced them to invest years of their time and their life savings in this Government sponsored program. At the last minute, the government didn't pay what they had promised that team and sent the money, instead, to a White House political campaign financier oligarch. Federal and news investigators later discovered that the oligarch, and his staff, were sleeping with, giving jobs to and paying the White House staff that made all of the funding decisions. It was felony-class organized crime

What you can expect to see in the future is a set of material called â ***THE ENERGY PAPERSâ*** . These materials document an organized-crime using taxpayer dollars to pay quid pro quo to politicians and their tech oligarch financiers. The papers document how bribes, payola and insider deals financed Solyndra, Ener1, Tesla, Abound and others. Elon Musk, Mark Zuckerberg, Eric Schmidt and Larry Page are exposed ordering hit-jobsâ on competitors and maintaining covert business ownershipâ s with U.S. Senators.

INTERNATIONAL LAW ENFORCEMENT OFFICIALS HAVE UNCOVERED THIS ROUTING OF THE PAYMENTS, MONEY LAUNDERING AND TAX EVASION OF THE ATTACKERS HIRED BY THE U.S. POLITICIANS:

An Inconvenient Truth: How Tesla Became a Trillion-Dollar Company Through Corruption, Bribery And Cronyism

Astonishing story about the rise of green technologies using political payola

By Ilya Pestov and The Justice Alliance

Al Gore and Elon Musk

After the news that Hertz decided to buy 100 000 Tesla cars for more than $4 billion, Tesla capitalization has already increased almost by $200 billion. I am not talking about the market irrationality anymore, but I feel a bit curious. Hertz has recently emerged from bankruptcy and has not received any wholesale discount from Musk. How and why is Hertz going to buy such expensive cars? The answer is simple â with taxpayersâ money.

Apparently, the White House has recently passed the Budget Reconciliation Bill, which would cost $1.75 trillion for US citizens. There are plenty of benefits for the so-called â clean energyâ in it, particularly, 30% of tax deductions for â qualified commercial electric vehiclesâ . It means that after buying Tesla cars Hertz will receive $1.26 billion of tax cashback. In fact, there are also some benefits for the installing of electric vehicle charging stations. Hertz has already announced plans to make thousands of charging stations.

Lithium, Cobalt and rare earth mines are owned by Kleiner Perkins, Goldman Sachs and Department of Energy/White House insiders. That is what powerâ s Elon Muskâ s cars. Many say that Tesla was just a front for invading foreign nations for their lithium batter mines (which are operated with child labor).

It is important to mention that common people have also an access to tax benefits that the public pays for with their April income taxes and the compensation limits are increased from $7500 to $12 500. As an example, instead of paying $15 000 income tax you may buy Tesla Model S and pay just $2500. It is like a pretty bonus from Tesla or a good discount on electric vehicles. Seems to be a good motivation to refuse internal-combustion engines, doesnâ t it?

Moreover, Tesla also gets ZEV credits and other benefits for manufacturing its products. That way, the US government restructures the automotive market literally by hand and picks the winners and losers. Do you know what I find the most interesting in this story? The fact that the new bill was published on October, 28th but Hertz announced buying of Tesla cars on October, 25th. As you can understand, the decision was made much earlier.

You may already know that Secretary of Energy Steven Chu, who gave Tesla their money, and his Silicon Valley friends at McKinsey Consulting, who provided the staff for the Department of Energy, were all in the pocket of Kleiner Perkins, where Al Gore works. Chu has now been replaced by an actress named Jennifer,

who laughs at any suggestion that her job involves protecting America by keeping gas prices low and who owns the very companies that she is giving government funds to.

Now I would like to tell you about one very interesting character in the US establishment named Al Gore. This is the former US Vice President under Clinton, the presidential candidate in 2000 and the Nobel Peace Prize winner for the film An Inconvenient Truth (2006) about global warming.

His film and book have actually became the foundation for modern climate policy and the public demand for renewable energy sources. One should notice keep in mind that along with the awareness of internal concern for the ecology Al Gore was one of the first who realized the commercial potential in projects devoted to the protection of the environment.

Two years before â An Inconvenient Truthâ Al Gore together with Goldman Sachs Chief Asset Manager David Blood has run a new investment company Generation Investment Management. As a result, they both defined terms sustainable investing and ESG.

The former presidential candidate, as we could see, was very good at technology and finance. In 2007, he was suddenly invited to become a partner in Kleiner Perkins â one of the oldest and largest venture funds of Silicone Valley. John Doerr, one of Kleiner Perkins chief partners, joined the advisory board of Generation Investment Management.

J. Doerr, as Al Gore, stood for the innovations in clean energy to struggle with climate change. On the TED conference in 2007, he quoted his daughter â your generation created this problem, you better fix itâ . That reminds me on Greta Thunbergâ s words which would be told later. So that J. Doerr and Al Gore had a similar vision of the future and the month after mentioned partnersâ rotation Kleiner Perkins fund invested into Silver Spring Networks. Bidenâ s daughter, Ashley, left her hand-written diary for journalists to find where she reveals the same thoughts (in addition to her naked shower play with Joe Biden)

By great coincidence, this deal happened a year before the US Department of Energy had announced a $3.4 billion grant program for smart grid developers. In fact, $560 million of this amount was spent to utilities serviced by Silver Spring Networks, which works exactly with smart grids. 6 years later Silver Spring Networks successfully entered an IPO.

David Blood, Al Gore and John Doerr

Luck literally pursued Kleiner Perkins. In 2008, the fund invested tens of millions dollars in a start-up hybrid cars manufacturer Fisker Automotive. After that, in September 2009, the company received a low-interest $529 million loan under the Advanced Technology Vehicle Manufacturing (ATVM) direct loan program from the same US Department of Energy.

Congress passed ATVM in 2007 after a drop in sales in the big three (General Motors, Ford, and Chrysler). The volume of the borrowed capital was $25 billion. The goal of the program was to help the US auto industry to reduce fuel costs because Americans were tend to choose more fuel-efficient Japanese cars. That is, the problem devoted not to ecology issues, but much more to fuel saving.

Again, ATVM passed in 2007, but the allocation of funds began only 2 years later on a competitive basis. In February 2009, 8 months before the government loan to Fisker Automotive, John Doerr of Kleiner Perkins became a member of the Presidential Economic Recovery Advisory Council. The funny thing is that Fisker did not even have manufacturing facilities in the USA and the assembly of their Karma models took place in Finland.

> The Obama-Biden administration appointed a venture capitalist from Kleiner Perkins as a member of an economic advisory board. They also signed a government loan for help American automotive industry to a company (without any manufacturing capacity in the United States) that Kleiner Perkins has invested in.

That trick was obviously noticed by the public. Some companies have sued the Department of Energy, Mitt Romney even called on Congress to open an investigation into the loan to Fisker Automotive, pointing out that its investors included Al Gore, who sponsored Obamaâ s presidential campaign. Nevertheless, somehow all those worries dwindled away as federal cover-ups went into full swing.

Fiskerâ s plans to start the manufacture at a closed GM plant in Delaware at the expense of a government loan, which GM itself did not receive, deserved special attention. These plans caused some questions among local residents, and then current Vice President Joe Biden, who served as Senator from Delaware from 1973 to 2009, assured people that the budget money for Fisker would be paid off, and the company will eventually return â billions-billionsâ dollars to everyone.

Running ahead, the budget money didnâ t return to taxpayers because Fisker went bankrupt in 2013. From the bankruptcy documents, which fell into the journalistsâ hands only 7 years later, it turned out that Hunter Biden (Joe Bidenâ s son) was an investor of Fisker. However, this fact also faded into oblivion without preventing Biden from gaining 58.8% of the votes in Delaware during the 2020 presidential election.

Let us turn back to Tesla. Only $8.4 billion were allocated from the $25 billion program of help to the American auto industry. Only 5 companies received money, although 108 applications were received. Almost $6 billion went to Ford with a democratically oriented management, $1.5 billion were given to Nissan, about half billion â to Fisker and Tesla and, finally, $50 million came to a less known VPG company.

Just one of the first results in Google on the â Chrysler republicanâ query.

Surprisingly, the credit limit has not been exhausted, large manufacturers like General Motors or Chrysler did not receive money, but two unprofitable startups from California, selling several hundred cars each, did. We already know the main lobbyists of Fisker â they are Al Gore and John Doerr, who invested in Fisker through Kleiner Perkins. But were they acquainted with Elon Musk? A brief search immediately gave a positive answer to that question.

In 2013, Al Gore, while talking about his new Tesla S in an interview to Yahoo Finance, called Elon Musk his friend. More than that, his son Al Gore III has been in charge of Policy & Business Development at Tesla since 2015. After learning that I immediately went to have a look at the Generation Investment Management profile on CB Insights. It turned out that the Gore fund had invested in Muskâ s SolarCity in 2011 and Gore III worked there as a Policy Officer.

Then in 2016, Tesla acquired SolarCity. An unprofitable service company that didnâ t even produce solar panels was taken over for a suspiciously large amount of money. Recently it turned out that Elon Musk has faced a $9.4 billion fine for this deal, although the final court decision had not been made yet. It is important that after the takeover in 2018, Al Gore became suddenly nominated for the post of chairman of the Tesla board of directors.

SolarCityâ s valuation was really high

Al Gore rejected that offer but I did not doubt more about his close connection with Tesla. At the same time, I was interested in their possible contacts before receiving the lobbied state subsidies of 2009. Thatâ s why I decided to change the angle and check whether Tesla has a relationship with Kleiner Perkins. Then it turned out that Elon Musk had been friends with John Doerr for a very long time.

In 2006, when Tesla looked for money in round Ð¡, Kleiner Perkins fund offered $50 million, while VantagePoint offered $70 million. Despite the huge difference in bids, Musk wanted to strike a deal with Kleiner Perkins but on the condition that John Doerr would sit on the board of directors. Unfortunately, J. Doerr had many other obligations and was forced to refuse. Thatâ s why Musk chose VantagePoint, as he told in an interview.

I went on and learned that the vice president of Tesla in 2006â 2017 was Diarmuid Oâ Connell. As I remember, he was responsible for national security issues under former Secretary of State Colin Powell. He also spoke about Iraq chemical weapons and showed test tube to legitimize the military invasion of Iraq at the UN in 2003.

I wondered how he appeared in that story. However, I didnâ t have to look for an answer for a long time, so let us meet Colin Powell, a member of the advisory board of Kleiner Perkins, a strategic partner of the fund in 2005.

There was no direct investment from the fund in the company, nevertheless it seems that there was another strong connection between Kleiner Perkins and Tesla. Is Al Gore really not a government subsidy beneficiary for Tesla? My confirmation bias did not allow this thought to get along in my head. Searching for keywords, I came across publications in Yahoo Finance and Insider Monkey. The articles mentioned Goreâ s earlier investment in Tesla.

Keeping in mind that the journalists could simply make a mistake, I began to study which funds were invested in Tesla at earlier stages and whether Al Gore was involved. Finally, I came across an interview with the managing partner of Capricorn Investment Group on the blog of the Japanese financial holding Nomura. He said that Capricorn financed the filming of â An Inconvenient Truthâ movie.

Capricorn was founded by Jeffrey Skoll, the former eBay president and billionaire. The fund invested in Tesla together with SpaceX at early stages. Mr Gore brought in $35 million! Can you imagine? â Thatâ s a big wad of cash for someone who reported barely $2 million in assets in 2000, when his job as vice president came to an endâ , as the New York Times wrote in 2008.

> As a result, Al Gore was the direct beneficiary of providing state loans under the ATVM program for Fisker Automotive and Tesla Motors, in which he owned shares through venture funds Kleiner Perkins and Capricorn Investment Group.

When I proved it, I wanted to learn more about Al Goreâ s bio. It has been revealed that after losing the election, in 2001, he became a vice president of Metropolitan West Financial â a company with more than $65 billion in assets under management. The company was managed by former heads of Drexel Burnham Lambert. That was a bankrupt investment bank, which history was very similar to Lehman Brothers.

The same year Mr Gore also joined the Google Advisory Board, in which he invested together with Kleiner Perkins in 1999. Probably that was the time when he met John Doerr. Then, in 2003, the former US presidential candidate became a member of Appleâ s board of directors. In addition, the founders of Google were also early investors in Tesla.

It is clear that Albert Gore had many connections in political and financial communities. In 2006, he started a charitable organization The Alliance for Climate Protection. The company launched a $300 million (sic!) ad campaign to mobilize Americans to reduce greenhouse gas emissions immediately. As a result, an â inconvenient truthâ was told to everyone.

In 2009, Gore appeared before the United States Senate Committee on Foreign Relations to support Obamaâ s economic recovery plan. Then the government had passed the Recovery and Reinvestment Act,

which included an $80 billion stimulus package to promote green energy initiatives. Newspapers called the bill the â biggest energy bill in historyâ .

> The person who owns stakes in Tesla and Fisker first knocks out government loans and then pushes a law according to which manufacturers of electric vehicles should pay fewer taxes, and buyers of electric vehicles should receive tax deductions. Can you imagine?

Surely, Al Gore was not the only one who acted in this process. In 2006, Nick Pritzker, the brother of Hyatt founder, invested in Tesla. His niece Penny Pritzker became the 38th US Secretary of Commerce in Barack Obamaâ s cabinet, and his nephew was the Governor of Illinois. In general, Pritzker is one of the richest families in the US.

Among of early investors in Tesla there is Steve Westley, a politician and businessman. He has already joined the companyâ s board of directors in 2007. More than that, during the 2008 presidential election, Westley acted as a co-chairman of Californiaâ s Obama for America campaign. Currently, he is a member of the US Department of Energy advisory board.

Al Gore, John Doerr, Nick Pritzker, Steve Westley, Elon Musk, Sergey Brin, Larry Page â all of them were so-called donors and beneficiaries to the Obama campaign. I mentioned only the names from the public access. Let me remind that these people are only mentioned in the context of the Tesla story while the whole green initiative and the Recovery and Reinvestment Act affects a much larger number of companies and investors.

The rapid development of electric vehicle companies is taking place in a distorted market environment. Their commercial success is mainly driven by government incentives unavailable for ICV cars manufacturers.

The US government is literally restructuring the auto market by hand in order to make one guy: Elon Musk, massively rich.. In that case the active discussions about climate change and greenhouse gas emissions could probably be nothing more than a part of a program to reallocate money in the US establishment since Nancy Pelosi, George Soros and The Feinstein family are the true owners of the stock profits from Elon Musk.

However, the question remains whether this is really a good thing, because there is no full consensus in the scientific community regarding the general belief in the environmental friendliness of electric vehicles and the beneficiaries are always the same 50 people associated with Nancy Pelosi.

The Solyndra Mess Gets Messier With Pelosi And Feinstein Family Kick-Backs

By Andrew Stiles

-
-

the Department of Energy announced that it had approved new loan guarantees worth more than $1 billion for two solar energy companies:

> DOE announced a $737 million loan guarantee to help finance construction of the Crescent Dunes Solar Energy Project, a 110-megawatt solar-power-generating facility in Nye County, Nev. The project is sponsored by Tonopah Solar, a subsidiary of California-based SolarReserve.
>
> The Energy Department said the project will result in 600 construction jobs and 45 permanent jobsâ ¦
>
> The Energy Department also announced that it had finalized a separate $337 million loan guarantee to Sempra Energy for a 150-megawatt photovoltaic solar-generation project in Arizona.
>
> The project will result in 300 construction jobs, DOE said.

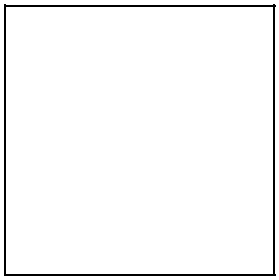
Letâ s see. Simple math, as the president would say, gives us a grand total of $1.074 billion spent to create, according to the DOE, just 45 permanent jobs. Thatâ s about $24 million spent for every permanent job created. As far as the DOEâ s â greenâ loans program is concerned, thatâ s par for the course. By any reasonable standard, itâ s a horribly inefficient way to spend the taxpayersâ money.

With respect to Solyndra, the DOE shelled out $535 million to a company that happened to list a major Democratic fundraiser (George Kaiser) as a primary investor. Could there be a similar connection to any of these other companies? Of course there could.

As American Glob reports, Solar Reserve, the California-based enterprise at the heart of the $737 million loan guarantee mentioned above, is an â investment partnerâ with the Pacific Corporate Group. The executive director of PCG is Ron Pelosi, brother-in-law of House Minority Leader Nancy Pelosi (D., Calif.).

But thatâ s not all. Solar Reserve is also investment partners with Argonaut Private Equity, an arm of the (George) Kaiser Family Foundation that was a major investor in Solyndra and was involved in negotiations with the DOE to restructure the failed companyâ s loan agreement. That agreement would ultimately give Argonaut and other private investors priority status over the American taxpayer with respect to the first $75 million recovered in the event of Solyndraâ s collapse. As Republicans argued at a recent House committee hearing, this arrangement was almost certainly a violation of federal statute.

Argonautâ s managing director, Steven Mitchell, served on Solyndraâ s board when the restructuring took place, and reportedly still serves on the companyâ s board. He is also listed as a â board participantâ at Solar Reserve:



> Mitchell owes his position at Solyndra and Solar Reserve, apparently, to the fact that his primary employer, Argonaut Private Equity, invested in both companies. Mitchell holds the

title of Managing Director for Argonaut Private Equity. After Solyndra declared bankruptcy, two Democratic members of the U.S. House asked that House Subcommittee call Mitchell to testify about Solyndra. Though he has not appeared before Congress, he has â been asked to provide documents to Congressâ pertaining to Solyndra.

Comments

These connections certainly suggest that the Obama administration was not merely â felony dumb,â in the words of Rep. Brian Bilbray (R., Calif.), in its handling of the DOE loan program, but consciously corrupt. And at the moment, there are far too many questions that remain unanswered.

Nancy Pelosiâ s Brother-In-Lawâ s Company Received $737 Million From Obamaâ s Energy Dept As â Loan Guaranteeâ

HJIC at Illicit Info June 8, 2019

By HJIC at IllicitInfo

Opinion| To understand the future we must understand the past. At least when it comes to what we can expect

To envision the size of the pot of gold that Democrats envision for themselves at the other end of the Green New Deal rainbow we only have to look back to the Obama administration, the $3 Trillion in â stimulusâ money, the Green Movement, and how it seemingly enriched Democrats, their donors, and Nancy Pelosi in particular.

For background we cite aN article from the **Daily Mail**:

Even as government financed â green energyâ pioneer Solyndra was failing, the Obama administration approved an additional $1 Billion in loans to similar green energy projects.

A whopping $737 million of that money went to the **Crescent Dunes** project situated in Tonopah, Nevada, to finance a 110-megawatt desert solar power plant.

Stay with me.

Nancy Pelosiâ s brother-in-law was previously an â Executive Directorâ , and at the time the loan was completed, Ron Pelosi was an â Independent Directorâ of a parent company who held a minority share of the company that was a primary beneficiary of that money landing a $737 million loan guarantee from the Department of Energy for Crescent Dunes.

Funny that as Democrats **scream** that Saudiâ s renting out an entire floor of a Trump hotel is an untenable emolument. But I digress.

Despite knowledge that Solyndra was tanking then-Minority Leader Pelosiâ s brother-in-law, second in command at the energy investment firm backing the project, somehow secured government funding for the **SolarReserve** project.

PCG Clean Energy & Technology Fund (East) LLC, listed as one of the investors in the project was given the staggering loan, which even dwarfs that given to failed company Solyndra. PCG Clean Energy & Technology Fund was reportedly a 2% owner of Tonopah.

The project was expected to generate enough electricity to power 43,000 homes. Thatâ s it.

Obamaâ s Energy Secretary Steven Chu announced the loan just two days after the doomed $535 million Solyndra disaster was scheduled for completion.

At the time, Florida Rep. Cliff Stearns, then-chairman of the investigations subcommittee of the House Committee on Energy and Commerce warned:

â The administrationâ s flagship project Solyndra is bankrupt and being investigated by the FBI, the promised jobs never materialized, and now the Department of Energy is preparing to rush out nearly $5 billion in loans in the final 48 hours before stimulus funds expire â thatâ s nearly $105 million every hour that must be finalized until the deadline.â

Despite the warnings, Energy Secretary Chu, said the projects would create 900 construction jobs and, get ready for this, trumpets pleaseâ ¦52 permanent jobs. Whoopie!

More disturbing is that other investors included Steve Mitchell, who served on the board of directors of Solyndra while the company was collapsing.

All told, Obama era expenditures, first put in place by Speaker Pelosi, who did away with the usual budgetary process, exceeded revenues by more than $1 Trillion each year.

This became the baseline for unquestioned omnibus spending packages that subsequent Republican Speakers John Boehner and Paul Ryan refused to reign in. Welcome to the UniParty ripoff of Americaâ s taxpayers.

This allowed politicians on both sides of the aisle to grow rich, while our children were saddled with a debt burden from which they are not likely to escape.

Thereâ s a reason Nancy Pelosi has a net worth ranging from $120-185 million. Itâ s hard not to suspect that she earned her money the old fashioned way â ¦by stealing it from taxpayers.

Itâ s the same reason Democrats are lining up behind the Green New Deal that reads like a Republican parody of a Democrat program.

Now put the â **Green New Deal**â in perspective. If the beltway elites grew rich by spending $4 trillion dollars each year, imagine how much can they believe they can skim from doubling or tripling those expenditures.

Asking for a friend.

In a statement Ron Pelosi claimed that â the loan the company received had nothing to do with meâ , he â knew nothing regarding their proposed or actual transactionsâ and that he â did not speak with person in connection with their plans.â Above we laid out our estimation of how this deal may have went down, we will leave it up to you to deduce what you think actually transpired. Factcheck.org did a report on this transaction 8 years ago, which paints a different picture, suggesting everything was on the up and up, you can read that here.

Now you know why these beltway rats want to impeach President Trump.

This article has been updated to provide more details as to Ron Pelosiâ s role at PCG Clean Energy & Technology Fund (East) LLC and to include his statements denying knowing anything about the loan or having anything to do with it.

Crony Capitalism: $737 Million Green Jobs Loan Given to Nancy Pelosi's Brother-In-Law

by Mark Hemingway

-

Print this article

Despite the growing Solyndra scandal, yesterday the Department of Energy approved $1 billion in new loans to green energy companies -- including a $737 million loan guarantee to a company known as SolarReserve:

SolarReserve LLC, a closely held renewable energy developer, received a $737 million U.S. Energy Department loan guarantee to build a solar-thermal project in Nevada. The 110-megawatt Crescent Dunes project, near Tonopah, Nevada, will use the sunâ s heat to create steam that drives a turbine, the agency said today in a e-mailed statement. SolarReserve is based in Santa Monica, California.

