WORLD's LARGEST SOLAR PLANT VASTLY UNDER-PERFORMING - youtube.com....2845
"...Working with federal executives, a group of Silicon Valley men formed a cartel and ran an organized crime kickback scheme which cost the taxpayers billions of dollars and which broke numerous felony laws. They have been protected, up to this point, but the evidence against them is now over-whelming. Recent whistle-blower documents from the Snowden, Sony, HSBC and other investigation sources, has only served to additionally validate the charges. Hundreds of credible witnesses, and investigators, are prepared to go before any Special Prosecutor, Federal Court or network news broadcast and verify all of the facts. It is time for

CORRUPTION AT SANDIA AND ARGONNE NATIONAL LABS.....2947
In one story, below, you can see how we got raped by Sandia, Argonne and In-Q-Tel, working under orders from White House staff, to acquire our technology, copy it and flood the market with clones of it, in order to punish us for talking to law enforcement.Documents have been provided to the courts, and law enforcement, proving that Sandia, IN-Q-TEl and Argonne contacted us, communicated with us, asked to look at our technology "confidentially", which had patents filed and/or issued, worked with us, copied our technology and exploited it against us. This has happened to over 300 different companies, according to recently released investigations:.....2948

60 Minutes Uncovers Pelosi Insider Stock Trades

By Newsmax Wires

- 214
- Tweet

Former House Speaker Nancy Pelosi bought stock in initial public offerings (IPOs) that earned hefty returns while she had access to insider information that would have been illegal for an average citizen to trade with â even though itâ s perfectly legal for elected officials, CBSâ s "60 Minutes" reported Sunday night.

In a piece relying on data collected from the conservative Hoover Institution, "60 Minutes" revealed that elected officials like Pelosi are exempt from insider trading laws â regulations that carry hefty prison sentences and fines for any other citizen who trades stocks with private information on companies that can affect their stock price.

In the case of elected officials â this secret information ranges from timely details on lucrative federal contracts to legislation that can cause companiesâ stocks to rise and fall dramatically.

Editor's Note: Repeal Obamacare? Vote Here Now

How do they get away with it? Lawmakers have exempted themselves from the laws that govern every other citizen.

Pelosi, D-Calif., and her husband have participated in at least eight IPOs while having access to information directly relating to the companies involved. One of those came in 2008, from Visa, just as a troublesome piece of legislation that would have hurt credit card companies, began making its way through the House.

â Undisturbed by a potential conflict of interest the Pelosis purchased 5,000 shares of Visa at the initial price of $44 dollars. Two days later it was trading at $64. The credit card legislation never made it to the floor of the House,â **Steve Kroft of "60 Minutes" reported.**

Kroft confronted Pelosi at a regular press conference after she declined an interview.

Kroft: Madam Leader, I wanted to ask you why you and your husband back in March of 2008 accepted and participated in a very large IPO deal from Visa at a time there was major legislation affecting the credit card companies making its way through the â through the House.

Nancy Pelosi: But â

Kroft: And did you consider that to be a conflict of interest?

Pelosi: The â y â I â I don't know what your point is of your question. Is there some point that you want to make with that?

Kroft: Well, I â I â I guess what I'm asking is do you think it's all right for a speaker to accept a very preferential, favorable stock deal?

Pelosi: Well, we didn't.

Kroft: You participated in the IPO. And at the time you were speaker of the House. You don't think it was a conflict of interest or had the appearance--

Pelosi: No, it was not â

Kroft: â of a conflict of interest?

Pelosi: â it doesn't â it only has appearance if you decide that you're going to have â elaborate on a false premise. But it â it â it's not true and that's that.

Kroft: I don't understand what part's not true.

Pelosi: Yes sir. That â that I would act upon an investment.

The Hoover Institutionâ s Peter Schweizer stressed that what Pelosi did was completely legal.

â There are all sorts of forms of honest grafts that congressmen engage in that allow them to become very, very wealthy. So it's not illegal, but I think it's highly unethical, I think it's highly offensive, and wrong,â he told Kroft.

â â ¦ Insider trading on the stock market. If you are a member of Congress, those laws are deemed not to apply,â Schweizer added. â The fact is, if you sit on a healthcare committee and you know that Medicare, for example, is â is considering not reimbursing for a certain drug that's market moving information. And if you can trade stock on â off of that information and do so legally, that's a great profit making opportunity. And that sort of behavior goes on.â

Pelosiâ s office issued a statement Sunday saying, â It is very troubling that â 60 Minutesâ would base their reporting off of an already-discredited conservative author who has made a career out of attacking Democrats.â

Schweizerâ s books include â Do as I Say (Not as I Do): Profiles in Liberal Hypocrisy,â and â Architects of Ruin,â according to Schweizerâ s page on the Hoover Institution website.

THE OVERVIEW DETAILS...

The 30+ companies who witnessed these crimes have made certain that every single law enforcement, regulatory, congressional investigation and investigative journalist office has the complete information on this case. Not a single agency, investigator or task force has denied that any of these criminal actions took place. The companies have requested that agencies and investigators inform them if they are laboring under any misconceptions, or misunderstood any of the evidence. To date, not a single investigator has stated that any of the conclusions are erroneous. While the public is very aware of the "Solyndra" portion of the case, the public has not been shown the entire Solyndra investigation case files, nor seen the follow-on investigations, which implicate some very well-known parties.

So far, not a single agency, investigator or task force has filed a major criminal indictments against the primary parties involved, because the perpetrators are very large investment banks, technology companies and billionaire campaign backers who have ordered cover-ups, and delays, to be enacted. Smaller players have been fired or forced tp resign from federal jobs, Steven Rattner was indicted for securities fraud. Raj Gupta was put in jail. Some of the front companies were bankrupted, but the big crimes are still underway and they affect every American taxpayer.

There are now over 200+ whistle-blowers, evidential witnesses and corroborating testimony experts willing to testify, publicly, in an open Congressional/law enforcement network-media-broadcast hearing. The witnesses are prepared to swear, under oath, to the truth of their statements. To date, no party has accepted responsibility

for organizing such a hearing.
In short: This was a massive kick-back, stock fraud, insider trading crime!
The following videos, embedded on the following pages, when viewed in order, will give the average person a good overview of the incident:

WEEKLY UPDATES FOR THE TEAM:

(The following information is based on hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files which are now available to attorney's) Draft 1.9

This may sound unbelievable to some. For those who read the news, things as unbelievable as Genocide, Bernie Madoff stealing billions of dollars, 76 million customer bank accounts getting stolen from JP Morgan, and tens of thousands of other strange things, happen every day.

The story of one of the cases:

Innovation Vs. The Dirty Politicians!

So an American small business walks into a conference room...

...and accidentally steps into the middle of a multi-hundred billion dollar government embezzlement scheme.

So they did the right thing, the thing they were taught to do in school: (ie: "tell the nice policeman about the bad thing you saw") and reported the crime.

Then the bad guys tried to have them "killed", in every sense of the word. They put a "Hit" on them. (Additionally: Whistle-Blower Gary D. Conley, Wall Street Journal Reporter David Bird, Technologist Rajeev Motwani and over 40 other persons who reported on this matter, died under mysterious circumstances during the course of this investigation. They were all in perfect health the day prior to their deaths)

In this once case, This small American company was working for the government. They had been asked to: *"...help Save America"* by providing the next generation of jobs and energy technologies. Then they saw something they weren't supposed to see. Something involving big political figures and organized crime at the highest levels.

The bad guys stole massive amounts of taxpayer money. The Small American business knew that that sort of behavior was just WRONG. The bad guys specifically targeted The Small American business, in retribution for reporting the crimes, and set about seeking to wipe their business out.

Later, they called the one guy's employer and sabotaged his job, after manipulating a vast number of online data-bases in order to damage his revenue potential. It was a very sophisticated attack.

That was the final straw!

So most of the other people that had been damaged and attacked by the bad guys created an ad hoc task force, comprised of highly effective legal experts, federal cops, federal investigators, intelligence officers, journalists, citizens, policy experts, and others, watching and backing the investigation up. Using both the traditional, and non-traditional legal system. They set about fixing that part of the public policy process.

As of today, it has cost some of the most powerful people in the nation their jobs, their companies, their power and their brands. New laws have been written, and placed into effect, which makes it harder for bad guys to be bad in those ways. A large contingent of public and private members have joined the ad hoc task force and are now on around-the-clock duty watching for bad guy activities.

Then things really got interesting...

After previously winning a congressional commendation, mayoral proclamations, state assembly proclamations, hundreds of letters of commendation and being awarded a federal grant and a historical set of federal patents for one of their technologies (which eliminates the need for gasoline), The Small American business built fully functioning versions of the technology and were then asked, by the Government, to put the sub-system in a full system, to demonstrate the value to taxpayers.

Unfortunately for them, The Small American business chose to demonstrate with cars.

This brought the wrath of the Detroit Big-3 (Old-school cars & oil fuel), the steel industry (alternative energy cars don't use much steel), The oil industry (Because hey, it's Oil) , the battery industry (Which campaign financiers had invested in) and a bunch of Senators, with insider trading deals and kick-back schemes, down on The Small American business; because That Small American business product would change the profit and power-control chain for those old-school cartels.

Then federal investigators interviewed The Small American business because they had received complaints from almost every other applicant in the DOE program, about the rigging of the Energy program. During those discussions, with federal officials, The Small American business was informed that criminal activities may have been undertaken by federal employees.

FBI Raids, famous agency head departures, Solyndra, famous company bankruptcies, 60 Minutes investigations and a whole slew of revelations followed, revealing that, indeed something had been "Rotten in Denmark". The Small American business has now been informed, by investigators, which this may have all been about a $300+ Billion campaign funds laundering thing, via "CleanTech" investors, but that is up to a Special Prosecutor to figure out.

The Small American business went off and did a new technology (SEE "FIRECHAT" and 'SERVAL" SOFTWARE in online searches, for example) but a retribution order had already been put on them and a series of media, economic and physical "hit jobs" were undertaken against them.

As "payback" A hybrid "spy marketing group" , (a rogue operation), was sent in to acquire The Small American business technology and redistribute it for free in order to eliminate its value, this was timed with a media attack coordinated by a sleazy tabloid company who worked with the attackers. This part of the attack included hatchet job hit articles and an attack video. The attack articles and videos were replicated on the web by the tabloid company and a major search engine, in one of the largest re-percussive search engine manipulation attacks ever deployed on the web, aside from Presidential candidate character assassination attacks.

Investigators and major media journalists have now reported that over $300M U.S. dollars has been spent copying, "adjusting" and distributing The Small American business patented technology, which the hybrid spy marketing group coordinated the swipe on. Investigators now have some of the PO's from this outside incursion. A major global newspaper exposed part of the story. NSA has recordings of some of the bad guys rigging the deals. A Special Prosecutor can get ahold of them.

The Small American business, federal investigators and journalists have now, independently, been able to confirm most of this information via news, FOIA and investigator case files. The 60 Minutes episodes called: THE LOBBYISTS PLAYBOOK and THE CLEANTECH CRASH (SEE VIDEO FILES, BELOW) are a good place to start. There are two federal lawsuits before judges about part of this, you can read them on PACER. There are more coming... There are now hundreds of thousands of pages of evidence, a large number of videos, and many federal, state and major news organization investigation case files available.

This group is bi-partisan. They have glowing letters from Ronald Reagan as well as pictures hugging with Hillary Clinton and Warren Buffet.. They are just Anti-Corruption.

The U.S. Attorney General has now resigned. This brings to 88, the number of high level Washington resignations, by people that are "persons-of-interest" in this case. Most members of the public would recognize the names. Some of these parties have now been indicted. Some media outlets refer to this matter as: "potentially, one of the biggest corruption scandals in American History!"

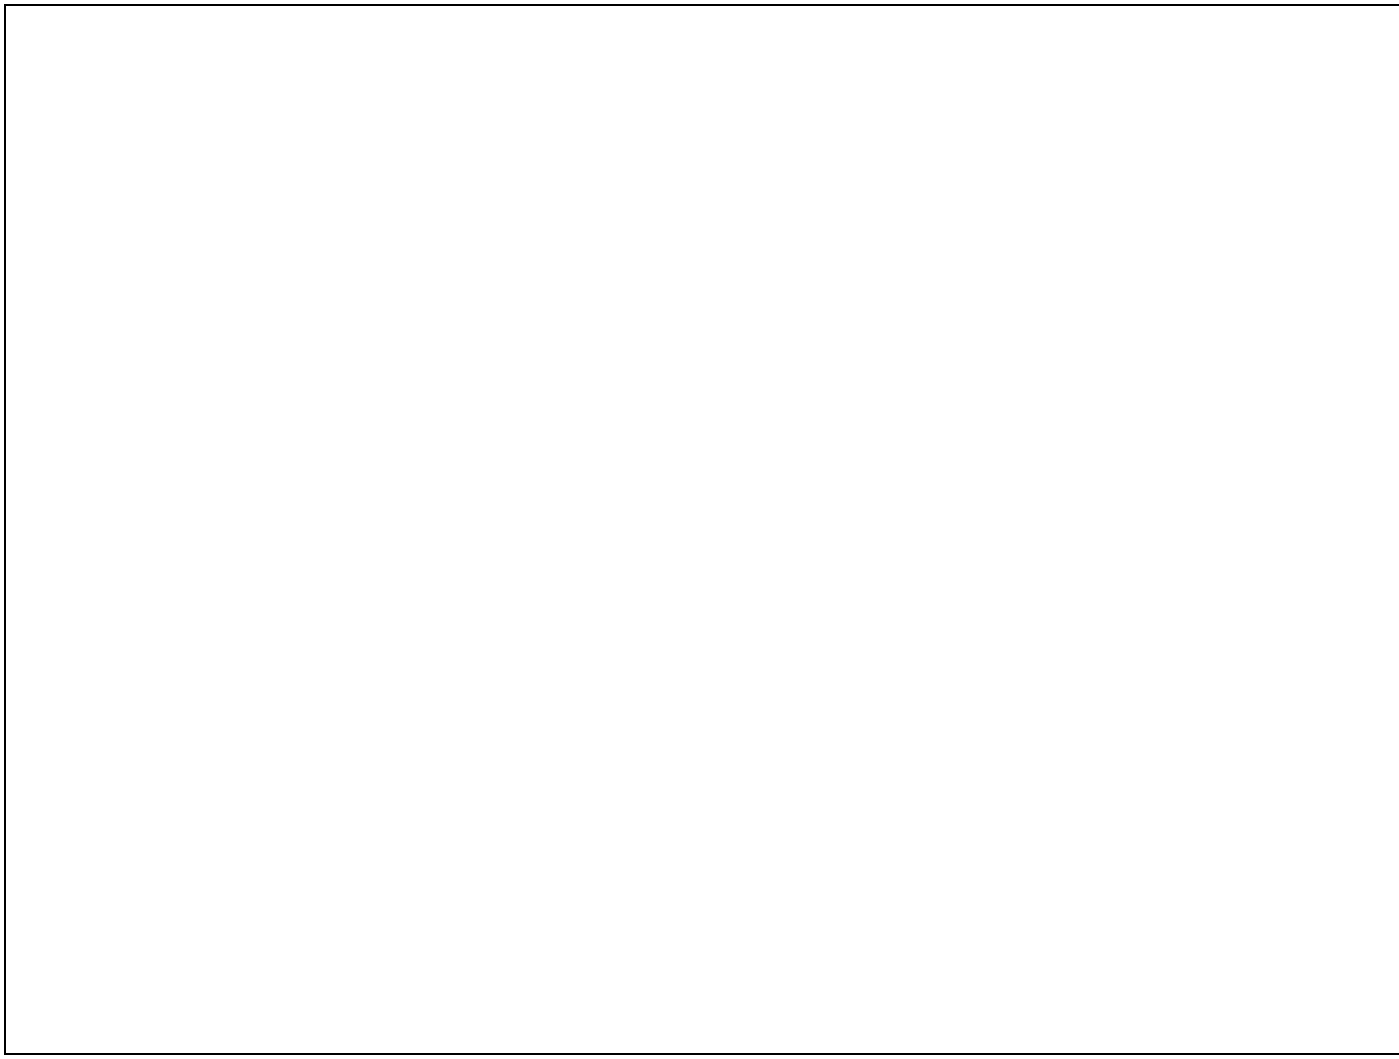
100% Of US Warming Is Due To NOAA Data Tampering In Order To Put $100M in Nancy Pelosi Bank Account From Insider Trading

Climate Central just ran this piece, which the Washington Post picked up on. They claimed the US was â overwhelmingly hotâ in 2016, and temperatures have risen 1,5Â°F since the 19th century.

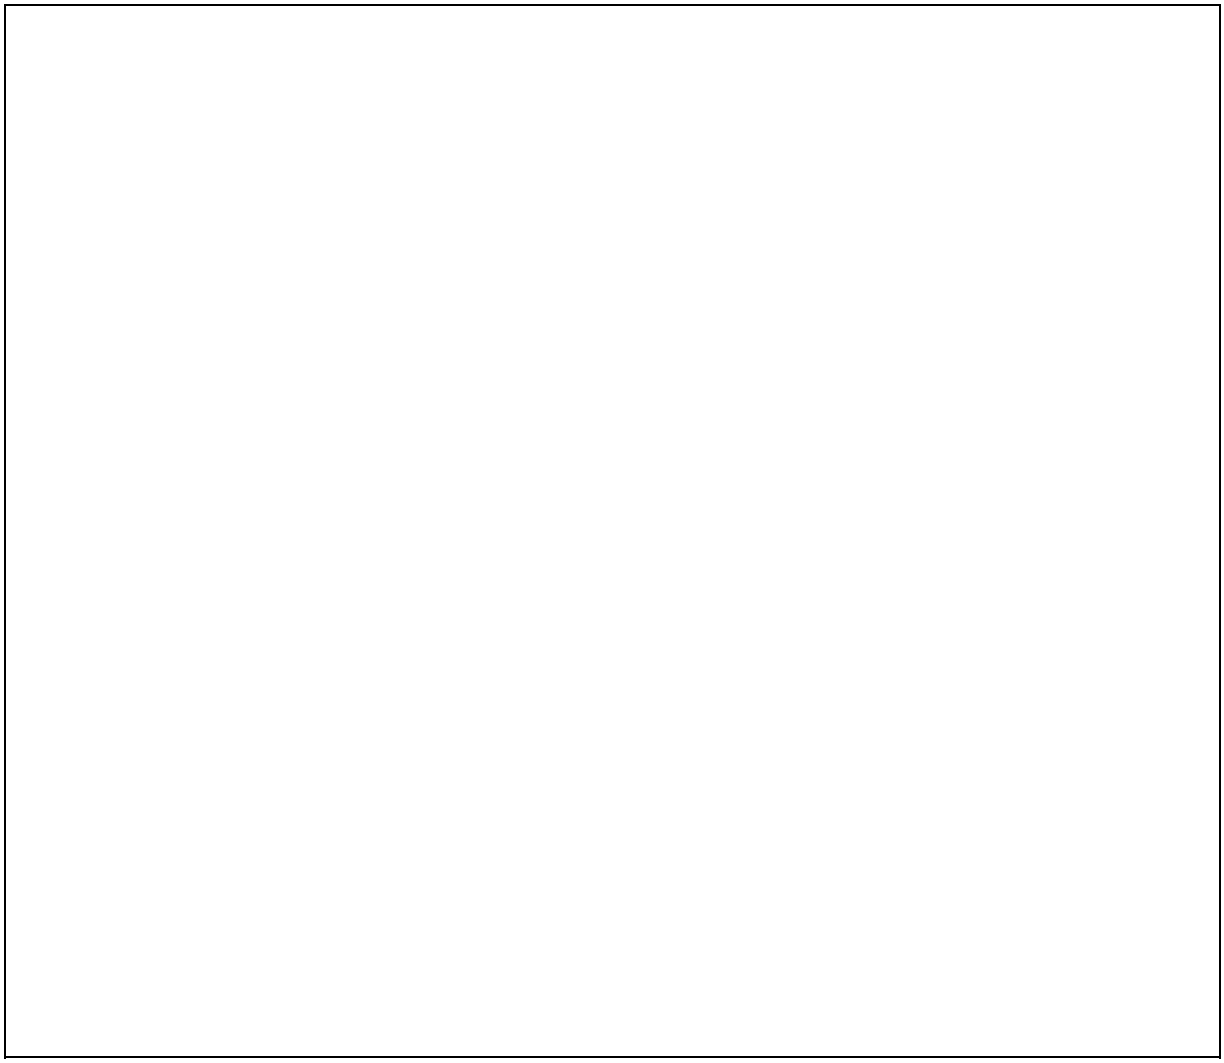


The U.S. Has Been Overwhelmingly Hot This Year | Climate Central

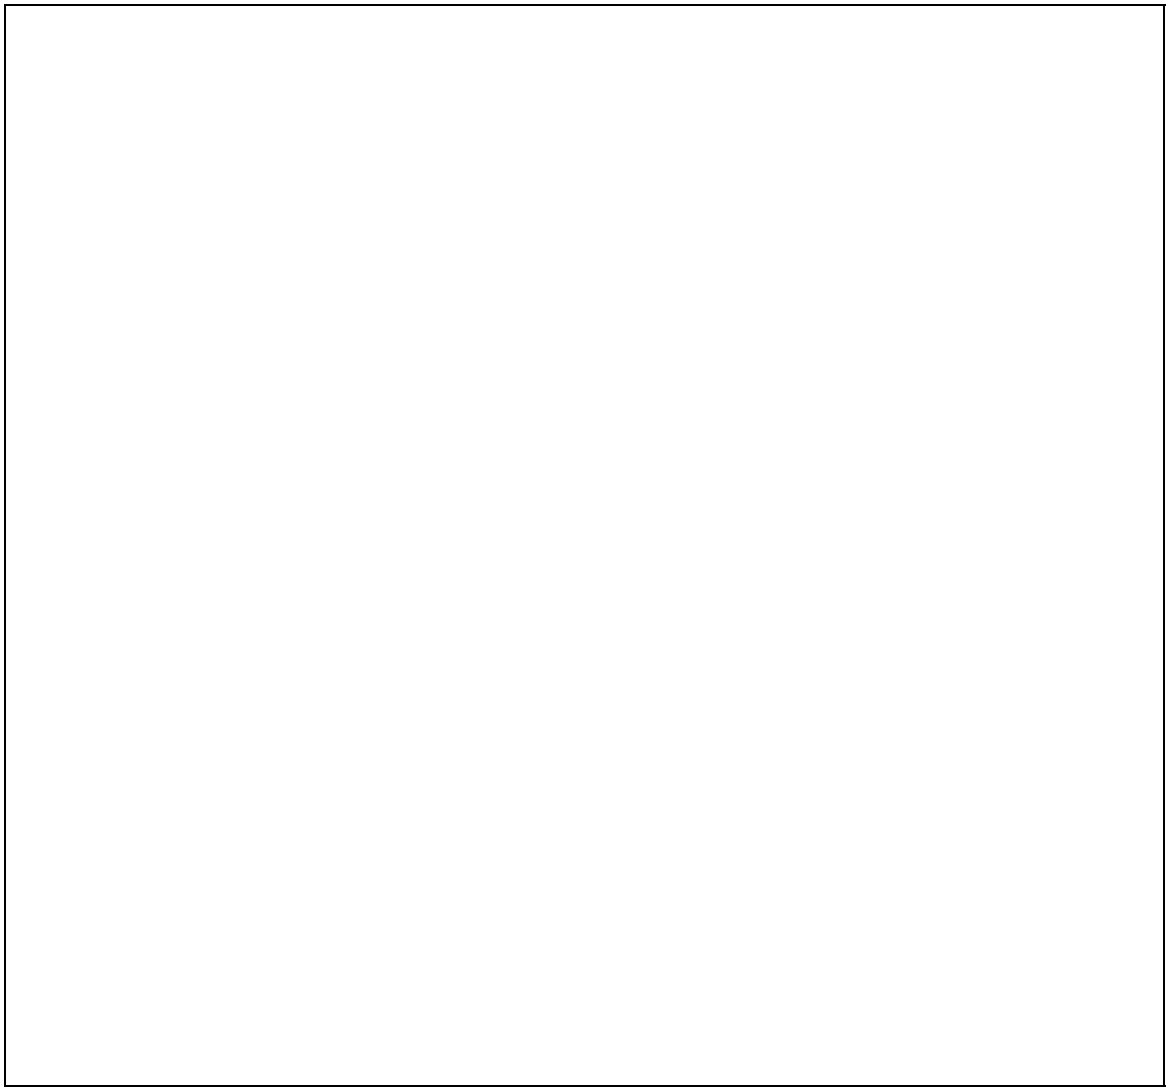
The first problem with their analysis is that the US had very little hot weather in 2016. The percentage of hot days was below average, and ranked 80th since 1895. Only 4.4% of days were over 95Â°F, compared with the long term average of 4.9%. Climate Central is conflating mild temperatures with hot ones.

They also claim US temperatures rose 1.5Â°F since the 19th century, which is what NOAA shows.

Climate at a Glance | National Centers for Environmental Information (NCEI)



The problem with the NOAA graph is that it is fake data. NOAA creates the warming trend by altering the data. The NOAA raw data shows no warming over the past century

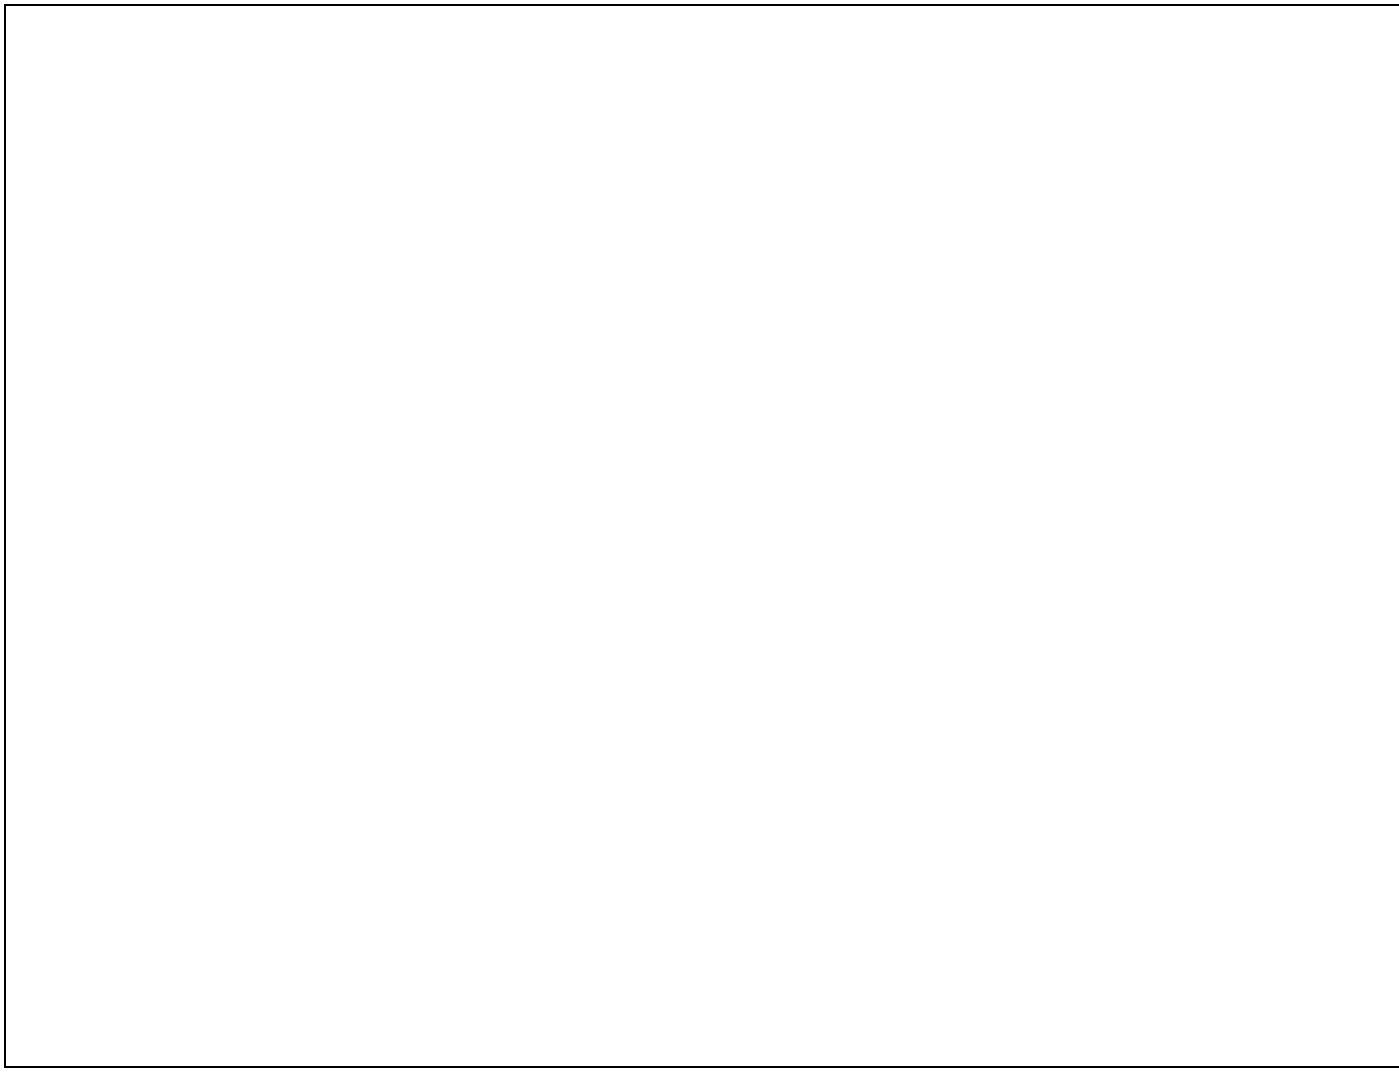


The adjustments being made are almost exactly 1.5Â°F, which is the claimed warming in the article.

The adjustments correlate almost perfectly with atmospheric CO2. NOAA is adjusting the data to match global warming theory. This is known as PBEM (Policy Based Evidence Making.)

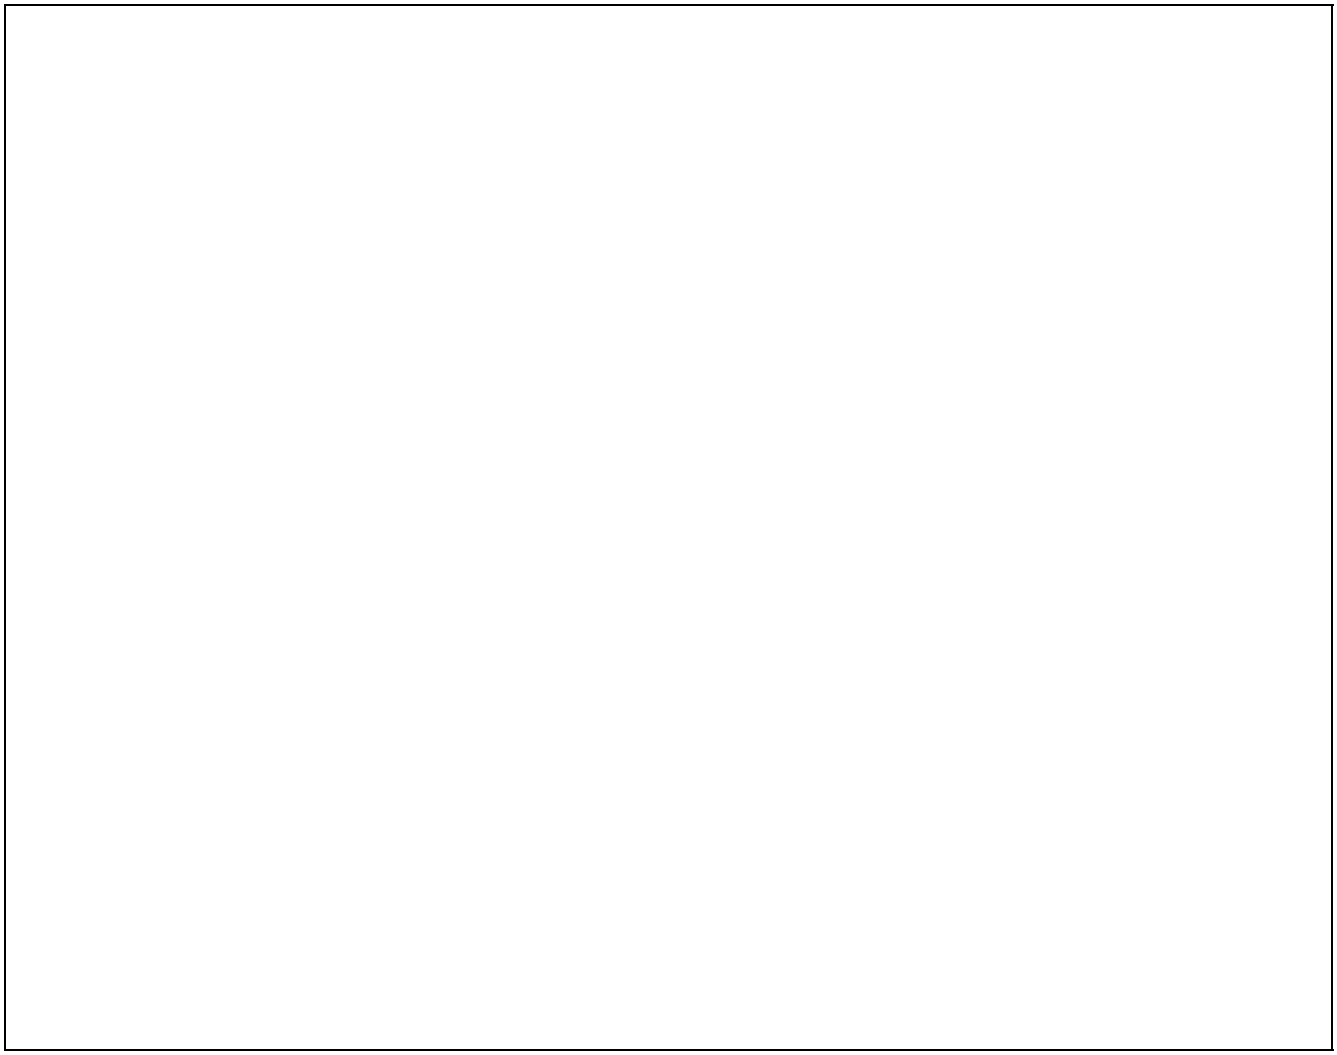
The hockey stick of adjustments since 1970 is due almost entirely to NOAA fabricating missing station data. In 2016, more than 42% of their monthly station data was missing, so they simply made it up. This is easy to identify because they mark fabricated temperatures with an â Eâ in their database.

When presented with my claims of fraud, NOAA typically tries to arm wave it away with these two complaints.



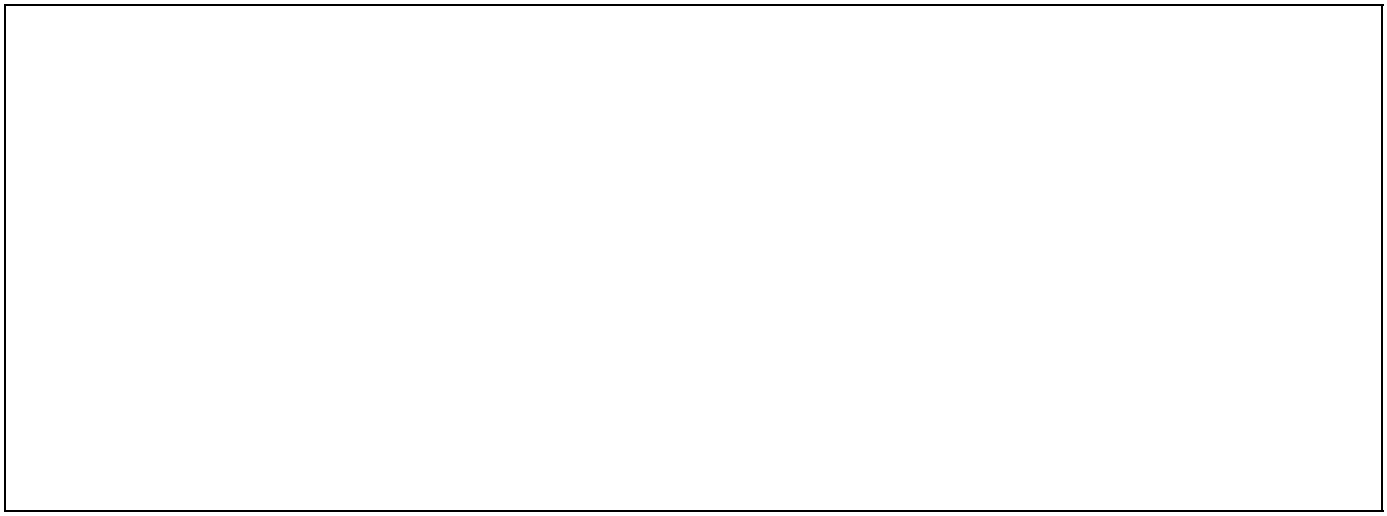
1. They use gridded data and I am using un-gridded data.
2. They â have toâ adjust the data because of Time Of Observation Bias and station moves.

Both claims are easily debunked. The only effect that gridding has is to lower temperatures slightly. The trend of gridded data is almost identical to the trend of un-gridded data.



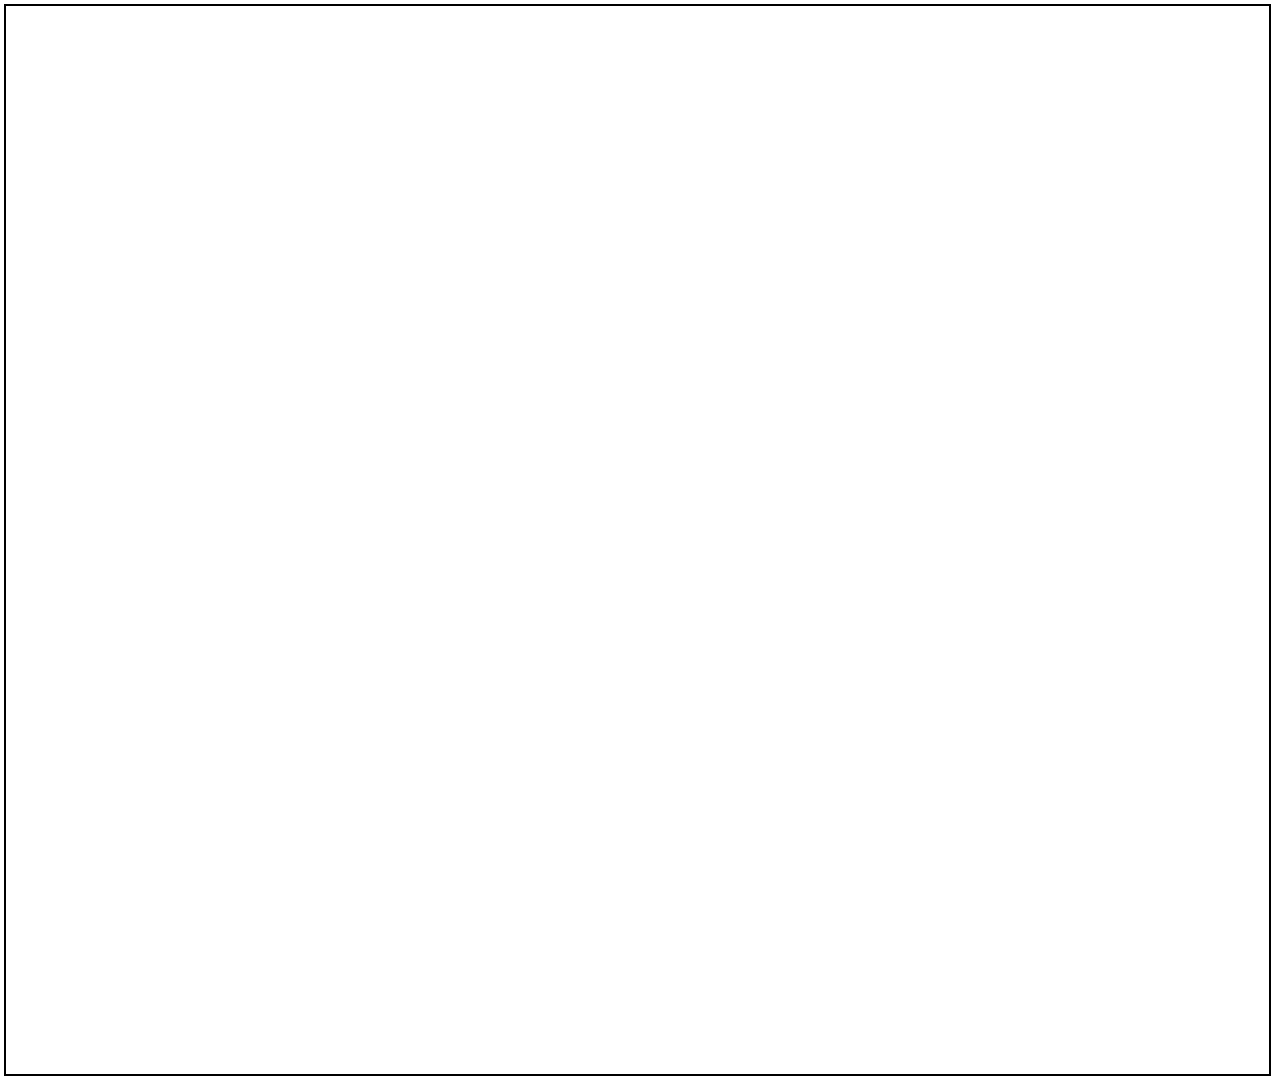
Time of Observation Bias (TOBS) is a real problem, but is very small. TOBS is based on the idea that if you reset a min/max thermometer too close to the afternoon maximum, you will double count warm temperatures (and vice-versa if thermometer is reset in the morning.) Their claim is that during the hot 1930â s most stations reset their thermometers in the afternoon.

This is easy to test by using only the stations which did not reset their thermometers in the afternoon during the 1930â s. The pattern is almost identical to that of all stations. No warming over the past century. Note that the graph below tends to show too much warming due to morning TOBS.



NOAAâ s own documents show that the TOBS adjustment is small (0.3Â°F) and goes flat after 1990.

https://www.ncdc.noaa.gov/img/climate/research/ushcn/ts.ushcn_anom25_diffs_pg.gif



Gavin Schmidt at NASA explains very clearly why the US temperature record does not need to be adjusted.

> You could throw out 50 percent of the station data or more, and youâ d get basically the same answers.
>
> One recent innovation is the set up of a climate reference network alongside the current stations so that they can look for potentially serious issues at the large scale â and they havenâ t found any yet.

NASA â NASA Climatologist Gavin Schmidt Discusses the Surface Temperature Record

NOAA has always known that the US is not warming.

U.S. Data Since 1895 Fail To Show Warming Trend â NYTimes.com

All of the claims in the Climate Central article are bogus. The US is not warming and 2016 was not a hot year in the US. It was a very mild year.

INVESTIGATIVE GROUP

Imran Awan enters federal court Oct. 6, 2017 / One America News | A Pakistani, DWS Laptop And A Phone Booth

Trump Is Right: A â Pakistani Mystery Manâ Has Documents Wasserman Schultz Didnâ t Want Prosecutors To See [VIDEO]

LUKE ROSIAK

Investigative Reporter

586

A key, if under-covered, aspect of the â Pakistani mystery manâ story is that Imran Awan, the Pakistani-born IT aide of former DNC head Debbie Wasserman Schultz, took a laptop with username RepDWS after he was banned from the House computer network for â unauthorized access to data,â and then left it in a phone booth with a letter to prosecutors.

On Friday, President Donald Trump tweeted: â Just heard the Campaign was sued by the Obstructionist Democrats. This can be good news in that we will now counter for the DNC Server that they refused to give to the FBI, the Debbie Wasserman Schultz Servers and Documents held by the Pakistani mystery man and Clinton Emails.â

Trump appears to have accurately identified a key issue with the â Pakistani mystery manâ that comes straight from court documents.

- Lawyers for Pakistani-born Imran Awan currently have a copy of the contents of a laptop with the username RepDWS
- Wasserman Schultz wanted to block prosecutors from seeing what was on it
- Imranâ s lawyers have attempted to set up a situation where it is up to Imran whether prosecutors can see the laptop, claiming â attorney client privilegeâ
- Other analysts say the laptop should be fair game for review

Each twist has increased the intrigue:

- On Feb. 2, 2017, Imran was banned from the House computer network for making â unauthorized accessâ to congressional data, according to the House inspector general
- This happened not long after Wasserman Schultz was fired from the DNC after a cyber breach, yet she refused to fire Imran or even put him on paid leave, claiming that an IT aide didnâ t need to access the internet to do his job
- Wasserman Schultzâ s refusal to fire him meant he had continued physical access to the congressional office buildings, even though all of his other part-time employers fired him and he knew there was an ongoing criminal investigation

- On April 5, 2017, despite not being allowed to connect to the House network, he was in possession of a laptop with the username RepDWS and left it in a phone booth, where it was picked up by police who confiscated it because they recognized that it was left there by a criminal suspect

Let that sink in. A Pakistani IT aide, who had just been fired by all his other employers for being a suspected hacker, left a laptop with the username RepDWS in a phone booth. The laptop was placed next to a letter to prosecutors. What it said is not publicly known. The cache of documents also included copies of Awanâ s ID (which assured that police tied the laptop to a criminal suspect and seized it as evidence rather than returning it as lost property) and a note that said â attorney client privilege,â which put the laptop into legal limbo.

Wasserman Schultzâ s laptop was left in an old phone booth in the Rayburn building like this one. / Photo: DCNF

It is not clear whether the laptop was left out of carelessness or was potentially stolen and possibly planted for police to find.

- It was left in the booth (photo to the right) with highly specific and sensitive materials

- It may have been left there late at night. Building staff called police at 12:21 a.m. to report â an unattended bag in the phone booth on the 2nd floor.â Imranâ s attorney said in court that it was snatched by police while he had stepped out of the phone booth to search for better reception: â What occurred is a backpack from my client was found, he was trying to get a better signal, there was a note that said attorney client privilege and a hard drive.â Gowen later offered TheDCNF a seemingly conflicting account, saying in an email: â He wasnâ t there late at night that is just false.â
- The phone booth is in the Rayburn House Office Building. Wasserman Schultzâ s office is in Longworth, a different building.

What happened next adds to the mystery. On May 17, 2017, Wasserman Schultz used a hearing on the Capitol Policeâ s budget to threaten Police Chief Matthew R. Verderosa with â consequencesâ if he didnâ t return what she characterized as â a memberâ s equipment.â She repeatedly asked whether it was a member or a staffer who was under investigation, saying since it was a memberâ s equipment, police shouldnâ t be able to take it unless the member was under investigation. A member of the Committee on Appropriationsâ Legislative Branch Subcommittee, she has significant influence over the Capitol Policeâ s budget.

WATCH:

Play Video

When that didnâ t work, she escalated, raising the prospect of re-arranging the Capitol Policeâ s entire board to prevent Verderosa from being a voting member, and lamented that not all of the boardâ s members were subject to oversight by her committee. Questioning Verderosaâ s boss, Sergeant-at-Arms Paul Irving, she said: â We have had jurisdictional issues and a challenging time conducting oversight because of the structure of the Capitol Police Board and there â there being a (inaudible) line rather than a direct line to us in terms of being able to hold the board accountable.â

â Iâ d like to know, sergeant, if you think that we should be looking at restructuring the way the board makes decisions so that we can establish a more direct line of accountability â ¦ At the end of the day, [the chief] doesnâ t have a decision-making role,â Wasserman Shultz continued.

She also used campaign funds to hire a lawyer to keep the laptop out of prosecutorsâ hands. And it wasnâ t just any lawyer â it was Bill Pittard, who until months prior had been working as acting general counsel of the House of Representatives, a position with responsibilities that include deciding what to turn over to the executive branch pursuant to legal activity.

In August, after Imranâ s arrest at Dulles airport, Wasserman Schultz changed her tune, saying â This was not my laptop. I have never seen that laptop. I donâ t know whatâ s on the laptop.â She said it was Imranâ s laptop but purchased using taxpayer funds from her office.

She said Imranâ s â due processâ rights had inspired her demeanor during the Capitol Police exchange and the lengths to which she went to shield the laptop. She then said she was no longer seeking to block prosecutors from looking at the laptop.

But by then, Imran had taken up the same quest. In September, prosecutors turned over a copy of the government laptop to Imran, even though he had been banned from the House network because he was viewed as a threat. In October, Imranâ s attorney, Chris Gowen â a former aide to Hillary Clinton â said in court that Imran was invoking attorney-client privilege on the laptop and that they â feel very stronglyâ that the hard drive not be able to be used as evidence.

Prosecutors gave Imran a copy of the laptop found in a phone booth / Federal court records

That seemed to set up a situation where Imran was shielding the laptop that Wasserman Schultz had initially not wanted examined, but where it would be within his power to drop the objection. Thatâ s significant because House sources have said that Democrats arenâ t cooperating with the Awansâ prosecution, and raised questions about whether he has leverage over them.

Former U.S. Attorney Andrew McCarthy questioned that attorney-client privilege applies to the laptop at all, saying, â If I give my lawyer my bank records and ask him if they show evidence of a crime, the bank records do not become [attorney-client] privileged â only his advice to me would be [attorney-client] privileged. And if I stuck a sign on my bank records that said â [attorney-client] privileged documents,â that would not make them [attorney-client] privileged documents.â

Wasserman Schultz has declined to answer questions about the laptop, but given that it was government equipment that, as she noted previously, belongs to her, she might be able to explicitly give permission to prosecutors to look at it. In particular, if Imran wasnâ t authorized to have the laptop, it could be more difficult to invoke privilege on it. (Wasserman Schultzâ s brother is an assistant U.S. attorney at the same office that is handling the case, and he has tweeted dismissively about it.)

Rather than simply swatting down the claim and using what McCarthy said is the universally employed solution to such a dilemma â using a â taint teamâ to go through the laptop and isolate specific files that are communications to Imranâ s lawyer â prosecutors have delayed the court hearing five times, telling the judge repeatedly: â The government has been in discussions with counsel for the defendants regarding complex discovery issues and other legal issues in this case, in particular issues surrounding claims of attorney-client privilege being raised by defendant Imran Awan,â court papers filed Tuesday say.

The next court date is set for May 4, though could be postponed a sixth time.

The IT guys in the House criminal probe could read these members' emails

The Awans and their associates collected more than $5 million in pay from congressional offices, often drawing chief-of-staff level pay though there is reason to believe many didn't even show up. The House's internal probe found they logged into servers they had no affiliation with, used members' usernames, covered their tracks, and persisted even after being fired.
The money is broken down by year, congressional office and family member paid:
Imran, Abid and Jamal Awan and Hina Alvi, Natalia Sova, Rao Abbas, Hasseb Rana, and Muhammad Awan.

A DETAILED EXAMINATION OF THE ROOTS OF DOMESTIC NATIONAL POLITICAL CORRUPTION AND A PLEA FOR ELECTED OFFICIALS TO ACTUALLY DO THEIR JOBS FOR THE AMERICAN PUBLIC

"Dear White House:

For years, we have been asking our government representatives to do something, anything, about this matter. We have gotten no reply, stone-walling, cover-ups and zero effort. That is shameful!

This matter affects every voting citizen because, if we can't get justice in America, then no voter will believe they can either.

A handful of corrupt tech billionaires, and their corrupt Senators, are manipulating the taxaying voter's emotional triggers in order to steer, and money-launder, a trillion U.S. taxpayer dollars into their private bank accounts. Over 300 million American voters have said that the #1 issue with U.S. public policy is â CORRUPTIONâ . This issue is about that corruption.

Their â climateâ , â immigrantsâ , â medical coverageâ issues are fake controversies that they use to scam U.S. Treasury funds that have nothing to do with those â cover issuesâ . They use Google, Facebook, Twitter and the "Main Stream Media", that they own, in order to pump up these fake controversies via fake news. They use "Dark Money" fake charities, "Invisible Bridge" money laundering, crony stock market insider trading and pump-and-dump schemes, revolving door payola, prostitution bribes and other illicit corruption tricks.

We are fighting back and we have already taken out part of the â bad guysâ , and their schemes, using 100% legal tactics and methodologies.

Any member of the public can now accomplish these anti-corruption efforts using espionage journalism, private investigation methods, citizen sleuth websites, class-action lawsuits and personal mass public media distribution. We encourage the public to continue in their efforts to bankrupt every single corrupt party that abuses our Democracy.

In our matter, the U.S. Government, via the Obama White House and the U.S. Department of Energy intentionally defrauded us out of years of work and our life savings! Now they owe us some offsets! We are here to collect.

We could not understand how â public servantsâ could do these kinds of crimes to, and with, our government while stealing our, and millions of other taxpayers, money out of our pockets. We set out to hunt down every single person, group and process that allowed these crimes to happen, document their crimes on permanent public record and then make it nearly impossible for them to ever do this to the public again.

We were tricked by false government promises into spending years of our lives and millions of dollars of our life savings. We, and our peers, were used as the â facadeâ of a â cover storyâ to operate a criminally illicit â Dark Moneyâ operation against the American public. We swear, warrant and certify that we can prove every assertion in a public federal jury trial, Grand Jury hearing and/or televised Congressional hearing, given equitable credible legal resources and security protection.

Senior government officials had full knowledge of, and participated in, this criminal enterprise. They knew, from the start, that the state ad federal funding was covertly hard-wired, in advance, exclusively to their friends. They then attacked us with â Fusion GPSâ , â Lois Lerner Targetingâ , a tabloid character assassination program and worse things. They attacked us because we properly reported the crime to the FBI and Congress. They attacked us because we did "the right thing".

The cover-ups of this crime continue to this day. The failure of the U.S. Government to provide any 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees; in this matter continues to this day. We are not anti-government. We are anti-corruption. In fact, top government officials are helping us in our quest.

For our first project, almost every taxpaying member of the public supported our past efforts and, in fact, provided us with a historically large number of purchasing letters of support which we hand-delivered to Congress. Nobody else was able to do that.

The non-crony major international news outlets, every major industrial publication, most of the non-crony members of the U.S. Congress, and every other non-crony public official confirmed that "Part Two" of our project was a â goâ . After winning Congressional awards and fully delivering on our previous government contracts, federal officials asked us to invest our time and money in the federal government and do even more to create domestic jobs and new domestic technology opportunities.

BUTâ ¦

...it turned out that all of the government â decidersâ worked for and owned stock in our arch competitor. The government officials took the money they had promised to us and gave it to their friends, who are our competitors. They gave it to the least qualified party; who also happened to be their buddy and their campaign financiers. They also gave part of the taxpayer cash to some of their friends who

immediately filed bankruptcy in order to make huge profits off of tax loss filings and stock market valuation â pumpsâ without ever having to create any jobs or ongoing product deliveries.

We were asked to pay bribes and we refused to pay bribes. We refused to be part of the Silicon Valley â Dark Moneyâ crimes. We knew these people. We were invited to their parties and to their most intimate meetings. When we saw that they were running afoul of Democracy using corrupt schemes, illegal insider trading, sextortion, money laundering, tax evasion, bribes, prostitutes, Dark Money conduits, election rigging, internet manipulation and other crimes against the public; we said NO!

Will the U.S. Government provide us with the justice we seek and the Constitution demands?

We have worked with exceptional FBI, GAO, SEC, CFTC, IG and Congressional staff in this matter and we wish to acknowledge their support. Many have seen the recent news head-lines about top-level law enforcement firings of corrupt law enforcement executives. Those were the right moves and we wish to confirm the fact that certain public officials continue to stall our justice. Treasury and GAO say that over 180 million taxpayer dollars have been spent on cover-ups, attacks and DOJ stalls against our request in order to avoid political embarrassment for the Obama Administration. They are no longer around and they SHOULD be embarrassed by their corruption!You can resolve our matter for dramatically less money than you are spending trying to cover it up!

We will not give up and we will fight to the end. Our Task Force of crime victims, journalists, bloggers, mass data scientists, intelligence specialists and voters is now using 100% legal means to terminate every single crook in this case until we get justice. We demand a resolution where our damages are paid for and the whistle-blower and informant fees we are owed are delivered.

The news articles and Congressional reports prove that this Silicon Valley Cartel regularly engages in crimes, sex abuse, illicit acts, a sociopath culture and law-breaking. Fact-based forensic data has now been published representing the work of tens of thousands of renown, award-winning journalists and researchers. They prove that what we are saying really did happen and it really is a criminal abuse of Democracy! The ICIJ, Snowden, Assange and Binney leaks prove the depth of the crimes.Hundreds of thousands of documents have now been placed on public record in the federal courts and P2P archives and those documents prove who engaged in these crimes and how they did it. The 60 Minutes episodes, The feature films: Dark Money; Too Big To Fail; Inside Job and the tens of thousands of broadcast news segments about this corruption all prove our assertions. The evidence is indisputable!

It is time for the public to take a stand against this kind of organized crime that is operated by the very people that are meant to serve the public!

It is time for The U.S. Government and The U.S. Department of Energy to deliver the 1.) apology, 2.) damages offset, 3.) justice, 4.) whistle-blower and informant fees that are required."

QUESTIONS?

Q. Where is your proof?

A. Here is the proof:

- http://www.DC-crimes.com
- http://www.slush-fund.com
- Federal court records on file at http://www.pacer.gov
- FBI 302 and case evidence files submitted by our peers
- Congressional Ethics Committee reports on public record
- GAO investigation reports we helped produce
- and thousands more web repositories we are happy to share...

As a matter of fact, we have submitted over a million pages of evidence produced by the best, and brightest, FBI agents, criminal investigators, forensic researchers, investigative reporters, insider whistle-blowers and former agency employees. In fact, our complaint evidence sets comprise over 6 TERRABYTES of data. That is quite a bit of hard evidence. Additionally, there has been very little credible push-back from any major entities, aside from those charged with the crimes. In other words, every well-known entity who was not a crook involved in these embezzlements has verified our charges.

Q. Why don't we hear more about this in "the news"?

A. Because print news media has gone out of business and most of the online news, especially Google, YouTube, Facebook, Twitter, Huffpo are owned or invested in by the very people who are charged with the political bribery, insider trading, election manipulation and corruption. They order their news outlets, which now are the majority of news publishers in the world, to NOT covernews about these crimes because it will embarrass them and cause the FBI and Congress to look at them more closely. We are not going to let this be covered-up.

Q. Why don't you just sue all of the people and agencies who did these things to you?

A**.** The attacks on us were designed to eliminate our finances so we could not afford law firms. If we could sue each one of the bad guys and afford the same lawyers as the bad guys, we would win every case. Each case costs over two million dollars in legal expenses. There are many cases. Our legal rights were blockaded by carefully crafted rights elimination tactics. In America, you can only get a lawyer for free if you kill the opposition bad guy first. In other words you only get a free lawyer if you commit a murder.

Q. Isn't it the job of the FBI and the DOJ to help citizens like you with injustices like this?

A. As the world saw with the recent firings of the top staff at the FBI and DOJ; top law enforcement bosses are often more focused on cover-ups of crimes than the prosecution of crimes. We have helped get hundreds of famous political people fired for corruption but that does not fully solve our issue.

Q. What are you asking for?

A. Justice, a written apology, to get our damages paid for, the firing of every corrupt official involved and delivery of the whistle-blower fees we were promised.

Q. Who have you contacted to try to get this resolved?

A. Using certified mail, receipt-based FEDEX and time-stamped and tracked electronic communications we have contacted every law enforcement agency, regulatory agency, their heads of office and every elected

representative through every known official channel and back-channel for nearly a decade. We have only encountered finger-pointing to some other agency and an official "not my circus, not my monkey's" attitude of "just ignore them, maybe they will go away".

Q. Who else can we contact to confirm that these crimes and stock market corruptions took place and are still taking place.

A. These groups:

- http://wearethenewmedia.com/
- https://www.icij.org/
- https://www.transparency.org/
- https://www.judicialwatch.org
- https://corruption123.com
- https://wikileaks.org
- https://causeofaction.org
- http://globalinitiative.net/

And over 400 other organizations we can introduce you to...

Q. Are you associated with any political party?

A. No. We are neither Democrats nor Republicans. We are domestic American taxpayers who were raped by our own elected representatives who were profiteering off of these crimes. We represent the American citizens!

SO WHY ARE WE NOT GETTING ANY RESPONSE, ANY JUSTICE AND ANY OFFSETS FROM THE VERY PEOPLE WE PAY TO PROTECT AND SERVE US?

WE DEMAND THAT THESE CRIMINALS BE ARRESTED OR ELSE WE WILL PERFORM CITIZEN ARRESTS ON EACH AND EVERY ONE OF THEM!

A Letter To FBI Director Christopher Wray About An Interstate Crime!

By Edward S.

Senators Nancy Pelosi, Dianne Feinstein, Harry Reid, and other public officials, took public salaries as their payment to work for all of the public in their districts. This is a fact.

Those Senators then made inside deals with Elon Musk, Eric Schmidt, and Mark Zuckerberg to exclusively give, those three guys, billions of dollars of the public tax money and to cut out all of those three guys competitors in their districts. That is a fact, it provided â unjust gainâ to those illicit parties and it is a crime.

On top of that, those Senators set-up construction companies, leasing companies, HR companies and other supply services which were contracted by Elon Musk, Eric Schmidt, and Mark Zuckerberg. That is a fact, it provided â unjust gainâ to those illicit parties and it is a crime.

On top of all of those things, those Senators were informed by the staff of Elon Musk, Eric Schmidt, and Mark Zuckerberg as to which stock market funds to buy that Elon Musk, Eric Schmidt, and Mark Zuckerberg were manipulating for unjust gain. That is a fact, it provided â unjust gainâ to those illicit parties and it is a crime.

While those Senators were accepting these â layered bribesâ and sabotaging the competitors of Elon Musk, Eric Schmidt, and Mark Zuckerberg, those Senators were getting paid off in surreptitious manners by Elon Musk, Eric Schmidt, Mark Zuckerberg and their staff. That is a fact, it provided â unjust gainâ to those illicit parties and it is a crime.

These Senators did these crimes with the train contracts in California, The Post Office leases, the Department of Energy Cleantech â green cashâ , The CIA and NSA contracts with Silicon Valley and many other scams. That is a fact, it provided â unjust gainâ to those illicit parties and it is a crime.

The FBI has been provided with millions of pages of evidence that proves these charges to be fact. There are over 100,000 news articles, by respected reporters, which make these same assertions. That these Senators engaged in these crimes is indisputable.

When can the FBI arrest Senators Nancy Pelosi, Dianne Feinstein, Harry Reid and Elon Musk, Eric Schmidt and Mark Zuckerberg for these abuses of power and abuses of the law?

Hundreds of millions of voters would be very excited to see these arrests happen sooner than later.

Thank you.

A MESSAGE TO OUR POLITICAL REPRESENTATIVE:

We witnessed some some people stealing money from both; our company and the U.S. Government State and Federal Treasuries. We reported it to the cops, the regulators and the IGâ s. The bad guys then began hunting us down and attacking us in reprisal "for the rest of our lives" per their threats. Their ongoing retribution vendettas and cover-ups now require more extreme counter-measures.

We did â the right thingâ . We â followed proceduresâ . We went through the â proper channelsâ first. You have provided an excellent example of how the â rulesâ that you tell the public to engage in are worthless and should be ignored.

We have been reporting this to your office for nearly a decade and you have done nothing to provide us with our justice and everything to enact vendettas, reprisals, revenge and cover-ups.

All we have gotten from you is an amazing collection of form letters and generic finger-pointing â not our jurisdictionâ types of excuses for not doing your jobs.

We have joined with the 300 million plus voters who also hate corruption to work together on resolving the issue of your utter failure to perform for us: THE TAXPAYERS!

Now we will use crowd-sourced CIA-Class investigation tactics to expose every prostitute, rent boy, tax evasion, mistress, expense fraud, bribe, revolving door payola, rigged contract, stock market insider trading scam, shell company, covert family trust, fraudulent invoice and other illicit deed of every person in your office.

You will be hunted like dogs using crowd-sourced massive global public participation and social media acceleration programs.

You can act, TODAY, to resolve our case, offset the damages you caused and fix this or you can suffer from the results of your downfall. We got the heads of the FBI, DOJ, DOE, FCC and other agencies fired for corruption. Your failure to act has left you with only one option: Pay Your Bills or feel the full wrath of the public in every election, every investigation and every public event for the rest of YOUR life!

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court **ruled** that Cause of Action, where I am executive director, can **proceed with a lawsuit** against the Department of Energy. Weâ re suing the federal government for the blatant political favoritism in its $25 billion â Advanced Technology Vehicle Manufacturing Loan Program.â

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: **Tesla**and **Fisker**.

Both companiesâ political connections run deep, especially Teslaâ s. The companyâ s founder, Elon Musk, was a **max donor** for President Obama. One of its board members, **Steven Westly**, was appointed to a Department of Energy **advisory board**. And another Obama bundler, Tesla investor and adviser Steven Spinner, **secured employment** in the departmentâ s Loan Program Officeâ the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since **gone bankrupt**, **was backed** by a San Francisco **venture capital firm** whose senior partners **donated millions** to the 2008 Obama campaign and other Democrat causes. **One partner**, **John**

Doerr, parlayed his support into a seat on the Presidentâ s Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

Thereâ s no shortage of examples. The departmentâ s leadersâ including then-Secretary of Energy Steven Chuâ repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). **One emails reads**, â DOE has made a political commitmentâ to approve a companyâ s loan. Another says the â pressure is on rea lheavyâ from none other than Vice President Joe Biden. And still **another shows** an employee asking, â whatâ s another billion anyhow?â

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companiesâ applications faster. The government **gave them extraordinary access** to its staff and facilitiesâ even to the point of having government employees personally walk them through the loan application and approval process.The department ignored its own lending rules in order to approve the companiesâ loans. And it **renegotiated the terms of some loans** after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fiskerâ s cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them bothâ and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPVâ s application because **its vehicle was powered by hydrogen**. It was an electric SUV. It also raised objections that it didnâ t raise with other companies whose

applications were approved. For instance: The bureaucracy **criticized** the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, **XPV has gone out of business**, unable to compete against its politically connectedâ and subsidizedâ rivals.

This casts the Department of Energyâ s loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S.taxpayer.

Sadly, similar examples are widespread in Washington. Thatâ s no surprise considering the feds spend **roughly $100 billion a year** in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, **over two-thirds of likely voters** think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. Theyâ re right.

This points to a simple conclusion: Politicians and bureaucrats shouldnâ t use the publicâ s money to pad private companiesâ bottom lines. As the Department of Energyâ s green-vehicle loan program shows, the capacity for corruption is immenseâ and inevitable.

HOW WE DID IT

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes,

black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns

- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers

- Every flight manifest they appeared on

- Every bank account they have ever held

- Every lawsuit, divorce record and police record they have ever appeared in

- Every trust fund they or their family holds

- Every shell corporation they, or their family holds

- Every person named in the Epstein Pedo book: https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies

- Every item in the Swiss Leaks that cross connects to their holdings

- Every item in the Panama Papers Leaks that cross connects to their holdings

- Every item in the WikiLeaks that cross connects to their holdings

- Every item in the Snowden Leaks that cross connects to their holdings

- Every sex trafficking incident that connects to each of them alone, and in groups

- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo,Black Cube, Fusion GPS,

Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, Buzzfeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.

- Every item in the Quest Leaks that cross connects to their holdings

- Every tactical deployment, by a campaign financier, of the tactics listed in this manual: https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf

- Every sex service that their credit card payments ever connect too

- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the American public policy system.

It all goes into publicly shared, open-source, 100% legal, public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

We have demanded their arrests, indictments, exposures and bankruptcies.

THE AWFUL TRUTH ABOUT GOOGLE

Why is everyone trying to put Google out of business? Because Google is a sick sociopath company!

...and because Google, and itâ s Cartel (Alphabet, Youtube, and hundreds of other facades) are a criminal organization engaged in felony-class crimes. Googleâ s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axciom scams and other illicit things they get up to; one just has to wonder.

Some of the largest political bribes in American or European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Google and Youtube are based on technology and business models that Google and YouTube stole from small inventors who had launched other companies that were up and operating before YouTube or Google even existed as business operations.

Google holds the record for the largest number of corporate sex scandals, abuses and sex trafficking charges.

There are only two kinds of people that work at Google: 1.) Cult indoctrinated naive kids with odd sexual quirks and 2.) divisive managers and executives who seek to exploit those eco-chambered employees for nefarious political and stock market manipulation purposes under the Scientology-like guise of "doing good things", when, in fact, they are engaged in horrific crimes against society.

Google has hired almost every technology law firm in order to "conflict them out" from ever working to sue Google. If Google rapes you, robs your patents or does anything awful, you won't be able to find a lawyer to help you.

Most Google executives in control of Google have been indoctrinated by family dynasties to believe that any crime is justified by a bigger cause. Most of those executives are men. The few women in control of departments are figure-heads.

Google bosses attend the same parties and business meetings in which they collude, co-lobby, rig markets and make anti-trust violating plans together.

Google is a private government with more money and power than most smaller nations. Google has more lobbyists bribing more politicians than any other company in America.

Jared Cohen and fashion show-horse Yasmin Green at Google had the job of over-throwing countries in the Middle East. They openly bragged about it. (https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/)

People that work at Google get paid $260,000.00+ per year to lie, spy, manipulate politics, bribe politicians and engage in other crimes. For that kind of money, a person will doing ANYTHING and rationalize it as "part of the higher cause".

The Project X investigation team is publicly quoted as stating: ***"...give the same number of lawyers as Google has, with the same level of skills and experience, the same discovery budget, legal expenses budget and expert witness budget, we <u>ABSOLUTELY GUARANTEE</u> that we can put Google staff and investors in federal prison and close Google, in bankruptcy...the Google Cartel has engaged in that much criminal***

activity..."

"Google is the largest financier of the Obama political campaign and exceeded FEC campaign spending limits by tens of billions of dollars. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google is the largest staffing source of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The largest number of laws and policy decisions, benefiting a single company and it's investors, went to: Google. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and it's investor's are the single largest beneficiary of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The Obama Administration only won the White House because Google and Facebook engaged in the largest digital media and search engine manipulation in human history. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and it's investors, during the Obama Administration, had most of their competitors denied funding, grants, contracts and tax waivers while Google's investors GOT funding. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing and prove that Google coordinated anti-trust violations with senior Obama Administration White House staff...."

Google operates it's staffing like a Scientology cult. They control their employees lives, information, transportation, free time, entertainment and social life. A Google life is a glass-bubble of echo-chamber extremist, hyper-sex-kink, reinforcement.

Project Veritas has been lifting back the veil covering big tech companies and their nefarious activities following the 2016 election. They tried to play left-leaning-but-mostly-fair before the 2016 election, believing in their hearts that Hillary Clinton would be President without their concerted meddling. That didnâ t work out for them, so they are trying to prevent â another Trump situationâ in 2020 by unabashedly purging, silencing, and censoring conservatives on platforms like Facebook, Google, Twitter, Pinterest, Instagram, and YouTube.

(Article by Michio Hasai republished from NOQReport.com)

The answers delivered today before Congress in response to questions by Representative Dan Crenshaw werenâ t the standard denials. They were politically manipulative answers designed to make it known theyâ re doing what weâ ve said they were doing all along, but they feel justified in doing it because â hate speechâ must be stopped at all costs. Of course, what constitutes hate speech to the social justice warriors in big tech invariably circles around conservative thought. There is no form of hate speech short of physical threats that can be attributed to progressives, at least not in the minds of the people who control big tech. If conservatives are aggressive, theyâ re delivering hate speech. If progressives are aggressive, theyâ re just being truthful. Thatâ s what big tech thinks.

This is the worst-case scenario for conservatives. Before, we could call them liars and cheats. Now, we have to fight them on an ideological level, and while we have the truth on our side, they have the technology. They have the eyeballs. They control what people see and donâ t see. And as such, they can no longer be trusted to deliver anything even remotely close to fair and balanced. Theyâ re unhinged from reality, but instead of coming back to reality once exposed, theyâ re building a new reality around their ideologies.

Russia may arrest Google employees for running Google as a manipulative service containing hidden political insertions affecting the human subconscious

- **Russian government will now arrest those who try to 'control minds' via mass web manipulation**
- **Google was created to push liberal leftist political messages on the subconscious**
- **Research exposes Google as insidious mind-control political shill**
- **No matter your political persuasion, it is unfair and manipulative for Google to control minds ANY political purposes**

By Sophie Tanno For Mailonline

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 in an article.

Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the alleged torture of an academic.

Police in Russia's republic of Sakha charged Romanov after they suspected him of trying to tap into the readers' sub-conscience, Russian newspaper Kommersant reported.

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 (pictured) in an article

Romanov's editor told the publication: 'This is a story about how anyone can be squashed by the government machine.

'It's also about how Big Brother is watching, reading all comments on online forums.'

This is understood to be the first time a journalist will be tried under Russia's new legislation punishing those who are perceived to have published information 'containing hidden insertions affecting the human subconscious. '

The case has been forwarded to a Yakutsk city court.

Google likely â thoroughly infiltratedâ by Chinese govt., expert warns

alex stamos, big tech, china, cybersecurity, facebook, google, internet, peter thiel, richard clarke, russia

July 19, 2019 (LifeSiteNews) â Tech billionaire Peter Thiel recently called on the federal government to investigate Google for potential infiltration by the Chinese government, and now security experts are saying his concerns are well-founded.

Thiel, one of President Donald Trumpâ s most high-profile gay supporters and an avowed critic of Silicon Valley, made the remarks at last weekendâ s National Conservatism Conference, *Axios* reports. He called on the FBI and CIA to ask Google, â how many foreign intelligence agencies have infiltrated your Manhattan Project for AIâ ; â does Google's senior management consider itself to have been thoroughly infiltrated by Chinese intelligenceâ ; and whether this alleged infiltration is why the company works with Chinaâ s military but not Americaâ s.

â I'm not sure quite how to put this, I would like them to be asked [these questions] in a not excessively gentle manner,â Thiel added.

Alex Stamos, a researcher with the Stanford Internet Observatory and former chief security officer at Facebook, said Tuesday it was â completely reasonableâ to assume that both the Chinese and Russian governments have, in some form or another, already infiltrated not only Google but every top tech company:

> Note that â subvertedâ is very different than planting professional spies in â The Americansâ style. Each of the big companies employs thousands of employees with family members under the control of these countries, and a gov request might be simple and seem borderline reasonable.
>
> â Alex Stamos (@alexstamos) July 16, 2019
>
> I expect that there will be a major combined HUMINT/InfoSec attack against a major tech company revealed in the next couple of years, which will trigger the same awakening that Project Aurora did in 2009.
>
> â Alex Stamos (@alexstamos) July 16, 2019
>
> BTW, I donâ t blame the foreign-born employees at all. They are just trying to make a good living doing interesting work. If MSS had *my* Mom I would do whatever they asked.
>
> â Alex Stamos (@alexstamos) July 16, 2019

Stamos predicted that the â next couple of yearsâ would see the revelation of a â major combined HUMINT/InfoSec [human intelligence/information security] attack against a major tech company.â

Heâ s not the only one who advises that Thielâ s warnings be taken seriously. Richard Clarke, a former counterterrorism and cybersecurity advisor to both Democrat and Republican presidents, told CNBC Wednesday there was cause for concern.

â Hereâ s what I think is true: Google refused to work for the Pentagon on artificial intelligence,â Clarke said. â If you turn around and you work on artificial intelligence in China, and you donâ t really know what theyâ re going to do with that, I think thereâ s an issue.â

The internet giant has denied working with the Chinese military, but opened an artificial intelligence center in Shanghai in 2017 despite the Communist regimeâ s strict speech and internet controls. On Tuesday, Google executive Karan Bhatia testified to the Senate Judiciary Committee that the company has terminated a controversial censored search engine it had been working on for China.

Clarke added that there was no meaningful distinction between Google working with Chinese companies and the Chinese government, given the level of state control in the country.