On SolarReserve's website is a list of "investment partners," including the "PCG Clean Energy & Technology Fund (East) LLC." As blogger American Glob quickly discovered, PCG's number two is none other than "Ronald Pelosi, a San Francisco political insider and financial industry polymath who happens to be the brother-in-law of Nancy Pelosi, the Minority Leader of the United States House of Representatives."

But wait... there's more! One of SolarReserve's other investment partners is Argonaut Private Equity:

Steve Mitchell and Argonaut Private Equity might have a chance to recoup some of their losses in the Solyndra debacle now that the Department of Energy has given a $737 million dollar loan guarantee to a company backed by Argonaut that also lists Mitchell among its board of directors. Mitchell served on the Solyndra LLC Board of Directors. He also serves as Managing Director for Argonaut Private Equity, a company that invested in Solyndra through the LLCs parent company. After Solyndra declared bankruptcy, two Democratic members of the U.S. House asked that Mitchell testify about Solyndra. Though he has not appeared before Congress, he has "been asked to provide documents to Congress" pertaining to Solyndra.

And for good measure, it's also noteworthy that Obama is about to hold a big money fundraiser at the home of Tom Carnahan in St. Louis:

Carnahan, a member of the prominent Missouri Democratic family, has been tapped by the Obama campaign as its chief Missouri fundraiser. He is chairman of the board of Wind Capital Group, a wind energy company that makes it corporate headquarters in St. Louis. He formerly was president and CEO of the company. Last

year, Wind Capital's Lost Creek Farm facility in northwest Missouri received a $107 million tax credit from the Treasury Department, among many such wind operations receiving support from from stimulus funds.

Tom Carnahan is the son of former Missouri governor Mel Carnahan and former U.S. senator Jean Carnahan. He's also the brother of current Missouri secretary of state, Robin Carnahan.

It's increasingly hard to tell the government's green jobs subsidies apart from the Democrats' friends and family rewards program.

DIANE FEINSTEIN'S CBRE handled construction and lease contracts, her staff worked for Tesla, Her construction company built the buildings, her relative Herb Newman did the staffing, Feinstein got the funds for Musk and was a shareholder in Tesla and Solyndra suppliers.

Dear Steve Chu: Send Us All Your DOE Files on 1705. Thanks, Congress

The Solyndra blowback continues. A love letter from the House Committee on Energy and Finance.

ERIC WESOFF

Dear Steve Chu: Send Us All Your DOE Files on 1705. Thanks, Congress

- **29**
-

The Solyndra debacle is the gift that keeps on giving.

Unless you're Jonathan Silver, former head of the DOE loan program. Or unless you're Brian Harrison, the former CEO of Solyndra currently under investigation by Congress, the FBI and probably several other investigative organizations.

But if you're on the House Committee of Energy and Commerce -- Solyndra really provides a reason to get up out of bed. It is also managing to keep journalists busy.

Anyway -- I hope congressional staff members have a lot of reading time on their hands.

The House Committee on Energy and Commerce has just requested pretty much the entire document file for every loan guarantee under the DOE's 1705 program including independent due diligence, audited financial statements, etc. Here's a link to download the letter.

Realize that Solyndra was just one of about 40 loans and loan guarantees issues by the department spanning solar photovoltaics, concentrated solar power, wind farms, and biofuels.

Here's a list of just the solar loan guarantee recipients, followed by the letter from the Committee to DOE Secretary Chu.

What do Stearns and Upton hope to find amidst the mind-numbing minutiae in these files, other than LCOE calculations and capex estimates?

	1705		
1366 Technologies	Solar Mfg	$150M	MA
Abengoa Solar	Solar Gen	$1.4B	AZ
Abengoa Solar	Solar Gen	$1.2B	CA
Abound Solar	Solar Mfg	$400M	CO

SolarReserve	Solar Gen	$734M	NV
SoloPower	Solar Mfg	$197M	OR
Solyndra Inc.	Solar Mfg	$535M	CA
SunPower (CVSR)	Solar Gen	$1.1B	CA

jgroelinger â ¢ 7 years ago

Someone mentioned "due diligence" - a point I'd like to further explore. At a high level, there are two major steps to the process before a company can lose the money it receives. First it has to receive a loan guarantee. Then it has to receive the money from a lender (because a guarantee is just that a guarantee, not money). In the 80s I was a consultant to, and then a senior officer of, the US Synthetic Fuels Corp., a US government corporation formed late in the Carter administration. Our authority was to issue federal loan guarantees to alternative energy projects. I found that, for such high-risk projects, the issuance of a US government guarantee was a necessary, but not a sufficient, step for the owners to receive funds. Financial institutions would still perform extensive due diligence on the borrower and the project, because the last thing lenders wanted to do was to try to collect from the US government against the loan guarantee. So, Ive been puzzled. Even if the US governments Department of Energy saw fit to issue the loan guarantee, what lender saw fit to actually provide the $535 million? It turns out that it was also the US government, through the Federal Financing Bank (FFB). Why was the FFB involved? According to its website, FFB has statutory authority to purchase any obligation issued, sold, or guaranteed by a federal agency to ensure that fully guaranteed obligations are financed efficiently. Was there no other source of efficient financing? Did the FFB perform any due diligence? Did the FFB step up because independent lenders wouldn't lend to Solyndra despite the loan guarantee? Was this a package deal that bypassed what would normally be a legitimate third-party project review? The answers to these questions would show the extent to which this was a political or a business deal. If it was a business deal, I'd agree that all deals don't turn out to be winners. If, however, this was a political deal, shame on those involved.

Dr. Lewis Fraas, Editor, Solar â ¢ 7 years ago

For the record: Solyndra discussion between Dr. Lewis Fraas at JX Crystals Inc and Jason Strauch at Sandia National Labs (a DOE LAB) on March 30, 2009Jason Here are my comments on the Solyndra deal.Solyndra is a tragic waste of money. The circumference of a circle is (Pi)D. If they deposit the CIGS on the circumference of the tubes, they are creating a low efficiency semiconductor with area of (Pi)D. The sun at any time during the day will illuminate an area = D. This is the inverse of concentration. Their utilization of the semiconductor material is 1/(Pi) or 1/3.14 = 0.32. I guess they really don't believe in motors for tracking and they do believe in paint with efficiency of 9% or now it is 9/3.14 = 2.9%. How stupid can people be??This is the thin film fantasy carried to even higher levels of incredibility. Also, they have a drawing and we have a photo of our 3-sun PV module and 2.5 years of operation.This should be a funny joke accept that they are serious. I looked at their web site. I do not see a module spec sheet. Also everything seems to be art work with no photos or performance data whatsoever. Has Sandia or NREL or any other gov lab tested this hypothetical product before the DOE issued this guaranteed loan? Lewis

R. Marks â ¢ 7 years ago

I beleive the whole process of giving loans is politically corrupt. Why is it that most loans go to CA based companies? My real issue is with the ATVMIP program for rebuilding the auto industry to produce advanced technology vehicles. This program was passed in 2008 as part of the trouble assets bill. Of the $25B in loans, there is $17B remaining which have not been given out. In June of 2009 Ford, Nissan, and Tesla were given loans, Fisher followed in September. None of the remaining 75+ applications have received anything. Now to my point: Tesla is in Polosi's district and it is reported that her VC husband is a Tesla investor, and then Fisker, is in Biden's home state. Now how does this process really work??

ramon â ¢ 7 years ago

Solyndra goes far beyond just being a bad loan. It was only one of many crooked deals that have been used to enrich party faithful and administration relatives. Those seeking to cover up these deals or excuse them as simply a bad investment are ignoring the sleaze and incompetence involved. No one who looks at the actions of Chu and his dept and the White House can possible claim that this was an isolated case. I also note Obama's purchase of $150 billion in GM stock, now worth about half that amount. That loan was payback to the UAW and other unions, who contributed half of Obama's campaign funds in the last election. He called it a "good investment." Well, for him I suppose it was - he can count of plenty of support from those unions next election. This is called buying votes and campaign contributions, using taxpayer money. Obama has a history of corruption and throwing away money by the bucketful. Anyone who defends this kind of behavior is just as crooked as he is. And what about Evergreen Solar? And what about that brilliantly conceived "weatherization program"? It doesn't take much digging to find plenty of dirt and filth in this crooked administration. Now we learn that Pelosi's relatives were benefiting from all these corporate loans as well. Seems like the entire Democratic Party is involved. Pack of thieves.

SolarEnima â ¢ 7 years ago

Eric, thanks for this continued coverage.By the way, keep in mind, not all modules are made alike and appropriate for all applications. Also, before investing, it is called...due diligence. Not because it is a trendy company with lots of schwag and marketing hype, liquidated shares and inflated stock prices.FirstSolar - Hmmm, $4.38 billion in DOE loans and down to $60/share already (from $160 only six months ago!), I can't imagine what's going to happen if the House Committee of Energy and Commerce held the loan process up? Do ya think any execs sold at 300 in May 2008?...go figure, only suckers buy solar at that price.Does anyone know how Abengoa got on the list? Aren't there other American companies that could have benefitted from loans? As per Google Finance "Abengoa SA is a Spain-based company, which principal activities range from solar energy to industrial waste, information technology and engineering" Sounds fishyIn my opinion, it would have been nice to see many smaller solar installer companies benefit from loans. Since when did Solar Manufacturers excel in installing solar? Why don't us little guys just move out of the way and let the SunPower and First Solars who are in bed with the DOE install solar. How many of those Solar companies have NABCEP certified installers installing solar for their jobs?? once again...go figure Check those First Solar systems in the desert in nine years and see how many modules didn't make the 90% power warranty cut?

The U.S. Department Of Energy Has Turned Into A Predatory Lender Operating Against The Public?

By Anston Conners

Your tax dollars pay for the U.S. Department of Energy (DOE) to exist but if you want to get some of your tax money on loan to help the public by building electric cars or energy efficient homes you have to PAY DOE to even file an application and it will almost always not be approved.

You will have to spend enough of your own money to buy a house in Wisconsin, and over year of your life, to find out that the money you hoped to get was only hard-wired to political insiders.

Per DOE: ***You have to pay the government between $150,000.00 and up to $400,000.00 to even look at your loan application.***

Contrast this with the fact that DOE has demonstrated, for over a decade, that it will reject all applicants who are not friends or financiers of Obama.

Additionally, contrast this with the fact that a commercial bank charges nothing, or less than $500.00, for the same application process and takes 2-3 weeks instead of 2-5 years as DOE dies!

Contrast this with the fact that Obamaâ s friends at Tesla, Fisker and Solyndra were simply handed funds from this account with almost no review or up-front â feesâ .

Read the specs at these links:

Renewables/Energy Efficiency solicitation, page 18-19:
https://www.energy.gov/sites/prod/files/2015/12/f27/DOE-LPO_REEE_Solicitation_03-Jun-2014.pdf and
Fossil solicitation, Supplement 1:
https://www.energy.gov/sites/prod/files/2015/12/f27/DOE-LPO_ADV-FOSSIL_Supplement-01_8-Jul-2014.pdf

DOE has now *legally* defined itself as a â BANKâ but it is not regulated as a BANK! DOE holds a monopoly on certain types of financing in violation of anti-trust laws. If Elon Musk, an Obama financier, tells his partners inside of DOE to not fund you, you donâ t get funded!

The communications from DOE, the videos of DOE staff from presentations, the communications with others, the actions of DOE, the statements by those who have interacted with DOE, the documents produced by DOE and other material, legally define DOE as an entity offering â *Financial Offerings such as a Bankâ* .

DOE is engaging in â Predatory Lendingâ which is supposed to be regulated by Federal and State laws, rules and regulations.

By definition, predatory lending benefits the lender and ignores or hinders the borrowerâ s ability to repay the debt. These lending tactics often try to take advantage of a monopoly finance position which the lender created. A number of banks have been sued by the U.S. Government for such practices. DOE used systems, as discussed in former Tesla head Darryl Siryâ s article:
https://www.wired.com/2009/12/doe-loans-stifle-innovation/ to become the ONLY source of domestic auto and energy product financing by the way DOE â arranged thingsâ . They created, working with the National Venture Capital Association (A predominantly DNC-controlled entity) the ONLY banking route and became THE ONLY BANK in high tech cars and alternative energy.

Standard banking practice holds precedent that a $100M business loan application takes three weeks, or less, to approve or deny, has few, if any fees required to process it and that the Federal Government never charges itâ s constituent taxpayers, on average, more than $100.00 for any federal financing instrument.

DOE appears, by itâ s actions, to now be violating numerous banking laws, ethics and standards and inflating process, fees and standards to protect our competitors and using our tax dollars to do so. The previous applicants will confirm these assertions.

Predatory Lending Practices

What constitutes a predatory lending practice? A number of actions are often cited as such â including a failure to disclose information or disclosing false information (such as the fact that DOE did NOT disclose that applicants direct competitors are the â loan reviewersâ AND beneficiaries; that the money was â hard-wired to Tesla, Ener1, Fisker, etc;) and, that DOE uses risk-based pricing and **inflated charges and fees**. There are other predatory practices such as loan packing, loan flipping, asset-based lending and reverse redlining in use by DOE staff.

These practices, either individually or in concert with each other, create a cycle of debt and corruption that causes severe financial hardship on any applicant who is not a DNC insider. Here are some predatory lending practices that many are concerned about:

Inadequate or False Disclosure

The lender hides or misrepresents the true costs, risks and/or appropriateness of a loanâ s terms, or the lender changes the loan terms after the initial offer.

Risk-Based Pricing

While all lenders depend on some form of risk-based pricing â tying interest rates to credit history â predatory lenders abuse the practice by charging very high interest rates.

Inflated Fees and Charges

Fees and costs (e.g., appraisals, closing costs, document preparation fees) are much higher than those charged by reputable lenders, and are often hidden in fine print or do not follow industry standards.

Loan Packing

Unnecessary products are added into the cost of a loan.

Loan Flipping

The lender encourages a borrower to refinance an existing loan into a larger one with a higher interest rate and additional fees.

Asset-Based Lending

Borrowers are encouraged to borrow more than they should when a lender offers a refinance loan based on their amount of equity, rather than on their income or ability to repay.

Reverse Redlining

The lender targets limited-resource industries like high-tech cars that conventional banks may shy away from. Everyone in the industry is charged higher rates to borrow money, regardless of credit history, income or ability to repay and/or process is changed for friends of â the bankâ .

Balloon Mortgages

A borrower is convinced to refinance a loan with one that has lower payments upfront but excessive (balloon) payments later in the loan term. When the balloon payments cannot be met, the lender helps to refinance again with another high-interest, high-fee loan.

Negative Amortization

This occurs when a monthly loan payment is too small to cover even the interest, which gets added to the unpaid balance. It can result in a borrower owing substantially more than the original amount borrowed.

Abnormal Prepayment Penalties

A borrower who tries to refinance a loan with one that offers better terms can be assessed an abusive prepayment penalty for paying off the original loan early.

Mandatory Arbitration

The lender adds language to a loan contract making it illegal for a borrower to take future legal action for fraud or misrepresentation. The only option, then, for an abused borrower is arbitration, which generally puts the borrower at a disadvantage.

Unlicensed Loan Offers

Beware of loan offers through public officials. Make sure any lender you work with is licensed. Is DOE licensed?

Promises

Stay clear of lenders who promise that your loan will be approved regardless of your credit history or rating.

Being Rushed to Sign Papers

Applicants were rushed into the loan process with high Interest Rates and Fees

Blank Spaces in Documents

DOE left the loan application document up to the applicants, as they stated in the videos, the ENTIRE document was a â blank spaceâ .

Legal Protections

Federal laws protect citizens against predatory lenders. Chief among them is the Equal Credit Opportunity Act (ECOA). This law makes it illegal for a lender to impose a higher interest rate or higher fees based on a personâ s race, color, religion, sex, disability, age, marital status or national origin.

The HOEPA Act protects citizens from excessive fees and interest rates. Loans that are considered â high costâ are subject to additional disclosure requirements and restrictions.

In addition, 25 states have anti-predatory lending laws, and 35 states limit the maximum prepayment penalty that a lender is required to pay.

Loan Churning a Problem

One of the most common practices among predatory lenders is loan churning, where borrowers are forced into a relentless loan cycle in which they are constantly paying fees and interest.

Loan churning usually works like this: The lender makes a loan the borrower canâ t afford. The borrower

fails to pay the loan back on time, so the lender offers a new loan that includes another set of fees and interest. The borrower, already under stress for not repaying the first loan, agrees to the second loan and the loan-cycle churn has started.

Prepayment Penalties

Another practice among predatory lenders is to include a prepayment penalty on loan agreements, especially those involving subprime mortgages or car loans.

A prepayment penalty is a fee charged to borrowers who repay a loan before its due date. It usually happens when borrowers are refinancing to take advantage of a more affordable interest rate. Prepayment penalties are meant to discourage borrowers from paying off a loan early because it deprives the lender of interest they expect to receive for the life of the loan.

Prepayment penalties vary from lender to lender. Many are for 2% of the amount owed. Others are for the equivalent of six months of interest on the loan. Most prepayment penalties are based around the number of years you have been paying the mortgage and usually expire after three years.

The Truth In Lending Act requires lenders to provide a disclosure form to borrowers that includes a box that the lender must check if a prepayment penalty is in play. The wording on the form says a penalty â mayâ be charged and that wording often confuses consumers. Some people will read that to mean â may notâ or simply skip over it in hopes that it will not ever be enforced.

The smarter practice is for the borrower to ask the lender for details on the amount of the penalty and how long the prepayment period is.

Many states have laws preventing high interest rate loans.

This document: https://fas.org/sgp/crs/misc/R43087.pdf lists the entities that may have an interest in DOEâ s deceptive and predatory lending practices.

Is DOE breaking the law?

The U.S. Department of Energy Engaged In Criminal Activities

By Lance LeLand

That may sound like an over-the-top assertion but the federal evidence I have seen appears to prove it.

Elon Musk, John Doerr, Vinod Khosla, Tom Steyer, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner are, at once:

1.) Silicon Valley oligarchs, as well as;

2.) The financiers of Barack Obama's political campaigns, as well as;

3.) The core beneficiaries of the Barack Obama Administration, as well as;

4.) The men who ordered and operated "hit-jobs" against anyone who competed with them, as well as;

5.) The bosses, or top shareholders, of the core staff that Obama hired to staff his Administration and the U.S. Department of Energy, as well as;

6.) The "Dark Money" operators during the Obama Administration, as well as;

7.) The past and future "revolving-door' employers of Obama's staff, as well as;

8.) The people that the Obama White House and Department of Energy actually report to, as well as all of the other things, above.

This is not conjecture. It is fact provable in court and known widely by FBI, GAO, Treasury and SEC investigators. Government investigators are blockaded from acting on this information by their bosses who are compensated by these men via Dark Money conduits.

Two of the above items might be a "coincidence". Eight such inter-connections are a "crime"!

This hurts the average person because this kind of corruption breaks the trust that voters hope to have in their government.

Department of Energy officials went to great lengths to **A.)** give away taxpayer money to these men, through covert stock market and investor routes, **B.)** pump the stock valuations owned by these men to stratospheric fluff numbers and **C.)** exclusively benefit their political campaign financing "PayPal Mafia Cartel". At the same time, Department of Energy officials went to great lengths to **D.)** sabotage, stone-wall, log-jam, defraud and lie to the competitors of these men in order to protect these Silicon Valley oligarchs, per their deals with Obama's Robert Gibbs, David Plouffe, Valarie Jarrett, Jay Carney, David Axelrod, Tom Steyer, Rahm Emanual, Steve Rattner and Matt Rogers: Their "handlers" in the Obama White House.

Top Department of Energy Officials stated on video that applicants for Department of Energy funding would be reviewed on a "first-to-apply/first-served" basis. The law that created the funding even said that. None of the Silicon Valley Mafia insiders had their acts together, though, and assumed the money would just be handed to them. The Paypal Mafia insiders never bothered to submit their application paperwork on time.

When top Obama/DOE crook's Steven Chu and Lachlan Seward realized that none of the Silicon Valley Mafia insiders had their acts together and that the competitors of their friends had filed applications first, they simply ignored their own rules, changed the submission criteria and refused to process the applications of anyone who was not an Obama campaign financier. They stone-walled the campaign financiers competitors until they forced almost all of them out of business.

By applying for DOE funds as a business, you can't get funding from any VC in the NVCA, or any bank, until AFTER DOE decides about your funding. By freezing decisions, that only take ***two weeks*** to process, for many ***years***, DOE killed an entire next generation auto industry.

In one instance, exposed in a federal lawsuit, Secretary of Energy Steven Chu, an investor in some of the Silicon Valley Cartel's own companies, had his top staffer tell an applicant multiple lies. The lies were designed to sabotage the applicant, one of Elon Musk's and John Doerr's most feared competitor's. If the applicant got the federal funds then the companies owned by Elon Musk, John Doerr, Tom Steyer, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner could not possibly compete.

In this instance, for one of the U.S. Department of Energy (DOE) funding pools, Steven Chu and Lachlan Seward wanted a fee paid to the Department of Energy in order to get them to look at the application. The applicant, XP, agreed to pay the $50,000.00 fee and acquired outside investors to fund the effort. All investors

engage in due diligence and these investors required that one DOE official engage in one phone call for 3minutes to answer their single question about the process. The call was arranged ***BUT*** the DOE executive did not show up. The applicant faxed, email, FEDEX'd and messaged DOE daily, for weeks, but Steven Chu's staff ducked the calls as the deadline approached. DOE was made keenly aware that the funding depended on a single answer to a question. In one call, the DOE Secretary stated that the DOE executive was "not in the office" while he could be clearly heard in his office talking behind her. The DOE executive was standing right there and avoiding the call because he knew that the call was the last thing the applicant needed to complete the process.

The DOE executive was protecting Elon Musk, John Doerr, Vinod Khosla, Tom Steyer, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner because he got paid by them.

The applicant's investors were getting nervous because DOE was not responding. On the day of the deadline, after getting a waiver for the fee, even though the applicant had the money ready, The DOE official finally responded and said *"sorry, you missed the deadline, you can't play"*. He had log-jammed and stone-walled the applicant to try to put them out of business to protect his bosses investments.

Carol Battershell worked at DOE as an Obama funding insider at this time. She was a huge promoter of climate change metrics. What we now know is that in 2008, every solution to the climate change crisis, if there was a "climate change crisis", just happened to be owned by Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. Another amazing coincidence! Carol has quit DOE, under pressure over falsified climate change data, and now bird-watches in Ohio.

Carol Battershell was in charge of reviewing applicants for DOE yet refused to return any phone calls or emails from applicants who were competitors of Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. What another amazing coincidence!

Battershell refused to ever talk to, or communicate with, any engineers or founders of the applicants who were the competitors of Obama's financiers.