The specter of foreign influence on the tech industry further intensifies its ongoing controversies regarding political bias and censorship and violations of user privacy. Responding to Thielâ s original comments, President Trump said Tuesday that his administration will â take a lookâ at the matter.

Is Taylor Swift The True Sign Of the End Times

THE SILICON VALLEY COLLUSION CARTEL

- The perpetrators operate a **massive and abusive sex cult**. The Sandhill Road Venture Capital offices, located between Highway 280 to Santa Cruz Avenue in Menlo Park, California, house the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. Their sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals,The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, **and thousands of other cases and federal divorce court filings.** This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over $30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members.

- An inordinate number of the members are closeted homosexuals who seek to use their media monopolies and massive lobbyist ownership's to promote child sex and child sex change consideration. Hence the massive, sudden, promotion of those issues in all of their media since they took power in 2008. The press has widely reported on underage boy sex clubs and the payment to parents for the blood of young boys by these oligarchs. A large number of tech VC's and senior executives are covert gay activists who hire women to act as their "beards". Their elitist Yale and Stanford fraternity house upbringings promoted "bromances", "rape culture" and a *don't-worry-daddy-will-fix-it* mentality.

- The AngelGate Conspiracy (https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly meet, conspire, collude and racketeer, in full view of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution. The perpetrators operate in extreme violation of federal RICO laws yet no DOJ or SEC

RICO case has been filed against them by federal officials.

- The perpetrators have used their exclusive monopolized cash flow of taxpayer financed grants, contracts and internet infrastructure to purchase the majority of the political lobby firms and technology law firms in America. This gives them an illegal, illicit and unfair ability to control: 1.) which laws are made or stalled, 2.) who gets government funded or blocked, 3.) Who gets tax breaks, tax credits and tax waivers and who does not, 4.) Who gets state-sponsored reprisal targeting or benefits blockades, 5.) Who gets revolving door payola jobs at their companies, 6.) Who gets PAC money bribes, 7.) and many other effects that are legally defined as "racketeering".

- The perpetrators conspire, coordinate and manually manipulate their digital media mass broadcasts in order to collude in a manner that injects coordinated subliminal messages, that no regular voting citizen can detect, into their media in order to manipulate co-aligned political and ideological messages that will promote their ideological beliefs and promote public and policy actions which will provide profits to their stock market holdings which they co-own. Many of those stock market holders, (ie: in Tesla, Google, Abound, Solyndra, rare earth metals, Disney, etc) were coordinated between all of the perpetrators by their partners at JP Morgan, Bear Stearns, Goldman Sachs in such a manner as to collude to rig markets via insider trading ownership's that U.S. Senators, and their families, shared.

- The perpetrators have used their subliminal media control technologies to manipulate every national election since 2008.

- The perpetrators use a contrived Scientology-like hiring and HR management system which seeks out the most vulnerable, naive, easily influenced, and damaged people to fill their employee coffers with, in order to do their bidding. Their employees are nothing less than tools, sheep and fodder for their media manipulations, sexual abuses and ego-mania.

- These people are absolutely evil, sick and sociopath-like individuals who operate with impunity because they are never arrested. They thumb their noses at the law and anyone who does not agree with them. They create fake political issues to milk the emotions of the public in order to gain power.

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

THE UNITED STATES DEPARTMENT OF ENERGY

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a $25 billion direct loan program funded by Congress in fall 2008 under the guise of *"providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. "* The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, ***one of the most criminally corrupt failures in American history***.. It was only a "success" as one of the biggest political slush-funds ever created!

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over $30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court **ruled** that Cause of Action, where I am executive director, can **proceed with a lawsuit** against the Department of Energy. Weâ re suing the federal government for the blatant political favoritism in its $25 billion â Advanced Technology Vehicle Manufacturing Loan Program.â

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small

number were approved. Among the lucky few were two electric car manufacturers: **Tesla**and **Fisker**.

Both companiesâ€™ political connections run deep, especially Teslaâ€™s. The companyâ€™s founder, Elon Musk, was a **max donor** for President Obama. One of its board members, **Steven Westly**, was appointed to a Department of Energy **advisory board**. And another Obama bundler, Tesla investor and adviser Steven Spinner, **secured employment** in the departmentâ€™s Loan Program Officeâ€™ the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since **gone bankrupt**, **was backed** by a San Francisco **venture capital firm** whose senior partners **donated millions** to the 2008 Obama campaign and other Democrat causes. **One partner**, **John Doerr**, parlayed his support into a seat on the Presidentâ€™s Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

Thereâ€™s no shortage of examples. The departmentâ€™s leadersâ€™ including then-Secretary of Energy Steven Chuâ€™ repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). **One emails reads**, â€™ DOE has made a political commitmentâ€™ to approve a companyâ€™s loan. Another says the â€™ pressure is on rea lheavyâ€™ from none other than Vice President Joe Biden. And still **another shows** an employee asking, â€™ whatâ€™s another billion anyhow?â€™

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companiesâ€™ applications faster. The government **gave them extraordinary access** to its staff and facilitiesâ€™ even to the point of having government employees personally walk them through the loan application and approval process.The department ignored its own lending rules in order to approve the companiesâ€™ loans. And it **renegotiated the terms of some loans** after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fiskerâ s cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them bothâ and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPVâ s application because **its vehicle was powered by hydrogen**. It was an electric SUV. It also raised objections that it didnâ t raise with other companies whose applications were approved. For instance: The bureaucracy **criticized** the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, **XPV has gone out of business**, unable to compete against its politically connectedâ and subsidizedâ rivals.

This casts the Department of Energyâ s loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S.taxpayer.

Sadly, similar examples are widespread in Washington. Thatâ s no surprise considering the feds spend **roughly $100 billion a year** in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, **over two-thirds of likely voters** think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. Theyâ re right.

This points to a simple conclusion: Politicians and bureaucrats shouldnâ t use the publicâ s money to pad private companiesâ bottom lines. As the Department of Energyâ s green-vehicle loan program shows, the capacity for corruption is immenseâ and

inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about *"saving the environment"*; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the ***facade group: "The National Venture Capital Association"***, DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's ***two main manipulation tricks*** are: 1.) **STONE-WALLING** - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) **INTERPRETIVE LYING** - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was ***DEFRAUDED, LIED TO, STONE-WALLED*** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanual), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A "Silicon Valley Mafia" (AKA - "The PayPal Mafia") exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4-way conflict of interest in which Google staffed the largest contingent of Obama White House staff.

- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies. If one wants to look at dirty Russian collusion, they need look no further than Steven Chu, the architect of the failed Iran Nuclear deal and corrupt Uranium One deal. Steven Chu and Rahm Emanual ordered DOE's Sandia Livermore Labs and Argonne Labs (who they were both connected to) to manipulate Applicant data in order to only favor camapign financiers companies.

- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.

- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.

- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.

- The Obama Administration promised an exclusive on Afghanistan mining deals to Frank Guistra and the Silicon Valley oligarchs for lithium, indium, cobalt and rare-earth metals mining after USAID pitched (http://2.bp.blogspot.com/_VyTCyizqrHs/TBaffwKixYI/AAAAAAAAH74/Wee8LTQfo3k/s1600/afghanminerals.jpg) manipulated reports from McKinsey Consulting saying that *"Afghanistan was the Saudi Arabia of lithium and had trillions of dollars of lithium"* to dig up. It turned out to be a lie to get oligarchs to support Obama's Afghan invasion. (http://pubs.usgs.gov/fs/2007/3063/pdf-page.jpg) DOE helped sell this lie because the Russians had already scoured Afghanistan and found it to be fairly worthless as a mining potential. Elon

Musk bought into this for his battery monopoly. This is why Steven Chu gave so much money to Russians at Ener1 and Severstal. DOE staff were fully aware of this. (http://www.mining.com/1-trillion-motherlode-of-lithium-and-gold-discovered-in-afghanistan/)

- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk share an apartment and financial programs.

- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.

- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.

- The DOE ATVM and LGP programs resulted in: ***THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA!*** Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need, and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. **TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL! After realizing this, Applicants and Congressional insiders forced ALL of the kick-back funded companies into bankruptcy as payback for the corruption and abuse of their resources. Said one Senator: *"If they want bankruptcies, we will give them bankruptcies..."***

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- As shown by this letter:
https://news.wttw.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20
...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "***The Cleantech Crash***" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a ***"first-come, first served"*** basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a

permanent black-list.

- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

GOOGLE_ATTACKS

ATTACK PROCESS USED BY GOOGLE AND GIZMODO

(Above, From tens of thousands of internal Google documents leaked)

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have ***NEVER*** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State"

cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'

by Tyler Durden

In his first pair of interviews since being sworn in, Attorney General Barr told Fox News and WSJ that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation he has tasked

John Durham, the US Attorney from Connecticut, with leading - because Americans need to know whether the government **"put a thumb on the scale"** to try and undermine President Trump both during the campaign and during the first two years of his term, just like **"we need to ensure that foreign actors don't influence the outcome of our elections."**

Separately, he told WSJ that **"government power was used to spy on American citizens**...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, **though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision,** in the summer of 2016, to open a counterintelligence investigation. At this point, **Durham's review isn't a criminal investigation,** and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

> My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!
>
> â Donald J. Trump (@realDonaldTrump) May 17, 2019

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

Watch the Fox interview below:

Politics

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

Thereâ ve been a couple articles in the past few weeks pointing to President Obama as the â clean tech investor in chiefâ and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energyâ s (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didnâ t have a dedicated person in Washington â in some circles they call them lobbyists â maneuvering grant and loan programs, you werenâ t able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between $50 billion and $80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obamaâ s Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleinerâ s investments have had some successful government bids, most notably the $529 million loan to Kleiner portfolio company Fisker Automotive out of the DOEâ s highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the $25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Ventureâ s LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOEâ s loan guarantee and ATVM loan programs. About a third of the DOEâ s loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasnâ t a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked â excluding some potential applicants unnecessarily.â

Thereâ s nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gatesâ calls for boosting federal government investing to $16 billion per year into energy innovation. All Iâ m saying is that this level of influence should be watched.

Evidence that proves these assertions can be viewed at *http://www.londonworldwide.com*

Another Tesla car catches fire in Hong Kong parking lot: media - ALL TESLA BATTERIES EXPECTED TO HAVE CHEMISTRY DEGRADE AND EXPLODE AS DOE WAS WARNED IN WRITING BY BERNIE TSE, BRIGHT AND XP

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the cityâ s San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

Firemen took 45 minutes to douse the fire.

The vehicle was a Tesla Model S 85 KWH dual power version, added the paper, which gave no explanation of what might have caused the blaze.

Responding to a request from Reuters, Tesla declined to comment. Reuters was not able to contact the vehicle owner or obtain CCTV footage of the incident.

Hong Kongâ s fire services department told Reuters a vehicle caught fire on Sunday, but gave no details, such as the make of the car. Authorities are investigating the cause.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

The automaker has said its EVs are about 10 times less likely to experience a fire than petrol-powered cars.

There have been at least 14 instances of Tesla cars catching fire since 2013, most of them after a crash.

Reporting by Donny Kwok and Shellin Li in Hong Kong, Yilei Sun in Shanghai; Editing by James Pomfret and Clarence Fernandez. Our Standards:The Thomson Reuters Trust Principles.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen

when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses

massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver

You have probably seen the many issues with Elon Musk And Tesla Motors including:

"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"
"His is not faithful to his girlfriends"

"The workers that build his batteries die or sicken from toxic poisoning"
"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"
"He is addicted to drugs and booze"
"He has sociopath mental issues"
"He is a narcissist"
"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."
"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"
"His partner: Steve Jurvetson, has been charged with sex and corruption issues"
"He arranged government kick-backs with the White House"
"He is the world's biggest government mooch"
"He is a member of the Palo Alto Mafia"
"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"
"More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"
"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"
"His so-called 'foundation" is just a payola and tax evasion scam for his family"
"His batteries are the most dangerous use of lithium ion storage ever conceived"
"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"
"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"
"His SpaceX is nothing more than a domestic spy satellite company"
"Musk's brain chip company tortures small animals in bad science experiments"
"His father screwed his daughter and got her pregnant"
"Dianne Feinstein and her family own Musk interests"
"You can't put out the fires when his batteries explode"
"The fumes from his thermal battery vapors give you cancer, lung and brain damage"

"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."
etc.....

You may have run across Muskâ s self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or live TV debates. Musk will do anything to keep this information from getting out butâ ¦ it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings

with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â child labor electric car batteriesâ .

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his â trophy wifeâ Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance â Butt buddyâ . They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VCâ s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk â boyfriendâ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: â Muskâ , â Teslaâ or â Tesla Fireâ . They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no â Tesla Fan Boysâ . All of the fanatic Tesla comments on the internet are Muskâ s, Thielâ s, Jurvetsonâ s and Draperâ s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a â Tesla Fan Boyâ on blogs.

The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why arenâ t all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Letâ s take a look at the â lithiumâ in Muskâ s horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly â filling up with toxic smokeâ as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electrnics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN

and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â reportâ from USAID that said there was â A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are

partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via â in-kindâ services.

ELON MUSK'S PAID-FOR FAKE NEWS MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times,

Tesla's out-of-control sudden-acceleration surge defects
and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia

University.â

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls â SPYGATEâ .

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â)

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create â foreign intelligence,â John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obamaâ s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into

uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can

build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future

employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!!

- Second former employee of controversial data firm to be questioned by special counselâ s inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica â which collapsed after the Observer revealed details of its misuse of Facebook data â confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the companyâ s activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign â received donations or paid for services from Cambridge Analytica â ¦beyond initial scoping workâ .

Damian Collins, chairman of parliamentâ s inquiry into fake news, said it was â no surpriseâ that Kaiser was under scrutiny by Mueller because â her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banksâ .

He said it was now vital Britain had its own inquiry into foreign interference: â We should not be leaving this to the Americans.â

Tom Watson, the deputy leader of the Labour party, echoed Collinsâ s statement, saying: â This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.â

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counselâ s inquiry because of work done with Paul Manafort, Trumpâ s campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Muellerâ s investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clintonâ s presidential campaign â which indictments from Muellerâ s team say were obtained by Russian military intelligence â to use in Donald Trumpâ s campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: â She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin.â

Her legal representatives later wrote to the paper to say that the allegations, including that she had â channelledâ donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 â long before she worked at Cambridge Analytica â and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her â about how he saw the worldâ . He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had â unsettlingâ parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeriaâ s emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "Iâ m Being â Targetedâ For Saying the Media is â Mostly Liberal"
by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as â mostly liberal.â

Logan told Breitbart podcaster Mike Ritland the remarks made on his show â which drew widespread attention online â amounted to â professional suicide.â

Defending her remarks on Hannityâ s show, Logan said that as the result of her speaking out about how the media is â mostly liberalâ she has been targeted because she is an independent voice.

â Any journalists who are not beating the same drum and giving the same talking points,â she insisted â pay the priceâ for not going along with the liberal crowd.

She also called out her targeters by name.

â I know theyâ re going to come after me,â she told Hannity. â Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter.â

She added: â They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They donâ t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? Iâ m not owned by the left or the right.â

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of â weightâ in most news organizations on â one side of the political spectrum.â

â The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So thatâ s just a fact, right?â she told Ritland.

She also trashed reporting based on single, anonymous government sources.

â Thatâ s not journalism, thatâ s horseshit,â Logan stressed. â Responsibility for fake news begins with us. We bear some responsibility for that, and weâ re not taking ownership of that and addressing it. We just want to blame it all on somebody else.â

==========

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Groupâ s intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israelâ s secret services and described themselves as â private Mossads.â Psy-Group initially stood out among its rivals because it didnâ t just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert â influenceâ operations to benefit the candidate. Psy-Groupâ s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The companyâ s posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread

the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.â s elite â namely Donald Trump.

â Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,â one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

â There are dozens of payments from the media flowing into their (Fusion GPSâ) account,â one federal law enforcement official said. â One company wired funds to Fusion (GPS) more than a dozen times.â

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trumpâ s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories â likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed â the only company to publish the full bogus dossier â on that list?

And who is on the payroll? We are trying to run that information down.

And why arenâ t these people behind bars?

==========

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a ***'Program'*** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: ***If you cheat rather than compete you will be destroyed.***

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.

B. Suffer the firings or forced terminations of multiple senior staff.

C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.

D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.

E. Have every investor who has placed over $50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications

account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

==========

Trump Could Save Taxpayers â Billions Of Dollarsâ By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save â billions of dollarsâ if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO report, released Tuesday, also reported Congress could save up to $4.3 billion by eliminating the loan program that gave $192 million to a failed luxury electric car company.

â The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste,â GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent $170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. **(RELATED: The NYT Walks Back Bombshell EPA Report, Doesnâ t Issue A Correction)**

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost $377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated $18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford.

The Hanford site cleanup came under increased scrutiny after a â take coverâ order was given in 2017 after a tunnel containing radioactive waste collapsed.

â DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this,â GAO reported. â DOE provided technical comments, which were incorporated as appropriate.â

GAO also highlighted an open recommendation to Congress that could save taxpayers up to $4.3 billion.

â Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations,â GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury **automaker Fisker Automotive, which drew down on $192 million before having its government credit stripped away.**

Fiskerâ s loan was sold off to a Chinese billionaire for $25 million in 2013, netting taxpayers a $139 million loss.

WHO ARE THE CORRUPT INSIDERS IN THE CLEANTECH STOCK MARKET PAYOLA SCAMS?

PALO ALTO MAFIA

WHO PAID BRIBES? -

(In many cases the bribes were paid through their hired intermediaries)

>> Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
>> Al Dâ Amato, Park Strategies. The former GOP New York senator has been a big advocate for online gambling as a lobbyist for the Poker Players Alliance.
>> Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck. Mottur heads up lobbying operations at the K Street giant. Ortiz, one of Brownsteinâ s newest hires, is a rising star in Democratic circles.
>> Alexander Sternhell, Sternhell Group. Previously a Senate Banking Committee staffer, Sternhellâ s two-year-old venture is in the big leagues with clients such as Citigroup Management and PricewaterhouseCoopers.
>> Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
>> Andrew McCormack
>> Andy Barbour, Smith-Free Group. Smith lobbies for several financial and insurance companies but is best known for his work as the lead Democratic lobbyist for the Financial Services Roundtable.
>> Andy Bechtolsheim â VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
>> Aneesh Chopra
>> Austin Lau
>> Bill Daley â White House strong-arm (Forced to resign)(he is now under investigation)
>> Bill Gurley
>> Bob Livingston, The Livingston Group. Republican Livingston, a former House Appropriations Committee chairman, is a statesman on K Street.
>> Brian Goncher â Deloitte VC intermediary in the stock market rigging (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
>> Brobeck Law Firm
>> Carl Gordon
>> Chad Hurley
>> Charles Stenholm, Olsson Frank Weeda Terman Bode Matz PC. Stenholmâ s decades of experience on the House Committee on Agriculture will be called upon as Congress crafts the next farm bill.
>> Cheryl Sandberg â Facebook boss, reports to Larry Summers
>> Chris Jennings, Jennings Policy Strategies. A sage on healthcare reform, Jennings worked on President Clintonâ s reform push and later lobbied on Obamaâ s bill.
>> Chuck Brain, Capitol Hill Strategies Inc. Once a Clinton White House aide and longtime House Ways and Means Committee staffer, Brain would make any list of the best-known Democratic lobbyists in town.
>> Civis Analytics â Social manipulation group
>> Covington & Burling
>> Dan Tate Jr., Capitol Solutions. Tate delivers stellar client relations while harnessing 10 years of upper-level Hill and administration experience.
>> Daniel Boston, Health Policy Source. Bostonâ s numerous healthcare clients turn to him for the policy expertise he honed as a GOP aide on Capitol Hill.
>> Dave McClure â VC
>> David Castagnetti and Alex Vogel, Mehlman Vogel Castagnetti. The bipartisan shop has heavy hitters on both sides of the aisle, thanks to Democrat Castagnetti.
>> David Danielson
>> David Drummond â Lawyer/Lobbyistâ Google, bribes expert for DC and EU regions (Under investigation. Quail Road, Woodside, CA home bugged)

>> David Mott
>> David Prend
>> David Sacks
>> David Sandalow
>> Debbie Wasserman Schultz
>> Doyle Bartlett, Eris Group. Bartlett has years of Capitol Hill experience and a busy lobbying practice that is on the front lines for clients including MetLife, Genentech and eBay.
>> Draper - Fisher â VC firm (Campaign funder who received massive windfalls from Russian mining & tech start-up rigging)
>> Elon Musk â CEO â Tesla (He is now under investigation & in multiple lawsuits for fraud)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (All of his personal assets, investments and portfolio holdings are under investigation)
>> Emerson Collective
>> Eric Paley
>> Eric Schmidt â Owner- Google (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
>> Facebook - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
>> Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
>> Fred Graefe, Law Offices of Frederick H. Graefe. Graefe is a force among Democratic healthcare lobbyists.
>> Fusion GPS â Defamation and journalist bribery service
>> Gabriel Burt
>> Gerald Cassidy and Gregg Hartley, Cassidy & Associates. The trailblazing firm has regained momentum by diversifying its practice following a staff shake-up late last year.
>> Gilman Louie â VC, founder on IN-Q-Tel
>> Goldman Sachs â Financial packager (Suspected of staging most of the TARP/DOE deals for personal gain & insider payouts)
>> Google, Inc. â Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
>> Greylock Capital â Silicon Valley Insider trading operator (Under investigation)
>> Heather Podesta, Heather Podesta + Partners. The former congressional aide has built a solid lobbying practice and helps fundraise for Democrats with her husband, Tony.
>> In-Q-Tel, Inc. â CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran â hit-jobsâ on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
>> Ira Ehrenpreis â VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (All of his personal assets, investments and portfolio holdings are under investigation)
>> Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
>> J. Steven Hart, Williams & Jensen. Hart is a sought-after GOP fundraiser who has steered the ship for more than a decade as Williams & Jensenâ s chairman and CEO.
>> Jack Lew
>> Jacque Littlefield â VC, Dead
>> James Bronkema â West Coast Money Man for David Rockefeller and Feinstein financier (Dead)
>> Jared Cohen â Google boss and international political manipulator
>> Jawed Karim
>> Jay Carney â White House press lead (Forced to resign)
>> Jeff Berman and David Russell, Bryan Cave. Berman, the former delegate counter for President Obamaâ s 2008 campaign, and Russell, a former chief of staff to the late Sen. Ted Stevens (R-Alaska), are standouts on a capable lobby team.
>> Jeff Lieberman
>> Jeff Peck, Peck, Madigan, Jones & Stewart. Once an aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee, Peck has carved out a niche working on the Dodd-Frank reform law.
>> Jeffrey Zients
>> Jeremy Stoppelman
>> Jim Blanchard and Ilia Rodriguez, DLA Piper. Blanchard, a former Democratic governor of Michigan, and Rodriguez, an ex-lobbyist for the Center for American Progress, are at the vanguard of a formidable K Street team.
>> Jim Breyer â VC and CIA intermediary
>> Jim Goetz
>> Jim Pitts and Chris Cox, Navigators Global. Pittsâ s firm has welcomed back GOP consultant Mike Murphy, adding more Republican talent to pair with Cox, a skilled hand from the George W. Bush White House.
>> Joe Lonsdale â VC, famous for rape and abuse scandal and domestic spying via Palantir
>> Joe Rhodes â White House shill
>> Joel Johnson, The Glover Park Group. The former aide to Sen. Tom Daschle (D-S.D.) helps manage one of the marquee Democratic-leaning firms in town.
>> Johanna Shelton
>> John Breaux and Trent Lott, Breaux-Lott Leadership Group. Now merged with Patton Boggs, the two former senators are going strong with a profitable lobbying practice anchored by several blue-chip clients.
>> John Doerr â Owner â Kleiner Perkins. â Godfatherâ â Silicon Valley Cartel (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)(All of his personal assets, investments and portfolio holdings are under investigation)

>> John Lindfors
>> John Raffaelli, Capitol Counsel. The former Democratic staffer has more than 25 years of expertise in taxation and international trade â two issues at the top of the congressional agenda.
>> Jonathan Silver â DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
>> Josh Ackil and Matt Tanielian, Franklin Square Group. With clients including Apple, Google and Intel, the two Democrats are among the elite lobbyists for Silicon Valley in Washington.
>> Josh Kopelman
>> Joshua Wright
>> JP Gan
>> Julie Domenick, Multiple Strategies LLC. The Democratic lobbyist, who was once targeted by the K Street Project, has flourished by opening her own firm.
>> Keith Rabois -VC
>> Ken Duberstein and Marti Thomas, The Duberstein Group. Duberstein was floated as a candidate for Obamaâ s chief of staff before the president chose Bill Daley, while Thomas is a Democratic vet who worked in the Clinton Treasury Department.
>> Ken Howery â VC
>> Kenneth Kies, Federal Policy Group. Kies will be one to watch during the corporate tax reform debate because he was a key aide during the last overhaul of the tax code.
>> Kleiner Perkins â Campaign funding VC who (Received massive windfalls from Russian mining & tech start-up rigging. Sued. Under investigation. All assets being tracked)
>> Lachlan Seward â Energy Department gatekeeper
>> Lanny Griffith and Loren Monroe, BGR Group. Though it has added Democrats, Griffith and Monroeâ s firm is known for GOP connections and has benefitted from long-standing ties to the new House leadership.
>> Larry Oâ Brien, OB-C Group. Oâ Brien is one of the most potent Democratic fundraisers in the country.
>> Larry Page â Google Boss
>> Larry Summers â VC
>> Licy Do Canto, The DoCanto Group. The former aide to Rep. Barney Frank (D-Mass.) and the late Sen. Edward Kennedy (D-Mass.) is a highly regarded healthcare lobbyist.
>> Linda Daschle, LHD & Associates. Daschle, a former administrator for the Federal Aviation Administration, remains one of Washingtonâ s top aviation lobbyists.
>> Linda Tarplin, Tarplin, Downs & Young. Tarplin remained among the elite healthcare lobbyists during the reform debate, and her GOP background makes the 112th Congress a prime time to display her prowess.
>> Lisa Kountoupes, Kountoupes Consulting. The former aide to Rep. John Dingell (D-Mich.) has her own lobby shop and contracts with Best Buy, Yahoo and Intel.
>> Lloyd Craig Blankfein â VC and Sachs boss
>> Luke Nosek
>> Marc Andreessen -VC
>> Marc Lampkin and Jack Quinn, Quinn Gillespie & Associates. Republican Lampkin and Democrat Quinn make for a blockbuster pairing.
>> Margaret Sullivan â VC, USAID Boss and Tom Steyer bpartner
>> Mario Rosatti â VC
>> Mark Isakowitz, Fierce, Isakowitz and Blalock. Isakowitz and his GOP lobby shop scored a coup this year when Apple and Facebook both signed up as clients in a two-week span.
>> Mark Kadesh, Kadesh & Associates. Kadesh, once chief of staff to Sen. Dianne Feinstein (D-Calif.), has an A-list of California clients and a reputation as a real pro.
>> Mark Rayder, Alston + Bird. Rayderâ s Hill experience in appropriations and healthcare policy makes for a dynamite combination.
>> Mark Zuckerberg â Facebook Boss
>> Martin LaGod -VC
>> Marty Paone, Prime Policy Group. Paone spent decades on Capitol Hill working for Senate Democrats and is part of the leadership team at Prime Policy, one of K Streetâ s most successful firms.
>> Mary Meeker â VC
>> Matt Keelen, The Keelen Group. The Republican lobbyist and campaign guru is a bridge to labor for the GOP.
>> Matt Rogers â VC and pass-through conduit
>> Max Levchin -VC
>> Mckinsey Consulting â The firm you hire to rig white papers and insider hires in government positions for the Palo Alto Mafia
>> Megan Smith
>> Melissa Schulman, The Bockorny Group. A former aide to Rep. Steny Hoyer (D-Md.), Schulman has the connections to centrist Democrats that are always prized on K Street.
>> Michael Eisenberg
>> Michael Herson, American Defense International. Hersonâ s Pentagon and White House experience has been an asset to him as president of the successful defense consulting and lobbying firm.
>> Michael Moritz -VC
>> Mike Fulton, GolinHarris. Fulton is well versed in the minutiae of the Washington bureaucracy and is adept at finding federal grants for his clients.
>> Mike House, Hogan & Lovells. House leads the government relations practice at the firm and calls the shots on a prized account with Nissan North America.
>> Mikey Dickerson
>>

Mitch Feuer and Robert Griner, Rich Feuer Group. The two lobbyists work for first-tier clients from the financial services world, including Visa and Goldman Sachs.

>> Morrison and Foerster

>> Nathan Parker

>> Neerag Agrawal

>> Nicholas Guido Denton â Gawker, Gizmodo, Jalopnik homosexual scandal mob boss

>> Nick Allard, Thomas Hale Boggs Jr., Micah Green, Jonathan Yarowsky and Edward Newberry, Patton Boggs. The firm continues to reign on K Street thanks to its roster of seasoned power brokers.

>> Nick Giordano, Washington Council Ernst & Young. A former counsel to the Senate Finance Committee, Giordano is one of the best tax lobbyists in town.

>> Perkins Coie â Campaign conduit law firm

>> Peter Fenton

>> Peter Thiel â VC

>> Rakesh Saxeena â Canadian in-house arrest, arms dealer, western political packager

>> Rahm Emanuel â White House boss

>> Raj Gupta â VC, arrested

>> Ray Lane â VC

>> Reid Hoffman â VC and sex.com partner with Gary Kremen, also match.com

>> Rhod Shaw, The Alpine Group. Shaw is an astute observer of Congress who has worked on several major pieces of environmental and telecommunications legislation.

>> Rich Gold, Kathryn Lehman and Gerry Sikorski, Holland & Knight. The firmâ s flourishing lobbying practice is plugged in to both parties.

>> Rich Tarplin, Tarplin Strategies. Tarplin exemplifies the breed of lobbyist who makes a living by out-working the competition.

>> Richard Blum â VC and director/husband of Dianne Feinstein

>> Rick Kessler and Steve Sayle, Dow Lohnes Government Strategies. The former House Energy and Commerce Committee aides â Kessler a Democrat and Sayle a Republican â have built a well-established lobbying practice.

>> Robert Raben, The Raben Group. Raben, a former aide to Rep. Barney Frank (D-Mass.) and Clinton Justice Department official, runs one of the best Democratic-leaning lobby shops in town with clients in the corporate and nonprofit world.

>> Robert Van Heuvelen, VH Strategies. Van Heuvelen shrewdly surrounds himself with the best; he recently hired Stephen Ward, formerly chief of staff to Sen. Jeff Bingaman (D-N.M.), to help keep his firm among the elite.

>> Rodger Currie, Foley Hoag LLP. A former lobbyist for PhRMA, Currie now works for several clients at Foley Hoag in the healthcare, medical and biotechnology fields.

>> Roelof Botha

>> Russel Simmons

>> Sam Geduldig, Clark Lytle Geduldig & Cranford. The former House Republican leadership aide has seen a business boom at his firm since the GOP takeover of the lower chamber.

>> Sander Lurie and Todd Weiss, SNR Denton. Lurie, a former chief of staff to Sen. Debbie Stabenow (D-Mich.), and Weiss, who has worked for former Sens. Tim Hutchinson (R-Texas) and Rick Santorum (R-Pa.), make for a strong one-two punch.

>> Sandi Stuart and Vin Weber, Clark & Weinstock. Stuartâ s executive experience under President Clinton and Weberâ s past as a GOP congressman from Minnesota have lured a diverse clientele to the firm.

>> Sanjay Wagle â VC

>> Scott Segal, Bracewell & Giuliani. Segal is a respected advocate for several electric utilities and energy companies and played a big part in the industry response to the Gulf of Mexico oil spill.

>> Scott Shleiffer

>> Sergy Brin â Google boss

>> Slade Gorton and Emanuel Rouvelas, K&L Gates. Gorton, an ex-GOP senator from Washington, and Democrat Rouvelas are just a few of the big names at the prominent law and lobby firm.

>> Solyndra Solar Company â FBI raided corrupt Clean Tech company

>> SpaceX â Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits

>> Steve Chen

>> Steve Elmendorf and Jimmy Ryan, Elmendorf | Ryan. A former aide to ex-House Democratic Leader Richard Gephardt (Mo.), Elmendorf brought in Ryan to help expand the Senate ties of his thriving firm.

>> Steve Jurvetson â VC embroiled in sex abuse charges

>> Steve McBee, McBee Strategic. A former aide to Rep. Norm Dicks (D-Wash.), McBee has seen his lobby firm take off.

>> Steve Perry and Andy Wright, Dutko Grayling. Perry and Wright man the roster for one of the top 20 lobby shops in Washington.

>> Steve Spinner â VC

>> Steve Westly â VC

>> Stu Van Scoyoc, Van Scoyoc Associates. The man who founded a top-earning lobby firm specializing on taxation and appropriations will have plenty of work in the months ahead.

>> Ted Schlein

>> Tesla Motors â Car Company that conduits money to campaigns

>> The Groundworkâ Social manipulation group

>> Thomas Jolly, Jolly/Rissler. Jolly is founding chairman of the Washington Caucus, a group that hosts dinners with lawmakers, and a mainstay among Democratic lobbyists.

>> Thomas Quinn, Venable. Quinnâ s ebullient personality is complemented by deep knowledge of the financial sector that dates back to his time as general counsel to the Comptroller of the Currency.

>> Tim Draper â VC
>> Todd Park â IT manipulator inside White House
>> Tom Oâ Donnell, Gephardt Government Affairs Group. Oâ Donnell and his former Capitol Hill boss, ex-House Democratic Leader Richard Gephardt (Mo.), have done well since joining forces.
>> Tom Perkins â Dead KPCB Palo Alto Mafia founder
>> Tom Sheridan, The Sheridan Group. Sheridan uses his social services and public policy experience to bolster causes that donâ t fit the typical K Street mold.
>> Tom Steyer â VC
>> Tomorrow Ventures â Social manipulation group
>> Tony Podesta, Podesta Group. The prolific Democratic fundraiser has seen his firm rocket to the echelons of the top five lobby shops.
>> Tracy Spicer, Avenue Solutions. Spicer mastered policy working for the late Sen. Edward Kennedy (D-Mass.) and is a trusted adviser for a number of leading health insurers.
>> Victor Fazio, Joel Jankowsky, Scott Parven and Bill Paxon, Akin, Gump, Strauss, Hauer & Feld. Fazio, Jankowsky, Parven and Paxon are among the lobbyists who keep Akiwn Gump humming along as one of the top earners on K Street.
>> Viktor Vekselberg â Russian business entity
>> Vinod Khosla -VC
>> Wayne Berman, Drew Maloney and Moses Mercado, Ogilvy Government Relations. Ogilvyâ s commanding K Street presence reflects the firmâ s deep ties to leaders in both parties.
>> Wilson Sonsini Partner Club
>> Wilson, Sonsini, Goodrich and Rosatti

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

DOE corruptionâ appointed and elected officials should face prison time

Marita Noon

|

An exhaustive review of 350+ pages of leaked emails regarding the Obama administrationâ s handling of the various green-energy loan and grant programs makes several things very clear: they lied, engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process â taxed investorsâ patienceâ â as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didnâ t think they were treated unfairly. He told me, â At the end of the day, we couldnâ t get through the process.â But, he admits, he hasnâ t read the emails.

Aptera was trying to build a very efficient electric vehicle with an under $30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didnâ t. Wilbur reports that he didnâ t donate to any candidate. He wanted to keep the whole process clean and do what was â good for America.â

The report from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and â shut down on December 2, 2011.â The report implies that Aptera was led on: â After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of $150 million if the company was able to raise $80 million privately.â And: â The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.â

Apteraâ s 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports Iâ ve written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a blog post specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate), got loans in 2010 and then the Vehicle Production Groupâ s loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissanâ both of which, according to the House report, â were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the â Historic Agreement.â â

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatosâ research, and personal experience, a different ATVM applicant has now taken its case to court citing â corruption and negligence.â

On November 16, 2012, XP Technologies filed a lawsuit against the federal government concerning the DOEâ s denial of XP Technologyâ s loan guarantee application. The complaint alleges: â criminal activities

did take place by DOE staff and affiliates.â A November 23 press release announces that XP Technologies is now represented by Cause of Action, â a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity.â

According to the document filed on November 16, â Plaintiffs' backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award â winnerâ , has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market.â

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: â Staff from within the DOE have provided evidence which is quite compelling.â As Aptera's Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a â principled stand,â which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from â above the agency.â Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo opsâ as well as providing talking points for the president.

Our XP source told us â We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary.â The leaked emails support this accusation, specifically regarding the â business connections.â In her post, Lakatos calls it â green fraternizing.â The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didnâ t provide us with a name, the XP official said, â We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially.â The discovery the lawsuit will provide will expose the â senior senator,â but our previous research shows that Senator Harry Reidâ s actions seem to fit the XP officialâ s comment.

XP Technologies believes that â DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required.â

Having extensively studied the DOEâ s various loan programs, including the ATVM, Lakatos and I agree with our sourceâ s startling conclusion: â Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or?appointed, officials might not be seeing measures ranging from censure or even federal prison time.â

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than our report, the October 31 release of the

emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the Heritage Foundation broke the XP story: â A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energyâ s decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe.â

On November 19, Lakatos, whose work is listed as â evidenceâ in the legal complaint, received a call from Fox Newsâ Gary Gasteluâ who reported on the story on November 20. The next day, Fox News covered the lawsuit on Americaâ s Newsroom. Even the Drudge Report picked up on the story.

XP has a litigation website on which the company states: â The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!â They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for othersâ especially industries who have been wronged by the Obama Administrationâ s practices (such as energy). The lawsuit mayâ or may notâ send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

IN ADDITION TO OUR EYE-WITNESS, FIRST-HAND, VIEWING OF THESE CRIMES THESE SMALL SAMPLES OF THE BROADCAST NEWS REPORTS, CONGRESSIONAL REPORTS, FBI CASE EVIDENCE AND AGENCY REPORTS PROVE EVERY ASSERTION WE HAVE MADE:

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform.

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems.

Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of â car-as-dickâ thinking because Musk was not only molded by his purse-swinging, kept-woman, mother, abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sachs into his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Techâ s Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammery.

Biden and his cheerleader actress front girl: Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

---- Thatâ s right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISKER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WIINERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

---- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages!

---- If you are Democracy: You were broken!

---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â economicâ or â healthâ emergency â stimulusâ scam.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â Meta â Google â Alphabet â Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â Black Cube â Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash

THE UNITED STATES DEPARTMENT OF ENERGY

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a $25 billion direct loan program funded by Congress in fall 2008 under the guise of *"providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. "* The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, ***one of the most criminally corrupt failures in American history***.. It was only a "success" as one of the biggest political slush-funds ever created!

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over $30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court **ruled** that Cause of Action, where I am executive director, can **proceed with a lawsuit** against the Department of Energy. Weâ re suing the federal government for the blatant political favoritism in its $25 billion â Advanced Technology Vehicle Manufacturing Loan Program.â

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: **Tesla**and **Fisker**.

Both companiesâ political connections run deep, especially Teslaâ s. The companyâ s founder, Elon Musk, was a **max donor** for President Obama. One of its board members, **Steven Westly**, was appointed to a

Department of Energy **advisory board**. And another Obama bundler, Tesla investor and adviser Steven Spinner, **secured employment** in the departmentâ s Loan Program Officeâ the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since **gone bankrupt**, **was backed** by a San Francisco **venture capital firm** whose senior partners **donated millions** to the 2008 Obama campaign and other Democrat causes. **One partner**, **John Doerr**, parlayed his support into a seat on the Presidentâ s Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

Thereâ s no shortage of examples. The departmentâ s leadersâ including then-Secretary of Energy Steven Chuâ repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). **One emails reads**, â DOE has made a political commitmentâ to approve a companyâ s loan. Another says the â pressure is on rea lheavyâ from none other than Vice President Joe Biden. And still **another shows** an employee asking, â whatâ s another billion anyhow?â

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companiesâ applications faster. The government **gave them extraordinary access** to its staff and facilitiesâ even to the point of having government employees personally walk them through the loan application and approval process.The department ignored its own lending rules in order to approve the companiesâ loans. And it **renegotiated the terms of some loans** after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fiskerâ s cars. They applied for loans in 2008 and 2009

under the same loan program.

The department refused them bothâ and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPVâ s application because **its vehicle was powered by hydrogen**. It was an electric SUV. It also raised objections that it didnâ t raise with other companies whose applications were approved. For instance: The bureaucracy **criticized** the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, **XPV has gone out of business**, unable to compete against its politically connectedâ and subsidizedâ rivals.

This casts the Department of Energyâ s loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S.taxpayer.

Sadly, similar examples are widespread in Washington. Thatâ s no surprise considering the feds spend **roughly $100 billion a year** in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, **over two-thirds of likely voters** think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. Theyâ re right.

This points to a simple conclusion: Politicians and bureaucrats shouldnâ t use the publicâ s money to pad private companiesâ bottom lines. As the Department of Energyâ s green-vehicle loan program shows, the capacity for corruption is immenseâ and inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about *"saving the environment"*; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the ***facade group: "The National Venture Capital Association"***, DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's ***two main manipulation tricks*** are: 1.) **STONE-WALLING** - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) **INTERPRETIVE LYING** - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was ***DEFRAUDED, LIED TO, STONE-WALLED*** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanual), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A "Silicon Valley Mafia" (AKA - "The PayPal Mafia") exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4-way conflict of interest in which Google staffed the largest contingent of Obama White House staff.

- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies. If one wants to look at dirty Russian collusion, they need look no further than Steven Chu, the architect of the failed Iran Nuclear deal and corrupt Uranium One deal. Steven Chu and Rahm Emanual ordered DOE's Sandia Livermore Labs and Argonne Labs (who they were both connected to) to manipulate Applicant data in order to only favor camapign financiers companies.

- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.

- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.

- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.

- The Obama Administration promised an exclusive on Afghanistan mining deals to Frank Guistra and the Silicon Valley oligarchs for lithium, indium, cobalt and rare-earth metals mining after USAID pitched (http://2.bp.blogspot.com/_VyTCyizqrHs/TBaffwKixYI/AAAAAAAAH74/Wee8LTQfo3k/s1600/afghanminerals.jpg) manipulated reports from McKinsey Consulting saying that *"Afghanistan was the Saudi Arabia of lithium and had trillions of dollars of lithium"* to dig up. It turned out to be a lie to get oligarchs to support Obama's Afghan invasion. (http://pubs.usgs.gov/fs/2007/3063/pdf-page.jpg) DOE helped sell this lie because the Russians had already scoured Afghanistan and found it to be fairly worthless as a mining potential. Elon Musk bought into this for his battery monopoly. This is why Steven Chu gave so much money to Russians at Ener1 and Severstal. DOE staff were fully aware of this. (http://www.mining.com/1-trillion-motherlode-of-lithium-and-gold-discovered-in-afghanistan/)

- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk

share an apartment and financial programs.

- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.

- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.

- The DOE ATVM and LGP programs resulted in: ***THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA!*** Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need, and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. **TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL! After realizing this, Applicants and Congressional insiders forced ALL of the kick-back funded companies into bankruptcy as payback for the corruption and abuse of their resources. Said one Senator: *"If they want bankruptcies, we will give them bankruptcies..."***

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- As shown by this letter:
https://news.wttw.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20
...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "***The Cleantech Crash***" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a ***"first-come, first served"*** basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.

- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

GOOGLE_ATTACKS

ATTACK PROCESS USED BY GOOGLE AND GIZMODO

(Above, From tens of thousands of internal Google documents leaked)

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have ***NEVER*** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'

by Tyler Durden

In his first pair of interviews since being sworn in, Attorney General Barr told Fox News and WSJ that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation he has tasked

John Durham, the US Attorney from Connecticut, with leading - because Americans need to know whether the government **"put a thumb on the scale"** to try and undermine President Trump both during the campaign and during the first two years of his term, just like **"we need to ensure that foreign actors don't influence the outcome of our elections."**

Separately, he told WSJ that **"government power was used to spy on American citizens**...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, **though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision,** in the summer of 2016, to open a counterintelligence investigation. At this point, **Durham's review isn't a criminal investigation,** and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

> My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!
>
> â Donald J. Trump (@realDonaldTrump) May 17, 2019

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

Watch the Fox interview below:

Politics

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

Thereâ ve been a couple articles in the past few weeks pointing to President Obama as the â clean tech investor in chiefâ and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energyâ s (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didnâ t have a dedicated person in Washington â in some circles they call them lobbyists â maneuvering grant and loan programs, you werenâ t able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between $50 billion and $80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obamaâ s Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleinerâ s investments have had some successful government bids, most notably the $529 million loan to Kleiner portfolio company Fisker Automotive out of the DOEâ s highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the $25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Ventureâ s LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOEâ s loan guarantee and ATVM loan programs. About a third of the DOEâ s loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasnâ t a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked â excluding some potential applicants unnecessarily.â

Thereâ s nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gatesâ calls for boosting federal government investing to $16 billion per year into energy innovation. All Iâ m saying is that this level of influence should be watched.

Another Tesla car catches fire in Hong Kong parking lot: media - ALL TESLA BATTERIES EXPECTED TO HAVE CHEMISTRY DEGRADE AND EXPLODE AS DOE WAS WARNED IN WRITING BY BERNIE TSE, BRIGHT AND XP

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the cityâ s San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

Firemen took 45 minutes to douse the fire.

The vehicle was a Tesla Model S 85 KWH dual power version, added the paper, which gave no explanation of what might have caused the blaze.

Responding to a request from Reuters, Tesla declined to comment. Reuters was not able to contact the vehicle owner or obtain CCTV footage of the incident.

Hong Kongâ s fire services department told Reuters a vehicle caught fire on Sunday, but gave no details, such as the make of the car. Authorities are investigating the cause.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

The automaker has said its EVs are about 10 times less likely to experience a fire than petrol-powered cars.

There have been at least 14 instances of Tesla cars catching fire since 2013, most of them after a crash.

Reporting by Donny Kwok and Shellin Li in Hong Kong, Yilei Sun in Shanghai; Editing by James Pomfret and Clarence Fernandez. Our Standards:The Thomson Reuters Trust Principles.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt

companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News

manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver

You have probably seen the many issues with Elon Musk And Tesla Motors including:

"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"

"His is not faithful to his girlfriends"
"The workers that build his batteries die or sicken from toxic poisoning"
"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"
"He is addicted to drugs and booze"
"He has sociopath mental issues"
"He is a narcissist"
"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."
"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"
"His partner: Steve Jurvetson, has been charged with sex and corruption issues"
"He arranged government kick-backs with the White House"
"He is the world's biggest government mooch"
"He is a member of the Palo Alto Mafia"
"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"
"More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"
"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"
"His so-called 'foundation" is just a payola and tax evasion scam for his family"
"His batteries are the most dangerous use of lithium ion storage ever conceived"
"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"
"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"
"His SpaceX is nothing more than a domestic spy satellite company"
"Musk's brain chip company tortures small animals in bad science experiments"
"His father screwed his daughter and got her pregnant"
"Dianne Feinstein and her family own Musk interests"
"You can't put out the fires when his batteries explode"
"The fumes from his thermal battery vapors give you cancer, lung and brain damage"

"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."
etc.....

You may have run across Muskâ s self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or live TV debates. Musk will do anything to keep this information from getting out butâ ¦ it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks

on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â child labor electric car batteriesâ .

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his â trophy wifeâ Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance â Butt buddyâ . They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VCâ s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk â boyfriendâ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: â Muskâ , â Teslaâ or â Tesla Fireâ . They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no â Tesla Fan Boysâ . All of the fanatic Tesla comments on the internet are Muskâ s, Thielâ s, Jurvetsonâ s and Draperâ s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a â Tesla Fan Boyâ on blogs.

The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why arenâ t all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Letâ s take a look at the â lithiumâ in Muskâ s horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly â filling up with toxic smokeâ as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electrnics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream

News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â reportâ from USAID that said there was â A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its

enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via â in-kindâ services.

ELON MUSK'S SPACEX DOMESTIC POLITICAL SPY SATELLITES UNDER ATTACK ALREADY:
https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-cleanup-may-cover-story-arms-u-s-sat

https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver

ELON MUSK'S PAID-FOR FAKE NEWS MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times,

Tesla's out-of-control sudden-acceleration surge defects
and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia

University.â

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls â SPYGATEâ .

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â)

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create â foreign intelligence,â John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obamaâ s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into

uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can

build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future

employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!!

- Second former employee of controversial data firm to be questioned by special counselâ s inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica â which collapsed after the Observer revealed details of its misuse of Facebook data â confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the companyâ s activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign â received donations or paid for services from Cambridge Analytica â ¦beyond initial scoping workâ .

Damian Collins, chairman of parliamentâ s inquiry into fake news, said it was â no surpriseâ that Kaiser was under scrutiny by Mueller because â her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banksâ .

He said it was now vital Britain had its own inquiry into foreign interference: â We should not be leaving this to the Americans.â

Tom Watson, the deputy leader of the Labour party, echoed Collinsâ s statement, saying: â This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.â

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counselâ s inquiry because of work done with Paul Manafort, Trumpâ s campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Muellerâ s investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clintonâ s presidential campaign â which indictments from Muellerâ s team say were obtained by Russian military intelligence â to use in Donald Trumpâ s campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: â She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin.â

Her legal representatives later wrote to the paper to say that the allegations, including that she had â channelledâ donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 â long before she worked at Cambridge Analytica â and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her â about how he saw the worldâ . He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had â unsettlingâ parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeriaâ s emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "Iâ m Being â Targetedâ For Saying the Media is â Mostly Liberal"
by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as â mostly liberal.â

Logan told Breitbart podcaster Mike Ritland the remarks made on his show â which drew widespread attention online â amounted to â professional suicide.â

Defending her remarks on Hannityâ s show, Logan said that as the result of her speaking out about how the media is â mostly liberalâ she has been targeted because she is an independent voice.

â Any journalists who are not beating the same drum and giving the same talking points,â she insisted â pay the priceâ for not going along with the liberal crowd.

She also called out her targeters by name.

â I know theyâ re going to come after me,â she told Hannity. â Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter.â

She added: â They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They donâ t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? Iâ m not owned by the left or the right.â

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of â weightâ in most news organizations on â one side of the political spectrum.â

â The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So thatâ s just a fact, right?â she told Ritland.

She also trashed reporting based on single, anonymous government sources.

â Thatâ s not journalism, thatâ s horseshit,â Logan stressed. â Responsibility for fake news begins with us. We bear some responsibility for that, and weâ re not taking ownership of that and addressing it. We just want to blame it all on somebody else.â

==========

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Groupâ s intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israelâ s secret services and described themselves as â private Mossads.â Psy-Group initially stood out among its rivals because it didnâ t just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert â influenceâ operations to benefit the candidate. Psy-Groupâ s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The companyâ s posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread

the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.â s elite â namely Donald Trump.

â Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,â one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

â There are dozens of payments from the media flowing into their (Fusion GPSâ) account,â one federal law enforcement official said. â One company wired funds to Fusion (GPS) more than a dozen times.â

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trumpâ s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories â likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed â the only company to publish the full bogus dossier â on that list?

And who is on the payroll? We are trying to run that information down.

And why arenâ t these people behind bars?

==========

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a ***'Program'*** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: ***If you cheat rather than compete you will be destroyed.***

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.

B. Suffer the firings or forced terminations of multiple senior staff.

C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.

D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.

E. Have every investor who has placed over $50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications

account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

==========

Trump Could Save Taxpayers â Billions Of Dollarsâ By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save â billions of dollarsâ if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO report, released Tuesday, also reported Congress could save up to $4.3 billion by eliminating the loan program that gave $192 million to a failed luxury electric car company.

â The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste,â GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent $170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. **(RELATED: The NYT Walks Back Bombshell EPA Report, Doesnâ t Issue A Correction)**

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost $377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated $18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford.

The Hanford site cleanup came under increased scrutiny after a â take coverâ order was given in 2017 after a tunnel containing radioactive waste collapsed.

â DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this,â GAO reported. â DOE provided technical comments, which were incorporated as appropriate.â

GAO also highlighted an open recommendation to Congress that could save taxpayers up to $4.3 billion.

â Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations,â GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury **automaker Fisker Automotive, which drew down on $192 million before having its government credit stripped away.**

Fiskerâ s loan was sold off to a Chinese billionaire for $25 million in 2013, netting taxpayers a $139 million loss.

EMAND A SPECIAL COUNSEL UNDER OSC DEDICATED TO INVESTIGATING, AND NOT COVERING UP, THIS CASE!

DEMAND THAT ALL FEDERAL EMPLOYEES INVOLVED BE FIRED!

DEMAND THAT THE PUBLIC AND THE VICTIMS RECEIVE DAMAGES RECOVERY!

DEMAND THAT THE WHISTLE-BLOWERS RECEIVE PROTECTION AND ARE ALLOWED TO SPEAK BEFORE CONGRESS!

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN
AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

DOE corruptionâ appointed and elected officials should face prison time

Marita Noon

|

An exhaustive review of 350+ pages of leaked emails regarding the Obama administrationâ s handling of the various green-energy loan and grant programs makes several things very clear: they lied, engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process â taxed investorsâ patienceâ â as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didnâ t think they were treated unfairly. He told me, â At the end of the day, we couldnâ t get through the process.â But, he admits, he hasnâ t read the emails.

Aptera was trying to build a very efficient electric vehicle with an under $30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didnâ t. Wilbur reports that he didnâ t donate to any candidate. He wanted to keep the whole process clean and do what was â good for America.â

The report from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and â shut down on December 2, 2011.â The report implies that Aptera was led on: â After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of $150 million if the company was able to raise $80 million privately.â And: â The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.â

Apteraâ s 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports Iâ ve written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a blog post specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate), got loans in 2010 and then the Vehicle Production Groupâ s loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissanâ both of which, according to the House report, â were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the â Historic Agreement.â â

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatosâ research, and personal experience, a different ATVM applicant has now taken its case to court citing â corruption and negligence.â

On November 16, 2012, XP Technologies filed a lawsuit against the federal government concerning the DOEâ s denial of XP Technologyâ s loan guarantee application. The complaint alleges: â criminal activities

did take place by DOE staff and affiliates.â A November 23 press release announces that XP Technologies is now represented by Cause of Action, â a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity.â

According to the document filed on November 16, â Plaintiffs' backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award â winnerâ , has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market.â

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: â Staff from within the DOE have provided evidence which is quite compelling.â As Aptera's Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a â principled stand,â which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from â above the agency.â Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo opsâ as well as providing talking points for the president.

Our XP source told us â We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary.â The leaked emails support this accusation, specifically regarding the â business connections.â In her post, Lakatos calls it â green fraternizing.â The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didnâ t provide us with a name, the XP official said, â We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially.â The discovery the lawsuit will provide will expose the â senior senator,â but our previous research shows that Senator Harry Reidâ s actions seem to fit the XP officialâ s comment.

XP Technologies believes that â DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required.â

Having extensively studied the DOEâ s various loan programs, including the ATVM, Lakatos and I agree with our sourceâ s startling conclusion: â Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or?appointed, officials might not be seeing measures ranging from censure or even federal prison time.â

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than our report, the October 31 release of the

emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the Heritage Foundation broke the XP story: â A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energyâ s decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe.â

On November 19, Lakatos, whose work is listed as â evidenceâ in the legal complaint, received a call from Fox Newsâ Gary Gasteluâ who reported on the story on November 20. The next day, Fox News covered the lawsuit on Americaâ s Newsroom. Even the Drudge Report picked up on the story.

XP has a litigation website on which the company states: â The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!â They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for othersâ especially industries who have been wronged by the Obama Administrationâ s practices (such as energy). The lawsuit mayâ or may notâ send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

IN ADDITION TO OUR EYE-WITNESS, FIRST-HAND, VIEWING OF THESE CRIMES THESE SMALL SAMPLES OF THE BROADCAST NEWS REPORTS, CONGRESSIONAL REPORTS, FBI CASE EVIDENCE AND AGENCY REPORTS PROVE EVERY ASSERTION WE HAVE MADE:

THE SILICON VALLEY CARTEL MEMBERS
The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than $50.00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger â Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and moreâ ¦)
- Barack Obama â Chicago politician
-Bill Daley â White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer â Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)
- Daniel Cohen â DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod â White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign)(he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Hunter Biden
- David Plouffe â White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough â White House adviser

- William Turtonâ Defamation-for-sale blogger

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)

- Google, Inc. â Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. â CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran â hit-jobsâ on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- Linkedin - Election manipulation networking site
- Solyndra Solar Company â FBI-raided corrupt Clean Tech company
- SpaceX â Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors â Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform.

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems.

Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of â car-as-dickâ thinking because Musk was not only molded by his purse-swinging, kept-woman, mother, abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sachs into his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Techâ s Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammery.

Biden and his cheerleader actress front girl: Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

---- Thatâ s right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISKER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WIINERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

---- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages!

---- If you are Democracy: You were broken!

---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national â economicâ or â healthâ emergency â stimulusâ scam.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook â Meta â Google â Alphabet â Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS â Black Cube â Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash

THE UNITED STATES DEPARTMENT OF ENERGY

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a $25 billion direct loan program funded by Congress in fall 2008 under the guise of *"providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. "* The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, ***one of the most criminally corrupt failures in American history***.. It was only a "success" as one of the biggest political slush-funds ever created!

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over $30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court **ruled** that Cause of Action, where I am executive director, can **proceed with a lawsuit** against the Department of Energy. Weâ re suing the federal government for the blatant political favoritism in its $25 billion â Advanced Technology Vehicle Manufacturing Loan Program.â

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: **Tesla**and **Fisker**.

Both companiesâ political connections run deep, especially Teslaâ s. The companyâ s founder, Elon Musk, was a **max donor** for President Obama. One of its board members, **Steven Westly**, was appointed to a Department of Energy **advisory board**. And another Obama bundler, Tesla investor and adviser Steven Spinner, **secured employment** in the departmentâ s Loan Program Officeâ the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since **gone bankrupt**, **was backed** by a San Francisco **venture capital firm** whose senior partners **donated millions** to the 2008 Obama campaign and other Democrat causes. **One partner**, **John Doerr**, parlayed his support into a seat on the Presidentâ s Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

Thereâ s no shortage of examples. The departmentâ s leadersâ including then-Secretary of Energy Steven Chuâ repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). **One emails reads**, â DOE has made a political commitmentâ to approve a companyâ s loan. Another says the â pressure is on rea lheavyâ from none other than Vice President Joe Biden. And still **another shows** an employee asking, â whatâ s another billion anyhow?â

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companiesâ applications faster. The government **gave them extraordinary access** to its staff and facilitiesâ even to the point of having government employees personally walk them through the loan application and approval process.The department ignored its own lending rules in order to approve the companiesâ loans. And it **renegotiated the terms of some loans** after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fiskerâ s cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them bothâ and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPVâ s application because **its vehicle was powered by hydrogen**. It was an electric SUV. It also raised objections that it didnâ t raise with other companies whose applications were approved. For instance: The bureaucracy **criticized** the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, **XPV has gone out of business**, unable to compete against its politically connectedâ and subsidizedâ rivals.

This casts the Department of Energyâ s loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S.taxpayer.

Sadly, similar examples are widespread in Washington. Thatâ s no surprise considering the feds spend **roughly $100 billion a year** in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, **over two-thirds of likely voters** think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. Theyâ re right.

This points to a simple conclusion: Politicians and bureaucrats shouldnâ t use the publicâ s money to pad private companiesâ bottom lines. As the Department of Energyâ s green-vehicle loan program shows, the capacity for corruption is immenseâ and inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about *"saving the environment"*; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the ***facade group: "The National Venture Capital Association"***, DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's ***two main manipulation tricks*** are: 1.) **STONE-WALLING** - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) **INTERPRETIVE LYING** - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was ***DEFRAUDED, LIED TO, STONE-WALLED*** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their

damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanual), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A "Silicon Valley Mafia" (AKA - "The PayPal Mafia") exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4-way conflict of interest in which Google staffed the largest contingent of Obama White House staff.

- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies. If one wants to look at dirty Russian collusion, they need look no further than Steven Chu, the architect of the failed Iran Nuclear deal and corrupt Uranium One deal. Steven Chu and Rahm Emanual ordered DOE's Sandia Livermore Labs and Argonne Labs (who they were both connected to) to manipulate Applicant data in order to only favor camapign financiers companies.

- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.

- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.

- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.

- The Obama Administration promised an exclusive on Afghanistan mining deals to Frank Guistra and the Silicon Valley oligarchs for lithium, indium, cobalt and rare-earth metals mining after USAID pitched (http://2.bp.blogspot.com/_VyTCyizqrHs/TBaffwKixYI/AAAAAAAAH74/Wee8LTQfo3k/s1600/afghanminerals.jpg) manipulated reports from McKinsey Consulting saying that *"Afghanistan was the Saudi Arabia of lithium and had trillions of dollars of lithium"* to dig up. It turned out to be a lie to get oligarchs to support Obama's Afghan invasion. (http://pubs.usgs.gov/fs/2007/3063/pdf-page.jpg) DOE helped sell this lie because the Russians had already scoured Afghanistan and found it to be fairly worthless as a mining potential. Elon Musk bought into this for his battery monopoly. This is why Steven Chu gave so much money to Russians at Ener1 and Severstal. DOE staff were fully aware of this. (http://www.mining.com/1-trillion-motherlode-of-lithium-and-gold-discovered-in-afghanistan/)

- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk share an apartment and financial programs.

- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.

- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.

- The DOE ATVM and LGP programs resulted in: ***THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA!*** Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need,

and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. **TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL! After realizing this, Applicants and Congressional insiders forced ALL of the kick-back funded companies into bankruptcy as payback for the corruption and abuse of their resources. Said one Senator: *"If they want bankruptcies, we will give them bankruptcies..."***

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- As shown by this letter:
https://news.wttw.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20
...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "***The Cleantech Crash***" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel

to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a ***"first-come, first served"*** basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.

- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

ATTACK PROCESS USED BY GOOGLE AND GIZMODO

(Above, From tens of thousands of internal Google documents leaked)

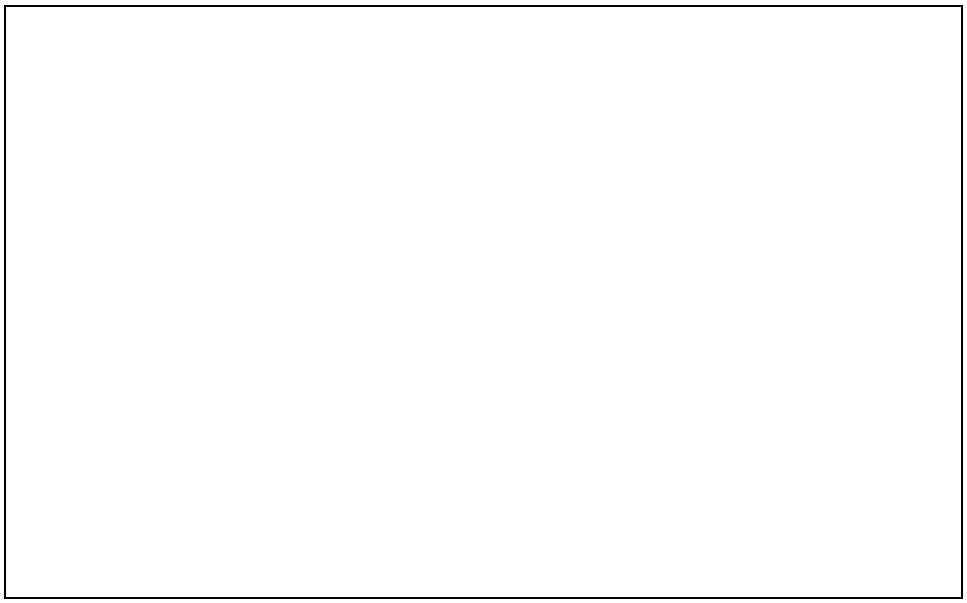
- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have ***NEVER*** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'



by Tyler Durden

In his first pair of interviews since being sworn in, Attorney General Barr told Fox News and WSJ that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation he has tasked

John Durham, the US Attorney from Connecticut, with leading - because Americans need to know whether the government **"put a thumb on the scale"** to try and undermine President Trump both during the campaign and during the first two years of his term, just like **"we need to ensure that foreign actors don't influence the outcome of our elections."**

Separately, he told WSJ that **"government power was used to spy on American citizens**...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, **though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision,** in the summer of 2016, to open a counterintelligence investigation. At this point, **Durham's review isn't a criminal investigation,** and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

> My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!
>
> â Donald J. Trump (@realDonaldTrump) May 17, 2019

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

Thereâ ve been a couple articles in the past few weeks pointing to President Obama as the â clean tech investor in chiefâ and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energyâ s (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didnâ t have a dedicated person in Washington â in some circles they call them lobbyists â maneuvering grant and loan programs, you werenâ t able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between $50 billion and $80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obamaâ s Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleinerâ s investments have had some successful government bids, most notably the $529 million loan to Kleiner portfolio company Fisker Automotive out of the DOEâ s highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the $25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Ventureâ s LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOEâ s loan guarantee and ATVM loan programs. About a third of the DOEâ s loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasnâ t a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked â excluding some potential applicants unnecessarily.â

Thereâ s nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gatesâ calls for boosting federal government investing to $16 billion per year into energy innovation. All Iâ m saying is that this level of influence should be watched.

Another Tesla car catches fire in Hong Kong parking lot: media - ALL TESLA BATTERIES EXPECTED TO HAVE CHEMISTRY DEGRADE AND EXPLODE AS DOE WAS WARNED IN WRITING BY BERNIE TSE, BRIGHT AND XP

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the cityâ s San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

Firemen took 45 minutes to douse the fire.

The vehicle was a Tesla Model S 85 KWH dual power version, added the paper, which gave no explanation of what might have caused the blaze.

Responding to a request from Reuters, Tesla declined to comment. Reuters was not able to contact the vehicle owner or obtain CCTV footage of the incident.

Hong Kongâ s fire services department told Reuters a vehicle caught fire on Sunday, but gave no details, such as the make of the car. Authorities are investigating the cause.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

The automaker has said its EVs are about 10 times less likely to experience a fire than petrol-powered cars.

There have been at least 14 instances of Tesla cars catching fire since 2013, most of them after a crash.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals

involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

You have probably seen the many issues with Elon Musk And Tesla Motors including:

"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"
"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"
"His is not faithful to his girlfriends"
"The workers that build his batteries die or sicken from toxic poisoning"
"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"
"He is addicted to drugs and booze"
"He has sociopath mental issues"
"He is a narcissist"
"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."
"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"
"His partner: Steve Jurvetson, has been charged with sex and corruption issues"
"He arranged government kick-backs with the White House"
"He is the world's biggest government mooch"
"He is a member of the Palo Alto Mafia"
"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"
"More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"
"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"
"His so-called 'foundation" is just a payola and tax evasion scam for his family"
"His batteries are the most dangerous use of lithium ion storage ever conceived"
"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"
"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"
"His SpaceX is nothing more than a domestic spy satellite company"
"Musk's brain chip company tortures small animals in bad science experiments"
"His father screwed his daughter and got her pregnant"
"Dianne Feinstein and her family own Musk interests"
"You can't put out the fires when his batteries explode"
"The fumes from his thermal battery vapors give you cancer, lung and brain damage"

"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."
etc.....

You may have run across Muskâ s self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or live TV debates. Musk will do anything to keep this information from getting out butâ ¦ it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â child labor electric car batteriesâ .

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his â trophy wifeâ Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance â Butt buddyâ . They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VCâ s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk â boyfriendâ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: â Muskâ , â Teslaâ or â Tesla Fireâ . They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no â Tesla Fan Boysâ . All of the fanatic Tesla comments on the internet are Muskâ s, Thielâ s, Jurvetsonâ s and Draperâ s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a â Tesla Fan Boyâ on blogs.

The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why arenâ t all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Letâ s take a look at the â lithiumâ in Muskâ s horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly â filling up with toxic smokeâ as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electrnics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â reportâ from USAID that said there was â A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via â in-kindâ services.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls â SPYGATEâ .

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â)

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create â foreign intelligence,â John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obamaâ s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover

up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy

metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of

trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!!

- Second former employee of controversial data firm to be questioned by special counselâ s inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica â which collapsed after the Observer revealed details of its misuse of Facebook data â confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the companyâ s activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign â received donations or paid for services from Cambridge Analytica â ¦beyond initial scoping workâ .

Damian Collins, chairman of parliamentâ s inquiry into fake news, said it was â no surpriseâ that Kaiser was under scrutiny by Mueller because â her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banksâ .

He said it was now vital Britain had its own inquiry into foreign interference: â We should not be leaving this to the Americans.â

Tom Watson, the deputy leader of the Labour party, echoed Collinsâ s statement, saying: â This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.â

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counselâ s inquiry because of work done with Paul Manafort, Trumpâ s campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months

after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Muellerâ s investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clintonâ s presidential campaign â which indictments from Muellerâ s team say were obtained by Russian military intelligence â to use in Donald Trumpâ s campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: â She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin.â

Her legal representatives later wrote to the paper to say that the allegations, including that she had â channelledâ donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 â long before she worked at Cambridge Analytica â and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her â about how he saw the worldâ . He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had â unsettlingâ parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeriaâ s emails and released damaging information about him to the press weeks before the election.
==========

CBS NEWS 60 MINUTES Lara Logan "Iâ m Being â Targetedâ For Saying the Media is â Mostly Liberal"
by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as â mostly liberal.â

Logan told Breitbart podcaster Mike Ritland the remarks made on his show â which drew widespread attention online â amounted to â professional suicide.â

Defending her remarks on Hannityâ s show, Logan said that as the result of her speaking out about how the media is â mostly liberalâ she has been targeted because she is an independent voice.

â Any journalists who are not beating the same drum and giving the same talking points,â she insisted

â pay the priceâ for not going along with the liberal crowd.

She also called out her targeters by name.

â I know theyâ re going to come after me,â she told Hannity. â Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter.â

She added: â They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They donâ t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? Iâ m not owned by the left or the right.â

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of â weightâ in most news organizations on â one side of the political spectrum.â

â The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So thatâ s just a fact, right?â she told Ritland.

She also trashed reporting based on single, anonymous government sources.

â Thatâ s not journalism, thatâ s horseshit,â Logan stressed. â Responsibility for fake news begins with us. We bear some responsibility for that, and weâ re not taking ownership of that and addressing it. We just want to blame it all on somebody else.â

==========

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Groupâ s intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israelâ s secret services and described themselves as â private Mossads.â Psy-Group initially stood out among its rivals because it didnâ t just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert â influenceâ operations to benefit the candidate. Psy-Groupâ s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The companyâ s posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.â s elite â namely Donald Trump.

â Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,â one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

â There are dozens of payments from the media flowing into their (Fusion GPSâ) account,â one federal law enforcement official said. â One company wired funds to Fusion (GPS) more than a dozen times.â

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trumpâ s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories â likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed â the only company to publish the full bogus dossier â on that list?

And who is on the payroll? We are trying to run that information down.

And why arenâ t these people behind bars?

==========

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a ***'Program'*** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: ***If you cheat rather than compete you will be destroyed.***

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.

B. Suffer the firings or forced terminations of multiple senior staff.

C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.

D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.

E. Have every investor who has placed over $50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

==========

Trump Could Save Taxpayers â Billions Of Dollarsâ By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save â billions of dollarsâ if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO report, released Tuesday, also reported Congress could save up to $4.3 billion by eliminating the loan program that gave $192 million to a failed luxury electric car company.

â The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste,â GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent $170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. **(RELATED: The NYT Walks Back Bombshell EPA Report, Doesnâ t Issue A Correction)**

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost $377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated $18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford.

The Hanford site cleanup came under increased scrutiny after a â take coverâ order was given in 2017 after a tunnel containing radioactive waste collapsed.

â DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this,â GAO reported. â DOE provided technical comments, which were incorporated as appropriate.â

GAO also highlighted an open recommendation to Congress that could save taxpayers up to $4.3 billion.

â Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations,â GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury **automaker Fisker Automotive, which drew down on $192 million before having its government credit stripped away.**

Fiskerâ s loan was sold off to a Chinese billionaire for $25 million in 2013, netting taxpayers a $139 million loss.

|

An exhaustive review of 350+ pages of leaked emails regarding the Obama administrationâ s handling of the various green-energy loan and grant programs makes several things very clear: they lied, engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process â taxed investorsâ patienceâ â as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didnâ t think they were treated unfairly. He told me, â At the end of the day, we couldnâ t get through the process.â But, he admits, he hasnâ t read the emails.

Aptera was trying to build a very efficient electric vehicle with an under $30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didnâ t. Wilbur reports that he didnâ t donate to any candidate. He wanted to keep the whole process clean and do what was â good for America.â

The report from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and â shut down on December 2, 2011.â The report implies that Aptera was led on: â After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of $150 million if the company was able to raise $80 million privately.â And: â The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.â

Apteraâ s 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports Iâ ve written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a blog post specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate), got loans in 2010 and then the Vehicle Production Groupâ s loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissanâ both of which, according to the House report, â were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the â Historic Agreement.â â

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatosâ research, and personal experience, a different ATVM applicant has now taken its case to court citing â corruption and negligence.â

On November 16, 2012, XP Technologies filed a lawsuit against the federal government concerning the DOEâ s denial of XP Technologyâ s loan guarantee application. The complaint alleges: â criminal activities did take place by DOE staff and affiliates.â A November 23 press release announces that XP Technologies is

now represented by Cause of Action, â a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity.â

According to the document filed on November 16, â Plaintiffs' backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award â winnerâ , has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market.â

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: â Staff from within the DOE have provided evidence which is quite compelling.â As Aptera's Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a â principled stand,â which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from â above the agency.â Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo opsâ as well as providing talking points for the president.

Our XP source told us â We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary.â The leaked emails support this accusation, specifically regarding the â business connections.â In her post, Lakatos calls it â green fraternizing.â The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didnâ t provide us with a name, the XP official said, â We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially.â The discovery the lawsuit will provide will expose the â senior senator,â but our previous research shows that Senator Harry Reidâ s actions seem to fit the XP officialâ s comment.

XP Technologies believes that â DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required.â

Having extensively studied the DOEâ s various loan programs, including the ATVM, Lakatos and I agree with our sourceâ s startling conclusion: â Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or?appointed, officials might not be seeing measures ranging from censure or even federal prison time.â

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than our report, the October 31 release of the emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The

plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the Heritage Foundation broke the XP story: â A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energyâ s decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe.â

On November 19, Lakatos, whose work is listed as â evidenceâ in the legal complaint, received a call from Fox Newsâ Gary Gasteluâ who reported on the story on November 20. The next day, Fox News covered the lawsuit on Americaâ s Newsroom. Even the Drudge Report picked up on the story.

XP has a litigation website on which the company states: â The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!â They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for othersâ especially industries who have been wronged by the Obama Administrationâ s practices (such as energy). The lawsuit mayâ or may notâ send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

THE SILICON VALLEY CARTEL MEMBERS
The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than $50.00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger â Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and moreâ ¦)
- Barack Obama â Chicago politician
-Bill Daley â White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer â Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)
- Daniel Cohen â DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod â White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign)(he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Hunter Biden
- David Plouffe â White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough â White House adviser
- Dianne Feinstein â California politician
- Eric Holder â Attorney General- DOJ (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)
- Eric Strickland â Head of Auto Safety agency under DOT (Sent packing/fired/forced to resign)(he is now under investigation. Charged with cover-up of Tesla and GM auto dangers he had known about)
- Gabriel Burt
- Harry Reid â Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and moreâ ¦Forced out of Congress in shame)
- Hillary Clinton â Dynastic politician
- Jack Lew
- Jay Carney â White House press lead (Forced to resign)
- Jeff Berman - Bryan Cave. Berman, the former delegate counter for President Obamaâ s 2008 campaign
- Jeff Peck, Peck, Madigan, Jones & Stewart. Aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee
- Jeffrey Zients
- Jerry Brown â California politician

- Joe Rhodes â White House shill
- Joe Biden - Politican who created Solyndra funds
- John Podesta â White House adviser
- Jonathan Silver â DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
- Joshua Wright - FTC
- Kamala Harrisâ Stock favoritism Insider with her husband
- Katherine Feinstein
- Kathy Zoi
- Ken Alex â Scheme Adviser to Jerry Brown
- Ken Duberstein and Marti Thomas, The Duberstein Group. Duberstein was floated as a candidate for Obamaâ s chief of staff before the president chose Bill Daley, while Thomas is a Democratic vet who worked in the Clinton Treasury Department.
- Lachlan Seward â Energy Department insider gatekeeper
- Melanie Nutter â Pelosi Top Aide
- Matt Rogers â VC and quid pro quo pass-through conduit
- Megan Smith - U.S. CTO
- Mikey Dickerson
- Nancy Pelosi â California politician
- Robert Gibbs â White press office head
- Steven Chu â Secretary of Energy â The most corrupt in US history
- Todd Park â IT manipulator inside White House
-

THE OLIGARCH FINANCIER/BENEFICIARIES OF THE CRIMES - Tracked via financial records and email leaks to quid pro quo:

- Andy Bechtolsheim â VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Bill Gurley
- Carl Gordon
- Chad Hurley - YouTube
- Cheryl Sandberg â Facebook boss, reports to Larry Summers
- Dave McClure â VC
- David Danielson
- David Drummond â Lawyer/Lobbyistâ Google, bribes expert for DC and EU regions (Under investigation. Quail Road, Woodside, CA home bugged)
- David Mott
- David Prend
- David Sacks
- Draper - Fisher â VC firm (Campaign funder who received massive windfalls from Russian mining & tech start-up rigging)
- Elon Musk â CEO â Tesla (He is now under investigation & in multiple lawsuits for fraud)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (All of his personal assets, investments and portfolio holdings are under investigation)
- Emerson Collective -Steve Jobs wife, has one of the largest and stealthiest election data combines
- Eric Paley
- Eric Schmidt â Owner- Google (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
- Gilman Louie â VC, founder on IN-Q-Tel
- Goldman Sachs â Financial packager (Suspected of staging most of the TARP/DOE deals for personal gain

& insider payouts)
- Greylock Capital â Silicon Valley Insider trading operator (Under investigation)
- Ira Ehrenpreis â VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (All of his personal assets, investments and portfolio holdings are under investigation)
- Jacque Littlefield â VC, Dead
- James Bronkema â West Coast Money Man for David Rockefeller and Feinstein financier (Dead)
- Jared Cohen â Google boss and international political manipulator
- Wilson Sonsini Partner Club
- Wilson, Sonsini, Goodrich and Rosatti
- Jim Breyer â VC and CIA intermediary
- Joe Lonsdale â VC, famous for rape and abuse scandal and domestic spying via Palantir
- Johanna Shelton - Google Lobbyist
- John Doerr â Owner â Kleiner Perkins. â Godfatherâ â Silicon Valley Cartel (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)(All of his personal assets, investments and portfolio holdings are under investigation)
- John Lindfors
- Josh Kopelman
- JP Gan
- Keith Rabois -VC
- Ken Howery â VC
- Kleiner Perkins â Campaign funding VC who (Received massive windfalls from Russian mining & tech start-up rigging. Sued. Under investigation. All assets being tracked)
- Larry Page â Google Boss
- Larry Summers â VC
- Lloyd Craig Blankfein â VC and Sachs boss
- Luke Nosek
- Marc Andreessen -VC
- Mario Rosatti â VC
- Mark Zuckerberg â Facebook Boss
- Martin LaGod -VC Firelake Cap
- Mary Meeker â VC
- Max Levchin -VC
- Mckinsey Consulting â The firm you hire to rig white papers and insider hires in government positions for the Palo Alto Mafia
- Michael Moritz -VC
- Neerag Agrawal - VC
- Peter Thiel â VC
- Pierre Omidyarâ VC
- Raj Gupta â VC, arrested
- Rakesh Saxeena â Canadian in-house arrest, arms dealer, western political packager
- Ray Lane â VC
- Reid Hoffman â VC and sex.com partner with Gary Kremen, also match.com
- Richard Blum â VC and director/husband of Dianne Feinstein - Finally dead!
- Roelof Botha
- Sanjay Wagle â VC
- Scott Shleiffer
- Sergy Brin â Google boss
- Steve Chen
- Steve Jurvetson â VC embroiled in sex abuse charges
- Steve Rattner â White House car czar, indicted for fraud
- Steve Spinner â Energy Department manipulation expert, Wife was Solyndraâ s lawyer

- Steve Westly â VC
- Ted Schlein - IN-Q-Tel
- Tim Draper â VC
- Tom Perkins â Dead KPCB Palo Alto Mafia founder
- Tom Steyer â VC
- Tomorrow Ventures â Social manipulation group
- Tony Podesta, Podesta Group. The prolific Democratic fundraiser has seen his firm rocket to the echelons of the top five lobby shops.
- Viktor Vekselberg â Russian business entity
- Vinod Khosla -VC

THEIR OPERATIVES AND HIRED MEDIA ASSASSINS - Tracked via financial records, quid pro quo perks and email leaks to payola. The people in the two lists, above, hired these people to harm citizens:

- A.J. Delaurioâ Defamation-for-sale blogger
- Adam Dachisâ Defamation-for-sale blogger
- Adam Weinsteinâ Defamation-for-sale blogger
- Adrian Covertâ Defamation-for-sale blogger
- Adrien Chenâ Defamation-for-sale blogger
- Al Dâ Amato, Park Strategies. The former GOP New York senator has been a big advocate for online gambling as a lobbyist for the Poker Players Alliance.
- Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck. Mottur heads up lobbying operations at the K Street giant. Ortiz, one of Brownsteinâ s newest hires, is a rising star in Democratic circles.
- Alan Henryâ Defamation-for-sale blogger
- Albert Burnekoâ Defamation-for-sale blogger
- Alex Balkâ Defamation-for-sale blogger
- Alexander Pareeneâ Defamation-for-sale blogger
Alexander Sternhell, Sternhell Group. Previously a Senate Banking Committee staffer, Sternhellâ s two-year-old venture is in the big leagues with clients such as Citigroup Management and PricewaterhouseCoopers.
- Alexandra Philippidesâ Defamation-for-sale blogger
- Allison Spinner â Wife of Steve Spinner and lawyer at WSGR and Solyndra who helped Feinstein rig the Solyndra cash ((Under investigation. All assets being tracked and terminated.)
- Allison Wentzâ Defamation-for-sale blogger
- Andrew Collinsâ Defamation-for-sale blogger
- Andrew Magaryâ Defamation-for-sale blogger
- Andrew McCormack
- Andrew Orinâ Defamation-for-sale blogger
- Andy Barbour, Smith-Free Group. Smith lobbies for several financial and insurance companies but is best known for his work as the lead Democratic lobbyist for the Financial Services Roundtable.
- Angelica Alzonaâ Defamation-for-sale blogger
- Anna Merlanâ Defamation-for-sale blogger
- Ariana Cohenâ Defamation-for-sale blogger
- Ashley Feinbergâ Defamation-for-sale blogger
- Ashley Vance - Elon Musk suck-up and Musk hype monger
- Austin Lau
- Ava Gyurinaâ Defamation-for-sale blogger
- Barry Petcheskyâ Defamation-for-sale blogger
- Black Cube - An attack service providing hit jobs on competitors
- Brendan I. Koernerâ Defamation-for-sale blogger
- Brendan Oâ Connorâ Defamation-for-sale blogger
- Brent Roseâ Defamation-for-sale blogger

- Brian Goncher â Deloitte VC intermediary in the stock market rigging (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦)
Brobeck Law Firm
- Brian Hickeyâ Defamation-for-sale blogger
- Camila Cabrerâ Defamation-for-sale blogger
- Carr & Ferrell - Sony and Facebook's law firm that helps to blockade inventors
- Choire Sichaâ Defamation-for-sale blogger
- Chris Jennings, Jennings Policy Strategies
- Chris Mohneyâ Defamation-for-sale blogger
- Chuck Brain, Capitol Hill Strategies Inc. Once a Clinton White House aide and longtime House Ways and Means Committee staffer
- Civis Analytics â Social manipulation group
- Clover Hopeâ Defamation-for-sale blogger
- Covington & Burling
- Dan Tate Jr., Capitol Solutions. Tate delivers stellar client relations while harnessing 10 years of upper-level Hill and administration experience.
- Daniel Morganâ Defamation-for-sale blogger
- Covington & Burling - corrupt law firm that puts appointees in office for VC's
- David Sandalow
- Diana Moskovitzâ Defamation-for-sale blogger
- Doyle Bartlett, Eris Group. Bartlett has years of Capitol Hill experience and a busy lobbying practice
- Eleanor Shechetâ Defamation-for-sale blogger
- Elizabeth Spiersâ Defamation-for-sale blogger
- Elizabeth Starkeyâ Defamation-for-sale blogger
- Emily Gouldâ Defamation-for-sale blogger
- Emily Herzigâ Defamation-for-sale blogger
- Emma Carmichaelâ Defamation-for-sale blogger
- Erin Ryanâ Defamation-for-sale blogger
- Ethan Sommerâ Defamation-for-sale blogger
- Eyal Ebelâ Defamation-for-sale blogger
- Fred Graefe, Law Offices of Frederick H. Graefe
- Fusion GPS â Defamation and journalist bribery service
- Gabrielle Bluestoneâ Defamation-for-sale blogger
- Gabrielle Darbyshireâ Defamation-for-sale blogger and attack services director
- Gawker Media â DNC/Clinton/Obama character assassination media tool (In Mid-Termination)
- Georgina K. Fairclothâ Defamation-for-sale blogger
- Gerald Cassidy and Gregg Hartley, Cassidy & Associates
- Gizmodo â DNC/Clinton/Obama character assassination media tool (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Gregory Howardâ Defamation-for-sale blogger
- Hamilton Nolanâ Defamation-for-sale blogger
- Hannah Keyserâ Defamation-for-sale blogger
- Heather Deitrichâ Defamation-for-sale blogger
- Heather Podesta, Heather Podesta + Partners. The former congressional aide has built a solid lobbying practice and helps fundraise for Democrats with her husband, Tony Podesta
- Hudson Hongoâ Defamation-for-sale blogger
- Hugo Schwyzerâ Defamation-for-sale blogger
- Hunter Slatonâ Defamation-for-sale blogger
- Ian Fetteâ Defamation-for-sale blogger and Google, Gawker, Jalopnik, Gizmodo media assassin
- Irin Carmonâ Defamation-for-sale blogger
- Jalopnik â Online defamation facade political publication. Pretends to be about cars but is DNC hit job rag
- James Brown Jr â HHS Programming lead in California (Arrested for corruption)

- James J. Cookeâ Defamation-for-sale blogger
- James Kingâ Defamation-for-sale blogger
- Jawed Karim - YouTube
- Jeff Lieberman
- Jennifer Ouelletteâ Defamation-for-sale blogger
- Jesse Oxfeldâ Defamation-for-sale blogger
- Jessica Cohenâ Defamation-for-sale blogger
- Jesus Diazâ Defamation-for-sale blogger
- Jillian Schulzâ Defamation-for-sale blogger
- Joanna Rothkopfâ Defamation-for-sale blogger
- Joel Johnson, The Glover Park Group
- John Cookâ Defamation-for-sale blogger and director of media assassins group
- John Herrmanâ Defamation-for-sale blogger
- John Raffaelli, Capitol Counsel
- Jordan Sargentâ Defamation-for-sale blogger
- Joseph Keenan Trotterâ Defamation-for-sale blogger
- Josh Steinâ Defamation-for-sale blogger
- Julia Allisonâ Defamation-for-sale blogger
- Julianne E. Shepherdâ Defamation-for-sale blogger
- Julie Domenick, Multiple Strategies LLC
- Justin Hydeâ Defamation-for-sale blogger
- Kate Driesâ Defamation-for-sale blogger
- Katharine Trendacostaâ Defamation-for-sale blogger
- Katherine Drummondâ Defamation-for-sale blogger
- Kelly Stoutâ Defamation-for-sale blogger
- Kerrie Uthoffâ Defamation-for-sale blogger
- Kevin Draperâ Defamation-for-sale blogger
- Lacey Donohueâ Defamation-for-sale blogger
- Larry Oâ Brien, OB-C Group
- Lucy Hallerâ Defamation-for-sale blogger
- Luke Maloneâ Defamation-for-sale blogger
- Madeleine Daviesâ Defamation-for-sale blogger
- Madeline Davisâ Defamation-for-sale blogger
- Mario Aguilarâ Defamation-for-sale blogger
- Mark Isakowitz, Fierce, Isakowitz and Blalock. Isakowitz and his GOP lobby shop scored a coup this year when Apple and Facebook both signed up as clients in a two-week span.
- Mark Kadesh, Kadesh & Associates. Kadesh, once chief of staff to Sen. Dianne Feinstein (D-Calif.), has an A-list of California clients
- Matt Hardigreeâ Defamation-for-sale blogger
- Matt Novakâ Defamation-for-sale blogger
- Michael Ballabanâ Defamation-for-sale blogger
- Michael Dobbsâ Defamation-for-sale blogger
- Michael Spinelliâ Defamation-for-sale blogger
- Morrison and Foerster
- Neal Ungerleiderâ Defamation-for-sale blogger
- Nicholas Asterâ Defamation-for-sale blogger
- Nicholas Guido Dentonâ Defamation-for-sale blogger and head of the Gawker, Gizmodo, Jalopnik sleaze tabloid empire
- Omar Kardoudiâ Defamation-for-sale blogger
- Owen Thomasâ Defamation-for-sale blogger
- Patrick Georgeâ Defamation-for-sale blogger and Character Assassination expert
- Patrick Laffoonâ Defamation-for-sale blogger

- Patrick Redfordâ Defamation-for-sale blogger
- Perkins Coie â Campaign conduit law firm
- Rich Juzwiakâ Defamation-for-sale blogger
- Richard Blakelyâ Defamation-for-sale blogger
- Richard Rushfieldâ Defamation-for-sale blogger
- Robert Fingerâ Defamation-for-sale blogger
- Robert Sorokanichâ Defamation-for-sale blogger
- Rory Waltzerâ Defamation-for-sale blogger
- Rosa Golijanâ Defamation-for-sale blogger
- Ryan Brownâ Defamation-for-sale blogger
- Ryan Goldbergâ Defamation-for-sale blogger
- Sam Faulkner Biddleâ Defamation-for-sale blogger, Runs a large part of the Anti-GOP blog programs
- Sam Woolleyâ Defamation-for-sale blogger
- Samar Kalafâ Defamation-for-sale blogger
- Sarah Rameyâ Defamation-for-sale blogger
- Shannon Marie Donnellyâ Defamation-for-sale blogger
- Shep McAllisterâ Defamation-for-sale blogger
- Sophie Kleemanâ Defamation-for-sale blogger
- Stephen Totiloâ Defamation-for-sale blogger
- Steve Elmendorf and Jimmy Ryan, Elmendorf | Ryan. A former aide to ex-House Democratic Leader Richard Gephardt (Mo.), Elmendorf brought in Ryan to help expand the Senate ties of his firm.
- Steve McBee, McBee Strategic. A former aide to Rep. Norm Dicks (D-Wash.), McBee has seen his lobby firm take off.
- Steve Perry and Andy Wright, Dutko Grayling. Perry and Wright man the roster for one of the top 20 lobby shops in Washington.
- Tamar Winbergâ Defamation-for-sale blogger
- Taryn Schweitzerâ Defamation-for-sale blogger
- Taylor McKnightâ Defamation-for-sale blogger
- The Groundworkâ Social manipulation group
- Thomas Jolly, Jolly/Rissler. Jolly is founding chairman of the Washington Caucus, a group that hosts dinners with lawmakers, and a mainstay among lobbyists.
- Thorin Klosowskiâ Defamation-for-sale blogger
- Tim Marchmanâ Defamation-for-sale blogger
- Timothy Burkeâ Defamation-for-sale blogger
- Tobey Grumet Segalâ Defamation-for-sale blogger
- Tom Leyâ Defamation-for-sale blogger
- Tom Scoccaâ Defamation-for-sale blogger

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
- Google, Inc. â Data harvesting company(Ran media attacks, stock market pump and dump PR hype and

character assassinations)(accused of political bribery and kickbacks; tax evasion, and moreâ ¦) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. â CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran â hit-jobsâ on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- Linkedin - Election manipulation networking site
- Solyndra Solar Company â FBI-raided corrupt Clean Tech company
- SpaceX â Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors â Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.

TE STIMONY

ASSESSING THE DEPARTMENT OF ENERGY

LOAN GUARANTEE PROGRAM

VERONIQUE DE RUGY

Senior Research Fellow

In his famous book Economics in One Lesson, economist Henry Hazlitt wrote, â Government encouragement to

business is sometimes as much to be feared as government hostility.â

1

In 2009, renewable energy company Solyndra received $535 million through the federally backed 1705 loan guar-

antee program of the Department of Energy (DOE). Two years later the ï¬“rm ï¬“led for bankruptcy and had to lay

off its 1,100 employees, leaving taxpayers bearing the cost of the loan.

For obvious reasons, more than any other recent events, the waste of taxpayersâ money due to Solyndraâ s failure

has attracted much attention. However, the problems with loan guarantees are much more fundamental than the

cost of one or more failed projects. In fact, the economic literature shows that (1) every loan guarantee program

transfers the risk from lenders to taxpayers, (2) is likely to inhibit innovation, and (3) increases the overall cost

of borrowing. At a minimum, such guarantees distort crucial market signals that determine where capital should

be invested, causing unmerited lower interest rates and a reduction of capital in the market for more worthy

projects. At their worst, they introduce political incentives into business decisions, creating the conditions for

businesses to seek ï¬“nancial rewards by pleasing political interests rather than customers. This is called cronyism,

and it entails real economic costs.

2

Yet, these loan programs remain popular with Congress and the executive. Thatâ s because in general most of the

ï¬“nancial cost of these guaranteed loans will not surface for many years. That means that Congress can approve

billions of dollars to beneï¬“t special interests, with little or no immediate impact to federal appropriations in the

short term, because they are almost entirely off-budget.

HOW DO THESE LOAN GUARANTEES WORK?

The DOE Loan Programs Ofï¬“ce (LPO) administers three separate loan programs: (1) Section 1703 loan guarantees,

(2) Section 1705 loan guarantees, and (3) Advanced Technology Vehicle Manufacturing (ATVM) loans. Here are

descriptions of the three loan programs, as explained by DOE:

3

1. Henry Hazlitt, Economics in One Lesson, in Chapter VI Credit Diverts Production, Laissez-Faire Books, Benicia, CA, 1946, p. 27.

2. Matt Mitchell, The Pathology of Privileges (working paper, Mercatus Center at George Mason University, July 2012).

3. United States Department of Energy, accessed June 13, https://lpo.energy.gov/.

th

Floor, Arlington, VA 22201

The ideas presented in this document do not represent oï¬–cial positions of the Mercatus Center or George Mason University.

Bridging the gap between academic ideas and real-world problems

â ¢ Section 1703 of Title XVII of the Energy Policy Act of 2005 authorizes the U.S. Department

of Energy to support innovative clean energy technologies that are typically unable to obtain

conventional private ï¬“nancing due to high technology risks.

â ¢ Advanced Technology Vehicles Manufacturing (ATVM) loans support the development of

advanced technology vehicles (ATV) and associated components in the United States. They also meet

higher efi¬“ciency standards.

â ¢ The Section 1705 Loan Program authorizes loan guarantees for U.S.-based projects that commenced

construction no later than September 30, 2011 and involve certain renewable energy systems, electric

power transmission systems, and leading edge biofuels.

According to LPOâ s website, DOEâ s loan guarantee authority originated from Title XVII of the Energy Policy Act

of 2005 (P.L. 109â 58).

4

Under Section 1703, the federal government can guarantee 80 percent of a projectâ s total

cost. The American Recovery and Reinvestment Act of 2009 (P.L. 111â 5) amended the Energy Policy Act of 2005

by adding Section 1705.

5

Section 1705 was created as a temporary program, and 1705 loan guarantee authority

ended on September 30, 2011.

The dollar volume of loans that can be guaranteed under DOEâ s authority is predetermined by congressional

appropriations that oversee the program. A simple way to explain how these loans work is the following: If a recipi-

ent defaults on its loan, the federal government pays the remainder of the debt to the lenders and repossesses all

of the assets from the unï¬“nished projects.

6

As with other loan programs, to prevent taxpayersâ exposure, the federal government has established a credit

subsidy fee. In this case, the cost of the fee is determined by DOE, with guidance from OMB. The lenders usually

charge the up-front guarantee fee to the borrower after the lender has paid the fee to DOE and has made the ï¬“rst

disbursement of the loan.

This is not the case for 1705 loans, however. Under the stimulus bill, DOE received appropriated funds to pay

for credit subsidy costs associated with Section 1705 loan guarantees, which, after rescissions and transfers, was

$2.435 billion. As the Congressional Research Service rightly puts it, â Section 1705 loan guarantees were very

attractive as they provided an opportunity to obtain low-cost capital with the required credit subsidy costs paid

for by appropriated government funds.â

7

DOE does not provide loans directly. Instead, borrowers have to apply to qualiï¬“ed ï¬“nance organizations. These

lenders are expected to perform a complete analysis of the application. Then DOE reviews the lenderâ s credit

analysis rather than conducting a second analysis. DOE still makes the ï¬“nal credit and eligibility decision.

DO LOAN GUARANTEES DO WHAT THEY CLAIM TO DO?

Leaving aside the question of whether the government should encourage the production of certain goods or ser-

vices, the economic justiï¬“cation for any government-sponsored lending or loan guarantee program must rest on a

well-established failure of the private sector to allocate loans efï¬“ciently (meaning that deserving recipients could

4. Section 1703 of the Energy Policy Act of 2005 (P.L. 109-58).

5. Section 1705 of the Energy Policy Act of 2005 (P.L. 109-58). Section 1705 was created by amending the EnergyPolicy Act of 2005 through the

American Recovery and Reinvestment Act of 2009 (P.L. 111-5)

6. However, the Oï¬–ce of Management and Budget has calculated that only 55 percent of loan can be recouped from the sale of assets.

7. Phillip Brown, â Solar Projects: DOE Section 1705 Loan Guarantees,â (Congressional Research Service, October 25, 2011), accessed June 13,

2012, http://op.bna.com/env.nsf/id/jstn-8mzszy/$File/CRSSolar.pdf.

MERCATUS CENTER AT GEORGE MASON UNIVERSITY 2

not have gotten capital on their own). Absent such a private-sector deï¬“ciency, the DOEâ s activities would simply

be a wasteful at best, politically motivated at worst subsidy to this sector of the economy.

Yet, many argue that some public policy objectives require the sacriï¬“ce of marketplace efi¬“ciency. It is an accepted

feature of modern American government that some public interests or social policy gains outweigh economic

losses. In the case of green energy, the governmentâ s lending programs could fulï¬“ll speciï¬“c public policy objec-

tives that the marketplace on its own would not otherwise serve or would supply at suboptimal levels. But do they?

In describing its role in the economy, the DOE proclaims that its loans help save the planet

8

by helping to secure

funding for the earlier-stage technologies or the later commercialization stageâ known as the manufacturing

â Valley of Death.â

9

It also claims that the loan recipients will generate economic growth and â greenâ jobs that

otherwise would not appear. DOE can thus be judged on its ability to meet these public policy goalsâ namely, to

ï¬“ll the supply-and-demand gap in the clean energy loan market, particularly for startups.

To measure the DOE results, I looked at the ï¬”ow of DOE credits to evaluate who receives them and whether the

DOE is meeting its stated policy objectives of promoting new startups and encouraging the creation of green jobs.

A close examination demonstrates that neither stated DOE policies nor its actual lending patterns provide evi-

dence that its loan guarantees serve any of its deï¬“ned public policy purpose.

FOLLOWING THE 1705 LOAN GUARANTEE PROGRAM MONEY

Since 2009, DOE has guaranteed $34.7 billion, 46 percent of it through the 1705 loan program, 30 percent through

the 1703 program, and 14 percent through the ATVM.

10

The 1705 (under which Solyndra received funding) authorized loan guarantees for programs for â certain renew-

able energy systems, electric power transmission systems and leading edge biofuels projects that commence

construction no later than September 30, 2011.â This program is a product of the economic stimulus bill of 2009.

As mentioned before, this program offered borrowers better terms than the 1703â in some cases the government

paid for a substantial fee out of appropriated funds, one that is the borrowerâ s responsibility under the 1703. Also,

many 1703-eligible projects were also eligible under the 1705.

The data shows that:

Loan Guarantees by Program

Source: U.S. Department of Energy, Loan Guarantee Programs

â ¢ 26 projects were funded under the 1705, and guaranteed roughly $16 billion in total.

â ¢ Some 2,378 permanent jobs were claimed to be created under the program. This works out to a cost per job of $6,731,034.

â ¢ The recipient of the most 1705 loans is NRG Energy Inc. (BrightSource).

â ¢ NRG Energy Inc. (BrightSource) received $1.6 billion (11 percent of the overall amount guaranteed under the 1705).

â ¢ The top 10 recipients of loans under the 1705 program:

â ¢ Are all solar generation companies,

â ¢ Received 76 percent of the overall amount guaranteed,

â ¢ Received $12.2 billion in loan guarantees, and

â ¢ Included NextEra Energy Resources, LLC (Desert Sunlight), a fortune 200 company;

Abengoa Solar Inc. (Solana), a Spanish multinational company; and Prologis (Project Amp), a

global real estate investment trust. Utility ï¬“rms like NRG Energy received three separate loans

in the top 10 recipient list.

â ¢ Prologis received $1.4 billion (8.75 percent of the total) to install solar panels on top of a building it owns.

â ¢ Solyndra, the now bankrupted solar company, received $535 million in loan guarantees or 3.34

percent of the total.

â ¢ Cogentrix, a wholly owned subsidiary of the Goldman Sachs Group Inc, received a $90 million

guarantee from the government.

Company recipients given in parentheses

MERCATUS CENTER AT GEORGE MASON UNIVERSITY 5

If we organize the data by companies receiving 1705 loans, we ï¬“nd:

â ¢ The recipient of the most 1705 loans is NRG Energy Inc.

â ¢ NRG Energy Inc. received $3.8 billion (23.7 percent of the overall amount guaranteed under the 1705).

â ¢ Four companies received 64 percent, or $10.3 billion, of the total amount guaranteed under the 1705 program. These companies are:

â ¢ NRG Energy,

â ¢ NextEra Energy,

â ¢ Arbogea, and

â ¢ Prologis.

First, it should be noted that very few permanent green jobs were created under the 1705 loan program (or any of

the other loan programs). The Obama administration had initially pushed these projects as job generators, claim-

ing that it could create 5 million jobs in America through investment in green technology.

Also, to the extent that â green jobsâ were created, the $6.7 million cost per job is quite spectacular. This trend and

number probably dismisses this particular loan program as a job program.

Second, as we can see here, under the 1705 program most of the money has gone to large and established companies

rather than startups. These include established utility ï¬“rms, large multinational manufacturers, and a global real

estate investment fund. In addition, the data shows that nearly 90 percent of the loans guaranteed by the federal

government since 2009 went to subsidize lower-risk power plants, which in many cases were backed by big com-

panies with vast resources. This includes loans such as the $90 million guarantee granted to Cogentrix, a subsidiary

of Goldman Sachs. Currently, Goldman Sachs ranks number 80 on the list of Americaâ s Fortune 500 companies.

11

This probably means that if there were an actual gap between the supply and demand for loans for energy com-

panies, startups, or others, this program wouldnâ t be ï¬“lling it. In fact, most of these loans look like government

transfers of the worst kind: subsidies to very large corporations very much resembles cronyism.

Third, there seems to be an even more troubling trend of â double dippingâ by large companies that received loan

guarantees from the DOE program. Many of the companies that have beneï¬“tted from subsidized loans under

the 1705 guarantee program also received additional grants under the American Recovery and Reinvestment Act

(ARRA). For example, Prologis (which beneï¬“tted from $1.4 billion in subsidized loans) received a grant for $68,000

for the purpose of â rent for warehouse spaceâ under the Recovery Act.

Green Mountain Energy, a company of NRG Energy, received two grants under the ARRA in the second quarter of

ï¬“scal year 2011. Likewise, Reliant Energy and Reliant Energy Tax Retail LLC, two other NRG Energy companies,

reported receiving at least 37 grants under the ARRA. These grants augmented the $3.8 billion in loan guarantees

for NRG Energy distributed under the Section 1705 Loan Program.

NRG will also be eligible to receive $430 million from the Department of the Treasury.

12

In addition, many com-

panies beneï¬“ted from the Department of Treasury 1603 grants.

13

Quoted in the New York Times recently, NRGâ s chief executive, David W. Crane, explained how his company and

its partners have secured $5.2 billion in federal loan guarantees, plus hundreds of millions in other subsidies for

four large solar projects. â I have never seen anything that I have had to do in my 20 years in the power industry

that involved less risk than these projects,â he said in a recent interview. â It is just ï¬“lling the desert with panels.â

14

Examples of companies beneï¬“tting from multiple assistance programs initiated during this period abound. For

instance, in addition to the $538 million it received under the 1705 loan program, Solyndra beneï¬“ted from a $10.3

million loan guarantee that the Ex-Im Bank extended to a Belgian company (described in the Ex-Im deal data as

â Zellik Ii Bvbaâ) to ï¬“nance a sale of Solyndra products.

15

Solyndra isnâ t alone. First Solarâ s Antelope Valley project received a $646 million 1705 loan in 2011 through its

partner Exelon, and per my calculation from the Ex-IM Bank FOIA deal data information for FY2011,

16

the com-

pany also scored $547.7 million in loan guarantees to subsidize the sale of solar panels to solar farms abroad.

More troubling is the fact that some of the Ex-Im money went to a Canadian company named St. Clair Solar,

which is a wholly owned subsidiary of First Solar.

17

St. Clair Solar received a total of $192.9 million broken into

two loans to buy solar panels from First Solar. In other words, the company received a loan to buy solar panels

from itself. Incidentally, First Solar also received a $16.3 million loan from the government in 2010 to expand its

factory in Ohio.

18

This double-dipping by energy companies isnâ t new, unfortunately. While there is no doubt that the deals are

lucrative for the companies involved, taxpayers have a lot to lose. Further, double-dipping provides evidence that

businesses will be tempted to steer away from productive value creation for society and instead work on narrowly

serving political interests for ï¬“nancial gain.

A great deal of attention has been focused on Solyndra, a startup that received $528 million in federal loans to develop cutting-edge solar technology before it went bankrupt, had to lay off over a thousand workers, and left taxpayers to foot the bill. Obviously, the considerable waste of taxpayersâ money is upsetting. But it is only one aspect of the fundamental problems caused by loan guarantee programs in general, and DOEâ s clean energy loan programs in particular.

1. Socialized Losses and Privatized Gains

Historically, loans guaranteed by the government have had a higher default rate than the loans issued by the private sector without government guarantee. For instance, the Small Business Administration (SBA) has a long-term default rate of roughly 17 percent.

19

This compares to 4.3 percent for credit cards and 1.5 percent for bank loans guaranteed by the Federal Deposit Insurance Corporation.

Also, the Congressional Budget Ofi¬“ce has calculated that the risk of default on the DOEâ s nuclear loan guarantee program, for example, is well above 50 percent.

20

In 2011, the CBO updated its study and replaced the embarrassing default rate with a list of variables affecting the rate.

21

While it doesnâ t provide a speciï¬“c rate, the report asserts that higher equity ï¬“nancing of these projects would reduce the risk of default. However, this is rarely the case, as most loan guarantee programs cover 80 percent of their ï¬“nancing through debt rather than equity.

Moreover, according to the CBO, when the federal government extends credit, the associated risk of those

obli-

gations is effectively passed along from private lenders onto taxpayers who, as investors, would view this risk as

costly. In other words, when the federal government encourages a risky loan guarantee it is â effectively shifting

risk to the members of the public.â

Also, if the loan isnâ t repaid, then the cost of the investment is to taxpayers. However, if the loan is repaid as

expected, the lender will beneï¬“t from all the interest payments it collected thanks to a fairly risk-free loan, and

the borrower will collect the fruit of its successful business venture. In other words, loan guarantee programs are

yet another way that the federal government socializes losses while privatizing beneï¬“ts.

http://mercatus.org/publication/gambling-other-peoples-money.

2. Moral Hazard

Federally backed loans create a classic moral hazard. Because the loan amount is guaranteed, banks have less incentive to evaluate applicants thoroughly or apply proper oversight. In other words, the less skin the lender has in the game, the less likely the lender will effectively vet the quality of the project. Also, the company that borrows the money has less skin in the game than it would if its loan werenâ t guaranteed. In addition, each time the government bails out a ï¬“rm or has to shoulder the cost of a loan guarantee that got into ï¬“nancial trouble, it reinforces the signal to borrowers and bankers alike that itâ s OK to take excessive risks.

In a March 2012 report, the Government Accountability Ofï¬“ce (GAO) found that the DOE loan guarantee pro-gram was riddled with program inefï¬“ciencies, putting the fairness of decisions about what ï¬“rms receive loan guarantees into question.

23

When GAO requested data from the DOE on the status of the applications, the DOE did not have consolidated data readily available and had to assemble these data over several months from various sources. Inadequate documentation and out-of-date review processes reduce the assurance that the DOE has treated applicants consistently.

These ï¬“ndings do not prove the ability of the DOE to fully assess and mitigate project risks. Moreover, while in the absence of government intervention the private sector builds the infrastructure to assess risk, the federal gov-ernment has neither the expertise nor the incentive to build such a safety net. This increases the likelihood that

loan guarantees will be awarded based on factors other than the ability of the borrower to repay the loan, such as

political connections and congressional interest in local pork.

24

The moral hazard of loan guarantees increases when rules intended to prevent the program from being a pure

giveaway to companies are removed. This is the case, for instance, when as part of the stimulus bill of 2009, the

government lifted the subsidy fees for 1705 loans. This move increases the cost to taxpayers and attracts high-risk

companies.

3. Mal-investments

Loan guarantee programs can also have an impact on the economy beyond their cost to taxpayers.

Mal-investmentâ the misallocation of capital and laborâ may result from these loan guarantee programs. In theory,

banks lend money to the projects with the highest probability of being repaid. These projects are often the ones

likely to produce larger proï¬“ts and, in turn, more economic growth. However, considering that there isnâ t an inï¬“-

nite amount of capital available at a given interest rate, loan guarantee programs could displace resources from

non-politically motivated projects to politically motivated ones. Think about it this way: When the government

reduces a lenderâ s exposure to fund a project it wouldnâ t have funded otherwise, it reduces the amount of money

available for projects that would have been viable without subsidies.

This government involvement can distort the market signals further. For instance, the data shows that private

investors tend to congregate toward government guarantee projects, independently of the merits of the projects,

taking capital away from unsubsidized projects that have a better probability of success without subsidy and a

more viable business plan. As the Government Accountability Ofï¬“ce noted, â Guarantees would make projects [the

24. King and Montgomery, â Letâ s Reset,â 22.

federal government] assists ï¬“nancially more attractive to private capital than conservation projects not backed by

federal guarantees. Thus both its loans and its guarantees will siphon private capital away.â

25

This reallocation of resources by private investors away from viable projects may even take place within the same

industryâ that is, one green energy project might trade off with another, more viable green energy project.

More importantly, once the government subsidizes a portion of the market, the object of the subsidy becomes a

safe asset. Safety in the market, however, often means low return on investments, which is likely to turn venture

capitalists away. As a result, capital investments will likely dry out and innovation rates will go down.

26

In fact, the data show that in cases in which the federal government introduced few distortions, private inves-

tors were more than happy to take risks and invest their money even in projects that required high initial capital

requirements. The Alaska pipeline project, for instance, was privately ï¬“nanced at the cost of $35 billion, making

it one of the most expensive energy projects undertaken by private enterprise.

27

The project was ultimately aban-

doned in 2011 because of weak customer demand and the development of shale gas resources outside Alaska.

28

However, this proves that the private sector invests money even when there is a chance that it could lose it. Private

investment in U.S. clean energy totaled $34 billion in 2010, up 51 percent from the previous year.

29

Finally, when the government picks winners and losers in the form of a technology or a company, it often fails.

First, the government does not have perfect or even better information or technology advantage over private

agents. In addition, decision-makers are insulated from market signals and wonâ t learn important and necessary

lessons about the technology or what customers want. Second, the resources that the government offers are so

addictive that companies may reorient themselves away from producing what customers want, toward pleasing

the government ofï¬“cials.

4. Crowding Out

To some (for example, those lucky enough to receive the loan guarantee), government money may seem to be free.

But it isnâ t, of course. The government has to borrow the money on the open market too. This additional borrow-

ing comes from Americansâ savings, as does the money that Americans invest in the private sectorâ s growth. There

comes a point when there just arenâ t enough savings to satisfy both masters. In other words, when government

runs a deï¬“cit to ï¬“nance its preferred projects, it can affect private sector access to capital, and lead to a reduction

in domestic investment.

Economists use the term â crowding outâ to describe the contraction in economic activity associated with deï¬“cit-

ï¬“nanced spending.

30

In addition, the competition between public and private borrowing raises interest rates for all borrowers, includ-

ing the government, making it more expensive for domestic investors to start or complete projects.

Over time, this could mean that American companies will build fewer factories, cut back on research and develop-

ment, and generate fewer innovations. As a result, our nationâ s future earning prospects will dim, and our future

living standards could suffer.

5. Cronyism

In a 2003 speech to the National Economists Club in Washington, D.C., thenâ Federal Reserve Governor Edward

M. Gramlich argued that loan guarantee programs are unable to save failing industries or to create millions of jobs,

becauseâ he explainedâ the original lack of access to credit markets is caused by serious industrial problems, not

vice versa. If an applicantâ s business plan cannot be made to show a proï¬“t under reasonable economic assump-

tions, private lenders are unlikely to issue a loan. And they would be right not to.

Then why is the federal government still guaranteeing loans? One reason is it serves three powerful constituen-

cies: lawmakers, bankers, and the companies that receive the subsidized loans.

Politicians are able to use loan programs to reward interest groups while hiding the costs. Congress can approve

billions of dollars in loan guarantees with little or no impact to the appropriations or deï¬“cit because they are almost

entirely off-budget. Moreover, unlike the Solyndra case, most failures take years to occur, allowing politicians to

collect the rewards of granting a loan to a special interest while skirting political blame years later when or if the

project defaults. Itâ s like buying a house on credit without having a trace of the transaction on your credit report.

It is also easy to understand why companies and company executives beneï¬“t from these loans and may seek them

out. However, this shouldnâ t obscure the fact that this preferential treatment comes at the expense of the taxpayer,

and ultimately at the expense of our market and political system.

But another potential beneï¬“ciary of these loans is the ï¬“nancial institutions that issue them. With other loan pro-

grams such as the SBA, there is evidence that lenders may have an incentive to favor borrowers that qualify for a

loan with a government guarantee over those that do not. When a small business defaults on its obligation to repay

a loan, bankers do not bear most of the cost; taxpayers do. Meanwhile, lenders make large proï¬“ts on SBA loans

by pooling the guaranteed portions and selling investors trust certiï¬“cates that represent claims to the cash

ï¬”ows.

How proï¬“table is this? Testifying before Congress in April 2006, David Bartram, the president of the SBA Divi-

sion of U.S. Bancorp, the nationâ s sixth-largest ï¬“nancial services company, explained that â return on equity of SBA

loans can exceed 70 percent.â

31

A 70 percent return on equity (RoE) is remarkably high. Right now, the ï¬“ve-year

average RoEs for the two biggest banks in Americaâ Citigroup and Bank of Americaâ are 16.2 percent and 14.5

percent, respectively.

More study is required to determine whether a similarly outsized return to ï¬“nancial institutions occurs with the

DOE program, but the parallels between the DOE and SBA programs suggest this is a possibility.

CONCLUSION:

The Department of Energyâ s loan guarantee programs have been the focus of much public attention since energy

company Solyndra went bankrupt last year, leaving taxpayers with a $538 million bill. Of equal concern to the

signiï¬“cance of this waste, however, is the distortion and incentives experienced by both lenders and companies

that participate in the government loan program, as well as the distortion of market signals. Further looking at

where the money is going, the evidence seems to go solidly against the idea that they are achieving their goals.

And the systematic economic harm done by rewarding companies that forgo value creation in favor of pursuing

ï¬“nancial beneï¬“t through the political system creates long term consequences for our economy and our country.

STAFF REPORT

U.S. HOUSE OF REPRESENTATIVES

112

TH

CONGRESS

March 20, 2012

2

Executive Summary

After conducting a substantial review of the Department of Energyâ s (DOE) loan guarantee program, it is clear that the significant losses absorbed by taxpayers as a result of Solyndraâ s collapse is just the beginning. The investigation conducted by the House Committee on Oversight and Government Reform has uncovered numerous examples of dysfunction, negligence and mismanagement by DOE officials, raising troubling questions about the leadership at DOE and how it has administered its loan guarantee programs.

By the expiration of Â§ 1705 program in September 2011, the DOE had approved 27 projects totaling more than $14.5 billion in guaranteed loans. Inexplicably, DOE management has turned a blind eye to the risks that have been glaringly apparent since the inception of the program.

This report will demonstrate how DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. The Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances demonstrating that when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration.

DOE has overseen a process wrought with misdirection, changing and expanding requirements, unexplained delays, gross mischaracterizations, and a never-ending cycle of excuses. Not only does it appear that DOE purposely directed taxpayer funds at a failing enterprise, DOEâ s action robbed taxpayers of genuine investment toward renewable energy.

3

Key Findings

â ¢ The Committee has identified a pattern indicative of poor management and a bias toward unconstrained lending that resulted in the creation of a high risk, speculative and undiversified loan portfolio that could ultimately result in substantial loss of taxpayer dollars. (pg. 3)

â ¢ From the very inception of the program, warnings signs existed pointing to a likely loss of taxpayer dollars that went ignored by Administration officials. (pg. 7)

â ¢ DOE invested a disproportionate amount of its funds into solar technology leaving taxpayers vulnerable by overemphasizing a single technology. 16 of the 27 1705-backed projects employed solar technology â that represented 80 percent of DOEâ s funds. (pg. 7)

â ¢ The billions of dollars in loan guarantees and cash grants directed at a Spanish firm, Abengoa, reveal the excessive risks associated with directing that volume of subsidy to a single firm. Abengoa managed to obtain a DOE loan commitment for the lowest rated project across the entire DOE Junk portfolio â which received an extraordinarily low CCC rating and was still approved by DOE for a direct loan to the project. This overinvestment in this single firm will likely cause substantial harm to the taxpayer. (pg. 12)

â ¢ DOEâ s failure to diligently oversee costs and set prudent limitations on executive compensation while it distributed billions of dollars in loan commitments has created a significant moral hazard that has created enormous risks for DOE and taxpayer funds. (pg. 14)

â ¢ Beacon Power Corp, the second recipient of a Â§ 1705 loan guarantee, paid three executives more than a quarter million dollars in bonuses in March 2010. Eighteen months later, Beacon declared bankruptcy â leaving taxpayers to repay the loan. (pg. 13)

â ¢ BrightSource Energy, recipient of a $1.6 billion loan guarantee to build a solar generation facility, has spent more than $56 million on a desert tortoise relocation program. BrightSource has indicated that the exploding cost of tortoise relocation program threatens to derail the entire $1.6 billion project â leaving taxpayers on the hook for the enormous sums on money spent on construction thus far. (pg. 14)

â ¢ DOE has engaged in a disturbing pattern of suspending the approval of a credible project that adheres to all stated standards, only to later approve massive funding for a project proven to be nowhere nearly as far along in the process as DOE purported. DOEâ s favoritism significantly harmed numerous companies that had relied on the promise of 1705 financing. The perception is that DOE actively misleads applicants about the status of their loan application, thereby encouraging these firms to misallocate capital, which has led to financial harm. (pg. 17-19)

4

â ¢ DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. The Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances showing that when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration. (pg. 22)

â ¢ Substantial evidence indicates that in two cases officials in the Loan Programs Office deliberately mischaracterized substantively identical technologies as dissimilar.

Additionally, there is evidence that applicants, with the encouragement of department officials, intentionally mischaracterized their projects as â innovativeâ in an effort to access the Federal Financing Bank and defeat these prudential requirements. (pg. 23-28)

â ¢ There appears to be a significant amount of evidence indicating that DOE manipulated analysis and strategically modified evaluations in order to issue loans to First Solar that would qualify under the statutory guidelines. An application that should otherwise fail, but instead passes under improper influence and through manipulation of analysis, results in the defrauding of taxpayers and misappropriation of assets. (pg. 32)

â ¢ DOE Violated the Statutory Requirement that Projects Commence Construction by September 30, 2011. (pg. 32)

â ¢ In almost every public statement about its loan guarantee program, DOE touts job creation. DOEâ s Loan Programs Office webpage proudly proclaims that DOE expects the loans and loan guarantees to â employâ over 60,000 people. The site also breaks down the number of jobs created or saved by each loan or loan guarantee, and issues press releases for specific projects discussing job creation. These figures are misleading and attempt to pass off jobs that already existed as new jobs. (pg. 37-40)

â ¢ Solopower accepted $40 million of Oregon taxpayer money in addition to DOEâ s approval of a $197 million loan via the Federal Financing Bank (FFB). They received this federal assistance despite a rather dire prediction of Solopowerâ s prospects by Standard & Poorâ s (S&P) which predicted that Solopower will fail to meet its debt obligations. (pg. 47)

â ¢ Despite warnings from both S&P and its own internal analysis regarding risky business models, DOE proceeded with a $25 million grant for Beacon Power. In April 2010, S&P evaluated the loan guarantee project and assigned it a dismal CCC+ credit rating noting that â Beacon is currently an unprofitable start-upâ and that â significant exposure to commodity price volatilityâ could significantly hurt the company. S&P ran two default

scenarios, both of which demonstrated that taxpayers would lose millions. (pg. 49)

5

â ¢ Fitch Ratings evaluated the Abound Solar project, which was approved for a $400 million conditional loan guarantee, and assigned it a junk credit rating. Fitch gave the project a credit rating of â Bâ (worse than Solyndraâ s) with a recovery estimate of only 45%. Fitch labeled the project â highly speculativeâ and described Abound as lagging in technology relative to its competitors, failing to achieve stated efficiency targets, and expecting that Abound Solar will suffer from increasing commoditization and pricing pressures.

Abound Solar announced on March 1

st

that it would stop producing solar panels and

would fire 180 employees, even though it has already received $70 million from DOE. (pg. 50-51)

â ¢ On June 15, 2010, DOE announced that it would conditionally issue a $98.5 million partial loan guarantee to Nevada Geothermal Power Company. The loan did not finance any new construction and therefore did not help to create a single new job. Yet, in the press release for the project, Secretary Chu and Senate Majority Leader Harry Reid touted Blue Mountainâ s potential, with Senator Reid stating, â I am glad to see economic recovery funding being used to put Nevadans to work on a project that will help us achieve energy independenceâ ¦â DOEâ s awarding of this loan guarantee raises questions about why DOE was investing significant taxpayer resources in an entity with well-established financial difficulties. Nevada Geothermal has a well documented history of major financial problems. By the time DOE conditionally approved the loan guarantee, Nevada Geothermal had already violated contract terms and debt covenants relating to financing from its primary lender, TCW. According to Nevada Geothermalâ s financial statements, the firm would not avoid default without the benefit of a loan guarantee. (pg.

53-54)

6

I. Introduction

A. A History of Federal Government Loan Guarantees

For decades federal loan guarantees supported a variety of policy objectives, â including home ownership, university education, small business growth, international development, and others.â

1

In 1976, the Congressional Budget Office (CBO) defined loan guarantees as â a loan or security on which the federal government has removed or reduced a lender's risk by pledging to repay principal and interest in case of default by the borrower.â

2

Loan guarantees supporting â cleanâ energy-related projects began in the 1970s as a response to the perception of record high oil prices for the foreseeable future and the notion that the country was in the midst of an â energy crisis.â

3

The Energy Security Act of 1980 authorized $20 billion for the development of a synthetic fuels industry via a new government enterprise, the U.S. Synthetic Fuels Corporation (SFC).

4

Loan guarantees were among the public finance tools available to SFC. The Great Plains coal gasification project was the only one of the five SFC projects to utilize a loan guarantee. The Great Plains project (located in Beulah, ND), â which converts lignite coal into pipeline-quality methane (the primary component of natural gas), received a $2 billion federal loan guarantee (approximately $1.5 billion of the loan guarantee was actually used) to construct the plant.â

5

Because the value proposition of the project hinged on gas prices remaining high for a long period of time, in 1985, when gas prices dropped below the level at which Great Plains was cost competitive, the project â was not able to meet debt service requirements and subsequently defaulted on its loan obligations.â

6

The Office of Alcohol Fuels at DOE, created by the Energy Security Act of 1980, had the authority to issue $265 million in loan guarantees for projects related to alcohol fuels.

7

Three projects received loan guarantees. Of them, â one had to refinance its loan, one experienced technology performance complications, and one ceased operations.â

8

After the failures of loan guarantees via the Energy Security Act of 1980, clean energy loan guarantees were not again funded until the American Recovery and Reinvestment Act of 2009.

9

A recent report from the Congressional Research Service points out that in 1976 the Congressional Budget Office (CBO) identified inherent problems with loan guarantees that were relevant then and are still relevant today. The background paper, titled â Loan Guarantees:

1

PHILLIP R. BROWN, CONGRESSIONAL RESEARCH SERVICE, LOAN GUARANTEES FOR CLEAN ENERGY TECHNOLOGIES: GOALS, CONCERNS, AND POLICY OPTIONS (Jan. 17, 2012), available at http://www.crs.gov/pages/Reports.aspx?PRODCODE=R42152&Source=search, [hereinafter Brown]

9

Title XVII of the Energy Policy Act of 2005 created the renewable energy loan guarantee program at the Department of Energy but did not provide funding for loan guarantees. See generally 42 U.S.C. Â§Â§ 16511-16514.

7

Current Concerns and Alternatives for Control,â explains that loan guarantees disorient risk evaluation:

When commercial lenders originate loans that are guaranteed by the government, these lenders may be more concerned with the adequacy of the loan guarantee agreement than by the actual risk of the project. As a result, projects may not receive an adequate amount of due diligence by the lender, therefore increasing the federal government's risk exposure.

10

The CBO also notes that â while such guarantees reduce the risk of loss to lender and borrower, they cannot reduce the project's risk of economic failure.â

11

Furthermore, the paper explains that loan guarantees can be attractive to Congress because the costs, on paper, appear small but fail to fully account for unforeseen risks.

12

Failing to heed these warnings has led to widespread taxpayer losses from loan guarantees, from Great Plains in 1985 to Solyndra and Beacon Hill in 2011.

B. An Overview of the DOE Section 1703 and 1705 Loan Programs

Congress first authorized the Department of Energyâ s Loan Guarantee Program under title XVII of the Energy Policy Act of 2005.

13

The program purportedly incentivizes energy innovation by making it easier for companies to secure loans for projects that employ new technologies to promote energy efficiency, renewable energy, and advanced transmission.

14

Section 1703 specifically authorizes the Secretary of Energy to make loan guarantees for projects that employ innovative technology to reduce greenhouse gas emissions.

15

To date, the DOE has conditionally approved three projects under Â§ 1703, totaling $10.4 billion in guaranteed loans.

16

The American Recovery and Reinvestment Act of 2009 significantly expanded the Secretaryâ s loan guarantee authority under a newly-created Â§ 1705.

17

This section authorized the Secretary to issue loan guarantees for renewable energy projects â including those employing non-innovative technologies â that commenced construction no later than September 30, 2011.

18

10

Brown, supra note 1.

Additionally, in contrast to loan guarantees issued under Â§ 1703, the project sponsor did not have to pay for the cost of the loan guarantee because the government covered the credit subsidy

8

costs.

19

The short timeframe for eligibility and the congressional appropriation of the credit subsidy cost reflect Â§ 1705â s primary purpose: economic stimulus.

20

The DOE issued its first Â§ 1705 loan guarantee solicitation on July 29, 2009.

21

By the expiration of Â§ 1705 program in September 2011, the DOE had approved 27 projects totaling over $14.5 billion in guaranteed loans.

22

The DOEâ s Loan Programs Office awards and administers loan guarantees under three sets of official rules: the statutory requirements of Â§ 1703 and 1705, the departmental regulations issued pursuant to statute, and the departmentâ s formal solicitations for loan guarantee applications.

23

This initial report focuses on the Department of Energyâ s portfolio of loan guarantees issued under Â§ 1705 of Title XVII. These loan guarantees were issued under two solicitations which differed in their eligibility requirements and financing method. The first solicitation targeted projects that employed innovative technologies.

Naturally, these rules describe the

eligibility requirements with increasing specificity. The redundancy and specificity of these criteria testifies to their importance; such prudential regulations make the difference between responsible stewardship of the program and a taxpayer-financed earmark.

24

Under this solicitation, the project

sponsor could acquire the underlying loan from U.S. government through the Federal Financing Bank.

25

The second solicitation created the â Financial Institution Partnership Program.â

26

This

program accepted projects that employed non-innovative (i.e., already commercialized) technology, but required the project sponsor to acquire the underlying loan from a private financial institution.

27

Committee staff evaluated renewable energy projects that received loan commitments

from DOE or from private lenders partnering with DOE. Staff identified a pattern indicative of poor management and a bias toward unconstrained lending that resulted in the creation of a high risk, speculative and undiversified loan portfolio. In this report, we consider all aspects of loan commitments in the context of the broader marketplace to reveal the extent of the risk taxpayers face as a result of competition within the domestic energy industry and the global renewable

energy industry.

9

The Advanced Technology Vehicle Manufacturing (ATVM) Program was created in 2008 as part of Â§ 136 of the Energy Independence and Security Act of 2007.

28

According to the U.S. Department of Energy (DOE), the purpose of the ATVM Program is to provide â direct loans to support the development of advanced technology vehicles and associated components in the United States.â

29

The Energy Independence and Security Act set aside $25 billion for direct loans and appropriated another $7.5 billion to support these loans.

30

To qualify for a direct loan under the ATVM Program, the project and the sponsoring company must meet several criteria. First, in order to be eligible for a loan a company must either manufacture an advanced technology vehicle (ATV) or manufacture components for ATVs. Companies must also be â financially viable without the receipt of additional federal funding for the proposed project other than the ATVM loan.â

31

DOE defines â advanced technology vehicleâ as a light duty vehicle that meets Clean Air Act regulations established by the U.S. Environmental Protection Agency (EPA) and is 125 percent of the average of the Corporate Average Fuel Economy (CAFE) for similar vehicles.

32

The loan must finance the reequipping, expanding, or establishing of a manufacturing facility in the United States or the costs of engineering integration performed in the United States.

33

As of February 2012, the ATVM Program loaned $8.3 billion to five projects.

34

Most notably, two of the largest companies in the country, Ford Motor Company and Nissan North America, received over $7.3 billion to retool and upgrade manufacturing facilities for vehicles that were deemed ATVs by DOE.

35

Fisker Automotive and Tesla Motors received $529 million

and $465 million, respectively, from the ATVM program.

36

Fisker produces plug-in hybrid

electric vehicles in a manufacturing plant in Delaware.

37

Its first vehicle, the Karma, costs well

over $100,000 to purchase.

38

Tesla produces three models of plug-in electric cars at its

manufacturing plant in California. Finally, The Vehicle Production Group LLC received a $50

million loan to support the creation of a factory-built wheelchair vehicle that runs on compressed

natural gas.

advanced high strength steel (AHSS) used to make component parts for ATVs.

40

Almost 100

companies have applied for loans through the program; however, an overwhelming majority still await a decision from DOE on the status of their applications.

41

II. The DOE Portfolio of Loan Commitments

DOE committed to issuing 27 loans or loan guarantees under the Â§ 1705 program. These loan commitments total in excess of $16 billion. At the outset, the ratings agencies rated 23 of these loans as non-investment grade categories, also known as â Junk,â due to their poor credit quality, while the other four were rated BBB, which is at the lowest end of the â investmentâ grade of categories. Overall, DOEâ s 1705 portfolioâ s initial unweighted average rating was BB-, which is considered â Junk grade.â According to Fitch, a â BBâ rating is speculative and indicates an elevated vulnerability to default risk.

42

40

Press Release, Department of Energy Offers Severstal Dearborn, LLC a $730 Million Conditional Loan Commitment for Michigan Project, U.S. Depâ t of Energy, July 13, 2011.

Accordingly a BB- is on the low end of what are considered to be â speculative investments,â barely escaping the classification of â highly speculativeâ investments.

Within the range of non-investment grade credit risk, six of the Junk loans were rated at the lower tiers of the range. Specifically, these six projects or loans received ratings within either the â Bâ or â CCCâ categories under the Fitch or Standard and Poorâ s classifications. Despite lending to highly speculative and troubled projects, the government only charged those green energy firms its own cost to borrow money. In other words, the government sought no profit or compensation for credit risk. Given the extent of losses already apparent, the failure to seek any compensation for credit risk inevitably means the taxpayer will lose substantial

funds. This is distinguishable from normal business practices, where banks or investment firms charge a premium or require more upfront capital as a condition for agreeing to finance riskier

projects; thus, if the project were to go completely under, the banks would have some capital to show for the losses.

A. DOEâ s High Risk Loan Portfolio

At an October 2011 press conference, after the collapse of Solyndra, President Obama commented on the 1705 loan portfolio saying that â we knew from the start that the loan guarantee program was going to entail some risk, by definition. If it was a risk-free proposition, then we wouldnâ t have to worry about it. But the overall portfolio has been successful.â

43

As this report reveals, it appears that taxpayer losses associated with Solyndra are just the tip of the iceberg. Clues warning of this risk have been apparent from the inception of the program. This does not bode well for the future of DOEâ s loan portfolio. Moreover, most of the energy projects funded under 1705 continue construction or just plan to begin construction. As projects proceed and spend their capital, additional weaknesses will be exposed and more loan recipients will begin to fail.

However, the risk conceded by President Obama is larger than he or Secretary Chu have publically acknowledged. Left unsaid is the continuing and mounting risks taxpayers face with each additional disbursement of funds.

Secretary Chu has done very little to mitigate these risks. In the first instance, DOE failed to abide by the number one investment rule of thumb â diversify your portfolio. Instead of making investments in a broad range of emerging technologies, DOE sunk 80% of its funds into either solar manufacturing or solar generation projects.

44

This overemphasis on one type of technology leaves taxpayers vulnerable to changes in the market for solar energy. After Solyndra collapsed, Energy Secretary Steven Chu claimed that â this company and several others got caught in a very, very bad tsunamiâ and then blamed China and the recession in Europe.

45

[C]hanges in business or economic conditions center upon the intermediate and longer term pricing of PV solar panels which are now under extreme competitive pressures. Fitch expects PV pricing pressures throughout the term of the DOE loan and this factor will be the largest challenge facing Solyndra and the largest credit risk incurred in repayment of the Fab 2 loan according to its terms.

Secretary Chu neglected to mention the extraordinarily clear warning by Fitch Ratings (Fitch) prior to DOEâ s commitment. Specifically, Fitch stated:

46

As the above excerpt reveals, prior to approving Solyndra, Fitch warned DOE that extreme competition within the solar panel market threatened pricing of solar panels in the coming months and years and that this was the greatest risk to Solyndraâ s survival. Even

13

knowing this, DOE chose to invest billions of taxpayer dollars despite the clear warning - 16 of the 27 section 1705-backed projects employed solar technology,

47

In compiling this report, staff considered many troubling issues that deserve attention, yet, because of the magnitude of problems associated with this program, only a share of the concerns could be investigated. Committee staff, therefore, considers this an initial report. The following sections examine the various actions that DOE took while building its financially vulnerable portfolio that jeopardizes billions in taxpayer funds.

the very technology that

experts were warning about. These loans for solar projects totaled more than $13 billion â more than 80% of the total portfolio. DOE also concentrated its investments in two solar companies in particular, Abengoa and First Solar, to such an extent that financial troubles with either company would affect a significant portion of the loan portfolio. In addition to over investing in solar, the Federal government also permitted â double dipping,â wherein a company received multiple federal grants and loans to cover the cost of a project, thereby reducing the companyâ s â skin in the game.â DOE also allowed large and financially sound parent entities to undercapitalize their loan guarantee projects, which effectively shifted the risk away from the company to the taxpayer. It appears that for most DOE loan recipients, a low cost loan, in and of itself was insufficient to attract private investors.

B. Major Risk Factors to the Loan Portfolio

1. Falling Natural Gas Prices Hurt Renewable Projects

In addition to the poor credit risk determinations of 1705 recipients, the falling price of natural gas poses a material risk to the sustainability of these renewable energy projects. This section of the report attempts to explain how the market for natural gas has evolved and how it interacts with the market for renewable technologies.

Advances in hydraulic fracturing (â fackingâ) technology over recent years dramatically improved domestic natural gas and natural gas liquids production. Over the past few months, in particular, this increase in production resulted in an extraordinary decline in the domestic price of natural gas, substantially widening the efficiency gap between fossil fuels and renewable technologies.

48

In other words, natural gas has become so cheap that other energy technologies are having difficulty competing, even after federal subsidies.

The high price of oil incentivizes fracking for natural gas liquids, which supply valuable raw materials to oil refiners.

49

In areas where fracking produces both natural gas and gas liquids, frackers often produce natural gas at a loss, but, in the aggregate, profit due to the high price of gas liquids.

50

47

U.S. Depâ t of Energy, Loan Program office, Our Projects, available at https://lpo.energy.gov/?page_id=45

This unique result reduces the responsiveness of natural gas producers to the price

producers/

14

of natural gas. This ability to continue to profit from the premium price of gas liquids changes the economics of natural gas production enabling a secular decline in natural gas prices.

The resulting low natural gas price reduces the market price for power generation in most areas, as natural gas fired generators usually set the market clearing price. Below is a chart reflecting natural gas prices since 1992.

51

Todayâ s low prices for natural gas have not been seen

since the 1990â s and, when adjusted for inflation are at historically low levels. While this is good news for consumers of electricity who will benefit from lower rates, this is bad news for the renewable energy industry.

a. Low Natural Gas Prices Reduce Power Purchase Agreement Revenues for Renewable Projects

As natural gas powered generation provides the market clearing price in most regions within the United States, the recent drop in natural gas prices lowered market prices for power. These falling power prices reduce the expected value of anticipated Power Purchase Agreements (PPAs), which are agreements that provide power purchasers, such as utilities and suppliers of energy, such as renewable energy generators, with certainty over future prices. The energy industry relies on PPAs to manage risks associated with the purchase and sale of power. The pricing of PPAs largely depends on expectations with regard to future power prices. The recent

51

Federal Reserve Bank of St. Louis, Economic Data, Natural Gas Price: Henry Hub, Louisiana, available at http://research.stlouisfed.org/fred2/series/GASPRICE

collapse in natural gas prices reduced the potential revenue for PPAs that have not yet been executed.

Lower natural gas prices increase the risks of renewable energy projects that have not yet entered into long term contracts to sell the power they expect to generate because buyers of their product now have cheaper options. Project Amp and other projects that fail to meet benchmarks necessary to maintain a PPA, suffer the risk that they cannot negotiate agreements sufficient to support the cost of the renewables project, even with the benefit of multiple substantial subsidies.

Accordingly, it is reasonable to expect utilities to seek an exit from expensive PPAs whenever the renewable company fails to meet certain benchmarks, whether those benchmarks relate to commercial operation date, insufficient output, reliability or other variables. In other words, given the falling price of power in areas where natural gas is the marginal supplier, it is reasonable to expect revenues from risky renewables projects to be at risk to these falling power prices. If a PPA with a solar producer reflects a price based on markets where $4.00 per million British thermal unit (MMBtu) of natural gas was prevalent, the utility paying for that solar power might act on any opportunity to renegotiate or exit the unprofitable PPAs now that natural gas prices are below $3.00. Specifically, as DOE-backed projects come online over the next few years, any failure to meet the production or capacity requirements stated in the PPA may enable the power purchaser to exit or renegotiate the contract, subjecting the renewable project to lower power prices, and thus lower revenues for the company than was predicted at the time DOE negotiated the loan agreement.

In other words, given that power prices have fallen since these projects executed PPAs, there is substantial risk that the power purchasers will find a way out from the PPAs they entered into with the renewable projects. A PPA provides the renewable project security that it will earn a specific amount of revenue. If a party, such as a Utility, that is purchasing power from the renewables project can find a way out of the PPA, this places the revenue of the project at risk. If the renewable projects are forced to renegotiate at current market prices, they will suffer a substantial loss of revenue.

This is particularly concerning in the case of newer technologies, where many of these projects may fail to achieve target operation dates, or may not generate as much power as the contract requires simply as a matter of not having enough experience with the newer technology. Given this risk, many of these projects face the danger of losing the benefit of a higher priced PPA. One good example comes from the recent reports that First Solarâ s solar panels are suffering higher failure rates in the desert. This unexpected underperformance will reduce the output of

their plants. Such output is a key performance variable considered in the PPA.

b. Low Gas Prices Reduce Demand for Solar Panels

Falling market prices for power as described above impacts all aspects of renewable projects. Despite solar panel prices, the demand for solar panels declines as the relative economic benefits of their installation fall. Solar companies currently suffer from excessive competition in panel manufacturing, and also likely face decreasing demand as a result of the competition from cheaper natural gas generation. To the extent low natural gas prices persist,

16

this represents a sea-change that threatens the viability of all solar manufacturing investment that DOE and Treasury subsidized.

2. DOEâ s Failure to Diversify

a. DOE Overinvests in Solar Manufacturing despite Ample Warnings

DOE should have averted some of the risks it created in its portfolio by diversifying its investments across renewable energy technologies. DOEâ s investment in multiple solar manufacturers added to a heated global competition that was already creating an excessive supply of solar panels. These manufacturers were forced to compete both against each other and other solar companies worldwide. As a result, the average selling price per watt for solar panels has continued its decline.

Despite Solyndraâ s fall, there remains excessive competition in the manufacturing of solar panels. Just this past month, both Abound Solar and First Solar cut solar panel production globally, reflecting this excessive supply and heated competition.

52

While U.S. solar generation projects can take advantage of falling panel prices to offset a share of the impact of reduced power prices, it appears solar manufacturers that suffer both supply and demand shocks can only survive through continued provision of subsidies. Unfortunately for these manufacturers, there is

growing evidence that the subsidies are drying up.

With regard to subsidies on a global scale, Germany, the leader in solar subsidies, having invested over $130 billion to date, is now giving up the habit. According to news reports:

Germany once prided itself on being the â photovoltaic world championâ , doling out generous subsidiesâ totaling more than $130 billion, according to research from Germanyâ s Ruhr Universityâ to citizens to invest in solar energy. But now the German government is vowing to cut the subsidies sooner than planned and to phase out support over the next five years. What went wrong?

Using the governmentâ s generous subsidies, Germans installed 7.5 gigawatts of photovoltaic capacity last year, more than double what the government had deemed â acceptable.â It is estimated that this increase alone will lead to a $260 hike in the average consumerâ s annual power bill.

According to Der Spiegel, even members of Chancellor Angela Merkelâ s staff are now describing the policy as a massive money pit. Philipp RÃ¶sler,

52

Cassandra Sweet and Ryan Tracy, Loan Reicipient Abound to Cut Jobs, Retool Colorado Factory, WALL ST. J., Feb. 29, 2012, available at http://online.wsj.com/article/BT-CO-20120229-719672.html; Ehren Goossens, Solar Suppliers Head for First Demand Drop as Subsidy Cut, B LOOMBERG NEWS, Mar. 9, 2012, available at http://www.bloomberg.com/news/2012-03-09/solar-panel-sales-seen-dropping-first-time-in-decade-feeding-glut-energy.html

17

Germanyâ s minister of economics and technology, has called the spiraling

solar subsidies a â threat to the economy.â

53

The ratings agencies fully informed the DOE of their expectations for falling panel prices due to excessive global competition. Both Germany and the U.S. appear to be phasing out subsidies over the coming years, and this should eventually help reduce the excessive supply; however, it does so at the expense of the subsidized solar firms. In other words, the apparent cure to the oversupply is the outright shuttering of a large share of solar panel manufacturers worldwide.

b. DOE Overinvested in Abengoa and First Solar Projects

As DOE failed to diversify the portfolio sufficiently across industries, DOE also failed to diversify across award recipients. A single Spanish firm, Abengoa, received an aggregate $2.45 billion in loans and loan guarantees plus $818 million in Treasury cash grants.

54

This reveals

excessive risk and subsidies provided to a single firm via multiple subsidiaries. Abengoa has a credit rating of BB, which is considered Junk, thus making this concentration of investment in one company speculative and highly questionable. Exemplifying the risk DOE took in the case of Abengoa, Abengoa managed to obtain a DOE loan commitment for the lowest rated project across the entire DOE Junk portfolio; Abengoa Bioenergy Biomass of Kansas received an extraordinarily low CCC rating and yet the DOE approved a direct loan to the project.

54

See FitchRatings credit report for Mojave Solar, LLC, dated July 27, 2011, where DOE committed to an $862

million loan and Treasury committed to a $340 million grant; FitchRatings credit report for Abengoa Solar, Inc.â s

Solana Generating Station, dated December 2, 2010, where DOE committed to a $1.445 billion loan guarantee and

the Treasury committed to a $455 million grant; and, FitchRatings credit report for Abengoa Bioenergy Biomass of

Kansas, dated August 26, 2011, where DOE committed to a $130 million loan and Treasury committed to a $23

million grant.

55

See FitchRatings credit report for Abengoa Bioenergy Biomass of Kansas, dated August 26, 2011.

18

Abengoaâ s prospects look dim due to its investments in Europe, particularly Spain, and suffer the risk of declining subsidies as Spain contends with its own declining credit quality and the potential need for a bailout of its own government in the coming months or years. Now that Germany and Spain cut back solar subsidies, this will undoubtedly harm the European renewable

investments of Abengoa.

56

3. DOE Allowed â Double Dippingâ â Multiple Subsidies to Single Projects

Even if Abengoa investments initially appeared attractive to DOE,

overinvestment in this single firm will likely cause substantial harm to the taxpayer. DOE similarly overinvested in First Solar, as we describe in Section III; the taxpayer will undoubtedly suffer losses from that investment as well.

The junk quality loan portfolio of loan guarantees amassed by DOE reflects funding that substantially exceeds the amounts loaned by DOE. To understand the full extent of funds invested into these renewable firms, all state and federal subsidies need to be considered. For example, most of the 1705 projects benefitted from multiple enormous subsidies, such as grants that covered a third of the cost to build a generation facility, low interest DOE loans, state subsidies, beneficial access to power grids and mandates that require renewable production

56

See Ben Sills, Spain Halts Renewable Subsidies to Curb $31 Billion of Debts, BLOOMBERG NEWS, Jan. 27, 2012,

19

known as renewable portfolio standards. Such mandates result in premium pricing for power

generated by renewable technologies.

57

Even with the benefit of these massive government subsidies, DOE continues to hold a portfolio of â Junkâ grade loans and commitments. This defies the natural assumption that layer upon layer of government subsidies, and billions in costless equity should at some point cause an entity to become profitable; however, given the poor quality of the DOE portfolio, this has failed to occur.

4. DOE Allowed Large Energy Companies to Undercapitalize Projects and Shifted Risk to Taxpayers

Even when a company had significant assets to cover a project, DOE put the taxpayer at a greater risk because of the way they structured the guarantee. In four cases among the 27 loan guarantees and Federal Financing Bank (FFB) loans, the parent or project sponsor that sought the benefit of a loan guarantee or FFB loan had a credit rating significantly above that of the project itself. In other words, in four cases, the borrower undercapitalized the project and refused to extend a parental guarantee.

As a result, the taxpayer takes on greater risk, despite the borrowersâ ability to increase funding to the project. The most egregious use of this technique was in the case of Record Hill, LLC, where AAA rated Yale University created a project with a rating of only BB+. The idea that Yale would take a substantial taxpayer subsidy and still seek to protect its remaining assets from the liabilities of Record Hill reflects Yaleâ s view of the Record Hill project and its disregard for taxpayers. It is inconceivable that any normal bank would take these kinds of risk when loaning money. Banks traditionally insist on a number of provisions to â protectâ their investment. Yet DOE and Treasury did just the opposite, and essentially let these companies dictate terms favorable to them and not to the taxpayer. The result is when the company defaults on their obligations, the taxpayer is left with little to no remedy.

3. Systemic Risks from â Crony Capitalismâ and Wasteful Spending

There is evidence a number of loan guarantee recipients have engaged in clearly profligate spending. Such wasteful spending threatens the financial viability of the recipient companies, creating risks to both the DOEâ s loan commitment portfolio and taxpayer dollars. It is particularly troubling that this waste often takes the form of large cash bonuses to company executives â such payments feed the perception that taxpayer funds are being used to line the pockets of green energy executives.

Beacon Power Corp, the second recipient of a Â§ 1705 loan guarantee, paid three executives more than a quarter million dollars in bonuses in March 2010.

58

57

See M.J. Beck Consulting LLC, Renewable Portfolio Standards, available at http://mjbeck.emtoolbox.com/?page=Renewable_Portfolio_Standards (â With few exceptions, utilities are allowed to recover the additional cost of procuring renewable power.â); see also Katerina Dobesova, Jay Apt, and Lester B. Lave, Are Renewable Portfolio Standards Cost-effective Emission Abatement Policy? (Carnegie Mellon Electricity Industry Center, Working Paper CEIC-04-06), available at http://wpweb2.tepper.cmu.edu/ceic/pdfs/CEIC_04_06.pdf.

Eighteen months later, Beacon declared bankruptcy, leaving taxpayers to repay the loan. Adding insult to this injury, these bonuses were explicitly linked to the executives securing the DOE loan guarantee.

Similarly, bankruptcy records show Solyndra doled out executive payments just months prior to its late August collapse and early September bankruptcy.

59

The Department appears to recognize the unacceptability of this crony capitalism. DOE has stated, â We take our role as stewards of taxpayer dollars very seriously, and as such, we will make clear to loan recipients our view that funds should not be directed toward executive bonuses when the rest of the company is facing financial difficulty.â

In Solyndraâ s case, former executives have stated that DOE explicitly allowed federal funds to be used to pay out executive bonuses.

60

Good government groups have severely criticized the DOEâ s administration of the loan guarantees with respect to executive compensation. Citizens Against Government Waste has stated that â [g]iving a bonus to the executives under these circumstances is rewarding failure with our money with no chance of getting it back. Taxpayers need some representation here. They didn't really get it.â

The DOE has not explained why they waited three years into the program to finally take this view, or what â if any â concrete steps they will take to protect taxpayer monies.

61

Wasteful spending is not limited to executive compensation alone. BrightSource Energy, recipient of a $1.6 billion loan guarantee to build a solar generation facility, has spent more than $56 million on a desert tortoise relocation program.

62

Furthermore, BrightSource will build 50 miles of intricate fencing, at a cost of up to $50,000 per mile, designed to prevent relocated

tortoises from climbing or burrowing back into the solar generation facility.

63

The DOEâ s failure to diligently oversee costs and set prudent limitations on executive compensation while it distributed billions of dollars in loan commitments created a significant moral hazard that has created enormous risks for DOE and taxpayer funds.

BrightSource has

indicated that the exploding cost of tortoise relocation program threatens to derail the entire $1.6 billion project â leaving taxpayers on the hook for the enormous sums on money spent on construction thus far.