That group of insiders may ring some bells for you. Steve Spinner was the husband of Alison Spinner who was the lawyer for Solyndra and Tesla. Solyndra was raided by the FBI and Tesla is still under FBI investigation. Steve Rattner was indicted in New York for stock market fraud. Steve Jurvetson was fired for sex scandal activities yet he is still in the news for hosting sex parties for Elon Musk. John Doerr is Climate Change advocate Al Gore's business partner and the subject of Silicon Valley's biggest sex lawsuit. Vinod Khosla is in the news for taking over a California public beach and nay-saying #METOO claims. Every one of this men has a dark and dirty dossier that makes one shudder to imagine the Omerta's they must engage in.

DOE officials used the most lame-brain excuses they could come up with to avoid funding their financiers competitors. They told the electric car company that the car was "not using enough gasoline". Then they told the same applicant that electric cars were too futuristic...while funding the same electric car with Nissan, a huge Obama Dark Money financier. At one point DOE stated that they did not have enough money for the applicants. IN FACT, they had enough money to fund EVERY applicant and there are still billions of dollars sitting unused in the fund.

Bright Automotive staff distributed a notoriously harsh letter that they had sent to Energy Secretary Chu after they realized that Chu had defrauded them too. Bright competed with the interests of Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. Bright staff say the DOE out-right defrauded them. DOE knew, from Day One, that only Obama political campaign financiers would get the funding. DOE used the other applicants as a smoke-screen.

The Obama Administration used the U.S. Department of Energy as a political slush fund to pay off campaign financiers. Hillary Clinton promised Silicon Valley she would do the same thing using the U.S. Department of Transportation to fund "Driverless Cars" (that nobody actually wants). That is why DNC financiers Tesla, Apple, Google, etc. are fanatically pushing their driverless car projects. These are DARK MONEY POLITICAL SLUSH FUNDS. They are criminal programs!

The Washington Cartel

By JAY COST

A 90 percent incumbency rate, legions of lobbyists, ignorant reporters, an apathetic electorate . . . Thereâ s no easy fix. Last week, Buzzfeed published a provocative article by Eve Fairbanks about Mark Halperin. For all the damage that Halperinâ s sexual misdeeds have done, Fairbanks contends that they pale in comparison to his destructive work as a journalist, particularly in writing The Note, his â chummy daily political newsletterâ for ABC: The Note purported to reveal Washingtonâ s secrets. In fact, its purpose was the exact opposite: to make the city, and US politics, appear impossible to understand. It replaced normal words with jargon. It coined the phrase â Gang of 500,â the clubby network of lobbyists, aides, pols, and hangers-on who supposedly, like the Vaticanâ s cardinals, secretly ran DC. That wasnâ t true â power is so diffuse. But Halperin claimed he knew so much more than we did, and we began to believe it. Once you believe that, itâ s not hard to be convinced that politics is only comprehensible, like nuclear science, to a select few.

There were those chosen ones â the people whoâ d flattered Halperin to get a friendly mention in his newsletter, the ones he declared to be in the know â and the rest of us. Halperin wrote about Washington like it was an intriguing game, the kind that masked aristocrats played to entertain themselves at 19th-century parties: Everyone was both pawn and player, engaged in a set of arcane maneuvers to win an empty jackpot that ultimately meant nothing of true importance. Fairbanks is

hearkening back to the court-versus-country distinction that was popularized among English republicans in the early 18th century. The basic idea was that the rulers (the court) are able to govern independent of the people (the country), thereby undermining the principle of self-government. Fairbanksâ s argument is that Halperin created a court party out of whole cloth â which makes him â the single journalist most responsible for Donald Trump.â This essay has all the hallmarks of an online #hottake. It seizes upon an overlooked aspect of a story and improbably turns it into something of enormous consequence.

Normally, such pieces are not worth giving a second thought to. However, Fairbanks makes a basic error that is worth correcting, because it illuminates a larger truth about our politics. Egypt mosque attack: Death tolls surpasses 300 00:05 00:58 Powered by She claims that power in Washington, D.C., is too â diffuseâ for Halperinâ s â Gang of 500â to be in control. That is fair, but only up to a point. Power is too diffuse in Washington, D.C., for a cabal of 500 to wield it effectively. Nevertheless, it is spread among political actors who share the same values, which Ted Lowi defined as â interest-group liberalismâ : It may be called liberalism because it expects to use government in a positive and expansive role, it is motivated by the highest sentiments, and it possesses strong faith that what is good for government is good for the society. It is â interest-group liberalismâ because it sees as both necessary and good that the policy agenda and the public interest be defined in terms of the organized interests in society. Significantly, these â organized interests in societyâ do not sample randomly from society at large. As E. E.

Schattschneider once observed, â the flaw in the pluralist heaven is that the heavenly chorus sings with a strong upper-class accent.â Moreover, it is a fallacy of composition to suggest that doing the bidding of various, organized interests is the same as securing the public good. The two are often quite distinct, in fact. I think this nicely summarizes the mentality of Washington, D.C. â on both sides of the aisle. The power of government is to be wielded unabashedly, and mostly for the interests that dominate the political process. The main differences between Republicans and Democrats â with a few notable exceptions on the left (Bernie Sanders) and the right (Mike Lee) â is how they believe power should be wielded and which interests should benefit. There is a kind of â court partyâ in American politics â one that is actually strengthened by the diffusion of power across Washington, D.C. It behaves like a cartel, restricting alternative supplies of policies or ideas. Political theorists have called this the â mobilization of bias.â In other words, there are just certain ways of getting things done in Washington, D.C., and alternative methods of policymaking are not up for discussion. The court party continues to exist because the country cannot be bothered to do anything about it.

This court party is sustained by several features of our polity. The first, and most important, is the overwhelming rate at which politicians are reelected. It tops 90 percent in most cycles. Apart from a handful of bellwether districts, incumbents are all but guaranteed victory when they choose to run again. Voters simply do not care enough to separate the wheat from the chaff. The court party continues to exist because the country cannot be bothered to do anything about it. The second

important feature is the way political campaigns are financed. Forget for a moment the super PACs, those well-heeled, largely anonymous entities that swoop in during competitive elections. Again, most elections are not competitive. Incumbents in these contests raise funds by drawing in large measure upon the interests that have business before the government, particularly the jurisdictions they oversee in their committees. This conflict-of-interest financing of our politics is a bipartisan phenomenon. Third, there is lobbying. Put aside any traditional views on how lobbying works. It is not a brown envelope stuffed with cash, or even a fancy dinner on the corporate card. It is the provision of information. Legislators are required to make judgments on all sorts of policy matters that they cannot possibly hope to possess expertise on. Where do they gain the knowledge necessary to make prudent decisions?

Not from the tiny congressional staff, which is overworked, underpaid, and inexperienced. Instead, lobbyists provide a large body of information about the political and policy consequences of particular legislation. Such knowledge is hardly objective or comprehensive; naturally, it favors the interests of those who provide it. The fourth is the revolving door between the public and private sectors. This gives those in government an incentive to look out for private interests, as they anticipate that theyâ ll need to have a job after they retire from public service. It also creates cultural and social affinities between people with private interests and those who are in public service. Everybody is in the same â club.â We have a fourth estate that often does little more than transcription. These are the main pillars that support todayâ s court party. Note that journalists are nowhere to be found among them. In

my view, the importance of journalism in sustaining or challenging this architecture has declined dramatically over the years. Slumping ratings for the broadcast networks, the sharp drop-off in newspaper subscriptions, and the rise of cable-news talk shows have forced mainstream media outlets to make all sorts of cutbacks in their traditional journalism. The result is that journalists lack the expertise necessary to understand, let alone dominate, the byzantine pathways of Washington, D.C., power relations. Factor in as well that journalists are themselves part of the revolving door: How many former reporters ended up in the Obama administration? How many former Obama officials now work in media outlets? Given this cycling, we have a fourth estate that often does little more than transcription.

Think back to Ben Rhodesâ s quip, in an interview with the New York Timesâ David Samuels, about playing journalists like fiddles on the Iran deal: The average reporter we talk to is 27 years old, and their only reporting experience consists of being around political campaigns. Thatâ s a sea change. They literally know nothing. Samuels observed: â In this environment, Rhodes has become adept at ventriloquizing many people at once.â It would be nice if one guy like Halperin was responsible for the dysfunction in Washington, D.C. That would make for an easy fix. But it is just not true. The problem gets down to power relations that systematically favor certain interests and worldviews over others, and a broader electorate that is unwilling to bear the burdens of citizenship required to reform it.

Read more at:

The indisputable facts here are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel

2. Are a white male fraternity who attack outsiders in organized manners

3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs

4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner

5. Operated the "Angelgate" collusion scandal

6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case

7. Controlled the Obama Administration and the Obama White House and traded most key staff with that Administration

8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters

9. Use the same 10 law-firms who have been charged with public policy manipulation

10. Control internet news, media and information

11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments

12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices

13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name

14. Are a Mafia-like criminal organization

The scurry of rats Ohr worried Comey firing threatened to expose their plot

By Monica Showalter

Sometimes, it's the little things that tell the most.

Witness the note from Deep State's Justice Department officials: Bruce Ohr, who wrote to a fellow anti-Trump plotter, the U.K.'s Christopher Steele, worried that President Trump's firing of now former FBI director James Comey would expose them all.

According to a Fox News report from Catherine Herridge:

> A collection of Justice Department official Bruce Ohr's emails, texts and handwritten notes, reviewed by Fox News, reveals that he was deeply connected to the unverified Steele dossier as well as its author and, during the presidential election campaign, the alleged government surveillance abuses involving a Trump campaign official.
>
> The dossier, which was used by federal officials to justify the surveillance of a top Trump aide, Carter Page, was created by Fusion GPS and paid for by Hillary Clinton's campaign and the Democratic National Committee.
>
> Ohr wrote that Christopher Steele, the ex-British spy who wrote the salacious dossier, was "very concerned (abt) about [former FBI Director James] Comey's firing â afraid they will be exposed."

Now, if they were doing everything right and everything they enacted was on the up and up, why would they cringe like that?

Why the rat-like behavior as the USS *Comey* sank, Bruce?

With this Ohr note, it seems they did reveal themselves for the coup-plotters they were, seeking to unseat President Trump through their Deep State trickery and fully cognizant that they were doing something shady, sneaky, and underhanded. If they were doing something they could tell their grandchildren about, we'd be hard pressed to find these bureaucratic shivers of fear.

It's as close as anything to an admission of guilt.

If you strike at the king, you'd better kill the king. Obviously, guys like Ohr have been in the Deep State Washington power game a long time, and that must be lesson one.

For the rest of us, it's just a bit humorous to see them cringe and scurry at the reality that these high and haughty bureaucrats are finally being exposed for those doings they never wanted us to know.

The U.S. Department of Energy Engaged In Criminal Activities

By Lance LeLand

That may sound like an over-the-top assertion but the federal evidence I have seen appears to prove it.

Elon Musk, John Doerr, Vinod Khosla, Tom Steyer, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner are, at once:

1.) Silicon Valley oligarchs, as well as;

2.) The financiers of Barack Obama's political campaigns, as well as;

3.) The core beneficiaries of the Barack Obama Administration, as well as;

4.) The men who ordered and operated "hit-jobs" against anyone who competed with them, as well as;

5.) The bosses, or top shareholders, of the core staff that Obama hired to staff his Administration and the U.S. Department of Energy, as well as;

6.) The "Dark Money" operators during the Obama Administration, as well as;

7.) The past and future "revolving-door' employers of Obama's staff, as well as;

8.) The people that the Obama White House and Department of Energy actually report to, as well as all of the other things, above.

This is not conjecture. It is fact provable in court and known widely by FBI, GAO, Treasury and SEC investigators. Government investigators are blockaded from acting on this information by their bosses who are compensated by these men via Dark Money conduits.

Two of the above items might be a "coincidence". Eight such inter-connections are a "crime"!

This hurts the average person because this kind of corruption breaks the trust that voters hope to have in their government.

Department of Energy officials went to great lengths to **A.)** give away taxpayer money to these men, through covert stock market and investor routes, **B.)** pump the stock valuations owned by these men to stratospheric fluff numbers and **C.)** exclusively benefit their political campaign financing "PayPal Mafia Cartel". At the same time, Department of Energy officials went to great lengths to **D.)** sabotage, stone-wall, log-jam, defraud and lie to the competitors of these men in order to protect these Silicon Valley oligarchs, per their deals with Obama's Robert Gibbs, David Plouffe, Valarie Jarrett, Jay Carney, David Axelrod, Tom Steyer, Rahm Emanual, Steve Rattner and Matt Rogers: Their "handlers" in the Obama White House.

Top Department of Energy Officials stated on video that applicants for Department of Energy funding would be reviewed on a "first-to-apply/first-served" basis. The law that created the funding even said that. None of the Silicon Valley Mafia insiders had their acts together, though, and assumed the money would just be handed to them. The Paypal Mafia insiders never bothered to submit their application paperwork on time.

When top Obama/DOE crook's Steven Chu and Lachlan Seward realized that none of the Silicon Valley Mafia insiders had their acts together and that the competitors of their friends had filed applications first, they simply ignored their own rules, changed the submission criteria and refused to process the applications of anyone who was not an Obama campaign financier. They stone-walled the campaign financiers competitors until they forced almost all of them out of business.

By applying for DOE funds as a business, you can't get funding from any VC in the NVCA, or any bank, until AFTER DOE decides about your funding. By freezing decisions, that only take ***two weeks*** to process, for many ***years***, DOE killed an entire next generation auto industry.

In one instance, exposed in a federal lawsuit, Secretary of Energy Steven Chu, an investor in some of the Silicon Valley Cartel's own companies, had his top staffer tell an applicant multiple lies. The lies were designed to sabotage the applicant, one of Elon Musk's and John Doerr's most feared competitor's. If the applicant got the federal funds then the companies owned by Elon Musk, John Doerr, Tom Steyer, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner could not possibly compete.

In this instance, for one of the U.S. Department of Energy (DOE) funding pools, Steven Chu and Lachlan Seward wanted a fee paid to the Department of Energy in order to get them to look at the application. The applicant, XP, agreed to pay the $50,000.00 fee and acquired outside investors to fund the effort. All investors engage in due diligence and these investors required that one DOE official engage in one phone call for 3minutes to answer their single question about the process. The call was arranged ***BUT*** the DOE executive did not show up. The applicant faxed, email, FEDEX'd and messaged DOE daily, for weeks, but Steven Chu's

staff ducked the calls as the deadline approached. DOE was made keenly aware that the funding depended on a single answer to a question. In one call, the DOE Secretary stated that the DOE executive was "not in the office" while he could be clearly heard in his office talking behind her. The DOE executive was standing right there and avoiding the call because he knew that the call was the last thing the applicant needed to complete the process.

The DOE executive was protecting Elon Musk, John Doerr, Vinod Khosla, Tom Steyer, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner because he got paid by them.

The applicant's investors were getting nervous because DOE was not responding. On the day of the deadline, after getting a waiver for the fee, even though the applicant had the money ready, The DOE official finally responded and said *"sorry, you missed the deadline, you can't play"*. He had log-jammed and stone-walled the applicant to try to put them out of business to protect his bosses investments.

Carol Battershell worked at DOE as an Obama funding insider at this time. She was a huge promoter of climate change metrics. What we now know is that in 2008, every solution to the climate change crisis, if there was a "climate change crisis", just happened to be owned by Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. Another amazing coincidence! Carol has quit DOE, under pressure over falsified climate change data, and now bird-watches in Ohio.

Carol Battershell was in charge of reviewing applicants for DOE yet refused to return any phone calls or emails from applicants who were competitors of Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. What another amazing coincidence!

Battershell refused to ever talk to, or communicate with, any engineers or founders of the applicants who were the competitors of Obama's financiers.

That group of insiders may ring some bells for you. Steve Spinner was the husband of Alison Spinner who was the lawyer for Solyndra and Tesla. Solyndra was raided by the FBI and Tesla is still under FBI investigation. Steve Rattner was indicted in New York for stock market fraud. Steve Jurvetson was fired for sex scandal activities yet he is still in the news for hosting sex parties for Elon Musk. John Doerr is Climate Change advocate Al Gore's business partner and the subject of Silicon Valley's biggest sex lawsuit. Vinod Khosla is in the news for taking over a California public beach and nay-saying #METOO claims. Every one of this men has a dark and dirty dossier that makes one shudder to imagine the Omerta's they must engage in.

DOE officials used the most lame-brain excuses they could come up with to avoid funding their financiers competitors. They told the electric car company that the car was "not using enough gasoline". Then they told the same applicant that electric cars were too futuristic...while funding the same electric car with Nissan, a huge Obama Dark Money financier. At one point DOE stated that they did not have enough money for the applicants. IN FACT, they had enough money to fund EVERY applicant and there are still billions of dollars sitting unused in the fund.

Bright Automotive staff distributed a notoriously harsh letter that they had sent to Energy Secretary Chu after they realized that Chu had defrauded them too. Bright competed with the interests of Elon Musk, Tom Steyer, John Doerr, Vinod Khosla, Steve Jurvetson, Larry Page, Eric Schmidt, Steve Westly and Steve Spinner. Bright staff say the DOE out-right defrauded them. DOE knew, from Day One, that only Obama political campaign financiers would get the funding. DOE used the other applicants as a smoke-screen.

The Obama Administration used the U.S. Department of Energy as a political slush fund to pay off campaign financiers. Hillary Clinton promised Silicon Valley she would do the same thing using the U.S. Department of Transportation to fund "Driverless Cars" (that nobody actually wants). That is why DNC financiers Tesla,

Apple, Google, etc. are fanatically pushing their driverless car projects. These are DARK MONEY POLITICAL SLUSH FUNDS. They are criminal programs!

The scurry of rats Ohr worried Comey firing threatened to expose their plot

By Monica Showalter

Sometimes, it's the little things that tell the most.

Witness the note from Deep State's Justice Department officials: Bruce Ohr, who wrote to a fellow anti-Trump plotter, the U.K.'s Christopher Steele, worried that President Trump's firing of now former FBI director James Comey would expose them all.

According to a Fox News report from Catherine Herridge:

> A collection of Justice Department official Bruce Ohr's emails, texts and handwritten notes, reviewed by Fox News, reveals that he was deeply connected to the unverified Steele dossier as well as its author and, during the presidential election campaign, the alleged government surveillance abuses involving a Trump campaign official.
>
> The dossier, which was used by federal officials to justify the surveillance of a top Trump aide, Carter Page, was created by Fusion GPS and paid for by Hillary Clinton's campaign and the Democratic National Committee.
>
> Ohr wrote that Christopher Steele, the ex-British spy who wrote the salacious dossier, was "very concerned (abt) about [former FBI Director James] Comey's firing â afraid they will be exposed."

Now, if they were doing everything right and everything they enacted was on the up and up, why would they cringe like that?

Why the rat-like behavior as the USS *Comey* sank, Bruce?

With this Ohr note, it seems they did reveal themselves for the coup-plotters they were, seeking to unseat President Trump through their Deep State trickery and fully cognizant that they were doing something shady, sneaky, and underhanded. If they were doing something they could tell their grandchildren about, we'd be hard pressed to find these bureaucratic shivers of fear.

It's as close as anything to an admission of guilt.

If you strike at the king, you'd better kill the king. Obviously, guys like Ohr have been in the Deep State Washington power game a long time, and that must be lesson one.

For the rest of us, it's just a bit humorous to see them cringe and scurry at the reality that these high and haughty bureaucrats are finally being exposed for those doings they never wanted us to know.

HELP DESTROY THEÂ 'DARK MONEY'Â CRONY POLITICAL CORRUPTION THAT YOUR POLITICIANS AND OLIGARCHS ENGAGE IN WITH BRIBES, STOCK MARKET INSIDER TRADING, PAYOLA, MEDIA MONOPOLIZATION, COMPUTERIZED NEWS MANIPULATION CENSORSHIP, INSIDER RIGGED GOVERNMENT CONTRACTS AND THE SABOTAGE OF SMALL COMPETITORS.

Make it your duty to expose and bankrupt the criminal oligarchs of silicon valley big tech and their political lapdogs. Do the research online and in-person. They buy our government with bribes and quid-pro-quo. They censor and manipulate our media, news and elections. They run monopolies and sex trafficking clubs and it all hurts YOU in the end!

Here is evidence and facts that expose the insider scum bags that run theÂ 'DARK MONEY'Â political scams that harm you, and your family, every day.

This is an open-source public investigation. The proof of the crime assertions can be found in the associated folders at:

http://corruption-eu.com

http://end-this-corruption.com

http://www.san-francisco-crimes.com

and hundreds of thousands of online copies of these folders...

This is a testament against theÂ corruption by the tech oligarchs, crooked lobbyists, crony white house and dirty senators that use our democracy for organized crime!

Here is proof, from over 10,000 investigative journalists and law enforcement specialists that proves the corruption assertions.

DEMAND that Congress engage in the investigation, documentation, litigation, arrest, exposure and collusion-interdiction of corrupt public officials, their families, associates and their oligarch business cartel beneficiary/financiers.

Your public officials are profiting from,Â and preventing the interdiction of, the bribes, cronyism, stock market insider trading payola, contract quid-pro-quo and revolving door jobs scams that are destroying Democracy. Big Tech billionaires control your government;Â not you.Â It is time to fix that by suing them, firing them, exposing them in the media and news documentaries , bankrupting their stock holdings, voting them out of office and ACTUALLY enforcing the bribery laws!!!

MEET THE DIRTIEST OF THESE SOCIOPATHS INCLUDING: Elon Musk, SPACEX, Tesla, Google, ALPHABET, Facebook, Larry Page, Eric Schmidt, Steve Jurvetson, Stanford University, Jeffrey Epstein, Mark Zuckerberg, David Drummond, and more...

Fyi: internet safety and personal security reports - see these reports compiled by congressional and internet security experts. A phone or web device gets hacked every two seconds. Your phone and 'smart devices' have thousands of ways to let hackers in. Follow the FBI and ***Krebs on Security*** tips to keep yourself, and your family, safe!

See:Â https://www.science.org/content/article/internet-search-engines-may-be-influencing-elections

Regarding Facebook, the issues, that the public and the news media have complained about include:Â producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.

"...Regarding Facebook-MetaÂ known as:"FM": Their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. Their bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. See Shoshana Zuboff's, The Age of Surveillance Capitalism:Â https://www.contagious.com/news-&-views/shoshana-zuboff-on-the-age-of-surveillance-capitalism. FM is part of a criminal RICO Big Tech Cartel. FM is an illicit monopoly that violates anti-trust laws. FM attacks smaller competitors who cannot defend themselves. FM uses public officials to blockade competitors. FM uses Stazi-like mind & ideology manipulation tricks to get you to agree with Mark Zuckerbergs ideologies. FM steals patents & technology from others & refuses to pay for it. Sandberg pretends to be the goddess of womenâ s rights yet she is screwing the CEO of Activision, the biggest female sexual abusing company in America. FMâ s stock is owned by almost all of the California politicians & their families. FMâ s runs tens of millions of dollars of defamation attacks against competitors.