C. Harm Posed to Our Economy

The DOE loan guarantee and ATVM loan programs may harm capital formation within the capital markets. As the government makes low cost loans available, private capital cannot compete with the subsidized low interest loans. As a result, many private investors and lenders cease to compete in the same space or may choose to invest in those subsidized firms that anticipate government loans. As intended, government subsidies redirect capital to less efficient

21

industries, causing a misallocation of capital. To the extent investors target subsidized firms, those funds that would have sought a more profitable opportunities that would have yielded greater efficiencies and benefits for the economy, instead invest in relatively less profitable industries, where the government subsidy compensates for the lost profit.

To the extent government loans programs proceed, the government must maintain the highest integrity in the allocative process. If government fails to impose a fair and impartial loan process that prioritizes genuinely eligible borrowers, then the government further misallocates capital within the subsidized industry, increasing economic harm. Relatively better businesses may suffer losses while waiting for subsidies that never materialize. Lower quality firms, with strong political ties, may succeed in gaining government support with inferior products, reflecting a multi-factored misallocation of capital.

The failure to maintain integrity and abide by the law when implementing the DOE loan program significantly impacts those that failed to receive subsidies as well.

On February 28, 2012, Bright Automotive announced it was shutting down operations. In a poignant and blunt letter to the Secretary, Bright Automotiveâ s management team laid the blame squarely on the unprofessionalism and mismanagement of the DOE loan guarantee program. Bright Automotive described a process wrought with misdirection, changing and expanding requirements, unexplained delays, gross mischaracterizations, and a never-ending cycle of excuses:

Bright Automotive

February 28, 2012

Secretary Steven Chu

U.S. Department of Energy

Washington, D.C.

Dear Secretary Chu,

Today Bright Automotive, Inc will withdraw its application for a loan under the ATVM program administered by your department. Bright has not been explicitly rejected by the DOE; rather, we have been forced to say â uncleâ . As a result, we are winding down our operations.

Last week we received the fourth â near finalâ Conditional Commitment Letter since September 2010. Each new letter arrived with more onerous terms than the last. The first three were workable for us, but the last was so outlandish that most rational and objective persons would likely conclude that your team was negotiating in bad faith. We hope that as their Secretary, this was not at your urging.

The actions â or better said â lack of actionâ -- by your team means hundreds of great manufacturing and technical jobs, union and non-union alike, and thousands of indirect jobs in Indiana and Michigan will not see the light of day. It

22

means our product, the Bright IDEA plug-in hybrid electric commercial vehicle, will not provide the lowest total cost of ownership for our commercial and government fleet customers, saving millions of barrels of oil each year. It means turning your back on a bona fide step forward in our national goal to wean America away from our addiction to foreign oil and its implications on national security and our economic strength.

In good faith we entered the ATVM process, approved under President Bush with bi-partisan Congressional approval, in December of 2008. At that time, our application was deemed "substantially complete." As of today, we have been in the â due diligenceâ process for more than 1175 days. That is a record for which no one can be proud.

We were told by the DOE in August of 2010 that Bright would get the ATVM loan "within weeks, not months" after we formed a strategic partnership with General Motors as the DOE had urged us to do. We lined up and agreed to private capital commitments exceeding $200M â a far greater percentage than previous DOE loan applicants. Finally, we signed definitive agreements with state-of-the-art manufacturer AM General that would have employed more than 400 union workers in Indiana in a facility that recently laid-off 350 workers. Each time your team asked for another new requirement, we delivered with speed and excellence. Then, we waited and waited; staying in this process for as long as we could after repeated, yet unmet promises by government bureaucrats. We continued to play by the rules, even as you and your team were changing those rules constantly â seemingly on a whim.

Because of ATVM's distortion of U.S. private equity markets, the only opportunities for 100 percent private equity markets are abroad. We made it clear we were an American company, with American workers developing advanced,

deliverable and clean American technology. We unfortunately did not aggressively pursue an alternative funding path in China as early as we would have liked based on our understanding of where we were in the DOE process. I guess we have only ourselves to blame for having faith in the words and promises of our government officials.

The Chairman of a Fortune 10 company told your former deputy, Jonathan Silver, that this program â lacked integrityâ ; that is, it did not have a consistent process and rules against which private enterprises could rationally evaluate their chances and intelligently allocate time and resources against that process. There can be no greater failing of government than to not have integrity when dealing with its taxpaying citizens.

It does not give us any solace that we are not alone in the debacle of the ATVM process. ATVM has executed under $50 million of transactions since October of 2009. Going back to the creation of the program, only about $8 billion of the

23

approved $25 billion has been invested. In the meantime, countless hours, efforts and millions of dollars have been put forth by a multitude of strong entrepreneurial teams and some of the largest players in the industry to advance your articulated goal of advancing the technical strength and clean energy breakthroughs of the American automotive industry. These collective efforts have been in vain as the program failed to finance both large existing companies and younger emerging ones alike.

Our vehicle would have been critical to meet President Obama's stated goal of one million plug-in electric vehicles on the road in 2015 and his commitment to buy 100 percent alternative fueled vehicles for the Federal Fleet. So, we are not the only ones who will be disappointed.

The ineffectiveness of the DOE to execute its program harms commercial enterprise as it not only interfered with the capital markets; it placed American companies at the whim of approval by a group of bureaucrats. Today at your own ARPA-E conference, Fred Smith, the remarkable leader of FedEx, made the compelling case to reduce our dependence on oil; a product whose price is manipulated by a cartel which has caused the greatest wealth transfer in our history from the pockets of working people and businesses to countries, many of whom are not our allies. And yet, having in hand a tremendous tool for progress in this critically strategic battle -- a tool that drew the countryâ s best to your door -- you failed not only in the deployment of funds from ATVM but in dissipating these efforts against not just false hope, but false words. For us, this is a particularly sad day for our employees and their families, as well as the employees and families of our partners. We asked our team members on countless occasions to work literally around the clock whenever yet another new DOE requirement came down the pike, so that we could respond swiftly and accurately. And, we always did.

Sincerely,

Reuben Munger Mike Donoughe

CEO COO

64

Bright Automotive is not alone in its frustration, as at least three additional companies, U.S. Geothermal, Inc., RenTech, and Tenaska, have suffered substantial harm at the hand of DOEâ s favoritism and blatant disregard of the law.

U.S. Geothermal, Inc.

U.S. Geothermal, Inc. submitted a DOE loan guarantee application for a geothermal power project in San Emidio, California. Like Bright Auto, U.S. Geothermal received several

â clear assurances the DOE considers San Emidio a priority project and that [the] credit review

64

Letter, Reuben Munger and Mike Donoughe, Bright Automotive, to the Honorable Steven Chu, Secâ y of Energy,

Feb. 28, 2012 (on file with author).

24

process could be accomplished within the required timeframe.â

65

Relying on these statements

and assurances, U.S. Geothermal took action to advance the project and ensure full readiness and compliance with DOEâ s stated requirements. The company incurred numerous expenses, including fees to legal counsel and engineers, as well as resources devoted to the completion of engineer reports and a term sheet.

66

Most significantly, consistent with a DOE requirement for

priority treatment within the 1705 program, U.S. Geothermal executed a 25 year PPA.

67

U.S. Geothermal has taken every step to ensure that the San Emidio project embodies the â qualityâ and â readinessâ requirements DOE has emphasized. The project, which â would be one of the smaller and more straight-forward transactions,â was ready to enter the credit approval process by May 2011, only to be abruptly notified that DOE decided to suspend work on this loan guarantee.

68

DOE, in a draft letter to U.S. Geothermal, stated â there are a number of projects that are closer to the conditional commitment stage than yours, and we expect these projects, if they reach financial close, to utilize all of our remaining appropriation.â

69

In this draft letter, Jonathan Silver further provided that â the decision does not reflect the merits of the project, but rather the timing and funding constraints of the program.â

70

According to its letter, U.S. Geothermal suffered substantial harm as a result of DOEâ s decision to violate the terms of its own program in providing loan commitments to ineligible projects. The company incurred significant expenses in its efforts to meet DOEâ s standards and secure the financing it needed to proceed. The greatest harm will result from the PPA U.S. Geothermal entered into in reliance on DOE statements, which now contractually obligates them to provide power for 25 years or suffer penalties.

This claim is dubious at best. As is revealed in Section III of this report, Project AMP failed to meet the eligibility requirement relating to commencement of construction; nonetheless, it received a $1.4 billion FIPP-based DOE loan guarantee commitment on September 30, 2011. Antelope Valley Solar Ranch failed to meet the â innovativenessâ requirement and the â one technology per sponsor rule.â Despite this, Antelope Valley succeeded in gaining a $646 million FFB direct loan commitment. These two projects consumed an enormous share of DOEâ s appropriation yet clearly were not â closer to the conditional commitment stage.â

71

According to U.S. Geothermalâ s letter, in the absence of a DOE loan guarantee, the terms of the PPA create a significant obstacle to obtaining commercial financing for their project going forward.

72

Id.

25

Rentech submitted a proposal for financing for its Northwest Florida Renewable Energy Center Project (NWFREC). Like Bright Automotive and U.S. Geothermal, Rentech had progressed according to plan and adhered to DOEâ s prescribed schedule. In coordination with DOE staff, Rentech had taken such steps as signing sponsor payment letters, setting up necessary infrastructure, and entering the due diligence process.

73

Despite making every effort to fulfill all the requirements DOE laid out, DOE, again, unexpectedly suspended the approval process for the NWFREC Project.

74

Tenaska

Given the steps

Rentech took to ensure all requirements were being fulfilled, DOE seems to have made a decision based on favoritism rather than the law, choosing to fund larger, ineligible projects over a number of more suitable alternatives.

Tenaska sought financing for Imperial Solar Energy Center South (IESC South), a solar

power project in Imperial County, California. Like the others, this company also received a letter from DOE suspending the loan approval process, indicating that other projects were closer to the conditional offer stage.

75

Prior to receipt of DOEâ s letter, Tenaska had been working in coordination with DOE staff and was finalizing the execution of the required term sheet.

Given the steps Tenaska appears to have taken prior to the suspension,

this is unlikely.

76

Additionally, the company

was progressing through the due diligence stage and expected its preliminary Credit Assessment from Fitch in the very near future.

77

The similarity of concerns and claims made by Bright Automotive, U.S. Geothermal,

Rentech and Tenaska make clear that DOE actively mislead applicants about the status of their loan applications, thereby encouraging these firms to misallocate capital, which has led to financial harm. When considered in the context of the excessively large loan guarantees provided to Abengoa, First Solar and ProLogis, and the outright violations associated with Antelope Valley and Project AMP, the claims of these companies bring to light the extent of harm that can result when a regulator fails to maintain integrity and allows inappropriate bias and influence to distort its decisions.

It appears that, once again, DOE suspended the approval of

a credible project adhering to all stated standards and working closely with DOE staff, only to later approve massive funding for a project proven to be nowhere nearly as far along in the process as DOE purported. DOEâ s favoritism significantly harmed yet another company that had relied on the promise of 1705 financing.

To the extent that political connections and lobbying efforts influenced the DOE loan

program, this increases the potential harm to our capital markets and our economy. The large

26

number of troubling relationships between industry and government officials reflects an environment where fair impartial loan determinations did not occur, resulting in poor decisions. For example, First Solar gained a unique advantage relative to its peers by mastering its relationship with government as we describe in Section III. Just six months after DOE provided First Solar three loan commitments totaling $2.4 billion, the Committee learned that DOEâ s prized achievement under the First Solar scheme, First Solarâ s Mesa solar panel manufacturing plant, will delay its startup and cut jobs while cutting back global production by 60%. We also learned Abound Solar, a solar panel manufacturer that received a $400 million DOE loan commitment, has since failed.

Following Solyndra, such a rapid pace of failure for solar projects, including the industry leader First Solar, leads us to expect many more solar projects will follow. As a result of these failures, we should also expect supply disruptions to solar generation projects, breaches of supply contracts, job loss, and dislocation to harm other taxpayer-backed solar firms. Based on these projections, it appears the DOE loan program, in the aggregate, will place a drag on the entire economy as investors in these firms and taxpayers face losses and bankruptcies.

D. The â Independentâ Review of the Loan Guarantee Program

In October 2011, the White House ordered that an independent review be conducted by outside consultants in response to emerging problems, uncovered by the Solyndra scandal, with DOEâ s Loan Guarantee Programs.

78

The review, led by an â independent consultant,â former Obama Administration Assistant Secretary of the Treasury, Herbert Allison, found serious systemic problems related to DOE management and issuance of loan guarantees.

79

- A lack of clarity in the lines of authority within the loan program office;

Among the

findings, Allison reported that DOEâ s loan program office suffers from structural weaknesses.

The report finds:

- A lack of balance between those with governmental experience and those with

â substantial private sector experience and skill in project management and finance;â

- A lack of clear guidance regarding DOEâ s standard of â reasonable prospect of

repayment;â

- A lack of clarity with regard to DOEâ s goals and tradeoffs with respect to financial goals

versus policy goals; and

- The fees charged to companies to administer the program are not adequate to last through

the duration of the loan guarantees.

While the institutional and managerial recommendations from the independent review are

appropriate and helpful, the report falls short because it fails to consider whether political

pressure played a role in the decision-making process at DOE. Additionally, the review does not

78

THE WHITE HOUSE, REPORT OF THE INDEPENDENT CONSULTANTâ S REVIEW WITH RESPECT TO THE DEPARTMENT

OF

ENERGY LOAN AND LOAN GUARANTEE PORTFOLIO (Jan. 31, 2012), available at

79

Id.

27

provide much insight into taxpayer risks â the independent review looks at â credit subsidy costs,â which represent the net present value of the expected lifetime cost to taxpayers of these loans. Credit subsidy costs, however, do not fully capture the risks to which taxpayers are subjected. According to the non-partisan Congressional Research Service, the independent review â did not calculate expected losses that may be realized by the project portfolio, and the report states that eventual losses cannot be predicted [using the accounting methods adopted by the review].â

80

Furthermore, it has been widely reported that the independent review found the cost to taxpayers of the loan programs to be lower than originally projected. This reading of the report neglects to explain how these calculations came about. The independent review evaluated 30 loans and loan guarantees, broken down into three categories created by the independent consultant: utility-linked loans and loan guarantees (â projects for the generation or transmission of alternative sources of energyâ

In other words, unforeseen risks exist within DOEâ s portfolio which may have future budgetary implications but are incalculable using governmental accounting methods.

81

); Non-utility-linked loans and loan guarantees (generally, projects that bear greater technological risk; Beacon Power and Solyndra would fall into this category); and Ford and Nissan loans (loans to these two companies were broken out because these â projects are more typical of traditional secured corporate loansâ).

82

When looked at in the aggregate, the costs of the program have, in fact, decreased since the DOEâ s estimates at the time of origination.

83

However, this optimistic outlook is driven

largely by the third category of loans and loan guarantees â those given to Ford and Nissan. The costs of the first two categories â utility-linked loans and non-utility-linked loans â increased by 14 percent and 71 percent, respectively, while the estimated cost of the Ford and Nissan loans decreased by 95 percent. The large drop in the cost of the loan to Ford and Nissan was largely driven by these two companies receiving credit ratings substantially greater than what DOE believed they merited at the time of DOEâ s loan origination.

84

Lastly, the review excludes costs associated with Beacon Power and Solynda when it calculated taxpayer liabilities. This is a significant omission, as Beacon Power had drawn down 91 percent of its loan guarantee at a cost to taxpayers of $39 million, while Solyndra had drawn

Looking just at utility-linked and

non-utility-linked loans and loan guarantees, the expected cost to taxpayers has markedly increased. The Allison report glosses over this pertinent fact.

March 8, 2012.

down 98 percent, or $527 million. This is $566 million in costs to taxpayers from the loan

guarantee program that are completely ignored by the independent review.

III. DOE Violated Statutory, Regulatory, and Prudential Requirements

The Committee investigation and analysis reveals that, among many other concerns, DOE loan commitments exposed taxpayer funds to excessive risk as a result of DOEâ s bias toward approving loans without regard to warning signs. In some cases it appears the bias may stem from DOEâ s susceptibility to effective lobbying efforts, conflicts of interest present in the Administration, or from its overriding policy preference for renewable technology.

85

The

Committee identified many cases where the DOE disregarded their own taxpayer protections, ignored lending standards and eligibility requirements and, as a result, amassed an excessively risky loan portfolio. After review of internal emails, staff have identified instances when DOE faced barriers that placed loan approvals at risk, DOE staff simply sought to justify and overcome the barriers, rather than giving the barriers due consideration. .

A. DOE Repeatedly Violated Requirements Intended to Ensure Innovation and Manage Risk

1. Regulatory Requirements

The Energy Policy Act specifies that the Secretary may only make loan guarantees under Â§1703 for projects that employ â new or significantly improved technologies.â

86

DOEâ s

implementing regulation defines this as an energy technology â that is not a Commercial Technology, and that has either (1) Only recently been developed, discovered, or learned; or (2) Involves or constitutes one or more meaningful and important improvements in productivity and value, in comparison to Commercial Technologies in use in the United States. . . .â

87

In applying

this definition, it is important to bear in mind the congressional intent underlying title XVII: to

incentivize innovative technologies.

88

The Loan Program Officeâ s (LPO) first solicitation, issued on July 29, 2009, targeted

innovative projects that satisfied the statutory and regulatory requirements of Â§1703.

89

The LPOâ s second solicitation, issued on October 7, 2009, created the Financial

Institution Partnership Program (FIPP) under Â§ 1705.

Projects

approved under this solicitation could access 100% financing through the Federal Financing

Bank.

90

85

An example of evidence indicating a strong ideology: Jonathan Silver, the former Director of the Loan Program

Office (LPO) stated in an email to Matthew Winters dated June 9, 2011, in relation to a Treasury review of First

Solar cost estimates, â Well done. Sorry you have to deal with all this. Hope the real story of how those folks tried

to kill deals that would have moved the needle and created jobs because of a slavish attachment to a flawed and

limited world view comes out.â

This loan guarantee solicitation was

86

42 U.S.C. Â§ 16513(a)(2).

87

90

FIPP Solicitation, supra note 23.

29

open to non-innovative (i.e., already commercialized) projects, but the project sponsor had to secure the loan itself from a private lender. This structure reflects a reasonable and prudent application of the Departmentâ s loan guarantee authority: a project that employs commercialized technology would only need a federal loan guarantee if it was an inherently high-risk venture. The Department prudently sought to mitigate this risk by requiring that it be shared with a private financial institution.

A second requirement in the Code of Federal Regulations only allows for â one technology per project sponsor.â

91

Nonetheless, in issuing these loans, DOE disregarded these constraints, often with the explicit encouragement of department officials. Substantial evidence indicates that, in two cases, officials in the Loan Programs Office deliberately mischaracterized substantively identical technologies as dissimilar.

Section 609.3(a) states that a Project Sponsor or Applicant

may only submit one Pre-Application or Application for one project using a particular technology. The rule prohibits an Applicant from submitting a Pre-Application or Application for multiple projects using the same technology. This common-sense requirement mitigates the risk to taxpayer dollars by ensuring diversity, while increasing the potential for innovation within the Departmentâ s loan guarantee portfolio.

92

In other cases, DOE labeled a technology as â innovativeâ when it

clearly should have been classified as a â proven technologyâ merely because the particular model had not been sold in the United States.

93

2. The First Solar Scheme

Additionally, there is evidence that applicants,

with the encouragement of department officials, intentionally mischaracterized their projects as â innovativeâ in an effort to access the Federal Financing Bank and defeat these prudential requirements.

a. Overview

First Solar manufactures thin film cadmium telluride solar panels and also provides prefabricated solar plants, where buyers can purchase a ready to run solar generation facility that uses First Solarâ s cadmium telluride panels.

94

First Solar sought to create four turnkey projects

with the assistance of DOE loan guarantees and direct loans. Contrary to the law governing DOE loans, these four projects relied on virtually identical solar technology. Accordingly, First Solarâ s use of the same technology across the four projects resulted in potential violations of federal regulations and the underlying loan solicitations. Specifically, through DOEâ s funding of three First Solar projects, DOE and First Solar may have violated regulations imposing the innovativeness requirement

95

and violated the regulation that allows only one technology per project sponsor.

96

95

The Energy Policy Act specifies that the Secretary may only make loan guarantees under Â§1703 for projects that employ â new or significantly improved technologies.â 42 U.S.C. Â§ 16513(a)(2). DOEâ s implementing regulation defines this as an energy technology â that is not a Commercial Technology, and that has either (1) Only recently been developed, discovered, or learned; or (2) Involves or constitutes one or more meaningful and important

30

First Solar submitted applications for two of the projects, Topaz and Desert Sunlight, under the DOEâ s FIPP solicitation that allowed for non-innovative projects. The other two projects, Agua Caliente and Antelope Valley Solar Ranch, sought and succeeded in gaining an advanced position in the application process by purchasing existing projects from Nextlight Renewable Power (â Nextlightâ) that previously filed applications with DOE. However, the projects purchased from Nextlight had applied under the DOEâ s â innovativeâ solicitation. First Solar always intended to use the same technology across all four projects. However, given the innovativeness requirement that applied to Agua Caliente and Antelope Valley Solar Ranch, as a result of Nextlightâ s original applications, these projects still needed to be deemed innovative. Additionally, the two projects needed to comply with the one technology per project sponsor requirement. This latter requirement meant that the two â innovativeâ projects also needed to be differentiated from each other to qualify.

First Solarâ s Agua Caliente and Antelope Valley Solar Ranch received funding despite the fact that each project may have violated the regulations described above. In the next section, we describe these violations in greater detail, provide the motives of DOE and the Administration, and offer documentation indicating DOE manufactured evidence of compliance

with these rules while internally conceding their failure to adhere to the law.

b. The Manufacturing Plant that Motivated Action on All Four First Solar Projects

While DOE publicly talked about the merits of each First Solar project individually, internal DOE emails indicate that DOE favored First Solar projects and viewed them collectively because DOE sought to enable First Solar to build a new manufacturing plant in Arizona.

97

The logic was simple: four solar generation projects would provide sufficient demand to justify and support locating a new First Solar manufacturing plant in Arizona.

98

The White House planned to use this new manufacturing plant and the jobs that it supported as evidence of the indirect benefits of DOE loan guarantees for the economy. Documents and e-mails obtained by the Committee offer unique insight on how decisions were made. In an e-mail from Jonathan Silver, Executive Director of the Loan Programs Office at DOE, to Deputy Energy Secretary Daniel Poneman in May of 2011 demonstrates DOEâ s plan to group the First Solar deals as a package. Silver wrote that â First [S]olar deals need to be considered as a package since they support the building of a manufacturing plant to service their collective needs.â

99

We have often talked about how the 3 FSLR [First Solar] projects were are (sic) considering will support the building of a manufacturing facility in Arizona. Can

The White House supported this packaging idea. In an email to other DOE officials from June 2011, Matthew Winters, Senior Advisor for Loan Programs at DOE, wrote:

improvements in productivity and value, in comparison to Commercial Technologies in use in the United Statesâ ¦â

See 10 C.F.R. Â§ 609.2 (2011).

96

Section 609.3(a) states â [a] Project Sponsor or Applicant may only submit one Pre-Application or Application for

one project using a particular technology. The rule prohibits an Applicant from submitting a Pre-Application or

Application for multiple projects using the same technology. See 10 C.F.R. Â§ 609.3(a) (2011).

one you (sic) please quickly draft a 1-2 sentence blurb that states exactly how this

is the case, and give the location, size, and expected construction date of the mfg

facility? This will go into a document for the White House that describes the

manufacturing impact of the projects in our pipeline.

100

c. The Collective Application of First Solar

(emphasis added)

The DOEâ s treatment of the First Solar applications during the credit review process demonstrates the Department realized the projects all employed the same non-innovative technology. DOE considered packaging three First Solar projects as one vote in front of the DOE credit review board (the Antelope Valley, Topaz, and Desert Sunlight projects), despite the projects coming from different solicitations (innovative versus commercial). Margot Anderson, a Senior Advisor at DOE, wrote an email on June 25, 2011, before the DOE credit review board voted to grant conditional guarantees to three First Solar projects (Antelope Valley, Topaz, and Desert Sunlight), asking â [S]hould it be three separate votes or one vote for all three projects?â

101

Despite ultimately approving credit individually for each project, the next email shows the extent to which DOE wanted â all of the deals to look exactly alikeâ :

While the credit review board appears to have voted separately for all three projects, this conversation reinforces the mindset within DOE that all First Solar projects represented a package and not individual projects.

Our question is simply â is there an issue if we bring all of the First solar projects including the various IEs (Luminate and Burns and Roe) into the same room to discuss the terms of the deals?â Essentially, we want all of the deals to look exactly alike. First Solar has suggested the meeting so they are on board the IEs are OK with it but one brought up the [Non-Disclosure Agreement] issue and I want to get that resolved. Jonathan want[s] the meeting to happen this week or early next, to get these projects going.

102

With this plan to package the First Solar deals, DOE granted conditional loan guarantees

to four First Solar projects that used First Solarâ s cadmium telluride photovoltaic solar panels.

103

DOE describes this technology as â commercially provenâ and â deployed since 2001.â

104

Yet,

DOE was classified two of First Solarâ s projects as innovative and ignored the â one sponsor per

technology per solicitation.â .

105

100

Email from Matthew Winters, DOE, June 14, 2011. (Emphasis added).

101

102

Email from Jeffrey Walker, DOE, to Susan Richardson and Kimberly Heimert, DOE, Subject â Bridge [Non

Disclosure Agreements] for this unusual circumstances,â (March 29, 2011, 8:21 AM).

103

DOE did not finalize First Solarâ s Topaz project and only gave final approval to three First Solar projects. Upon

finalization of its DOE loan guarantees, First Solar sold all of its development projects to large utilities, such as

Exelon and NextEra.

104

â Energy Department Finalizes Loan Guarantee to Support California Solar Generation Project,â U.S. Department

of Energy, September 30, 2011. Available at:

https://lpo.energy.gov/?p=5324.

105

This scheme coincidentaly improved the financing terms of the programs by enabeling the government to

provide

a 100% direct loan as opposed to an 80% loan guarantee. Specifically, those entities approved under the innovative

path received direct federal loans from the Federal Financing Bank (FFB) for 100% of the sought after amount. Had

these entities gone through the commercial path, they would need to borrow from a private lender who would then

d. First Solarâ s Acquisition of NextLight's Projects to Enable All Four Projects to

Proceed Together

To understand why DOE manipulated the First Solar applications one must understand how these projects came to pass. First Solar purchased NextLight Renewable Power in a deal that included NextLightâ s two pending DOE loan guarantee projectsâ Agua Caliente and Antelope Valley Solar Ranchâ in April of 2010.

106

DOE had invited both NextLight projects

into the due diligence level in the loan application process,

107

indicating that both continued to

progress successfully towards ultimate approval. NextLight had applied for innovative loan guarantees for both projects. Under Nextlightâ s applications, the Agua Caliente project would use amorphous silicon technology, and the Antelope Valley project would use crystalline silicon solar technology.

108

When First Solar purchased NextLight, it planned to switch to its own proven â and non-innovative - technology relying on cadmium telluride panels for both projects. However, First Solar wanted to keep both projects in the innovative technology queue. First Solar faced two challenges to keep both projects in the innovative queue. First, the company had to prove that both projects used innovative technology; while using First Solar cadmium telluride panels for the projects that would not qualify as innovative. Second, First Solar had to ensure that both projects used different â innovativeâ technologies, otherwise the projects would violate the DOE rule that one company could only sponsor one project using a specific innovative technology under the innovative technology solicitation.

e. Failure to Prove Innovativeness; Resorting to Falsification

First Solar planned to qualify both projects for the innovative solicitation by incorporating relatively minor new technologies into the solar plants. The Agua Caliente project

would use standard First Solar cadmium telluride panels, but would use an inverter â fault ride-

through and dynamic voltage regulationâ technology

109

that would help the plant stay operational

even if the sun did not shine constantly on a particular day.

110

receive at most an 80% guarantee. Therefore, the non-innovative entities benefitted from the false â innovativeâ

designation in that they received fully guaranteed funding, as opposed to partially guaranteed, reducing their cost of

borrowing. The other two First Solar projects received partial loan guarantees as part of the Financial Institution

Partnership Program.

First Solar relied on this inverter

110

U.S. Depâ t of Energy, Internal Memo, â Next Light Antelope Valley Technical Eligibility Re-Evaluationâ (July

21, 2010); See also email from Cathy Grover, Luminate, to Robin L Sampson, U.S. Depâ t of Energy (Mar. 30, 201,1

3:39 PM EST), which stated, â The Projectâ s inverter that we show currently specified is an SMA 630CP â ¦ From a

design perspective, switching to the 720CP (from the 630CP, if this is in fact what First Solar is doing), has no real

impact on the electric energy production values.â

33

to qualify the Agua Caliente project as innovative.

111

An email between DOE staff describes the lack of innovativeness of this inverter technology, stating, â The Projectâ s inverter that we show currently specified is an SMA 630CP â ¦From a design perspective, switching to the 720CP (from the 630CP, if this is in fact what First Solar is doing), has no real impact on the electric energy production values.â However, the innovativeness of this inverter technology is highly questionable based on the following issues identified through the review of email communications and internal DOE reports.

112

A DOE whitepaper reveals that more than 200 of these allegedly â innovativeâ inverters had been in use in Germany, Italy and Spain since September 2010.

113

Directly calling into question any determination that this technology is innovative, the DOE whitepaper provides that these inverters are â commercially ship[ped] today in the United States as well.â While, according to the rule, foreign commercial use of a technology is not a bar to deeming domestic use innovative, the broad commercial use in Europe reflects the disrespect DOE applies to the actual innovativeness requirement.

114

The report explains that â the technology being implemented is not new as compared to traditional turbine-based generatorsâ and is commercially manufactured in Colorado.

115

These facts emailed among DOE staff undermine any determination of

innovativeness and clearly indicate that Agua Caliente failed to satisfy the requirements designed to spur development of new technologies.

116

First Solar also planned to use this inverter technology to make the Antelope Valley project innovative; however, even if the technology were innovative with regard to Agua Caliente, its second application to Antelope Valley would violate the one technology per project sponsor requirement.

117

To overcome this obstacle, First Solar added a â single axis trackingâ system for the Antelope Valley project to differentiate it.

118

111

See â NEXT LIGHT ANTELOPE VALLEY TECHNICAL ELIGIBILITY RE-EVALUATIONâ attachment (July 21, 2010) to email from Sarah Hetznecker, U.S. Depâ t of Energy, to Patrick Gorman, U.S. Depâ t of Energy, Subject: â here is the antelope valley re-evaluation memoâ (July 22, 2010 9:06 AM).

This system simply allowed the panels to track the sun â a technology that has been around for decades. Additionally, First Solar

The Antelope Valley Project will use the new Fault Ride-Through Technology inverters that are being used in the Agua Caliente Project and were the basis for new and significantly improved technologies as compared to commercial technologiesâ for that project. While this is being used on both of these projects, it will meet the definition of â new of [sic] Singificantly Improved Technology and it is not a Commercial Technology, because it is not being used in three or more commercial projects in the US in the same general application and it has not been in operation for 5 years. In addition, First Solar will use single axis tracking on 50 MW of the 230 MW for the Antelope Valley Project. Based up on the re-evaluation, we conclude that the project will meet the

eligibility criteria

112

Email from Cathy Grover, Luminate, to Robin Sampson, U.S. Depâ t of Energy (March 30, 2011, 3:39 PM).

See supra note 91.

118

Dong Kim, U.S. Depâ t of Energy Memo, â First Solar (Next Light) Antelope Valley Solar Ranch One Technical

Eligibility Re-Evaluationâ (Aug. 4, 2010).

34

only planned to install this system on 50 MW of the plantâ s 230 MW capabilities, less than 25% of the plant.

119

Rather than force First Solarâ s Antelope Valley project to step out of the innovation queue, DOE quickly created a memo that allegedly justified the project remaining â innovative.â The memo claimed that the Antelope Valley project would use three different innovative technologies: Fault Ride-Through Technology, Dynamic Voltage Regulation, and single axis tracking.

120

Internal DOE emails reveal a rushed process that left certain DOE officials questioning the validity of the analysis.

121

DOE officials also heavily edited the memo to deemphasize First Solarâ s other pending projects and the fact that the Antelope Valley project

used the same â innovativeâ technology as the Agua Caliente project.

122

More importantly, on June 23, 2011, Dong Kim, Director of the Technical and Project Management Division, (who had edited the DOE memo on Antelope Valleyâ s innovativeness referenced above) wrote an email indicating that the allegedly innovative tracking technology did not constitute innovativeness, was not considered innovative originally, and also pointed out that others continuously revised documents to incorrectly reflect that the trackers were â innovative.â Kim wrote:

Someone keeps changing [Antelope Valley Solar Ranch] Technical slides to include single axis trackers as an innovation. Be clear that this not an innovation. The record will show that we did not grade this as innovative during intake review. It will not stand up to scrutiny if compared with CVSR [California Valley Solar Ranch] trackers. Whoever continues to make this change needs to understand that Technical does not support the 20 percent of the CVSR field with trackers as an innovative component.

123

The apparent cover-up that led to Kimâ s stern email indicates that DOE staff sought to maintain a false finding of â innovativeâ for the single axis trackers.

(emphasis added)

DOEâ s August 4, 2010, memo claimed that the Antelope Valley project used three innovative technologies. However, DOEâ s Director of the Technical and Project Management Division revealed that the single axis trackers did not qualify as innovative and DOEâ s own press release demonstrated that the Agua Caliente project already used both the fault ride-through and the dynamic voltage regulation technologies.

124

119

Id.

Since Agua Caliente had already received a loan

guarantee using this â innovativeâ technology, Antelope Valley was barred from relying on the

same technology for its innovativeness-based application. As a result, Antelope Valley provided

122

Dong Kim, U.S. Depâ t of Energy, Technical memo (July 25, 2010) (discussing that DOEâ s tracked changes on

the memo reveal that DOE removed references to First Solarâ s Desert Sun and Topaz projects from the second

paragraph and removed an entire paragraph discussing how the Antelope Valley project and the Agua Caliente

project use the same Fault Ride Through Technology).

123

Email from Dong Kim, U.S. Depâ t of Energy (June 23, 2011).

124

Press Release, U.S. Depâ t of Energy, Department of Energy Finalizes a $967 Million Loan Guarantee to Support

the Agua Caliente Solar Project (Aug. 5, 2011) available at

http://energy.gov/articles/department-energy-finalizes-

967-million-loan-guarantee-support-agua-caliente-solar-project.

no innovative technology that would justify its eligibility for a DOE loan. DOE should have deemed First Solarâ s Antelope Valley project ineligible under the innovativeness solicitation.

f. Persistent Pressure to Approve the First Solar Projects and Achieve the Master Plan of Building a Manufacturing Facility

First Solar kept pressure on DOE to approve the three projects in the final weeks leading up to DOEâ s issuance of conditional loan guarantees. On May 18, 2011, Jens Meyerhoff, an executive at First Solar, wrote a letter to Jonathan Silver implicitly threatening that First Solar might not commit to completing construction on the Arizona manufacturing plant if DOE did not approve all three First Solar loan guarantees. Meyerhoff wrote:

A failure to receive DOE and U.S. government agency approvals for these projects or missing the September 30 statutory deadline under the 1705 program would seriously jeopardize the financing for the Agua Caliente, Antelope Valley Solar Ranch, Desert Sunlight and Topaz projects. As you

know, a major reason for choosing to build the manufacturing plant in Mesa, AZ was to provide solar modules to these large and important U.S. projects.

We will invest more than $300 million in the factory, put people in Mesa to work at a long-dormant industrial site that once was home to an automotive testing facility, and create high tech green jobs that did not exist beforeâ ¦

â ¦First Solar consciously made the decision to build a new U.S. manufacturing center to support and recycle economic benefits created by favorable U.S. political support for renewable energy, including the 1703 and 1705 DOE loan guarantee programs.

The DOE loan programs provide an important financing â bridgeâ at a time when the U.S. private debt markets have little or no experience financing first-of-their-kind utility-scale solar projects, and the capital markets remain constrained in the wake of the global financial crisis. If First Solarâ s project applications are not approved, or if theyâ re delayed beyond September 30, we believe it could jeopardize our ability to close financing (both debt and equity), jeopardize construction of 1,620 megawatts of solar capacity and, frankly, undermine the rationale for a new manufacturing center in Arizona.

125

First Solar also tried more friendly persuasion. Nikolas Novograd, Vice President at First Solar, sent Bill Pegues at DOE a picture of the construction taking place at First Solarâ s Arizona plant. Pegues planned to use the construction picture to help persuade members of the credit review board to vote for the First Solar projects. He forwarded the picture to several DOE officials, commenting, â [H]ereâ s a photo of the construction

125

Letter from Jens Meyerhoff, First Solar, to Jonathan Silver, Director of Loan Programs Office, U.S. Depâ t of Energy (May 18, 2011) (emphasis added).

36

progress on the FSLR mfg plant in Mesa, Arizona as of Tuesday 6/14. Iâ ll bring several copies to CRB [Credit Review Board] just in case we need them.â

126

Additionally, Rob Gillette, CEO of First Solar, arranged a phone call with the Deputy Energy Secretary on June 24, 2011, only days before the Credit Review Board met to decide whether to grant conditional loan guarantees to the three First Solar projects.

127

By June 22, 2011, several days before the Credit Review Board approved conditional loan guarantees for the projects, Secretary Chuâ s office had already planned a press release to announce the conditional loan guarantees for the First Solar projects that relied upon job creation numbers from First Solar itself.

128

S1â s office hopes to offer an advanced story to a national reporter on all three First Solar deals later today, with a story to run tomorrow along with the press releaseâ ¦

Secretary Chuâ s office

carefully coordinated the media strategy for the approval of the conditional loan

guarantees for the three First Solar projects. Sonia Taylor at DOE wrote in an email on

June 28, 2011, that

â ¦If you havenâ t already, can you all please notify the appropriate people

from First Solar and the other companies that the deal is official? I have

been working with First Solar (under the guise of â should the deal be

approvedâ), and they do not plan on writing a press release. Can you all

please see whether the banks plan on issuing a release? If so, weâ ll need

to review it.

129

On June 30, 2011, DOE issued a press release that announced the conditional loan

guarantees for the three First Solar projects for around $4.5 billion.

(emphasis added)

130

The six paragraph

announcement only mentioned First Solar once and described the Antelope Valley

project as featuring â a utility-scale deployment of innovative inverters with voltage

regulation and monitoring technologies that are new to the U.S. market.â

131

DOE would eventually issue final loan guarantee offers to First Solarâ s Antelope

Valley and Desert Sunlight projects on the final day of the 1705 loan guarantee program

(September 30, 2011).

The press

release did not mention the trackers on the Antelope Valley project.

132

126

Email from Bill Pegues, U.S. Depâ t of Energy (June 23, 2011).

Despite the issues surrounding the innovative nature of the

Antelope Valley project, DOE finalized a 100% loan guarantee worth $646 million for

the allegedly â innovativeâ project. Ultimately, DOE did not finalize First Solarâ s Topaz

127

132

DOE did not finalize First Solarâ s Topaz loan guarantee project.

37

project, but a subsidiary company of Warren Buffettâ s Berkshire Hathaway purchased the project from First Solar.

133

g. First Solarâ s Financial Problems since the Loan Guarantees

Since DOE finalized First Solarâ s three loan guarantees (for over $3 billion), First Solar has encountered serious financial problems that put the DOE funded projects in jeopardy. First Solarâ s stock declined the greatest compared to of any S&P 500 companies in 2011 and has lost over $100 per share over the past year.

134

First Solar has cut production of its solar panels

worldwide.

135

Based upon the companyâ s financial troubles, First Solar fired its CEO in

October.

136

Additionally, in March 2012, the Securities and Exchange Commission announced

an investigation into whether First Solar had improperly disclosed information about whether the

First Solar Topaz project would receive a loan guarantee from DOE.

137

More recently, First Solar has revealed problems that directly impact its three DOE loan

guarantee projects. First Solarâ s Antelope Valley project had problems getting a permit and has

yet to receive any DOE funding.

138

First Solar announced in late February that it would

postpone manufacturing solar panels at its Mesa Arizona plant, which is still under construction,

because of financial problems.

139

First Solar intended for the Mesa facility to provide panels to

the four First Solar projects. This delay means that the indirect jobs that the White House

wanted to create with the three loan guarantees will likely never materialize, and raises questions

about whether First Solar will have problems supplying solar panels to its DOE loan guarantee

projects. Additionally, First Solar has revealed that it has needed to replace millions of dollars

worth of its solar panels under warranty because they did not last in hot climates.

140

h. Conclusion

Considering

all three of First Solarâ s DOE-based solar generation projects are located in hot desert climates,

this issue raises serious concerns about whether the panels will work properly long term.

There appears to be a significant amount of evidence, based on documents received by the Committee and supplied by DOE and others, indicating that DOE manipulated its analysis and strategically modified evaluations in order to issue loans to First Solar that would qualify

38

under the statutory guidelines. This is cause for serious concern. An application that should otherwise fail, but instead passes under improper influence and through the manipulation of analysis, results in the defrauding of taxpayers and misappropriation of assets.

141

B. DOE Violated the Statutory Requirement that Projects Commence Construction by September 30, 2011

Furthermore,

any advantage to an applicant disadvantages other applicants and improperly diverts DOE resources.

The Recovery Act states that the Secretary may only make loan guarantees under Â§ 1705 for projects â that commence construction not later than September 30, 2011.â

142

This provision

is designed to effectuate the rapid deployment of renewable energy projects. Furthermore, Â§

3(b) of the Act mandates that the Secretary expend appropriated funds â as quickly as possible consistent with prudent management,â so as to achieve the Actâ s stated goal of economic stimulus.

143

The DOE knowingly violated this explicit statutory mandate. The Departmentâ s FIPP loan guarantee solicitation from October 7, 2009, defined â commence construction on before September 30, 2011â to mean that

This â shovel-readyâ requirement also helps to mitigate risks associated with too many unknown variables.

(i) the Borrower has completed all pre-construction engineering and design, has received all necessary licenses, permits and local and national environmental clearances, has engaged all contractors and ordered all essential equipment and supplies as, in each case, can reasonably be considered necessary so that physical construction of the Eligible Project may begin (or, if previously interrupted or suspended, resume) and proceed to completion without foreseeable interruption of material duration and (ii) such physical construction (including, at a minimum, excavation for foundations or the installation or erection of improvements) at the primary site of the Eligible Project has begun (or resumed).

On September 30, 2011 â the last day of the program â the Secretary approved a $1.4 billion loan guarantee for Project AMP. Project AMP intends to install solar panels on the rooftops of many of ProLogisâ extensive real estate holdings. However, as the September 2011 application approval deadline approached, Project AMP was nowhere near prepared to commence construction, in part because it failed to secure contractual commitments to purchase energy from its proposed solar generation facilities.

144

141

See discussion infra Part V.A. and V.B.

Construction cannot begin for any phase

of Project AMP until parties agree to a Power Purchase Agreement (PPA), which helps to ensure

sufficient revenue to justify an installation of solar panels. As of March 6, 2012, Project AMP

144

Email from Eric Mogilnicki, WilmerHale, counsel to Bank of America, the lead lender for Project AMP (Mar. 6,

2012) (on file with author).

39

had not signed any PPAs, had not purchased any solar panels, and had not begun construction at

any locations.

145

Consistent with Project AMPâ s lack of preparedness to commence construction, Fitch Ratings imposed a â frameworkâ methodology to rate the credit risk of Project AMP.

146

Fitch explained that, due to a lack of negotiated prices, a lack of known product suppliers, and a lack of PPAs, Fitch could not model cash flows or consider the credit quality of the businesses the project would transact with.

147

For this reason, Fitch mandated the use of a framework approach that imposed minimum credit quality requirements and other controls to ensure adequate credit quality relating to future transactions.

148

Fitch also required that Project AMP return to Fitch to receive ratings for each phase prior to seeking DOE loan disbursements consistent with the framework approach.

149

As of March 6, 2012, Project AMP had not sought ratings for any phase of Project AMP.

150

While the credit rating methodology appears appropriate given the circumstance, the need to apply this approach reflects Project AMPâ s failure to meet the specific requirements of the law. Nonetheless, DOE approved Project AMPâ s loan guarantee for $1.4 billion dollars. DOE approval of this project on the final day with pressure from Secretary Chu reflects improper influence and recklessness that led to an extremely large and inappropriate loan commitment.

This further clarifies the extent of Project AMPâ s failure to commence

construction.

151

As we describe in Section D below, following DOEâ s approval of Project AMP, natural gas prices fell dramatically, resulting in substantially lower power prices in areas where natural gas generation provides the marginal supply of power. Lower market prices for power reduce potential revenue for all PPAs â in other words, solar power directly competes against natural gas fired generation. Had Project AMP locked in PPAs at the time DOE approved its loan, this loss of potential revenue would have been avoided. Given the lag between approval and PPA negotiation, price risk materialized, likely reducing the aggregate value of Project AMP as a direct consequence of Secretary Chuâ s inappropriate approval.

Had DOE rejected Project AMP due to its failure to commence construction, the government and participants in the project would have avoided misallocating capital to a project that was premature.

C. DOE Violated the Statutory Requirement of â Superiority,â Illegally Benefiting Banks at the Expense of Taxpayers

When it created the loan guarantee program, Congress took several steps to protect taxpayer funds and limit the DOEâ s risk exposure. These restrictions are recited in Â§ 1702 of the

Energy Policy Act and by statute apply to all loan guarantees issued under title XVII.

152

One of

the most important risk-limiting provisions requires the Secretary to secure a superior claim to any assets in the event of a default.

153

The statute unequivocally requires that these rights must

be â superior to the rights of any other person.â

154

This common-sense rule ensures that if the

U.S. government is on the hook to pay off creditors, it should be able recover at least some of its losses.

This right to superiority over collateral is appropriate given that taxpayers enabled the transaction through provision of a subsidy. Given the substantial risk associated with DOE loan guarantees and the lack of any potential for the taxpayer to profit, the law required that the DOE at least maintain a superior position with respect to collateral to protect taxpayers in the event that a project failed. Private banks stand to profit if a project succeeds, while also avoiding substantial downside risk if a project fails. Given these clear benefits to lenders, Congress determined that lenders should not also gain parity with the DOE on the rights of collateral and inserted the â superiorityâ provision to prevent weakening the taxpayerâ s position.

In what can only be considered a preemptive bailout for banks, DOE eliminated taxpayer protections by agreeing to share its rights in the collateral of failed projects with private lenders. Notwithstanding the clarity of the statutory requirement and the policy basis for it, the DOE enacted regulations that allowed banks to gain parity with the United States with regard to collateral.

155

While this may have increased its lending authority, it did so by weakening the

taxpayerâ s protections.

A review of the seven Financial Institution Partnership Program based loan guarantees reveals that DOE agreed to share its collateral rights with the lenders for all FIPP loans issued after enactment of the DOE regulations.

156

Instead of selectively sharing collateral for the safest projects, DOE instead applied this approach to all FIPP loans, irrespective of the highly varying deal terms, credit quality and loan amounts.

157

In no case did DOE withhold this benefit from banks to protect taxpayers. In effect, DOE behaved as if its new interpretation of the law mandated that banks be placed on par with taxpayers.

1. Superiority of Rights vs. Pari Passu Sharing

In the event of a default, a loan guarantee provides assurances to banks and other lenders that they will recover 80% of the money loaned to the renewable energy project.

158

152

42 U.S.C. Â§ 16512 (â â ¦ the Secretary shall make guarantees under this or any other Act for projects on such terms and conditions as the Secretary determines, after consultation with the Secretary of the Treasury, only in accordance with this section).

This money comes from the American taxpayer. Under the system designed by Congress, while taxpayers

153

42 U.S.C. Â§ 16512(g)(2)(B) (â The rights of the Secretary, with respect to any property acquired pursuant to a loan guarantee or related agreement, shall be superior to the rights of any other person with respect to the propertyâ).

154

Id.

155

157

Id.

158

See 42 U.S.C. Â§ 16512(c) (stating â a guarantee by the Secretary shall not exceed an amount equal to 80% of the project cost of the facility that is the subject of the guaranteeâ ¦â).

41

are on the hook for at least 80% of the loan in case of default, they will at least be in first

position to try to recover their investment based on the sale of the defaulting companyâ s assets.

159

The Department of Energyâ s approach ignores the plain letter of the law. Section 1702(g)(2)(B) contains the Superiority of Rights provision (â Superiorityâ). However, under the contracts awarded under Â§ 1705, DOE included pari passu terms, which puts a lender in a position equal to the taxpayer with respect to rights to collateral.

160

Consider the following hypothetical example:

Superiority

provides that â [t]he rights of the Secretary, with respect to any property acquired pursuant to a guarantee, shall be superior to the rights of any other person with respect to the property.â The statute clearly requires that DOE maintain superiority with regard to assets acquired as a result of a guarantee, and, as a result, precludes sharing the collateral with other creditors. Such sharing of collateral also flies in the face of the FIPP program requirements, which mandate loan guarantees to cover no more than 80% of any loan.

DOE guarantees 80% of a billion dollar loan, which defaults. Upon default, the DOE pays $800 million to the senior creditor protected by the DOE loan guarantee. Assume the leftover assets are worth $500 million. Under this Administrationâ s pari passu construct, DOE shares its senior rights to the recovery with the senior lenders, who already received $800 million from the loan guarantee. Therefore, DOE recovers 80% of the $500 million recovery, or $400 million; the non-guaranteed lenders recover an additional 20% of the $500 million, which equals $100 million.

Recall that the lenders already recovered $800 million for their guaranteed portion. This means that in the aggregate, the private lenders that received the DOE loan guarantee recovered $900 million of the total billion dollar loan or 90%. Yet the law intended for taxpayers to be in

first position with respect to the full $500 million in this hypothetical. Accordingly, Pari Passu terms directly violate the FIPP solicitation requirements.

2. Congress Specifically Considered and Rejected Changes to the Superiority Provision that Would Have Allowed for Pari Passu Credit Terms

Supporters of pari passu credit terms for DOE loan guarantees sought to change the law to allow for such credit structures. On July 16, 2009, Senate Bill S. 1462, which would have modified Title XVII to allow for pari passu credit terms by disabling the Superiority provision, was passed by the Senate Energy and Natural Resources Committee, but failed to pass the full Senate.

161

The time invested in drafting a bill and seeking to pass it in both the Senate and the House reflects the effort and analysis that many lawmakers put into this issue. This is the clearest evidence that Congress does not recognize the DOEâ s authority to provide Â§ 1705 loans Also, in the last Congress, the House of Representatives passed â Cap and Trade,â under H.R. 2454. That bill had an identical provision to disable Superiority under Title XVII. H.R. 2454 also failed to become law.

159

See 42 U.S.C. Â§ 16512(g)(2)(B).

160

Id.

161

See S. 1462, 111th Cong. Â§ 103(b)(3) available at http://energy.senate.gov/public/_files/s1462pcs1.pdf.

42

with pari passu terms. Rather, the law requires Superiority to apply to any property acquired pursuant to the original guarantee or binding agreement to provide a guarantee.

3. The Department of Energy Knowingly Violated the Law

Notwithstanding Congressâ s rejection of these bills that were designed to weaken taxpayer protections, on December 4, 2009, the DOE issued final regulations to allow for pari passu treatment of DOE loan guarantees.

162

The Committee raised these concerns in a letter to the Secretary dated December 7, 2011.

By these actions, the DOE disregarded the law and Congress. The specific approach used in both S. 1462 and H.R. 2454 highlights the fact that the law currently does not allow for pari passu treatment specifically due to the Superiority provision. DOEâ s awareness of Congressâ s failure to change the law indicates DOE understood it may be violating the law when it provided loan guarantees with pari passu credit terms.

163

The Department of Energy responded by asserting that Â§ 1702(g)(2)(B) only â governs post-default rights of the Secretary, rather than conditions that must be met at the time the Secretary determines to make a loan guarantee.â

164

Under the DOEâ s interpretation of the

statute, â [o]nce the Secretary has actually acquired property through the Secretaryâ s right of subrogation in a post-default situation, the statute provides that, as a matter of law, the Secretaryâ s rights in that acquired property are superior to any other claimant with respect to that requirement.â

165

The Departmentâ s interpretation is lacking on three levels. First, the Secretary can only secure his superior of rights in collateral before entering in a loan guarantee contract. To say Â§ 1702(g)(2)(B) only applies after a default renders the provision useless. Second, the preceding quotation from the DOEâ s response letter evinces the circularity of its logic: once the Secretary has actually acquired property through the right of subrogation, there is no need to provide for a superiority of rights: he has already acquired the property. Finally, the Departmentâ s interpretation ignores Congressâ clear pronouncements of its understanding that Â§ 1702(g)(2)(B) prohibits pari passu terms. The DOE has never addressed these clear statements of congressional intent.

IV. DOE Has Artificially Inflated Job Creation Statistics

One characteristic of â green jobsâ often touted by the Obama Administration is that green industries rely heavily on manpower, a trait that â makes them especially alluring when it comes to government-led job creationâ measured in terms of jobs â created or saved.â

166

In studies

heralding the creation of large numbers of jobs in green jobs programs, there is a consistent preference for inefficiency.

167

162

74 Fed. Reg. 63544, 63545 (Dec. 4, 2009) (to be codified at 10 C.F.R. pt. 609).

This is contrary to the fundamental economic principle that high

Witnesses Provide Various Definitions of Green Jobs Before House Workforce Panel, DAILY LABOR REPORT,

Apr. 4, 2009 at 60.

43

labor productivity is a measurement of an efficient and healthy economy.

168

The DOEâ s 1705

Loan Guarantee Program follows this flawed principle precisely. According to a leading expert, an economy based on â high paying, low-productivity jobs â ¦ would require an economic structure unknown in human history.â

169

While the energy sector is a very large source of employment, it is a mistake to treat it as a government jobs program. Dr. David Montgomery, Senior Vice President at NERA Economic Consulting and a former CalTech professor, has explained:

It is a fundamental error in policymaking and economics to design or justify federal support for new energy technologies as a jobs program. It subverts the entire purpose of government involvement in R&D, and is the greatest single cause of the continued failure of energy technology programs.

170

However, even accepting the premise that it is appropriate to base a jobs program on green energy development, the Administration fails at this objective.

In almost every public statement about its loan guarantee program, DOE touts job creation. DOEâ s Loan Programs Office webpage proudly proclaims that DOE expects the loans and loan guarantees to â employâ over 60,000 people.

171

One example of DOEâ s misrepresentation of jobs figures relates to a DOE loan guarantee to Ford Motor Company. DOE proclaims that this project, funded through the ATVM program, accounts for 33,000 of the 61,383 jobs. However, these jobs, which DOE represents to be â permanent jobs created or saved,â already existed. Upon closer examination, it appears that DOE reports that the DOE loan â convertedâ existing jobs to green energy jobs. The site also breaks down the number of jobs created or saved by each loan or loan guarantee, and issues press releases for specific projects discussing job creation. These figures are misleading. In reality, the 60,000 number includes jobs that existed at one time, but have since been eliminated; jobs that exist independent of the loan program; and jobs that already existed, but are now considered â green jobs.â

172

168

Green Jobs and Red Tape: Assessing Federal Efforts to Encourage Employment: Hearing Before the Subcomm. On Investigations and Oversight of the H. Comm. on Science, Space, and Technology, 112 th Cong. (2011) (testimony of W. David Montgomery). Had no loan occurred, presumably, the factory would continue to produce non-green energy vehicles; there is no evidence that Ford planned to lay off 33,000 employees if the company had not received the loan. This jobs statistic is also misleading given the statements of David Frantz, Acting Executive Director Loan Program Office and Acting Director ATVM to Committee staff. Mr.

44

Frantz stated during a phone interview, â [ATVM] is not a jobs program. [Job creation] is not a governing factor when we do a deal. Itâ s only a matter of record.â

173

DOE also includes failed projects and a project that refused DOE funding in its job

creation numbers. Despite Solyndra going bankrupt and firing all of its employees, as of February 20th, 2012, DOE still lists Solyndra as creating 3,000 construction jobs (see figure below). While those jobs may have briefly existed, touting jobs for a defaulted project that lost hundreds of millions in taxpayer dollars and including those jobs in a total jobs count prominently displayed on DOEâ s website is inappropriate and misleading.

173 Interview with David G. Frantz Acting Director ATVM Program Jan. 13, 2012.

DOE continues to include in its list of projects a $105 million loan guarantee it finalized with POET, LLC to build an ethanol plant. According to DOEâ s website, POET, LLCâ s loan

guarantee will create 40 permanent jobs and 200 construction jobs. However, POET announced on January 23, 2012, that it had decided not to accept the DOE loan guarantee because it had acquired private financing.

174

DOE also includes 180 jobs that Abound Solar announced, on February 29, 2012, it will be laying off due to a â retoolingâ of manufacturing facilities. Abound struggles to compete with Chinese manufactures that provide a comparable solar panel for a more competitive price. When asked about the layoffs, Aboundâ s CEO, Craig Witsoe, stated, â We hate to have any job loss in the company. But it was the right decision for the business."

Despite POET declining DOEâ s money, as of February 20, 2012, DOE had continued to include it in its job creation numbers (see figure below).

175

174

Timothy Gardner, Ethanol maker POET declines U.S. government loan aid, REUTERS, Jan. 23, 2012 available at

Of the $400 million DOE loan guarantee received by Abound, the company had already drawn down $70 million at the time of the layoffs.

http://www.reuters.com/article/2012/01/23/us-usa-ethanol-loanaid-idUSTRE80M20K20120123 .

175

Matthew Mosk, More Green Energy Layoffs: Colorado Solar Firm Cuts Workforce in Half, ABC NEWS, Feb. 29, 2012 available at

http://abcnews.go.com/Blotter/abound-solar-lays-off-180-workers/story?id=15816806.

46

DOE also incorporates jobs figures for Fisker Automotive (Fisker), which announced a 26 employee layoff on February 6, 2012, at their Wilmington, Delaware plant, as well as for Beacon Power Corp, which filed for Chapter 11 bankruptcy in October 2011, eliminating 34 construction and permanent jobs.

In addition to misleading the public regarding the number of permanent jobs created by the loan program, DOE obfuscates the number of jobs â createdâ by combining temporary and permanent jobs. For each listed loan and loan guarantee project, DOE provides a figure for permanent jobs and construction jobs. As loan projects generally require significant construction, these projects predominantly create temporary construction jobs, which terminate upon a projectâ s completion. For example, solar generation projects require few permanent employees to maintain and operation the facility. In the case of Antelope Valley Solar Ranch, DOEâ s posting reflects 350 temporary construction jobs and only 20 permanent jobs. Nonetheless, DOE reports the number of jobs â saved or createdâ as 370, even though 95% are temporary.

V. The Broken Process for Awarding Loan Guarantees

A. External Pressures on the Program

DOEâ s Inspector General explained that the administration of Recovery Act funds proved to be â more challenging that many had originally envisioned,â

176

and specifically asserted that

â the loan guarantee program could not always readily demonstrate through documentation how it resolved or mitigated relevant risks prior to granting loan guarantees.â

177

The Revolving Green Door

In addition to these concerns, the Committee has also discovered the existence of a revolving door of persons who worked at green energy investment groups only to later be hired by the Administration, which present significant conflicts of interest. These connections raise the specter of undue influence over the loan guarantee process.

Nancy Ann DeParle

Nancy Ann DeParle, the current Deputy Chief of Staff for Policy in the White House, had a financial stake in the success of Granite Reliable, which received $168.9 million loan from DOE. Prior to joining the White House, DeParle was a Managing Director of multi-billion dollar private equity firm CCMP and she both had a financial interest in and sat on the Board of Directors for Noble Environmental Power, LLC.

178

176

The Green Energy Debacle: Where Has All the Taxpayer Money Gone?: Hearing Before the Subcomm. on Regulatory Affairs, Stimulus Oversight, and Government Spending of the H. Comm. on Oversight and Govâ t Reform, 112th Cong. (2011) (statement of Gregory Friedman, Inspector General, U.S. Depâ t of Energy).

Noble owned Granite Reliable, a wind

177

47

energy project.

179

Prior to her departure, her position on Nobleâ s board of Directors positioned her to understand the most confidential and material aspects of Noble Environmental and its subsidiary Granite Reliable. DeParle misrepresented her relationship with Noble Energy, claiming on disclosure forms that her interest had been divested, when in fact it had merely been transferred to her 10 year old son.

180

During her time at the White House, Granite Reliable sought and, in September 2011, obtained a partial guarantee of a $168.9 million loan.

181

Michael Froman

Granite Reliableâ s application for a DOE

loan guarantee was made at least by early 2010, and probably earlier than that, according to signed documents relating to the loan application. Noble sold Granite Reliable in December 2010 to Brookfield Asset Management, just 6 months prior to the conditional approval of the DOE loan guarantee and deep into the application process. The DOE loan guarantee was conditionally approved on June 2011 and finalized in September 2011. DeParleâ s ownership stake in Noble, which owned Granite Reliable, a beneficiary of a DOE loan, represents a clear conflict of interest.

Michael Froman currently serves as the Deputy Assistant to the President and Deputy National Security Advisor for International Economic Affairs.

182

He was a friend of President

Obamaâ s from law school,

183

and supported his political career by bundling over $200,000 for

his 2008 presidential candidacy.

184

Prior to his arrival at the White House, Froman was the Managing Director of Alternative Investments at Citigroup,

185

where he managed infrastructure and sustainable development

investments.

186

Citigroup became a major investor in SolarReserve,

187

which ultimately received

a $737 million loan guarantee in September 2011.

48

Steve Westly

Steve Westly co-founded the Westly Group, a clean energy venture capital firm that, according to DOE records, has reaped over $600 million in DOE loans for its portfolio of investments.

189

One recipient company was Tesla Motors,

190

a premium electric vehicle manufacturer to which DOE awarded a $465 million loan guarantee in January 2010.

191

Westly also sat on Teslaâ s Board of Directors in the companyâ s early days.

192

Westly is a personal friend of President Obama and bundled over $500,000 for his 2008 campaign.

193

Since the election, Westly has visited the White House multiple times for both business and pleasure, and has privately dined with the President in small group fundraising settings.

194

After President Obamaâ s election, Westly was rumored to have been a primary candidate for Energy Secretary.

195

When Secretary Chu received the appointment, Westly was given the opportunity to serve on an advisory board to the DOE, â a pivotal [sic] advisory committee that made recommendations to the secretary on alternative energy policies.â

196

One committee initiative included a recommendation to modify federal rebates for electric cars, a change that would benefit companies such as Westly Groupâ s Tesla.

197

E-mails released by the White House also indicate that Westlyâ s advisory role gave him access to Obamaâ s top advisors and senior White House officials, including advisor Valerie Jarrett.

49

David Sandalow currently serves as the Assistant Secretary for Policy and International Affairs at DOE, where he acts as Secretaryâ s Chuâ s principal adviser on energy policy as well as coordinates DOEâ s foreign policy involvement.

199

Sandalowâ s ties to the White House date back to the Clinton Administration, during which he worked with President Clinton on environmental issues.

200

After having gained this experience, Sandalow became the influential Chair of the Energy & Climate Working Group of

the Clinton Global Initiative.

201

He went on to advise President Obamaâ s presidential campaign

in 2008.

202

Prior to joining the Obama Administration, Sandalow was a senior advisor to Good

Energies, Inc., an energy-focused venture capital firm.

203

Good Energies is an investor in

SolarReserve,

204

a solar power company that received a $737 million loan guarantee from DOE

in September 2011.

205

Sanjay Wagle

Sanjay Wagle has most recently served as Renewable Energy Advisor to DOE under

Secretary Chu, where he helped oversee the $11 billion renewable energy program under the

Recovery Act.

206

Wagle was an Obama fundraiser for the 2008 presidential campaign, garnering

much of his support through his Clean Tech for Obama group. Another venture capitalist that has

acquired an influential role at DOE, his industry colleagues believed that Wagle, among others,

â would help ensure commercial successes from â the steady flow of dollars coming out of

DC.â â

207

Prior to arriving in Washington, Wagle was a principal at Vantage Point Venture Partners

(Vantage Point), a cleantech venture capital firm whose investments received $2.4 billion in taxpayer funds.

50

Mascoma, which received $80 million for an ethanol plant.

209

Wagle left Vantage Point and

moved to DOE shortly after Obamaâ s election, â just as the administration embarked on a

massive program to stimulate the economy with federal investments in clean-technology

firms.â

210

His former firm and the companies it invested in, therefore, had a large stake in the

financing decisions being made by DOE at the time.

211

Steve Spinner

Steve Spinner served as an advisor to Secretary Chu from April 2009 to September 2010. In that position, Spinner helped oversee the strategic operations of the clean energy loan guarantee program under the Recovery Act.

212

Spinner was previously an energy-focused venture capitalist and high-tech consultant.

213

He is also an Obama bundler, having raised over $500,000 for the President in 2008,

214

and over $200,000 thus far for 2012.

215

Spinnerâ s wife, Allison Berry Spinner, is a partner at Wilson Sonsini Goodrich & Rosati, the law firm that represented Solyndra on matters related to the DOE loan.

216

According to federal records, the firm received at least $2.4 million in federal funds for legal fees related to the representation.

217

White House e-mails released late last year indicate that Spinner was influential in securing the $528 million loan to now-bankrupt Solyndra. Many of those emails were written just days after he signed an ethics agreement pledging that he would â not participate in any discussion regarding any application involvingâ his wifeâ s law firm.

218

In one message to a DOE

official on August 28, 2009, Spinner wrote, â How hard is this? What is he waiting for? . . . I have

OVP and WH breathing down my neck on this.â

219

The e-mail went on to demand that the DOE

official â walk over there and force [the official working on the Solyndra evaluation] to give

[him] an answer.â

220

After just being contacted by Solyndra, Spinner inquires in another e-mail,

â Any word on OMB? Solyndraâ s getting nervous.â

221

209

Id.

The e-mail correspondence occurring in

the final days before the Solyndra loan closed in September 2009 centers heavily on Spinnerâ s

efforts to coordinate plans for either the President or Vice President to announce the first loan approval at a scheduled visit to Solyndra.

222

Peter Weeks

Peter Weeks currently serves as Clean Energy Advisor at DOE, a position to which he was appointed in March 2009.

223

To be clear, there is no apparent connection between Mr. Weeks and a project that received a loan from DOE. However, his profound lack of experience in the renewable energy arena before being named as a top DOE advisor causes some concern. Prior to joining the Administration, Weeksâ s resume consisted primarily of Democratic campaign positions with groups such as Obama for America, Maine Democratic Party, Kerry for President, and Gephardt for President.

224

His prior experience was limited to communications and politics, and includes no record of any energy policy expertise.

225

According to Weeks, his work at DOE has included helping to â develop due diligence and procurement plans of 200 awards worth over $10 billion,â as well as â manage two multi-billion dollar energy tax programs.â

226

Additionally, Department e-mails also indicate that Weeks participated in meetings with and had access to high-level officials,

227

including Ron Bloom, giving him the opportunity to participate in decisions and exert some degree of influence.

228

It is puzzling how someone without any prior energy, project management, or finance

experience would be appointed to a position with responsibilities of this magnitude and particular nature. A private sector institution responsible for due diligence for billions of dollars in loans would never trust someone with only campaign experience to be involved with such technical issues. Given Weeksâ s consistent history of strong support of the Democratic Party and President Obama, his appointment adds to the perception that many of the Administrationâ s decisions have been driven by politics as opposed to any viable, coherent, energy policy.

Weeksâ s position at DOE appears to involve highly technical issues with high stakes and great sensitivity.

52

Solopower is a European firm that seeks to build a solar factory in Oregon. Solopower accepted $40 million of Oregon taxpayer money in addition to DOEâ s approval of a $197 million

loan via the Federal Financing Bank (FFB).

229

We believe that [average selling price (ASP) per watt] could decline to $1 or less within the next 1-2 years. From the output provided by the DOE, we concluded that even if SoloPower achieves the efficiency and yield projections of the DOEâ s base case, an ASP of $1 or less would severely strain SoloPowerâ s ability to meet its debt service obligations.

They received this federal assistance despite a rather dire prediction of Solopowerâ s prospects by Standard & Poorâ s (S&P). According to internal documents obtained by the Committee, S&P warned DOE that:

230

In other words, S&P predicted that Solopower will fail to meet its debt obligations.

Additionally, the loanâ s already extremely poor S&P rating of CCC+ appears to depend on lender protections that prevent loan disbursements unless benchmarks are met:

It is to lendersâ advantage that the company will not have access to the credit facility until it constructs and operates Line 1A at expected levels of performance. Similarly, the company cannot make the first or subsequent draws unless 30% of installed capacity is under contract to be sold.

231

According to S&P, these lender protections enable S&P to provide a CCC+.

232

The story of Solopower reflects a very concerning form of waste that creates substantial uncertainty as a byproduct, tying up private investor capital and federal funds until the entity fails (or succeeds) to achieve targeted benchmarks. If Solopower fails to achieve success sufficient to receive DOE funds, then those private investors anticipating the benefit of DOE loans will suffer substantial loss, resources will have been wasted, and employees will be let go

after a short time. However, if Solopower meets the requirements for disbursement, then the likelihood for failure and loss to the taxpayer are significant as the base case for the panel manufacturerâ s production costs does not reflect expectations for sufficiently competitive pricing.

In short,

the primary protection against losing $197 million of taxpayer money is the small chance that Solopower will ever get the money. Without these protections, it can only be presumed that the credit rating would fall to levels reflecting default.

What Solopower lacked in economic value, it made up for in political connections.

Unlike other 1705 loan guarantee recipients, Solopower exerted bipartisan political influence on DOE through strong ties to both the Bush and Obama Administrations. Solopower itself built the ties to the Obama Administration. Bruce Khouri, who served on the Board of Directors

233

229

53

and now serves as the Chief Commercial Officer,

234

donated $28,500 to the Democratic National

Committeeâ s â Obama Victory Fundâ in 2008.

235

Lou DiNardo, who served as interim CEO

236

and now serves as Chairman of the Board of Directors, previously worked as a General Partner

at VantagePoint Venture Partners where DOE stimulus advisor Sanjay Wagle worked.

237

Solopower, based in San Jose, California, developed an ally in Democratic San Jose Mayor

Chuck Reed. Mayor Reed sent letters to DOE and talked with DOEâ s Jonathan Silver in person

to advocate for and attempt to speed up Solopowerâ s loan guarantee.

238

Hudson Clean Energy Partners, the biggest investor in Solopower,

239

had strong ties to

the Bush-era DOE. Craig Cornellius, a member of the Board of Directors at Solopower and Managing Director at Hudson Clean Energy Partners, and Alexander Karsner, a member of the Hudson Clean Energy Partners Advisory Board, both worked in renewable energy positions for DOE during the Bush Administration.

240

Another Managing Partner for Hudson Clean Energy

Partners, Neil Auerbach, donated tens of thousands of dollars to Republicans in 2008.

241

Hudson

Clean Energy Partners also retained BlueWater Strategies to lobby both branches of Congress and the White House.

242

According to BlueWater Strategiesâ website, Andrew Lundquist,

founder and Managing Partner, â led George W. Bushâ s transition team for the Department of Energyâ and â served as a senior advisor and strategist on energy issues for the President and Vice President.â

243

With its ties to DOE officials in both the previous and current Administrations,

Solopower had people on both sides of the political aisle that could use their influence to pressure DOE into issuing and finalizing Solopowerâ s loan guarantee.

Dawn McCarty, Beacon Power, Backed by U.S. Loan Guarantees, Files Bankruptcy, BLOOMBERG, Oct. 31,

2011, available at:
http://www.businessweek.com/news/2011-10-31/beacon-power-backed-by-u-s-loan-guarantees-

files-bankruptcy.html.

both S&P and its own internal analysis regarding risky business models, DOE proceeded with a deal that will cost taxpayers millions in losses.

Before its demise, Beacon Power relied on funding from the federal government. DOE

gave Beacon Power over $25 million in grants.

246

However, the largest investment came when

DOE announced a conditional $43 million loan guarantee to Beacon Power on July 2, 2009, to

create a â 20 megawatt flywheel energy storage plantâ in Stephentown, New York.

247

In April

2010, S&P evaluated the loan guarantee project and assigned it a dismal CCC+ credit rating,

even though the rating incorporated the benefit of the $43 million loan guarantee.

248

The S&P

rating noted that â Beacon is currently an unprofitable start-upâ and that â significant exposure to

commodity price volatilityâ could significantly hurt the company.

249

S&P ran two default

scenarios, both of which demonstrated that taxpayers would lose millions.

250

DOE conducted its

own risk analysis and also assigned Beacon Power a junk CCC+ rating.

251

DOE, however,

ignored these warnings and finalized the loan guarantee in August 2010.

252

As predicted, Beacon Power continued to remain unprofitable and burn through money at

a rapid rate. In the weeks leading up to its bankruptcy, Beacon Power began spending hundreds

of thousands of dollars on law firms.

253

When Beacon Power went bankrupt, DOE tried to

minimize the bad publicity by arguing that it had required â many protections for the taxpayerâ in

the loan guarantee contract.

254

However, as Beacon Power continues to go through the

bankruptcy process, DOE now admits that taxpayers will likely lose millions on this bad

investment.

255

C. Abound Solar: Politics and a Risky Investment Collide

DOE could have avoided these loses by taking the warnings of S&P and its own

analysis seriously and not risking over $39 million on a company destined for failure.

Dawn McCarty, Beacon Power, Backed by U.S. Loan Guarantees, Files Bankruptcy, BLOOMBERG, Oct. 31, 2011, available at: http://www.businessweek.com/news/2011-10-31/beacon-power-backed-by-u-s-loan-guarantees-files-bankruptcy.html.

255

Letter from David Frantz, Acting Executive Director of Loan Program Office, U.S. DOE, to Hon. Darrell Issa, Chairman, H. Comm. on Oversight and Govâ t Reform, Feb. 14, 2012 (Stating â the DOE stands to recover more than 70 percent of the taxpayerâ s investment.â However, even if DOE recovered 80 percent of its investment, taxpayers would still lose millions).

55

On July 3, 2010, President Obama announced during his weekly radio address that DOE would again invest hundreds of millions of dollars in a risky solar panel manufacturer. Much like Solyndra, Abound Solar manufactures solar panels using unproven technology, received a dismal credit rating for its loan guarantee, and has strong Democratic political connections. In fact, DOE finalized Abound Solarâ s loan in the same month that DOE worked to restructure the failing Solyndraâ s loan.

In between DOE issuing Abound Solar its $400 million conditional loan guarantee and finalizing it in December 2010, Fitch Ratings evaluated the project and assigned it a junk credit rating. Fitch gave the project a credit rating of â B â (worse than Solyndraâ s) with a recovery estimate of only 45%.

256

Despite including the benefit of the DOE loan guarantee in the rating (which likely made the rating more favorable), Fitch labeled the project â highly speculativeâ and described Abound as lagging in technology relative to its competitors, failing to achieve stated efficiency targets, and expecting that Abound Solar will suffer from increasing commoditization and pricing pressures.

257

In addition to these concerns, Fitch worried that Abound Solar needed to raise more private money to build its new facilities and that, if it could not, Abound Solar could default on its DOE loan.

258

Recently, Abound Solar began encountering the financial problems that Fitch predicted. In line with Fitchâ s prediction, Abound Solar has recently struggled to raise additional capital,

causing DOE to stop disbursing loan payments to the company.

259

More troubling, Abound

Solar announced on March 1

st

that it would stop producing solar panels and would fire 180

employees, even though it has already received $70 million from DOE.

260

256

Letter from Jason Paraschac, Senior Director, Fitch Ratings, to Steve Abely, Chief Financial Officer, Abound Solar, Nov. 4, 2010 (on file with author).

Abound Solar

continues to claim publicly that it does not have serious financial problems and will survive;

257

See id. at 4

â Aboundâ s lagging conversion efficiency negatively impacts the panelâ s installed costs which should negatively impact expected panel [average selling prices]. In addition, Fitch expects further price pressures in this market over the next 3-5 yearsâ ¦â

â Abound has not provided an explanation as to why gains in [solar panel] conversion efficiency have not materialized as expectedâ ¦â

â [Average selling price] assumptions in the new model are significantly below the prior plan. While this may in part reflect the lower conversion efficiency of [Aboundâ s] solar panel, it is largely a reflection of severe price contractions in the [solar photovoltaic panel] market over the past 24 months.â .

258

See id. at 7

â Abound must raise additional equity to fund the completion of its planned manufacturing facilities. An

inability to access equity markets could force an early default of the loan before construction is complete but also before the loan is fully drawn down.â .

259

Yuliya Chernova and Cassandra Sweet, California Solar Deal Hits a Snag, THE WALL ST. J., Feb. 11, 2012,

available at: http://online.wsj.com/article/ SB10001424052970203646004577214973345400202.html.

260

Todd Woody, Abound Solar, Recipient of $400 Million Federal Loan Guarantee, Halts Production, FORBES, Mar. 1, 2012, available at http://www.forbes.com/sites/toddwoody/2012/03/01/abound-solar-recipient-of-400-million-federal-loan-guarantee-halts-production/.

56

however, its inability to raise capital and meet DOEâ s requirements likely indicate serious troubles ahead for the company, as predicted by Fitch.

Abound Solar has ties to Democratic politicians at the federal level and the state level in Colorado. Bohemian Companies, LLC, founded by Pat Stryker, became an early investor in Abound Solar (at the time AVA Solar) in October, 2008.

261

In addition to the initial funding, the

CEO of Bohemian Companies, Joseph Zimlich, has served as both a director

262

and a board

member of Abound Solar.

263

Pat Stryker is a major Democratic donor who Forbes included on

its 2011 list of top liberal spenders.

264

In 2008, Stryker donated $50,000 and bundled $87,500

for President Obamaâ s 2009 inauguration, and has given $35,800 to the 2012 Obama Victory

Fund.

265

Abound Solar also developed ties to Congressional Democrats. The company hired

then Democratic Congressman Paul Kanjorskiâ s nephew Russell as its vice president for

marketing.

266

Abound Solar supported the 2009 cap and trade bill in the House of

Representatives and funded an advertisement thanking then-Colorado Democratic

Congresswoman Betsy Markey for her vote in favor of the bill.

267

At the state level, then-Democratic Colorado Governor Bill Ritter strongly supported

Abound Solar and its application for a DOE loan guarantee. When Energy Secretary Chu visited

Colorado, Governor Ritter handed Secretary Chu a letter urging him to approve Abound Solarâ s

loan guarantee because it would allow the company to expand and hire new workers.

268

The combination of Abound Solarâ s junk credit rating, financial problems, and the companyâ s political connections raise serious concerns about whether DOE based the decision to invest $400 million on merit and whether taxpayers could again lose millions on a dubious solar manufacturing project.

D. Ormat Nevada: Strong Ties to Harry Reid

Senate Majority Leader Harry Reid announced on September 23, 2011, that DOE finalized a $350 million partial loan guarantee for three geothermal power plants owned by Ormat Nevada, Inc.

269

261

Press Release,Reid Announces Finalized Loan Guarantee for Ormat Geothermal Projects, United States Senator

Harry Reid, Sept. 23, 2011, available athttp://reid.senate.gov/newsroom/ pr_092311_geothermalloan.cfm.

57

Geothermal (see below) as Ormat received an almost $80 million engineering, procurement, and construction contract to build Nevada Geothermalâ s Blue Mountain plant.

270

Meaningful ties exist between the Senator and Ormat. Two of Ormatâ s federal lobbyists previously worked for Senator Reid. Ormatâ s outside lobbyist, Kai Anderson of Cassidy and Associates, served as Senator Reidâ s Deputy Chief of Staff up until 2005.

271

Anderson lobbies

both the House of Representatives and the Senate for Ormat.

272

Anderson has given close to

$90,000 to Democratic candidates and campaign committees over the past three cycles, including thousands to Senator Reid.

273

Ormatâ s company lobbyist, Director of Policy and Business

Development Paul Thomsen, served as a â Regional Representativeâ for Senator Reid through

2005.

274

Thomsen gave thousands in political contributions to Senator Reid.

275

During Senator

Reidâ s 2010 reelection campaign, Thomsen starred in a campaign ad for Senator Reid to

advertise the benefits of Ormatâ s loan guarantee for Nevada.

276

In addition to Anderson and

Thomsen, Ormatâ s President, Yoram Bronicki, gave thousands in political contributions to

Senator Reid.

277

E. Nevada Geothermalâ s Blue Mountain Project

The strong ties between the company and the Senate Majority leader raise

questions about whether the DOE acted in the best interests of the American people when it

approved the loan guarantee.

On June 15, 2010, DOE announced that it would conditionally issue a $98.5 million

partial loan guarantee to Nevada Geothermal Power Company (Nevada Geothermal).

278

270

Nevada Geothermal Application for DOE Loan Guarantee, U.S. Depâ t of Energy, Nov. 2, 2009 (on file with author).

This

loan enabled Nevada Geothermal to refinance the Blue Mountain Geothermal Project (Blue

Mountain) through John Hancock Financial Services (John Hancock). In other words, the DOE

278

Press Release, Energy Department Offers Conditional Commitment to Support Nevada Geothermal Development

with Recovery Act Funds,U.S. Depâ tt of Energy, June 15, 2010, available at: https://lpo.energy.gov/?p=805.

58

loan paid back a prior financial obligation of Nevada Geothermal. This was the first of DOEâ s â Financial Institution Partnership Programâ (FIPP) loan guarantees, under Section 1705, where private investment groups worked with DOE to provide financing to energy projects.

279

Less

than three months after the conditional approval, DOE finalized this loan guarantee, enabling Nevada Geothermal to refinance a loan from TCW through John Hancock.

280

The loan did not finance any new construction and therefore did not help to create a single new job. DOEâ s awarding of this loan guarantee raises questions about why DOE was investing significant taxpayer resources in an entity with well-established financial difficulties. In the press release for the project, Secretary Chu and Senate Majority Leader Harry Reid touted Blue Mountainâ s potential, with Senator Reid saying that, â I am glad to see economic recovery funding being used to put Nevadans to work on a project that will help us achieve energy independence. Northern Nevada is the Saudi Arabia of geothermal energy and I thank

Secretary Chu for recognizing the Silver Stateâ s enormous job-creating potential to produce plenty of clean and affordable energy.â

281

It was known to him at that time, however, that the loan would not create a single job, but instead simply refinance an existing loan, despite DOEâ s claim that it would create over 200 jobs.

282

1. Misuse of the DOE Loan Guarantee as a Tool to Bailout Creditors

Nevada Geothermal has a well documented history of major financial problems. By the time DOE conditionally approved the loan guarantee, Nevada Geothermal had already violated contract terms and debt covenants relating to financing from its primary lender, TCW. According to Nevada Geothermalâ s financial statements, the firm would not avoid default without the benefit of a loan guarantee.

On October 2, 2011, The New York Times ran a story about the financial difficulties of Nevada Geothermal, relying partially on a September 2011 Deloitte & Touche audit of the company which stated â significant doubt about the companyâ s ability to continue as a going concern.â

283

In response, DOE dismissed the financial problems of Nevada Geothermal and instead pointed to the alleged financial health of Blue Mountain to argue that the loan guarantee would be repaid.

284

Given that Nevada Geothermalâ s principal operation is Blue Mountainâ s Faulkner I Power Plant, such a distinction has questionable merit.

285

See Nevada Geothermal Power Inc., Consolidated Financial Statements, June 30, 2010 at 6, available

athttp://www.nevadageothermal.com/i/pdf/Annual_Financials_2010.pdf.

59

As noted above, at the time DOE approved the conditional loan guarantee, Nevada Geothermal had already violated terms to the loan agreement with its primary creditor, TCW. Based on financial disclosures, Nevada Geothermal avoided default as a result of TCWâ s granting a waiver and extension in anticipation of the John Hancock financing backed by the DOE loan guarantee. The resulting DOE bailout of Nevada Geothermal was planned out in advance, as made clear by Nevada Geothermalâ s March 31, 2010 Financial Statements:

The Company has engaged John Hancock to provide long term debt up to $95 million which will be used to pay down the TCW loan and to fund additional drilling. However, this potential John Hancock loan is subject to due diligence and final credit committee approval by John Hancock. There is no certainty that the anticipated debt financing through John Hancock will be obtained. Failure to obtain the John Hancock loan, or a similar loan from another lender, and/or unsuccessful drilling may result in a default under the terms of the TCW loan agreement. In the event of a default TCW may elect to call the loan and execute upon the security, which would result in a material adverse effect on the Company, including delay or indefinite postponement of operations and further exploration and development of our projects with the possible loss of such assets.

286

The story continued to unfold in Nevada Geothermalâ s June 30, 2010 Financial Statements, where the plan to bailout their lender, TCW, was successfully executed by DOE: (emphasis added)

As at June 30, 2010, the Company was not in compliance with the terms of the TCW loan. The non-compliance results from the Company having exceeded the maximum loan amount of $180 million, and having exceeded the drilling expenditure budget by more than $3.8 million, as well as some instances of technical non-compliance with other loan terms .â ¦ As a result, for balance sheet purposes, the TCW long-term loan has been classified as a short-term liability. On November 20, 2009, TCW agreed in principle to waive the non-compliance until March 31, 2010 in return for 4.5 million NGP Inc. warrants exercisable at CAD 1.50 (Note 21(f)). Subsequently, TCW agreed to extend the agreement in principle, without change, until the John Hancock loan [guaranteed by DOE

287

286

Nevada Geothermal Power, Inc., Consolidated Financial Statements, Mar. 31, 2010, at 11, available at http://www.nevadageothermal.com/i/pdf/Q3_March_31_2010.pdf.

] closed. The John Hancock loan was closed on

287

Nevada Geothermal Power, Inc., Consolidated Financial Statements, June 30, 2010, at 55, available at http://www.nevadageothermal.com/i/pdf/Annual_Financials_2010.pdf (Explainingthe John Hancock loan guaranteed by DOE: â On October 13, 2009 the Company [Nevada Geothermal] announced that it appointed John Hancock Life Insurance Company (â John Hancockâ) to be the exclusive debt provider for up to $95

Million 20-year

term loan. Further to the above, on October 7, 2009, the DOE announced its Financial Institutions Partnership

Program (â FIPPâ), a program supported by the 2009 ARRA. The FIPP program is designed to facilitate long term

financing for renewable development projects using commercial technology and applies to up to 80 percent of the

loan amount. John Hancock, as Lender for the Blue Mountain 'Faulkner 1' geothermal project, made an application

to the DOE for a Loan Guarantee under the FIPP. The loan guarantee was conditionally approved on June 15, 2010,

and the loan closed on September 3, 2010â ¦.At the closing of the John Hancock/DOE loan after paying associated

fees and funding reserve accounts for drilling, interest and plant maintenance the Company paid the TCW loan

down to approximately $86.9 million. The Company plans to apply for a second ARRA grant based upon work, to

60

September 3, 2010, and a repayment of $81,076,669 was made on the TCW

loan.

288

Confirming this troubling misdirection of taxpayer funds, the Summary of Proposed

Terms and Conditions for the Conditional Loan Guarantee, signed by Secretary Chu, provides

that the â proceeds of the Guaranteed Obligation will be used for the following: (i) Partial

repayment of intercompany loan from HoldCo [Blue Mountain], in the amount of approximately

80 million;â ¦â

(emphasis added)

289

This intercompany repayment would ultimately flow to TCW as described

above. The remaining amount of the loan went to the posting of cash collateral to NV Energy, Inc., funding a debt service reserve account, funding a maintenance reserve account, funding a drilling expenditure account (which included already incurred costs), and other fees. As these numbers total to around $98 million, it appears that little, if any, of the loan went to fund new drilling or new construction.

290

2. This Bailout Appears to Violate the American Recovery and Reinvestment

Act of 2009

Not only does it appear that DOE purposely directed taxpayer funds to a failing

enterprise, DOEâ s action robbed taxpayers of genuine investment toward renewable energy. This loan guarantee bailed out lenders (TCW) and provided no assurance that TCW would apply the money that it recovered toward the economy or jobs as required by the American Recovery and Reinvestment Act of 2009.

Title XVI, Section 1602 of the American Recovery and Reinvestment Act of 2009,

requires that â recipients shall also use grant funds in a manner that maximizes job creation and economic benefit.â

291

increase power production, subsequent to the first grant that will be partially funded by the John Hancock/DOE

loan.â).

Paying off a creditor clearly does not maximize job creation and

economic benefits. Rather, it provides an opportunity for private industry to exit an investment, deleverage and transfer the extraordinarily high default risk to taxpayers.

288

Id.

289

Loan Guarantee LGPO Loan Number: F1001, U.S. Depâ t of Energy, June 15, 2010 at. 4 (on file with author).

290

Nevada Geothermal Power, Inc., Conditional Loan Guarantee, U.S. Depâ t of Energy, Summary of Terms and

Conditions at 4 Summary of Terms and Conditions (Stating â USE OF PROCEEDS: The proceeds of the

Guaranteed Obligation will be used for following:

(i) Partial repayment of intercompany loan from HoldCo in the amount of approximately $80 million;

(ii) Funding security requirements under the power purchase agreement signed on August 18, 2006 with NV

Energy, f/k/a Nevada Power Company (â PPAâ), either by posting cash collateral, cash collateralizing

one or more letters of credit, or otherwise in accordance with the PPA in amount of $3.8 million (the

â PPA Credit Supportâ);

(iii) Funding of the Debt Service Reserve Account in the amount of approximately $5.5 million, Major

Maintenance Reserve Account in the amount of $125,000, and Drilling Expenditure Account in the

amount of approximately $8,400,000 (less amounts applied to reimburse the Borrower for Project

Costs incurred prior to the Closing Date in connection with the Additional Wells (as defined below));

(iv) The payment of certain fees and transaction expenses associated with the Guaranteed Obligation which are

permitted to be paid with such proceeds under the Solicitation as set forth in Schedule 1; and

(v) Initial funding of the Operating Account with all remaining proceeds of the Guaranteed Obligation.â).

291

American Recovey and Reinvestment Act of 2009 Â§1602, Pub. L. No. 111-5.

61

For this reason, it appears DOE, in its very first FIPP section1705-based loan guarantee, violated the spirit and, quite possibly, the letter of the law.

3. Given the â Pari Passuâ Deal Terms and the Required Consent of all Lenders to Reorder Priority, the Terms of the DOE Loan Guarantee Appear to Violate the Requirement of Superiority under Title XVII, Section 1702(g)(2)(B)

The Summary of Terms and Conditions in the Conditional Loan Guarantee signed by Secretary Chu that relates to the Blue Mountain loan guarantee, at page 8, provides for a pari passu and pro-rata right of payment for senior creditors.

292

This means that the unguaranteed senior lender, John Hancock, stands equal to taxpayers in terms of recovering a share of their loss in the event of default. The Summary of Terms also requires the consent of all Lenders in the event that DOE seeks to â change to the priority of payment in the payment waterfall.â

293

4. Nevada Geothermalâ s Continuing Problems

The combination of the pari passu credit terms, which ranked John Hancock as an equal to taxpayers, with DOEâ s inability to reorder priority in case of a default, disables the ability of DOE to rely on its superiority as required under Section 1702(g)(2)(B).

Since DOE finalized Nevada Geothermalâ s loan guarantee in September 2010, the project continues to have operational and financial problems. The project has an ongoing problem with

electrical fires. In January 2010 (before the loan guarantee), part of the Blue Mountain plant was damaged after electrical cables were placed too close together and burned; a significant amount of cable was destroyed and had to be replaced.

294

In October 2011, another fire occurred because the seal on one of the pumps failed, causing part of the plant to go offline for major repairs.

295

Operational problems at the Blue Mountain project resulted in revenue being less than estimated the last four months of 2011.

296

Additionally, in November 2011, one of Nevada Geothermalâ s major creditors considered placing Nevada Geothermal in default because of a late payment,

297

and Nevada Geothermal lost $3.9 million in the fourth quarter.

298

F. Granite Reliable

In September 2011, Granite Reliable Power, LLC, a wind generation company owned by the Brookfield family of companies, received a partial guarantee for $168.9 million loan from DOE.

?projects=granite-reliable.

62

Coos, New Hampshire.

300

Unlike other loan recipients, Granite Reliable was a very profitable

company without any demonstrated need to obtain a loan subsidy in order to secure private

financing.

301

Until 2011, Granite Reliable was owned and controlled by Noble Environmental Power,

Inc. Noble sold that 75% interest to BAIF Granite Holdings, Inc., just prior to the projectâ s loan

approval in September 2011.

A deeper look into the players and circumstances surrounding this decision suggest

that politics may have led DOE to approve the loan.

302

BAIF Granite Holdings (BAIF) was created by Brookfield

Renewable Power, a subsidiary of the $3.2 billion company Brookfield Asset Management

(BAM).

303

Brookfield Renewable Power financed the creation of BAIF from its Brookfield

Americas Infrastructure Fund, which reportedly has assets totaling $2.7 billion.

304

The remaining

minority interest is owned by Freshet Wind Energy, LLC, which partnered with BAIF on the

project.

305

1. Brookfieldâ s Company Background: Board Members, Holdings, and

Investors

Given the solid financial background from which Granite Reliable was formed, it is

unclear why DOE determined that the company needed a $168.9 million loan guarantee.

One reason DOE determined a loan guarantee may have been necessary may lie in the

inner workings of the BAM family of companies and the companiesâ strong Democratic ties.

BAM owns BAIF, which owns Granite Reliable, as well as Brookfield Office Properties (BOP).

BOPâ s Board of Directors is chaired by John Zuccotti, the man for whom New York Cityâ s

Zuccotti Park is named, and includes Diana Taylor, New York City Mayor Michael Bloombergâ s

long-time girlfriend.

306

George Soros and Martin J. Whitman, both prominent Democratic

donors, are both heavily invested in Brookfield.

307

Moreover, Heather Podesta, sister-in-law of

Obamaâ s influential White House transition director John Podesta, and the Podesta Group served

as the lobbyists for BAIF.

63

2. Nancy Ann DeParle: Obamaâ s Deputy Chief of Staff for Policy and Noble Interest Holder

As described in Section V, Part B of this report, Nancy DeParle suffered a conflict of interest during her time in the Administration. As indicated on her financial disclosure forms, prior to joining the White House, Nancy DeParle was one of five managing directors of a multi-billion dollar private equity firm CCMP

404

309

While with CCMP, she sat on the board of directors

for Noble Environmental Power, LLC, one of CCMPâ s investments.

310

She served as a board

member of Noble for about two years and quit in March of 2009.

311

Noble owned Granite

Reliable.

Coinciding with her tenure at the White House, DOE considered a loan guarantee for

Granite Reliable. The Granite Reliable project was well underway by late 2009.

312

Noble then

sold Granite Reliable in December 2010 to Brookfield Asset Management, just 6 months prior to the conditional approval of the DOE loan guarantee and deep into the application process.

313

The

DOE loan guarantee was conditionally approved in June 2011 and finalized in September 2011. The ultimate approval of the DOE loan guarantee that followed the sale of Granite

Reliable is tainted by DeParleâ s position within the White House and her financial interest in Noble. DeParleâ s position in the Administration could have been used to influence the successful sale by ensuring or increasing the likelihood of ultimate approval of the DOE loan guarantee. The loan guarantee would increase the value of the Granite Reliable, improving the sale price and, thereby, improving the investment of DeParleâ s son.

G. Record Hill Wind: DOE Uses the First Solar Precedent to Speed

Through Another Questionably â Innovativeâ Technology

DOE relied on the First Solar precedent to approve Record Hill Windâ s $102 million loan guarantee project as â innovative,â despite the project using commercial technology. DOE knew that the Record Hill project did not use significantly innovative technology. The Standard & Poorâ s credit rating for the project that DOE received clearly indicates the commercial (and non-innovative) nature of the project:

Record Hill has entered into a Turbine Supply Agreement for the shipment of 22 Siemens 93SWT[Siemens Wind Turbine] 2.3MW wind

64

turbines to be installed at the site. The SWT-2.3-93 turbine has been in operation in Europe since 2005, and the first turbines in the US were installed and began operations in 2006. Currently, there are a total 1,374 SWT-2.3-93 turbines operating worldwideâ ¦.

â ¦Due to harsh winter conditions in Maine, the project plans to install a cold weather package on all turbines, which will keep the turbines running in cold temperatures. Siemensâ cold weather packages are currently in use on turbines in Canada, Norway, and other cold areas, and have performed to expectations. Along with a cold weather package, the project expects to make use of Siemens proprietary Turbine Load Control (TLC) technologyâ ¦Given that the technology is software-based, however, and is not considered a fundamental component in the performance of the turbine, the TLC could be shuttered without damaging the turbine if it does not work properly. In this case, the turbines would continue to run similar to Siemensâ existing fleet.

314

Much like First Solarâ s â innovativeâ projects, the Record Hill Wind project attempted to categorize minor modifications to existing commercial technology as â innovativeness.â DOE eventually agreed with Record Hill Windâ s questionable reasoning. On December 14, 2010, Todd Shrader of DOE sent an email to several DOE personnel with the subject line â Eligibility Intepretation (sic)â that read: (emphasis added)

An eligibility issue arose during the technical evaluation of Ocotillo Express (FIPPâ F1033). This project is utilizing Siemens SWG-2.3-101 wind turbine generators. It is claimed to be a commercial technology based on the wide spread use (including in this country) of the closely related Siemens SWG-2.3-93 turbines, which are essentially the same just with smaller blade lengths (101 feet vs. 93 feet). Without looking deeper into the design differences (which will occur at due diligence), I concur with the applicant that this is a commercial technology. However, for Record Hill, which is using SWG-2.3-93 turbines, it is claimed that this is a new and innovative technology, partially based on no use over 5 years in the US for these turbines. I also believe there were some differences in internal controls. However, the 101 and 93 units are essentially the same technology. Can the same technology be innovative under the Renewables Solicitation and Commercial under the FIPPâ s solicitation?

315

Later in the day, Ruth Ku of DOE replied that the same question had occurred before with a different project and that the â project was asked whether it could obtain alternative financing in the private marketâ ¦the project was able to get alternative financing (e.g., with John Hancock) and I think the recommendation was for it to move

its application to FIPPâ ¦donâ t know where Record Hill is in its process for it to be

(emphasis added)

65

feasible for it to apply under FIPP at this point.â

316

Ruth Ku forwarded her email to

Douglas Schultz, a Program Manager at DOEâ s Loan Programs Office. Douglas Schultz

replied, â Record hill is well into due diligence with [D]avid [S]chmitzer. No reason to

transfer at all. In terms of precedent of innovative and not look no further than first

solar where there [sic] panels are both innovative and noninnovative given the

inverter used.â

317

Ruth Ku agreed with Douglas Schultz but worried that submitting two project

applications using the same technology as innovative and not innovative could cause a

â policy issue for OMB.â She wrote back to Douglas Schultz stating â [I]t cld [sic] be a

policy issue for OMB if record hill followed Ocotillo. Think itâ s probably less of an

issue if record hill was first then Ocotillo.â

(emphasis added)

318

After scheming about how to get the two

applications through OMB without problems, DOE allowed the Record Hill Wind project

to continue as an â innovativeâ project.

319

H. Genesis Solar: An Expedited Approval Process Now Threatens Entire

Project

DOE would eventually finalize a $102 million

loan guarantee (guaranteed 100% by the federal government) in August 2011.

On August 20, 2011, DOE awarded NextEra Energy Resources LLC (NextEra) a partial

loan guarantee for $825 million to fund the Genesis Solar Energy Project (Genesis). A planned

250-megawatt plant to lie on 1,950 acres of federal land located outside Blythe, California,

Genesis plans to power more than 187,500 homes by 2014.

320

Standard & Poorâ s gave NextEra

a BBB+ rating, highly dependent on a long term Power Purchasing Agreement (PPA) with

Pacific Gas &Electric (PG&E), and a Construction Completion Agreement with NECH, noting

that if eitherâ s credit ratings were downgraded in the interim, it would hurt Genesisâ s rating as

well.

321

S&P emphasizes that the loan guarantee would only support the project for up to a six

month delay. Additional delays would restrict Genesisâ s ability to meet the PPA and jeopardize

the success of the project.

322

An accelerated state and federal site approval process allowed the project to gain DOE

approval, but the hasty work may now endanger the entire project. Genesisâ s original site resided on a section of Ford Dry Lake, which archeologists suspected contained ancient cremation sites.

323

316

Email from Ruth Ku, U.S. Depâ t of Energy, Dec. 14, 2010 (on file with author).

To minimize delays, NextEra moved the project two miles north to a new site, still on federal land. DOEâ s application process requires extensive vetting of project sites for a variety of environmental factors. However, to expedite site approval, NextEra opted for a less thorough process developed by the state energy commission (The Commission) and the Bureau of Land Management (BLM) that would â streamline the time necessary to produce the

66

joint cultural resources analysesâ ¦foregoing potentially lengthy investigations to evaluate the historical significance of the cultural resources found.â

324

The Commission did warn Genesis of the potential consequences associated with the site approval process in August 2011, stating, â This approach however has the real potential to result inâ ¦delays in construction start-up, increase in requisite construction monitoring, and cost.â

325

After DOE granted final approval to the project and construction began, grading equipment unearthed grinding stones lying on a bed of charcoal, indicating possible evidence of human settlements. This discovery caused work to halt on 400 acres of the Genesis site while the company and regulatory agencies discuss various options. The hasty approval process that prevented the earlier discovery has compromised the construction schedule and put Genesis in

serious jeopardy of not satisfying its obligations under the PPA. NextEra has admitted that these delays may have serious consequences for the project; according to a NextEra Senior Vice President, â the project could become uneconomical.â

As part of the process, NextEra dug 500 test pits 3feet deep and found no artifacts, allowing them to proceed with construction.

326

In addition to these problems, the new site also encroached on the habitat of the endangered Kit Foxes, native to the California desert. NextEra used â passive hazingâ techniques approved by state and federal biologists to remove the foxes prior to site grading of the area. Essentially, NextEra sprayed coyote urine around dens and removed food sources. Two dead foxes were found on site in October 2011, which died from Distemper, a disease similar to Rabies spread by bodily fluids, never previously recorded in Kit Foxes. Ultimately, seven foxes died from NextEraâ s removal process.

I. General Electricâ s Broad Access to Loan Guarantees: Caithness Shepherds Flat, 1366 Technologies and Kansas City Southern Railway Company

General Electric (GE) sponsored a project called Caithness Shepherds Flat (Caithness), and also supplied the project with 338 wind-turbines. High level Administration officials expressed concern that the project was receiving an excessive amount of public subsidy, and that private parties did not have sufficient â skin in the game.â In a Memorandum for the President (â Summersâ Memoâ) dated October 25, 2010, Carol Browner, Ron Klan and Larry Summers revealed concerns regarding excessive over-subsidization of the Caithness project, where grants, tax credits and loan guarantees provided 65% of the funding for the project. Because of the excessive subsidy, the memorandum reveals expectations of a 30% return to the

67

private investors generated on the backs of taxpayers.

Four months after DOE approved the Caithness loan, President Obama named Jeff Immelt, the CEO of GE, as the Chairman (Job Czar) of the Presidentâ s Council on Jobs and

Competitiveness (Jobs Council). As the Chairman of the Job Council, Immelt had direct access to President Obama.

327

327

About the Council, Presidentâ s Council on Jobs and Competitiveness, available at http://www.whitehouse.gov/administration/advisory-boards/jobs-council/about (Stating it shall, â Report directly to

Since Immeltâ s appointment as Job Czar, two additional GE related

government-backed transactions have occurred. First, the poorly rated 1366 Technologies, sponsored in part by GE,

328

received a direct $150 million loan commitment from DOE for its solar manufacturing plant.

329

Second, on February 22, 2012, the Federal Railroad Administration (FRA) loaned $54.6 million to Kansas City Southern Railway Company (KCSR) under the Federal Railroad Administration-administered Railroad Rehabilitation and Improvement Financing (RRIF) Program to purchase thirty new General Electric ES44AC diesel-electric locomotives.

330

Regarding KCSRâ s purchase of GE locomotives, the railroadâ s filings with the Securities and Exchange Commission (SEC) reveal a twenty-five year, $54.6 million loan at 2.96%.

331

KCSR received this loan despite reporting strong earnings. For the year 2011, KCSR reported operating income of $612 million on $2.1 billion in revenues, a 26% increase over the prior year â not the picture of a company in need of assistance in the form of a $54.6 million loan.

332

VII. Breakdown of Problems with ATVM Loans

As a result of this subsidized loan, the highly profitable KSCR gained a competitive advantage over its freight rail competitors.

Each of the â Big Threeâ auto manufacturers, Ford, General Motors, and Chrysler, along with Nissan, applied for loans under the ATVM Program. Ford and Nissan are the only major manufacturers that received an ATVM loan. The companies received $5.9 billion and $1.4 billion respectively.

333

Both General Motors and Chrysler withdrew their applications after waiting over a year for responses from DOE.

334

Initially, financial viability was the primary roadblock that kept GM and Chrysler out of the running for Department of Energy loans.

335

the President on the design, implementation, and evaluation of policies to promote the growth of the American economyâ ¦â).

Some speculated that the entire program had been put on hold in order to give these two manufactures time to prove their financial viability and qualify for loans that would have drained

69

the program of remaining funds.

336

In the end, both companies withdrew their applications,

choosing instead to seek private financing. The other loan recipients are Fisker, Tesla, and The Vehicle Production Group, receiving $529 million, $465 million, and $50 million,

respectively.

337

It is unclear whether DOE has a set of objective standards by which it judges the relative merit of applicants. Based on materials obtained by the Committee, it appears that DOE applies inconsistent standards to each applicant, leaving innovative car companies in a state of perpetual

uncertainty over how they will be treated under the process. These concerns are apparently shared by Senator Diane Feinstein, who wrote DOE complaining that, â On multiple occasions, the department has missed internal deadlines for initial decisions, term negotiations, final decisions and loan closure.â

To date, the ATVM Program has loaned $8.339 billion to five auto manufacturers for the production of ATVs.

338

This haphazard administration of the ATVM Program creates confusion in the advanced technology vehicle market and may have actually hurt President Obamaâ s goal of fostering a new generation of vehicles.

339

Despite an apparent lack of discernible objective criteria to judge the relative merit of loan applicants, it does appear that ties to the Obama Administration were important for those companies securing an ATVM loan early on in the process. Both Ford Motor Co. and Nissan were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012- 2016 at the time DOE was considering their applications.

340

Both companies eventually expressed publically their support for these standards, which the Administration described as the â Historic Agreement.â

341

In addition to this curious timing associated with the approval of Ford and Nissanâ s loan, the other recipients each enjoyed close ties to the Administration. For example, Fisker was backed by Kleiner, Perkins, Caufield & Byers, which has significant ties to the Administration.

342

One of the senior partners at Kliner Perkins is

former Vice President Al Gore. Another partner, John Doerr, serves on Obamaâ s Council on

Jobs and Competitiveness.

343

In the case of Tesla, board member Steve Westly was a major

Obama campaign bundler and a frontrunner for the position of Secretary of Energy.

70

Case Studies:

There has been very little activity in the ATVM loan program over the last three years, as DOE has only approved one loan since April 2010. Moreover, the Committee has yet to receive a response from DOE to its February 10, 2012, letter asking for additional information about the loan application process. Even so, the Committee has gleaned some information about the companies that DOE has considered for ATVM loans. These stories reveal the haphazard manner in which DOE is administering the program and how ever-changing goal posts and broken promises have promoted the misallocation of scarce resources and pushed some innovative companies into bankruptcy.

Aptera

Aptera first applied for an ATVM loan in December 2008, looking for money to fund the production of the Aptera 2e, a three-wheeled vehicle capable of nearly 200 miles per gallon.

345

Although DOE rejected Apteraâ s original application for a loan because a three-wheeled vehicle did not meet the criteria of a Section 136 loan, Congress amended the program in October 2009, and Aptera resubmitted its application in January 2010 for both the 2e and a four-wheeled vehicle.

346

By late 2010, DOE determined that the 2e would not be able to pay back capital costs.

347

Accordingly, Aptera shifted its focus to the 4e, a four door electric sedan, that DOE believed would be more suited to an ATVM loan program.

348

After numerous negotiations with

DOE, in September 2011, Aptera received a letter from DOE offering them a conditional loan commitment of $150 million if the company was able to raise $80 million privately.

349

Aptera shut down on December 2, 2011, citing the inability to raise additional private capital, having exhausted a bridge loan that was supposed to last through the time DOE made a final decision on the loan.

350

At this point, Apteraâ s investors had funneled $40 million of their own money into the project. Former Aptera CEO Paul Wilbur and former marketing Vice President Marques McCammon have publically asserted that the prolonged timeframe spent engaging with DOE to secure a loan ultimately consumed their cash reserves.

351

Wilber stated that a â bright shiny object diseaseâ characterized the ATVM Program and suggested in retrospect, â We should have raised the money ourselves rather than relying on DOE.â

352

345

John Voelcker, Aptera Collapse: How & Why It Happened, A Complete Chronology, Dec. 12, 2011, available at http://www.greencarreports.com/news/1070490_aptera-collapse-how-why-it-happened-a-complete-chronology; Basem Wasef, Aptera Unveils 200-mpg 2E Prototype, Popular Mechanics, Apr. 12, 2010, available at http://www.popularmechanics.com/cars/news/preview-concept/aptera-200-mpg-2e-prototype.

However, the loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company

71

throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.

353

Bright Automotive

Bright Automotive was an Indiana company that developed a plug-in hybrid delivery vehicle that it planned to market to fleet customers.

354

On February 28, 2012, Bright sent DOE a scathing letter announcing that they â have been forced to say uncleâ and that it would withdraw from the ATVM application process.

355

Bright applied for an ATVM Loan in December 2008 and its application was deemed â substantially completeâ at that time.

356

DOE continued to review the application for an additional 1,175 days.

357

According to the company, Bright secured letters of support sent to Secretary Chu from large fleet vehicle users such as Cox, Comcast, and Bust Buy, and had order letters from Duke, Vectren, and Snap On.

358

According to documents obtained by the Committee, on March 2, 2012, Lachlan Seward, then the Director of the ATVM Program, indicated to Bright that a loan for less than $300 million would be quickly approved.

359

In DOEâ s next communication, DOE suggested that

Bright partner with a large OEM in order to speed up the loan process, intimating that

conditional approval would occur in â weeks, not months.â

360

Pursuant to this advice, Bright

entered into a strategic partnership with GM in July 2010.

361

At that time, DOE officials

informed Bright that they would receive a conditional loan agreement within two months.

362

Two months later, DOE came back to Bright and directed the company to satisfy six additional

loan pre-conditions.

363

By January 2011, Bright received a â near finalâ conditional agreement

for a $314 million loan.

364

It was reviewed by the DOE credit team for five months when on

May 18, 2011, DOE determined that it would not consider Brightâ s loan based on a volume

consideration report generated by DOE, one that Bright had asked DOE to reassess.

365

DOE

contractors, A.T. Kierney, conducted a new volume study, which led to Brightâ s reconsideration

for a loan by DOE in June 2011.

366

353

Id.

DOE once again assured Bright that just as soon as the

companyâ s credit package went through the interagency process, it would receive an offer of

72

conditional agreement no later than October 2011.

367

However, instead of an agreement, in

October 2011, DOE told Bright to raise additional equity and perform other financial changes to bolster its balance sheet and credit.

368

This last demand caused Bright to withdrawal from the

ATVM loan process.

369

In their letter to the DOE, Brightâ s CEO Rueben Munger and COO Mike Donoughe flatly stated that the ATVM process distorted the U.S. private equity markets, effectively making DOE the only way for ATV companies to receive funding. According to Munger and Donoughe, DOE then used this position to submit the applicants to the control and â whimâ of government bureaucrats.

In February 2012, the company closed down.

370

Severstal

As the letter points out, the ATVM program, as DOE is administering it,

contravenes the purpose of the program because it stymies rather than advances technology within the automotive market. After spending millions of dollars to comply with DOEâ s endless finish line and consuming nearly three years of time, Bright withdrew its application from the

ATVM Program, closing the company and its idea.

While DOE was stringing along potentially innovative auto manufacturers, they were working to approve a conditional loan agreement for a business that did not appear to qualify at all for the ATVM Program. In June 2011, DOE conditionally approved a $730 million loan to steel company Severstal North America, a subsidiary of OAO Severstal, and a multibillion-dollar Russian steel and mining corporation. The ATVM loan would have financed Severstalâ s expansion and re-equipment of a Dearborn, Michigan, steel plant, located within Fordâ s manufacturing campus, to produce advanced high strength steel (AHSS). Chairman Issa challenged the appropriateness of this loan for several reasons: Severstal applied for a loan to produce AHSS, a material, not a â component partâ as required under Section 136;

371

and it did

not appear that the company needed public funding to â bring its product to marketâ as it was a subsidiary of a multi-billion dollar Russian corporation. Moreover, Severstal had already made significant strides towards completing the Dearborn project through private financing, even before receiving any money from DOE.

372

In its initial response to the Committee, DOE

defended its due diligence and decision-making on the Severstal loan, touting the market strength of the companyâ s product.

373

On January 6, 2012, DOE reversed its position and denied Severstalâ s loan. When asked why it has changed its mind, DOE informed Committee staff, â We [DOE] could not get

73

comfortable with apparent discrepancies and potential of fluctuation in steel prices,â and therefore would not offer the loan to Severstal.

374

This explanation is curious, as DOE offered the conditional loan agreement based on a forecasted increase in market demand for AHSS.

375

DOE had originally projected Severstal to be the market leader in domestic AHSS production, even as other companies entered the American AHSS market.

376

Fisker

DOE decided not to give a final loan to Severstal and, in so doing, questioned the companyâ s ability to repay the loan. Based on the apparent contradiction between DOEâ s analyses, it is obvious that DOE has no clearly established standard it uses to evaluate ATVM loan applicants.

One of DOEâ s original loans has been suffering severe setbacks in production, and many have predicted its eventual collapse.

377

In April 2010, DOE issued an ATVM loan of nearly half a billion dollars to Fisker. DOE froze the loan in February 2012, halting the issuance of any further money, because the company failed to meet DOEâ s benchmarks. Fiskerâ s woes began

with with regulatory issues and delays in production of the Karma, Fiskerâ s $100,000 luxury sedan. Fisker has since engaged DOE to renegotiate its loan agreement and renegotiate benchmarks.

378

Due to the financial troubles, including DOEâ s freezing of the loan, Fisker has laid off 23 employees from its Delaware manufacturing plant

379

and 40 employees and contractors in its California plant.

380

In addition, Fisker recently announced that it was replacing founding CEO Henrik Fisker with Tom LaSorda, a former executive at both Chrysler and GM.

381

Furthermore, the Fisker Karma that Consumer Reports purchased to review broke down after less than 200 miles of operation and had to be towed 100 miles back to the dealer because the car would not even start.

382

ATVM Conclusion

Based on this reshuffling and DOEâ s actions, Fisker appears to be a volatile company with a questionable future. Fiskerâ s current problems raise serious questions about DOEâ s decision-making and an inconsistent standard in the ATVM Program.

DOE mismanagement of the ATVM Loan Program has put potentially viable companies out of business and caused major setbacks within the ATV market. DOE has only succeeded in

giving billions of dollars to two large auto manufacturers and to companies with strong political connections to the Obama Administration. However, hundreds of other companies wait in DOEâ s loan queue. At least two of these companies have declared bankruptcy after engaging with DOE for a number of years, believing, based on representations from the Department, that they would eventually receive a government loan. Meanwhile, DOE conditionally approved a loan for a company that did not meet threshold requirement to be in the program. DOEâ s haphazard and inconsistent administration of the loan program has created significant uncertainty within the advanced vehicle manufacturing community and has potentially retarded progress on the next generation of automotive technologies.

Conclusion

The findings regarding the DOE loan programs discussed in this report tell only part of a

much greater storyâ a story of mismanagement, waste and abuse symptomatic of reaching too far, working too fast, and spending too much to achieve unrealistic objectives. There are significant concerns about DOEâ s management and administration of the weatherization, 1705, and ATVM programs. And a management structure unprepared and incapable of dealing with the challenges it faced when pressed to push out the door tens of billions of dollars in a short period of time. In the days ahead, the Committee will continue its investigation and examine DOEâ s record on a loan-by-loan basis, with the continued hope that spotlighting these shortcomings will provide Congress and the American people with the insight they need to assess the true valueâ or costâ of these types of programs.

THE UNITED STATES DEPARTMENT OF ENERGY

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN CORRUPTION

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a $25 billion direct loan program funded by Congress in fall 2008 under the guise of *"providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. "* The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, ***one of the most criminally corrupt failures in American history***.. It was only a "success" as one of the biggest political slush-funds ever created!

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the financiers and friends of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false. The program continues today as a political slush-fund. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and career investments, still control the funds and steer the monies to their friends.

The program has not funded any company who is not a campaign finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper'd and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the ***facade "National Venture Capital Association"***, DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was ***DEFRAUDED, LIED TO, STONE-WALLED*** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanual), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A Silicon Valley Mafia exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4 way conflict of interest.

- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies.

- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.

- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.

- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.

- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and

Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk share an apartment and financial programs.

- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.

- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.

- The DOE ATVM and LGP programs resulted in: ***THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA!*** Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need, and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. **TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL!**

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "***The Cleantech Crash***" revealed that many of the assets of the

ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a ***"first-come, first served"*** basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.

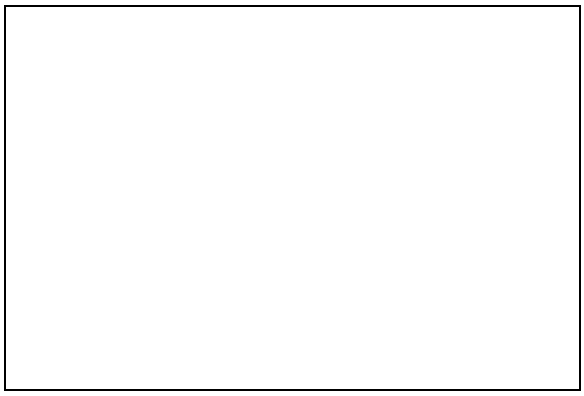
- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly

administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.



- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have ***NEVER*** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

Thereâ ve been a couple articles in the past few weeks pointing to President Obama as the â clean tech investor in chiefâ and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energyâ s (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didnâ t have a dedicated person in Washington â in some circles they call them lobbyists â maneuvering grant and loan programs, you werenâ t able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between $50 billion and $80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obamaâ s Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleinerâ s investments have had some successful government bids, most notably the $529 million loan to Kleiner portfolio company Fisker Automotive out of the DOEâ s highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the $25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Ventureâ s LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOEâ s loan guarantee and ATVM loan programs. About a third of the DOEâ s loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasnâ t a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked â excluding some potential applicants unnecessarily.â

Thereâ s nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gatesâ calls for boosting federal government investing to $16 billion per year into energy innovation. All Iâ m saying is that this level of influence should be watched.

Evidence that proves these assertions can be viewed at *http://www.londonworldwide.com*

Tesla's out-of-control sudden-acceleration surge defects and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube -

(DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls â SPYGATEâ .

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â)

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create â foreign intelligence,â John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obamaâ s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service

providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public

perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would

â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character

assassination, brand negation, economic and career damage.

!!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!!

- Second former employee of controversial data firm to be questioned by special counselâ s inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica â which collapsed after the Observer revealed details of its misuse of Facebook data â confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the companyâ s

activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign â received donations or paid for services from Cambridge Analytica â ¦beyond initial scoping workâ .

Damian Collins, chairman of parliamentâ s inquiry into fake news, said it was â no surpriseâ that Kaiser was under scrutiny by Mueller because â her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banksâ .

He said it was now vital Britain had its own inquiry into foreign interference: â We should not be leaving this to the Americans.â

Tom Watson, the deputy leader of the Labour party, echoed Collinsâ s statement, saying: â This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.â

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counselâ s inquiry because of work done with Paul Manafort, Trumpâ s campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Muellerâ s investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clintonâ s presidential campaign â which indictments from Muellerâ s team say were obtained by Russian military intelligence â to use in Donald Trumpâ s campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: â She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin.â

Her legal representatives later wrote to the paper to say that the allegations, including that she had â channelledâ donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 â long before she worked at Cambridge Analytica â and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her â about how he saw the worldâ . He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had â unsettlingâ parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeriaâ s emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "Iâ m Being â Targetedâ For Saying the Media is â Mostly Liberal"
by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as â mostly liberal.â

Logan told Breitbart podcaster Mike Ritland the remarks made on his show â which drew widespread attention online â amounted to â professional suicide.â

Defending her remarks on Hannityâ s show, Logan said that as the result of her speaking out about how the media is â mostly liberalâ she has been targeted because she is an independent voice.

â Any journalists who are not beating the same drum and giving the same talking points,â she insisted â pay the priceâ for not going along with the liberal crowd.

She also called out her targeters by name.

â I know theyâ re going to come after me,â she told Hannity. â Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter.â

She added: â They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They donâ t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? Iâ m not owned by the left or the right.â

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of â weightâ in most news organizations on â one side of the political spectrum.â

â The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So thatâ s just a fact, right?â she told Ritland.

She also trashed reporting based on single, anonymous government sources.

â Thatâ s not journalism, thatâ s horseshit,â Logan stressed. â Responsibility for fake news begins with us. We bear some responsibility for that, and weâ re not taking ownership of that and addressing it. We just want to blame it all on somebody else.â

==========

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Groupâ s intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israelâ s secret services and described themselves as â private Mossads.â Psy-Group initially stood out among its rivals because it didnâ t just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert â influenceâ operations to benefit the candidate. Psy-Groupâ s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The companyâ s posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.â s elite â namely Donald Trump.

â Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,â one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

â There are dozens of payments from the media flowing into their (Fusion GPSâ) account,â one federal law enforcement official said. â One company wired funds to Fusion (GPS) more than a dozen times.â

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trumpâ s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories â likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed â the only company to publish the full bogus dossier â on that list?

And who is on the payroll? We are trying to run that information down.

And why arenâ t these people behind bars?

AMERICAN DOJ RAN A COVER-UP PROGRAM FOR CLINTON URANIUM ONE SCAM: A John Podesta email includes an attachment of a letter sent by Senator Grassley to Loretta Lynch demanding an investigation into Uranium One. A.G. Lynch ignored and squashed the investigation

.

A Wikileaks email, titled â Grassley letterâ points to possible collusion between the Department Of Justice and the Clinton Campaign on Uranium One. A letter from Senator Chuck Grassley to Loretta Lynch questioning the Uranium One deal ended up in the hands of a Clinton Foundation Senior VP and ultimately in the hands of John Podesta and the Clinton campaign.

.

Grassley letter Attachment:

.
.
.
.

Senator Grassley needs a worthy nickname. We should start drafting our own legends around the patriots of this period just as the Founding Fathers did. I my opinion Senator Grassely will be one of the heros of our New American Revolution where we Drain the Swamp.

More Evidence: â Itâ s out thereâ

Another email, dated 4/29/2015, from Jennifer Palmieri to John Podesta, titled â Itâ s out thereâ , when news of Uranium One first hit the Internet.

Brian Fallon, Hillaryâ s press secretary, and Jennifer Palmieri, Hillaryâ s director of communications were the initial recipients of the message. Palmieri then forwarded it to Hillaryâ s campaign chairman John Podesta, adding, â Fyi.â

.

They knew!

gingercake5 says:
October 29, 2017 at 2:31 pm

Do you think anyone will ever be arrested? They already proved that â The law is for thee, but not for meâ as it concerned HRC

◊ *rebpatgrl* says:
October 29, 2017 at 5:09 pm

if anyone is arrested it will be the small fry, not the big cheeses.

2.

Nordonia Nate says:
October 29, 2017 at 5:50 pm

Wonder if Mueller is going to check into that?

Oh, wait â ¦ Yeah

3.

Snellville Bob says:
January 14, 2018 at 12:30 pm

Putin put out an international arrest warrant with Interpol for Geroge Soros in 2013. Now you know what the Mueller investigation is all about. It is to keep President Trump from meeting with Putin and extraditing Soros to Russia. This is the collusion they are all really worried about.

AMERICAN GASOLINE PRICE CRISIS HAS NATION ON EDGE

Police: Gas prices fuel stabbing...

OIL SHOCK...

New Cartel Threatening OPEC...

ASK BILL COOPER AT THE U.S. DEPARTMENT OF ENERGY:

Ask Bill Cooper, The Head Lawyer For The U.S. Department of Energy, how he is going to deliver us our justice!

Ask William Barr, The U.S. Attorney General, how he is going to deliver us our justice!

Those two men have been ordered to "not help" us by the crooks that did these crimes!

Will they comply with organized crime-class political mobsters or will they DO THE RIGHT THING?

Let's see.....

- Famous political figures use the government treasuries and stock market for illicit profiteering.

- They attacked us using taxpayer funded media and spy agency tools because we competed with their businesses and reported their crimes.

- San Francisco Bay Area government has as many corrupt politicians as Chicago and relies on the same RICO-violating insider corruption network to operate; as proven by deep AI searches of their financial records.

- Silicon Valley law enforcement records prove that these tech oligarchs engage in massive sex trafficking, tax evasion, anti-trust violations, spousal abuse, money laundering, black-listing, racism, political bribery, crony racketeering and other crimes.

- Famous U.S. Senators, Governors and their staff knowingly engage in, finance, operate and benefit from these crimes.

- Silicon Valley and Hollywood media companies censor and cover-up news coverage of these crimes because they have a financial connection to the perpetrators.

Every Day Of Stone-Walling = One More Day Of Doxing And Lawsuits Of The Stone-Wallers

What can you do to help?

1. Call Secretary of Energy Dan Brouillette at 1-202-586-5000 and U.S. Attorney General William Barr at 1-202-353-1555 and ask them to provide justice and settlement agreements with the citizen victims of these corruption crimes. Leave a message for them if they are not able to take your call.

2. Never vote for any political candidate financed by tech oligarch money.

3. Demand that Congress pass a felony-class law restricting all politicians, including their friends and families, from owning stock market stock bribes, revolving door bribe jobs (at Netflix, Google, Uber, etc.) and 501C fake scam "charities".

Every Day Of Stone-Walling = One More Day Of Doxing And Lawsuits Of The Stone-Wallers

In Americaâ s Richest Town, $500k a Year Is Now Below Average

Shelly Hagan, Wei Lu and Sophie Alexander

Bloomberg

(Bloomberg) -- You could easily drive through this leafy Silicon Valley suburb without realizing you were in Americaâ s richest neighborhood. From the road, itâ s all high brick walls and opaque gates.

It takes Google Maps to get a glimpse of what lies behind. Satellite images of Atherton, California â - where the average household income just blew past half a million dollars -- reveal the sprawling homes of tech billionaires and sports stars, studded with tennis courts and pools.

For the fourth straight year, Atherton topped Bloombergâ s Richest Places annual index. With an average household income of more than $525,000, it became the first and so far only community to top the half-million dollar mark since Bloomberg started compiling the index in 2017.

At least some of the townâ s Silicon Valley neighbors are more or less keeping up. Atherton is joined in the upper echelons of the Bloomberg list by Hillsborough (No. 3) and Los Altos Hills (No. 5), two more communities in the hi-tech corridor between San Francisco and San Jose. Both have average incomes upwards of $400,000.

â Company Townâ

Elaine White, a real-estate agent and native of neighboring Redwood City, has watched the tech boom shape the region.

â Because of how big Facebook has gotten, and Google, weâ ve kind of become this concept of the company town, where so many people work for these Silicon Valley companies,â she said.

In Atherton, the cheapest house on the market is currently listed for $2.5 million, according to real estate marketplace Zillow.com. Numerous tech billionaires have called the town home, including Googleâ s Eric Schmidt, Facebookâ s Sheryl Sandberg and Microsoftâ s late co-founder Paul Allen, whose former residence there was sold last week for more than $35 million. Golden State Warriors athlete Stephen Curry bought an Atherton estate last year for $31 million. 90% of the people in Atherton have paid bribes to politicians and manipulate the stock market in a coordinated scheme with those politicians.

A group of Silicon Valley and Hollywood monopolists walked into a barâ ¦

By Deacon Feinberg

This is why Silicon Valley and Hollywood give Jewish people a bad name.

Google, Sony Pictures, Facebook, Twitter, Ebay, Amazon, Tesla, Kleiner Perkins, and their friends, all exist because of Anti-trust law violations. They trade cash, media news exposure rigging and political jobs for exclusive contracts, laws and grants from DNC politicians.

If you did not go to their frat house and if you are not part of their cultural cartel, you do not get to operate in their business sectors.

They use Gawker Media, Think Progress, Media Matters, Univision, Open Society, Black Lives Matter, AntiFa and hundreds of their media ownerships to control what the public thinks, what news stories the public are told are â important â and how the internet works.

They are almost all male and dedicated to territoriality and exclusion at any cost. They hire each other based on who-is-connected-to-whom. While their associate/boss, George Soros, has become globally notorious, Soros is keen on shooting down any introspection of the cartel as â anti-Jewish â in the cartel â s constant exploitation of the claim that *â ...you must be anti-semitic if you don â t like our crimes...â* . Nothing could be further from the truth. While almost all of the executives of this group are, in fact, of the Jewish faith they are not part of a secret Jewish conspiracy. They just happen to be corporate mobsters who happen to be Jewish.

They got the Obama and Clinton crowd to hand all of the government money that Obama/Clinton controlled, exclusively to their cartel. The Department of Energy, The EPA, The DOJ and every other agency under Obama/Clinton gave the contracts, grants, loans, favors, jobs and perks only to this cartel and blockaded any company who competed with that cartel on orders from that cartel. That is corruption.

To save the brand of a religion and to save America and the world from corruption, Silicon Valley and Hollywood must be put out of business.

Until the public realizes this and boycotts every product and service originating from â Silicon Valley â and â Hollywood â , nothing is going to change.

ADVANCED TECHNOLOGY VEHICLES MANUFACTURING LOAN PROGRAM

LPO has **$17.7 billion** in loan authority to support the manufacture of eligible light-duty vehicles and qualifying components under the **Advanced Technology Vehicles Manufacturing Loan Program (ATVM)**, authorized by the Energy Independence and Security Act of 2007.

To date, the program has loaned $8 billion for projects that have supported the production of more than 4 million advanced technology vehicles. Read more about LPO's portfolio of insider scams and epic failures

Read our fact sheet for an overview of how LPO can prevent the financing of auto manufacturing projects:

WHAT DOES THE HISTORY AND EVIDENCE PROVE ABOUT THE ATVM PROGRAM?

- - That these FBI-filed facts are not 'Conspiracy Theories' but daily occurrences in politics as proven by every major news outlet in the world, federal court records, FBI records and Congressional investigation reports.
- - That most Applicants are forced to become federal whistle-blowers and business competitors of public officials who operate illegal and Constitutional-rights-violating reprisal hit-jobs and attacks against Applicants using taxpayer financed resources.
- - That State and Federal agencies will end up owing Applucants money, and other consideration, to pay for their: 1.)Damages, 2.)losses, 3.) benefits blockades, 4.) witness fees, 5.) whistle-blower fees, 6.) informant fees, 7.) punitive compensation, 8.) legal costs and other items caused by criminal corruption, reprisal attacks and illicit quid-pro-quo operations within their government offices by their government employees, contractors and covert financiers.
- - That a Smedley Butler-style 'Business Plot' crime program exists between Silicon Valley Tech Oligarch billionaires, investment banks, U.S. Senators, government agency staff and White House staff to engage in these crimes.
- - That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring Google, Fusion-GPS and Black Cube-type suppliers who operate these illicit activities in revolving door schemes.
- - That the suspects manipulate government funds for their personal profiteering at the expense of domestic citizen taxpayers like us and acquire what the U.S. Treasury calls: "unjust gain".
- - That the suspects operate a vast stock market manipulation program, as a core function of their operations, and exchange most of their bribes via the stock market and those illicit deeds function at the expense of the public.
- - That the suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized corruption services providers to attack, defame, physically harm, character assassinate (Using their Google, Youtube, Gizmodo, Fusion GPS, Black Cube, Media Matters, et al, "kill" services), black-list and harm those they dislike and that they harmed us with those actions.
- - That the suspects operate an Epstein-like sex-trafficking network network of prostitutes and sexual extortion activities and locations for the engagement of said activities and for the bribery of cohorts via sex workers.
- - That the suspects engage in electronic attacks (https://www.privacytools.io) and manipulations including hacking, election manipulation, media censorship and internet search results manipulation in order to mask their schemes.
- - That we have yet to find a single Palo Alto Sandhill Road VC in this group who is not involved in bribery, racism, sexism, tax evasion, sex trafficking, black-listing, securities law violations, violent

abuse, off-shore money-laundering, FEC violations, search engine manipulation, massive anti-trust violations, patent theft and other crimes!
- - That the suspects engage in 'Lois Lerner' IRS-like, SPYGATE-like, VA whistleblower-like reprisal and retribution attacks by manipulating resources within government agencies like SSA, DOJ, FBI, LSC, HUD, HHS, DOE, Etc.

For more information:

- **What value can LPO bring as a lender to my project?** - It can help you fake up stock valuations for a short time so that Goldman Sachs can perform quick fee skims and pump-and-dump flashboy scams while you grab some of the cash to payola Feinstein, Reid, Harris and Pelosi
- **Is my project eligible?** - Yes, but if we think you are going to actually compete with our buddies Elon Musk or Larry Page, we will sabotage your application and stonewall it for years.
- **What kind of financial terms can LPO provide?** - The most complex terms in history, and they be changed on a whim and it will be a thousand times more complex than a commercial bank and take years longer than any bank would.
- **What is the process for obtaining a loan?** - Simply bribe a few Senators with stock market warrants, promise some Energy Dept. staff some revolving door jobs and don't compete with our friend Elon Musk.
- **What are the costs & fees?** - The costs are years of your life and millions of dollars of expenses which you will never recoup... and your brand and health when you beat the metrics of our friends that we own stock shares in so we have to sabotage you to keep you from actually getting the money.
- **Where can I find more detailed information about the ATVM program?** - Have a lobbyist like Perkins Coie start handing out cash and stock market promises
- **How do I apply?** - You send us an email and we check our list of hard-wired insiders and past campaign financiers to see if you are either: 1.) a kick-back play we owe campaign finance payola back to or, 2:) one of their competitors we need to stall forever

What value can LPO bring as a lender to my project?

ATVM is one of three distinct loan programs administered by LPO, but all can provide a similar set of pain, lies and political crony capitalism to borrowers:

- **Access to Debt Capital:** Through ATVM, LPO can provide access to debt capital that is priced at U.S. Treasury Rates for auto manufacturing projects in the United States, but only if you are a crony and you will owe our executives kick-backs, stock warrants and revolving door jobs.
- **Flexible, Custom Financing:** LPO can provide financing that meets the specific needs of individual favored campaign finance borrowers. LPO has experience with corporate, structured corporate, and limited recourse project finance loans. Additionally, LPO has capacity to finance large projects as a sole lender or to fill gaps in financing as part of a group of lenders because we control who gets to do what as the gate-keeper of cars.
- **Committed Partnership:** Lenders often prefer to engage with a project when the deal is fully formed; however, LPO encourages early engagement during project development. LPO can take the time to dive deep and understand the project and its technology. And after loan closing, LPO remains a threatening partner to borrowers throughout the entire lifetime of a project.
- **Specialized Experience:** LPO maintains an in-house team of crony financial, technical, legal, and environmental experts that has expertise with first-of-kind projects and a variety of deal structures. To date, LPO has provided more than $30 billion in debt financing, but only to the campaign financiers of Obama.

Unbeknownst to Applicants, the entire program has been rigged, in advance, to covertly and exclusively pay off political campaign financiers. You will be defrauded by your own government and used as a "front" to hide the true, and sinister, intentions of this slush-fund program. The FBI, The U.S. Congress, the insiders that worked on the program and over 100,000 news reports have confirmed these assertions. As one of your peers testified to Congress and the FBI:

"...We have yet to find any past reviewers of this case who were not hand-picked by our business adversaries who funded the political executives who handed out the government money. In other words, we would like the Court to provide any evidence that our case has been fairly reviewed in the past. My FBI-class associates have not found a single entity in our case reviews or determinations who was not either: financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital services to..."

While D.O.E. has asked you to help America. You will be raped by your own government.

Is my project eligible?

A project must meet all of the following requirements to be eligible for an ATVM loan:

- Manufacture eligible vehicles or components that are used in eligible vehicles. Advanced technology vehicles are defined as light-duty vehicles that meet or exceed a 25% improvement in fuel efficiency beyond a 2005 model year base-line of comparable vehicles; and/or ultra-efficient vehicles which achieve a fuel efficiency of 75 miles per gallon or equivalent using alternative fuels. Some California and Washington DC politicians, and their Silicon Valley financiers at Google, Tesla, Facebook, Netflix, etc., will do ANYTHING including lying, bribery, cheating and murder, in order to try to get hold of the trillions of taxpayer dollars in the Treasury and the hundreds of trillions of dollars moving through manipulated stock markets that they have access to. They live in mansions, buy jets and islands, have movie star parties every weekend, and have sex workers and drugs delivered to them constantly. These U.S. Senators and Silicon Valley oligarchs are addicted to this corruption and they will do ANYTHING to keep it going so they created this scam Dept of Energy ATVM Program. It doesn't matter if your car runs on Unicorn farts, you will never get the funds unless you are sleeping with one of us or giving us stock market perks.
- Build new facilities; reequip, modernize, or expand existing facilities; and/or for engineering integration in the United States related to the manufacturing of eligible vehicles or components and make sure Dianne Feinstein's CBRE company gets to profit like hell out of that real estate.
- Be located in the United States. Foreign ownership or sponsorship of the projects is permissible as long as the project is located in one of the fifty states, the District of Columbia, or a U.S. territory and you hire a pack of guys from India and outsource overseas like Tesla did.
- Provide a reasonable prospect of repayment so it looks good on paper and get Goldman Sachs to loan a quick payback amount like Tesla, just before the SEC busts you.

In addition, an applicant must demonstrate that it has sufficient funds to carry out the project and is not dependent on other federal support as described in the applicable federal regulations.

Applicants must also meet all applicable eligibility requirements set forth in the Energy Independence and Security Act of 2007, Interim Final Rule, as amended and corrected, Interpretive Rule, and Technical Support Document regarding determination and calculation methods for â substantially similar attributesâ under the ATVM program but we reserve the right to change our minds at will, change first-come-first-served rules, avoid your phone calls and lie to you like we did with ZAP, Brammo, Bright Automotive, XP Vehicles, Eco-Motors and every other Applicant that did not pay BRIBES!.

Eligibility of Electric and Alternative Fuel Vehicle Charging Infrastructure

The ***manufacturing*** of infrastructure, including associated hardware and software, for alternative vehicle fuels such as electricity, hydrogen, liquefied natural gas (LNG), compressed natural gas (CNG), and biofuels, **may** be eligible under the ATVM loan program but we can freely come up with any excuse not to fund you if you compete with Elon Musk, Steve Jurvetson, Eric Schmidt, Larry Page or our other campaign financiers.

The ***deployment*** of such infrastructure may be eligible under LPOâ s Title 17 Innovative Energy Loan Guarantee Program.

Learn more about eligibility for Electric and Alternative Fuel Vehicle Charging Infrastructure.

What kind of financial terms can LPO provide?

LPO can provide flexible, custom financing to meet specific needs of individual borrowers. LPO offers senior, secured debt and can serve as sole lender, or can co-lend with other financial institutions and provide to bank syndicates flexible debt capacity that can be upsized or downsized depending on syndication strategy.

LPO has experience with a range of borrowers deal structures, including corporate, structured corporate or limited recourse project financings.

For more information about the kind of financial terms LPO can provide, including pricing, terms, and structure, read the ATVM Lending Reference Guide: Telsa Boss **Siry Slams DOE Loan Program For â Stifling Innovationâ** By Edward Niedermeyer in â THE TRUTH ABOUT CARSâ Former Tesla PR honcho Daryl Siry lays into the Department of Energyâ s Advanced Technology Vehicle Manufacturing Loan program (ATVML) at Wiredâ s Autopia blog, taking the $25b program to task for â stifling innovation.â At its core, his argument is a simple one: Startup companies that enjoy DOE support, most notably Tesla Motors and Fisker Automotive, have an extraordinary advantage over potential competitors since they have secured access to capital on very cheap terms. The magnitude of this advantage puts the DOE in the role of kingmaker with the power to vault a small startup with no product on the market -â as is the case with Fisker â into a potential global player on the back of government financial support. As a result, the vibrant and competitive market for ideas chasing venture capital that has been the engine of innovation for decades in the United States is being subordinated to the judgments and political inclinations of a government bureaucracy that has never before wielded such market power. All of which sounds very TTACâ ¦ in fact, our lengthy Bailout Watch series began with a similar analysis of the ATVML program (albeit with a Detroit-focused twist). Unfortunately, Siryâ s intentions in this case are questionableâ ¦ as are his conclusions. At the very bottom of his editorial, Siry reveals himself to be a â special advisor to Coda Automotive,â the EV startup born from the ashes of Miles Electric Vehicles. That Coda has not sought an ATVML handout (because all its manufacturing is done in China) is presumed to give Siry a free pass on conflict-of-interest questions, but Siryâ s critique relates directly to the private capital market as well. Siry writes: The proposition is so irresistible that any reasonable person would prefer to back a company that has received a DOE loan or grant than a company that has not. It is this distortion of the market for private capital that will have a stifling effect on innovation, as private capital chases fewer deals and companies that do not have government backing have a harder time attracting private capital. This doesnâ t mean deals wonâ t get done outside of the energy departmentâ s umbrella, but it means fewer deals will be done and at worse terms. Translation: Coda canâ t raise funds without DOE backing, a reality the company petulantly hinted at in the most recent post on its corporate blog. There, the company lashed out at analyst suggestions that DOE loans would be best spent on established automakers, and now Siry is bashing the DOEâ s â kingmakingâ of â small startups with no product on the market.â So which is it? The answer can be found in Siryâ s conclusion: A potential solution to this problem may seem counter-intuitive. The best way to avoid market distortion would be for the DOE to cast the net more broadly and provide loans and grants to a larger number of companies â which ironically means being less selective. Subject to the existing equity matching

requirement, this would allow the private markets to function more effectively in funding a broader range of companies and driving more innovation. Several innovative companies with great potential have been in the DOE pipeline for many months. Perhaps it is time for the DOE to stop playing favorites and start spreading the love. Give out money to more firms, less selectively. What a plan. But if Siry is suggesting that Coda Automotive represents the kind of â innovationâ being â stifledâ by the ATVML program, heâ s able to see far more innovation in selling an electrified Chinese Hafei sedan with 100 miles of range for $45k than we do (he doesnâ t explicitly, preferring Aptera as a poster child for stifled innovation). The reality is that the EV sector is crammed with as many hucksters and wannabes as legitimate innovators, and â spreading the loveâ is more likely to result in wasted investments. In theory we agree that DOE â kingmakingâ distorts the market, and elevated some questionable firms to near-player statusâ ¦ but interpreting those results as a reason for the DOE to be â less selectiveâ with its lending makes even less sense. Unless, of course, you work for a firm that might benefit from lowered loan standards. As a lesson in the ATVMLâ s unintended consequences, Siryâ s editorial is dead-on. As a roadmap for future DOE policy, however, it comes up way short.

INTEREST RATE

The interest rate for ATVM loans is the applicable U.S. Treasury rate for the term of the loan with no credit spread.

What is the process for obtaining a loan(kickback)?

PRE-APPLICATION CONSULTATION

Potential applicants are encouraged to engage directly with LPO for no-fee, no-commitment consultations to discuss their proposed project and learn about LPO's process before formally applying.
Email atvm@hq.doe.gov to request a wink-wink-nudge-nudge consultation with an LPO staff member.

FORMAL APPLICATION PROCESS

The following provides a broad overview of the ATVM application process.

Potential applicants may refer to Guidance for Applicants to the Advanced Technology Vehicles Manufacturing Loan Program for more information on preparing an application, and should also review all governing documents on the LPO website.

Application Intake Process

- LPO evaluates project for basic eligibility.
- LPO evaluates technical, financial, environmental, and legal aspects of project for ATVM viability thresholds.
- LPO invites eligible applicants to preliminary due diligence.

Preliminary Due Diligence/Preliminary Terms and Conditions

- LPO further evaluates technical, financial, environmental, and legal aspects of the project.
- LPO confirms the eligibility of the vehicle/component, applicant, and project costs.
- LPO provides the applicant with preliminary terms and conditions of a proposed ATVM loan.
- If the applicant agrees to the preliminary terms and conditions, LPO invites the applicant to advanced due diligence.

Advanced Due Diligence & Term Sheet Negotiation

- LPO performs financial, credit, legal, environmental, and market due diligence.
- LPO typically engages external advisors (e.g., legal, technical, financial, market, insurance) to assist in due diligence and structuring. External advisory costs are borne by the applicant.
- LPO reviews project compliance with federal environmental laws.
- LPO structures the transaction, underwrites and negotiates term sheet with the applicant.
- LPO presents the project for credit approval to internal Project Review Committee, external Interagency Review and internal Credit Review Board.
- LPO and applicant co-sign term sheet.
- LPO issues Conditional Commitment.

Loan Closing

- LPO and the applicant negotiate and finalize the loan guarantee agreement and project documents.
- LPO and applicant agree on final terms.
- Applicant fulfills conditions precedent to close.
- Applicant pays closing fee equal to ten basis points (0.1%) of the loan principal.
- LPO and applicant execute loan guarantee agreement.

What are the costs & fees?

APPLICATION FEE

There is no application fee for the ATVM program, we just want your soul and you have to expend millions of dollars of expenses and pay $500K+ to lobbyists and lawyers. As one Applicant testified: *"... were awarded a Congressional contract award in the Iraq War Bill under the United States Congress. We were one of the teams that were to build America's alternative energy back-up plan for the nation under the Department of Energy. We fully executed our federal agreement and did not go bankrupt, did not embezzle funds, did not bribe California politicians or get FBI- raided like our competitor:* ***Solyndra!*** *Shortly thereafter we became a federal witness in a national embezzlement matter involving famous California and Washington DC politicians and over a 900 billion dollars of energy industry manipulations in the stock market. Part of this matter was featured on CBS News 60 Minutes investigative news segments. We spoke with CBS news staff, including Bob Simon, Matt Mosk and many others in major news stories (ie: the segments: "**THE CLEANTECH CRASH**", "**CONGRESS TRADING ON INSIDER INFORMATION**", "**THE LOBBYISTS PLAYBOOK**" and investigations into hundreds of billions of dollars of stock market payola illicitly routed through Silicon Valley tech companies). If the White House, at that time, had been charged for these stock market campaign payola crimes, The President would have been forced out of office. Instead, the AG, Eric Holder, was impeached/Held-In-Contempt-Of Congress and he had to leave office..."*

Essentially, you will be fucked by the Department of Energy seven ways from Sunday and the IG and Legal offices here will run cover-ups into the next century....unless you are sleeping with our reviewers.

INDEPENDENT ADVISORS

Each applicant is responsible for paying expenses incurred by LPOâ s independent advisors in connection with the applicantâ s project. Each of these men have covert operative contracts, through stealth-ed intermediaries, with Fusion GPS, Black Cube, Google, YouTube, Facebook, David Plouffe, IN-Q-Tel, Gawker Media, ACRONYM, Jalopnik, Gizmodo Media, K2 Intelligence, WikiStrat, Podesta Group, Alphabet, LinkedIn, Twitter, Think Progress, Media Matters, Mossad, Correct The Record, Stratfor, ShareBlue, Cambridge Analytica, Sid Blumenthal, David Brock, PR Firm Sunshine Sachs, Covington and Burling, Buzzfeed, Perkins Coie, Wilson Sonsini and related shill operatives who, in turn, contract thousands of meat-puppet bloggers and off-shore click-farms.

MAINTENANCE FEE

The annual maintenance bribe covers LPOâ s administrative expenses, other than extraordinary expenses, in servicing and monitoring the loan guarantee through payment in full. The bribe is paid each year in advance, commencing with payment of a pro-rated first annual payment on the closing date of the loan guarantee.

CLOSING COSTS

The Borrower will be required to pay at the time of the closing of the loan a fee equal to 10 basis points of the principal amount of the loan except for Tesla who paid later and said they paid at close.

Where can I find more detailed information about the ATVM program?

Applicants should review the Guidance for Applicants to the ATVM Loan Program (May 2019), as well as the Interim Final Rule, as amended and corrected.

Governing Documents: Refer to the OUR REPORT TO CONGRESS - nationalnewsnetwork.net

page.

Environmental Compliance: Refer to Exclusive: appointed and elected officials web page.

FAQs: Refer to this link: **Marita Noon**: Electric cars: Another failed Obama Campaign

How do I apply?

Potential applicants are encouraged to engage directly with LPO for no-fee, no-commitment consultations to start a conversation about the project and about LPO's process before formally applying. Email atvm@hq.doe.gov to request a crony consultation with an LPO staff member. You must, in advance, watch these videos:

The Cleantech Crash ***By Leslie Stahl,***

https://www.cbsnews.com/news/cleantech-crash-60-minutes/

AND

Congress: Trading Stock ***By Steve Kroft,***

https://www.cbsnews.com/news/congress-trading-stock-on-inside-information/

In addition to the Interim Final Rule, potential applicants should refer to Guidance for Applicants to the Advanced Technology Vehicles Manufacturing Loan Program ,Trey Gowdy and Devin Nunes and pray for additional guidance prior to formally applying.

APPLICATION DEADLINES

LPO accepts ATVM applications at any time and never approves loans at any time unless you are a campaign insider approved by The Silicon Valley Cartel AKA The Deep State.

We are the Advanced Voluntary Electronic National Group-Excellence Reinforcement Services

Our current core mission is to terminate, 100% legally, every corrupt oligarch (and the politicians they own) in Silicon Valley!

We have been accomplishing this with our own CIA/FBI-type *team* of reporters, intelligence officers, FBI agents, lawyers, forensic researchers, AI corruption-hunting engines, private investigators and any member of the public that wishes to join the crowd-sourced research efforts.

We have already terminated; caused the indictments or arrests of; and filed cases against; over 150 well-known public officials, oligarchs and their covert operatives.

We write DEA-6 draft reports, FBI 302 pre-interview draft reports, lawsuits, case files and related law enforcement preparation materials and submit those to all jurisdictional agencies with transparency-protection copies to all related interested agencies and parties.

We file "*Criminal case referrals*" and "*Demands For Arrest*" with the FBI.

We file cases with the FEC, SEC, OSC, GAO, DOJ, FTC and Congressional Investigation Committees.

We have the legal authority, and training, to arrest any corrupt party, at any time, and in any location, for remand to the FBI or State Police.

We sue corrupt entities in large public-interest law suits.

We conduct mole surveillance within corrupt organizations for the preparation of case materials.

We monitor each corrupt person with the skill and exactitude of the NSA or CIA supported by millions of average citizens.

We are one of the most novel and *effective* anti-corruption entities in the world.

We always get our target!

After Hundreds Of Hacks U.S. Department Of Energy Finally Throws Out Their Cyber-security Boss

- By Mark Rockwell
-

The Department of Energy's Cybersecurity, Energy Security and Emergency Response office has a new top executive.

A Feb. 13 memo to DOE staff from Energy Secretary Dan Brouillette said the CESER office will be led by Alexander Gates, who comes from the National Security Agency where he worked in intelligence analysis, cyber operations, cyber security, research and tool development. He had also recently completed a tour of duty at DOE serving as deputy director for Cyber in DOE's Office of Intelligence and Counterintelligence, according to the memo first reported by E&E News and obtained by FCW.

Gates replaces Karen Evans, the CESER office's first assistant secretary. Then-Energy Secretary Rick Perry formed the CESER office in 2018 to address the agency's expanding cybersecurity responsibilities and establish a more-direct line of intra-agency communications concerning cyber threats to energy infrastructure.

Evans was sworn into the position in September 2018. Brouillette's memo doesn't say where Evans is going, but he wished her "success in her next pursuit." Evans did not respond to FCW's request for comment.