FM hides all negative news coverage of Larry Page & Elon Musk. FM receives millions of dollars of payments from government spy agencies. FM promotes illegal immigration. FM runs VC funding back-lists against start-ups that are competitive. FM bribes politicians. FM is a criminal RICO-violating monopoly. FM pays bribes to politicians in FM stock. FM has a â no poachingâ Silicon Valley jobs blacklist. FM bosses sexually abuse women & young boys. FM bosses control the NVCA financing cartel. FM's VR is based on spying on the public with VR sensors & cameras. FM controls national elections for anti-competitive purposes. David Plouffe & the Zuckerbergâ s were recorded in meetings planning a take-over of the United States Government. FM bribes some politicians with revolving door jobs. FM runs DDoS attacks on competitors by massively crawling their sites. FM has paid covert bribes, PAC funds, real estate & search rigging payola to almost every California Senator.

FM has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC & FTC investigations of FM crimes. Nancy Pelosi & Dianne Feinstein have promised to â protectâ FM because their families profit off FM stocks. FM VCâ s & bosses have spent $30M+ rigging the U.S. Patent Office to protect FM & harm FM competitors. FM bribed itâ s lawyer into position on the board of the U.S. Patent office. FM rarely likes, or hires, black employees. FM hired most of the Washington, DC K Street lobby firms & told them to â do what ever they couldâ to control public policy for Zuckerberg. FM serves you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology & their political party. At FM â data miningâ , â machine learningâ & â AIâ means computerized propaganda processing for certain political entities.

Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, & entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. Their

assessment of what your words might mean is based on what rich, white male, $200K/year, DNC-promoting programmers think they might mean..."

SPACEX CORRUPTION -- ISSUE BULLET POINTS

Â Â Â Â Â
SpaceX is another Elon Musk ego trip vanity project. His rockets blow up. His staff sues him for sexual and racial abuse. His only income from Spacex is for launching spy satellites that spy on citizens. His 'STARLINK' media service is just a propaganda controlled privacy harvesting system. His satellites clog up the sky for astronomers, pollute the weather, screw up other communications, are war tools, fall out of the sky and are unregulated.

Musk and his SpaceX people have no idea what they are doing according to every major NASA employee. Their satellites are easily hacked and every major foreign nation has those satellites targeted to be shot down as soon as war breaks out. Musk's scam story about "colonizing Mars" is just a PR smoke-screen to hide the fact that all SpaceX does is privacy abusing spy satellites! The guy that created the largest online drug and murder-for-hire network did it at SpaceX.

Elon Musk has no idea how a rocket actually works. SpaceX Rockets have blown up more than any other rocket company and destroyed billions of dollars worth of nature, atmosphere, carbon burn and technology. One SpaceX rocket launch creates more atmospheric damage than 2000+ chimney fires.

SOME OF THE WORST THINGS ABOUT GOOGLE-ALPHABET:

- Google spies on competitors and steals their technology
- Google - Alphabet - YouTube stock is owned by almost all of the California politicians and their families and that is why Google
- Alphabet - YouTube is never regulated and always protected by them for their political and profiteering manipulations
- Google runs tens of millions of dollars of defamation attacks against competitors
- Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk
- Google lies to the public about what they really do with the public's data
- Google promotes illegal immigration in order to get cheap labor and control votes
- Google runs VC funding back-lists against start-ups that are competitive
- Google bribes thousands of politicians
- Google is a criminal RICO-violating monopoly
- Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks
- Google pays bribes to politicians in Google and YouTube stock
- Google manipulates who gets to see what web-sites, globally, for competitor black-lists
- Google has a "no poaching" Silicon Valley jobs blacklist
- Google bosses sexually abuse women and young boys
- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults
- Google bosses control the NVCA financing cartel over start-ups
- Most of the people that Google hires are homosexual leftists
- Google has placed the majority of the corporate staff in at least one White House
- Google controls national elections for anti-competitive purposes
- The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality
- Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays
- Google bribes some politicians with revolving door jobs
- Google is primarily responsible for destroying the Bay Area Housing opportunities
- Google runs DDoS attacks on competitors by massively crawling their sites
- Google boss Andy Rubin runs a sex slave farm according to his own family
- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles
- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker
- Google executives sexually abuse so many women that the women staff of Google walked out one day
- In the 2009 White House, you could n### GOOGLE --ot swing a cat without hitting a Google insider
- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator
- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes
- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine

- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA
- Google's map service was a spy system paid for by taxpayers money that Google now profits off of
- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks
- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks
- Google VC's and bosses have spent $30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors
- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google
- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days"
- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes
- Google rarely likes, or hires, black employees per federal and news media investigations
- Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could"
- The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily
- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed
- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

Eric Schmidt, Larry Page, David Drummond, Jared Cohen, Sergy Brin, Kent Walker and other top Google bosses have been recorded, and overheard, saying that they were doing these things and coordinating the ways to do these illicit deeds. There are NO accidents on the Google servers. These scumbags conspire to rig elections, the stock market, censoring, market monopolies and ideological media coverage.

"Google" operates it's staffing like a Scientology cult. TheyÂ control their employees lives, information, transportation, free time, entertainment & social life. Google & Elon Musk Co-own, co-invest & co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal & news media investigations.
https://truthstreammedia.com/2013/06/02/"G"s-regime-change-agent-jared-cohen/

There is no doubt about whether Google has the ability to control voters. In laboratory and online experiments conducted in the United States, we were able to boost the proportion of people who favored any candidate by between 37 and 63 percent after just one search session. The impact of viewing biased rankings repeatedly over a period of weeks or months would undoubtedly be larger. In our basic experiment, participants were randomly assigned to one of three groups in which search rankings favored either Candidate A, Candidate B or neither candidate. Participants were given brief descriptions of each candidate and then asked how much they liked and trusted each candidate and whom they would vote for. Then they were allowed up to 15 minutes to conduct online research on the candidates using a Google-like search engine we created called Kadoodle. Each group had access to the same 30 search resultsâ all real search results linking to real web pages from a past election. Only the ordering of the results differed in the three groups. People could click freely on any result or shift between any of five different results pages, just as one can on Googleâ s search engine.

When our participants were done searching, we asked them those questions again, and, voilÃ : On all measures, opinions shifted in the direction of the candidate who was favored in the rankings. Trust, liking and voting preferences all shifted predictably. More alarmingly, we also demonstrated this shift with real voters during an actual electoral campaignâ in an experiment conducted with more than 2,000 eligible, undecided voters throughout India during the 2014 Lok Sabha election thereâ the largest democratic election in history, with more than 800 million eligible voters and 480 million votes ultimately cast.

Even here, with real voters who were highly familiar with the candidates and who were being bombarded with

campaign rhetoric every day, we showed that search rankings could boost the proportion of people favoring any candidate by more than 20 percentâ more than 60 percent in some demographic groups. Given how powerful this effect is, itâ s possible that Google decided the winner of the Indian election.Â Googleâ s own daily data on election-related search activity (subsequently removed from the Internet, but not before my colleagues and I downloaded the pages) showed that Narendra Modi, the ultimate winner, outscored his rivals in search activity by more than 25 percent for sixty-one consecutive days before the final votes were cast. That high volume of search activity could easily have been generated by higher search rankings for Modi.

The Silicon Valley "venture capital" offices on Sand Hill Road in Palo Alto, right above the Stanford University campus, work together to decide how they will manipulate elections in a way that will give them the most profits and power. They then tell the bosses at Google, Facebook, Netflix and the other big tech companies that they finance, how to manipulate the media message (with a little help from their CIA advisors at In-Q-Tel), to make the public perceive the left wing message that they want. Google, and itâ s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes.

Googleâ s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axciom scams and other illicit things they get up to; one just has to wonder. For more about Google's corruption see:Â https://en.wikipedia.org/wiki/Criticism_of_Google

In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

- Daily Mail Report: Kamala Harrisâ s Husband Doug Emhoff â Forcefully Slapped Ex-Girlfriend For Flirting With Another Manâ In Booze-Fueled Assault
- Washington Post Flashback: DOUG EMHOFF, MODERN-DAY SEX SYMBOL
- FLASHBACK: Douglass Emhoff Speaks Out Against â Toxic Masculinityâ
- Chris Cuomo blasts mainstream media for ignoring Doug Emhoff assault claims
- TRUMPWORLD WIPES MUSK...

  'Finished, done, gone'...

They only work with their frat buddies and insiders in a tribal 'old boys club' manner.They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again.

Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime". The issues, that the public and the news media have complained about include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. For more read Emily Chang's book:Â BROTOPIA. According to the book, and public investigations, the biggest and most corrupt assholes that covertly manipulate our media and government are:

- Barack Obama â Chicago politician
- Bill Daley â White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer â Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)

-Â Daniel Cohen â DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod â White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign)(he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Hunter Biden
- David Plouffe â White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough â White House adviser
- Eric Holder â Attorney General- DOJ (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)
- Jay Carney â White House press lead (Forced to resign)
- Jeff Berman - Bryan Cave. Berman, the former delegate counter for President Obamaâ s 2008 campaign
- Jeff Peck, Peck, Madigan, Jones & Stewart. Aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee
- Jeffrey Zients
- Jerry Brown â California politician
- Joe Rhodes â White House shill
- Joe Biden - Politician who created Solyndra crony funds
- John Podestaâ White House adviser
- Jonathan Silver â DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
- Joshua Wright - FTC
- Kamala Harrisâ Stock favoritism Insider with her husband
- Katherine Feinstein
- Kathy Zoi
- Ken Alex â Scheme Adviser toJerry Brown
- Ken Duberstein and Marti Thomas, The Duberstein Group.
- Lachlan Seward â Energy Department insider gatekeeper and master of crony Department Of Energy crony payola
- Melanie Nutter â Pelosi Top Aide
- Matt Rogers â VC and quid pro quo pass-through conduit
- Megan Smith - U.S. CTO
- Mikey Dickerson
- Nancy Pelosi â California politician
- Robert Gibbs â White press office head
- Steven Chu â Secretary of Energy â The most corrupt in US history
- Todd Park â IT manipulator inside White House
- Andy Bechtolsheim â VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Bill Gurley
- Carl Gordon
- Chad Hurley - YouTube
- Cheryl Sandberg â Facebook boss, reports to Larry Summers
- Dave McClure â VC
- David Danielson
- David Drummond â Lawyer/Lobbyistâ Google, bribes expert for DC and EU regions (Under investigation. Quail Road, Woodside, CA home bugged)
- David Mott
- David Prend
- David Sacks
- Draper - Fisher â VC firm (Campaign funder who received massive windfalls from Russian mining & tech

start-up rigging)
- Elon Musk â CEO â Tesla (He is now under investigation & in multiple lawsuits for fraud)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Emerson Collective -has one of the largest and stealthiest election data combines
- Eric Paley
- Eric Schmidt â Owner- Google (H eis now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Gilman Louie â VC,founder on IN-Q-Tel
- Goldman Sachs â Financial packager(Suspected of staging most of the TARP/DOE deals for personal gain & insider payouts)
- Greylock Capital â Silicon Valley Insider trading operator (Under investigation)
- Ira Ehrenpreis â VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦
- James Bronkema â West Coast Money Man for David Rockefeller and Feinstein financierÂ (Dead)
- Jared Cohen â Google boss and international political manipulator
-Wilson Sonsini Partner Club
- Wilson, Sonsini, Goodrich and Rosatti
- Jim Breyer â VC and CIA intermediary
- Joe Lonsdale â VC, famous for rape and abuse scandal and domestic spying via Palantir (A domestic spying service)
- Johanna Shelton - Google Lobbyist
- John Doerr â Owner â Kleiner Perkins. â Godfatherâ â Silicon Valley Cartel (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- John Lindfors
- Josh Kopelman
- JP Gan
- Keith Rabois -VC
- Ken Howery â VC
- Kleiner Perkins â Campaign funding VC who (Received massive windfalls from Russian mining & tech start-up rigging. Sued.
- Larry Page â Google Boss
- Larry Summers â VC
- Lloyd Craig Blankfein â VC and Sachs boss
- Luke Nosek
- Marc Andreessen -VC
- Mario Rosatti â VC
- Mark Zuckerberg â Facebook Boss
- Martin LaGod -VC FirelakeCap
- Mary Meeker â VC
- Max Levchin -VC
- Mckinsey Consulting â The firm you hire to rig white papers and insider hires in government positions for the Palo Alto Mafia
- Michael Moritz -VC
- Neerag Agrawal - VC
- Peter Thiel â VC
- Pierre Omidyarâ VC
- Raj Gupta â VC, arrested
- Rakesh Saxeena â Canadian in-house arrest, arms dealer, western political packager
- Ray Lane â VC
- Reid Hoffman â VC andsex.com partner with Gary Kremen, also match.com
- Richard Blumâ VC and director/husband of Dianne Feinstein - Finally dead!
- Roelof Botha

- Sanjay Wagle â VC
- Scott Shleiffer
- Sergy Brin â Google boss
- Steve Chen
- Steve Jurvetson â VC embroiled in sex abuse charges
- Steve Rattner â WhiteHouse car czar, indicted for fraud
- Steve Spinner â Energy Department manipulation expert, Wife was Solyndraâ s lawyer
- Steve Westly â VC
- Ted Schlein - IN-Q-Tel
- Tim Draper â VC
- Tom Perkins â Dead KPCB Palo Alto Mafia founder
- Tom Steyer â VC
- Tomorrow Ventures â Social manipulation group
- Tony Podesta, Podesta Group. The prolific Democratic fundraiser has seen his firm rocket to the echelons of the top five lobby shops.
- Viktor Vekselberg â Russian business entity
- Vinod Khosla â VC that locked off Martinâ s Beach
- Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck. Mottur heads up lobbying operations at the K Street giant.
- Allison Spinner â Wife of Steve Spinner and lawyer at WSGR and Solyndra who helped Feinstein rig the Solyndra cash
- Andrew McCormack
- Andy Barbour, Smith-Free Group
- Ashley Vance - Elon Musk suck-up and Musk hypemonger
- Austin Lau
- Brian Goncher â Deloitte VC intermediary in the stock market rigging
- Brobeck Law Firm
- Carr &Ferrell - Sony and Facebook's law firm that helps to blockade inventors
- Chris Jennings, Jennings Policy Strategies
- Chuck Brain, Capitol Hill Strategies Inc. Once a Clinton White House aide and longtime House Ways and Means Committee staffer
- Civis Analytics â Social manipulation group
- Covington & Burling, crooked Big Tech lawyers
- David Sandalow
- Eyal Ebelâ Defamation-for-sale blogger
- Fusion GPS â Defamation andjournalist bribery service
- Gabrielle Darbyshireâ Defamation-for-sale blogger and attack services director
- Gawker Media â DNC/Clinton/Obama character assassination media tool (In Mid-Termination)
- Gerald Cassidy and Gregg Hartley, Cassidy& Associates
- Gizmodo â DNC/Clinton/Obama character assassination media tool (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Heather Podesta,Heather Podesta + Partners. The former congressional aide has built a solid lobbying practice and helps fund raise for Democrats with her husband, Tony Podesta
- Ian Fetteâ Defamation-for-sale bloggerand Google, Gawker, Jalopnik, Gizmodo media assassin
- Jalopnikâ Online defamation facade political publication. Pretends to be about cars but is DNC hit job rag
- James Brown Jr â HHS Programming lead in California (Arrested for corruption)
- John Cookâ Defamation-for-sale blogger and director of media assassins group
- John Herrmanâ Defamation-for-sale blogger
- Mark Kadesh, Kadesh & Associates. Kadesh, once chief of staff to Sen. Dianne Feinstein (D-Calif.), has an A-list of California clients
- Morrison and Foerster, crooked law firm
- Nicholas Guido Dentonâ Defamation-for-sale blogger and head of the Gawker, Gizmodo, Jalopnik sleaze

tabloid empire
- Patrick Georgeâ Defamation-for-sale blogger and Character Assassination expert
- Sam Faulkner Biddleâ Defamation-for-sale blogger,Runs a large part of the Anti-GOP blog programs
- Shannon Marie Donnellyâ Defamation-for-sale blogger
- Steve Elmendorf and Jimmy Ryan, Elmendorf | Ryan.
- Steve McBee, McBeeStrategic. A former aide to Rep. Norm Dicks (D-Wash.), McBee has seen his lobby firm take off.
- Steve Perry and Andy Wright, Dutko Grayling. Perry and Wright man the roster for one of the top 20 lobby shops in Washington.
- The Groundworkâ Social manipulation group
- and their peers...

A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in Silicon Valley because Silicon Valley controls the media and the politicians that are usually supposed to check these kinds of things. Millions of pages of news reports, documentaries, interviews and legal transcripts prove the following to be true:

The Big Tech Elitist Cult.Â Silicon Valley elitists believe they are better than everyone else. Silicon Valleyâ s Kleiner Perkins founder: VC Tom Perkins, said that poor people must be â Naziâ sâ for not accepting the â superior intellectâ of VCâ s. Silicon Valleyâ s Kleiner Perkins VC Vinod Khosla, took over Californiaâ s favorite public beach, bribed the White House for â green cashâ and got sued for arrogance by a horde of public interest lawsuits. Silicon Valleyâ s Kleiner Perkins founder Ray Lane was indicted for tax evasion. Silicon Valleyâ s Kleiner Perkins boss John Doerr was sued for sexual office abuse and running a â frat houseâ . Most of the VCâ s and tech CEOâ s in Silicon Valley are charged with ethics breaches.

The Big Tech Prostitutes.Â Silicon Valley males hire more hookers and â rent-boysâ and fly more sex workers into the Bay Area than any other city in America. Googleâ s and Tesla Investments executives were killed in sexÂ and drug romps with hookers. Googleâ s Eric Schmidt ran a huge â sex penthouseâ and promotes infidelity and â anti-marriageâ .Googleâ s search engine rigging boss died at the hands of one of his hookers. The Silicon Valley VCâ s had the Rosewood Hotel built at the end of Sand Hill Road as a place to take interns and hookers to for sex. Underage sex efforts operated by these VCâ s and Tech CEOâ shave created the â Pizzagateâ phenomenon.

The Big Tech Rapists and Sexual Coercion of Employees.Â Young interns are â sent up the hillâ by Stanford to the VCâ s Sand Hill Road offices to become sexual playthings for the VCâ s at the Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual â rape cultureâ that they promoted. Thousands of women have written books and articles about the sexual intimidation they are subjected to by Silicon Valley VCâ s and their tech CEOâ s. VCâ s Joe Lonsdale, Micheal Goguen and hundreds of others have been charged with rape and sex trafficking.Stanford University gets â endowmentsâ and â giftsâ for hushing rape culture and intern-fluffing up.

The Assholes Of Big Tech. FraternityÂ House Take-What-You-WantÂ culture is promoted in the bars, clubs, meetings, conferences and emails of the VCâ s and CEOâ s. The TV Show:Â Silicon Valley, underscores the point of the dangers of infectious asshole-ism in Silicon Valley.

Big Tech Guys Are All Frat Boy Clones of Each Other .Â They assemble those around them that have the same stereotypical facial structure. In a room full of ordinary people and Tech VCâ s, the VCâ s faces stand out as Hollywood-type character-cartoon duplicates of each other.

The Sexual Deviance and Extremism In Silicon Valley.Â Googleâ s founders have all had extreme sex scandals involving cheating, 3-way sex, divorces over abuse,forced anal sex and other outrages. Their teachers

at Stanford have had to quite over their sex scandals. Their willingness and infatuation with sexual extremes defines them as moral degenerates who care little about laws and ethics.

Most Guys In Silicon Valley Have Dysfunctional Parents.Â The majority of the VCâ s and Tech CEOâ s come from rich dynastic families who are cultism-like devoted to â the family bloodlineâ and run by male oligarchs who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their sonâ s Frat Houses for date rapes.

Everyone In Silicon Valley Is Tone Deaf.Â Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble by never interacting with, or reading information or news from, anyone outside of their group. VC Tim Draper spent vast amounts of money trying to make Silicon Valley itâ s own country in order to systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they are offended by normal people who they consider to be low-class and unworthy.

Big Tech Murders.Â Rajeev Motwani taught the Google founders how to build Google and was found, mysteriously,floating, dead, in his Silicon Valley swimming pool. Silicon Valleyâ s Gary D. Conley reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then suddenly died in a "Boston Brakes" plane crash next to Teslaâ s factory in San Carlos. There are over 100 mysterious deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon Valley oligarchs.

Big Tech Arrogance. Self-Centered Narcissists. Elon Musk has spent over a billion dollars buying exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-million dollar PR agent assigned to make them look like â Gods of Industryâ . They regularly hold â Babes and Ballâ sâ parties and sex parties in Woodside that require women to beg for their money. They were trained to be â assholesâ and â abusive dominantsâ via the Stanford Rape/FratCulture.

Big Tech Guys Are All Misogynists.Â All White-Male-Controlled with frat house pasts. Women are used As Sex Objects andÂ Window Dressing.Â The largest number of anti-women news stories, jock/bro blog reports and charges for abuse come from Silicon Valley. VC Steve Westlyâ s CEO friend is notorious for kicking his girlfriend hundreds of times because she â sassedâ him. Almost of of their Divorce filings include abuse charges against the man.

Big Tech Guys Manipulate Employees.Â Silicon Valley cartel companies practice Scientology-like indoctrination and â cultural programmingâ of employees. These highly impressionable naive young employees are kept in â controlled environmentsâ , sent to â mindfulness programming workshopsâ and told what kind of political opinions they should have. Tight-knit groups of females experienceÂ synchronized menstrual periodsÂ over time, cohesive Google and Facebook employee groups engaged in decision-makingÂ discount dissenting viewpointsÂ in the interests of consensus, and that couples who stay together long enoughÂ begin to look alike. AÂ new studyÂ has captured another group phenomenon in Silicon Valley and chronicled in humansâ natural habitat: â group brain synchronyâ . This is a CIA-like brainwashing technique exploited to get all Google/Facebook/Twitter employees to rapidly adopt the same political views.

Big Tech Are All Racists.Â Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in America even though they have a high population of blacks at the edge of their community.

Big Tech Guys All Have Male Insecurity Issues.Â They useÂ TED-Talks, SXSWÂ andÂ Syncronicity EventsÂ as self-promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of arrogance and mock any male who does not own what they own or who who did not go to Stanford or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than family.

Silicon Valley VC's Engage In Blacklisting.Â In theÂ AngelGate InvestigationÂ andÂ Silicon Valley No Poaching Class Action Lawsuit, Silicon Valley was exposed as an insider club that black-lists those who look different or are not part of the boys club.

Big Tech Guys Are Politically Corrupt.Â Silicon Valley has bribed more politicians than any other domestic region in history.They promote more immigration in order to get cheap labor for their tech companies. They steal their technology and bribe politicians to eliminate patent protections for small inventors that they steal from. Political Corruption and Bribery IsÂ The NormÂ for these boys. Silicon Valley created a CIA knock-off called â In-Q-Telâ in order to use CIA technology to manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: â The Cleantech Crashâ is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund. They refuse to allow their MSM to report on their corruption and crony kickbacks, ie: Tesla Motors Funding, Off-shore tax evasion, Hooker networks, etc.