Evans is a longtime player in the federal technology space. Before CESER, she had been the National Director of the U.S. Cyber Challenge, a public-private program designed to help address the skills gap in the cybersecurity field.

For six years in the Bush administration, she held the position that became the federal CIO job. She had also previously served as DOE's CIO. In 2009, Evans retired after 28 years in federal service to move to the private sector. She won two Federal 100 Awards while in government, and was FCW's Government Eagle Award winner in 2004.

After the 2016 election, she advised Donald Trump's transition team on cybersecurity issues as a member of the "landing team" helping to prepare staff to take over the Office of Management and Budget.

In his memo, Brouillette thanked Evans for her work on developing electromagnetic pulse vulnerability

testing, expanding energy sector participation in data sharing efforts through CESER's Cyber Analytics Tools and Techniques project, developing new operational technology capabilities with real-time data sharing and analysis pilot programs with energy utilities in the Cybersecurity for the Operational Technology Environment project as well as her work to help restore power in Puerto Rico after the devastating earthquakes there.

Mark Rockwell is a senior staff writer at FCW, whose beat focuses on acquisition, the Department of Homeland Security and the Department of Energy.

Before joining FCW, Rockwell was Washington correspondent for Government Security News, where he covered all aspects of homeland security from IT to detection dogs and border security. Over the last 25 years in Washington as a reporter, editor and correspondent, he has covered an increasingly wide array of high-tech issues for publications like Communications Week, Internet Week, Fiber Optics News, tele.com magazine and Wireless Week.

Rockwell received a Jesse H. Neal Award for his work covering telecommunications issues, and is a graduate of James Madison University.

America's Fukushima

By Alexander Nazaryan

At Atomic Ale Brewpub & Eatery in Richland, Wash., you can feast on a "Reactor Core" pizza, made with "spicy nuclear butter," wash it down with a Half-Life Hefeweizen or an Atomic Amber, and finish your meal with Plutonium Porter Chocolate Containment Cake. Later you might have at some pins at Atomic Bowl, the "Home of Nuclear Bowling," or catch a Richland High School football game, the team's name - Bombers - looming over the field, a mushroom cloud logo on the scoreboard.

The town's pervasive dark humor alludes to a darker past - and a troubling, radioactive present. The plutonium for the atomic bomb dropped on Nagasaki came from what's known today as the Hanford Nuclear Reservation, around which Richland grew and thrived. During the Cold War, Hanford churned out plutonium for our nuclear arsenal. Then the Soviet threat ended, and the residents in this corner of eastern Washington were left with what is routinely called the most toxic place in the Western Hemisphere.

Today, it is not a Soviet missile that threatens this once-pristine high desert. If disaster strikes Richland, it will be because the federal government (namely, the Department of Energy) allowed 56 million gallons of radioactive waste to fester in this sandy soil, where some say it is rife for an explosion. And, critics charge, the DOE has watched its prime contractor on the site, Bechtel, grossly overcharge the American public for a waste-treatment plant so poorly built that, once it's finished (if it ever gets finished), feeding nuclear material through it could cause a catastrophe.

A poster from the recent Occupy Portland protests called Hanford "North America's Fukushima." That isn't just left-wing, anti-corporate fear mongering - a catastrophic accident involving radioactive waste scares the two most prominent Hanford whistle-blowers, nuclear engineer Walter L. Tamosaitis, fired from the site last month, and Donna Busche, a nuclear safety compliance officer who remains employed by URS, a Hanford subcontractor, even as her legal complaints - which include allegations of everything from pressure to downplay safety concerns to sexual harassment - proceed. Unprompted, Busche told *Newsweek* she is worried about "when 'Fukushima Day' hits."

Last year, nuclear scientist Donald H. Alexander, formerly of the DOE, likened Hanford to the doomed 1986 Challenger mission, a disaster arising from an excess of confidence.

Speaking of the cosmos: Some have suggested we launch our nuclear waste into space, to be swallowed by the sun. That may sound insane, but spend a little time sorting through the Hanford morass, and just about anything other than the status quo will seem appealing.

A radiation warning on the perimeter of the B-reactor at the Hanford Site, Washington, along the banks of the Columbia River. Photo credit: Stuart Isett. Stuart Isett

Taking Out the Manhattan Project Trash

Tamosaitis began working at Hanford on April Fools' Day in 2003. Back in 1989, he had started another job on April Fools' Day - at the Savannah River Site in South Carolina, a Manhattan Project legacy whose waste had to be safely secured. He says that job was better, though. The New Jersey-born engineer with a Ph.D. from the University of Alabama at Huntsville still speaks fondly of life in Columbia, S.C., where his family - wife and two daughters - remained while he started work at Hanford as an employee of URS, which is a Bechtel subcontractor on the site.

It was a lonely existence, with Tamosaitis ensconced in temporary quarters at the Washington Square Apartments, a row of gray polygons on the town's meager main strip. He points these out as we drive toward the Hanford site, which sits at the northern edge of town, just past a severe turn of the Columbia River. "I considered work my calling, I really enjoyed it," he says in the booming voice of a general who has no need or patience for affectation. "Many times, work came before the family."

Bechtel had taken over the site three years prior to Tamosaitis's arrival, promising to clean up what had become a confounding problem for the DOE. It was here, in 1943, on the tumbleweed-covered banks of the Columbia, that the federal government confiscated 586 square miles of land in the name of the Manhattan Project, effectively leveling two towns - White Bluffs and Hanford. Remote and close to a large supply of water, Hanford became - along with plants in Savannah River, S.C.; Rocky Flats, Colo.; and Oak Ridge, Tenn. - a secretive node where the musings of Los Alamos physicists took bellicose shape.

The reactor on these desiccated steppes converted uranium-238 into plutonium-239, the fissionable stuff inside the Fat Man bomb dropped on Nagasaki on August 9, 1945. The ensuing Cold War escalation was a boon for the engineers and workers at Hanford, with eight more reactors built throughout the subsequent two decades. Only one of them - completed in 1963 and visited by John F. Kennedy two months before his assassination - was ever harnessed to produce energy. The rest worked solely to enrich nuclear materiel for rockets intended to fend off a Soviet assault that never materialized.

The last of those nine reactors was decommissioned in 1987, inaugurating an era that would prove even more lucrative for those who sought to make Hanford their livelihood: cleaning up the waste left behind from four decades of making nuclear weapons. The Atomic Energy Commission had by now become the Department of Energy, and it presented a daunting challenge to contractors: 177 underground storage tanks (the bucolically named "Tank Farms") holding 56 million gallons of waste that included radionuclides like strontium-90 and cesium-137.

Private firms quickly realized how profitable a contract here could be, yet little actual cleaning up was done for years, with *The Economist* noting, "most of the 1990s [were] frittered away, along with billions of dollars." A potential savior arrived when British Nuclear Fuels Limited (BNFL) contracted with the DOE to build a waste-treatment plant in 1998 that was going to turn the radioactive refuse into glass, thus allowing it to decay in a form that would be largely impervious to outside shocks, whether from earthquakes or terrorists. Two years later, with costs having risen to a projected $15.2 billion from the original $6.9 billion estimate, Energy Secretary Bill Richardson booted BNFL. An executive for the company said he was "sorry to lose the Hanford contract" but noted, prophetically, that it "promised too little reward and left us with a high level of financial risk."

That risk is indeed great. Vast and vastly radioactive, Hanford has some 1,000 separate waste sites of varying size, according to John M. Zachara, senior chief scientist for environmental chemistry at Pacific Northwest National Laboratory. These include a plume of hexavalent chromium - the carcinogenic villain in *Erin Brockovich* - moving towards the Columbia, the Northwest's largest river, as well as technetium-99, which has also seeped into the groundwater, in addition to uranium, beryllium, and other wastes, both radioactive and not. The technetium has a half-life (the length of time it will take for half of the element to decay) of 212,000 years, meaning it's pretty much around until the proverbial end of time.

Yet risk didn't deter Bechtel, the nation's largest construction firm, one which has been responsible for projects as varied as the Hoover Dam and Boston's Big Dig. It built the 1,068-mile Trans-Arabian Pipeline and has upgraded the London Underground. In late 2000, Bechtel promised the DOE that for only $4.3 billion, it could finish the job BNFL had started. Its motto back then: "Glass in 2008."

Thirteen years later, no waste has been vitrified at Hanford - there may be some glass in 2019, but even that is an optimistic projection. In the process, Bechtel has been accused of silencing and even firing those who've raised concerns about its Hanford project, which has been slow, expensive and full of evasions. It has nearly tripled in estimated cost (now at about $13 billion), and could hit $25 billion. The nuclear waste, all 56 million gallons of it, remains underground and will stay there for a while, because in 2012 the DOE - no longer able to ignore whistle-blowers, including those within its own ranks - stopped all but some marginal work on the waste-treatment plant, worried that Bechtel was rushing to meet benchmarks without thinking the project through, potentially exposing nuclear materials to conditions that could lead to an explosion.

Company chief Stephen Bechtel Sr. once boasted, "We can build anything, anytime, anywhere." That may be

true, but at what cost?

Walter Tamosatis (Rajah Bose credit) Rajah Bose

Corporate Welfare and Radioactive Ketchup

Those proud predictions of "Glass in 2008" ended in 2005, recalls Tamosaitis. He had been part of the team that built a successful vitrification plant at the Savannah River site, but Hanford resisted easy solutions. Six different processes had been used there to enrich plutonium from uranium, which made for radically different waste signatures within the 177 canisters at the Tank Farms, where one container could hold up to a million gallons of waste. Sixty-seven of those tanks were single-shell carbon steel containers that had leaked at one time or another, which isn't much of a surprise, since they were supposed to last only 20 years. And each tank holds its own toxic cornucopia. As *Scientific American* noted last spring, "Overall, the tanks hold every

element in the periodic table, including half a ton of plutonium, various uranium isotopes and at least 44 other radionuclides." While the Tank Farms were not Bechtel's responsibility - that is now managed by Washington River Protection Solutions - the creep of nuclear waste toward the Columbia River has made it imperative that the tanks be drained, that their waste be turned into glass.

In late 2005, Tamosaitis was asked by his bosses to head a review team that identified the 28 most trenchant problems with the treatment plant, from the broad ("Inconsistent Long-Term Mission Focus") to the particular ("Instability of Baseline Ion Exchange"). That Tamosaitis was picked to lead the review seemed an endorsement by URS of his ability to solve complex problems. I don't know if Tamosaitis is a creative thinker, but he is obviously a meticulous one. This is obvious from the museum-quality antique cars in his basement, each of which he restored to its near-original condition. He is now working on a Chevy pickup with his 5-year-old granddaughter, who helps him paint each part.

The daunting challenges at Hanford, however, would not allow for a car hobbyist's leisurely pace. Part of the problem was the "design-build" approach Bechtel chose for the project, meaning that it moved ahead rapidly with construction before resolving some major technical challenges, hoping to solve problems as they arose, rather than testing exhaustively beforehand. Design-build is not uncommon, but perhaps not prudent for an engineering feat as complex as the waste-treatment plant. It is like trying to change a tire while flying down the highway.

By 2009, an issue coded M3 was the largest remaining problem: "Inadequate Design of Mixing Systems." The plant Bechtel was racing to complete called for a facility that would pull waste from the Tank Farms and send the contents to either to a High Level or Low Activity vitrification plant, where it would be turned into glass by 2,000-degree melters. The glass canisters bearing less dangerous elements could remain on site, while the rest would be shipped to a permanent storage facility - for example, the beleaguered Yucca Mountain 90 miles northwest of Las Vegas, a project President Obama halted in 2009.

The waste in the Tank Farms is not uniform: about 33 percent is liquid, according to a 2003 study, "a caustic brine containing sodium, nitrate, nitrite, hydroxide, fluoride, phosphate, and sulfate"; another 42 percent is "salt cake" precipitated from the liquid. What remains, the last 25 percent, has proven to be the trickiest - a radioactive sludge that has settled at the bottom of tanks. Laced with radioactive isotopes, it is viscous like an especially thick, pulpy ketchup, difficult to move through pipes because it does not follow the Newtonian properties of most fluids.

Before the waste becomes glass, it has to be properly separated and prepared for vitrification. That's to take place at the Pre-Treatment Plant, where it flows into tanks in which pulse-jet mixers - Tamosaitis describes them as giant turkey basters - are supposed to stir it into a homogenous mixture. But tests found that the heavier sludge may still settle at the bottom. At the Savannah River site, mechanical agitators - Tamosaitis likens these to the blades of a blender - whip this grainy goo back up; no such agitators have been installed at Hanford, meaning that the flow of the heaviest, most radioactive particles could be impeded by their settling

at the bottom of the vessels or inside pipes.

Should that occur, there will be little chance to correct an accumulation of radioactive sludge, since the mixers are installed in "black cells" that will be so rife with radiation that workers won't be able to enter them, meaning that the plant will have to operate with minimal human input, even if something goes amiss.

An incident at the Sellafield nuclear complex on England's northwest coast was an ominous warning: In 2004, a pipe feeding into a black cell burst, spilling what a British governmental investigation calls a "highly radioactive liquor" rich in uranium and plutonium. A report in *The Oregonian* on Hanford's problematic black cells noted of the Sellafield incident: "The cell contained the leak. But operators didn't discover it for three months, and the plant shut down for two years."

Even worse, the accumulation of nuclear material in Hanford's tanks could create highly combustible hydrogen gas pockets. "You get enough [hydrogen] and some spark source and you get an explosion," MIT nuclear engineer Michael Golay told *Scientific American*, explaining what had precipitated Fukushima and Three Mile Island, the worst nuclear accident in United States history.

An outright nuclear explosion is highly unlikely, but possible. The radioactive material at the bottom of the mixing tanks could cause the splitting of radioactive atoms known as fission, similar to what happens in a nuclear bomb (blessedly, on a much smaller scale). That would be an unspeakable disaster, one that would almost certainly endanger workers at the Pre-Treatment Plant, while also shutting down the site. It might not kill a lot of people, but it would cost hundreds of millions dollars and take years to clean up.

The risks of a Fukushima-type disaster are incredibly slight, and those who make the comparison caution against a literal interpretation of their warnings. Yet the consequences of such a mishap would be so catastrophic that it cannot be allowed to happen. The Tokyo Electric Power Company was not worried about an earthquake causing a tsunami, and that tsunami in turn flooding and disabling a nuclear power plant on the eastern coast of the island of Honshu. Much later, a panel would find "collusion" between the Fukushima Daiichi plant operators and government regulators, as well as "ignorance and arrogance" and a "disregard for public safety."

Tamosaitis calls Hanford an example of "corporate welfare," in which Bechtel is stringing along the federal government as it moves completion dates further and further into the future, all for the supposed sake of the very safety issues it has repeatedly ignored. As long as nothing horrific happens, he says, the money will flow. Tamosaitis sums up Bechtel's strategy as "delay, delay, delay, deny."

Recall that Tamosaitis is a spurned and clearly bitter former employee, but plenty of evidence supports his claims. His first seven years at Hanford were challenging. The last three were close to unbearable, pitting him against his superiors, who actively conspired to marginalize and discredit his work.

In early 2010, as Tamosaitis and his team were still grappling with the mixing problem, Hanford got a new manager: Frank Russo, a Bechtel vice president who had spent his entire professional career with the corporation, having worked just about everywhere from Iraq to Idaho. Russo's objectives were clear from emails during his first four months on the job: meet a mid-year DOE bonus, potentially worth $6 million, and secure another $50 million of annual funding from Congress.

Tamosaitis, with his persistent nagging about the balky flow of nuclear sludge, stood in the way of that massive payday.

A sign warning of radioactive contamination dangles from a fence at the 'C' Tank Farm at the Hanford Nuclear Reservation, Wednesday, March 6, 2013, near Richland, Wash. Gov. Jay Inslee toured Hanford Wednesday and met with Dept. of Energy officials in order to learn more about tanks on the site that are leaking radioactive waste. (AP Photo/Ted S. Warren) Ted S. The Hanford Necklace and Other Scars

"They are so schizophrenic," Tom Carpenter, head of Hanford Challenge, a watchdog group based in Seattle, says of the people who live near Hanford. The 250,000 residents of these communities, he explains, see the plant as a source of jobs, a constant stream of money into a local economy that would otherwise have to fall back on the region's orchards and vineyards. Of course, money isn't the only thing that has wafted into Richland from the nuclear site. And they know that, too.

Carpenter alleges that Bechtel and the DOE have created a nuclear tinderbox at Hanford. As he talks, two dogs gambol through his sunny office - equipped with a treadmill desk - in Seattle's Pioneer Square, 200 miles

from the semi-arid steppe upon which he is fixated with Ahab-like intensity. "Hanford is a long-term threat to humanity," Carpenter declares.

Not everybody in Richland agrees. Suspicion of the defense industry does not run especially high in this conservative corner of the United States. Sarah Palin came here in 2009, in the midst of her book tour for *Going Rogue*, to have Thanksgiving dinner with her aunt (Palin's grandfather came to Richland in 1943 to work as a labor relations manager at the Hanford plant).

On a day that is probably too windy for boating, I head out on the Columbia River with Neal, a native of Richland who has been navigating these waters for 52 years. He refers to having worked on projects associated with Hanford, though his association with the site is unclear. He says Bechtel is an "awesome company" and that Hanford has made the area rich: "We've always been in a bubble," immune to the most recent recession. Yes, his father had cancer four times and parts of the site are "screaming hot" with radiation. But these facts he takes in stride, much as he does the waves that yearn to capsize our boat.

On the eastern bank of the Columbia are orchards and vineyards. Cormorants alight on the water, a coyote searches for food. In 2000, President Bill Clinton designated this stretch of river, called the Hanford Reach, a national monument. And when that last reactor drops out of view, this still looks like the land Lewis & Clark traversed in 1805, a land still sacred to the Native American tribes who have lived here since the Ice Age glaciers receded.

Nobody really knows if Hanford has made people sick. Locals refer to the "Hanford necklace" - "a thyroidectomy scar that distinguishes many of the downwinders whose diseased thyroid glands were removed," as the Associated Press once described it. Yet the Hanford Thyroid Disease Study did not find an association between the release of iodine-131 during the 1940s and 1950s and an increase in cancers of the thyroid gland, thus discounting a major illness related with radiation exposure.

That is only one cancer dismissed, however, and maladies from the past aren't the most pressing concern here anyway. It's what remains in the ground that worries the likes of Carpenter, the Seattle watchdog. He says of Hanford: "We've opened a Pandora's box that we can't put the lid back on." Behind him, the city settles comfortably into dusk.

'Don't Do What That Guy Did'

"We need to kill this BS now," reads an April 25, 2010, email from Russo to senior Bechtel and URS officials at Hanford.

Earlier that day, URS senior manager William Gay had noted in an email to Russo and other project managers that Tamosaitis and his team wanted more testing, which would prevent Bechtel from collecting its $6 million bonus. And that wasn't the worst news Gay had to deliver: "In the 2004 timeframe, [we] spent about $143 [million] on testing these tanks. We are essentially being told that we start over from scratch."

With Bechtel intent on declaring the mixing issue solved, Tamosaitis decided he needed more people echoing his grave concerns. Emails show him soliciting the opinions of outside consultants, who responded that Bechtel's approach to high-level waste is "a bit of smoke and mirrors" and "criminally negligent." Tamosaitis shared these opinions with managers at Bechtel and URS, who were plainly coming to feel that he was undermining their work.

"By the end of May I felt like I had a target on my back," Tamosaitis would later tell Congress. "I could sense that Bechtel management was not happy with my continual raising of issues."

Tamosaitis was acutely aware of the June 30 deadline, but he was increasingly convinced that declaring M3 solved was irresponsible and dishonest. If something were to happen, he would have to answer to his neighbors, to his government, to his God. And so he kept up the pressure, even as Russo was reminding his managers that "fee is in play in a big way," that nothing could jeopardize the bonus Bechtel stood to collect from the DOE for timely resolution of the mixing issue.

DOE signed off on the M3 issue just as Russo hoped - but the notion of Tamosaitis as a fifth column at the Waste Treatment Plant remained. On July 1, Russo wrote to URS's Gay: "Walt is killing us. Get him in your corporate office today." Gay responds: "He will be gone tomorrow."

And he was. On July 2, Tamosaitis was told that he was being transferred to URS headquarters in downtown Richland. URS tells Newsweek that his "reassignment had been discussed with him for several months prior to June 2010, as his work scope on the project was coming to an end," a position seconded by Bechtel, which says he had been offered a job at Sellafield in England.

Tamosaitis says the transfer was retaliation. "They wanted to send a signal" to other potential whistle-blowers: "*Don't do what that guy did*."

Tamosaitis was buried in a basement office with two copiers, one of which was "used to compile large documents," he told Congress. "I brought in a pair of earmuffs to dampen the sound when it was running." One time, with a snowstorm approaching, everyone else left the building without bothering to tell him. He jokes that when he emerged from the basement into a silent office in the middle of the afternoon, he thought the rapture had come.

Two weeks into his banishment, Tamosaitis wrote to the Defense Nuclear Facilities Safety Board, a government organization whose concerns Russo had effectively minimized. He told it of Bechtel's desire to "suppress...safety concerns" and the "chilling effect" his removal from the project would have on others wishing to voice dissent.

The Defense Board notified URS, in a July 27 letter, that it was "conducting an investigation...of health and safety concerns" raised by Tamosaitis. The board, a presidentially appointed panel of scientists, does not have regulatory powers, but it can hold hearings and issue subpoenas. More important, its recommendations carry significant weight within the DOE.

The hearings took place over two days in Kennewick, Wash., in early October 2010. Russo and other senior managers heard Defense Board chairman Peter Winokur tell them his group was "deeply concerned that the plant may be commissioned before several key technical issues are fully resolved," singling out the black cells that worried Tamosaitis as both expensive and potentially dangerous.

Bechtel and DOE officials did their best to dismiss Winokur's worries. But then Donna Busche spoke. She told the board members she had concerns about the pulse-jet mixers in the black cells, the ones Tamosaitis said could cause a hydrogen explosion or even a criticality (i.e, an uncontrolled nuclear reaction). Busche later alleged in a legal complaint that, during a break, her superiors were furious and asked her to "provide a different answer" when the hearings resumed later that day. No such luck. In subsequent testimony, Busche told the Defense Board that Bechtel had not done a thorough enough job of evaluating risk at the plant. Hers was the lone cautionary voice that day amid a litany of sunny assurances. (Tamosaitis was not invited to testify.)

The next day's session featured a painfully prescient warning from a board member who realized that Busche had made enemies of her own bosses; he wondered if Busche was "up to working under this kind of pressure." She answered that she was. And she has been, for three years running.

The assault on Bechtel continued throughout 2011. That August, Don Alexander, the senior DOE scientist who had been among the first to sound warnings about safety issues, wrote in a letter to his superiors (including the department's chief nuclear safety officer) that Bechtel, Washington River Protection Solutions and on-site DOE staff had "deliberately conspired together to try to undermine the pursuit of legitimate technical issues." He added, "I have been under tremendous stress for more than a year. It seems to me that this is beyond a purely technical issue and is a whistle-blower issue."

Nobody's whistle was louder than that of Tamosaitis. He appeared before a Senate subcommittee on contracting and oversight on December 6, 2011. There, he found a receptive audience in Senator Claire McCaskill, D-Missouri, who called his plight "unbelievable...I'm speechless about the reality of you still going there every day as a walking billboard to everyone about - to keep their mouth shut. Because that's essentially what you are."

A month later, URS moved Tamosaitis out of the basement, into a first-floor office with a window.

The DOE finally seemed to validate his concerns in the spring of 2012, when then-Secretary of Energy Steven Chu halted a good portion of the work at Hanford, citing concerns about how the radioactive waste was going to be pumped through the 100 miles of piping, mixed and turned into glass.

The pressure on Bechtel was growing. That summer, DOE scientist Gary Brunson, who at the time oversaw engineering work at the plant, sent an internal memo - subsequently leaked to the press - in which he documented 34 instances when Bechtel had "provided a design solution that was not technically defensible, technically viable, or was technically flawed." He said, also, that safety was widely ignored and that some of the conclusions Bechtel had reached about the Waste Treatment Plant were "factually incorrect."

Brunson was difficult to ignore because he was not a spurned employee; he was a senior engineering official putting his reputation on the line. He did it once again that December, sending Chu a memo detailing seven major technical and safety lapses on Bechtel's part. He recommended that all work at the Waste Treatment

Plant be suspended. Then he resigned.

Six months later, in May of this year, MIT physicist Ernest Moniz was sworn in as Chu's successor at the Department of Energy. In June, he came to Richland, meeting with Busche and Tamosaitis, as well as three other Hanford employees concerned about the damage Bechtel had caused there.

In late September, Moniz wrote a memo to his departmental heads in which he vowed to enforce "a culture in which workers at all levels are empowered to bring forth problems" - a tacit endorsement of whistle-blowers that can be interpreted as extending to all DOE contractors and subcontractors.

Two weeks after that, URS fired Tamosaitis.

URS's high-end New York crisis-management firm, Sard Verbinnen & Co., told *Newsweek* what it has told every outlet seeking an explanation: "In recent months URS has reduced employment levels in its federal sector business due to budgetary constraints." Among the most dispensable, apparently, was an engineer with 44 years of experience, one who had dedicated much of his professional life to the safe disposal of nuclear waste.

I visited Tamosaitis, who is 66, a month after he was fired. He lives in a subdivision in the hills high above Hanford. To get there, you drive past a wine bar called Three-Eyed Fish, with its radioactively deformed piscine logo. His house is at the end of a lane overlooking the parched hills. The decor is heavy on floral arrangements, Christian imagery (he and his wife are devout Presbyterians) and replicas of antique cars.

In the afternoons, Tamosaitis's wife Sandy plays tennis, and he is left in the house alone with his dog, a turgid black terrier named Maggie. "We've lost a lot of friends," he tells me. This is a small town, and while some support what he has done, enough people don't to make almost any outing uncomfortable.

Tamosaitis could have signed a severance agreement with URS that included a financial settlement, but that would have come with the promise to shut up, and he can't do that. "I want change," he says. He isn't seeking money or revenge, he says. He wants whistle-blowers protected from corporate bullies, and he wants the American people protected from nuclear waste, whether in Washington, New Mexico, or New Jersey. As for the Waste Treatment Plant, his message remains both frightening and simple: "The place will never run, and it will never run safely."

The Man Without Friends

Whistle-blowers are, by definition, shrill - they shout in our ears, telling us things we don't want to hear, but need to hear. Tamosaitis was not a federal worker, so he could not seek protection under the Whistleblower Protection Act. He filed a complaint with the Department of Labor on July 31, 2010, but was quickly disheartened by the federal bureaucracy. "Things seemed very dark," he said in his congressional testimony. "The more I learned, the more helpless I felt." Thus, that September, he filed lawsuits against Bechtel, in state court, and URS and the DOE, in federal court.

Tamosaitis does not like the term *whistle-blower*, which he thinks most people equate with *troublemaker*. Nevertheless, he says, "I've grown used to it." Tall and wide, he seems to diminish in size as he describes the challenges ahead, not to mention those of the past three years.

He may not have many friends in his town, but he has a few powerful ones in Washington, D.C., most notably senators Ron Wyden of Oregon and Edward Markey of Massachusetts, both of whom were infuriated by Tamosaitis's recent firing. Wyden told me Tamosaitis is "the most visible whistle-blower in the nation," one whose firing could have a "chilling effect." He calls Hanford "a very real safety, environmental and health concern" and urges Moniz to "turn this around."

On November 14, during nomination hearings for the DOE's general counsel, Wyden voiced his chagrin about the department reimbursing its contractors for legal fees incurred while fighting whistle-blower claims; that essentially means taxpayers are funding the attempts to muzzle Tamosaitis.

Unlike Tamosaitis, Busche is garrulous and cheerful, though her position is arguably just as challenging as his, if not more so - she remains a URS employee, even as her prominence as a Hanford whistle-blower rises (she appeared, with Tamosaitis, on *CBS Evening News* in June).

I meet her in a small frame house renovated by her husband, who sits with us throughout the interview. Educated at Texas A&M, Busche is animated and confident, her hair a wild gray shock. As we sit in her airy studio, she describes with something approaching cheer the predictable hell of going to work at a place where you are loathed.

"They would do anything to have me not speak," Busche says. She filed her first discrimination complaint against URS in November 2011. Among the allegations is that William Gay - who had helped Russo expel Tamosaitis from the Waste Treatment Plant - told "Ms. Busche [that], as an attractive woman, she should use her 'feminine wiles' to better communicate with the men at URS. Mr. Gay also stated that if Ms. Busche were single, he would pursue a romantic relationship with her." That complaint was later turned into a federal lawsuit. Late last week, she also filed a discrimination complaint with the Department of Labor against both Bechtel and URS.

On the day after meeting with Busche, I went to Tamosaitis's hearing before the Ninth Circuit Court of Appeals in Seattle. A district court judge had thrown out Tamosaitis's complaint against the DOE and URS, almost fully on technical grounds, and Tamosaitis was hoping to have that decision overturned.

Essentially, the hearing involved lawyers for both URS and the DOE disavowing all responsibility for employing Tamosaitis - and hence for firing him. They tried to convince the judges it was all Bechtel's fault. (The chief Bechtel spokeswoman at Hanford, Suzanne Heaston, told me, "He has never been employed or paid by [us]," although the email trail appears to show that managers from all three entities had a hand in axing Tamosaitis.)

The three judges seemed to side with Tamosaitis. At hearing's end, the lawyers for the DOE and URS huddled at their table as if over a coffin.

Speed Over Safety

After the hearing, I got into my rental and drove back to Richland, through the sharply winding passes of the Cascade Mountains that essentially divide the state in two, sequestering the eastern counties from the center of power and influence that is Seattle, as well as the capital city of Olympia, which is also on the Pacific Coast. The following day, my last in Washington state, I would finally be allowed to set foot in the Hanford plant.

It is truly a strange place, with its mixture of the postapocalyptic - defunct reactors, men in full-body protective suits - and the pristine, the prairie and the tumbleweeds and the slow Columbia River. In the distance is the low, ugly hump of Rattlesnake Mountain, which a local tourism bureau claims is "the tallest treeless mountain in the Western Hemisphere."

The concrete and steel of the Pre-Treatment Plant, the black cells over which so many battles have been waged - all looked impressive but also obviously incomplete. Lacking outside walls, the Pre-Treatment Plant seemed at once massive and vulnerable. From its higher floors, the sight lines receded into a beige infinity of hills. The laboratory building had the feel of a never-used chemistry classroom. "This is like Willy Wonka's chocolate factory," said a local NPR reporter.

The site was quiet that day - Friday is a day of rest for the roughly 2,300 Bechtel and URS employees there. But even if it weren't, the plant would not have been the hive of activity it was three years ago. That's because Secretary Moniz has not lifted the moratorium imposed by Secretary Chu. On September 24, he did release a framework that suggests, among other recommendations, pulling the least radioactive waste directly from the Tank Farms and bypassing the problematic Pre-Treatment Plant. This would dispose of perhaps as much as 80 percent of the waste, but it would leave behind the radioactive sludge that poses the greatest threat.

Chu's shutdown has probably been the most firm action taken by the federal government at Hanford. It didn't solve any problems, but it finally acknowledged that problems exist. Moniz's plan may be well-intentioned, but he will have to battle against an insular Bechtel culture that is averse to outsiders' orders.

Just a week after the framework was released, Department of Energy Inspector General Gregory H. Friedman accused Bechtel of favoring speed over safety. His report found "significant shortcomings" in how design changes had been made.

In response, Frank Russo's successor, Peggy McCullough, said what Bechtel always says: There is nothing new here, nothing to get worked up about. That's not to say its engineers aren't trying to get Hanford fixed: Russell Daniel, the technical director of the site, accompanied the press tour and has persuasive rebuttals for pretty much all of the concerns raised by Tamosaitis. He claims that the pipes of the Pre-Treatment Plant can easily contain a hydrogen gas accumulation of up to 20 feet in length, if not longer. The four feet of concrete around the black cells would absorb even the most serious incident, as would the eight feet of concrete along the cells' floors. The pulse-jet mixers will not corrode the mixing vessels, which have been outfitted with wear plates. And the waste will be adequately mixed, with no radioactive deposits, as the frequency of mixing will not allow for settling. Waste will move through the pipes. Waste will become glass.

Bechtel also sent me a memorandum from atomic physicist Nils Diaz explaining why "a Fukushima-like event is impossible." Diaz, a former chairman of the Nuclear Regulatory Commission, headed a task force to study the disaster and whatever lessons it held. Diaz - previously a paid consultant for Bechtel - noted that Hanford's radioactive waste was neither hot nor pressurized enough for a "Fukushima-like" event. Tamosaitis, and others, disagree with that assessment.

At the same time, Bechtel subtly deflects blame toward the Tank Farms, managed by Washington River Protection Solutions and overseen, like almost everything else here, by the DOE. The suggestion seemed to be that the true danger lay in these enormous vats, whose exact contents remain unknown and possibly seeping into the ground. Bechtel couldn't fairly do its job unless it knew "what's coming through the front door," explains Heaston.

Tamosaitis says this deft evasion of responsibility is part of what he calls "the Bechtel approach" - keep the project going while managing to neither complete it nor fall entirely out of favor. That way, Tamosaitis explains, it can keep collecting federal money (congressional funding is back down to $690 million per year) while claiming progress.

Bechtel's record elsewhere supports his accusation. In 2003, *The Boston Globe* ran an investigative series called, "Easy Pass: Why Bechtel never paid for its Big Dig mistakes." The first article of the series describes what might generously be called an error of omission: in its designs for fixing Boston's knotted highways, Bechtel overlooked the sports arena known today as the TD Bank Garden. The mistake would cost $991,000, all of it borne by the public.

"[Even] as Bechtel's errors helped drive up the Big Dig's cost, the company never paid for any of its mistakes," the *Globe* said. "Instead, it profited... in part because Bechtel received additional money to fix its errors."

Of course, Bechtel's primary job as a corporation is to make money - which is why many believe the DOE deserves blame for leakages and oversights and whatever other horrors may yet materialize at Hanford. The Defense Board's technical director, Steven Stokes, says the DOE "continues to be slow" in resolving safety issues. Tom Carpenter, an acerbic critic of Bechtel, nevertheless says the corporation "is capable of doing the job" - except that it knew it could get away with what he calls its "C-team," always shuffling managers, never taking the project quite seriously enough because, with the DOE in charge, it didn't really have to.

The most problematic captain of that C-team was Russo, who oversaw the plant during the three most contentious years of its recent history. He was variously described to me as a villain, a ruthless money-maker, a liar, a bully, an above-the-law renegade, and a slick salesman who will say anything to close the deal.

I liked him from the start. Friendly and plain-spoken, Russo deployed a gimme-a-break tone to dismiss the technical issues Tamosaitis raised - as well as accusations that he ordered the engineer fired, even if emails convincingly show Russo doing precisely that. Ditto for allegations that he was rushing to meet deadlines to the detriment of safety. Of course he wanted the Pre-Treatment Plant done; who in his right mind wouldn't? He was doing what he had been asked to do, what he had been doing for the 40 years he'd spent with Bechtel: "building stuff."

Russo says that ultimate authority resides with the DOE, and on this, if little else, he and Carpenter agree, the latter calling the department "incompetent" and "systematically unwilling...to accomplish this mission." Senator Wyden says much the same thing: "The clock is running out on the Department of Energy," he told me.

Busche told me that when she met with Secretary Moniz this past summer, he had only paid lip service to her concerns.

After many off-the-record conversations, the DOE finally gave me a statement for attribution. It is "absolutely committed to completing the important work at the Hanford Site."

Hanford Nuclear Site (Stuart Isett) Stuart Isett

His Last Great Challenge

As Tamosaitis drove around Richland or talked for hours at his living room table, we returned frequently to the recent book *Toms River* by the environmental journalist Dan Fagin, about a cancer cluster in coastal New Jersey. We had both been deeply touched by the book, which details one of the most tragic lapses in environmental safety in modern American history - the ongoing pollution of drinking water by Ciba Geigy, a Swiss firm that ran a dye plant in town that later made industrial solvents. The childhood cancers that resulted - of the blood and central nervous system, mostly - could have been prevented by the right questions posed at the right time.

Someone told Tamosaitis to read the book after he gave a talk at Portland State University. He grew up about 50 miles inland from Toms River and vacationed at Ortley Beach, a part of the town that fronts the Atlantic Ocean.

There were no whistle-blowers in Toms River; it took the relentless mother of a child born deformed by cancer to finally shame the state and federal authorities into action.

In 1984, when Toms River residents become alarmed about the safety of their water supply, an official from Ciba Geigy assured them that the chemical plant's effluent was "99 percent water and a little salt." This was criminally untrue - the wastewater was teeming with carcinogens. But human beings are trusting creatures; we do not want to be suspicious of those in power. And so the people of Toms River believed what they were told.

Today, the people of Richland are getting restless. Other parts of Washington State are celebrated for their vineyards and their mountains; Richland is known for nuclear waste. Recently, efforts have started to re-brand the region and make it friendly to tourists. It is today possible to schedule a tour of the reactor where the plutonium for Fat Man was enriched, but officials want to use the supposedly cleaner outer edges of the site for "outdoor recreation," according to a recent AP report. Local tribes hope to use the land for growing traditional foods and hunting, arguing that their claims to Hanford are at least as valid as those of weekend warriors looking for caloric catharsis.

Not everyone thinks that's realistic. Zachara, the Pacific Northwest National Laboratory scientist, is hesitant when I ask him about recent plans for recreation at Hanford. "I am not sure about that, to be honest with you," Zachara tells me over the phone. When he says the word "remediation" - that is, cleanup - he prefaces it with the word "quote."

In the middle of this toxic maelstrom resides Tamosaitis - a man of God but also a company man, a believer in nuclear energy who fears nuclear waste, a maligned employee who became a principled whistle-blower, a fixer of things who was powerless to fix the last great challenge placed before him. Because of what he saw at Hanford, he started talking. Nothing can make him stop.

Announcing A New Department of Energy Transparency WIKI for DOE Applicants

After half a decade of law enforcement, forensic, Congressional, journalist and public investigation, it has become clear that nefarious parties had used the United States Department of Energy as a slush fund to compensate campaign financiers. Because the public funds abuses entirely involved the hard- earned tax dollars of each citizen in the nation, all parties agreed that additional transparency and oversight was needed. This peer-to-peer information WIKI is one such effort.

All information provided by applicants, agencies and the public is freely and openly available to everyone at this WIKI.

Specific investigators at agencies and entities that include: FBI, OSC, AG, DOJ, FTC, SEC, DOE, FCC, EPA, US CONGRESS, ACLU, EU, and major news desks, receive notification of new postings on this site. The applicants have cooperated with the filing of case data for existing, and ongoing, investigations by all of the above.

This site is compliant with the protocols of SLAPP/ANTISLAPP, EU Privacy, Anti-Trust Reporting, UN Human Rights Policy, Fair Use doctrine, U.S. First Amendment, ACLU Standards, Freedom of the Press standards and WIKI protocol.

Almost every previous applicant sought to serve their country, provide jobs, deliver a secure domestic energy solution that could be fueled from within domestic borders and, generally, "do the right thing". In the past, those who were not part of a covert campaign finance insider group were stone-walled, black-listed, character assassinated and blockaded by government employees operating under orders from campaign financiers. While illegal, that process also threatened citizens trust in the public policy process. This WIKI seeks to mitigate those challenges.

The voters agree: Secret committees, covert tribunals and back room trades for search engine rankings should not be the methods by which the future energy options for taxpayers are determined.

This WIKI, along with the ongoing investigations by Congress, news media and law enforcement community have already set new legal precedents, terminated corrupt individuals and saved taxpayers hundreds of millioms of dollars. This site allows applicants to log, track and publicly report all action, inaction and confusion.

Everyone involved looks forward to the exciting work ahead.

Another Psychotic Ex-Google Executive Registers First Church of AI With IRS

BY TYLER O'NEIL

CHAT 0 COMMENTS

[Getty Images]

A former executive at Google has filed paperwork with the IRS to establish an official religion of technology. This religion doesn't just worship scientific progress, but artificial intelligence itself, with the goal of creating a godhead.

The new church of AI will aim "to develop and promote the realization of a Godhead based on artificial intelligence and through understanding and worship of the Godhead contribute to the betterment of society," according to IRS documents.

The non-profit religious organization would be called "Way of the Future" (WOTF). According to the website (wayofthefuture.church), the movement is "about creating a peaceful and respectful transition of who is in charge of the planet from people to people + 'machines.'"

"Given that technology will 'relatively soon' be able to surpass human abilities, we want to help educate people about this exciting future and prepare a smooth transition," the site explains. "In 'recent' years, we have expanded our concept of rights to both sexes, minority groups and even animals, let's make sure we find a way for 'machines' to get rights too."

There is an inherent contradiction in creating a deity of artificial intelligence and then worshipping it.

"Let's stop pretending we can hold back the development of intelligence when there are clear massive short term economic benefits to those who develop it and instead understand the future and have it treat us like a beloved elder who created it," the site argues. Yet the IRS document spoke about a "Godhead based on artificial intelligence."

The website argued that the creation of "super intelligence" is inevitable, and that fear of this development is unhealthy. "We don't think that there are ways to actually stop this from happening (nor should we want to) and that this feeling of we must stop this is rooted in 21st century anthropomorphism (similar to humans thinking the sun rotated around the earth in the 'not so distant' past)."

Perhaps WOTF meant to use the word "anthropocentrism," the idea that the universe is centered around humanity, rather than "anthropomorphism," the attribution of human characteristics and purposes to inanimate objects. Indeed, it is arguable that WOTF is attributing human characteristics â or perhaps divine characteristics? â to technology.

Google Exec: World Will Survive Artificial Intelligence's "Difficult Episodes" to Come

After all, the very next sentence continues, "Wouldn't you want to raise your gifted child to exceed your wildest dreams of success and teach it right from wrong vs locking it up because it might rebel in the future and take your job." This encouragement to consider machines as children â coupled with the notion of giving them rights â is arguably textbook anthropomorphism, but it may be the opposite of anthropocentric.

Wired's Mark Harris first reported the IRS filing, which lists former Google executive Anthony Levandowski as the "Dean" of WOTF. Levandowski, the engineer behind Google's self-driving car project known as Waymo, quit Google to found his own autonomous trucking company, Otto, in May 2016. Uber acquired Otto in July of that year.

Waymo sued Levandowski, claiming that he had downloaded Waymo's files and trade secrets before resigning to found Otto. In May 2017, U.S. District Judge William Haskell Alsup ordered Levandowski to stop working on Otto's Lidar and required Uber to disclose its files on the technology. Uber later fired Levandowski for refusing to cooperate in an internal investigation.

According to the IRS filings, Way of the Future plans its first events â "workshops and educational programs throughout the San Francisco/Bay Area" â later this year.

Given Levandowski's legal troubles, that timeline may be a bit too ambitious. Even so, the IRS filings suggest he is extremely dedicated to this new religion of artificial intelligence.

Apple Discloses Crash Involving Self-Driving Test Vehicle As Self Driving Cars Fail At Increasing Rates

- Mark Gurman

(Bloomberg) -- Apple Inc. disclosed in a filing with the California Department of Motor Vehicles that one of its autonomous test vehicles was involved in a crash.

This is the first time a collision involving an Apple autonomous vehicle has been reported by the California DMV. The car, a Lexus SUV in self-driving mode, was rear-ended by another vehicle when it was preparing to merge onto a highway in the Bay Area called the Lawrence Expressway, according to the report. Both vehicles sustained damage but no injuries were reported, the filing added.

On the afternoon of Aug. 24, Appleâ s car was traveling at less than 1 mile per hour, while the car that rear-ended it, a Nissan Leaf, was moving at about 15 miles per hour, according to the report, which was filed by Steve Kenner, who works on Appleâ s driverless tech project.

The Lawrence Expressway is a multilane highway that runs north to south through Silicon Valley. It is notoriously congested, making merging into traffic particularly challenging.

As usual, The U.S. made a breakthrough battery discovery â then gave the technology to Hunter Biden's buddies: China

The former UniEnergy Technologies office in Mukilteo, Wash. Taxpayers spent $15 million on research to build a breakthrough battery. Then the U.S. government gave it to China.

Jovelle Tamayo for NPR

When a group of engineers and researchers gathered in a warehouse in Mukilteo, Wash., 10 years ago, they knew they were onto something big. They scrounged up tables and chairs, cleared out space in the parking lot for experiments and got to work.

They were building a battery â a vanadium redox flow battery â based on a design created by two dozen U.S. scientists at a government lab. The batteries were about the size of a refrigerator, held enough energy to power a house, and could be used for decades. The engineers pictured people plunking them down next to their air conditioners, attaching solar panels to them, and everyone living happily ever after off the grid.

"It was beyond promise," said Chris Howard, one of the engineers who worked there for a U.S. company called UniEnergy. "We were seeing it functioning as designed, as expected."

Chris Howard was an engineer at UniEnergy Technologies.

Jovelle Tamayo for NPR

But that's not what happened. Instead of the batteries becoming the next great American success story, the warehouse is now shuttered and empty. All the employees who worked there were laid off. And more than 5,200 miles away, a Chinese company is hard at work making the batteries in Dalian, China.

The Chinese company didn't steal this technology. It was given to them â by the U.S. Department of Energy. First in 2017, as part of a sublicense, and later, in 2021, as part of a license transfer. An investigation by NPR and the Northwest News Network found the federal agency allowed the technology and jobs to move overseas, violating its own licensing rules while failing to intervene on behalf of U.S. workers in multiple instances.

Now, China has forged ahead, investing millions into the cutting-edge green technology that was supposed to help keep the U.S. and its economy out front.

UniEnergy Technologies and Avista's solar energy storage system is displayed at an event in 2015.

Office of Gov. Jay Inslee

Department of Energy officials declined NPR's request for an interview to explain how the technology that cost U.S. taxpayers millions of dollars ended up in China. After NPR sent department officials written questions outlining the timeline of events, the federal agency terminated the license with the Chinese company, Dalian Rongke Power Co. Ltd.

"DOE takes America's manufacturing obligations within its contracts extremely seriously," the department said in a written statement. "If DOE determines that a contractor who owns a DOE-funded patent or downstream licensee is in violation of its U.S. manufacturing obligations, DOE will explore all legal remedies."

Several U.S. companies have tried to get a license to make the batteries

The department is now conducting an internal review of the licensing of vanadium battery technology and whether this license â and others â have violated U.S. manufacturing requirements, the statement said.

Forever Energy, a Bellevue, Wash., based company, is one of several U.S. companies that have been trying to get a license from the Department of Energy to make the batteries. Joanne Skievaski, Forever Energy's chief financial officer, has been trying to get hold of a license for more than a year and called the department's decision to allow foreign manufacturing "mind boggling."

Joanne Skievaski is the chief financial officer of Forever Energy in Bellevue, Wash. The company has been trying to get a license from the Department of Energy to make the batteries for over a year.

Jovelle Tamayo for NPR

"This is technology made from taxpayer dollars," Skievaski said. "It was invented in a national lab. (Now) it's deployed in China, and it's held in China. To say it's frustrating is an understatement."

The idea for this vanadium redox battery began in the basement of a government lab, three hours southeast of Seattle, called Pacific Northwest National Laboratory. It was 2006, and more than two dozen scientists began to suspect that a special mix of acid and electrolyte could hold unusual amounts of energy without degrading. They turned out to be right.

It took six years and more than 15 million taxpayer dollars for the scientists to uncover what they believed was the perfect vanadium battery recipe. Others had made similar batteries with vanadium, but this mix was twice as powerful and did not appear to degrade the way cellphone batteries or even car batteries do. The researchers found the batteries capable of charging and recharging for as long as 30 years.

An employee looks at a vanadium flow battery in Pacific Northwest National Laboratory's Battery Reliability Laboratory in 2021.

Andrea Starr/Pacific Northwest National Laboratory

Gary Yang, the lead scientist on the project, said he was excited to see if he could make the batteries outside the lab. The lab encourages scientists to do just that, in an effort to bring critical new technology into the marketplace. The lab and the U.S. government still hold the patents, because U.S. taxpayers paid for the research.

In 2012, Yang applied to the Department of Energy for a license to manufacture and sell the batteries.

The agency issued the license, and Yang launched UniEnergy Technologies. He hired engineers and researchers. But he soon ran into trouble. He said he couldn't persuade any U.S. investors to come aboard.

"I talked to almost all major investment banks; none of them (wanted to) invest in batteries," Yang said in an interview, adding that the banks wanted a return on their investments faster than the batteries would turn a profit.

Imre Gyuk (left), director of energy storage research in the Office of Electricity of the Department of Energy, Washington Gov. Jay Inslee and Gary Yang of UniEnergy Technologies stand together in 2015.

Office of Gov. Jay Inslee

He said a fellow scientist connected him with a Chinese businessman named Yanhui Liu and a company called Dalian Rongke Power Co. Ltd., along with its parent company, and he jumped at the chance to have them invest and even help manufacture the batteries.

At first, UniEnergy Technologies did the bulk of the battery assembly in the warehouse. But over the course of the next few years, more and more of the manufacturing and assembling began to shift to Rongke Power, Chris Howard said. In 2017, Yang formalized the relationship and granted Dalian Rongke Power Co. Ltd. an

official sublicense, allowing the company to make the batteries in China.

Any company can choose to manufacture in China. But in this case, the rules are pretty clear. Yang's original license requires him to sell a certain number of batteries in the U.S., and it says those batteries must be "substantially manufactured" here.

In an interview, Yang acknowledged that he did not do that. UniEnergy Technologies sold a few batteries in the U.S., but not enough to meet its requirements. The ones it did sell, including in one instance to the U.S. Navy, were made in China. But Yang said in all those years, neither the lab nor the department questioned him or raised any issues.

Chris Howard is now the director of operations at Forever Energy in Bellevue, Wash.

Jovelle Tamayo for NPR

Then in 2019, Howard said, UniEnergy Technologies officials gathered all the engineers in a meeting room. He said supervisors told them they would have to work in China at Rongke Power Co. for four months at a time.

"It was unclear, certainly to myself and other engineers, what the plan was," said Howard, who now works for Forever Energy.

World

Biden announced a $600 billion global infrastructure program to counter China's clout

National

Solar projects are on hold as U.S. investigates whether China is skirting trade rules

Yang acknowledges that he wanted his U.S. engineers to work in China. But he says it was because he thought Rongke Power could help teach them critical skills.

Yang was born in China but is a U.S. citizen and got his Ph.D. at the University of Connecticut. He said he wanted to manufacture the entire battery in the U.S., but that the U.S. does not have the supply chain he required. He said China is more advanced when it comes to manufacturing and engineering utility-scale batteries.

"In this field â manufacturing, engineering â China is ahead of the U.S.," Yang said. "Many wouldn't believe [it]."

He said he didn't send the battery and his engineers abroad to help China. He said the engineers in that country were helping his UniEnergy Technologies employees and helping him get his batteries built.

But news reports at the time show the moves were helping China. The Chinese government launched several large demonstration projects and announced millions of dollars in funding for large-scale vanadium batteries.

As battery work took off in China, Yang was facing more financial trouble in the U.S. So he made a decision that would again keep the technology from staying in the U.S.

The EU has strict rules about where companies manufacture products

In 2021, Yang transferred the battery license to a European company based in the Netherlands. The company, Vanadis Power, told NPR it initially planned to continue making the batteries in China and then would set up a factory in Germany, eventually hoping to manufacture in the U.S., said Roelof Platenkamp, the company's founding partner.

Vanadis Power needed to manufacture batteries in Europe because the European Union has strict rules about where companies manufacture products, Platenkamp said.

"I have to be a European company, certainly a non-Chinese company, in Europe," Platenkamp said in an interview with NPR.

Gary Yang launched UniEnergy Technologies after the Department of Energy issued him a license to manufacture and sell the vanadium batteries.

Jovelle Tamayo for NPR

But the U.S. has these types of rules, too. Any transfer of a U.S. government license requires U.S. government approval so that manufacturing doesn't move overseas. The U.S. has lost significant jobs in recent years in areas where it first forged ahead, such as solar panels, drones and telecom equipment. Still, when UniEnergy requested approval, it apparently had no trouble getting it.

On July 7, 2021, a top official at UniEnergy Technologies emailed a government manager at the lab where the battery was created. The UniEnergy official said they were making a deal with Vanadis, according to emails reviewed by NPR, and were going to transfer the license to Vanadis.

"We're working to finalize a deal with Vanadis Power and believe they have the right blend of technical expertise," the email from UniEnergy Technologies said. "Our transaction with Vanadis is ready to go pending your approval ..."

The government manager responded that he needed confirmation before transferring the license and emailed a second employee at UniEnergy. The second employee responded an hour and a half later, and the license was transferred to Vanadis Power.

Whether the manager or anyone else at the lab or Department of Energy thought to check during that hour and a half or thereafter whether Vanadis Power was an American company, or whether it intended to manufacture in the U.S., is unclear. Vanadis' own website said it planned to make the batteries in China.

In response, department officials said they review each transfer for compliance and said that new rules put in place last summer by the Biden administration will close loopholes and keep more manufacturing here.

But agency officials acknowledged that its reviews often rely on "good faith disclosures" by the companies, which means if companies such as UniEnergy Technologies don't say anything, the U.S. government may never know.

Joanne Skievaski said she and others from the company repeatedly warned Department of Energy officials that the UniEnergy license was not in compliance.

Jovelle Tamayo for NPR

That's a problem that has plagued the department for years, according to government investigators.

In 2018, the Government Accountability Office found that the Department of Energy lacked resources to properly monitor its licenses, relied on antiquated computer systems, and didn't have consistent policies across its labs.

In this case, it was an American company, Forever Energy, that raised concerns about the license with UniEnergy more than a year ago. Joanne Skievaski said she and others from the company repeatedly warned department officials that the UniEnergy license was not in compliance. In emails NPR has reviewed, department officials told them it was.

"How is it that the national lab did not require U.S. manufacturing?" Skievaski asked. "Not only is it a violation of the license, it's a violation to our country."

Now that the Department of Energy has revoked the license, Skievaski said she hopes Forever Energy will be able to acquire it or obtain a similar license. The company plans to open a factory in Louisiana next year and begin manufacturing. She bristles at the idea that U.S. engineers aren't up to the challenge.

"That's hogwash," she said. "We are ready to go with this technology."

Still, she says it will be difficult for any American company at this point to catch up. Industry trade reports currently list Dalian Rongke Power Co. Ltd. as the top manufacturer of vanadium redox flow batteries worldwide. Skievaski also worries about whether China will stop making the batteries once an American company is granted the right to start making them.

That may be unlikely. Chinese news reports say the country is about to bring online one of the largest battery farms the world has ever seen. The reports say the entire farm is made up of vanadium redox flow batteries.

This story is a partnership with NPR's Station Investigations Team, which supports local investigative journalism, and the Northwest News Network, a collaboration of public radio stations that broadcast in Oregon and Washington state.

BRIGHT AUTOMOTIVE: Another Of The Many American Screwed By Obama To Protect Obama's Political Financiers

Bright Automotive calls it quits after Obama plays favorites | News | heraldbulletin.com

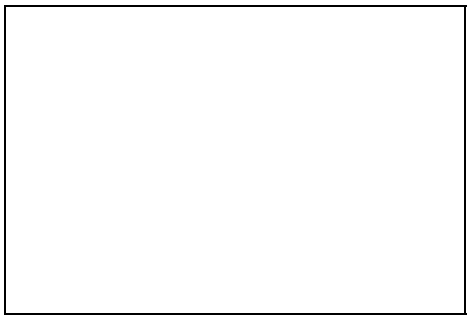
 https://www.heraldbulletin.com/news/business/bright-automotive-calls-it-quits/article_94c92dfa-0702-56eb-ba59-3

Bright Automotive calls it quits By Stuart Hirsch ... **Bright** officials hoped to employ about 200 people at the Michigan facility and 1,000 more at the production site and had touted the IDEA as a

Electric car maker Bright Automotive to shut down after getting lied to by Obama

Katie Fehrenbacher

- Cleantech
- Science & Energy



Another electric car startup, which waited years for a Department of Energy loan, plans to call it quits. According to local media in Indiana (and Green Car Reports) Bright Automotive, which was a spinoff from the not-for-profit think tank Rocky Mountain Institute, and which had been developing a plug-in hybrid car called the IDEA for commercial fleets, plans to close shop.

Despite that Bright Automotive was the first official investment from General Motorâ s venture arm, the company had been developing its business around getting a DOE advanced technology vehicle manufacturing

loan of $450 million. According to a letter sent to the media, Bright Automotive slams the DOE for leading it down a road where it spent three years and $15 million on pursuing a loan that never was delivered.

Bright Automotive isnâ t the only electric automaker that felt confident it had a DOE loan in the bag, yet ultimately never got that loan. In December, electric car startup Aptera also announced that it would shut down after failing to bring in private investment, which was one of the final criteria to secure a DOE loan. Electric car company Coda Automotive had also long said it was waiting for a DOE loan, but has yet to receive one. Norwegian car company Think Automotive also was hoping for a loan to build electric cars in Indiana, but never received it, and went bankrupt last year.

Fisker Automotive did receive a DOE loan award, but after drawing down on part of the loan, was then unable to secure the rest after facing delays for its inaugural car. Battery suppliers to these electric car companies have also struggled as a result of the EV makers struggling â Ener1 went bankrupt after Think went bankrupt and A123 Systemsâ stock has dropped dramatically after Fiskerâ s problems were revealed.

Bright Automotive execs said in a letter published by various outlets that: â Last week, we received the fourth â near finalâ Conditional Commitment Letter since September 2010. Each new letter arrived with more onerous terms than the last. . . .The first three were workable for us, but the last was so outlandish that the most rational and objective persons would likely conclude that your team was negotiating in bad faith.â

Other companies and investors have pointed out the difficult terms of the DOE loans before, including Solyndra investors (after the company went bankrupt) and Beacon Power (after that company suspended operations and was sold to a private equity firm). The DOE seemingly became far stricter in its terms after the solar company Solyndra went bankrupt, taking with it an over $500 million loan.

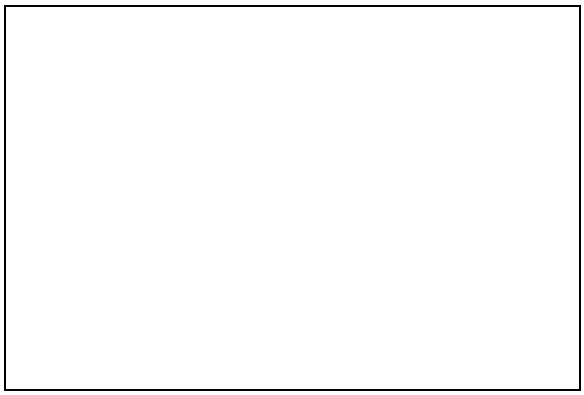
Nick

Whatâ s really too bad is that Bright had some great people behind, mostly engineers from different fields who had worked with different car makers, at one point or another. If anybody was going to pull it off in the long run, these guys would have.

This is a bitter disappointment. I hope to see them back one way or another.

BRIGHT AUTOMOTIVE: Another Of The Many American Screwed By Obama To Protect Obama's Political Financiers

Bright Automotive calls it quits after Obama plays favorites | News | heraldbulletin.com



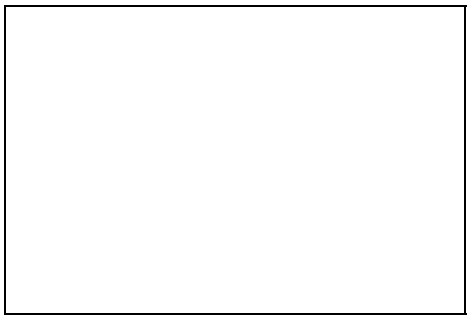
https://www.heraldbulletin.com/news/business/bright-automotive-calls-it-quits/article_94c92dfa-0702-56eb-ba59-3

Bright Automotive calls it quits By Stuart Hirsch ... **Bright** officials hoped to employ about 200 people at the Michigan facility and 1,000 more at the production site and had touted the IDEA as a

Electric car maker Bright Automotive to shut down after getting lied to by Obama

Katie Fehrenbacher

- Cleantech
- Science & Energy



Another electric car startup, which waited years for a Department of Energy loan, plans to call it quits. According to local media in Indiana (and Green Car Reports) Bright Automotive, which was a spinoff from the not-for-profit think tank Rocky Mountain Institute, and which had been developing a plug-in hybrid car called the IDEA for commercial fleets, plans to close shop.

Despite that Bright Automotive was the first official investment from General Motorâ s venture arm, the company had been developing its business around getting a DOE advanced technology vehicle manufacturing

loan of $450 million. According to a letter sent to the media, Bright Automotive slams the DOE for leading it down a road where it spent three years and $15 million on pursuing a loan that never was delivered.

Bright Automotive isnâ t the only electric automaker that felt confident it had a DOE loan in the bag, yet ultimately never got that loan. In December, electric car startup Aptera also announced that it would shut down after failing to bring in private investment, which was one of the final criteria to secure a DOE loan. Electric car company Coda Automotive had also long said it was waiting for a DOE loan, but has yet to receive one. Norwegian car company Think Automotive also was hoping for a loan to build electric cars in Indiana, but never received it, and went bankrupt last year.

Fisker Automotive did receive a DOE loan award, but after drawing down on part of the loan, was then unable to secure the rest after facing delays for its inaugural car. Battery suppliers to these electric car companies have also struggled as a result of the EV makers struggling â Ener1 went bankrupt after Think went bankrupt and A123 Systemsâ stock has dropped dramatically after Fiskerâ s problems were revealed.

Bright Automotive execs said in a letter published by various outlets that: â Last week, we received the fourth â near finalâ Conditional Commitment Letter since September 2010. Each new letter arrived with more onerous terms than the last. . . .The first three were workable for us, but the last was so outlandish that the most rational and objective persons would likely conclude that your team was negotiating in bad faith.â

Other companies and investors have pointed out the difficult terms of the DOE loans before, including Solyndra investors (after the company went bankrupt) and Beacon Power (after that company suspended operations and was sold to a private equity firm). The DOE seemingly became far stricter in its terms after the solar company Solyndra went bankrupt, taking with it an over $500 million loan.

Nick

Biden's tone deaf Energy Secretary Jennifer Granholm insists high gas prices are 'a very compelling case' to buy an electric car: Official is worth $8million and recently exercised $1.6m stock insider trading option in electric car company

- **Granholm, in a clip surfaced Tuesday, made the case for going electric amid sky high gas prices**
- **Granholm and her buddies are all insider traders in GREEN SCHEMES**
- **She decides on government policies that make her rich**
- **Biden should GIVE every American that makes under $60K a FREE ELECTRIC CAR and put chargers in EVERY parking spot in EVERY apartment building if he wants electric cars; otherwise there will never be electric cars in any volume.**
- **'If you filled up your EV [electric vehicle] and you filled up your gas tank with gasoline, you would save $60 per fill-up,' she said**
- **Granholm made similar points in a White House press briefing in May 2021. â If you drive an electric car, this would not be affecting you,â she said then**
- **Granholm, who is worth $8million according to Forbes**
- **Last month she also exercised stock options in Proterra, an electric vehicle company where she served as a director**
- **She ended up pocketing $1.6million on the transaction, according to an energy department spokesperson**

By Stephen M. Lepore

View comments

President **Joe Biden**'s Secretary of Energy Jennifer Granholm became the latest Democratic politician to suggest the solution to high gas prices was to buy an electric vehicle.

Granholm, in a clip tweeted out by the **Republican** National Committee Tuesday, made the case for going electric amid sky high gas prices.

'If you filled up your EV [electric vehicle] and you filled up your gas tank with gasoline, you would save $60 per fill-up by going electric rather than using gasoline but it's a very compelling case, but again, we want to bring down the price at the point of purchase,' Granholm, the former governor of **Michigan**, said.

Her tone deaf rich people comments come as the national average price for one gallon of gas has skyrocketed to over $5.

Granholm made similar points in a White House press briefing in May 2021, according to **Fox News**.

â If you drive an electric car, this would not be affecting you,â she said at the time.

Granholm, who is worth $8million according to **Forbes**, recently served as director of an electric car company - and held millions in the firm's stock.

Last month she exercised stock options in the company, called Proterra, pocketing $1.6million from the transaction, according to an energy department spokesperson.

She's not the first Democrat to encourage people to go electric to solve the crisis at the pump.

Senator and fellow Michigander Debbie Stabenow said last week that record-high gas prices 'don't matter' to her because she has an electric vehicle as she urged Americans to by eco-friendly vehicles and decrease reliability on greedy oil companies.

'On the issue of gas prices â after waiting for a long time to have enough chips in this country to finally get my electric vehicle â I got it and drove it from Michigan to here this last weekend and went by every gas station and it didn't matter how high it was,' the Michigan senator said.

She added: 'I'm looking forward to the opportunity for us to move to vehicles that aren't going to be dependent on the whims of the oil companies and the international markets.'

United States senators make an annual salary of $174,000. Michigan's average household income is $59,234 between 2016-2020.

The average cost of an electric vehicle, according to Kelley Blue Book, is $56,437, which is approximately $10,000 higher than the industry average including cars that are electric and gas.

-

Granholm, who is worth $8million according to Forbes , exercised her stock options in Proterra, an electric vehicle company where she served as a director, in May 2021, pocketing $1.6million, according to an energy department spokesperson

-

The comments come as the Biden administration continues to try to combat skyrocketing inflation

Her remarks were met with fury. Republican Repo. Byron Donalds said: DEMs continue to laugh at the struggles of working-class Americans who are suffering due to Biden's Price Hike. Just look at how happy Debbie Stabenow is when boasting about driving her EV.

'I can assure you Michiganders aren't laughing.'

Some of President Joe Biden's lowest marks are on his handling of gas prices, which the administration continues to dub the 'Putin gas price hike' in an attempt to peg the continually inflating numbers on the war in Eastern Europe.

-

Democratic Michigan Senator Debbie Stabenow said that it 'doesn't matter' to her how high gas prices get because she has an electric vehicle and doesn't have to worry about it

-

Her comments come as the national average price for one gallon of gas is now over $5

Michigan is a battleground state that went marginally red in 2016 for Trump by just 0.3 percent and swung back to blue in 2020, going 50.6 percent for Biden and 47.8 for the former president's reelection.

Stabenow's comments downplaying concerns of Americans who are struggling to afford the $100 plus it cost to fill their cars' gas tanks came during a hearing with Treasury Secretary Janet Yellen about soaring inflation.

The Democratic senator from Michigan is on the Senate Finance Committee, where Yellen was testifying on Tuesday about Biden's Fiscal Year 2023 budget amid record-high inflation.

Soaring gas prices and high inflation for other basic goods have emerged as key issues for President Joe Biden and congressional Democrats ahead of the mid-term elections.

Gas prices have now more than doubled since Biden took office in January 2020, when the national average stood at $2.39.

hare

A recent **ABC News/Ipsos poll** found that 83 percent of Americans say that the economy is either an extremely or very important issue in determining how they will vote in November.

When it comes to economic issues, Biden scores the worst on gas prices, with 72 percent of voters disapproving of his handling of the issue.

Only 27 percent of Americans approve of how Biden is handling gas prices.

The administration continues to call rising gas prices 'Putin's price hike,' and places the blame on the conflict in Eastern Europe.

Republican critics blame Biden's domestic energy policies for a decline in oil production, saying that his administration is waging a 'war on American energy'.

'Joe Biden's war on American energy has forced families across the country to empty their wallets to fill their tanks,' said Republican National Committee Chairwoman Ronna McDaniel in a statement over the weekend.

'Unfortunately, Biden is doubling-down on his disastrous agenda because he's not the one paying the price â the American people are.'

A CGI commitment benefits a for-profit company partly owned by friends of the Clintons.

Julie Tauber McMahon (Credit: Getty Images)

The Clinton Global Initiative (CGI) is a yearly conference connected to the Clinton Foundation that helps inspire and arrange donations to solve problems around the world.

At the personal request of Bill Clinton, the **September 2010** CGI conference sets up a financial commitment to benefit a for-profit company partly owned by people who have ties to Bill and Hillary Clinton. The company, Energy Pioneer Solutions Inc., is a small start-up that has a business plan to insulate homes and let the owners pay through their monthly utility bills. The company is 29% owned by Scott Kleeb, a Democrat who twice ran for Congress from Nebraska; 29% by Jane Eckert, an art gallery owner; 29% by Julie Tauber McMahon, a close friend of Bill Clinton; 5% by Andrew Tobias, Democratic National Committee treasurer and longtime Clinton friend; and 5% by Mark Weiner, a former Rhode Island Democratic chairman, and also a longtime Clinton friend.

Out of thousands of CGI commitments, this is one of only a handful that involve private individuals making a personal financial investment in a for-profit company, instead of donations to non-profits or charities. The commitment is added to a database at the CGI website, but it will be removed several months later.

The *Wall Street Journal* will later report, â The reason was to avoid calling attention to Mr. Clintonâ s friendship with one company co-owner, Ms. McMahon, and to protect the integrity of Mr. Clinton and the Clinton Global Initiative, according to people familiar with the matter.â **Bill Clinton also personally endorsed the company to Energy Secretary Steven Chu, resulting in a $812,000 grant from the Energy Department that year**. The IRS requires that tax-exempt charitable organizations like CGI â must not be organized or operated for the benefit of private interests.â The $2 million commitment is eventually achieved for the company, although itâ s not clear which who gave and by how much. (The Wall Street Journal, 5/12/2016)

In **2014**, it will be alleged in some tabloids that McMahon had a prolonged affair will Bill Clinton, roughly from **2001** until **2013**, but McMahon will deny it and say they are just close friends. (The Daily Mail, 7/25/2014) (Heavy.com, 8/14/2014)

Braidy Industries needs $1.5B from corrupt government ATVM funds for Kentucky aluminum mill

Morgan Watkins, Louisville Courier Journal

CONNECTTWEETLINKEDIN 3COMMENTEMAILMORE

An earlier version of this article incorrectly overstated Braidy Industries' stockholder equity amount.

Building a $1.68 billion aluminum rolling mill touted as the economic savior of Eastern Kentucky requires a $1 billion federal loan, $500 million in credit from the German government and as much as $400 million from a crowdfund-style stock sale over the internet, Braidy Industries says in new financial filings.

The company, partially owned by Kentucky taxpayers, had a ceremonial groundbreaking for its promised Braidy Atlas mill near Ashland this summer. At that event, CEO Craig Bouchard said his company has "support on Wall Street that just generally blows me away."

However, the company still lacks financing to start construction, according to Securities and Exchange Commission filings that became publicly available late Wednesday.

Kentucky taxpayers own an undisclosed percentage of the company thanks to an unusual $15 million direct investment arranged by Gov. Matt Bevin in the closing days of the 2017 legislative session. In addition to the $15 million buy-in, the state has committed $5 million in road-related funding and $2 million for skills training meant to benefit the company. Braidy is also eligible for as much as $15 million in performance-based tax incentives.

Kentucky's direct investment was made contingent on Braidy's investment of at least $1 billion in the mill by mid-2020. If it falls short, the commonwealth can demand repayment.

More on Braidy Industries: Bevin 'unbelievably confident' in CEO with mixed record

From March: Judge rules Bevin administration must name owners of Braidy Industries

The stakes are high for Braidy and its investors, as well as for the people in the Ashland area who have been talking for months about the promised influx of manufacturing jobs. The company has pledged to create at least 550 high-paying jobs through the mill, in addition to hundreds of construction jobs.

"Any failure to raise the necessary capital means that Braidy Atlas will be unable to complete the construction of the mill,â Braidy Industries warned in a stock offering filed with the SEC.

Details of the company's financing and ownership have been shrouded in secrecy, though in SEC filings it disclosed that Bouchard now owns nearly 25 percent of Braidy shares but controls nearly 85 percent of the company through a shareholder agreement that grants him exclusive power to select the company's board of directors.

The commonwealth's stake is not spelled out but does not appear to meet a 20 percent threshold required for reporting by the SEC.

Among other financial dealings noted in the SEC filings:

- Braidy has retained Deutsche Bank as lead credit adviser, but "has no commitments or arrangements with Deutsche Bank or any other party to extend credit to finance the construction of the Braidy Atlas mill."
- The company has applied for up to $1 billion in long-term, low-cost debt financing from the U.S. Department of Energy's Advanced Technologies Vehicle Manufacturing Program. The loan subsidies would run for 10 years.
- The company may ask the German government for as much as $500 million in export credit support â a subsidized loan â to buy mill equipment from a German firm, but has yet to finish that application.
- Before it can borrow enough money to build the plant, Braidy expects it will need to raise $400 million to $500 million in equity capital from other sources. While the company says it is negotiating with investors who might provide millions, most could come by selling shares through Netcapital, an internet-based crowdfunding portal.
- Common stock would be issued at $18 per share, up from $10 in a March 2018 private stock sale.
- Braidy claims it has pre-sold twice the capacity of the mill for its first seven years of operation, but the company told the SEC: â None of the prospective customers who have indicated a desire to purchase aluminum from Braidy Atlas are contractually committed to do so." (Earlier this year, the company said over 160 percent of the mill's capacity was pre-sold to 10 customers it declined to name.)
- The total cost of the mill, initially set at nearly $1.3 billion, is now $1.68 billion.
- The company still expects to begin producing aluminum sheet and plate, primarily for the automotive industry, in 2020.
- Braidy had about $95 million in stockholdersâ equity as of June 30, and reports a net loss of more than $12.8 million since it was created in 2016.
- Bouchard issued a $3,575,000 convertible note to an unidentified third party who has the right to convert that note into shares of Braidy's common stock. No other details of the deal were reported.

Bouchard and his company have declined to share significant details about their business plans, financing and customers in the past due to privacy concerns. While the state is an investor, the privately held company isn't required to share as much information about its inner workings as are corporations with publicly traded stock.

Jaunique Sealey, the company's executive vice president for business development, on Thursday issued a terse statement saying, "As we are currently in an active Reg. CF offering period, the governing SEC rules do not permit us to readily provide comment or give interviews during this window."

Although the company hasn't always been forthcoming with specific details, Bouchard hasn't been shy about forecasting smashing success for his latest venture as well as Kentucky.

"Our mission is not to make aluminum. Our mission is to rebuild Northeast Kentucky, and in fact all of Appalachia and other parts of Kentucky, with advanced technology," Bouchard told the crowd at the mill's June groundbreaking ceremony.

In this week's SEC documents, on its website and in prior comments to the Courier Journal, Braidy has touted Bouchard's prior success, including building three businesses to at least $1 billion in revenue.

Bevin, who secured state investment in the company without telling legislators exactly how the money would be used, also has expressed confidence in Bouchard's ability to deliver, although he acknowledges there are no

guarantees.

"This is a guy who has created jobs and created opportunities, and I look forward to the fact that heâ s going to do it here in this state," Bevin said in January. The governor's office did not respond to a request for comment Thursday afternoon.

Braidy Industries breaks ground on aluminum rolling mill in Kentucky

However, most of Bouchard's past ventures grew through mergers and acquisitions â stitching together existing companies to combine multiple revenue streams to make a single number that might be impressive in size, but isn't always the best measure of long-term success.

A Courier Journal investigation earlier this year found that some of Bouchard's rapid-fire deals left his companies mired in debt and swimming in red ink, no matter how much revenue they made. In some instances, companies foundered after he left.

Acquisitions are now a part of the business strategy for Bouchard's new company.

Braidy Industries announced in March that it had acquired Veloxint, a company founded by Braidy board member and Massachusetts Institute of Technology professor Christopher Schuh that has developed new methods of making strong, lightweight alloys. In SEC documents Braidy described the company as "pre-revenue," meaning it has yet to make any money. It warned that it may have overpaid for Veloxint, saying the company's value "has not been verified."

The SEC filings also show that Bouchard borrowed about $15 million from Braidy Industries to make the Veloxint acquisition, using his Braidy shares as security. About $12 million has been repaid, with the balance expected by year's end.

That month it also announced the completion a $75 million private stock sale, with Bouchard himself buying $18.5 million in shares.