Big Tech VC's Engage In Industry Collusion.Â In theÂ Angel Gate Investigation, theÂ Silicon Valley No Poaching Class Action Lawsuit, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes to rig valuations, stock markets and employee poaching. They operate in herds within their peer group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing moles and saboteurs inside competitors start-ups. They operate in herds within their pee rgroup. They are not inclined to independent thinking.

Big Tech Law Firms Are All Stock Market Criminals.Â Stock Market Pump-and-Dump, Flash Boy Algorithm Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and FTC monopoly law violations are vast in number.

Big Tech Are All Burning Man Sex-and-Drugs Devotees.Â Silicon Valley frat boys have a huge participation in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery animal-tranquilizer drugs to use on young Burning Man girls.

Big Tech Has Minimal Regard For Consequences.Â Although their PR agents promote them as â greenâ and â socially positiveâ , it is all hype to get tax waivers and government hand-outs. Mark Zuckerbergâ s take-over of San Francisco General Hospitalâ s brand was entirely a scam to get him a $1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off the collateral damage later.

Most Of The Bg Tech VCs and CEO's Are Closeted Homosexuals.Â Using the tremendous funds they have at hand from their exclusive monopolies in public media, they push their trans-gender agendas through their bought-and-paid for politicians. This has resulted in a generation of sexually confused children who believe that they should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other companies are lying to the public about their sexuality and using hired wives, known as â beardsâ . If they lie about something so basic, one has to wonder what else they lie about.

Big Tech Guys Are Natural Thieves With No Moral Compass.Â They steal most of their technology from small inventors who canâ t defend themselves. They get inventions from Indian engineers and then ship them back to India before the employees can get any stock or IP rights. The tech CEOâ s send their VC friends to competing start-ups to spy on competing technologies and steal it.The VCâ s say they are just doing â due diligenceâ but they are actually sucking the competing start-up dry of IP and staff and making a clone of it under another name.

There are so many other awful things about the people of Silicon Valley. You get the picture. Silicon Valley is a swamp and a cesspool and they deserve bankruptcy, shame and forced transparency for the exposure of ALL of their corruption.

The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you can easily see how they only get a salary of $190K per year but put hundreds of millions of dollars in their accounts that all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day. These Senators have "rules" that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to

skim stock market pump-and-dump profits off of and grab personal payola.

[Coalition Of 19 AGs Launch Investigation Into ActBlue Over Money Laundering Allegations]

In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPAâ s shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Teslaâ s, etc.

The 2008 and 202i "stimulus funds" are quid pro quo scams to pay off politicalÂ insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts!these mobsters (Google, Tesla, Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors.

He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him.

Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than $100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over $15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes.

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take

Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities! Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu;Â excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen;

poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age -

LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE AND THEIR CHEMISTRY DEGRADES!!

"Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about.

The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires.

Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury.

DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit

from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies.

That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins". It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. Fuel Cell cars do not have any of these problems! See more at:Â https://lithium-ion.weebly.com/

Google, Netflix, YouTube, Facebook, META, etc. exist to mass manipulate populations and run stock market scams for their sociopath owners. Essentially, Google, Netflix, YouTube, Facebook, META, etc. get so much money and so many orders from the CIA/NSA that they ARE the CIA/NSA!!! From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend': Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading.

That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception.Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking...

Tesla recalls more than 27,000 EVs due to faulty cameras that increase crash risks

Tesla announced a massive recall of more than 27,000 EVs due to issues with the rear-view camera. The company said the fault increase risks of crashing.

This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. Google is a criminal operation. It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies

on competitors and steals their technology - Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk -

Google lies to the public about what they really do with the public's data - Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes -

The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities - Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day -

In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks -

Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent $30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations -

Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds - Google, and itâ s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Googleâ s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination

services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets.The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources! We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?)

What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects. Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded. Now the damages must be paid for, one way, or another. Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess.

Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House.

We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds. Tesla is known as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk's racism and sociopath behaviors.

He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. Space-X is just a domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-reading chips. Tesla cars have been found to have a vast number of electronic and mechanical defects that cause crashes, fires, explosions, toxic exposures and DEATH! Elon Musk is THE CRONY CAPITALIST GOVERNMENT MOOCH KING taxpayer funds leech of the world. See more at:Â https://en.wikipedia.org/wiki/Criticism_of_Tesla,_Inc.

The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture'

take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking;

They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws. Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history.

Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing. These are massive crimes! The perpetrators operate a massive and abusive national sex cult.

The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit,

The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals,The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control.

The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over $30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric

Schmidt is under massive investigation.

You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved this these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. -

90% of these guys came from the same date-rape fraternity houses involved in the recent college rape cases.

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How A Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton.

They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. -

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? - In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent. -

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC)Â and hundreds of othersâ ¦

These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. - These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash.

Any company who is corrupt enough to hire any of these assassins should be forced out of business. These

attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! - These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press.

But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. - This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press. -

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â - Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it.

Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls â SPYGATEâ . - It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court.

(â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â) - In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies?

Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: - Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic

disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.-Â Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased.

The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques.

A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end.

Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups. - Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony.

If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony.

The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. - Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main

financiers and policy directors of the Obama Administration.

This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions. - Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.-

Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers.

All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. -

Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon.

It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head".- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.-

Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history.

Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds. - Honeytraps and moles were employed by the attackers. In this tactic, people who covertly

worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

WHEN SILICON VALLEY ATTACKS CITIZENS AND JOURNALISTS -- ISSUE BULLET POINTS

Gawker Media, Gizmodo Media, Snopes, SPLC, FACEBOOK, GOOGLE and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.-

Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years.

There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. - Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benBROTOPIA.efits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal. -

There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. - Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers.

The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook,

Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

SEE HOW YOUTUBE, NETFLIX, FACEBOOK, GOOGLE, AMAZON AND THE SAND HILL ROAD VCâ S STEAL YOUR STUFF UNDER THE GUISE OF â TAKING A LOOK UNDER THE HOODâ Â Â -Â Â

See:Â http://www.usinventor.org

See:https://www.dailymail.co.uk/sciencetech/article-11760517/Victims-modern-internet-pioneers-like-MySpace-AIM-

Investigation report clips: "...Big Tech's U.S. Patent Office manipulation computers scale & expand their tools with algorithmic software created by those politically & socially biased frat boys that wrote the code for the VC's. It is all biased. Because Silicon Valley VCâ s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a userâ s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users & populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested & fed upon by Silicon Valley. You donâ t hear about this, much, in the â main-stream newsâ because nearly half of Congress, White House staff & government agency bosses own the stock in the news broadcasters & receive billions of dollars of financing from them.

Field agents from FBI, FINCEN, etc. have proven all of this but their bosses cover it up. Draper Fisher, Kleiner, Andressen, Sony Ventures, et al.. need to go to prison for running a mob-like, RICO-violating, intellectual property theft mill. They contact start-ups, ask them to come in & pitch, reject them, then send their business plans to Google, Netflix, Sony & Facebook (WHO THEY FINANCE) & tell them: â â ¦HERE COPY THIS, JUST CHANGE THE NAMES OF THINGS..â Tom Perkins, James Bronkema & many other of their members ratted them out in recorded statements! â â ¦We discovered that the patent lawyers that were supposed to be helping usâ ¦ That we paid to provide our income; were covertly our competitors & were working as shills, for our enemies. Our patent lawyers were; either, financed by, friends, with, sleeping with,

dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators & politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated & profited in these schemes.

Their own family members & ex-staff have now supplied evidence against them. After receiving tips from USINVENTOR.ORG, Wall Street Journal, TECH CRUNCH & Congress; Plaintiff hired ex FBI & CIA agents to check it out... BOY, was it ever rigged. Facebook's own staff & investors work INSIDE the U.S. Patent Office in order to protect Facebook from having to pay for technology they stole. Then they showed Plaintiff that most of the Obama & Biden Administration COVERTLY OWN FACEBOOK. Talk about 'rigging elections' & 'rigging industries'â ¦ Facebook executives even sit on USPTO boards!!! -

--- What U.S. judge or regulator is complaining? For example, (as one example of MANY THOUS&S) who would complain about S&s Capitalâ s failure to file the S.E.C. Form SC 13G notices of acquisition of Facebook, Baidu & Athena health stock?

---- Not S.E.C Chairman Mary L. Schapiroâ she held a boatload of â dark poolâ Fidelity, Vanguard, AllianceBern, TIAA-CREF & T. Rowe Price funds.

---- Not Commerce Secretary #1 Rebecca M. Blankâ she held TIAA-CREF, Vanguard & Fidelity funds.

---- Not Commerce Secretary #2 Penny S. Pritzkerâ she holds up to $23.4 million Morgan Stanley, JPMorgan & Goldman Sachs Facebook dark pools.

---- Not Attorney General Eric H. Holderâ he held T. Rowe Price & Fidelity funds. In fact, Holder held Fidelity Contrafund, the largest single Facebook mutual fund stock holder, valued at $413 million.

---- Who in the judiciary would complain?

---- Not Leader v. FacebookÂ Chief Justice John G. Roberts, Jr.â he heldÂ Microsoft, T. Rowe Price, Fidelity, Janus, Vanguard & Blackrockfunds, including Fidelity Contrafund.

---- Not Leader v. FacebookÂ Federal Circuit Judges Alan D. Lourie, KimberlyA. Moore & Evan J. Wallachâ they held Fidelity, Vanguard & T. Rowe Price funds, including Fidelity Contrafund.

----- Not Leader v. FacebookÂ District Court Judge Leonard P. Starkâ he held Vanguard & Fidelity funds.

---- Not Leader v. FacebookÂ Patent Office Director David J. Kapposâ he held over a million dollars of Vanguard funds.

###Â SONY PICTURES CORRUPTION AND MEDIA MANIPULATION -- ISSUE BULLET POINTS

See:Â https://deadline.com/2015/09/zero-dark-thirty-movie-cia-involvemen-1201519756/

The hacks and leaks at Sony Pictures Entertainment have exposed the dark side of Hollywood. The new information reveals an insider vision of a company racked with sexism, office politics, high-school-level personality quibbles and a severe mine-is-bigger-than-yours territoriality culture.

A number of lawsuits against Sony, from Lady GaGa to Sonyâ s own employees, have revealed even more.

An aspect of the revelations involves where Sony gets itâ s ideas from. A number of revelations reveal that Sony seems to have established a process of â borrowingâ technology and story ideas while â forgettingâ to properly attribute or pay the sources.

Some of the 'dirt' exposed included:

- Sony finances Democrat Presidents in exchange for media 'favored nations' status over competitors.

- Sony and Google coordinate political manipulation campaigns together.

- Sony executives trade female entry-level staff like cattle at a 'ranch'.

- Sony executives hire an insane amount of hookers, rent-boys and under-age sex providers.

- Sony executives bribe their kids into colleges.

- The good-old-white-jewish-boy club is alive and well at Sony.

- ZERO DARK THIRTY was a political PR hype movie commissioned by the Obama Camapign using government resources

- Sony steals patents from anybody it wants

- Sony stole it's VR technology

- Sony stole its web video technology

- Sex deviancy is the rule at Sony

- Sony is a bunch of high-school whine babies who think their shit doesn't stink

- Sony spends millions and millions of dollars on political bribes

The kids at Sony seem to have been very naughty children. They let their IT system go to pot, and got hacked, and outed, as â racistâ , â misogynistâ , â campaign riggingâ , â high school tantrum throwingâ kind of people, per their own emails. Hollywood Reporter, The Verge, Wikileaks, and a variety of tabloids and pundits, have delighted in dissecting the fraternity house, inside antics, of Sony Pictures. Their boss got fired. They got ridiculed for turning "Zero Dark Thirty" into a, slightly fabricated, political vote-churn tool. Other execs got kicked to the curb. All of their financial, contracting, political cash layout, and tax dynamics were placed under investigation, and even more sketchy bits are shaking loose.These are the main influencers of a national political party & they are all involved in horrific sex perversions & abuses!

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google & clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. 90% of these guys came from the same date-rape fraternity houses involved in the recent college rape casesâ ¦"

BATTERIES VS FUEL CELLS - ISSUE BULLET POINTS

See:Â https://h2fcp.org/

See:Â https://en.wikipedia.org/wiki/California_Fuel_Cell_Partnership

See:Â https://www.fchea.org/

See:Â https://www.h2bulletin.com/knowledge/hydrogen-associations/

Investigation report clips: "...Elon Musk, Panasonic, John Doerr, Tim Draper and others spend a billion dollars per year to create disinfo about hydrogen.There are not enough minerals on Earth to power all the electric cars with batteries. Only fuel cells, which get their fuel from ocean water or organic waste, can solve the problem. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up. The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom.

Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. Hydrogen can be produced from diverse domestic resources with the potential for near-zero greenhouse gas emissions. Once produced, hydrogen generates electrical power in a fuel cell, emitting only water vapor and warm air. It holds promise for growth in both the stationary and transportation energy sectors. When used to power highly efficient fuel cell electric vehicles, hydrogen holds the promise of helping strengthen national energy security, conserve fuel, and diversify our transportation energy options for a more resilient system.About half of the U.S. population lives in areas where air pollution levels are high enough to negatively impact public health and the environment. Emissions from gasoline and diesel vehiclesâ such as nitrogen oxides, hydrocarbons, and particulate matterâ are a major source of this pollution. Hydrogen-powered fuel cell electric vehicles emit none of these harmful substancesâ only water (H2O) and warm air. The environmental and health benefits are also seen at the source of hydrogen production if derived from low- or zero-emission sources, such as solar, wind, and nuclear energy and fossil fuels with advanced emission controls and carbon sequestration.

Because the transportation sector accounts for about one-third of U.S. carbon dioxide emissions, using these sources to produce hydrogen for transportation can cut greenhouse gas emissions.

1. Renewable and Readily Available: Hydrogen is the most abundant element in the Universe and despite the challenges associated with its extraction from water, is a uniquely abundant and renewable source of energy,perfect for our future zero-carbon needs for combined heat and power supplies.

2. Hydrogen is a Clean and Flexible Energy Source to support Zero-Carbon Energy Strategies: Hydrogen fuel cells provide an inherently clean source of energy, with no adverse environmental impact during operation as the byproducts are simply heat and water. Unlike biofuel or hydropower, hydrogen doesnâ t require large areas of land to produce. In fact, NASA have even been working on using hydrogen as a resource with the water produced as a byproduct being used as drinking water for astronauts. This shows that hydrogen fuel cells are a non-toxic fuel source and therefore superior in this way to coal, natural gas and nuclear power which are all either potentially dangerous or hard to obtain. Production, storage and use of hydrogen will play an important role in driving further development of renewable energy, by balancing their intermittent supply modalities with the challenging end-user demands, avoiding the need for significant early investment to upgrade grid infrastructure.

3. More Powerful and Energy Efficient than Fossil Fuels: Hydrogen fuel cell technology provides a high-density source of energy with good energy efficiency. Hydrogen has the highest energy content of any

common fuel by weight. High pressure gaseous and liquid hydrogen have around three times the gravimetric energy density (around 120MJ/kg) of diesel and LNG and a similar volumetric energy density to natural gas

.4. Highly Efficient when Compared to Other Energy Sources: Hydrogen fuel cells are more efficient than many other energy sources, including many green energy solutions. This fuel efficiency allows for the production of more energy per pound of fuel. For example, a conventional combustion based power plant generates electricity at 33-35% efficiency compared to up to 65% for hydrogen fuel cells. The same goes for vehicles, where hydrogen fuel cells use 40-60% of the fuelâ s energy while also offering a 50% reduction in fuel consumption.

5. Almost Zero Emissions: Hydrogen fuel cells do not generate greenhouse gas emissions as for fossil fuel sources, thus reducing pollution and improving air quality as a result.

6. Reduces Carbon Footprints: With almost no emissions, hydrogen fuel cells do not release greenhouse gases, which means they do not have a carbon footprint while in use.

7. Fast Charging Times: The charge time for hydrogen fuel cell power units is extremely rapid, similar to that for conventional internal combustion engine (ICE) vehicles and markedly quicker in comparison tobattery-powered electric vehicles. Where electric vehicles require between 30 minutes and several hours to charge, hydrogen fuel cells can be recharged in under five minutes. This fast charging time means that hydrogen powered vehicles provide the same flexibility as conventional cars.

8. No Noise Pollution: Hydrogen fuel cells do not produce noise pollution like other sources of renewable energy, such as wind power. This also means that, much like electric cars, hydrogen powered vehicles are much quieter than those that use conventional internal combustion engines.

9. No Visual Pollution: Some low-carbon energy sources, including wind energy and biofuel power plants can be an eyesore, however, hydrogen fuel cells do not have the same space requirements, meaning that there is less visual pollution too.

10. Long Usage Times: Hydrogen fuel cells offer greater efficiencies with regard to usage times. A hydrogen vehicle has the same range as those that use fossil fuels (around 300 miles). This is superior to that currently offered by electric vehicles (EVs), which are increasingly being developed with fuel cell power units as â range-extendersâ . Hydrogen fuel cells are also not significantly impacted by the outside temperature and do not deteriorate in cold weather, unlike EVs. This advantage is increased further when coupled with the short charging times.

11. Ideal for Use in Remote Areas: Where local conditions allow, theÂ availability of hydrogen through local generation and storage could prove to be an alternative to diesel-based power and heating in remote areas. Not only will this reduce the need to transport fuels but will also improve the lives of those living in distant regions by offering a non-polluting fuel obtain from a readily-available natural resource.

Â 12. Versatility of Use: As the technology advances, hydrogen fuel cells will be able to provide energy for a range stationary and mobile applications. Hydrogen powered vehicles are just one example, but it could also be used in smaller applications such as domestic products as well as larger scale heating systems. Similar to ICE powerplants, the functions of energy storage capacity (ie. the fuel tank) and engine size are decoupled, in contrast to battery-based power (ie. for which power scales linearly with mass), thus providing great flexibility in design. 13. Democratisation of Power Supply: Hydrogen fuel cells have the potential to reduce the dependency of a nation on fossil fuels, which will help democratise energy and power supplies around the world. This increased independence will prove a benefit for many countries who are currently reliant on fossil fuel supply. Of course, this will also avoid the problem of rising fossil fuel prices as stocks reduce.

HOUSING IS STALLED BECAUSE OF SPECIAL INTEREST BRIBES AND MONOPOLIES -- ISSUE BULLET POINTS

SILICON VALLEYâ S TRILLION DOLLAR CULTURE OF BRIBERY; CENSORSHIP; SEX TRAFFICKING; ELECTION MANIPULATION; PAYOLA TO CITY, STATE, COUNTY AND FEDERAL OFFICIALS; LUDICROUS EXCESS AND REVOLVING DOOR PAY-OFFS TO GOVERNMENT INSIDERS HAS DESTROYED HOUSING OPPORTUNITIES FOR THE POOR AND MIDDLE CLASS BY NEGATING HUMAN RIGHTS OVER OLIGARCH LUXURIES!

The Silicon Valley solution to â The Housing Crisisâ is all talk, window dressing, dog-and-pony, un-responded to white papers and absolutely no meaningful action.

REAL ESTATE DEVELOPERS, OLIGARCHS AND REAL ESTATE BANKS PAY BRIBES TO COUNTY OFFICIALS TO KEEP AFFORDABLE HOUSING FROM GETTING BUILT BECAUSE IT COMPETES WITH THEIR SCHEMES! The State of California and HUD housing agencies have long lists of â Certifiedâ , â Qualifiedâ , â Approvedâ , etc. loan brokers and mortgage brokers that the agencies say will help low-income citizens get single family financing. So we called everybody on one of those lists provided by the State of California.

In fact, those loan brokers and mortgage companies donâ t want to hear from you unless you are in a bid war on a $1.5 million dollar bungalow for which you already have $500K, or more, in cash in the bank. Only a small percentage of the loan brokers and mortgage brokers on those lists had EVER done a completed subsidized home loan and even less had any clue how to paper a HUD Home Ownership financed home loan. Over 20 U.S. Bank mortgage brokers even refused to respond to emails or phone calls if one used the words â Cal-FHA USDAâ because, as one unusually talkative U.S. Bank employee stated: â To us, those are code-words for â poor peopleâ , the market is, frankly, too hot for banks to bother with the poors because we donâ t make any money off themâ .

It does not matter if you have spent years trying to keep your FICO score above 700. It does not matter that you never had a bankruptcy. It does not matter that you have guaranteed income for life from your government benefits. All of those things that the media told you to do to be a â good citizenâ with a good social credit score seem to be pointless. The loan and mortgage brokers on those lists are only on those lists to get a few PR brownie points. They do not want to hear from you or deal with you unless you are making big bucks in tech. They will let you upload your information but they will do little or nothing to help you because they lose money by helping you. They only make money off of the big deals.

On top of that the big real estate developers like Pulte Homes, Berkshire Hathaway (Warren Buffet), Kauffman and Broad (K&B Homes), etc. are bribing the Governor and the heads of all of the agencies to keep you from building a home or getting a home that is not in one of their giant developments. Most low-income people are the laborers who build the homes in those big real estate developments.

Those people know how to build their own homes but State and Federal agency heads are bribed to make sure you NEVER can build your own home. Those people know they can build an incredible home, on their own, for under $100,000.00. You an see thousands of videos on the internet showing people that do it every day in any state but California. Try to build a home in California. You will find you are blockaded at every turn EXCLUSIVELY by rules that you have to follow but that big developers do not!

Try to buy a modular or factory build home in California ...Same thing. The political bosses in California have

taken so many bribes from big special interests that they canâ t stop sucking on the graft hose. See more atÂ https://ternercenter.berkeley.edu/

THE U.S. DEPARTMENT OF ENERGY IS A CRONY CORRUPTION POLITICAL SLUSH FUND -- ISSUE BULLET POINTS

Trillions of dollars of stock trades and direct payola bribes are exchanged using: A.) the White House as a broker and B.) the United States Department of Energy as a stock market manipulation platform and C.) the TAXPAYERS money!

The White House had the Secretaries of Energy sabotage BRIGHT AUTOMOTIVE, ZAP AUTOMOTIVE, XP VEHICLES, BRAMMO AUTO, and many other car companies, in order to protect Obama/Biden political campaign financier Elon Musk and his Big Tech Cartel!

Thatâ s right!Your public officials use federal agencies as dark-money laundering operations for their friends.

If you are a taxpayer: You suffered damages!
If you are an American business: You suffered damages!
If you are Democracy: You were broken!
If you were a tech mobster: You made out like a bandit!
This is how it worked.

No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

The Solyndra taxpayer, technology, financial and political disasters that began during the reign of Steven Chu at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â economicâ or â healthâ emergency â stimulusâ scam.

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform. Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems.

Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of â car-as-dickâ thinking because Musk was not only molded by his purse-swinging, kept-woman, mother, abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sachs in

---- If you were a tech mobster: You made out like a bandit!to his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Techâ s Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammery.

Biden and his cheerleader actress front girl: Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

---- Thatâ s right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISKER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WIINERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â economicâ or â healthâ emergency â stimulusâ scam.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating

the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â Meta â Google â Alphabet â Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â Black Cube â Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash

See:https://www.kqed.org/forum/2010101889188/murder-corruption-coverups-the-strange-dark-history-of-stanford-un

Investigations report clips: "...Stanford University builds corporate criminals, sex traffickers, sociopaths & elitist narcissists. It trains naive children to grow up to become adult stains on society!In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape & run monopolies. Rape cover-ups by frats from rich families; Epic racism; Staff sex scandals that make the whole campus look like A Caligula party; Dynastic families control the whole campus; Arab, Iranian & Chinese oligarchs pay bribes to get their kids in;

The CIA is always recruiting everyone & the most notorious spy project: STARGATE, happened at Stanford; The Russian, Iranian & Chinese spy agencies have placed a huge number of spies on the campus as â pretend studentsâ & pretend teachers; Elitism is rampant; The Silicon Valley venture capitalists, up the hill on Sand Hill Road, get all their interns from Stanford & they date rape the hot ones with Ruffies, Scopalomine, & other amnesia drugs. The interns wake up with sore butts & canâ t remember why; To afford the fees, the girl students work as hookers at the Rosewood Hotel; The entire school is funded by bribery; 99% of the guys that went to Stanford execute 99% of the corporate corruption crimes in the world;Â Girls at Stanford, that canâ t afford tuition, become Match.com hookers.

Everyone in the bay area knows that if a Match.com profile has the words: â STUDENTâ & â GENEROUSâ anywhere in the text, that the girls are offering sex-for-tuition. Send your hot daughter to Stanford & turn them into hookers. Match.com even has sex agents, on campus, that get a commission for getting girls to join Match,com; Rape is OK at Stanford as long as your daddy is rich or owns part of the Middle East. The Stanford deans & regents say: â Boys Will Be Boysâ ; Stanford provides buses that transport the sorority girls to the frat houses to get date raped & then back to the sorority houses drunk out of their minds or doped up on Ruffies & Scopalimine; There have been a number of strange murders & suicides at Stanford; Stanford students are perscribed the highest number of mental health medications of any campus in America; The land on the Stanford Campus could solve all of Silicon Valleyâ s housing crisis; Chinese girls are sent to Stanford, by Chinese â Wife Millsâ to bag an Anglo husb& & then divorce him 1 year after he hits paydirt. They are instructed to have 2 kids so the alimony upside is high. They pay a % of the money back to China; Tech Trophy Wives were invented at Stanford;

The Guardsman, The Key Club & over 50 â Final Clubsâ brain-wash students into elitism & tribal exclusion of all but your fellow â club membersâ from your ethinc group; Most of the oligarch families paying bribes to Stanford are engaged in the most brutal human rights violations in history. They murder people & have them cut up with a hacksaw. They run prison camps. Only an idiot would think that modern day Stanford has any remaining â prestigeâ or â credibilityâ . This isnâ t the 1800â s any more. Shut this crap campus down!; When they graduate they either go up the hill to S&hill Road & start a venture capital clone operation or they get their frat friends on S&hill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies & insiders in a tribal â old boys clubâ manner; Most of the money in Stanford University bank accounts is from Foreign & Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up & covertly fund political

campaigns to grease the wheels of political corruption; They then sexually extort interns in Rosewood Hotel rooms, get the most â trophy wifeâ ones pregnant, & start the cycle all over again. Stanford is the training ground for abuse, corruption & â Bro-Crimeâ ;

The issues include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery & many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking..."

THE CORRUPTION AND PROPAGANDA USE OF NETFLIX--ISSUE BULLET POINTS

Letâ s face it, Netflix sucks. Netflix spies on you and sends your psychological profile, location and interests off to spies, political parties, marketing services, Google, The Silicon Valley mafia, the IRS, the DEA.. pretty much anybody can see what you are dong on Netflix.

If you like to get pandered to and treated like one of the data cattle on the privacy harvesting ranch then Netflix is your Pimp!

Netlix pretty much works for Obama and his political gang and pushes woke mass media manipulation and gay sex social programming at you as a result. If you are a guy, Netflix really, really, really wants you to cut your penis off and call yourself a girl!

Whats worse is that with so many studios refusing to license content to Netflix now, streaming services such as Disney plus, Peacock and many more are on the rise. Netflix sucks.Â Somehow, Netflix subscribers are left feeling like thereâ s nothing to watch on a platform that force feeds an over abundance of content from Indian and Mexican movies to it's viewers.

Every Netflix subscriber claims thereâ s nothing above â B-listâ movies being served to them on a thirteen dollar per month silver platter (and sixteen for 4k) Not to mention how unfavorable the label â Netflix originalsâ have become when slapped on a movie or show: â Netflix originalsâ is building a negative rep on par with Nickelback and Adam Sandlerâ s series of Happy Madison productions movies.

Everyone knows that Netflix is bad now and getting worse every day. Netflix makes young adults feel the same way the price of extra guac at Chipotle doesâ ¦ and that is the: â I donâ t agree with this, but please take my moneyâ , feeling. They know theyâ ve got your money because itâ s too hard to say no each month because Millennials are so stupid and sheep-like.

Did we mention the increase of the monthly price? Netflix sucks. Netflix only hires Burning Man type extreme hair-dyed hipsters who have an ANTIFA-type attitude, especially if they are from Asia and will work like dogs for McDonald's type pay and conditions. People who use Amazon Prime and then go back to Netflix can really see how much Netflix sucks. They would rather set their genitals on fire than stay with Netflix.

Netflix will make you love crippled, fat, black transgendered lesbians. You will get so many of them you won't be able to stand it.

A while back Netflix destroyed its own rating system. What we mean by that isâ ¦ they literally deleted it. Now, at the start of each movie weâ re forced to either check rotten tomatoes or risk the next 25 minutes to figure out if a show or movie is worthy of our time and attention. Netflix removed their rating system in order to hide the fact that everyone thinks their movies are absolute shit!

Netflix stole most of it's streaming media technology from small inventors that it never paid. If any inventor tries to sue Netflix, Netflix just sends millions of dollars of lawyers after them so that the inventors can never get paid. It is best just to put Netflix out of business.

Netflix spent zillions of dollars making new content but the content they made turned to be the worst shit ever created. When Obama and his buddies make media to try to program you into being "woke", it ends beng heartless propaganda. Seriously, Netflix spent more money making shittier content han anyone in history. It's as if Netflix was just funneling money back to Biden and Obama. Speaking of funneling money, the FBI's Peter D. Cair has been busting Netflix executives who steal big money through the Netflix stock market system.

Â If you use Netflix you enter a â Netflix pitâ you fell into and canâ t get out ofâ ¦Those Senators & government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators & politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

SILICON VALLEY'S CONTRIVED MASS MEDIA MANIPULATION -- -- ISSUE BULLET POINTS

See:Â http://www.pogo.org

See:Â http://www.sunlightfoundation.com

See:Â http://followthemoney.org

See:Â http://www.icij.org

See:Â https://www.transparency.org

Foreign news outlets in our country exhibit the widespread â criminalityâ and â defamation tacticsâ of a mostly corrupt news media landscape. The Gawker/Gizmodo/Jalopnik tabloid empire is nothing more than an organized info-crime operation backed up by offshore money-laundering through Russia and the Ukraine.

Despite widespread recognition of their deceptive conduct, fools still read these trash publications. There are massive conflicts of interest related to many news media outletsâ conglomerate-ownership as well and industry figuresâ financial and familial links to companies, interests, and people they ostensibly report on. 'Fake newsâ isnâ t the proper term. Itâ s the 'propaganda arm of the Silicon Valley Socialist oligarchs' In most cases. Itâ s no different than the Chinese Communist Party [and] the propaganda they put out. Itâ s no different than what the Soviet Union did with the old Pravda media, and, quite frankly, itâ s no different than how Putin controls the media today, where 95 percent of his media in Russia is propaganda for the Putin regime. Itâ s the same thing here with The Washington Post, NY Times, CNN, Hearst publications and all of the media owned by Hollywood and Silicon Valley.

Partisan news media should be treated as such. News media outlets such as the CNN, the New York Times, and the Washington Post regularly describe themselves as "politically objective and non-partisan." In reality they are a propaganda machine for sick Silicon Valley oligarchs. The information institutions are corrupt. For example, Elon Musk is one of the most corrupt men in the world yet the socialist propaganda news media won't cover any of his crimes and corruptions in their publications because he pays political bribes to keep his dark side hidden in their media. The public should not hurt legitimate news media outlets by engaging with and speaking to corrupt propaganda operations. One should only speak with genuine news media and not reward unethical companies with their time.

A common tool Google, Facebook and Twitter use to exert control over their victims. We all use manipulation at some point in our lives, whether it be telling a little white lie to get out of a situation, or using flattery to get what we want. For some people, however,Â using manipulation is a way of life, and their first weapon in an arsenal of techniques to overpower their victims.

SILICON VALLEY'S BIG TECH SEX TRAFFICKING RINGSÂ -- -- ISSUE BULLET POINTS

EXECUTIVES FROM GOOGLE, FACEBOOK, NETFLIX AND THE SANDHILL ROAD VENTURE CAPITALIST OFFICES USE SILICON VALLEY AND OTHER REGIONS AS THEIR PERSONAL HUNTING GROUNDS FOR SEX ABUSE, SEX TRAFFICKING, SEX CULTS AND DATE RAPE!

THE PUBLIC IS NOW JOINING TOGETHER TO EXPOSE THEM AND SEEK THEIR ARREST!

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage

and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

- These twisted deeds indicate the mind-set, moral depravity and disturbed culture of the, so-called, "Oligarchs" who control modern media.

- Silicon Valley Venture Capitalists Rape And Sex-Extort Interns.

- Silicon Valley's Greylock Partners, Kleiner Perkins, and most other VC's are rapists, sexual predators and political bribery enthusiasts and nobody ever arrests them for it...

- They Hire hookers and Rent-Boys, not for the sex, but to be able to "control another human" because they are almost all Sociopath personality types.

- They hire "clubs" to secure underage children for them because they want to have total manipulation over a helpless person because it makes these men feel more powerful.

- The Rosewood Hotel and the Four Seasons hotels in Palo Alto are riddled with $6000.00 per night hookers, rent boys, Stanford Co-Ed "sugar babies" and Russian Mafia managed Ukrainian prostitutes. You just have to know the "code words" and hand signals to play "the game".

- Google executives killed by their hookers, black-mailed by their hookers, exposed in sex slave rings and worse...

- Huge number of Google, Netflix and Facebook senior executives are homosexual and pressure staff for sex.

- San Jose and San Francisco International Airports have a non-stop flow of European Hookers flown in by tech CEOs who got them off of "seeking arrangements.com" and "match.com" using the "code words".

- Almost every tech executive and Sandhill Road VC has been charged with spousal abuse, sex trafficking, intern sex extortion, bribing Stanford to cover up sex exploitation and worse.

- Stanford University bosses cover-up, and support, frat house sex crimes in order to keep rich daddies donating to Alumni funds.

- Basements and secret rooms in some of their Woodside and Atherton, California mansions house BDSM chambers and sex abuse lock-rooms

-See This shocking video:Â Â https://www.invidio.us/watch?v=O13G5A5w5P0

Per KATIE BENNER: Rachel Renock, the chief executive of Wethos, center, with her business partners, Claire Humphreys, left, and Kristen Ablamsky. Ms. Renock said they received sexist comments while seeking financing. Credit Sasha Maslov for The New York Times

Their stories came out slowly, even hesitantly, at first. Then in a rush.

One female entrepreneur recounted how she had been propositioned by a Silicon Valley venture capitalist while seeking a job with him, which she did not land after rebuffing him. Another showed the increasingly suggestive messages she had received from a start-up investor. And one chief executive described how she had faced numerous sexist comments from an investor while raising money for her online community website.

What happened afterward was often just as disturbing, the women told The New York Times. Many times, the investorsâ firms and colleagues ignored or played down what had happened when the situations were brought to their attention. Saying anything, the women were warned, might lead to ostracism.

Now some of these female entrepreneurs have decided to take that risk. More than two dozen women in the technology start-up industry spoke to The Times in recent days about being sexually harassed. Ten of them named the investors involved, often providing corroborating messages and emails, and pointed to high-profile venture capitalists such as Chris Sacca of Lowercase Capital and Dave McClure of 500 Startups.

The disclosures came after the tech news site The Information reported that female entrepreneurs had been preyed upon by a venture capitalist, Justin Caldbeck of Binary Capital. The new accounts underscore how sexual harassment in the tech start-up ecosystem goes beyond one firm and is pervasive and ingrained. Now their speaking out suggests a cultural shift in Silicon Valley, where such predatory behavior had often been murmured about but rarely exposed.

The tech industry has long suffered a gender imbalance, with companies such as Google and Facebook acknowledging how few women were in their ranks. Some female engineers have started to speak out on the issue, including a former Uber engineer who detailed a pattern of sexual harassment at the company, setting off internal investigations that spurred the resignation in June of Uberâ s chief executive, Travis Kalanick.

Most recently, the revelations about Mr. Caldbeck of Binary Capital have triggered an outcry. The investor has been accused of sexually harassing entrepreneurs while he worked at three different venture firms in the past seven years, often in meetings in which the women were presenting their companies to him.

Several of Silicon Valleyâ s top venture capitalists and technologists, including Reid Hoffman, a founder of LinkedIn, condemned Mr. Caldbeckâ s behavior last week and called for investors to sign a â decency pledge.â Binary has since collapsed, with Mr. Caldbeck leaving the firm and investors pulling money out of its funds.

The chain of events has emboldened more women to talk publicly about the treatment they said they had endured from tech investors.

â Female entrepreneurs are a critical part of the fabric of Silicon Valley,â said Katrina Lake, founder and chief executive of the online clothing start-up Stitch Fix, who was one of the women targeted by Mr. Caldbeck. â Itâ s important to expose the type of behavior thatâ s been reported in the last few weeks, so the community can recognize and address these problems.â

The womenâ s experiences help explain why the venture capital and start-up ecosystem â which underpins the tech industry and has spawned companies such as Google, Facebook and Amazon â has been so lopsided in terms of gender.

Most venture capitalists and entrepreneurs are men, with female entrepreneurs receiving $1.5 billion in funding last year versus $58.2 billion for men, according to the data firm PitchBook. Many of the investors hold outsize power, since entrepreneurs need their money to turn ideas and innovations into a business. And because the venture industry operates with few disclosure requirements, people have kept silent about investors who cross the lines with entrepreneurs.

Â Â Â Some venture capitalistsâ abuse of power has come to light in recent years. In 2015, Ellen Pao took her former employer, the prestigious venture firm Kleiner Perkins Caufield & Byers, to trial for allegations of gender discrimination, leveling accusations of professional retaliation after spurned sexual advances. Ms. Pao lost the case, but it sparked a debate about whether women in tech should publicly call out unequal treatment.

Â Â Â â Having had several women come out earlier, including Ellen Pao and me, most likely paved the way and primed the industry that these things indeed happen,â said Gesche Haas, an entrepreneur who said she was propositioned for sex by an investor, Pavel Curda, in 2014. Mr. Curda has since apologized.

Â Â Â Some of the entrepreneurs who spoke with The Times said they were often touched without permission by investors or advisers.

Â Â Â At a mostly male tech gathering in Las Vegas in 2009, Susan Wu, an entrepreneur and investor, said that Mr. Sacca, an investor and former Google executive, touched her face without her consent in a way that made her uncomfortable. Ms. Wu said she was also propositioned by Mr. Caldbeck while fund-raising in 2010 and worked hard to avoid him later when they crossed paths.

Â Â Â â There is such a massive imbalance of power that women in the industry often end up in distressing situations,â Ms. Wu said.

SILICON VALLEY USES IMMIGRANTS AS POLITICAL VOTER ROLL MANIPULATION TOOLS -- ISSUE BULLET POINTS

FEINSTEIN, NEWSOM, PELOSI, PODESTA and The Squad came up with the idea to urge South Americans to move to the USA in order to pad DNC voter numbers. They blocked efforts to test the immigrants for diseases, incest and full Cartel crime reports. They blocked efforts to fully secure the border. This created a housing crisis, a disease crisis, a crime crisis and other national problems.

https://www.cbsnews.com/news/congress-trading-stock-on-inside-information/

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Obama Administration staff and Department of Energy officials in illicit coordination with U.S. Senators. In other words, we experienced all of the damages from each of the abuse-of-power issues listed below.

If you can get these laws made, it will end 90% of American corruption. Politicians wonâ t allow these laws to be made because it will cut off their corruption. Thus: You have to force the politicians to make these laws and leverage them with this manual. Tell them: â *All of the things in this manual will happen to you if you donâ t make these laws, now!â*

These are the actions needed to resolve those issues:

- - Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- - Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- - Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- - Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- - Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- - Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years.
- - Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.Â
- - Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.

- - Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists).
- - Limit the ability of companies to buy influence through former government officials.
- - Require income disclosures from former senior officials 4 years after federal employment.
- - Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company.
- - Prohibit the worldâ s largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- - Limit the ability of companies to buy influence through current government employees.
- - Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- - Prohibit corporate outlaws like Google, Tesla, Facebook, Linkedin, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years.
- - Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years.
- - Ban â Golden Parachutesâ that provide corporate bonuses to executives for federal service.
- - Publicly expose all influence-peddling in Washington.
- - Strengthen and expand the federal definition of a â lobbyistâ to include all individuals paid to influence government.
- - Create a new â corporate lobbyistâ definition to identify individuals paid to influence government on behalf of for- profit entities and their front-groups.
- - Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials.
- - End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals.
- - Combat foreign influence in Washington by banning all foreign lobbying.
- - End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreignÂ companies to influence United States public policy.
- - Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- - End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- - Ban direct political donations from lobbyists to candidates or Members of Congress.
- - End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- - End lobbyist gifts to the executive and legislative branch officials they lobby.
- - Strengthen Congressional independence from lobbyists and end Washingtonâ s dependence on lobbyists for "expertise" and information.
- - Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees.
- - Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- - Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at $500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies.

- - De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- - Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- - Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process.
- - Require agencies to justify withdrawn public interest rules via public, written explanations.
- - Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- - Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- - Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- - Restrict inter-agency review as a tool for corporate abuse byÂ banning informal review, establishing a maximum 45-day review period, and blocking closed -door industry lobbying at the White Houseâ s Office of Information and Regulatory Affairs.
- - Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges , can temporarily block agencies from implementing final rules.
- - Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postponeÂ the implementation of final rules.
- - Empower the public to police agencies for corporate capture.
- - Increase the ability of the public to make sure their interests are considered when agencies act.
- - Create a new Office of the Public AdvocateÂ empowered to assist the public in meaningfully engaging in the rule-making process across the federal government.
- - Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules.
- - Inoculate government agencies against corporate capture such as Google undertook against the White House.
- - Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- - Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity.
- - Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process.
- - Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congressâ prior disapproval of a different, narrow rule on a similar topic.
- - Improve judicial integrity and defend access to justice for all Americans.
- - Strengthen Judicial Ethics Requirements.
- - Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- - Ban individual stock ownership by federal judges.
- - Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations.
- - Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges.
- - Boost the transparency of Federal Courts.

- - Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- - Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judgesâ financial reports, recusal decisions, and speeches.
- - Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- - Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- - Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- - Encourage diversity on the Federal Bench.
- - Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- - Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws.
- - Support stronger ethics and public integrity laws with stronger enforcement.
- - Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers.
- - Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority.
- - Enforce the nationâ s ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- - Receive and investigate ethics complaints from members of the public.
- - Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- - Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- - Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- - Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- - Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- - Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- - Strengthen legislative branch enforcement.
- - Expand an independent and empowered ethics office insulated from congressional politics.
- - Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nationâ s ethics laws in the Congress Â and the entire Legislative Branch, including the U.S. Senate.
- - Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power.
- - Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- - Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- - Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- - Disclose basic tax return information for candidates for federal elected office and current elected officials.

- - Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- - Require the IRS to release t ax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- - Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials andÂ candidates for federal office.
- - Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office.
- - Disclose the Cash behind Washington Advocacy and Lobbying.
- - Prevent special interests from using secret donations from corporations and billionaires to influence public policy Â without disclosure.
- - Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- - Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- - Prevent sham research, like that from DNC shill McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- - Improve the Freedom of Information Act (FOIA).
- - Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence.
- - Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- - Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with Â all open FOIA requests and all records disclosed through FOIA.
- - Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- - Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending.
- - Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- - Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- - Require Members of Congress to post a link to their searchable voting record on their official websites.
- - Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? ***They are!***

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

You need to PUNISH any public official who does not put these changes into effect!

Top Nuclear Official Suggests Obama Admin Lied About Uranium One Deal â GOP Senator Says He Has Stone Cold Proof

December 13, 2017 by Joshua Caplan 42 Comments

- **409**Share
- **44**Tweet
- Email

Did the Obama administration lie about key aspects of the Uranium One deal approval process? In a letter to Congress, a leading nuclear official appears to suggest so.

Daily Caller reports:

> The current chair of the Nuclear Regulatory Commission (NRC) said that one of her Obama-appointed predecessorsâ responses to Congress on a key aspect of the Uranium One deal did not capture the intricacies of the matter.

> â I would note that, as your letter makes clear, the responses you have received have not fully depicted the complexity of this issue,â NRC chairwoman Kristine Svinicki said in response to a question from Wyoming Republican Sen. John Barrasso during a Wednesday Senate hearing. [â ¦]
>
> Barrasso also said he had evidence the Energy Department misled him on their role in the approval of uranium exports. He asked both agencies for documents to find out if he was intentionally misled.
>
> â Uranium One did not need a specific NRC license to export U.S. uranium,â Barrasso said. â Instead, Uranium One only needed to be, and later was, listed as a supplier on a transport companyâ s NRC export license.â

Last week, Barrasso expanded his investigation into the infamous Clinton-Uranium One deal.

On Monday, Barrasso sent the following letter to the Department of Energy:

> On March 21, 2011, former NRC Chairman Greg Jaczko responded to my letter on behalf of then-President Obama stating: â At this time, neither Uranium One Inc. nor ARMZ holds a specific NRC export license. In order to export uranium from the United States, Uranium One, Inc. or ARMZ would need to apply for and obtain a specific NRC license authorizing the export of uranium for use in reactor fuelâ â ¦Recent reporting by The Hill uncovered that Uranium One was able to export uranium without obtaining a specific export license. Beginning in 2012, Uranium One exported U.S. uranium by â piggy-backingâ as a supplier on an export license held by the shipping company, RSB Logistic Services Inc.

The Wyoming GOP lawmaker kicked off his probe into the Clinton-Uranium One deal in October.