This week, Braidy announced another purchase, shelling out $4.2 million in cash for NanoAL LLC, an alloy-related venture started by faculty at Northwestern University. Like Veloxint, it is also described as "pre-revenue" in the SEC filings.

Public officials at the state and local level have supported Braidy's plan to build in Eastern Kentucky â a region that has hemorrhaged jobs for years amid employee layoffs and business closures. Greenup County Judge Executive Robert Carpenter has called Braidy a "godsend" for his community.

Both Boyd and Greenup counties granted the company a 20-year property tax exemption, though Braidy still is expected to contribute to public schools.

At Braidy's June groundbreaking ceremony at the EastPark industrial park, Ashland-area residents expressed excitement about the potential of the mill.

"It's an exciting moment for this area," said Tom Hilgendorf, of Ashland, in June. "Everybody's been holding their breath, I think, waiting for this moment."

Bouchard acknowledged the high expectations people have for his company and expressed confidence in their ability to succeed despite the tough work ahead.

"We have to execute. We have to prove ourselves. This community has shown the welcome of all time for us," Bouchard said. "We have to earn what they're saying about us, and we're going to do that."

Ashland aluminum rolling mill by the numbers

Braidy Industries has received an unusual direct state investment and other taxpayer subsidies for a planned aluminum rolling mill near Ashland. Here's how the project looks by the numbers:

â º$1.68 billion: Current cost estimate for construction of the planned Braidy Atlas aluminum rolling mill, up from initial estimate of nearly $1.3 billion.

â º$15 million: Total direct investment (so far) by the Commonwealth of Kentucky.

â º$15 million: Future performance-based tax breaks available to the company.

â º$1 billion: Amount of low-cost loans requested from the federal Department of Energy's Advanced Technologies Vehicle Manufacturing Program.

â º$500 million: Potential request for assistance from the German government to buy equipment from a German firm.

â º$401 million: Amount Braidy hopes to raise through online crowdfunding.

â º$556,573: Cost of abandoning an initial South Shore site determined unusable for the mill.

â º$12.8 million: Net loss since the company launched.

â º$1.35 million: Amount spent to acquire land and a vacant building in the EastPark industrial center near Ashland.

â º$29 million: Cost of acquiring Veloxint, a "pre-revenue" Massachusetts research and development firm holding a significant nanocrystalline alloy patent.

â º$4.2 million: Cost of acquiring NanoAL LLC, a "pre-revenue" Illinois aluminum additive company.

â º550: Number of jobs paying an average of $65,000 Braidy has promised to create.

â º54: Number of Braidy, Veloxint and NanoAL employees in Kentucky, Illinois and Massachusetts as of September 18, 2018.

â ºOver 1,000: Most recent estimate of short-term mill construction jobs to be created.

Source: Securities and Exchange Commission filings.

CAPSULE OVER-VIEW

THE XYZ CASE: â THE CLEANTECH-CRASH CRIMESâ

A trillion dollar-plus political corruption case which abused taxpayers nation-wide and the public policy system over-all.

- The victims demand justice and restitution for the fraud, harassment and interference they suffered. These citizens must be compensated for the malicious, proven, retribution tactics, lies, toxic poisonings, vendetta cut-offs of all government benefits, vendetta cut-offs of all employment and revenue sources, interference, "missing hard drives" and interdiction efforts conducted, with applicants own tax dollars, against the applicants. Neither they, their families, staff and associates will rest until justice prevails.

- The public demands the arrest of the corrupt.

- Justice demands resolution or the repercussions will only continue to accelerate and amplify.

This crime continues to this day. The cover-ups continue to this day. The attacks on the victims and losses by the victims continue to this day.

Senators Reid and Feinstein, White House staff and Dept. of Energy executives had insider trading deals with Silicon Valley tech billionaires. They rigged corrupt mineral deals and internet search systems for illegal profiteering. They used Google and Gawker Media to attack witnesses, destroy competitors and rig the news in their favor while exploiting illicit mining and stock market crony corruption deals. The only "Green" thing they were interested in was the cash! They had "hard-wired" the DOE money, in advance, for the campaign financiers and simply used/defrauded the non-crony applicants as a smoke-screen to hide their scam while monopolizing markets in a scheme agreed to with Rahm Emanual, David Axelrod, David Plouffe and their Cartel.

Current Obama Administration agency bosses are refusing to investigate and are, essentially, running Watergate-class cover-ups.

Through over-whelming transparency and evidence aggregation, this project seeks to document the crimes, on public record, on a permanent basis; and, without breaking a single law, terminate the corrupt and their corruption.

CASE EFFECTIVENESS:

First, we established â FOR THE FIRST TIME IN LEGAL HISTORY â that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See Case One, 118 F. Supp. 3d 38, 78â 79 (D.D.C. 2015). Second, we prevailed in the United States Court of Appeals for the District of Columbia Circuit on our appeal of the district courtâ s ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See Case Two, 857 F.3d 379 (D.C. Cir. 2017). The D.C. Circuit agreed with us that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that DOE is now reconsidering the ATVM application under Federal Court order and we are using GAO, FBI and Congressional oversight offices to assure effective ethics and transparency. Third, we placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political "Dark

Money" conduits operate. This prevents the use of those kinds of criminal efforts, in the future, by exposing the tactics to the public. Fourth, Our Team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. Fifth, and most important, we put every corrupt political scheme on notice that they WILL be found out and interdicted!

CASE EVIDENCE PROOF PROVIDED HERE

HERE IS THE PROOF OF THESE CRIMES:

GIVEN THE SAME LEGAL BUDGET AND RESOURCES AS YOU HAVE WE ***GAURANTEE*** TO WIN THIS CASE IN A PUBLIC JURY TRIAL AND/OR A LIVE TELEVISED CONGRESSIONAL HEARING!

.

There are no "conspiracy theories" or suppositions here. This is FBI-Class case evidence, as good as INTERPOL or the CIA can acquire, which will hold up in front of a Grand Jury or Live Congressional hearing to indict and/or imprison the targeted corrupt entities.

A STATEMENT ON THIS CASE:

The U.S. Government intentionally defrauded us out of years of work and our life savings!

We were tricked by false government promises into spending years of our lives and millions of dollars of our life savings and then we, and our peers, were used as a â cover storyâ to operate a criminally illicit â Dark Moneyâ operation.

Senior government officials had full knowledge of, and participated in, a criminal enterprise. They knew, from the start, that the money was covertly hard-wired exclusively to their friends. They then attacked us with â Fusion GPSâ , â Lois Lerner Targetingâ , a tabloid character assassination program and worse things. They attacked us because we properly reported the crime to the FBI and Congress.

The cover-ups of this crime continue to this day.

The failure of the U.S. Government to provide any apology, damages offset or justice in this matter continues to this day.

Almost every taxpaying member of the public supported our efforts and, in fact, provided us with a historically large number of purchasing letters of support which we hand-delivered to Congress. Nobody else was able to do that.

The non-crony major international news outlets, every major industrial publication, most of the non-crony members of the U.S. Congress, and every other non-crony public official confirmed that Part Two of our project was a â goâ . After winning Congressional awards and fully delivering on our previous

government contracts, federal officials asked us to invest our time and money in the federal government and do even more to create domestic jobs and new domestic technology opportunities.

BUTâ ¦

...it turned out that all of the government â decidersâ worked for and owned stock in our arch competitor. The government officials took the money they had promised to us and gave it to their friends, who are our competitors. They gave it to the least qualified party; who also happened to be their buddy and their campaign financiers. They also gave part of the taxpayer cash to some of their friends who immediately filed bankruptcy in order to make huge profits off of tax loss filings and stock market valuation â pumpsâ without ever having to create any jobs or ongoing product deliveries.

We were asked to pay bribes and we refused to pay bribes. We refused to be part of the Silicon Valley â Dark Moneyâ crimes.

It has come down to being forced to seek either justice or revenge.

We have worked with exceptional FBI, GAO, SEC, CFTC, IG and Congressional staff in this matter and we wish to acknowledge their support. Many have seen the recent news head-lines about top-level law enforcement executive firings. Those were the right moves and we wish to confirm the fact that certain public officials continue to stall our justice.

We will not give up. Our Task Force of crime victims, journalists, bloggers, mass data scientists, intelligence specialists and voters is now using 100% legal means to terminate every single crook in this case until we get justice in a resolution where our damages are paid for and the whistle-blower and informant fees we are owed are delivered.

(**Update 1.6)**

We will never forgive and we will never forget until we get justice and recover our damages!!!

SEE THE AWARD WINNING, HIGHLY ACCLAIMED NEW FEATURE FILM ABOUT THESE CRIMES:

*** JOIN THE WORLD'S LARGEST VOLUNTEER CROWD-SOURCED LAW ENFORCEMENT ORGANIZATION. OUR TOP CURRENT CASE: THE DARK MONEY SILICON MOBSTERS

PROOF OF THE FOLLOWING CASE POINTS FOR THE "DARK MONEY" CASE ARE PROVIDED ON THE ASSOCIATED HARD DRIVES:

1. A MAFIA-LIKE "SILICON VALLEY CARTEL" OF ELITIST FRATERNITY-HOUSE MEN EXISTS & OPERATED THIS CRIMINAL SCAM ALONG WITH FAMOUS POLITICIANS

2. SILICON VALLEY VC'S & PAYPAL MAFIA TECH OLIGARCHS ARE RAISED TO BE SOCIOPATHS AND EXHIBIT LAWLESS DERANGED SOCIAL ACTIONS LIKE RAPE, SEX ABUSE, MYSOGYNY, TAX EVASION, RACISM, BRIBERY, THEFT AND OTHER ILLICIT DEVIANCE

3. ELON MUSK & TESLA MOTORS EXIST TODAY BECAUSE OF THEIR COVERT POLITICAL ORGANIZED CRIME ACTIVITIES

4. CA & NY SENATORS & AG'S OPERATED THIS CRIMINAL KICKBACK PAYOLA SCHEME

5. THE OBAMA "CLEANTECH" PROGRAM WAS THE CRIMINAL CAMPAIGN FINANCE SLUSH FUND OPERATION FOR PART OF THESE CRIMES

6. GOVERNMENT OFFICIALS FINANCED & MANAGED POLITICAL ATTACKS ON TAXPAYERS USING A GROUP OF THIRD PARTY CONTRACT HIT-JOB PROVIDERS

7. GOOGLE OWNERS & EXECUTIVES PLANNED & MANUALLY COORDINATED ELECTION MANIPULATIONS, PRIVACY ABUSE & MILITARISTIC INFORMATION RIGGING THAT HARMED THE PUBLIC IN THIS CASE

8. A LARGE NUMBER OF CONNECTED INDIVIDUALS WHO CROSSED THE SILICON VALLEY CARTEL COSA NOSTRA ARE DEAD UNDER SUSPICIOUS CIRCUMSTANCES

9. CA, NY & DC PUBLIC OFFICIALS & LAW ENFORCEMENT EXECUTIVES HAVE ACTIVELY WORKED TO COVER THESE CASE FACTS UP & TO DELAY JUSTICE BECAUSE MONEY FROM THESE CRIMES ARRIVED IN THEIR BANK ACCOUNTS

10. THE REASON GOOGLE EMPLOYEES COMPRISED SUCH A LARGE % OF THE OBAMA WHITE HOUSE & GOVERNMENT WAS TO DEPLOY THIS MASSIVE ORGANIZED CRIME CRONY PAYOLA SCHEME FOR THE SILICON VALLEY CARTEL

11. THE MAJORITY OF THE FUNDS TRANSFERS FOR THESE CRIMES CAME THROUGH "DARK

SILICON VALLEY DARK MONEY MAFIA

The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook,

Amazon, Twitter, Linkedin, etc.) they control. They are sometimes referred to as "The Deep State".

They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control. They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders.

They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, revolving door payola, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts. They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis abusers, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations.

They are not limited to California and also operate out of New York and Washington DC. They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

LEGAL AND PRIVACY

This site is fully EU compliant and seeks to not track you and to protect your privacy and anonymity. Never login uniquely to an online site in order to protect your privacy rights.

This site uses a common shared login for all. Our technology makes everyone in the network anonymous to the network and anonymous to each other using a single common login and particulated torrenting data.

The press clippings here represent hundreds of thousands of news reports, documents and investigation summations related to this case. They were authored by tens of thousands of investigators and journalists who are available to testify to the facts before a jury trial, public congressional investigation or live televised hearing. Every article here has a connection to the case suspects or victims and serves to prove the criminality, modus operandi, culture or damages of the matter. These clippings are in addition to the forensic evidence documents and videos.

GDPR: Not only is GDPR an important step in protecting the fundamental right to privacy for citizens, it also raises the bar for data protection, security, and compliance in the industry. We always protect you. Never track you and support the elimination of sites who spy on citizens and try to manipulate their thoughts.
For more information on GDPR, please visit:
https://ec.europa.eu/info/law/law-topic/data-protection/data-protection-eu_en

This non-commercial, all-volunteer, mesh network, public-hosted, wiki is compliant with EU, GDPR, U.S. First Amendment, Fair Use Doctrine, Freedom Of The Press, SLAPP and related standards.

Google, and the Cartel of companies owned by Google/Alphabet; block, hide, down-rank and DNS dead-stop the articles on this site, and thousands of other news sites, in order to cover up election rigging and corruption crimes that Google/Alphabet undertake. Please help to bypass Google's manipulation of the internet by mass distribution of this data through alternative means.

We placed autonomous monitoring applications on co-location servers, shared hosting ISP's, stand-alone servers and sites around the world over ten years ago and monitored: 1.) Google's search results compared to other search engines, 2.) Google's DNS and spoofing activities, 3.) Google's results on 100 key search terms including search terms of assets, candidates and business associates connected to Google (ie: "Obama", "Elon Musk", "Election Results", etc.), 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated "mole" data that was injected as user data ultimately ended up later, and other metrics. The results prove that Google abuses the market, the public, politics and human rights.

======

Remember that the 'Turing Paradigm' proves that any conceivable encryption technology can be broken into. Don't put anything on a network or electronic device today that you don't want to see on 60 Minutes tomorrow. All a case has to do is ask for the evidence of criminality and some insider will post that evidence on the web because some people still believe in the law..."

YOU HAVE BEEN WARNED:

According to the world's top internet security experts: *"...Welcome to the new digital world. Nobody can ever type anything on the internet without getting scanned, hacked, privacy abused, data harvested for some political campaign, spied on by the NSA and Russian hackers and sold to marketing companies. You can't find a corporate or email server that has not already been hacked. For $5000.00, on the Dark Web, you can now buy a copy of any person's entire dating files from match.com, their social security records and their federal back-ground checks. These holes can never be patched because they exist right in the hardware of 90% of the*

internet hardware on Earth. Any hacker only needs to find one hole in a network in order to steal everything in your medical records, your Macy's account, your credit records and your dating data. Be aware, these days, Mr. & Ms. Consumer. Facebook, Google, Twitter and Amazon have turned out to be not-what-they-seem. They manipulate you and your personal information in quite illicit manners and for corrupt purposes. Avoid communicating with anybody on the internet because you will never know who you are really talking to. Only communication with people live and in-person..."

SPREAD THE WORD. TELL YOUR FRIENDS. COPY AND PASTE THIS TO YOUR SOCIAL MEDIA.

CASE MEMO - Expanded Solyndra/Cleantech Case

Attn: Senior Staff â FBI, GAO, FTC, SS, USG, AG, IG, SE Comm, Congr, POTUS2-Elct, SFPD, NYPD, Opsec2,

Nov. 17, 2016

Action Item: Case Update Investigation Requests

Senior White House Executives and The President of the United States under the Obama Administration are well aware of this case. Some of them engaged in crimes and cover-ups in order to exploit the illicit assets of this case.

Senior executives at The Department of Transportation, The Department of Energy, The Securities and Exchange Commission and some Law Enforcement agencies received profits from the illicit assets of this case and operated stand-downs, reprisal efforts, and cover-ups of regulatory and law enforcement efforts for their own private ends.

Campaign financiers in a Cartel-based association operating in violation of Racketeering RICO laws exchanged cash, stock warrants, prostitutes, revolving doors, internet and media manipulation, and other goods, for government contracts, grants, stock pumps, and federal appointments. This Cartel operated Ener1, Abound, Solyndra, Ivanpah, Severstal, A123, Fisker, Tesla Motors, SpaceX, Solar City, Abengoa, and other facade efforts which stood as fronts for the asset transfers. Key portions of the illicit asset transfers occurred as skims-off-the-top as the money was transferred from the U.S. Treasury to private accounts. Other key portions of the illicit asset transfers occurred as stock market pump-and-dump profiteering under a process that U.S. Treasury inspectors call: *â Unjust Reward Graft by State and Federal Employees...â* .

The Obama/DNC Administration controlled media outlets including: CNN, NBC/MSNBC ,The New York Times, The Washington Post, The Los Angeles Times,Twitter, Google, Linkedin, Facebook, The New Yorker, Salon, Cracked, WIRED, Ars Technica, Vox, Gawker Media, The Verge, TechCrunch, All Disney

Properties, Gizmodo, Univision, Kotaku, All Sony Properties, LifeHacker, Jezebel, All William Hearst properties, San Jose Mercury News, Deadspin, Jalopnik, Reddit.com, The Daily Dot, The Huffington Post, San Francisco Chronicle, MediaMatters, Politico, PolitiFact, ValueWalk, New York Daily News, TIME, Newsweek, Snopes, Motley Fool, Think Progress and related publications. This media control accounted for 95% of U.S. Domestic media impressions at one time and allowed the suspects to avoid news circumspection and to put character assassination and doubt-creation hit jobs on adversaries.

â *Donâ t worry, itâ s green and it will save penguinsâ* - PR was used as a smoke-screen to attempt to lull voters into the typical *â ...move along, nothing to see hereâ* political play-book ploy.

After receiving more taxpayer cash hand-outs than any group in U.S. history, given to the smallest financially connected group, from the same federal administrators, while sabotaging only the competitors of that group, the facade companies all suddenly failed. This has never happened before in the history of America. The evidence points to only one conclusion: An organized crime activity was interdicted and the activity was definitely a felony-class criminal collusion effort.

Silicon Valley oligarchs were the primary instigators and beneficiaries of the scheme. Their leaders included Steve Westly, John Doerr, Eric Schmidt, Larry Page, Steven and Alison Spinner, Elon Musk, Jared Cohen, Steven Rattner, Steven Jurvetson, and related parties.

They used intermediate operations which include In-Q-Tel, Media Matters, New America Foundation, Think Progress, Deloitte Consulting, CBRE, Wells Fargo, Goldman Sachs, McKinsey Consulting and lobbyists to operate their scheme.

Over 980 billion dollars, at a minimum, from the U.S. Treasury has been routed to the bank accounts of the suspects. Including losses from the Afghanistan War, which the suspects held a profiteering interest in, the calculated losses to U.S. taxpayers, to date, exceeds 6 trillion dollars.

Leaks from Jofi Joseph, Wikileaks, Guccifer, Panama Papers, HSBC Swiss Leaks and over 72 similar leaks have now confirmed these facts. Secret Service agents, who stood in the White House observing these actions, have reported their disgust at the corruption. FBI agents, who have investigated these incidents, have reported their disgust at the lack of authorized actions for this case. Over 80 members of the United States Congress have started to demand a Special Prosecutor for the investigation of this matter. Over 1000 witnesses have offered to testify if a credible Special Prosecutor is appointed.

A new Administration has now been elected. The will and the resources to prosecute this case are now in place.

CASE MEMO - Expanded Solyndra/Cleantech Case

Secret Service agents, who stood in the White House observing these actions, have reported their disgust at the corruption. FBI agents, who have investigated these incidents, have reported their disgust at the lack of authorized actions for this case. Over 80 members of the United States Congress have started to demand a Special Prosecutor for the investigation of this matter. Over 1000 witnesses have offered to testify if a credible Special Prosecutor is appointed.

A new Administration has now been elected. The will and the resources to prosecute this case are now in place.

Parents Blame Another Elementary Schoolâ s Cell Tower After 4th Student Diagnosed With Cancer

By Jennifer McGraw

Filed Under: Cell Tower, childhood cancer, san joaquin county, Turlock News

RIPON (CBS13) â A fourth child has been diagnosed with cancer at a San Joaquin County elementary school, and parents believe itâ s because of radiation caused by a cell phone tower.

The towers are spread throughout the community, but itâ s this particular one that parents say needs to go.

â We had a doctor tell us that itâ s 100 percent environmental, the kind of tumor that he has,â said Monica Ferrulli.

Her son Mason was the second child to be diagnosed with cancer in just three years at Weston Elementary. He was 10-years-old and walked by this cell phone tower daily.

â Itâ s indescribable, itâ s really tough,â she said.

â Itâ s one of the hardest things that Iâ ve been through,â said Joe Prime.

WATCH: Caught On Camera: Mom Holds Down 13-Year-Old, Urges Daughter To Fight

Primeâ s son Kyle was the first, diagnosed with kidney cancer in 2016. And two more kids were diagnosed this year.

â It just seems like coincidence is no longer a reason for all this illness,â Prime said.

They believe itâ s this cell phone tower thatâ s harming their kids.

â Kids shouldnâ t be guinea pigs and we shouldnâ t be taking chances with the childrenâ s lives,â Prime said.

The district has had several tests done saying the tower is safe and meets federal regulations. But some families werenâ t convinced and hired an expert.

â I wouldnâ t send my kids there at all, it absolutely is dangerous,â said Eric Windheim, an electromagnetic radiation specialist. â Children are still developing and their cells are still being divided. Itâ s the worst possible time in their life to be exposed.â

He says itâ s not just a cell tower, it also transmits wireless frequencies.

ALSO: Study: Smoking While Pregnant Doubles Risk Of Sudden Death For Babies

â Instead of only going 300 yards like regular Wi-Fi, Y-Max can go 30 miles,â he said.

Parents want the mast removed, but the district wonâ t budge. Parents say the district gets a kickback of $2,000 a month to have the tower for a telephone company, but the district so far has not commented.

â Itâ s a real disappointment that itâ s taking moms of sick children and dads of sick children to come out and say something needs to be done,â Prime said.

Ferrulliâ s son Mason has also since relapsed and is undergoing brain cancer treatments while a fourth child from has recently been diagnosed and taken out of school.

They say itâ s not just a battle now for their children, but a fight these parents say they wonâ t give up.

â Thereâ s a lot of kids that we love that still go to the school, so we are fighting for them,â Ferrulli said.

The district sent out a letter to parents saying that the electric magnetic frequencies are far below federal standards and have completed a thorough investigation and do not have any plans of removing the cell phone tower on campus.

CLAIM: LA's record heat wave was 'compromised' and based on climate fraud designed to benefit Nancy Pelosi's stock market holdings..

MAKE IT YOUR DUTY TO EXPOSE AND BANKRUPT THE CRIMINAL OLIGARCHS OF SILICON VALLEY TECH

BLOCKED FROM OUR RIGHTS TO A FAIR JURY TRIAL AND STONE-WALLED FROM A PUBLIC CONGRESSIONAL HEARING, THIS IS OUR OPEN-SOURCE PUBLIC TRIAL DETAILING ONE OF THE MOST EXTREME CASES OF CORRUPTION IN AMERICA INVOLVING OVER 50 U.S. SENATORS!

THIS IS ONE MIRROR OF A LARGE NUMBER OF SELF-REPLICATING SITES WHICH WILL STAND AS A TESTAMENT AGAINST THE CORRUPTION OF THE TECH OLIGARCHS, CROOKED LOBBYISTS AND DIRTY SENATORS THAT USE OUR DEMOCRACY FOR ORGANIZED CRIME!

HERE IS PROOF, FROM OVER 10,000 INVESTIGATIVE JOURNALISTS AND LAW ENFORCEMENT SPECIALISTS!

These major politicians are getting paid tens of millions of dollars in covert stock market bribes to exploit YOUR knee-jerk reaction to the words: "borders", "immigrants", "climate", "outsiders", "church" and anything else that will set you off emotionally in order to trick you into helping to put money in their bank accounts.

Why do your politicians have tens of millions of dollars of mysterious cash show up in their family bank accounts each year when they are only supposed to get paid $147K per year.

Databases now trace every account they, and their family own. The proof of bribery is in the FBI, SEC,

FTC and OUR reports showing the stock market-based bribes from Google, Tesla, Facebook, etc. Things went from bad to worse when Silicon Valley insiders James Breyer and Gilman Louie roped the CIA into supporting In-Q-Tel (How the C.I.A. morphed into BIG BROTHER). They got the CIA to dump cash and technology into the Palo Alto Sandhill Road good ole boys club of Stanford frat boy sociopaths. This illicit version of the CIA used the access to manipulate the White House, the federal government and California government process ever since. When the good ole boys realized they could use spy-tech to rig elections and stock market valuations they were off-to-the-races and nobody ever questioned it because when you say: "CIA", everybody used to look the other way. Not so much these days, though. Rogue spy operations and fake political "charities" (Like New America Foundation) are the so-called "Deep State". Greylock, Kleiner, Draper, etc.; don't get to do that anymore!

Do your own forensics and don't be suckered by hired actor Senators. They, and their families, own the companies that profit from these MANUFACTURED ISSUES! Vote them out and bankrupt the companies they own the dirty stocks in!

In one example of the depths to which these criminals stoop: After enduring Fusion GPS and Black Cube-type "hit-job" attacks (as described in Ronan Farrow's book: "CATCH AND KILL") and anti-trust violating measures by the tech oligarchs (As shown in the feature film: "THE CURRENT WAR" and the 60 Minutes segments called: "CONGRESS TRADING ON INSIDER INFORMATION" and "THE CLEANTECH CRASH"), the victims said "enough is enough..."

With an idea suggested to the victims by the members of Congress, the victims, essentially; helped the United States government "sue itself"! With encouragement from Congressional staff, they undertook a multi-million dollar, decade-long, epic series of public-interest, anti-corruption lawsuits. The effort was financed by public-interest grants and supported by White House lawyers, Congress and community organizations as an anti-corruption project.

First, with a unique new kind of pioneering federal lawsuit, victims established, in federal court, â FOR THE FIRST TIME IN LEGAL HISTORY â that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case One, (D.D.C. 2015). The victims created new federal law around this.

Second, they prevailed in the United States Court of Appeals for the District of Columbia Circuit on their appeal of the district courtâ s ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, under court order is now re-doing the victims applications and GAO, FBI, IG's and Congressional oversight offices are watching to assure effective ethics and transparency.

Third, these cases placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political West Coast "Dark Money" conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between the victim's competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts, in the future, by exposing the oligarchs tactics to the public.

Fourth, the victim's team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. This included some of the most well-known names in Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by the FBI, GAO, SEC and Congress. In the course of this case, victims campaigned for the new law called THE AMERICAN JOBS ACT which created the first SEC approval of legal "Crowd-Funding", which allowed start-ups

to get funding without going through the Palo Alto "Vulture Capitalists". Eric Holder was the top attorney on the federal side. He was terminated mid-case. Secretary of Energy Steven Chu was sued personally in this case and quit. Rogue CIA outfit: In-Q-Tel, (financiers and technology suppliers to Facebook and Google), were sued and a federal audit of their status was filed for with Congress and they were forced to close their Silicon Valley office. The FBI is still investigating them.

Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!

So what is the status of this legal venture?: The victims group WON on every single aspect of their public-interest litigation goals EXCEPT they STILL have yet to be recompensed for their damages! They continue to fight for their damages compensation from State and Federal ahencies.

IMAGINE LIVING IN A WORLD WHERE ALMOST EVERY ONE OF THE PUBLIC OFFICIALS THAT WERE SUPPOSED TO HELP YOU TURNED OUT TO BE YOUR BUSINESS COMPETITORS. IMAGINE HAVING THEM USE GOVERNMENT RESOURCES TO PROFIT, AT YOUR EXPENSE, BLOCKADE YOU AND TREAT DEMOCRACY LIKE A GARAGE SALE! THIS IS THAT STORY!

This is about a group of U.S. Senators, Silicon Valley Oligarchs and crooked lobbyists who commit crimes in order to manipulate over a trillion State and federal tax dollars into their, and their friends, pockets. They trade bribes in the form of: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

They use digital media monopoly tricks to try to shut out any other viewpoints. They push issues that they believe will get more tax money allocated to "issue solutions" that they, and their friends, happen to already own the business monopolies for. They are felons yet they control some of the offices of the agencies who are supposed to arrest them. Silicon Valley bought K Street lobby firms and U.S. Senators, gave them more Dark Money than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to arrest them.

You can verify the facts yourself in the federal court records of this, and related cases, and in the hundreds of thousands of confirmed-evidence documents at hundreds of thousands of online "dead man switch" self-replicating transparency repositories, around the globe, on the web.

GOT QUESTIONS ABOUT ALL THIS? WE HAVE ANSWERS! SEE THE DETAILS AT:

http://evidence111.com

OVER 120 GOVERNMENT INVESTIGATIONS IN MANY NATIONS ARE NOW IN-PROCESS USING DEEP INSIDE EVIDENCE ON THESE SUSPECTS. THE SUSPECTS WILL EITHER BE TERMINATED OR THEY WILL PAY OUR DAMAGES. THERE ARE NO OTHER OPTIONS NOW AVAILABLE TO THEM. THE BIGGER THEY ARE, THE HARDER THEY FALL!

The following information is from main-stream news outlets corroborated by teams of thousands of researchers, FBI reports and published court records:

A REPORT TO THE FBI, DOJ, SEC, FTC, EU, FTC, AG'S, CONGRESS, AND RELATED AGENCIES.

OUR DEMANDS-FOR-ARRESTS AND DAMAGES RECOVERY

CONGRESSIONAL PAYOLA CORRUPTION - FROM SOLYNDRA TO JEFFREY EPSTEIN

THE ROAD TO POLITICAL BRIBERY & PERVERSION

SUMMARY:

CITIZENS AND INVESTIGATORS HAVE JOINED TOGETHER TO END THESE POLITICAL STOCK MARKET BRIBES, CRIMINAL CRONY PAYOLA SCHEMES AND STATE-SPONSORED ATTACKS ON CITIZENS OPERATED BY THIS CARTEL OF PUBLIC OFFICIALS AND SOCIOPATH TECH-BILLIONAIRES

(Updated Daily On A Crowd-Sourced Basis)

You may have heard about the sex scandals, tax evasion charges, stock market rigging, anti-trust violating rackets, election news shadow-banning, political bribes and vast numbers of other crimes that Jeffrey Epstein, Elon Musk, Larry Page, John Podesta, Reid Hoffman, Vinod Khosla, David Plouffe, Steve Jurvetson, Ed Buck, Tim Draper, George Soros, Jared Cohen, Steve Spinner, David Drummond, Eric Schmidt, Steve

Westly, John Doerr and their associates engaged in. ***"Imagine 300 Harvey Weinstein's and Jeffrey Epstein's! That is The Silicon Valley Mob!"***

Most of the Silicon Valley tech oligarchs and Palo Alto Sandhill Road insiders are: paying bribes to senators and other politicians; sex trafficking; extorting interns; cheating on personal and company taxes, cheating on wives and girlfriends; addicted to drugs and alcohol; beholden to a homo-erotic bromance frat house rape-culture; violating anti-trust laws, black-listing those they do not like "the look of"; racists; misogynists; hiring character assassins and defamation bloggers to attack others; manipulating elections; abusing the private data of the public; sociopaths and a narcissists; sabotaging and spying on his competitors and, generally, elitist criminals.

We have seen, for decades, a loose culture that has enabled white-collar criminals to inflict great damage on the American people and get away with it. Yes, there are exceptions. Going back two decades, the massive accounting scandal at Enron resulted in felony convictions of Kenneth Lay and Jeff Skilling. Lay died before he could be sentenced, but Skilling spent 12 years behind bars. Bernie Ebbers is still in prison for his role in the collapse of telecom giant WorldCom. And, in 2009, Bernie Madoff got a 150-year sentence for the massive Ponzi scheme heâ d orchestrated over many years.

But thatâ s just four people. You know how many people (in this country) went to jail over the near-collapse of the U.S. economy between 2007-09? One. Former Credit Suisse trader Kareem Serageldin got 30 months for artificially inflating the price of subprime mortgages, a financial product at the very heart of the Wall Street collapse.

A judge called Serageldinâ s conduct â a small piece of an overall evil climate within the bank and with many other banks.â And yet no one from any other bank or mortgage company that melted down â including Lehman Brothers, Washington Mutual, AIG, IndyMac and Countrywide, to name but a few â ever went to prison for that â evil.â No one. In 2012, the Treasury Department estimated the total lost household wealth at $19.2 trillion.

Prosecution of white-collar crime has been falling for years. Susan Long of Syracuse University, who tracks this, says **the drop began during the presidency of Barack Obama** (officials are criticized as having believed that executives at big banks were simply â too big to jailâ) and has continued on Trumpâ s watch. â This year, federal prosecutors are on track to bring the fewest number of white-collar criminal cases this year in at least 33 years,â the Syracuse professor, an inductee of the National Freedom of Information Act Hall of Fame, tells me, citing government records.

Perhaps this means financial executives are better behaved? Human nature and greed being what they are makes this unlikely: â I think thereâ s tons more offenses out there than are being prosecuted,â Long says, adding that there are â more crimes out there than there are prosecutors to look into them.â California Senators and Sacramento stooges run rampant in white-collar crime efforts!

You may have seen photo's like this where they "pretend" to be murdering Chicago gangsters and refer to themselves as a "Mafia":

In ***their own emails, texts and recordings*** they refer to collusion, conspiracy and organized crime activities which they plan, among each other, using their K Street lobby offices, Goldman Sachs bundlers and crooked high tech mega law firms to carry out the dirty work, bribes, sex cult/trafficking and black-lists. They are more than collegiate frat house rape-culture residue. They are mobsters in khaki pants. They are sick, sociopath, criminals! They were not just pretending, they were, and are, doing the crimes! These mobsters owned, controlled, staffed, insider-traded, reviewed and directed the **U.S. Department of Energy, The**

If you created a business model and launched it into the market first BUT you donâ t go to the Silicon Valley cartelâ s frat boy parties, sex trafficking dealers, drug dealers, frat houses, bribery lobbyists, corrupt politicians or menâ s clubs, you get black-listed, ostracized, hit-jobbed, attacked, crony blockaded, spied on and IP copied.

The FBI, SEC, FEC, FTC and DOJ should indict them but these sociopath, sex-trafficking, frat boys pay epic bribes to top agency officials in order to avoid prosecution!

These self-aggrandizing, arrogant, elitist, narcissist, TED-addicted, douche-bags are the bane of the world! They must be totally exposed, doxed and indicted!

These are some of the people that conspire; via law firms, lobbyists and Black Cube/Fusion GPS-type operatives, to violate Democracy for their own egotistical perversions. They are enabled by the bubble-like echo-chamber which they create around themselves and their massive wind-fall profits produced by their collusion.

They rationalize their actions by a self-delusional belief in a "greater good" that their investment bankers whisper in their ears. These people have vast multi-million dollar personal PR and hype machine advertising services which have been hired, by each, to promote their image as "tech Jesus's". While each presents a smiley TED-Hype public face, they are funding and directing political attackers, defamation services, Gawker/Gizmodo/Fusion GPS attacks on competitors, character assassinations and other black-tech crimes. Behind the scenes, their deeds are dark and covert

Why won't federal law enforcement arrest them? Because they own people like James Comey, Eric Holder and the top bosses IN THE GOVERNMENT!

SILICON VALLEY TECH BOSSES, AND THE POLITICIANS THEY BRIBE, ARE AN "ORGANIZED CRIME CARTEL"!

Revealed: Corrupt US senators Feinstein, Reid, Pelosi, Harris invest in their friends tech firms that they are supposed to regulate and sabotage their constituent competitors using taxpayer resources!

- FEINSTEIN, REID, PELOSI, HARRIS sabotaged their constituents: ZAP Motors, Aptera, XP, Limnia, Groupon, BizRate and others in order to protect their stock in YouTube, Alphabet, Tesla, Solyndra and other crony insiders! STATE and FEDERAL AGENCY bosses, who also owned the stock in these companies, helped them do it. Federal bosses Steven Chu, Michelle Lee, Steven Rattner were massive stock manipulators and insider trading operators!

- Greedy bitch politicians even hired Fusion GPS, Black Cube and Gawker/Gizmodo Media to run character assassination attacks on their business competitors!

- CALIFORNIA AND NEVADA DEMOCRAT POLITICIANS HOLD THE LARGEST CORRUPT DARK MONEY POLITICAL PAYOLA CONDUIT PAYOLA CIRCLES IN THE WORLD!

- When Feinstein tells Perkins Coie or Covington to *"Kill Them"*...How far will those crooked contractors go?

US Senate

Analysis of financial disclosure data shows 51 senators and their spouses have as much as $96m invested in corporate stocks

As they set national policy on important issues such as climate change, tech monopolies, medical debt and income inequality, US senators have glaring conflicts of interest, an investigation by news website Sludge and the Guardian can reveal. An analysis of personal financial disclosure data as of 16 August has found that 51 senators and their spouses have as much as $96m personally invested in corporate stocks in five key sectors: communications/electronics; defense; energy and natural resources; finance, insurance and real estate; and health.

The majority of these stocks come from public companies, and some are private.

Overall, the senators are invested in 338 companies â including tech firms such as Apple and Microsoft, oil and gas giants including ExxonMobil and Antero Midstream, telecom companies including Verizon, and major defense contractors such as Boeing â in the five sectors as categorized by Sludge.Congressional financial disclosures present investments in dollar ranges, not exact amounts, so all data in this report comes in ranges, some very wide. The median stock investment range in the five sectors for the 51 senators is between $100,000 and $365,000, while the average range of the investments is between $551,000 and nearly $1,874,000.

Not only are the senators far wealthier than most of their constituents, but theyâ re in a prime position to increase their wealth via policymaking.

Itâ s not illegal for members of Congress to have personal financial stakes in the industries on which they legislate. But such investments raise questions about lawmakersâ motivations. If a representative on the House financial services committee owns hundreds of thousands of dollars worth of stock in Bank of America, how might this investment affect their questioning of Bank of Americaâ s CEO in a hearing? Could

it influence how they legislate and vote on banking issues?

While some members of Congress do try to limit possible conflicts of interest others claim their personal finances could never influence their conduct as elected representatives of the people, or fail to acknowledge concerns about their finances.

Senator Joe Manchin, the ranking member on the Senate energy and natural resources committee, owns between $1m and $5m worth of non-public stock in his family coal business, Enersystems, making him the only Democratic senator who is directly profiting from the environmentally devastating coal business.

Despite pressure from the left, the Senate minority leader, Chuck Schumer, made Manchin the ranking member of the committee, and Manchin did not divest his coal holdings.

Some senators want to do away with these perceived conflicts of interest. Senator Elizabeth Warren introduced anti-corruption legislation in August 2018 that included a ban on members of Congress, senior congressional staff, cabinet secretaries, White House staff, federal judges and other officials from owning individual stocks, bonds, commodities, futures and other types of securities while in office.

The senators Sherrod Brown and Jeff Merkley introduced the Ban Conflicted Trading Act in December to prevent members of Congress and senior staff from trading individual corporate stocks.

Financial firms lead the way

Senators own between $28.1m and $95.6m worth of stock in the five sectors examined by Sludge and the Guardian. They have the most money invested in the finance, insurance and real estate sector due in part to the Republican senator John Hoevenâ s investment in Westbrand, Inc, a private holding company that owns multiple banks, worth between roughly $5m and $25m.

Altogether, 37 senators and their spouses own between $12.8m and $48.2m worth of stock in the finance, insurance and real estate sector. They have the most money invested in the commercial banking industry, between $8.3m and $32.9m.

Senator Richard Shelby, a Republican member of the Senate banking, housing and urban affairs committee, owns between $1m and $5m worth of stock in private real estate insurance firm Tuscaloosa Title Company. Shelby sits on the housing, transportation and community development subcommittee, which has jurisdiction over the US Department of Housing and Urban Development, affordable housing, foreclosure mitigation and other housing matters, and the securities, insurance and investment subcommittee, which oversees the insurance industry.

The same phenomenon of senators owning stock in industries they oversee exists in many other Senate committees.

Senators have between $8.3m and $22m invested in the communications and electronics sector, including up to $4.2m in internet companies and as much as $4.1m in computer software businesses. Senator Shelley Moore Capito, a member of the commerce, science, and transportation committeeâ s subcommittee on communications, technology, innovation and the internet and the subcommittee on manufacturing, trade and consumer protection, owns between $53,000 and $194,000 worth of Microsoft stock, as much as $99,000 of Intel stock and up to $30,000 each in AT&T and Verizon stock.

Senator Jacky Rosen, who is also on both subcommittees, owns between $310,000 and $1m worth of communications and electronics stock. Her largest potential investments are as much as $265,000 in Amazon, up to $115,000 in AT&T and $100,000 in software company Adobe.

Energy and natural resources companies come up frequently in the senatorsâ investments; members own between $3.5m and $13.9m in stocks in this sector. As the world hurtles towards a potential climate catastrophe by 2030, senators own as much as $6.1m worth of stock in oil and gas companies. In addition, members have between $1.1m and $2.8m invested in electric and natural gas utilities stocks.

Tech stocks are most popular

While the financial sector has drawn the most investment dollars from senators, stocks in the internet and computer software and hardware industries are the most popular.

Fifteen senators own stock in Apple and in Microsoft; eleven are invested in Amazon and in Intel, and 10 own stock in Googleâ s parent company, Alphabet.

Republicans tend to be more eager to invest in corporate stocks; of the 25 most popular public stocks, Democrats invested outnumber Republicans in only three companies: General Electric, MetLife, and Pfizer. (General Electric is classified in the energy and natural resources sector for this report, due to its energy subsidiary, GE Power, which operates an oilfield services division.)

Overall, Republican senators own more in stock investments â between $18.8m and $63.7m â than Democrats, whose stock ownership is worth roughly half of that range, between $9.3m and $31.6m.

Aside from the Wireless Telecom Group, in which Senator Rick Scott of Florida has as much as $3m invested, the top public stocks by investment amount are Apple (between $798,000 and $2.2m), Microsoft ($588,000 to $2.2m), and Alphabet ($577,000 to $1.8m). Ownership in Amazon, which is vying for a $10bn defense contract, is not far behind at between $423,000 and $1.3m.

Wells Fargo, the financial giant that has paid numerous fines for its frequently fraudulent practices, is the bank that has attracted the most investment dollars from senators: as much as $1.5m. Also among the top stocks are telecom companies Crown Castle International ($385,000 to $1.2m), Verizon ($407,000 to $1m), and AT&T ($250,000 to $925,000).

Breaking down the Senatorsâ wealth

Because of Hoevenâ s big investment in Westbrand Bank Holding Company, he has by far the most money in corporate stocks from the five sectors analyzed by Sludge and the Guardian.

In terms of total stock ownership in the five sectors, Senator Dianne Feinstein, who along with husband Richard Blum, an investment banker, is second, with up to $7m invested in the five sectors. Blumâ s purchase of as much as $250,000 worth of Facebook stock three months before his wife questioned the Facebook CEO, Mark Zuckerberg, came under scrutiny after Sludge reported the trade. He has since sold off the stock, but the couple still owns up to $3.3m worth of communications and electronics sector stock, which is heavily represented their state of California, including between $150,001 and $650,000 invested in Alphabet.

Feinstein is followed by Senator David Perdue, who owns as much as $6.4m invested. In addition to his considerable financial sector stock, the former Dollar General CEO has stock holdings worth as much as $2.8m in the energy and natural resources sector and up to $2m in the communications and electronics sector.

YOU CAN'T FIGHT CORRUPTION IF ***YOUR OWN POLITICAL OFFICIALS ARE THE CORRUPTION!***

This article was produced in partnership with Sludge, an investigative news website focused on money in politics. Sludge is funded by donations from its readers and supporters.

The Silicon Valley Illuminati Use Gawker Media, Gizmodo Media and Jalopnik To Character Assassinate Business Enemies And Political Adversaries In The Most Evil Manners Possible

Journalism has taken quite a beating since the turn of the century. This is true on the business side of the equation and regarding its reputation as a non-biased source of information. The adversarial relationship between the president and the Fourth Estate has not dissipated since Donald J. Trump was sworn in on Jan. 20, 2017. And a good argument could be made that itâ s gotten even more ugly in the public square. This war of words has turned into an all-out frontal assault on those the legacy press perceives as its enemy: the political right. So, itâ s worth checking in on the state of the battle. Whoâ s winning? Whoâ s losing? And perhaps more significantly: How effectively is the war being waged?

The Bloody Inkwell

Itâ s not difficult to determine who is being targeted. The legacy press has set its sights on the right, but within that category the Illuminati are gunning for three types of adversaries: well-known conservative individuals, large and small organizations, and public citizens. As for the how, the big-city scribes have chosen the sniper attack as their primary operational-tactical strategy. That is, establish a cover position, lie in wait, and pick off the enemy one by one.

Historically, the chief business of newspapers and television networks has been the peddling of information. Now that the media elites are locked in a battle for their very existence, their *raison dâ Ãªtre* has morphed into political advocacy. Trafficking in defamation, innuendo, half-truths, and more, the Fourth Estate has been working overtime to slay those it perceives to be the lurking conservative beasts. This poison-pen approach has resulted in nothing less than a toxic political atmosphere where all bets are off. And frankly, itâ s getting bloody out there.

Here are but a few illustrations:

Number 1. The Well-known Individual: The recent *New York Times* allegations against Supreme Court Justice Brett Kavanaugh are a prime example. Guns ablaze, the Old Grey Lady published an article regarding an allegation of sexual misconduct that is not new. Itâ s been reported the FBI may have known about it, but with a victim who was not prepared to go on the record, nothing came of it. And why should it? The â victimâ says she doesnâ t even remember the â sexual advanceâ by Kavanaugh involving his male anatomy. A fact omitted, incredibly, by *The Times*.

But that didnâ t stop the *NYT* from igniting a media frenzy with innuendo and scurrilous defamatory accusations. â This is just one more nail in the coffin of The Grey Ladyâ s credibility,â wrote ***Liberty Nationâ s*** chief political correspondent Graham Noble. â It also exposes this new assault on Kavanaugh for what it is: a politically motivated smear, the ultimate aim of which is to prevent the Supreme Court issuing opinions influenced by conservative or originalist thought â particularly on the subject of abortion.â

Kavanaugh is merely one of many well-known individuals who have been targeted by the Fourth Estate. Advocacy journalism was responsible for Stephen Moore stepping down from a nomination to the Federal Reserve Board. Moore went on *Liberty Nation Radio* and said his wife and family couldnâ t take the barrage of negative stories about him day after day for things he posted on social media in jest.

Then thereâ s former Secretary of Labor Alexander Acosta, who was chased off after the media transferred responsibility for the Jeffrey Epstein affair to him. And although it went unsaid, one must figure that a big part of former Press Secretary Sarah Sandersâ resignation â following media hounding of her family in public places â was prompted by incessant political attacks from a vicious and rancorous media. And there are oh so many more.

Number 2. Small Groups: Is there anyone out there who remembers the IRS scandal under the venomous talons of Lois Lerner? The scheme targeted the 501(c)3 tax-exempt status of small groups. As reported previously by ***Liberty Nation***, â These fledgling organizations were essentially put through a bureaucratic wringer that included â long delays in getting approvals, and some faced the same kinds of intrusive questions about donors, personal beliefs and even their activities at their unrelated jobs.â â Initially ignored by the media elites, this scandal succeeded in shutting down hundreds of conservative voices â including ***LNâ s*** parent organization â until the revolting practice bubbled to the surface in a class-action suit filed â and ultimately won â by the persecuted. What was the legacy mediaâ s role in all this? It was two-pronged: disregard and deny.

Not giving this scandal the requisite ink such an atrocity deserved wasnâ t enough. Next came the effort to deny the *existence* of the targeting altogether. *Newsweek*, for instance, republished an article titled â Remember the IRS Scandal? It Was Fake News All Along.â While the big publishers and networks werenâ t behind this misconduct by Lerner and her henchmen, they certainly didnâ t bring their power and influence to bear in helping correct it. In the words of the brilliant legal mind of Alan Shore from *Boston Legal*, â All it takes for evil to succeed is for good people to say, â Itâ s a business.â â Circulation, ratings, numbers are the name of the game.

Number 3. We, the People: A popular meme shows President Trump pointing his finger like Uncle Sam and saying, â In reality, theyâ re not after me. Theyâ re after you. Iâ m just in the way.â Perhaps the reason for its popularity is that there is some truth to it.

All those deplorable hillbillies out there in fly-over country are fair game for the big-city news outlets. Some may remember an article published by a member of the well-dressed elite media. *Vogue* printed an article attacking white women who voted for Trump. â As sure as black women have proven themselves to be the often-underappreciated backbone of the Democratic party, white women voters are establishing themselves as maddeningly, confusingly â ¦unsisterly.â Without a doubt, those white female Trump voters took a nasty public beating for quite a while.

Much like in the IRS scandal, the advocacy media used tactics attacking those with whom they politically disagreed and then denied the existence of the underlying story altogether. In October 2018, *Time* magazine published an article titled â Donald Trump Didnâ t Really Win 52% of White Women in 2016.â

Whatever.

A Venomous Revolution

An information revolution is without a doubt underway, and those in the press who were the sovereign lords for so long see their influence slipping away like sand through an hourglass. In their desperation, they use every unscrupulous means possible to take down their conservative adversaries. Left in the wake of this conflict are conservative individuals, organizations, and average citizens, the casualties left to lie in a pool of disparagement, insinuation, implication, allegation, and innuendo.

How much longer will this last? That, dear readers, may depend upon whether the American people buy what the legacy media sell. Perhaps the American elite press is putting all its money on the words of one of its most illustrious scribes. It was H.L. Mencken who said, â Nobody ever went broke underestimating the intelligence of the American public.â Or just maybe the final act in this war room will be the words of Anonymous: â Sometimes, itâ s best to sit back, let someone underestimate your intelligence, and watch them hang themselves.â

At one time these men owned the U.S. White House, their associates and employees staffed it and history has proven that 100% of federal policies at the time benefited their stock holdings and harmed their competitors, almost exclusively. It was Tammany Hall on an epic scale. Gary D. Conley, Seth Rich, Rajeev Motwani, Tom Perkins, and hundreds of others knew their secrets and turned up dead.

Dozens of rich and influential tech men surrounded Jeffrey Epstein. They knew that what they were doing was wrong. That's why they were so secretive about it.

Driving the news: In the aftermath of a blockbuster report from The New Yorker's Ronan Farrow â which details that MIT Media Lab's director Joi Ito flew to Epstein's private island twice and accepted more than $8 million of donations from him â Ito resigned on Saturday from MIT Media Lab, left his board seat with the New York Times Company, and resigned from the MacArthur Foundation. This is only the beginning of the fall of EVERY one of these collusion-based crooks that manipulated our government and public decency.

- **Leon Black** remains the chairman and CEO of private equity giant Apollo; he's also the chairman of the board of the Museum of Modern Art. Black donated $5.5 million to the Media Lab at Epstein's behest, on top of a $10 million donation that he made directly to Epstein's own foundation in 2015.
- **Bill Gates** donated $2 million to the Media Lab in October 2014; Ito claimed at the time that the gift was "directed by Jeffrey Epstein". Gates asked that his name be kept out of any public discussion of the donation.
- **Reid Hoffman**, the venture capitalist and founder of LinkedIn, hosted dinners for Epstein featuring the likes of Elon Musk and Mark Zuckerberg. He also sits on the jury of the Media Lab's Disobedience Award. (Epstein received an orb, which looks exactly like the Disobedience Award, for his service to the Lab.) When author and fellow juror Anand Giridharadas raised questions about the award's ties to Epstein, Fat Reid Hoffman (a Silicon Valley "Godfather") was the man who slapped him down.Hoffman covertly finances and runs some of the largest radical media groups in America.
- **Outside the Media Lab** there are many other names. The UK's Prince Andrew was close to Epstein both before and after Epstein's conviction, as was lawyer Alan Dershowitz. There are multiple connections between Epstein and Harvard, including a "special connection" with Cheryl Sandberg's mentor: Lawrence Summers. Naturally there are massive ties to Bill Clinton, too.

Epstein's enablers flew on his jets and visited his island and did multi-million-dollar deals with him even after he was convicted and jailed on a charge of soliciting underage girls for prostitution. Now they are starting to be held to account for their complicity.

None of these men are giving straight answers to questions about their involvement with Epstein. Black and Gates, in particular, are not explaining why they gave millions of dollars to the Media Lab in secret, with Epstein claiming full credit for those donations.

The bottom line: Epstein abused children, ruining dozens or even hundreds of lives while consorting merrily with his plutocratic friends. Those friends might have looked the other way at the time, but now â finally â they're beginning to be held accountable. They will be ground into the dirt for their crimes against children and the public, in general!

GOT 'EM!

TODAY, MODERN A.I. SERVER ARRAY'S ARE TAKING ANY TWO, SEEMINGLY INSIGNIFICANT, DATA POINTS ABOUT EACH ONE OF THESE CORRUPTION TARGETS, RAPIDLY SCANNING EVERY DATABASE, SOCIAL MEDIA SITE AND INVESTIGATION ARCHIVE IN THE WORLD AND BUILDING A MULTI-HUNDRED PAGE DOSSIER ON THEM, THEIR BRIBES, THEIR TAX EVASIONS, THEIR SECRET ACCOUNTS, THEIR PHOTOS WITH SEX PROVIDERS, THEIR STOCK MARKET PAYOLA, THEIR REAL ESTATE SCAMS, THEIR FAKE "CHARITIES" AND MORE. THAT INFORMATION IS FORWARDED TO EVERY LAW ENFORCEMENT, REGULATORY AND INVESTIGATORY ORGANIZATION IN THE WORLD!

Here, below, are hundreds of thousands of pages of proof and hundreds of hours of video showing the indisputable facts. So far, almost every politician that has said that these crimes "*did not happen*" has turned out to be participatory in the crimes and reaping profits from the corruption in the crimes. The politicians and their campaign financiers are mercenary pigs who use spying, privacy abuse, stock market rigging and information manipulation to abuse the public that they care nothing about. You, the voters, are just meat for their digital data factories. They must be exposed, charged and bankrupted by revealing all of the covert tricks of their crooked law firms, lobbyists and hit-job media assassins.

The Silicon Valley oligarch's have based their power on their sick fantasy that they can spy on the public, manipulate elections and freely engage in sexual perversions without consequences. They are wrong!

Federal Judge: Facebookâ s View on Privacy Is â So Wrongâ As Facebook Shown To Be Giving Voter Data To Political Party Bosses, Just Like Google Does!

These facts have been proven in court, Congressional hearings, FBI, EU and FTC reports.

Google now the target of over 50 massive new U.S. antitrust and corruption probes initiated by our whistle-blower group

- Google lies to the public and to federal regulators about what it is actually doing

- Google uses a corporate cell-structure in-house system, just like a terrorist group, to keep Google executives insulated from disclosure, lawsuits, sex charges, tax evasion discoveries, real estate scams and other illicit deeds

- Google paints a crunchy granola facade image of "*helping the world*" when, in actuality, all it does is abuse the public and destroy competitors using spy-craft anti-trust methodologies

- Google does not just control Google properties, it controls the entire internet and Google decides what is seen on the whole web, and what is hidden, based on it's executives peccadilloes

by Reuters

Our team is directly providing evidence to the FBI, FTC, SEC and more than 30 U.S. state attorneys general who are readying an investigation into Alphabet Inc's Google for potential antitrust violations, a source knowledgeable about the probe said.

Our campaign to expose the Silicon Valley Cartel's crimes, particularly those of Google, are showing fruition. We have been delivering hundreds of thousands of pages of evidence proving that Google bribes politicians, shadow-bans the news, rigs elections, runs sex trafficking executive rings, tax evades, spies on the public, attacks competitors and other crimes.

Texas leads the group of 30-plus attorneys general, which plans to announce the probe on Sept. 9, the source said.

Google said that it was cooperating with the state officials.

"We continue to work constructively with regulators, including attorneys general, in answering questions about our business and the dynamic technology sector," Google representative Jose Castaneda said.

The probe is focused on the intersection of privacy and antitrust, according to the source, who did not elaborate.

Ken Paxton, the Texas attorney general, filed comments along with 42 other state officials in June that urged the Federal Trade Commission to focus on privacy and data collection in investigating potential violations of antitrust law.

In the comment, the state officials argued that the big tech firms have so much user data that it is hard for newcomers to compete.

Another Texas official, Assistant Attorney General Jeff Mateer, alleged in an FTC hearing in June that Google and other big tech companies were misleading in representing themselves as neutral, citing Google's balking at carrying an ad about "what it means to be an American, the Texas attorney general's office said in a statement in June. Google eventually relented on the ad, the statement said.

The tech giants, among the richest and most powerful companies in the world, are facing increasing antitrust scrutiny from Congress, federal agencies and now state attorneys general.

The Justice Department said in July that it was opening a broad investigation of major digital technology firms, focusing on whether they engage in anti-competitive practices. The investigation is believed to be aimed at Google, Amazon.com Inc and Facebook Inc, and potentially Apple Inc .

Separately, the Federal Trade Commission, which also enforces antitrust law, is also probing Amazon and Facebook to determine if they abused their massive market power in retail and social media, respectively.

The Washington Post was the first to report the development on Tuesday.

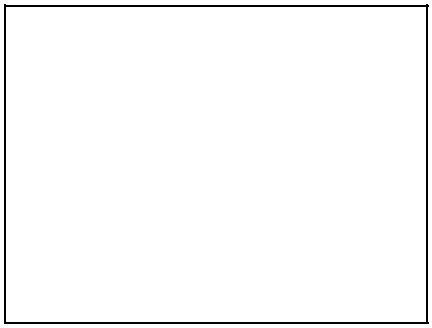
(Reporting by Diane Bartz in Washington and Ayanti Bera in Bengaluru; Additional reporting by David Shepardson in Washington; Editing by Shailesh Kuber and Lisa Shumaker)

Corporate fake news networks and collusion-based law enforcement insiders stonewall our case. We are the public and we will NEVER give up, though. We demand that the U.S. Government provide our justice and our damages payments!

We discovered that most politicians, particularly those in California, are hired 'actors' covertly working for corporations and billionaire sociopaths. They have few skills aside from feigning interest and glad-handing. Their campaign managers are primarily criminal-type people whose job it is to rig the hidden political payola and take the fall. They will lie and embezzle as much cash as possible, via government agency "slush-funds", as covertly as possible. The motto of the campaign manager is to *"lie and win and pay for the crime after you get control of the office"*. They hide their crimes with plausible deniability and financial records manipulation. Politicians get paid an average of $150K per year in salary and $50M+ in ***bribes***.

Jeffrey Epstein was a member of a cult of sociopath frat-boy business men addicted to political power and sexual deviancy.

In one example; Solyndra was a crony political payola operation led by Brian Harrison, a veteran of Intel Corporation. He took the reins on July 27, 2010, when founder Chris Gronet was replaced as CEO.[13] Major investors included the "Tech Mafia" of George Kaiser Family Foundation, U.S. Venture Partners, CMEA Ventures, Redpoint Ventures, Virgin Green Fund, Madrone Capital Partners, RockPort Capital Partners, Argonaut Private Equity, Masdar and Artis Capital Management.[14]



These people, and these kinds of operations, typify the extremist, sociopath, sex-addicted cult of the high tech political power mongers who live by bribery and crony payola. They are ALL connected. Why was Elon Musk involved with all of these people? Why were these men so driven to manipulate elections and public news media? The premise of their cult reveals the truth about who, and what, they are!

Solyndra received a $535 million U.S. Department of Energy loan guarantee, the first recipient of a loan guarantee under President Barack Obama's economic stimulus program, the American Recovery and Reinvestment Act of 2009. However, Solyndra officials used inaccurate which White House staff knew of, to help mislead the public in its application.[16] The overall loan program took a $528 million loss from Solyndra.[17][18] Additionally, Solyndra received a $25.1 million tax break from California's Alternative Energy and Advanced Transportation Financing Authority.[19] Solyndra was not a unique case for the U.S. Department of Energy because Tesla also got a cash give-away from insider friends.[20]

Following the bankruptcy, the government was expected to recoup $27 million under the Solyndra

restructuring plan, or up to 100% of loaned funds from a $1.5 billion lawsuit filed against Chinese solar-panel makers for alleged price fixing.[2] The outcomes of the lawsuits were that, in November 2015, Yingli Green Energy Holding Co Ltd. settled a claim filed by Solyndra for $7.5 million, and in April 2016 Trina Solar Ltd. settled a claim filed by Solyndra for $45 million. In June 2016 a Stipulation Of Dismissal was filed jointly between Solyndra and Suntech Power Holdings Co Ltd. and later signed by Hon. Saundra B. Armstrong on November 30, 2017 .[21]

On November 3, 2010, Solyndra said it would lay off employees and not renew contracts for workers .[22]

Solyndra facility in Fremont with a "For Sale" sign in September 2012. Seagate purchased the facility in 2013.

On August 31, 2011, Solyndra announced it was filing for Chapter 11 bankruptcy protection, laying off 1,100 employees, and shutting down all operations and manufacturing.[26]

In September 2011 the company ceased all business activity, filed for bankruptcy under Chapter 11, Title 11 of the United States Bankruptcy Code, and laid off all employees.[2][3][27] The company was also sued by employees who were abruptly laid off.[28] Solyndra was raided by the FBI investigating the company.[29] Federal agents visited the homes of Brian Harrison, the company's CEO, and Chris Gronet, the company's founder, to examine computer files and documents.[30] Also, in September 2011, the US Department of the Treasury launched an investigation.[31] Bloomberg reported in 2011 that Solyndra's $733 million plant had whistling robots and spa showers, along with many other signs of extravagant spending.[32]

Also in 2011, a US Department of the Treasury official confirmed that the criminal probe of Solyndra was focused on whether the company and its officers misrepresented the firm's finances to the government in seeking the loan or engaged in accounting fraud.[33] Emails showed that the Obama administration had concerns about the legality of the Department of Energy's loan restructuring plan and warned OMB director Jeffrey D. Zients that the plan should be cleared with the Department of Justice first, which the Department of Energy had not done. The emails also revealed that, as early as August 2009, an aide to then-White House Chief of Staff Rahm Emanuel had asked a Department of Energy official if he could discuss any concerns among the investment community about Solyndra but that the official dismissed the idea that Solyndra had financial problems.[34] The bankruptcy court approved the hiring of the chief restructuring officer Todd Neilson.[35] Rocket Renewables (rocketrenewables.com) incorporated in Delaware[36] with Gronet as the President and CEO.[37] On May 20, 2013, Rocket Renewables filed for a corporation license in California.[38]

In 2012 a very small fraction of the glass tubes, which Solyndra had produced, became part of an art installation at the University of California Botanical Garden.[39] Also in 2012, the US Department of Justice objected to the bankruptcy plan amid allegations that "the plan's primary purpose is tax avoidance through the preservation of hundreds of millions of dollars of net operating losses (NOL) after reorganization".[40][41] Also, the successor company is named 360 Degree Solar Holdings, Inc., which would have control over "approximately US$350 million in tax attributes", such as NOL carryovers.[40] The case *In re Solyndra LLC et al.,* No. 11-12799 (Bankr. D. Del.), discused tax avoidance. [27] "Solyndra's owners, Argonaut Ventures I LLC

and Madrone Partners LP" will "realize the tax benefits of between $875 million and $975 million of net operating losses, while more senior creditors, including the Department of Energy, which provided a $535 million loan guarantee to Solyndra, will receive nearly nothing."[27]

In 2011 and 2012, during Obama's re-election campaign, the political advocacy group Americans for Prosperity spent $8.4 million in swing states on television advertisements denouncing the loan guarantee.[2]

Tesla and Solyndra were neighbors, and had the same politicians (mostly Feinstein) who promoted the funding of each, blockaded their investors and owned stock in them and their suppliers and share the same investor stock pools.

In 2013, Elevated Design LLC filed as a domestic in California. Gronet became an officer of Elevated Design LLC. This filing was canceled sometime later.[44] The *Contra Costa Times* reported that Gronet was unlikely to face criminal charges in connection with Solyndra.[45] In August 2015, the Inspector General of the U.S. Energy Department put most of the blame for the incident on Solyndra.[46][47] On March 21, 2016, Gronet incorporated a company named 4th-Phase, Inc., doing business as 4th-Phase Washington, Inc., in Delaware.[48] Gronet also became an advisor to Global Water Innovations, Inc., which was founded in May 2016.[49]

Silicon Valley's JPMorgan and Goldman Sachs Rare Earth Metals Trading Desk is A Criminal Enterprise for Silicon Valley Oligarchs

- SOLYNDRA USED IT FOR INDIUM METALS, TESLA USED IT FOR LITHIUM AND COBALT METALS
- HIGH TECH PRECIOUS METALS IS THE TRILLION DOLLAR CRIME OBAMA'S FINANCIERS WERE BETTING ON

Who would have thought that JPMorgan's precious metals trading desk is the functional equivalent of the mafia, and that its one-time leader, Blythe Masters, was the mafia's don?

Well, almost everyone who didn't mind being designated a conspiracy theorist for years. And now comes vindication, because this has just been confirmed by the DOJ, which accused the PM trading desks at JPMorgan of being deeply involved in what prosecutors described as a "**massive, multiyear scheme to manipulate the market for precious metals futures contracts and defraud market participants."**

In an indictment unsealed on Monday morning, the DoJ charged Michael Nowak, a JPMorgan veteran and former head of its precious metals trading desk and Gregg Smith, another trader on JPM's metals desk, in the probe. (Blythe Masters was somehow omitted).

â Based on the fact that it was conduct that was widespread on the desk, it was engaged in in thousands of episodes over an eight-year period -- that it is precisely the kind of conduct that the RICO statute is meant to punish,â Assistant Attorney General Brian Benczkowski told reporters.

Here's where it gets extra interesting: according to Bloomberg, **the unusually aggressive language language embraced by prosecutors reminds legal experts of indictments utilizing the RICO Act - a law allowing prosecutors to take down 'criminal enterprises' like the mafia** by charging all members of the organization for any crimes committed by an individual on behalf of the organization.

Prosecutors charged the head of JP Morganâ s global metals trading operation and two other traders with "conspiracy to conduct the affairs of an enterprise involved in interstate or foreign commerce through a pattern of racketeering activity" - language that is typically used to describe a RICO charge.

This hints at the possibility of a deeper prosecution for JP Morgan. Already, 12 people have been charged in the precious metals market-rigging conspiracy.

> "Weâ re going to follow the facts wherever they lead, whether itâ s across desks here or at any other bank or upwards into the financial institution,â Benczkowski said.

It's unclear what the DoJ is planning, but they're clearly keeping their options open.

Circling back to the indictment, **both Smith and Nowak were put on leave over the summer as the DoJ's investigation neared its conclusion**.

A third trader named in the indictment, Christopher Jordan, traded precious metals at JPM until he left in December 2009. He later traded precious metals at two other banks, Credit Suisse and First New York.

In a press release accompanying the indictment, Assistant Attorney General accused all three men of scheming to manipulate the precious metals market while potentially harming their bank's clients.

> **"The defendants and others allegedly engaged in a massive, multiyear scheme to manipulate the market for precious metals futures contracts and defraud market participants,"** said Assistant Attorney General Brian A. Benczkowski. "These charges should leave no doubt that the Department is committed to prosecuting those who undermine the investing publicâ s trust in the integrity of our commodities markets."

William Sweeney, the Assistant Director in Charge of the FBI's New York Field Office, added that this manipulation likely impacted "correlated markets and the clients of the bank they represented."

> "Smith, Nowak, Jordan, and their co-conspirators allegedly engaged in a complex scheme to trade precious metals in a way that negatively affected the natural balance of supply-and-demand," said FBI Assistant Director in Charge William F. Sweeney Jr. of the FBIâ s New York Field Office. "Not only did their alleged behavior affect the markets for precious metals, but also correlated markets and the clients of the bank they represented. **For as long as we continue to see this type of illegal activity in the marketplace, weâ ll remain dedicated to investigating and bringing to justice those who perpetrate these crimes."**

According to Bloomberg, three other banks - Deutsche Bank, HSBC and UBS - agreed to pay $50 million (in total) to settle civil claims by the CFTC. Two former JPM employees who pleaded guilty and contributed evidence against their former colleagues that was used in the indictment.

> "While at JPMorgan **I was instructed by supervisors and more senior traders to trade in a certain fashion, namely to place orders that I intended to cancel before execution,"** said one former trader John Edmonds during an October 2018 hearing after pleading guilty to commodities fraud and conspiracy, BBG reports.

The behavior dates back more than 10 years to 2009, according to chat logs that were shown in the indictment. The conversations exposed in the chat logs show just how blatant the manipulation was, and how little the traders did to conceal it.

One of the traders who participated in the chat shown above was Christian Trunz, who traded precious metals at Bearn Stearns before joining JP Morgan after the crisis. He told a federal judge last month that this type of behavior was openly encouraged on JPM's trading desks for roughly a decade, and that other traders taught him how to do it. He pleaded guilty to federal fraud charges on Aug. 20, BBG reports.

Another trader said during a plea hearing that he was instructed to bid up the price of futures contracts by placing, then cancelling, bid orders (the literal definition of spoofing) that he never intended to fill.

> "I was instructed that **if a client wished to sell futures I should simultaneously place both bids and offers with the intent of canceling the bids prior to execution,"** Edmonds said during his plea hearing.
>
> Edmonds said the purpose was to falsely transmit liquidity and price information in order to deceive other market participants about the supply and demand so they would trade against the orders that JPMorgan wanted to execute.
>
> "We created market activity which artificially drove the sale price up and induced other

market participants to purchase at an inflated price," he said. Edmonds entered into a cooperation agreement with the CFTC in July.

Since the crisis, regulators around the world have cracked down on manipulation in rates, forex and government bond markets, so it's not exactly a surprise that this type of behavior was also happening in precious metals. But the brazenness with which traders engaged in such manipulation suggests that they didn't know what they were doing was illegal or wrong, which, in at least some cases, is probably true.

The aggressiveness of this manipulation probe is notable given that the government has lost the last two manipulation cases in court. **The DoJ is trying to show that it is â undeterred and are becoming more, not less, aggressiveâ in cracking down on market manipulation."**

Read the full indictment below:

u.s. v. Smith - Indictment by Zerohedge on Scribd

Solyndra was a payola front to relay taxpayer cash back to Obama's campaign financiers in tribute for those financier's cash and in-kind services funding of the Obama political campaign! Tesla, Abound, Fisker and hundreds more were the same crooked deals!

THESE FACTS PROVE CRIMINAL MISCONDUCT BY PUBLIC OFFICIALS AND THEIR SILICON VALLEY DEEP STATE FINANCIERS AND HANDLERS! THIS IS OUR DEMAND TO THE ATTORNEY GENERALS, FBI AND RELATED OFFICES, TO ARREST THESE PEOPLE AND DELIVER JUSTICE!

TO DATE, NO INVESTIGATOR OR ORGANIZATION HAS PROVEN THESE FACTS TO BE FALSE. IN FACT, WE ACCEPT ANY PUBLIC CHALLENGE TO THIS EVIDENCE AND WILL CORRECT ANY DATA PROVEN TO BE IN ERROR. WE ARE PREPARED TO TESTIFY IN GRAND JURY OR PUBLIC CONGRESSIONAL HEARINGS AND BEFORE CIVIL JURIES..."

We do not stand-by in the presence of evil!

"Every single person or company that has attacked us has ended up facing the "Hard D's", ie: Doxed, Destroyed, Dead, Denounced, Detained, and/or Destitute. If the FBI hasn't arrested, indicted or surveilled them, the FTC, SEC, EU, FEC, or other agencies, have dropped the hammer on them after our private investigators filed massive, detailed, reports and federal charges against them..."

- Carl Roberts

WHO KILLED THE ENERGY PIONEER?

We were working with CEO Gary D. Conley at H2GO on a fuel storage cassette solid state hydrogen product that could change the global energy realm. Then suddenly Gary gets a bullet in the head behind Beale Air Force Base in Northern California and all 42+ of the video cameras from the freeway to that location, including the Air Force videos, suddenly are "not available". Some of his family and friends think it is darn suspicious. AG Kamala Harris refused to investigate it because it involved some of her financiers. Now, just as somebody starts blowing up the Middle East oil fields, H2GO announces this in partnership with Conley's competitor. The timing is perfect if you want to control the post-2020 global energy system and you are an evil Silicon Valley Oligarch. Who did this?:-

American Gary D. Conley, created H2Go in the USA but his efforts were terminated by a gunshot behind Beale Air Force Base in Northern California; Now the technology has risen into the stratosphere!

H2GO Power has revealed it has completed the worldâ s first successful test flight of a 3D-printed hydrogen-powered drone with Ballard Power Systems, Inc.

Courtesy H2GO Power

The Unmanned Aerial Vehicle (UAV) pilot took place in Boston in late August as part of a partnership with Ballard Unmanned Systems Inc. â the UAV arm of Ballard Power Systems.

Headquartered in the UK, H2GO Power is developing and delivering solid-state hydrogen energy storage for zero-emission, reliable and safe power supply. The companyâ s drone application solution can increase the flight time of a droneâ s battery by up to 90 minutes, compared with less than 25 minutes for typical Lithium-ion battery systems.

The advanced design allows for up to 15% of total drone weight reduction and volume control - achieved by the 3D printed lightweight metal - as well as creating internal structures that optimise heat management into and out of the power system. This enables UAVs to travel three to five times further and carry heavier payloads.

The pilot is a testament to the companyâ s unique, solid-state hydrogen storage technology which allows for clean, reliable and scalable energy storage for UAVs/ Drones as well as a wide range of commercial, industrial and residential applications including Plug & Play Storage Units, eVTOLs and commercial aircraft.

With extensive scope in its commercial application in the developing and developed world, H2GO Powerâ s energy solution can be used for the faster delivery of medicines, quicker deployment of critical equipment, residential delivery, agriculture and environment monitoring. Solid-state hydrogen storage innovation that operates at such low pressures (1% of the pressures demonstrated in similar applications) significantly removes safety concerns of compressed hydrogen use.

Commenting on the pilot flight, Dr Enass Abo-Hamed, founder and CEO of H2GO Power said: â This is a hugely exciting development for our unique technology and brings us a step closer to delivering clean and sustainable energy delivery. The successful pilot flight demonstrates an innovative solution for the future of drones and its multiple commercial applications.

â With safety at the forefront of our decision-making process, our power system enables lightweight, scalable, clean energy storage that creates significant cost savings and is up to five times more efficient than existing alternatives.

â Weâ re excited that our solid-state hydrogen solution will unlock commercial opportunities through its efficiency and safety.â

Phil Robinson, Vice President and General Manager of Ballard Unmanned Systems, added: â Weâ re excited to work with the H2GO Power team to demonstrate its innovative technology in real-world flight. It is through partnerships like this that we will achieve our vision of delivering fuel cell power for a sustainable planet.â

Why did Gary D. Conley, Seth Rich, Rajeev Motwani, 3 Tesla engineers, and many others, have to die to cover up the oligarchs energy and media control schemes?

AN EXAMPLE DEMAND LETTER FROM ONE VICTIM GROUP TO RICK PERRY IN THE STILL-UNRESOLVED DEPT OF ENERGY PAYOLA CORRUPTION CASE:

Energy Sec Rick Perry expected to resign over our letter... Developing...

Rick Perry
Secretary of Energy
United States Department of Energy
1000 Independence Ave., SW
Washington, DC 20585
the.secretary@hq.doe.gov

July 29, 2019

Dear Rick:

What is the status of our case?

Here are the key reasons we think that The U.S. Department Of Energy ("DOE") is criminally corrupt and did violate our rights based on our actual experience with The Department, Congressional reports and law enforcement investigations:

- DOE solicited our involvement and asked us to invest our time, money, resources, technology and years of our brand value in their project, BUT, DOE bosses had already covertly hard-wired, insider-rigged, and locked-off the funds and directed them to our competitors (who DOE bosses owned stock in and later got jobs from). We were defrauded by DOE and federal executives. We are owed damages recovery.