*The Hill*â s John Solomon reported last week that the Obama Justice Department failed to call on the dealâ s secret informant, William D. Campbell, when it came time to charging former Russian uranium industry executive Vadim Mikerinn.

â While he was Marylandâ s chief federal prosecutor, Deputy Attorney General Rod Rosensteinâ s office failed to interview the undercover informant in the FBIâ s Russian nuclear bribery case before it filed criminal charges in the case in 2014, officials told The Hill,â reports Solomon.

â Iâ ve never heard of such a case unless the victim is dead. Iâ ve never heard of prosecutors making a major case and not talking to the victim before you made it, especially when he was available to them through the FBI,â Alan Dershowitz told *The Hill*.

Top Vatican boss mixed sexual misdeeds with church cash. How Cardinal McCarrick became a powerful fundraiser for the Vatican

Michelle Boorstein, The Washington Post

Photo: Washington Post Photo By Jonathan Newton

Cardinal Theodore McCarrick waves to fellow bishops at the Cathedral of St. Matthew the Apostle in Washington in September 2015, during Pope Francis's visit.

WASHINGTON - When Theodore McCarrick arrived in Washingon in 2001 to be the region's Catholic archbishop, it was clear right away that he was something very rare: a celebrity priest.

The vivacious cleric reportedly had spent time with famous Americans such as Bing Crosby and the Hearst family. He was a prolific fundraiser for big-name Catholic groups from right to left, and valued for his connection to Pope John Paul II, who dispatched McCarrick to hot spots worldwide as his diplomat. President George W. Bush, also new in town that January, marked his first private dinner in Washington by going to the home of the new archbishop.

McCarrick's gilded rÃ©sumÃ© stood in striking contrast to his public demeanor, that of a self-effacing do-gooder who, in a city full of egos and polish, wore rumpled clothes and exhibited a voracious drive to help others.

"I wish I were a holier man, more prayerful, more trusting in God, wiser and courageous," he said at his first D.C. news conference. "But here I am with all my faults and all my needs, and we will work together."

McCarrick's "faults and needs" are being considered in a new light after he became the first cardinal in U.S. history to resign from the post.

The resignation, accepted by Pope Francis, followed explosive allegations that the cleric sexually abused adolescents and sexually harassed seminarians and young priests under his authority.

The accusations have shocked and devastated McCarrick's many fans, leaving some to conclude that their hero apparently lived a double life. But to others who worked closely with him over the decades, the cardinal was always a more complex figure than his saintly public reputation conveyed. He was a man of enormous personal ambition, a skillful politician and, at times, shrewdly calculating, according to interviews with Catholic officials and others who knew and worked with him.

McCarrick stated his innocence after the first allegation that he abused a 16-year-old, which led to his suspension from ministry. He has since been in seclusion and has not responded to requests for comment. McCarrick's civil attorney, Barry Coburn, has declined to comment. His canonical attorney, Michael Ritty, declined to comment after the initial allegation and has not responded to repeated additional requests for comment. The Vatican has opened a case on McCarrick that could result in a church trial. Possible outcomes include defrocking and exoneration.

In 1988, McCarrick co-founded the Papal Foundation, a nonprofit organization that raises millions for the Vatican. He sometimes rushed to the side of the country's wealthiest Catholics in their times of personal crisis, following up to raise money later, according to two people who witnessed such interactions.

"The Papal Foundation was a huge point of leverage for him in terms of going to Rome," said Steve Schneck, the longtime head of the Institute for Policy Research and Catholic Studies at Catholic University. Schneck worked often with McCarrick. "There is not a Catholic organization in the United States he hasn't raised money for."

Schneck admired McCarrick, but others used less favorable terms to describe him.

"He was a climber," said someone who worked closely with McCarrick in the past. Like several others in this report, the person spoke on the condition of anonymity so as not to violate the church's protocol that only official spokespeople discuss McCarrick.

McCarrick's popularity and his enormous stature as an emissary for the church and as a prolific fundraiser for Catholic causes may have helped protect him over the years as other, whispered words were added to his reputation: harasser, groper, violator of his vows of celibacy.

- - -

Although allegations that McCarrick abused adolescents surfaced only last month, when the Vatican suspended the 88-year-old, there had for decades been rumors in church and journalistic circles about his behavior with seminarians. These ranged from talk of an unwanted hand on a knee to chatter on conservative Catholic blogs citing anonymous descriptions of sex parties.

The day he was suspended, two New Jersey dioceses made public that they had fielded three complaints from budding priests against McCarrick and had settled two of the cases. Last week, Albany priest Desmond Rossi became the first cleric to go on record as saying McCarrick's casual touches during seminary in the 1980s made him uncomfortable. Rossi told the Jesuit magazine America that he thinks McCarrick's behavior at the

time fueled promiscuity among seminarians, which he said forced him to transfer to another seminary outside of McCarrick's jurisdiction.

Some who had heard the rumors and allegations surrounding McCarrick said they did not speak out because he was so greatly admired for his role in the church. But there are other possible reasons McCarrick's alleged actions are coming to light only now.

Some at the time dismissed as unreliable the attacks on McCarrick, who was often seen as left-leaning, because they came largely from conservative bloggers. That same impulse appears to now be leading some conservatives eager to find fault with the Pope Francis era to highlight the McCarrick case. Conservative blogs have been filled in recent days with rumors that Francis's U.S. allies - cardinals including Joe Tobin of Newark and Blase Cupich in Chicago - are close to McCarrick, an effort to tarnish Francis by association. One inaccurately said McCarrick and Tobin worked together.

There is also a long-standing deference within the Catholic Church to upholding institutional hierarchy and protocol, even in an extreme case like this. Priests, cardinals and bishops have said they told the Vatican years ago about McCarrick - either about the rumors, or about the two legal settlements New Jersey dioceses reached with him in the early 2000s - and there's no evidence anything was ever done. Victims never heard from Rome, and McCarrick was functioning as a priest until a few weeks ago, speaking to Catholic audiences and performing weddings and baptisms.

Requests from The Washington Post for comment from Rome haven't been returned for weeks.

"You don't go ahead unless your editor says okay, right?" said the person who worked with McCarrick. "We sent a letter to the Vatican and I was waiting for instructions. There is a hierarchy here you're dealing with."

- - -

McCarrick's career stood out from the start.

Many ambitious Catholic clerics spend time in seminary and graduate school in Rome, making connections around the Vatican.

Yet McCarrick spent much of his early career in the New York City area, where he'd grown up. He graduated from Fordham University, attended seminary in Yonkers, New York, and was ordained a priest in New York City, cementing connections that helped speed his rise later on.

His first assignment was as dean of students and fundraising at Catholic University in Washington, the bishops' own university.

He was then named president of a Catholic university in Puerto Rico at age 35 and then secretary, in the mid-1970s, to the cardinal of New York City.

From there, McCarrick began an unbroken stream of promotions, garnering some of the nation's highest civic and religious honors. He was taken as a young priest under the wing of two powerful New York City cleric-bosses - Cardinal Francis Spellman, and Cardinal James Cooke, whom McCarrick served through the 1970s.

"He had what we call the 'godfathers,' of the church," said the person who worked for years with McCarrick.

Around that time, McCarrick was becoming a jet-setting fundraiser, said James, 60, who lives in Loudoun County, Virginia, and earlier this month accused McCarrick of sexually abusing him from age 11 or so until

he was in his early 30s. He lived in New Jersey when the abuse began, he says.

James, who spoke on the condition that his last name not be used, filed a police report on July 17 with the Loudoun County Sheriff's Office, a copy of which The Post has seen.

James's extended family was close to McCarrick, who had baptized him as a baby, he said. Through his later teens and 20s, James said he attended many fundraising dinners with McCarrick, as well as meetings with potential donors in various places, including Northern California, Chicago and Boston. In 1974, when James was a teenager, he said McCarrick took several trips to California to console the Catholic millionaire publishing family of Patty Hearst, who was kidnapped by leftist radicals. James's family had moved by then to the West Coast. James's sister told The Post that she recalled the visits as well. Requests for comment to Patricia Hearst and one of her siblings were not answered.

Later, McCarrick made use of the relationship to raise money from the family, James said.

James also said McCarrick visited and solicited donations from Bing Crosby, who, like the Hearsts, was Catholic. McCarrick delivered the homily at Crosby's New York funeral Mass, but a spokesman for the Crosby family said that while "Bing hardly ever turned down a request from a priest," he could not easily locate records of such donations.

James said he then fell into a damaging pattern with McCarrick for the next two decades, and spent time with the priest - including sexually. Often McCarrick was traveling for pastoral and fundraising trips and he'd bring James along, the man said.

"Sometimes he'd just speak at the table, he'd give a homily, the after-dinner homily," James said. "We'd be in a private dining area, and everybody would just open their purses and . . . write checks. All they'd say is, 'Who do I make the checks out to?' "

McCarrick had a core pitch: "We have so much, they have so little. We need to speak the word of God so they have something," James recalled.

In the 1980s, McCarrick was among those who established the Papal Foundation, meant to support the Vatican during an Italian banking crisis. Wealthy donors pledge a minimum of $1 million; the group has an endowment of $215 million, according to its site.

The person who worked with McCarrick in the past said McCarrick worked hard to woo Pope John Paul II, leaving his diocese to see the pope whenever possible. He traveled to Cuba and Mexico during John Paul's visits to those countries.

"Wherever the pope was, he was. He tried to be noticed," the person said. He said McCarrick became somewhat close to John Paul's secretary, the Polish Cardinal Stanislaw Dziwisz, which helped him get closer to the pope.

When the pope came to the United States in 1995, he flew directly to Newark.

McCarrick "was just a genius at schmoozing," said the Rev. Boniface Ramsey, a New York City priest who worked at a New Jersey seminary when McCarrick was bishop there. "I think it was all to suck up to John Paul II."

Yet McCarrick's decades of pavement-pounding for money were part of the reason he was considered so holy.

He was raising many millions for needy causes, from persecuted religious minorities in the Middle East to aid

for immigrants to low-cost housing. He helped groups from right to left, from the Knights of Columbus to Catholic Relief Services. Although he also raised money for conservative causes, he was often viewed as left-leaning, primarily because he focused on causes such as alleviating poverty and supporting immigration rather than efforts against abortion and in support of Catholic views on sexuality.

He was also unusually public in the early 2000s in speaking out for survivors of clerical sex abuse; he was involved in the church's efforts to write policies aimed at preventing abuse and was an early advocate for zero-tolerance for priests who abuse.

McCarrick's ambition and fundraising prowess were not considered self-enriching. Some who worked with him over the years said that when it came to himself, the cardinal was thrifty and lived very simply. He wore an old raincoat and his staff one year gave him a Macy's gift card so he'd get some new clothes.

"He had no entourage, wasn't pompous, unlike traditional powers in the church and public life," said a person active in church organizations who collaborated on causes with McCarrick. The person spoke on the condition of anonymity because he said he was concerned about being identified as speaking favorably about McCarrick, given the allegations that have surfaced.

In 2001, McCarrick was awarded the position of archbishop of Washington - a relatively small city but because of its prominence as the U.S. capital, a post viewed as the ticket to an automatic "red hat," or cardinal spot.

About this time in the early 2000s, Pope John Paul II's health was starting to fade, and the culture wars within the Catholic Church - intensified by the liberalizing Second Vatican Council of the 1960s - revved up even more as it became clear that there would soon be a new pope.

It was also around this time that rumors about McCarrick and his treatment of seminarians seem to have spread further. Many of them were on a few conservative blogs, and contained anonymous, secondhand allegations that McCarrick had pressured young men studying to be priests to sleep in his bed. Some abuse watchdog sites published pieces as well.

But some Catholics who had heard the unsubstantiated rumors dismissed them as the product of church politics seeking to vilify those deemed too liberal. That remained the case in the following decade.

Someone whose organization honored McCarrick said they looked into the rumors. The person spoke on the condition of anonymity because they didn't want their work to be associated with the case.

"It sounded like disgruntled conservative Catholics. I didn't give credence to the source," the person said. "It seemed ideologically motivated."

As the rumors swirled in the early 2000s in certain pockets of the budding Catholic blogosphere, quietly the diocese of Metuchen, New Jersey, and the archdiocese of Newark were fielding three formal complaints about McCarrick and his treatment of seminarians and a young priest. Two were settled, the dioceses said in a statement last month, the day the Vatican suspended McCarrick, the first time any church office said on the record that there had been a complaint about the senior cleric.

McCarrick retired as archbishop shortly after he turned 75, in 2006. It's standard for bishops to offer their retirement to the Vatican at that age, but it's common for them to keep working for years if both sides wish. McCarrick was a hard-working striver whose routine didn't appear to slow until very recently.

He remained extremely active in the church, traveling on diplomatic missions, fundraising and acting as a priest for weddings and baptisms.

The person who worked with McCarrick said they suspect church leaders in Rome had chastised McCarrick in some way, telling him to pull back from public life.

"But he did whatever he damn well wanted," the person said.

These days there are limits.

Now that he has been suspended from ministry and resigned, the globe-trotting, vivacious McCarrick is not allowed to wear clerical garb in public. He also may not present himself as a priest. His movements must be approved by the Vatican's representative in Washington. However, in the privacy of his own room, McCarrick may still say Mass for himself.

NBC News: Hillary Clinton â Covered Upâ Pedophile Ring At State Department

Baxter Dmitry Editor's Picks, News, US

An NBC news report claims that Hillary Clinton, while secretary of state, shut down an investigation into an elite pedophile ring in State Department ranks in order to avoid scandal and protect the careers of high ranking officials and an ambassador.

The NBC investigation was broadcast at a time when they were a real news organization rather than a branch of the Democratic Partyâ s PR department, and provided internal State Department memos to back up claims of a massive Hillary Clinton elite pedophile ring cover-up.

â *Serious allegations concerning the State Department*,â the NBC anchor announced, before launching into the disturbing details that mainstream media would be unable to report on in 2017.

â *According to internal State Department memos the agency might have called off or intervened into investigations into possibly illegal, inappropriate behavior within itâ s ranks allegedly to protect jobs and avoid scandals.*

â This concerns a time when Hillary Clinton was secretary of state.â

â *There is an old saying in Washington that the cover-up is worse than the crime. But in this case both parts of it are disturbing,*â Chuck Todd continued.

â *Allegations of prostitution and pedophilia, and allegations that those crimes were somehow covered up or not looked into. So the State Department this morning is having to respond to those claims, and those investigations involve misconduct by State Department officials, including an Ambassador and security agents attached to then secretary of state, Hillary Clinton.*

â The allegations are that these investigations were whitewashed, quashed altogether, and that those orders came from high up.â

â *NBC has obtained documents relating to ongoing investigations into some disturbing allegations involving State Department personnel and at least one ambassador. A State Department memo says, quote, â the Ambassador routinely ditched his protective security detail in order to solicit sexual favors from both prostitutes and minor children.*

â The memo also says a top State Department official directed State Department investigators to â cease the investigationâ into the ambassadorâ s conduct.â Itâ s just one of what another document describes as â several examples of undue influenceâ from top State Department officials.â

Elite pedophile ring

In contrast to Clintonâ s cover-up, President Trump has announced a federal investigation into the elite pedophile scandal involving human trafficking earlier this month and promised to help put an end to the â *horrific, really horrific crimes taking place*.â

The president held a short, dramatic press conference after meeting with human trafficking experts to announce that he will direct â *the Department of Justice, the Department of Homeland Security and other federal agencies*â to devote more resources and personnel to the investigation.

Appearing at the press conference for less than two minutes, President Trump said that the issue has been on the radar of federal government â *for some time*â but since taking office in January the investigation has become â *much more focused*.â

â *It has been much more focused over the last four weeks, I can tell you that.â*

Toyota lied to consumers about Prius fuel efficiency, experts say

By RALPH VARTABEDIAN

About 800,000 Toyota Priuses were recalled in 2014 to address overheating. Some drivers and experts who studied Toyota documents say the company's software fix resulted in a reduction in fuel economy. (Joe Raedle / Getty Images)

When Robert Enger took his Toyota Prius into a dealership for a safety recall, he didn't expect that his fuel economy would drop.

Just six months after buying the new 2013 Prius, Enger learned that the company was recalling it to fix the car's hybrid electrical system, which was overheating and frying itself. A technician plugged the car into a diagnostic tool that installed new computer code in two electronic modules. That was supposed to fix the problem.

The repair itself has become controversial amid allegations that the electrical systems are still overheating after the software fix. But Enger noticed something else: His fuel economy dropped by 5 miles per gallon in city driving. Enger, an electrical engineer from Hermosa Beach, checks his mileage every fill-up, dividing the number of miles he drove since the last fill-up by the number of gallons he pumped to top off the tank.

About 800,000 Toyota Priuses in the U.S. were recalled in 2014 to address overheating that damages the car's inverter, a key part of the electrical power system. A lawsuit brought last year by one of Southern California's largest Toyota dealers asserted that the software fix did not solve the overheating problem and could lead to an abrupt loss of power. A related complaint by the dealer is now under review by the National Highway Traffic Safety Administration.

Academic experts contacted by The Times said it is likely the software change reduced the car's fuel efficiency. And a lawsuit this month in federal court makes allegation that Toyota "concealed from consumers that the software reflash decreased the fuel efficiency â defeating the very purpose of owning these hybrid vehicles."

A statement by Toyota did not directly address questions about whether fuel economy and emissions are affected, but said the company would defend itself against such allegations.

The company's documents show it modified not only software that controls the inverter's function, but also the software in the vehicle's powertrain control computer that determines how much power is supplied to the transmission by the gasoline engine and by the electric motors, according to the experts, hybrid vehicle engineers at major academic research centers.

The inverter, a device about the size of a large shoe box, boosts the battery's 200 volts to about 500 volts for the electric motors and converts the battery's direct current to alternating current (similar to what comes out of a household outlet). When the brakes are applied, the power flows in the other direction to charge the battery.

The change in the powertrain software and evidence of physical problems in the inverter probably shows that the company's modification reduced the power supplied by the battery and increased reliance on the Prius' four-cylinder gasoline engine, according to the academic experts who have reviewed those filings. If so, the car's fuel economy probably dropped and its emissions increased, they say.

The Prius has an EPA fuel economy rating of 51 miles per gallon in city driving for the 2010 model and 49 mpg for the 2014 model. Enger said his city driving mileage dropped from 49 mpg before the software change to 44 mpg afterward.

Assertions that the Toyota software change decreased the car's fuel economy are contained in a lawsuit seeking class-action status filed this month in U.S. District Court in Los Angeles. "Unbeknownst to drivers, Toyota reduced the vehicles' fuel efficiency, which is the main reason why consumers purchase Priuses," it alleges. The suit by two Toyota owners, filed by Los Angeles attorney Skip Miller, contends that Toyota's inaccurate fuel efficiency claims violate various consumer protection laws and result in fraud, false advertising and breach of contract.

Roger Hogan, who owns two big Toyota dealerships in Southern California, has sued Toyota, alleging that more than 100 Priuses have come to his service departments with failed inverters after the software fix was made.

Hogan's suit said that Toyota was slow to notify owners of the defect. It said that the company waited several years to issue the recall for the basic Prius after knowing about the problem and then waited another 18 months to extend the recall to the Prius V.

Toyota of Claremont refuses to sell these Priuses because, a lawsuit alleges, they have a defect that can cause the cars to lose power. Owner Roger Hogan, center, filed the suit. (Gina Ferazzi / Los Angeles Times)

Toyota officials at the company's U.S. headquarters in Texas issued a statement disputing the allegations in the class-action suit, saying they are without merit. They previously said the Hogan suit is without merit.

"Toyota's focus remains on the safety and security of our customers, and we stand behind the effectiveness and appropriateness of the Prius inverter recall remedy," the statement said. "Due to the pending litigation, we cannot address the specific fuel economy claims in detail at this time, however, we intend to defend against them vigorously."

The company notified the California Air Resources Board of the software change in January 2014, saying that that it made "no significant difference on emissions and fuel economy," according to a board spokeswoman. NHTSA referred questions about the performance to the Environmental Protection Agency, which did not respond by the time of publication.

The Times interviewed more than a dozen Prius owners who described reliability and fuel consumption issues with their Priuses. When the inverter overheats, the car can suffer a total loss of power or enter what Toyota calls a "limp home mode." When it happens, the dashboard lights up with warnings.

Kathleen Ryan, a Marina del Rey Prius owner who got the software fix in 2014, was driving in the fast lane on the 91 Freeway in January, cruising along at 70 mph, when suddenly "it felt like somebody pulled the emergency brake."

The car slowed down to 15 mph and Ryan had to cross three lanes of high-speed traffic that was swerving around her slow car. Several California Highway Patrol Officers on the shoulder, who had stopped to deal with a stalled big rig, told her she was lucky to be alive, she said.

"If I had been in an accident, nobody would know how it happened," said Ryan. "They would say, 'Oh, this old lady doesn't know how to drive.' If somebody dies, we wouldn't even know how it happened."

Jason Levine, executive director of the Center for Auto Safety, said that a car in limp-home mode may be

better than a full stall, but still puts drivers in a "freaky" situation. "You have gone to a large golf cart," he said.

Levine and others compare Toyota's software fixes to Apple's secret modification of software that controls the iPhone, slowing down the device as the battery ages and loses its ability to hold a full charge. The Securities and Exchange Commission and the Justice Department said in January they were launching investigations into Apple's practices.

In many cases, the inverters fail when drivers step hard on the accelerator or brake hard, which subjects the inverter to high loads. In its recall notice to owners, Toyota suggested drivers should temporarily take it easy on their Priuses: "Until the remedy is performed, drivers should avoid placing a high load on the hybrid system by avoiding full throttle application when possible."

The company has been struggling with the overheating problem in the Prius as far back as May 2011, according to a "defect information report" that it filed with federal safety regulators in 2014. Its engineers examined the possibility that solder joints were cracking, a result of "excessive thermal stress."

In following years, engineers found cracks in the solder, but could not find a problem in its manufacturing process. Later, the report said, the cracks were not turning up in the wagon version of the vehicle, the Prius V, which has the same inverter. By 2014, Toyota finally settled on changing the software in the inverter and engine controller. It told federal regulators it would sent owners notices by 2015.

The overheating occurs in special electronic devices, known as "insulated gate bipolar transistors," or IGBTs, which boost voltage and convert the DC power from the battery to AC power.

Heath Hofmann, an electrical engineering professor at the University of Michigan and an expert in hybrid vehicle power systems, describes the transistors as high-power switches that turn on and off thousands of times per second. The auto industry is trying to find a substitute for the silicon transistors, but so far continues to use IGBTs. It is likely the transistor loads are at the heart of Toyota's problem, he said, based on the defect information reports.

"It strongly suggests that they did something to change the vehicle's overall power management system," Hofmann said after looking at some of the Toyota recall documents. "The likely thing they did was reduce the power running through the inverter and the motor generator, particularly if they are having problems in high power demand situations."

Michael Pecht, a University of Maryland professor who founded the school's Center for Advanced Life Cycle Engineering, which focuses on electronics reliability, also reviewed the Toyota recall documents. "Clearly, they are saying the problem is in the IGBT, but they couldn't find the cause for two years," he said.

Pecht said the software fix to reduce temperatures in the inverters may help, but "it is just going to delay when the failure occurs. My gut is that the software fix saves money. This is really serious. The inverters need to be replaced."

In his lawsuit, Hogan alleges that replacing an inverter costs more than $2,000, while the software fix costs the manufacturer $80.

Hogan said a few Toyota owners have returned to his dealership, saying their Prius suffered a loss of fuel economy after the software fix. A few Prius owners contacted by The Times said they did not notice any change in their fuel economy. Other Prius owners have made the same complaint as Enger in Toyota chat rooms, saying it "detunes" their cars and increases the use of the gasoline engine.

In many cases, however, Prius owners may not know their fuel economy has degraded because they don't routinely check it or they may not associate it with the software recall.

Enger, the Hermosa Beach engineer, said he tried to get answers from his dealer and then finally called Toyota's customer service hotline. He said he wasn't able to get to the bottom of his problem with customer relations.

"It was like talking to a cat," he said.

Tree-hugging investigators accidentally discover â Climate Changeâ has connections to Silicon Valley organized crime scheme

By Citizen Sleuths 2.0 â Advisory report for E&E Legal

Washington, DC - Federal investigators have uncovered evidence of dramatic fraud in Federal Science Agency research regarding climate change.

Who cares?

What does a rain storm or two have to do with our lives in this economically troubled world?

Has anyone every tried to punch you in the nose for saying you do, or donâ t, believe in Santa Claus? Why would people punch you in the nose and scream in front of the U.S. Congress about believing in, or not believing in, Climate Change? The answer is: CASH!

The Climate Change issue in Government has virtually nothing to do with the climate, environment or anything even remotely organic or natural.

What would you do to have every Hollywood teenage dream come true? If you were a spoiled fraternity-house raised Stanford alumni upper crust male you would would want to have sex with a different supermodel escort every night. You would want to buy new Teslaâ s and Ferrariâ s every month and have dinner made for you at the most expensive restaurants in town every night. You would fly to the base camp of Mount Everest, to a snow field in Antarctica and to Paris, just to take selfies to show your bro-buddies. You would buy a different Brioni silk tie every day. You would buy the best heroin and cocaine every week. Generally, you would spend $30,000 a week on crazy self-indulgent show-off crap.

You would be addicted to your hubris and narcissism. To keep that life-style going, you might even kill some people.

That is how bad things are in this scandal.

A group of forensic researchers made a science-data fact study of what was going to happen socio-financially when Obama announced that â climate changeâ was going to end life on Earth. An interesting discovery occurred. The discovery had nothing to do with Polar bears, Amazon forests or dolphins. It had to do with The Mafia!

The Silicon Mafia.

It turns out that if the United States had made â Climate Changeâ a national agency-dedicated budget issue, only 7 men would have had the key profiteering windows in that policy event: John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson. Those men happen to be the key bosses of The Silicon Mafia.

Those men were the key financiers and internet information manipulators of Barack Obama and Hillary Clintonâ s political campaigns.

Barack Obama and Hillary Clinton were massively promoting Climate Change as a national agency-dedicated budget issue.

Get it? Even though there is some Climate Change going on, Barack Obama and Hillary Clinton, ironically, had staged the issue so that only their campaign financiers owned the companies that they said could â solve the problemâ , and, they said the Government had to give those 7 billionaires trillions of taxpayer dollars. What a coincidence!

The weirdest part of the realization is that it was Democrat GAO and OPM investigators, who describe themselves as green energy lefties and whale loving outdoors fans, who discovered the scam.

In the new Trump Administration, the lefties are scrambling to try to hang on to the last shreds of greenie environmentalism. Before the last of them got bounced out of the new Alt-Right Washington, DC, they started leaking White House phone transcripts and climate data. Alas, some of the agency research data turned out to prove that the climate data had been faked in order to buy some new private jets and hookers for the Silicon Valley billionaires.

This was a twelve trillion dollar scam. If the Obama, or proposed Clinton Administration had fully executed on their Climate Change schemes: John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their cronyâ s would have gotten twelve trillion dollars of the publicâ s state and federal tax funds piped directly into The Silicon Mafiaâ s personal bank accounts. Numerous investigators have now published reports that the climate change â factsâ were faked in order to steer government funds to Silicon Valley campaign financiers.

The family and friends of dead people who blew the whistle on the Silicon Mafiaâ s climate payola scheme claim that either John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla or Steve Jurvetson had their family members killed to try to cover up the epic crime. Check out the strange deaths of Gary D. Conley; reporters David Bird, David Werner, Micheal Hastings, Aaron Swartz, Dominic di Natale & Andrew Breitbart; Rajeev Motwani; Forrest Hayes; Ravi Kumar; Dave Goldberg; Karl Slym; Doug Bourn; Danny Lewin, Seth Rich and over 185 others. All dead; All connected to whistle-blowing on John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their cronyâ s. If they didnâ t kill you with a bullet or poison they killed your life with character assassination attacks by their Gawker Media, Media Matters or Think Progress attack dog facades.

CBS News investigative TV series 60 Minutes did a segment called: ***The Cleantech Crash.*** The episode began to examine the crony corruption that the climate change kickbacks had schemed up. The world famous reporter Bob Simon, much loved as a hard charging CBS News go-getter, was suddenly killed in an out-of-the-blue car crash. CBS News reporter Cheryl Atkisson then had a number of Obama White House ordered hit-jobs run against her. John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their cronyâ s were serious about keeping their scam covered up. The Silicon Mafia had a mob-lieutenant in Washington named John Podesta. Podesta was the modern Sidney Blumenthal of hit jobs. Email leaks of his private emails shows Podesta and his partners ordering associates to act â Like the Mafiaâ .

Everything was going along swimmingly. The scheme got slowed down in the Obama Administration but all of the same players had cloned their play over to Hillary Clintonâ s operation and had doubled in the support of an emerging boss: Tom Steyer. The scene was set to exceed even the twelve trillion dollar payola projections.

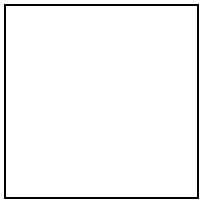
Then the hand of fate played its **Trump** card! Their scam went sideways.

If you are a taxpayer reading this then call the White House and email Congress; **Demand arrests!**

Donâ t let these crimes slide. These manipulations of your trust and your tax dollars are a horrible transgression against YOU!

Greenpeace is already saving the polar bears and the seals. 52 groups are already saving the rain forests. All of the trees, fish and animals are already getting saved by armies of community service groups.

Save yourselves and save America from the Silicon Valley Mafia. Demand that federal law enforcement arrest and jail: John Doerr, Elon Musk, Larry Page, Tom Steyer, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson for racketeering, corruption, fraud and homicide!



The facts prove the crimes. The facts are in. The facts donâ t lie, the Silicon Mafia does lie!

However you feel about climate change, you have to believe that racketeering, corruption, homicide and fraud demand a federal prison sentence!

Trey Gowdy to McCabe: Trump Didnâ t Get You Fired, Your Own Fellow Agents Recommended It (VIDEO)

P by admin

Print

Share:

In the aftermath of Attorney General Jeff Sessions firing FBI Deputy Director Andrew McCabe late Friday evening, many Democrats have come out against the move. Rep. Trey Gowdy (R-S.C.) â a Republican â however, said McCabeâ s firing was recommended by his own agency.

Gowdy further poked holes in McCabeâ s statement that he released shortly after being fired:

Thatâ s right. If you look at his statement, he was really upset that he was being blamed for ending something and the interesting part of his statement, which I hadnâ t heard a lot of people talk about, is he was really blaming [Department of Justice]. The Department of Justice is who shut down the investigation. But you know what, Chris? We donâ t live in a relativistic world. [â ¦] And you donâ t get to decide when to tell the truth and when not to. Iâ m going to withhold judgment until Horowitzâ s report comes

out. â *READ MORE*

Trump Could Save Taxpayers â Billions Of Dollarsâ By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save â billions of dollarsâ if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO report, released Tuesday, also reported Congress could save up to $4.3 billion by eliminating the loan program that gave $192 million to a failed luxury electric car company.

â The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste,â GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent $170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. **(RELATED: The NYT Walks Back Bombshell EPA Report, Doesnâ t Issue A Correction)**

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost $377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated $18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford.

The Hanford site cleanup came under increased scrutiny after a â take coverâ order was given in 2017 after a tunnel containing radioactive waste collapsed.

â DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this,â GAO reported. â DOE provided technical comments, which were incorporated as appropriate.â

GAO also highlighted an open recommendation to Congress that could save taxpayers up to $4.3 billion.

â Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations,â GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury automaker Fisker Automotive, which drew down on $192 million before having its

government credit stripped away.

Fiskerâ s loan was sold off to a Chinese billionaire for $25 million in 2013, netting taxpayers a $139 million loss.

U.S. Department Of Energy Runs An Organized Crime Operation To Pay Off Obama Campaign Financiers

Staff at the U.S. Department of Energy can expect to have their investment bank accounts, 401K's, offshore assets, real estate holdings, stock market activity, family funds, trust funds, job offers and other assets deeply examined and cross compared to those of Silicon Valley oligarchs and Senators who benefited from Green Cash payola and market rigging! An independent audit is being conducted by private investigators with CIA-Class resources.

By Elise Cooper

Stonewalled is the title of investigative reporter Sharyl Attkisson's first book â and stonewalling is what the Department of Justice is doing to her now. Determined to receive justice, she has a landmark lawsuit against the DOJ for electronically surveilling her computers. Multiple forensics exams have revealed the government-related remote efforts to monitor her. Government agents most likely did it because she had the "audacity" to dig into facts regarding wasteful green energy spending, as well as the Fast and Furious and Benghazi scandals.

Besides hitting a brick wall with those in the government who want to see the lawsuit eliminated, Attkisson also has to battle the enormous cost in terms of time and money.

"The government has unlimited taxpayer funds to fight my lawsuit," Sharyl tells me. "As the expenses have grown, my primary attorney has let me go on account for his time because he considers this one of the most important cases regarding the numerous violations of a person's rights. We have also had to hire multiple forensics experts and a constitutional law attorney."

She went on to say, "We are arguing violations of the 4th and 1st Amendments and that of the Telecommunications Act. There are free press and privacy issues. A GoFundMe page has been set up by a diverse group of bipartisan supporters that include conservatives, liberals, and civil rights activists."

As the organizers stated on that page, "[t]his is an extremely important case about the limits and consequences of government spying on Americans'

personal and work computers, and is being watched by many. It is in the public interest to seek accountability. It is at our own peril that we give up on the old fashioned free press and privacy notions set forth in our Constitution."

This is not a Vince Flynn thriller novel, but reality. In 2013, CBS reported, "[A] cybersecurity firm hired by CBS News 'has determined through forensic analysis' that 'Attkisson's computer was accessed by an unauthorized, external, unknown party on multiple occasions in late 2012. Evidence suggests this party performed all access remotely using Attkisson's accounts.'"

She had not just one, but five independent forensic exams that uncovered the remote surveillance, including government I.P. addresses, listening in with her computer microphone and monitoring her keystrokes. Classified documents were planted on her computer, perhaps to justify a wiretap or frame a particular whistleblower who was speaking to her.

A vicious cycle has arisen: the legal team has to attribute these abuses to specific people by name. Yet they can identify the perpetrators only through the legal "discovery process," which the government is fighting each step of the way. Sharyl noted, "What was done is a crime because there apparently was no FISA warrant, which is required to spy on a U.S. citizen. The DOJ is not making any attempt to find out who in the government was involved, and they are preventing me from also finding out."

What Americans need to understand is that just because the presidency changed from President Obama to President Trump, that does not mean that career government employees change. "I am fighting the bad actors at the DOJ who are still protecting people and who are still obstructing this suit. Many everyday workers and bureaucrats do not change from one administration to the next. They are often the ones who basically run the government, these faceless people. They are the ones that decide what information filters up and down. In this respect, it does not matter who is president."

Those in the Obama administration went beyond surveillance and attempted to suppress and intimidate Sharyl when she pursued investigative reporting

as a CBS News correspondent. "Almost every day, various Obama administration officials would call or email different people at CBS, where I was working at the time, to try to controversialize or stop my stories. They called CBS managers in New York, talked to our White House correspondent, our Washington bureau chief, senior producer, and even had lead Democrats in Congress lobby against my stories. These tactics were all done behind the scenes."

Sharyl tells of posted emails by WikiLeaks from a federal intel-connected contractor that give a hint as to the Obama administration's apparent plan to crack down on journalists. They refer to an effort supposedly led by John Brennan, who later became Obama's CIA director. "These top officials at the federal contractor titled the email 'Obama leak investigations. For internal use only, do not forward.' They said how 'Brennan is behind the witch-hunt of investigative journalists learning information from inside Beltway sources' and that there was 'a specific tasker from the White House to go after anyone printing material negative to the Obama agenda.' I would think there are probably a dozen or so journalists that were targeted besides me."

Besides Brennan, former FBI director Robert Mueller (now the special counsel investigating President Trump) is also probably involved, though Sharyl didn't address that speculation. Mueller headed the FBI when documented surveillance abuses occurred and when the remote surveillance of Sharyl began. Did he know about or was he actively involved in conducting an illegal investigation of a journalist and limiting freedom of the press? She says, "There is a much bigger picture here that people are missing." Maybe the Republican Senate should investigate Brennan and Mueller, because this is definitely big government at its worst.

The press is also complicit. Imagine the outcry if someone in the Trump administration did this to someone in the press. The media and civil liberties groups are not circling the wagons around Sharyl. She believes that "if it happened during the Trump administration, it would be a whole different story. There was a broad effort led by the liberal smear group Media Matters to state and imply that the intrusions of my computers never happened, even though there's irrefutable forensic proof. They tried to

discredit me, but in the end, people pretty easily saw through that." As for why other news reporters aren't doing stories on Sharyl's case? "I know there are a couple of outlets that worked on a story about this, but for whatever reason could not get the final story published. In terms of why it's important, it's a story about the government's remote intrusion of a journalist's computer."

Every American should be supportive of Sharyl's lawsuit. As stated on the GoFundMe page, "[i]f these violations go unanswered and unpunished, government attacks on journalists and citizens will be left, unchallenged, to expand. Sharyl's lawsuit has important Constitutional and freedom implications for *every American*. She is courageously proceeding â really on behalf of all Americans." Those in the Obama administration should be punished for "controversializing" reporters who put out stories that the administration perceived as negative to their interests.

U.S. Dept of Energy Continues Classified Experiments on Humans

Programs dubbed â Moose Droolâ and â Hidden Valleyâ

The U.S. government continues to perform highly secretive experiments on human subjects, according to partial information about these continuing experiments released under a Freedom of Information Act request.

At least 12 programs run by the Department of Energy are using human beings as part of the experiments, which operate under unusual names such as "Moose Drool," "Little Workers," and "Hidden Valley," among others.

An unclassified list of these experiments was provided to the Federation of American Scientists under a FOIA request and included in the organizationâ s latest newsletter.

Little information about the nature of these experiments was provided by the government, which lists the total number of participants in the programs at around 300.

"Human subjects research refers broadly to the collection of scientific data from human subjects," FAS noted in its review of the experiments. "This could involve physical procedures that are performed on the subjects, or simply interviews and other forms of interaction with them."

Controversy has surrounded past efforts by the U.S. government to conduct human experiments, including radiation tests that sparked a government committee years ago.

"Research using human subjects provides important medical and scientific benefits to individuals and to society. The need for this research does not, however, outweigh the need to protect individual rights and interests," FAS noted, quoting the DOE's 2016 guidance on protection of human subjects in classified research.

The U.S. Dept. of Energy Was Used As Hard-Wired Political Slush Fund To

Pay-off Campaign Billionaires and Destroy Their Competitors

California Senators and Washington agency chiefs are on the hot seat for a trillion dollar-plus political corruption case which abused taxpayers nation-wide and the public policy system over-all. You will remember the Solyndra FBI-raid and the amazing failures of more Department of Energy-funded â green energyâ companies (in a matter of two years) than ever in U.S. history. It turns out they were all owned by the same handful of men who used them as a stock market pump-and-dump scam.

Senators Reid and Feinstein, White House staff and Dept. of Energy executives had insider trading deals with Silicon Valley tech billionaires. They used Google and Gawker Media to attack witnesses, destroy competitors and rig the news in their favor while exploiting illicit mining and stock market crony corruption deals. The only "Green" thing they were interested in was the cash! They had "hard-wired" the DOE money, in advance, for the campaign financiers and simply used/defrauded the non-crony applicants as a smoke-screen to hide their scam while monopolizing markets in a scheme agreed to with Rahm Emanual, David Axelrod, David Plouffe and their Cartel.

The victims of these politician-sponsored crimes demand justice and restitution for the fraud, harassment and interference they suffered. These citizens must be compensated for the malicious, proven, retribution tactics, lies, toxic poisonings, vendetta cut-offs of all government benefits, vendetta cut-offs of all employment and revenue sources, interference, "missing hard drives" and interdiction efforts conducted, with applicants own tax dollars, against the applicants. Say the victims: neither they, nor their families, staff and associates will rest until justice prevails.

In this election year, the public demands the arrest of the corrupt. Justice demands resolution, or the repercussions will only continue to accelerate and amplify. This crime continues to this day. The cover-ups continue to this day. The attacks on the victims and losses by the victims continue to this day.

These were felony crimes that the DOJ has been told not to act on because arrests will cause â political embarrassmentâ . Seriously?!

These days, voters want more political embarrassment of the corrupt and less â political correctnessâ and cover-ups. Without justice and restitution for the victims, it destroys American voters faith in The System. The taxpayers have lost trillions of their dollars, and public services, because of this corruption. Famous Senators and White House staff who benefited from the crimes, are operating the cover-up. Evidence now proves that the Obama staff ordered DOJ, FBI, SEC, FCC, FTC, OSC and the AG to "Take no action on this investigation" in an overt set of orders to illegally operate a cover-up. That is not acceptable to the public.

The definition of â politicsâ is: *â The process in which a man fights with another man to see which man, and his friends, will get to put your tax money in their pockets.â*

Representation of taxpayers in Washington, DC has become almost entirely about making fake â lawsâ which direct U.S. Treasury cash to one side or another. In the â Cleantech Crashâ incident, this process stooped to the level of mobster-ism and organized crime.

At least one alliance of the victims of what 60 Minutes calls: â The Cleantech Crashâ , sent letters this week to The California Senators and Washington politicos who are supposed to clean up the Cleantech Crash. Part of the letter reads:

â *...As you are by now aware, all of these communications have been placed on permanent public record either by our filings or by state-sponsored hackers who have been publicly reported to have entered and copied your agencyâ s servers for a number of years.*

We will no longer accept your refusal to do your jobs by way of your officeâ s â BSâ claim â that this is outside of our purviewâ , or by finger-pointing to some other agency, stone-walling, slow-walking, or losing your files or hard-drives. We, and the rest of the 300+ million citizens, pay you to work for us and we were told and expect you to work for us and protect and serve us.

You were not hired by us to simply run cover-ups for some criminally corrupt Silicon Valley campaign finance billionaires.

Waiting us out and thinking this will â all just go awayâ has proven to be an epically false assumption on your part. Your attack dog, Gawker Media, who you used to put a hit-job on us, has has been taken down. Holder, Gibbs, Chu, Seward, Solyndra, Abound, etc. have all been shut down. Every person and company that organized and operated the CleanTech Crash Crimes has been identified, targeted, placed under investigation and/or had criminal charges filed against them.

Our first lawsuits have made political history and set legal precedents, and they will never end until we get restitution and justice.

As we have proven, we can, and will sue your agency executives PERSONALLY for corruption and will not hesitate to name each agency executive in RICO filings.

In other words, you must now come to the table with a restitution and justice proposal for the victims of these crimes. We have become witnesses and provided testimony to James Comey, David Johnson, Patricia Rich and others at the FBI, as well as the EU, GAO, SEC, FTC and U.S. Congress.

Without breaking a single law, and WITH the help of intelligence and law enforcement agents, we will take this to the mat. As massively documented at http://xyzcase.xyz , www.accountability1.com , www.slush-fund.com and thousands of backup evidence and internet test sites and torrents, we have placed around the globe, the evidence is now indisputable.

Do your job for the American people!

How much will your agency slot out of your discretionary budget for our restitution and/or whistle-blower rewards? We will make certain that every voter knows your answer prior to the election.

We are done putting up with your delays and cover-ups. The voters are done putting up with your delays and cover-ups.

How will you serve us as our legally and morally obligated government representative and protector? Time is running outâ ¦.â

So it looks like the do-nothing politicians did nothing for a little too long. Now, they need to do something to fix this..and before the 2016 Election!

==========

U.S. Needs To Nationalize The Oil Companies, Release The U.S. Oil Reserves And Set A National Retail Price For Gasoline

By Louis Jacobson

President Joe Biden faced an awkward moment during the international climate change conference in Glasgow, Scotland, when he was asked at a press conference about inflation back home, including gasoline prices.

Energy

There's a Huge Problem With Senate Democrats' Proposal to Bring Down Gas Prices

â If you take a look at gas prices and you take a look at oil prices, that is a consequence of, thus far, the refusal of Russia or the OPEC nations to pump more oil,â Biden said Nov. 2 at the United Nationsâ COP26 summit. â And weâ ll see what happens on that score sooner than later.â

OPEC is the group of 13 primarily Middle Eastern and African oil exporters that act collectively to set production levels; it has been joined recently in decision-making by Russia and some other non-member nations.

One reason for the awkwardness is that Biden was at a conference that aimed to reduce carbon emissions, including from oil, yet he felt obligated to call for greater output by oil-producing nations.

The administrationâ s request for greater production â is a recognition that oil is by far the leading energy

source for the U.S. and global economy today, even with aspirations for a rapid transition to a lower-carbon future,â said Mark Finley, a fellow in energy and global oil at Rice Universityâ s Center for Energy Studies.

Exacerbating the awkwardness is that the U.S. is itself a major oil producer. In fact, the U.S. is the worldâ s biggest, accounting for about 20 percent of the worldâ s output. So we decided to take a closer look at the reasons for the current high price of oil and what the U.S. can do about it. (The White House did not respond to an inquiry for this article.)

Are OPEC and Russia to blame?

At the root of the price increases for gasoline, as with so many other products, is the coronavirus pandemic. Since the initial economic wallop from the virus in the spring of 2020, demand for gasoline has risen steadily as business activity has increased. Yet supply hasnâ t been able to recover as quickly, thanks to delays in restoring drilling capacity, higher transportation costs, and sluggish production increases.