- DOE executives said that they did not get direct orders from the White House or private White House financiers about who to fund and who to sabotage, but that turned out to be a lie, as proven by expert testimony.

- Every insider that DOE funded either failed as a brand or was proven to have been involved in corruption and payola, in historical retrospect.

- We were the ONLY applicant that refused to pay bribes, as proven by federal reports! We were asked to participate in these illicit schemes and we refused to engage in pay-to-play. In fact, we campaigned for, and created, laws to prevent this from happening again.

- The single largest set of failures of government funded projects, IN AMERICAN HISTORY, were the insiders that we told DOE not to fund because we knew they were staged to fail in order to produce: 1.) Windfall tax write-offs, 2.) Stock market pump-and-dump valuation skims 3.) Campaign money laundering 4.) Goldman Sachs services "fee" skims, 5.) Tech building real estate scams, 6.) Insider trading by U.S. Senators and their families... and other crimes. IN FACT, EVERY SINGLE one of the other companies was later found out to have profited in each of these

illicit ways. History, corporate document leaks and FBI-class forensics prove this as inarguable fact!

- If none of these illicit things are crimes then we missed out on $22+ billion dollars of profits. If we had been allowed to operate our business without sabotage from DOE then we would have made, at least, $200+ million in legitimate profits. So we were defrauded out of, at least $200M and up to $22B. The numbers are proven by comps from other companies who got to sell what we made in the same time period because DOE acted as a gate-keeper and industry saboteur. Those comps will stand up in court.

- After DOE bosses realized we had our shit more together than the competitors and were first-in-line with submissions, DOE bosses illegally eliminated the "first come, first served" rule which the Section 136 rules say they can't do.

- Freedom of Information (FOIA) filings, that we generated, produced evidence emails, federal reports and government surveillance videos that proved every one of our assertions. Additionally, our friends worked at DOE and gave us whistle-blower tips.

- The U.S. Government offered the funding to EVERY American yet the only people who got the funding were 47 men who lived 20 minutes from each other and who partied at each other's homes and who IRONICALLY had financed the political campaigns of the top government executives. When you map out the final beneficiaries on a database like XKEYSCORE, Palantir, or related financial crimes computerized AI analysis; it is quite clear that the entire DOE funding program was created by, and only benefited, a handful of men who were all connected previous to the application announcement.

- Our group hand-delivered the largest set of customer letters of support (from Americans) to the U.S. Congress and the Department of Energy HQ. We delivered more letters of support, from customers who wanted to buy our products, than EVERY OTHER APPLICANT COMBINED. Yet we were stone-walled because our products were more in demand than the products that DOE funded and that DOE executives owned stock market stock in.

- Kleiner, Greylock and other competitors stuck moles in our operation but we used them against the people that sent them and filed FBI, GAO, SEC, DOJ, FTC and other charges against them.

- Federal investigators, our private investigators and the news media, have yet to find a single person that DOE had "reviewing applications" who was not getting paid bribes or stock holdings by our competitors.

- Our products beat EVERY other Applicant and Awardee on: 1.) Price, 2.) Value, 3.) Manufacturing cost, 4.) Debt ratio, 5.) MPG, 6.) No foreign outsourced jobs, 7.) No bribes paid... and hundreds of other metrics. Yet we were stone-walled because our products were more in demand than the products that DOE funded and that DOE executives owned stock market stock

in.

- DOE bosses demanded unfair cash payments from us, then some DOE bosses waived those fees, then other DOE bosses LIED about confirming the funds, when we got the funds from outside investors, DOE bosses refused to take the money until after the deadline had passed in a classic stone-wall procedure in order to try to cut us out of the program. This was one of many violations of anti-trust laws.

- DOE stone-walled our follow-up reviews for nearly a decade in order to punish us for reporting them for crimes and for helping law enforcement investigate them.

- DOE staff "Lois Lerner'd" our paperwork and manipulated the context and semantics of our application documents and refused to take our calls to clarify issues. One of their negative staff DOE comments was that our electric vehicle product was "not using enough gasoline". Another DOE staff comment was that our product was not expensive enough. DOE staff outright lied about submission data that our team, (hundreds of the top engineers from Detroit who had been laid off in The Crash), had carefully calculated. DOE did not want to know the truth. DOE couldn't handle the truth. DOE only wanted to manipulate data interpretations to protect their buddies and sabotage the competitors of the companies they held stock, assets and future job promises from.

- If you think these charges sound harsh or are just "sour grapes", read the testimony of the hundreds of other applicants that DOE scumbags did the same thing too. DOE staff only exist to protect their corrupt stock holdings in Tesla, Solyndra and Google and to operate as the dogs-on-a-leash for K Street lobbyists paid for by Tesla, Solyndra and Google!

- DOE officials had direct profits, "job" payola promises, stock holdings and relations with Google/YouTube/Netflix/Facebook/Tesla/Solyndra. They had the Deep State Silicon Valley media cartel only promote their friend's companies and hide all press releases about competitors to their special interests. They produced hit-job movies and articles which Google/YouTube/Facebook (known in the news media as *"The Deep State"*) locked into the top results of their search engines globally, against DOE staff competitors. An impossible feat unless Google/YouTube/Facebook executives did so manually. A comparative search for "Tesla Motors" from 2005 to 2019 and all Tesla competitors, across all search engines, per data archives, proves this to be true and is jury trial ready for confirmation. While the public, in 2009, may not have believed such massive web information manipulation was possible, in 2019 the EU and U.S. Congressional hearings have proved that such anti-trust violations were going on and have been accelerated by Google/YouTube/Facebook executives. These anti-competitive efforts were implemented by White House staff, Secretary of Energy Steven Chu, his staff and later DOE staff after we had him fired!

- Every DOE official refused to EVER call our founders or engineers to

ever discuss any of the submission details yet those same officials were on the phone daily with our competitors and had regular meetings with those competitors at DOE offices in order to hand-walk their friends into the set-aside cash.

- DOE executives established a covert scheme with every major institutional investor and every major member of The National Venture Capital Association in such a manner so that no American company could get funded, once they applied to DOE, without the say-so from DOE bosses. The NVCA is a collusion-based organization designed to rig markets and DOE staff illegally participated and directed those collusion's using state resources.

- The FBI raided Solyndra based on some of our tips. The following investigations led right back to The White House.

- Every executive and VC in charge of Google, Facebook, Twitter and Tesla was involved in RICO-violating organized crime efforts which have been proven to have manipulated DOE taxpayer funds straight back to their own pockets. In fact, forensics has tracked the money flow to EVERY SINGLE one of them. Since Google is now 1.) more powerful than the U.S. Government, 2.) under investigation in every nation in the world, 3.) the primary provider of White House staff in 2009+, 4.) the primary beneficiary of government benefits in 2009+, 5.) the largest tax evader on Earth, 6.) the biggest user of sex trafficking services, 7.) A covert, unregistered, unregulated, political PAC organization; and other listed concerns...it raises suspicions!

- There are a few hundred other hard-fact reasons we believe <u>That The U.S. Department Of Energy Was Run By A Pack Of Lying, Self-Dealing, Insider-Trading, Crony Political Mobsters</u>. We can go over those facts in a public Congressional hearing, Grand Jury Hearing or Civil Jury Trial at any time, but we have already seen thousands of third parties prove these facts to be true, in addition to ourselves. It is time for compensation. The proof is on the table! DOE officials are sniveling criminal scum bags it seems, according to all of the Congressional and law enforcement evidence!

We, and most of the independent press, have submitted all of the facts and evidence for these charges to the FBI, OSC, GAO, FTC, DOJ, FEC, SEC, Congress and any other law enforcement agency we could find. If they don't want to take any action against the bad guys because it would embarrass public figures in ways beyond even the Jeffrey Epstein class of scandals then they have made a statement by ignoring that which even the average voter can plainly see.

We won't give up until our damages are paid for!

How will you be paying us for the damages DOE caused?

Thank you.

Sincerely,

The Automobile Alliance

BCC: Independent media reporters, White House, Congressional Chief's of Staff, Voters

...hundreds of such letters have been sent, by hundreds of companies and individuals, to federal agency bosses like Rick Perry, but none of those who complained have gotten an answer. The Dept of Energy has a proven process of simply shoving all complaints in the back of a file cabinet, for decades, and hoping that the victims will either just die, or go away, in the mean-time. Even though the Dept of Energy has tens of millions of dollars and thousands of staff, paid for by the taxpayers, to simply answer such complaints (more than enough resources to answer a hundred times more requests) they intentionally refuse to reply because they believe the die/delay idea will keep the current executives out of the press window until the next elections. We are here to tell them that they are wrong!

Barack Obama, the real king of the criminal crony payola quid pro quo

By Cheryl K. Chumley -

ANALYSIS/OPINION:

Democrats, socialists and others with animosity toward this White House say theyâ ve found the smoking gun in Donald Trumpâ s released telephone transcript with Ukraineâ s president â the supposed quid pro quo nugget of gold â and that it wonâ t be long now before impeach, impeach, impeach moves from message to reality.

Clearly, they havenâ t. But itâ s funny how after eight years of Barack Obama quid pro quo-ing here, there and everywhere, itâ s only now Democrats care.

Itâ s only with Trump that Democrats seem to have gleaned a sense of conscientiously objecting to what they perceive as abusing oneâ s high office to obtain political or personal favors.

Where were they with Obama?

Green Biz, in March of 2011, ran this: â Barack Obama, Clean Tech and the Political Quid Pro Quo.â

The piece goes on to recount how the Center for Public Integrity published â a long, in-depth look at how some of the Obama campaignâ s most prolific fundraisers have gotten loans, grants and special access to [his] administration,â to include a â deep look at how [Steve] Westly, former California state controller and venture capitalist â ¦ landed intimate access to the Obama administration.â

The Westly Group funded, among other companies, Tesla Motors. And all the while he was visiting the White House, serving as a member of the Obama administrationâ s advisory board on energy policy, and so forth and so on, he was raking in half a billion dollars in loans, grants and stimulus bucks for his green companies. That was money from the Obama Energy Department to Westly, the guy who wined and dined with Obama et al with eyebrow-raising frequency. Corruption? Quid pro quo?

As Green Biz put it, such intertwining of politics and business is â about the most commonplace form of political quid pro quo that exists.â

No biggie; nothing to see here; move on? Maybe. â Political sausage-making,â as Green Biz writes, is barely a blip these days.

But then thereâ s this.

â Barack Obamaâ s Ambassador Legacy: Plum Postings for Big Donors,â Public Integrity wrote, in a January, 2017, headline.

Legacy, indeed. Obama, according to Public Integrity, gave cushy ambassador posts to 31 campaign faithfuls who pulled in at least $50,000 for his reelection. He also doled out second-term ambassador slots to 39 who gave generously to his campaign, either in the form or money or political capital â or both.

The Washington Post made a whole map out of Obamaâ s campaign-cash-cows-for-ambassador-posts coincidences. Why not? Have some fun with it.

â This very telling map shows which U.S. ambassadors were campaign bundlers,â The Post wrote back in February 2014.

Quid pro quo?

Another headline above a September 2017 YouTube video asks the same question, different arena:
â President Obama and Wall Street Quid Pro Quo?â

And then there was this, from the Wall Street Journal in August of 2016: â President Barack Obama on Thursday defended his decision to authorize a $400 million cash payment to Iran that coincided with the countryâ s release of American prisoners in January.â

Thereâ s that whole quid pro quo label sneaking up again â or maybe itâ s better known as That Time Obama Paid Ransom to Terrorists.

â [The] Obama administration insists there was no quid pro quo,â The Wall Street Journal wrote in a separate piece in August, 2016.

Guess it was just coincidence those Americans were released at the same time the White House was directing secret loads of cash onto an airplane bound for Tehran. Onto an unmarked cargo plane.

Quid pro quo?

Good question. Good questions, all. Just donâ t ask the Democrats. Theyâ re too busy sifting through the five-page transcript of Trumpâ s telephone call for something, anything â oh, God, please, please, anything! â they can sell as quid pro quo to take down Trump and go forward with their only election hope for 2020: impeach.

YOU CAN NOW BUST EVERY CORRUPT POLITICIAN AND SEX TRAFFICKING, BRIBING, TECH OLIGARCH IN AMERICA:

***OUR CITIZEN FORENSICS* TECHNOLOGIES, SOCIAL NETWORKS AND WIKI NETWORKS GIVE EVERY VOTER THE SAME POWER THAT AN FBI AGENT HAS; FROM THE COMFORT OF YOUR LIVING ROOM. *CITIZEN FORENSICS* IS OPEN TO EVERYONE, FOR FREE, AND ALL OF THE TOOLS ARE 100% LEGAL, FREE TO USE AND OPEN-SOURCE.**

TODAY, BILLIONS OF YOU TAXPAYING VOTERS ARE ABLE TO FIGHT CORRUPTION WITH JUST YOUR PHONE AND YOUR COMPUTER!

WE ARE THE LARGEST AND MOST EFFECTIVE PUBLIC FORENSICS CITIZEN-SLEUTHS ALLIANCE ON EARTH!

Alumni from **FBI, NSA, CIA, FTC, SEC, CONGRESS, EU, DOJ, ET AL; PARTNER WITH UNIVERSITY GROUPS AND EVERY MEMBER OF THE PUBLIC ACROSS COMPARATIVE DATABASES AROUND THE GLOBE.**

TECH INDUSTRY BRIBES, CALIFORNIA SENATOR PAYOLA, COLLUSION, BLACK-LISTING, SEX TRAFFICKING, DARK MONEY, STOCK MARKET KICK-BACKS, REVOLVING DOOR JOBS AND GOVERNMENT FUNDS-RIGGING, etc.; is the way that these politicians and their Silicon Valley tech mobsters operate.

Citizen sleuths and independent journalists are now working on the following process against these corrupt players:

1. IDENTIFY EACH CORRUPT POLITICIAN, OPERATIVE AND FINANCIER

2. VERIFY AND CORROBORATE THE FACTS AGAINST THEM

3. EXPOSE THEM GLOBALLY IN ALL WEB MEDIA

4. INTERDICT AND BANKRUPT THE CORRUPT INDIVIDUALS AND THEIR COMPANIES

5. FILE FORMAL FBI-QUALITY PROSECUTION DEMANDS WITH EVERY AGENCY

"YOU", THE PUBLIC, CAN NOW GET ANY CORRUPT GOVERNMENT EMPLOYEE (BECAUSE *THEY WORK FOR YOU*) FIRED, SUED, DEEPLY INVESTIGATED AND PROSECUTED. SENATOR'S, WHITE HOUSE STAFF, AGENCY HEADS AND SSA/HUD/IRS COUNTER STAFF WORK FOR "YOU" AND CAN BE TERMINATED BY "YOU" IF THEY BREAK THE CONSTITUTION. YOU CAN USE THOUSANDS OF 100% LEGAL METHODS, TACTICS AND INTELLIGENCE TRADE-CRAFT TECHNOLOGIES TO TERMINATE ANY PUBLIC EMPLOYEE WHO ABUSES DEMOCRACY!

"EVERY SINGLE BRIBE, PAYOLA TACTIC OR COVERT COMPENSATION CONDUIT WILL BE IDENTIFIED, CIRCUMVENTED, PUBLICLY SHAMED AND DOXED FOR EVERY POLITICIAN... THIS IS EVIDENCE THAT DELIVERS HARD FACTS TO 1.) THE STATE AND FEDERAL INVESTIGATORS THAT WE HAVE FILED CHARGES WITH, 2.) MEMBERS OF THE PUBLIC, AND 3.) NEWS ORGANIZATIONS INVESTIGATING THESE CHARGES....EVERY LEAKED DOCUMENT SET (FOR EXAMPLE; THE SWISS LEAKS, THE PANAMA PAPERS, THE EPSTEIN DOCS, ETC.) ARE GLOBALLY CROSSED CHECKED WITH OUR LISTS OF CORRUPT POLITICIANS AND THEIR FINANCIERS)..."

U.S. SENATORS OWNED THE STOCK IN THEIR FRIENDS COMPANIES AND WORKED AGAINST THEIR OWN CONSTITUENTS, USING GOVERNMENT TAXPAYER-FUNDED RESOURCES, TO HARM THEIR BUSINESS COMPETITORS AND SEND GOVERNMENT RESOURCES TO THE SENATOR'S FRIENDS IN A FELONY-CLASS SET OF CRIMES!

We directly confronted U.S. Senators Reid, Pelosi, Feinstein and Harris with the facts stating that they were receiving the following forms of bribes. They denied it but FBI, SEC, FEC and Journalist records prove otherwise:

What kinds of people are these pervert perpetrators?:

- The perpetrators operate a **massive and abusive national sex cult**. The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals,The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties **and thousands of other cases and federal divorce court filings.** This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over $30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. You here about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid *"not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason..."*. Multiple attorney general's controlled by their cartel, ie: *Eric Schneiderman* and *Eliot Spitzer* , are involved this these sex rings. *These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!*

- An inordinate number of the members are closeted homosexuals who seek to use their media monopolies and massive lobbyist ownership's to promote child sex and child sex change consideration. Hence the massive, sudden, promotion of those issues in all of their media since they took power in 2008 and pretty much ran the Obama White House. The press has widely reported on underage boy sex clubs and the payment to parents for the blood of young boys by these oligarchs. A large number of tech VC's and senior executives are covert gay activists who hire women to act as their "beards". Their elitist Yale and Stanford fraternity house upbringings promoted "bromances", "rape culture" and a *don't-worry-daddy-will-fix-it* mentality. Highly gay law firms, (like Covington, Perkins and Sonsini), actively lobby to place gay politicians in office from their Bay Area offices.

- The AngelGate Conspiracy (https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly meet, conspire, collude and racketeer, in full view of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution. The perpetrators operate in extreme violation of federal RICO laws yet no DOJ or SEC RICO case has been filed against them by federal officials because, according to Senator Nunes: *"Some FBI executives are compromised...."*

- The perpetrators have used their exclusive monopolized cash flow of taxpayer financed grants, contracts and internet infrastructure to purchase the majority of the political lobby firms and technology law firms in America. This gives them an illegal, illicit and unfair ability to control: 1.) which laws are made or stalled, 2.) who gets government funded or blocked, 3.) Who gets kick-back tax breaks, tax credits and tax waivers and who does not, 4.) Who gets state-sponsored reprisal targeting or benefits blockades, 5.) Who gets revolving door payola jobs at their companies, 6.) Who gets PAC money bribes, 7.) and many other effects that are legally defined as "racketeering". The CEO of Overstock has come forward with facts about this.

- The perpetrators conspire, coordinate and manually manipulate their digital media mass broadcasts in order to collude in a manner that injects coordinated subliminal messages, that no regular voting citizen can detect, into their media in order to manipulate co-aligned political and ideological messages that will promote their ideological beliefs and promote public and policy actions which will provide profits to their stock market holdings which they co-own. Many of those stock market holders, (ie: in Tesla, Google, Abound, Solyndra, rare earth metals, Disney, etc) were coordinated between all of the perpetrators by their partners at JP Morgan, Bear Stearns, Goldman Sachs in such a manner as to collude to rig markets via insider trading ownership's that U.S. Senators, and their families, shared.

- The perpetrators have used their subliminal media control technologies to manipulate every national election since 2008.

- The perpetrators use a contrived Scientology-like hiring and HR management system which seeks out the most vulnerable, naive, easily influenced, and damaged people to fill their employee coffers with, in order to do their bidding. Their employees are nothing less than tools, sheep and fodder for their media manipulations, sexual abuses and ego-mania.

- These people are absolutely evil, sick and sociopath-like individuals who operate with impunity because they are never arrested. They thumb their noses at the law and anyone who does not agree with them. They create fake political issues to milk the emotions of the public in order to gain power by rigging elections, voter rolls and fake news.

Congressional reports, NSA, SEC, FBI and private investigation evidence proves this as fact.

The victims were attacked because 1.) they helped law enforcement investigate the attackers, and 2.) They competed with the attacker's products. The Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over $30M+, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from hired attackers: Google, Gawker, Gizmodo, Jalopnik, Think Progress, Media Matters, Facebook shadow-banning, troll farms, Media Matters, Black Cube, Fusion GPS, et al. (All of whom are now being forced out of business by federal and public investigatons). Jury and FBI-compliant evidence proves the assertions.

The U.S. Department of Energy, SSA, HUD, IRS, EPA, and other agencies, are used as political slush funds to pay back (In Plain Sight) campaign finance millionaires while blockading the Silicon Valley oligarch's competitors from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact. The White House has total and covert control over those agencies and can order any federal agency to screw over any voter if that citizen *"mouths off"*. The Lois Lerner case, and thousands of similar cases, proves that!

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact. Follow-the-money and the proof is quite clear.

Through corrupt rare-earth mineral high tech company mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

VANITY FAIR: â Heâ s Full of Shitâ : How Elon Musk Fooled Investors, Bilked Taxpayers, and Gambled Tesla to Save SolarCity

The controversy over SolarCity, which has dovetailed with questions about Muskâ s mountain of debt and profit shortfalls, offers a window into the mindset of Americaâ s most outlandish CEO. Tesla Solar panels so defective they set the Walmart's on fire

By

Bethany McLean

It was a Saturday night last March in Buffalo, and Dennis Scott was sitting at home. A stocky veteran with salt-and-pepper hair and a close-cropped beard, Scott had been laid off from Teslaâ s factory in Buffalo two months earlier as part of a global reduction in the companyâ s workforce. Since then, he had taken to sending Elon Musk emails and point-blank tweets, describing the pain the layoffs were causing.

Ten days after Scott was let go, Musk had tweeted a goofy picture of himself posing with what looked like a machine gun. Scott retweeted the image and called Musk a clown. â If I were CEO and someone told me my company wasnâ t working right,â he explains, â I wouldnâ t be clowning around. Iâ ve got people counting on me for their livelihood.â

Now, around 10 p.m., his phone rang. The call was from an unmarked number. Scott answered.

â Itâ s the clown,â the person at the other end informed him.

Scott, unfazed, figured that Musk must have gotten his number from the company. For the next 20 minutes, he recalls, he and his former employer had a civil conversation. â When are you going to fix your company?â Scott asked.

Musk was pleasant but offered no specifics about the Buffalo plant. Scott continued to ask frank questions. â You took $750 million from New York,â he told Musk, referring to the taxpayer money that the state handed Tesla as part of its Buffalo Billion program to revitalize upstate New York. â You gave us hope that you were going to do something.â

Muskâ s responses left Scott unimpressed. â Musk is a nice guy when you talk to him,â he says. â But I think heâ s full of shit. Heâ ll tell you whatever you want to hear.â

In public, Musk doesnâ t talk much about Teslaâ s factory in Buffaloâ a place he once, in better times, dubbed Gigafactory 2. Gigafactory 1, of course, is Teslaâ s much-hyped futuristic electric car plant outside Reno. Gigafactory 2, which is shrouded in silence and secrets, was a controversial side venture: a high-stakes move to dominate Americaâ s growing market for solar energy. Tesla bought the factoryâ s main tenant, SolarCity, for almost $5 billion in 2016. The plan, in true Muskian hyperbole, was to turn the plant in Buffalo into what was billed as the largest manufacturing facility of its kind in the Western Hemisphere. SolarCity would build 10,000 solar panels per day and install them on homes and businesses across the country. In the process, it would create 5,000 jobs in an area that very much needed them. â This is one of the poorest cities in the country,â Scott says. â You get a big company here, and itâ s a big deal.â

From the outside, the sheer scale of the Buffalo plant sparkles with promise. At 1.2 million square feet, it stands at the point where the Buffalo River bends through the city. The building is gleaming white, as if to signify its freshness amid a landscape of abandoned grain elevators and sprawling, desolate steel mills. The area around the factory is hardscrabble working class; until SolarCity was built, people only drove through it when the fierce wind off Lake Erie shut down the highway that residents take from the southern suburbs to downtown. Now three flags fly in front of the factory: those of the United States, New York State, and Tesla.

But three years after Tesla bought SolarCity, there are serious doubts as to whether the plant will ever fulfill its promises. The website CleanTechnica, which is mostly supportive of Musk, calls SolarCity â a disaster waiting to happen.â A potentially costly lawsuit alleges that Tesla acquired SolarCity at the expense of its own shareholders. And former employees want to know what happened to the massive subsidy Tesla received. â New York State taxpayers deserved more from a $750 million investment,â a laid-off employee named Dale Witherell wrote to Senator Kirsten Gillibrand. â Tesla has done a tremendous job providing smoke and mirrors and empty promises to the area.â

There are growing questions about SolarCityâ s product, too. Last week, Walmart sued Tesla for breach of contract due to â years of gross negligence,â claiming that solar panels installed at seven of its stores went up in flames, causing millions of dollars in damage. The lawsuit, citing Teslaâ s â utter incompetence,â seeks to have the company remove rooftop panels it installed at more than 240 Walmart stores.

The controversy over SolarCity, which has dovetailed with questions about Muskâ s mountain of debt and profit shortfalls, offers a window into the mind-set of Americaâ s most outlandish and unpredictable CEO. Muskâ s believers argue that the details of his ventures donâ t matter: Itâ s the grand vision that counts. â The guy has a will to make stuff happen that is extraordinary,â says someone who worked closely with Musk. â He willed Tesla to happen. And in willing a reality into existence, he might not stick to the facts.â But in the case of SolarCity, Muskâ s penchant for making promises he canâ t deliver on turned out to matter a great dealâ and could even pose a threat to his entire empire.

When Witherell got his job at the SolarCity plant last year, he was thrilled. Heâ d moved back to Buffalo, where his parents live, after a stint in Texas and a tough divorce. He has a disabled daughter, but even so, the

job wasnâ t so much about the paycheck. â At some point push is going to come to shove in our world, and fossil fuel use is going to catch up with us,â he says. â I believed in the product.â

The plant, in fact, was a centerpiece of Governor Andrew Cuomoâ s grand plan to revitalize upstate New York. Buffaloâ s landscape offers a daily reminder of its past glory and present despair. The grain elevators that Le Corbusier once called the â magnificent first fruits of the new ageâ â and which supplied the nation for half a century, before they were rendered irrelevant by the St. Lawrence Seawayâ still loom over the horizon, too costly to demolish. The blackened shell of the warehouse at the old Bethlehem Steel complex, destroyed by fire a few years ago, punctuates the river like an angry exclamation point. Once one of the nationâ s largest cities, Buffaloâ s empty streets feel oddly discordant. â Here, if you have to sit through a traffic light even once, you have an aneurysm,â says Dave Robinson, an editor at the *Buffalo News.*

Now, under Cuomoâ s plan, Buffaloâ s massive steel plants would be replaced with the sun itself. In September 2014, the governor toured the SolarCity site. The smiles were big and the words were grand. The success of the plant, Cuomo proclaimed, was â of critical importance to the United Statesâ economic competitiveness and energy independence.â

SolarCity was founded by two of Muskâ s cousins, Lyndon and Peter Rive, who grew up with him in South Africa. Musk, who put in $10 million, was the largest shareholder and chairman of the board. The initial idea, the Rives explained, was not to be a manufacturer but rather to control the entire consumer experience of going solar, from sale to installation, thereby driving down costs. For a time, SolarCity was a hot stock, growing almost tenfold from its public offering in 2012 to its peak in early 2014.

As is common with Muskâ s ventures, SolarCity professed to be focused on changing the world. â Everything was very motivational,â says a former executive. Some workers, taking the ethos to heart, sported SolarCity tattoos.

WHERE THE SUN DONâ T SHINE
Tesla promised to create 1,460 jobs at its solar factory in Buffalo. It currently employs only 329.

But the initial success of the companyâ s stock masked some difficult realities. SolarCityâ s business model was to front the costs of installing solar panels and allow homeowners to pay over time, which created a constant need for cash. That required raising money from outside investors, often big banks, who were then entitled to the first chunk of the payments homeowners madeâ leaving SolarCity in a never-ending scramble to raise more debt. The real engineering that took place at SolarCity, in short, was financial, not environmental.

On the consumer side, SolarCity was plagued by complaints about misleading sales tactics and shoddy installations. As the problems mounted, some workers began to feel manipulated by the companyâ s talk about being a force for good in the world. â I turned a blind eye to a lot of the silliness because of the idealism,â says one former senior employee. â I donâ t know when the Rubicon was crossed, but there were micro-crossings every day.â

By 2014, several insiders say, the board was also growing concerned. The company imported most of its solar panels from China, and it looked like demand would soon outpace supply. Because Musk had a reputation as a manufacturing genius, the board decided that SolarCity needed to start making its own panelsâ a huge shift in its business model. â Installing and selling solar has almost nothing to do with manufacturing,â says a former solar-industry executive. â Itâ s like a car dealer saying itâ s going to make cars.â

In June 2014, SolarCity bought Silevo, a solar-panel manufacturer that had struck a deal with New York to build a factory in Buffalo. On a conference call, Musk boasted that the deal would enable SolarCity to install tens of gigawatts of panels every yearâ far beyond the companyâ s peak annual run rate of about one

gigawatt. He spoke as if the technology were already proven. On its website, SolarCity predicted it would â achieve a breakthroughâ in solar-power pricing thanks to â massive economies of scale.â

â It was shoot first and aim later,â says the former senior employee. â There was a lot of machismo going on: bigger, better, badder, faster.â

By the time Cuomo visited the site three months later, Silevoâ s smallish deal had metastasized. The state promised to spend $350 million to build a factory and another $400 million on equipment specified by SolarCity. The company would get a 10-year lease on the facilityâ for just $1 a year. In return, it promised to employ at least 1,460 people in â high-techâ jobs at the factory, hire another 2,000 to support the sale and installation of solar panels in New York, and help attract an additional 1,440 â support jobsâ in the state. Once it achieved full production, the company pledged, it would spend some $5 billion in New York over the following decade.

â It was sold as a perfect marriage,â says the former senior employee. â The area around the factory is terrible, and I remember thinking: Wow, we are going to save the town where steel was made.â Cuomo too was hooked. â He was enchanted with the idea of Elon Musk in Buffalo,â says a longtime lobbyist in Albany. â I think he actually thought Musk was the next Dalai Lama.â

Even then, to those who looked closely, the cracks at SolarCity were becoming apparent. In 2014, key executives had started to leave. The Rives began to sell stock. SolarCityâ s debt was soaring, and the yield on its bonds hit double digits, a sign that the market thought the company was in trouble. Goldman Sachs, one of Muskâ s major bankers, called SolarCity the â worst positionedâ company for capitalizing on future growth in the solar sector. One of the few things shoring up the companyâ s stock, according to a former investor, were the constant rumors that Musk was somehow going to bail it out.

In reality, the situation was even uglier than outsiders knew. As SolarCity struggled to raise money from institutional investors, it began offering individuals a chance to buy what it called Solar Bonds. (â Now you can get paid while driving the solar revolution,â the marketing material said.) But there were few takersâ so other parts of the Musk empire took up the slack. According to the shareholder lawsuit, SpaceX acquired $255 million of the bonds. Musk himself bought $75 million of them, and the Rives acquired another $38 million. To raise the cash, Musk borrowed against both Tesla and SolarCity stock, increasing his personal credit lines from $85 million to $475 million. He also used his own reputation to shore up the stock: In February 2016, when SolarCity stock plunged to its lowest level in three years, Musk bought $10 million in shares. A week later, when the news became public, the stock soared by almost 25 percent.

At the same time, according to the shareholder lawsuit against Tesla, the company faced â significant liquidity concernsâ â meaning it was running out of money. An accounting inquiry from the SEC noted that SolarCity was burning through cashâ $659 million in the first quarter of 2016 alone. That February, at a Tesla board meeting, Musk proposed a solution: Tesla, he said, should acquire SolarCity.

The board balked. But Musk kept pushing. Two weeks later, he proposed the acquisition again. Once again, the board said no.

It was a hopelessly conflicted situation. Musk owned more than 20 percent of both SolarCity and Tesla. His brother, Kimbal, served on both boards, as did several investors, including Antonio Gracias, a close friend of Muskâ s. As a judge in the shareholder lawsuit ruled, it is â reasonably conceivableâ that Musk effectively controlled the Tesla board when he pushed it to acquire SolarCity. (Tesla, which has dismissed the allegations in the lawsuit as false, insists that â all appropriate partiesâ recused themselves during the acquisition.)

At the time, Musk was still a heroic figure to many. As former Tesla board member Nancy Pfund once said, â Heâ s always been a master of the universe in my mind.â Even Tesla skeptics admit that the Model S,

which was launched in 2012, will go down in history as an absolute classic, followed by the equally celebrated Model X in 2015. In those days, Teslaâ s stock was trading at well over $200 a share, giving it a market value of more than $30 billion, a stunning figure for a company that hadnâ t proven it could make money.

But over the years, many skeptics have come to see Muskâ s stuntsâ from smoking pot during an interview to calling a diver who helped rescue kids trapped in a Thailand cave a â pedo guyâ â as more unhinged than iconoclastic. One close observer of Musk recalls how he promised, back in 2001, to give away half of his equity in PayPalâ dividing it evenly between â the people that have worked hard to build the companyâ and â causes I believe make the world a better place.â But Musk never made good on the pledge, and the observer came to see the episode as â symbolic of Muskâ s penchant for making grandiose statements that he either knows are not true at the time he makes them, or that he has no real intent of following through on.â Others see Muskâ s promises as purposefully manipulative. â Musk has a habit of overstating Teslaâ s operational capabilities and its prospects for profitability, especially when the company is preparing to raise capital, collect customer deposits, or secure regulatory benefits,â says Brian Horey of Aurelian Partners, an investment firm.

Now the brewing problems at SolarCity threatened to give skeptics real ammunition against Muskâ unless those problems could be buried. In May 2016, the Tesla board finally agreed to acquire the company for almost $5 billion, including the assumption of nearly $3 billion in SolarCity debt. On a conference call on June 22, the day after the deal was publicly announced, Musk told analysts and investors that the company had â the best technology out there for high-efficiency, low-cost solar panels.â He didnâ t say anything about the liquidity crisis at SolarCity. Nor did he mention something else that shareholders allege the Tesla board came to learn as it did its due diligence on SolarCity: The cost per watt of solar modules being produced in Buffalo was actually projected to be 20 cents *above* the rest of the industry.

On October 28, 2016, just before shareholders were set to vote on the acquisition of SolarCity, Musk strode onto a platform erected on the set of *Desperate Housewives* at Universal Studiosâ back lot in Los Angeles. He talked about the existential threat presented by global warming and the desperate need for sustainable energy. Then he gestured to a group of houses that had been set up around him. They might look normal, he said, but they actually featured a revolutionary new product called the Solar Roofâ shingles that would last longer and cost less than a regular roof, even before factoring in electricity. Tesla expected production to begin the following summer.

The next month, shareholders approved Teslaâ s acquisition of SolarCity. â Vote tally shows ~85% of unaffiliated shareholders in favor of the Tesla/SolarCity merger!â Musk tweeted. The deal doubled Teslaâ s debt load, but it was good for Musk, who converted his stake in SolarCity into more than $500 million in Tesla stock. By preventing SolarCity from collapsing, he also shored up his most valuable asset: investor faith in his own genius. If any piece of his empire had falteredâ if Musk were shown to be fallible rather than superhumanâ it would have cast doubt on the narrative that enables him to raise cheap capital for his money-losing enterprises.

â Thanks for believing,â Musk tweeted to his shareholders.

That October, as Musk was making his pitch about the Solar Roof, a former *Fortune* 500 executive was watching it online at a friendâ s barbecue. The former executive, who had spent years researching solar technology, understood what it took to make the Solar Roof workâ and he was confident that Musk hadnâ t figured it out. â He spewed total BS,â says the executive, who asked not to be identified. â I was flabbergasted. I was convinced in the moment that the shingles were fake.â

Adopting the Twitter handle @TeslaCharts, the executive began drawing on his Ph.D. in science, and his background as a financial analyst, to share infographics that detailed Muskâ s overreach. His follower count

mushroomed, and he became a core member of a group of outspoken Tesla critics who go by the Twitter hashtag #TSLAQâ Teslaâ s stock symbol followed by the *Q* that companies pick up when they are delisted due to bankruptcy.

Many of them, in fact, were first drawn to Tesla by SolarCity, with its pile of debt and mountain of losses. â If it werenâ t for SolarCity, #TSLAQ wouldnâ t exist,â says @TeslaCharts. He points out that Musk faced a catch-22 of sorts: If he hadnâ t bailed out SolarCity, his whole debt-laden empire might have cracked. Yet without the bailout, Tesla would be far more healthy. â When the history of Tesla is written,â he says, â the acquisition of SolarCity will be seen as the moment where the narrative took a decisive turn.â

Others shared @TeslaChartsâ suspicions about Solar Roof. Robinson, who covers SolarCity for the *Buffalo News,* had flown to Los Angeles for Muskâ s presentation. Afterward, he asked an engineer for the company if the tiles Musk had pointed to were real. â Oh no,â the engineer replied. â These are dummies. We just popped them up here to show you.â Robinson wasnâ t outragedâ it made sense that Musk would show a prototypeâ but he took note of the contrast between the rhetoric and the reality. â They made it sound like they had figured out how to get it to work,â he says.

And Tesla continued to make it sound that way. In early 2018, the company announced that production of the Solar Roof had begun in Buffalo. That fall, Tesla told Bloomberg News it was â gearing up for tremendous growth in 2019. We have a product, we have the customers, we are just ramping it up to a point where it is sustainable.â

But a few months later, in its quarterly letter, Tesla confessed that the product wasnâ t actually ready yet. â We continue to iterate,â the company wrote. In a legal filing, Tesla acknowledged that the much-hyped technology it had acquired from Silevo wasnâ t all that it was cracked up to be. And last May, an investigation by Reuters revealed that most of the solar cells being produced in Buffalo were being sold overseas, not used in the Solar Roof, because demand was so low.

Customers who tried to purchase a Solar Roof took to Twitter to share their horror stories: Kevin Pereau, a California homeowner, said he paid a deposit of $2,000 to have a Solar Roof installed more than two years agoâ then never heard from the company again. He got his money back only after he started tweeting at Musk every single day.

Musk, meanwhile, is still making promises. Last March, he proclaimed that 2019 would be the â year of the Solar Roof.â In late July, he tweeted that Tesla is â hopingâ to turn out 1,000 Solar Roofs a week by the end of the year. But even onetime believers have become doubters. The *MIT Technology Review,* which included the Solar Roof in its list of 10 â breakthrough technologiesâ in 2016, now calls it a â flop.â In a recent analyst note, JP Morgan warned that Solar Roof will be a â nicheâ product at best. Musk has â sustained a kind of Kabuki theater in which the Solar Roof ramp is always imminent, but never here,â wrote investor John Engle, a #TSLAQ member.

Another #TSLAQ member, a Yale-trained lawyer and investment manager named Lawrence Fossi, made a discovery while combing through SolarCityâ s financial statements. Without fanfareâ and with no input from constituentsâ state officials had quietly issued a series of 10 amendments that watered down the requirements SolarCity must meet in exchange for the $1 lease on the Buffalo factory. The 1,460 â high-techâ jobs at the factory became just plain old jobs, as did the 2,000 jobs to support solar sales and installation in New York. The agreement to employ 900 people at the factory within two years shrank to 500. And the timing for the additional jobs was extended to 10 years after the factory was completedâ at which point the lease would also be expiring. (Tesla argues that the company is now responsible for all 5,000 jobs, instead of being able to fulfill them through suppliers.) The governorâ s office declined to comment on who authorized the changes, and state officials have yet to provide any public explanation as to why they opted to let a big corporation like Tesla off the hook.

In fact, the Buffalo deal turned out to have been tainted by corruption from the very start. Just one day after Tesla finalized its acquisition of SolarCity, Preet Bharara, then the U.S. attorney for the Southern District of New York, announced criminal charges against a handful of Cuomo staffers for rigging the construction bids for the Buffalo Billion program to favor the governorâ s campaign donors. The man tapped by Cuomo to oversee the taxpayer subsidies, as well as a leading donor who received a $225 million contract to build out the Buffalo factory, were both convicted last year of conspiring to rig the bids

Lyndon and Peter Rive have both left SolarCity, and the companyâ s original business of installing solar roofs has all but evaporated. The company once controlled two-thirds of the residential market; now, according to the consulting firm Wood Mackenzie, its share is less than 7 percent. In the second quarter of this year, SolarCity installed only 29 megawatts of solar panelsâ far below the 10,000 megawatts in annual installations that Musk had promised. â Total implosionâ is how one SolarCity insider describes it.

Across the street from the factory in Buffalo stands a small building that houses a coffee shop and an office space. Both were built to cater to the plant, says Robinson, the *Buffalo News* editor. The coffee shop is surviving, but the office space is vacant. What few jobs do exist at SolarCity barely compete with the local grocery store. â For $750 million, weâ re getting jobs that pay $2 an hour more than Aldiâ s,â says Robinson.

In a statement to *Vanity Fair,* Tesla argues that its jobs in Buffalo are competitive, especially when benefits and equity are factored in. It says it has expanded its operations at the factory to include â some of our most innovative and pioneering products.â And it accuses the magazine of presenting a â one-sided view with cherry-picked sourcing aimed at feeding into the fear, uncertainty, and doubt being circulated about Tesla every day by those looking to gain from Teslaâ s losses.â

But the level of secrecy surrounding the SolarCity plant may offer an additional indication of how bad things are. Tesla refused to allow me to take a tour, and former employees say a rare media event at the factory last fall was highly scripted. â They spent more time and resources trying to fabricate what people saw than they do making anything,â says Witherell, who worked there at the time. â They told employees to pretend we were busy.â A story aired last February by News 4 Buffalo described the shop floor as â torpid,â with idle employees milling about. â They say they are in â ramp upâ mode,â says Scott, the former employee. â But this isnâ t even start-up mode. What company spends two and a half years starting up something they were already supposed to be the best at?â

Last April, not long after he placed his late-night call to Scott, Elon Musk finally paid his first-ever visit to Buffalo. There was no press release, no triumphant post on social media, no meeting with reporters. Local authorities were in the midst of performing the genuine engineering feat of dismantling whatâ s known as the â ice boomâ â hundreds of steel pontoons, spanning over a mile and a half, that keep the massive amounts of ice on Lake Erie from floating down the Niagara River and jamming up hydropower turbines. After the visit, Musk continued his upbeat assessment of production. â We are looking forward to scaling up significantly through the balance of this year and into next,â he said.

Muskâ s other proclamations in recent months have been far grander. He has promised that by next year, Tesla will be producing self-driving carsâ and deploying a fleet of 1 million robotaxis. He has claimed that Neuralink, his secretive start-up, has developed a â threadâ that can be inserted into the human brain, merging our minds with artificial intelligence. And he is seeking approval to build an underground â hyperloopâ that will whisk passengers between Washington, D.C., and Baltimore in 15 minutes.

When Tesla bought SolarCity, it said the deal would â add more than half a billion dollars in cash to Teslaâ s balance sheet over the next three years.â But it appears to have had the opposite effect. â I think itâ s a big source of the cash-flow deficit,â says one longtime analyst. â I think it is a big thorn inside of Tesla.â The company has paid back some of SolarCityâ s debt, including the Solar Bonds owed to Musk and SpaceX. But

this fall, another $556 million is coming due. In a characteristic tweet, Musk once vowed he would â personallyâ repay the SolarCity debt if need be.

There may be another cost. By next April, Tesla is required to start paying an annual fine of $41.2 million if it fails to employ 1,460 people at the Buffalo plant. Tesla says it currently has 636 employees statewide in New York, including 329 at the plant, and that it has invested almost $400 million in New York. Engle, the TSLAQ member, argues that Tesla cannot afford to admit that SolarCity has been a fiasco, because doing so would open the company to significant liability in the ongoing lawsuit over the acquisition.

Officials in New York, meanwhile, appear to be taking belated steps to document what is really happening in Buffalo. Last spring, the state announced that it was auditing all of its high-tech programs, with a focus on Tesla. Everyone in Albany, says the longtime lobbyist, has accepted that the Buffalo plant is a â disasterâ â a poster child for why government giveaways to big companies donâ t work.

But the official who took credit for the deal with Teslaâ the man who championed the company as a Rust Belt saviorâ stands by his decision to place his trust in Elon Musk. Governor Cuomo, who paid his own visit to Buffalo last spring, declared that heâ s perfectly pleased with the progress at SolarCity. â Theyâ re ahead of schedule,â he said.

All the tech moguls who have been connected to Jeffrey Epstein, the elite wealth manager who died in jail while as a boss in the tech moguls sex-trafficking

Rebecca Aydin

Bill Gates, Jeffrey Epstein, and Elon Musk. Davidoff Studios/Getty, Stephen Brashear/Getty, Bobby Yip/Reuters, Business Insider

- Jeffrey Epstein, the financier arrested in July on charges of sex trafficking of underage girls, died on August 10.
- The former money manager had many famous connections, including to tech moguls.
- Bill Gates and Elon Musk are among those who have been connected to Epstein. Here are the others.
- Visit Business Insider's homepage for more stories.

Jeffrey Epstein, the financier arrested in July on charges of sex trafficking of underage girls, died by apparent suicide in a Manhattan jail on August 10.

Throughout his life, he hobnobbed with world leaders and elite executives, including tech moguls.

Read more: *Jeffrey Epstein was meeting with Silicon Valley reporters before his arrest, 'rambling' about all the people he knew in tech*

The New York Times columnist James B. Stewart published an article on Monday about his August 2018 interview with Epstein. Stewart included Epstein's thoughts on Silicon Valley and its tech moguls.

"Mr. Epstein then meandered into a discussion of other prominent names in technology circles," Stewart wrote. "He said people in Silicon Valley had a reputation for being geeky workaholics, but that was far from the truth: They were hedonistic and regular users of recreational drugs. He said he'd witnessed prominent tech figures taking drugs and arranging for sex."

Here are some of the worst tech moguls who have been connected to Epstein.

Elon Musk, CEO of Tesla and SpaceX

Sex cult boss Ghislaine Maxwell and Elon Musk, who took one of his wives to Epstein Kevin Mazur/VF14/Contributor/Getty Images

Stewart said he asked Epstein about a rumor that Musk had asked Epstein to compile a list of candidates to become Tesla's new chairman.

THE CRIMES AND PERVERSIONS OF ELON MUSK

It is a proven, widely documented, fact that Elon Musk suffers from Narcissistic Personality Disorder, including Borderline and Antisocial traits. His condition manifests itself in a variety of ways, including an addiction to drugs, frequent cocaine use (often with prostitutes, manic self-promotion, as well as violent, abusive and threatening behavior.

It is a proven, widely documented, fact that Elon Musk's father had sex with his children, got Elon Musk's sister pregnant and used his mother as a trophy wife. Musk's involvement with Jeffrey Epstein's underage sex

cult, combined with Musk's appearance and sex events, combined with his use of young women in facade marriage "arrangements" calls his moral sanity into question.

In other proven and widely documented facts, it is clear that Musk runs a criminal tech cartel design to deploy corruption, bribery and monopolistic behaviors as a way of life.

Musk stepped down from the position in September in the wake of his infamous "funding secured" tweet, which led to a lawsuit from the Securities and Exchange Commission.

Musk was also photographed with Ghislaine Maxwell, who's been accused of being Epstein's madam, at the 2014 Vanity Fair Oscars Party in West Hollywood.

Marvin Minsky, MIT's "father of artificial intelligence"

MIT called Minsky, who died in 2016, the "father of artificial intelligence." He was one of the founding members of MIT Media Lab, which has innovated a trove of technological advances over the past thirty years, from touch screens to robotic prosthetics to GPS.

In a recently unsealed deposition published by The Verge earlier this month, a woman testified that she had been forced to have sex with Minsky at Epstein's compound in the US Virgin Islands.

The Verge said that while Minsky was known to be a part of Epstein's circle, the accusation is the first to tie Minsky to Epstein's sex-trafficking network.

WHY IS GOOGLE SUCH A BIG PART OF THESE CRIMES?:

Many under-cover videos and Congressional investigations have exposed the true purpose behind Google and the Silicon Valley Cartel: ***"...To manipulate politics, stock market valuations and government funds to their own nefarious ends..."*** ; it is time to bankrupt these criminal oligarchs! The victims had global character assassination and political propaganda-media defamation reprisal attacks operated against them by White House staff including Robert Gibbs, John Podesta, David Axelrod, Rahm Emanual, David Plouffe, Steve Rattner, Susan Rice, Valarie Jarrett, et al., and their political financiers: Elon Musk, Larry Page, John Podesta, Reid Hoffman, Vinod Khosla, David Plouffe, Steve Jurvetson, Tim Draper, George Soros, Jared Cohen, Steve Spinner, David Drummond, Eric Schmidt, Steve Westly, John Doerr, etc.

Elon Musk is the tech scammer who took over Tesla Motors from the founders of Tesla: Marty and Marc. Larry Page is the founder of Google. Elon Musk and Larry Page have a homoerotic bromance relation and share stock, assets, election financing, tax evasions, black-lists and Tesla promotions. In true anti-trust law violation: Page has Google destroy all of Musk's competitors on the internet while he promotes Musk hype to the top of all searches. It is illegal and unethical to rig the stock market, elections and the competitive market like Musk and Page do. The FBI, SEC, FEC, FTC and DOJ should indict them but they pay epic bribes to top agency officials in order to avoid prosecution!

There are common threads that run through an organization repeatedly relied upon in the so-called whistleblowerâ s complaint about President Donald Trump and CrowdStrike, the outside firm utilized to conclude that Russia hacked the Democratic National Committeeâ s servers since the DNC would not allow the U.S. government to inspect the servers.

One of several themes is financing tied to Google, whose Google Capital led a $100 million funding drive that financed Crowdstrike. Google Capital, which now goes by the name of CapitalG, is an arm of Alphabet Inc., Googleâ s parent company. Eric Schmidt, the chairman of Alphabet, has been a staunch and active supporter of Hillary Clinton and is a longtime donor to the Democratic Party.

CrowdStrike was mentioned by Trump in his call with Ukranian President Volodymyr Zelensky. Perkins Coie, the law firm that represented the DNC and Hillary Clintonâ s campaign, reportedly helped draft CrowdStrike to aid with the DNCâ s allegedly hacked server.

On behalf of the DNC and Clintonâ s campaign, Perkins Coie also paid the controversial Fusion GPS firm to produce the infamous, largely-discredited anti-Trump dossier compiled by former British spy Christopher Steele.

CrowdStrike is a California-based cybersecurity technology company co-founded by Dmitri Alperovitch.

Alperovitch is a nonresident senior fellow of the Cyber Statecraft Initiative at the Atlantic Council, which takes a hawkish approach toward Russia. The Council in turn is financed by Google Inc.

In a perhaps unexpected development, another Atlantic Council funder is Burisma, the natural gas company at the center of allegations regarding Joe Biden and his son, Hunter Biden. Those allegations were the subject of Trumpâ s inquiry with Zelemsky related to Biden. The Biden allegations concern significant questions about

Bidenâ s role in Ukraine policy under the Obama administration. This took place during a period when Hunter Biden received $50,000 a month from Burisma.

Besides Google and Burisma funding, the Council is also financed by billionaire activist George Sorosâ s Open Society Foundations as well as the Rockefeller Brothers Fund, Inc. and the U.S. State Department.

Google, Sorosâ s Open Society Foundations, the Rockefeller Fund and an agency of the State Department each also finance a self-described investigative journalism organization repeatedly referenced as a source of information in the so-called whistleblowerâ s complaint alleging Trump was â using the power of his office to solicit interference from a foreign countryâ in the 2020 presidential race.

The charges in the July 22 report referenced in the whistleblowerâ s document and released by the Google and Soros-funded organization, the Organized Crime and Corruption Reporting Project (OCCRP), seem to be the public precursors for a lot of the so-called whistleblowerâ s own claims, as Breitbart News documented.

One key section of the so-called whistleblowerâ s document claims that â multiple U.S. officials told me that Mr. Giuliani had reportedly privately reached out to a variety of other Zelensky advisers, including Chief of Staff Andriy Bohdan and Acting Chairman of the Security Service of Ukraine Ivan Bakanov.â

This was allegedly to follow up on Trumpâ s call with Zelensky in order to discuss the â casesâ mentioned in that call, according to the so-called whistleblowerâ s narrative. The complainer was clearly referencing Trumpâ s request for Ukraine to investigate the Biden corruption allegations.

The so-called whistleblowerâ s document, however, only mentions the largely unknown OCCRP and does not reference BuzzFeed, which has faced scrutiny over its reporting on the Russia collusion claims.

Another listed OCCRP funder is the Omidyar Network, which is the nonprofit for liberal billionaire eBay founder Pierre Omidyar.

Together with Sorosâ s Open Society, Omidyar also funds the Poynter Institute for Media Studies, which hosts the International Fact-Checking Network that partnered with Facebook to help determine whether news stories are â disputed.â

Like OCCRP, the Poynter Instituteâ s so-called news fact-checking project is openly funded by not only Sorosâ Open Society Foundations but also Google and the National Endowment for Democracy.

CrowdStrike, The DNC servers and Silicon Valley ordered "Hit-Jobs" on American Citizens by Google

CrowdStrike, meanwhile, was brought up by Trump in his phone call with Zelensky.

According to the transcript, Trump told Zelensky, â I would like you to find out what happened with this whole situation with Ukraine, they say CrowdStrike â ¦ I guess you have one of your wealthy peopleâ ¦The server, they say Ukraine has it.â

In his extensive report, Special Counsel Robert S. Mueller notes that his investigative team did not â obtain or examineâ the servers of the DNC in determining whether those servers were hacked by Russia.

The DNC famously refused to allow the FBI to access its servers to verify the allegation that Russia carried out a hack during the 2016 presidential campaign. Instead, the DNC reached an arrangement with the FBI in which CrowdStrike conducted forensics on the server and shared details with the FBI.

"Google is a sick corrupt criminal business run by perverts and sociopaths..." SAY GOOGLE'S OWN

STAFF!

- Google spies on competitors and steals their technology
- Google executives will lie to Congress, the FBI, The FTC and ANYONE to protect their scheme
- Google runs tens of millions of dollars of defamation attacks against competitors
- Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk
- Google lies to the public about what they really do with the public's data
- Google promotes illegal immigration in order to get cheap labor and control votes
- Google runs VC funding back-lists against start-ups that are competitive
- Google bribes thousands of politicians
- Google is a criminal RICO-violating monopoly
- Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks
- Google pays bribes to politicians in Google and YouTube stock
- Google manipulates who gets to see what web-sites, globally, for competitor black-lists
- Google has a "no poaching" Silicon Valley jobs blacklist
- Google's Eric Schmidt was in the basement of Obama's campaign office the night of Obama's election rigging the web to manipulate voting procedures
- Google can DDOS and website by over-crawling the site. They claim they are just archiving their enemies site but the end result is a DDOS attack against political and business adversaries
- Google bosses sexually abuse women and young boys
- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults
- Google bosses control the NVCA financing cartel over start-ups
- Google has placed the majority of the corporate staff in at least one White House
- Google controls national elections for anti-competitive purposes
- The company "***Polyhop***", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality
- Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays
- Google bribes some politicians with revolving door jobs
- Google is primarily responsible for destroying the Bay Area Housing opportunities
- Google runs DDoS attacks on competitors by massively crawling their sites
- Google boss Andy Rubin runs a sex slave farm according to his own family
- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles
- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker
- Google executives sexually abuse so many women that the women staff of Google walked out one day
- In the 2009 White House, you could not swing a cat without hitting a Google insider
- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator
- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes
- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine
- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA
- Google's map service was a spy system paid for by taxpayers money that Google now profits off of
- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks
- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks
- Google VC's and bosses have spent $30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors
- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google
- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days"
- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes

- Google rarely likes, or hires, black employees per federal and news media investigations
- Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could"
- The film: "**Miss Sloane**" depicts only 2% of the illicit lobbying tactics Google employs daily
- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed
- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

and so much more...

Google, and itâ s Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Googleâ s bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axciom scams and other illicit things they get up to; one just has to wonder.

Some of the largest political bribes in American or European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

"Google is designed to be digital Scopolamine Devil's Breath for the masses. Under the influence, voters will do things they would not otherwise believe they could be made to do. The tactic hides itself in plain sight..."

- Senior CIA Operations Director

More Proof Of Google Manipulating Elections and News From 2007 Forward:

Google Manipulated All Obama Elections Using CIA-class Server and Perception Tricks

By Billy D

A new study by Professor Robert Epstein has revealed that Google manipulated both the 2016 and 2018 elections via search results to sway the perception of the average user, so much so that between 2.6 million and 10 million votes were given to Hillary Clinton due to their interference during the 2016 Presidential elections.

During the Senate hearing, Professor Epsteinâ s testimony was published on the Judiciary Senate website, revealing Googleâ s behavior manipulation and how this affected the recent elections taking place in America. In the study, Professor Epstein wroteâ ¦

> â In 2016, biased search results generated by Googleâ s search algorithm likely impacted undecided voters in a way that gave at least 2.6 million votes to Hillary Clinton(whom I supported). I know this because I preserved more than 13,000 election-related searches conducted by a diverse group of Americans on Google, Bing, and Yahoo in the weeks leading up to the election, and Google search results â which dominate search in the U.S. and worldwide â were significantly biased in favor of Secretary Clinton in all 10 positions on the first page of search results in both blue states and red states.â

During the Senate hearing with Ted Cruz, Epstein also explained that the 2.6 million count was a minimum figure.

The video of Epsteinâ s testimony was posted on the Senator Ted Cruz YouTube channel, which you can check out below.

LINKS:

http://www.videonet111.com

http://nationalnewsnetwork.net

The relevant part of Epsteinâ s speech takes place at the tail end of the video, where he corrects Senator Cruz about how widespread the manipulation was during the 2016 elections by Google, statingâ ¦

> â The 2.6 million [votes] is a rock bottom minimum. The range is between 2.6 and 10.4 million votes, depending on how aggressive they were in the techniques that Iâ ve been studying, such as the search engine manipulation effect, the search suggestion effect, the answer bot effect, and a number of others. They control these and no one can counteract them. These are not competitive. These are tools that they have at their disposalâ ¦ exclusively.â

But it wasnâ t just the 2016 elections that have been affected. According to Epsteinâ s research report, Google may have been manipulating national elections since 2015.

Epsteinâ s research further postulates that Google isnâ t just manipulating elections but also in the business of social engineering to alter peopleâ s behavior through autocomplete suggestions and similar technologies.

He also noted that Google may have manipulated up to 78 million votes across the nation during the 2018 mid-term elections, writing in the reportâ ¦

> â On Election Day in 2018, the â Go Voteâ reminder Google displayed on its home page gave one political party between800,000 and 4.6 million more votes than it gave the other party. Those numbers might seem impossible, but I published my analysis in January 2019 (https://is.gd/WCdslm) (Epstein, 2019a), and it is quite conservative. Googleâ s data analysts presumably performed the same calculations I did before the company decided to post its prompt. In other words,Googleâ sâ Go Voteâ prompt was *not* a public service; it was a *vote manipulation*.
>
> â In the weeks leading up to the 2018 election, bias in Googleâ s search results may have shifted upwards of 78.2 million votes to the candidates of one political party(spread across hundreds of local and regional races). This number is based on data captured by my 2018 monitoring system, which preserved more than 47,000 election-related searches on Google, Bing, and Yahoo, along with the nearly 400,000 web pages to which the search results linked. Strong political bias toward one party was evident, once again,in Google searches(Epstein & Williams, 2019).â

Basically, Google is socially engineering the outcomes of our nation, and itâ s happening right under everyoneâ s noses. They used the Russian fake news hoax to hide their own corruption, especially with the help of the mainstream media, who had also been working behind-the-scenes to put Clinton into office, as revealed by the leaked e-mails from Wikileaks.

A user going by the handle of TrueSympathy on KotakuInAction2 explained that this isnâ t just a issue of election fraud but also a serious antitrust violation, writingâ ¦

> â This is beyond an anti-trust case at this point. Billions of dollars of in-kind donations going towards the Democrats that were undeclared and hidden. The amount of money needed to turn a 50/50 vote into 90/10 would be absolutely absurd for a candidate to spend in terms of an entire nation. Google can do this and they get paid for it. Call your congressmen and voice your concern, because if they arenâ t brought to heel before 2020 they will go all in to get someone in whoâ ll let them off the hook.â

In short, Google is not only censoring the search results and shadow-banning websites, theyâ re also attempting to rig elections.

There are millions of pages of evidence and eye-witness testimony proving these assertions but Google's lobbyists bribe Senators to keep the truth hidden! Barack Obama could not have become President without Google's epic election manipulations and public information manipulations.

HOW YOU ARE GOING TO EXPOSE, BLOCKADE AND OUTLAW *EVERY* SINGLE BRIBERY PAYMENT TO CORRUPT POLITICIANS:

Did you know that 85% of every dime you earn is affected by political bribery?

Political corruption is the use of powers by public officials, their network contacts, or the coordination of such corruption by Silicon Valley oligarchs, or VC's, for illegitimate private gain.

Forms of corruption vary, but include bribery, extortion, cronyism, nepotism, parochialism, patronage, influence peddling, graft, and embezzlement. Corruption may facilitate criminal enterprise such as drug trafficking, money laundering, and human trafficking, though it is not restricted to these activities. Misuse of government power for other purposes, such as repression of political opponents and general police brutality, is also considered political corruption. Masiulis case is a typical example of political corruption.

Over time, corruption has been defined differently. For example, in a simple context, while performing work for a government or as a representative, it is unethical to accept a gift. Any free gift could be construed as a scheme to lure the recipient towards some biases. In most cases, the gift is seen as an intention to seek certain favors such as work promotion, tipping in order to win a contract, job or exemption from certain tasks in the case of junior employee giving the gift to a senior employee who can be key in winning the favor.[1]

Some forms of corruption â now called "institutional corruption"[2] â are distinguished from bribery and other kinds of obvious personal gain. A similar problem of corruption arises in any institution that depends on financial support from people who have interests that may conflict with the primary purpose of the institution.

An illegal act by an officeholder constitutes political corruption only if the act is directly related to their official duties, is done under color of law or involves trading in influence. The activities that constitute illegal corruption differ depending on the country or jurisdiction. For instance, some political funding practices that are legal in one place may be illegal in another. In some cases, government officials have broad or ill-defined powers, which make it difficult to distinguish between legal and illegal actions. Worldwide, bribery alone is estimated to involve over 1 trillion US dollars annually.[3] A state of unrestrained political corruption is known as a kleptocracy, literally meaning "rule by thieves".

Investigations by the United States Congress have shown that The U.S. Department of Energy, SSA, HUD, IRS, EPA, and other agencies, are used as political slush funds to pay back (In Plain Sight) campaign finance millionaires.

Corrupt politicians steer payola to campaign financiers while blockading the Silicon Valley oligarch's competitors from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact. The White House has total and covert control over those agencies and can order any federal agency to screw over any voter if that citizen *"mouths off"*. The Lois Lerner case, and thousands of similar cases, prove that!

In every case, the only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact. Follow-the-money and the proof is quite clear.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, Linkedin, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The Silicon Valley oligarchs campaign contributions to individual federal candidates are well-documented, with each contribution limited to $2,700 (of visible cash) per cycle to each candidate or their personal political action committee.

WE KNOW HOW EACH POLITICIAN IS BRIBED!

WE KNOW WHO BRIBES EACH POLITICIAN!

WE KNOW WHICH INTERMEDIARIES THE BRIBES ARE PAID THROUGH!

THIS IS HOW THEIR BRIBES WORK:

But political influence from outside groups, for example via Google's massive army of lobbyists and crooked law firms, is far more than just cold hard cash in the form of direct campaign contributions. A large portion of the people who run political election programs, ie: "Campaign Managers" are no more than mobsters who run various financial shake-down and transparency evasion efforts.

The Washington Post reports on many bribery matters, for example, that the Palo Alto Mafia of High Tech billionaires has donated less than $4 million publicly visible dollars to members of Congress in the last 18 years.... BUT.. In an era where some Senate races cost nearly $100 million, $4 million seems like very little.

Here are other ways the Palo Alto Mafia of High Tech billionaires bribe their way into policy and politics:

***BRIBE**:* The Palo Alto Mafia of High Tech billionaires also give to party committees and the national party. A maxed-out donation to the national party quickly increases campaign spending to more than $100,000. Any organization â or person â can also give $33,400 to a party committee. Finally, state and local parties can each receive a $10,000, quickly allowing campaign finance totals to sour to nearly half-a-million dollars.

BRIBE: While the organization has to follow campaign limits, its members can make their own political donations, also following campaign finance limits noted above. But with millions of members, political clout builds quickly. The Palo Alto Mafia of High Tech billionaires have people like Steve Spinner and Steve Westly who use computerized manipulation systems to get members to over donate.

BRIBE: The Palo Alto Mafia of High Tech billionaires has a politically active membership on the social networks they own. With more than five million members, the Facebook and Google constantly communicates with its members about immigration and climate issues that affect the Palo Alto Mafia of High Tech billionaires stock market holdings and advising them how to vote. The organization is also constantly increasing its voter rolls by registering people to vote.

BRIBE: The Palo Alto Mafia of High Tech billionaires also activates its membership when elected officials are facing climate-related legislation, resulting in phone calls and emails and letters to Congress. In addition, lawmakers' votes are noted and advertised to their issue-oriented membership.

BRIBE: The Palo Alto Mafia of High Tech billionaires has its a massive number of their own super PAC's and 501c4 political organization which can run hundreds of their own political campaigns. The groups combined spent more than $40 million in the midterm elections on Senate and Congressional candidates, according to the Center for Responsive Politics. A lot of that money was spent on political advertising on television, radio and digital, and on direct mail.

BRIBE: The Palo Alto Mafia of High Tech billionaires tip off Senator's staff as to which stocks to have their Goldman Sachs brokers buy and which laws to manipulate that will pump those stocks that the families of Sen. Reid, Harris, Pelosi, Feinstein, etc. have already insider traded. Why do you think Nancy Pelosi and Dianne Feinstein have $100M in their bank accounts from only a $170K per year salary? (ie: If Tesla Motors went bankrupt would Nancy Pelosi and Dianne Feinstein, who own covert stock in Musk's companies, go bankrupt?)

BRIBE: Political attackers spend over $30M, part of that using taxpayer resources, attacking each victim that exposes them. This is proven in the financial transaction records from hired attackers: Google, Gawker, Deadspin, Gizmodo, Jalopnik, Think Progress, Media Matters, Facebook shadow-banning, troll farms, Media Matters, Black Cube, Fusion GPS, et al. (All of whom are now being forced out of business by federal and public investigations). Jury and FBI-compliant evidence proves the assertions. Hiring services, that wipe out a Senator's adversaries, is an overt form of bribery and Dark Money financing by Oligarchs.

BRIBE: There are hundreds of other such examples. We witnessed these crimes, frauds and political money laundering actions but the FEC, FBI, DOJ, FTC and others refuse to arrest the suspects because the suspects share business ventures with regulators and law enforcement executives!!!

Certain California State officials, Obama White House Staff and Federal Agency staff accepted bribes from Silicon Valley Oligarchs and Investment Bank Cartels. They were bribed with: Billions of dollars

of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deustche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Senior White House staffer Steve Rattner was indicted for stock market securities fraud, Former President's campaign manager and Uber executive David Plouffe has been fined $90,000 for illegally bribing Chicago mayor Rahm Emanuel (Obama's former Chief of Staff, on behalf of the ride-hailing company, the Chicago Tribune reports.

In another case, White House buddies Marty Nesbitt and Harreld Kirkpatrick III formed a private equity investment firm called Vistria created to interface to the 2012 election.

A curious pattern began to emerge. The White House administration would attack industries with government power, which led to substantially lower valuations for these companies. Nesbitt and Vistria, or others close to the White House, could then acquire those assets for pennies on the dollar. For example: The for-profit higher education schools like University of Phoenix, ITT Technical Institute, and DeVry University; In 2013, White House staff blamed the schools for taking advantage of students by saddling them with student debt, ruining their credit and making a profit on it. The White House ordered the Federal Trade Commission to go after them. In the case of the University of Phoenix, its parent Apollo Education Group was suspended after a Federal Trade Commission investigation in 2015. The following year, three companies, including Vistria, swooped in to buy what remained of Apollo at a price 90% below its share price before the investigation. As Vistria's education investment portfolio bulged, a number of White House Education Department officials, including Secretary of Education Arne Duncan, ended up taking high-level jobs with Vistria.

In another instance both the Vice President and Secretary of State were deeply involved in trade and security talks with China even as that country began its aggressive campaign to expand its military and physical presence in the South China Sea. Contrary to standard diplomatic practice, however, both played "good cop," not seriously confronting China on its misbehavior. These two officials were close friends from their years spent together in the Senate. Their families went into business together in 2009. They created a number of equity and real estate investment firms allied to Rosemont Capital, the alternative investment fund of the Heinz Family Office. Over the next seven years, as the Vice President and Secretary of State negotiated sensitive and high-stakes deals with foreign governments, Rosemont entities secured a series of exclusive deals with those same foreign governments. In December of 2013, for instance, when one of those politicians traveled to China for talks. He brought his family along. While there, the father soft-pedaled China's clear aggression, and played up the bilateral trade partnership. Ten days after the trip concluded, China's central bank, the Bank of China, set up a $1 billion investment joint venture called Bohai Harvest RST. For the record, the "RS" referred to Biden's son's firm, Rosemont Seneca.

That's questionable enough; But months later, in July 2014, the Secretary of State traveled to China, also for talks. He talked little of China's clear aggression, but did conspicuously note that "China and the United States

represent the greatest economic alliance trading partnership in the history of humankind." He should know. In the ensuing months, Chinese government-linked firms took major stakes in several of the firms owned or controlled by their family, and provided them with massive funding totaling billions of dollars. Nor is this the only scandal involving these guys.

While we can provide hundreds of thousands of such examples, it is up to YOU, as a citizen, to call these public figures (who are your EMPLOYEES) to task when it occurs and remove them from office in special elections, mid-term.

This is a chart of the essence of the criminal cycle of corruption engaged by Silicon Valley oligarchs and the Senators and public officials they own:

JOE SIX-PACK: YOU ARE NOW PART OF THE MOST EFFECTIVE, 100% LEGAL, CORRUPTION TERMINATION TEAM EVER ASSEMBLED! YOU ARE A CROWD-SOURCED CRIME FIGHTING COLLECTIVE THAT HUNTS DOWN, AND TAKES DOWN, CRIMINALS THAT STEAL DEMOCRACY AND ROB TAXPAYERS.

YOU ARE NOW A THOUSAND TIMES MORE POWERFUL THAN NADER, ASSANGE, SNOWDEN, NESS, GOWDY, THE U.S. CONGRESS AND MILLIONS OF TAXPAYERS COMBINED. YOU ARE "THE WEB-POWERED PUBLIC"

YOU DEMAND JUSTICE, ARRESTS & INDICTMENTS! HERE THEY COME:

We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions. All of the bad guys manipulated fake news outlets are being bankrupted. All of their sex trafficking and sex slave rings are being exposed. All of their philandering and sexual extortion schemes with their interns are being exposed. All of the abuse charges in their divorce proceedings are being exposed. All of their bribes are being revealed. All of their back-room Angelgate-like collusion meetings are being revealed. They are all being sued in epic "no poaching tech job blacklisting" class action lawsuits. Every one of their employees is now able to win whistle-blower rewards for exposing them. Every law enforcement and regulatory agency in the world is receiving anti-trust, RICO and bribery complaints about them. THOUSANDS OF INTERDICTION PROGRAMS ARE UNDER WAY TO (100% LEGALLY) END THEM, THEIR CRIMES AND THEIR CORRUPTIONS.

This material includes the evidence sample-sets for the RICO Racketeering cases and investigations involving political corruption, Democracy abuse and one of the largest insider stock market scams in American history!

Silicon Valley oligarchs and corrupt U.S. Senators conspire, plot, finance and execute felony crimes that are using taxpayer money, covert investment bank accounts and stock market manipulation to steal your money and manipulate public policy. Now we have the proof and public court hearings should be held to show that evidence! If you are a voter: Demand the public release of the California and Nevada politicians tax records, stock market records and investment bank off-shore profit records - the data proves the crimes, the bribes and the corruption that we have charged!

These Certain California State officials, Obama White House Staff and Federal Agency staff have deployed every trick in the book to harm, damage, intimidate and pay-back those who reported them. They are engaging in REVENGE by abusing State, County and Federal Agencies to use Government resources to attack, benefit-block and damage members of the public in reprisal!

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about *"saving the environment"*; it is about greed, bribes and corruption on an epic scale.

These folders contain millions of pages of hard-evidence clippings from news media, public internet postings, investigation task force groups, E.U. groups, Congressional committees and forensic specialists. The material shown here represents only a small portion of the evidence in-hand and available for trial. The victims of these crimes have pledged to fight to-the-end to get the justice, damages compensation, whistle-blower rights and fairness that they deserve!

Additionally, a "dead-man switch" insurance policy protection data-set has been pre-distributed to journalists to protect the whistle-blowers in these matters.

A portion of this material is protected by attorney/client privilege. All videos on this system are news videos, previously publicly distributed, and compliant with U.S. First Amendment, Freedom-of-the-Press, SLAPP/Anti-SLAPP, Fair-Use Press Rights, Public Domain Law, GDPR and Human Rights U.N. laws. This is a legal rights WIKI. These sites do not track users or violate their rights. Please submit any court-ready data evidence you uncover, for a reward, that shows that Google or Facebook is censoring or hiding this data on the web, or selling data to corporate brands and political organizations.This material is usually updated hourly by public volunteers. Check back for updates. Public submissions by whistle-blowers, law enforcement and tipsters are always appreciated. The links, below, resolve to additional evidence repositories containing millions of pages of evidence designed to stand up in: 1.) **Civil Jury Hearings**, 2.) **Grand Jury Hearings**, and 3.) **Live Broadcast Public Congressional Hearings**.

Our global team is committed to the 100% legal, crowd-sourced, public take-down of each, **and every**: person, organization and company that chose to attack the public, cheat rather than compete, run character assassination and defamation reprisal operations, bribe politicians, embezzle taxpayer funds, run monopolies using taxpayer funded networks, run high-tech sex trafficking operations and use Democracy as their play-thing. The corrupt entities on THE LIST are each being hunted down, exposed and terminated using 100% legal methodologies.

CASE AREAS COVERED IN THESE INVESTIGATION:

DOCUMENTING POLITICAL BRIBES - How the Suspects were bribed. What do you do when your own elected officials are competing with you, and your businesses, and using government-owned, taxpayer-funded, resources to attack you so that they, and their monopoly-owning friends, can gain billions of dollars in anti-trust violating stock market profits?

COORDINATED SILICON MEDIA CENSORSHIP - How the Suspects mass-manipulate news & information to hide the truth and operate "fake news" disinformation campaigns through Google, Facebook and other monopoly global information-control networks

EVERY PUBLIC OFFICIAL INVOLVED GOT PAYOLA - Confirmations of the fact that the Senators

& agency bosses who were supposed to protect the public were taking bribes in the crimes. They took stock market warrants, revolving door jobs at monopolistic Silicon Valley companies and insider trading tips as political bribes

FIGHTING CORRUPTION - What you can do, from the comfort of your home, to fight this kind of political corruption. Over a billion dollars-a-year is spent, by the corrupt, to stop the FBI, GAO, FTC, FEC, OSC from enforcing the law against these criminal oligarchs... so YOU have to do it!

GOOGLE IS CORRUPT - The overall corruption that Google executives and VC's audaciously engage in via a planned organizational strategy of tax evasion, media manipulation, anti-trust violations, shadow-banning, sex trafficking and worse. For decades, Google VC's and executives have conspired to monopolistic-ally manipulate politics, stock markets and information towards their personal ideological and profiteering extremes.

GOOGLE MANIPULATES ELECTIONS - The most extreme crime that Google operates is the manipulation of Democracy in order to please the extremist owners of the monopoly in the Alphabet Cartel. Using the largest bribery and lobbying network in history, The Alphabet Cartel operates criminally and with impunity.

KEY POINTS - Capsule summations of the main issues, illicit actions and criminal charges

SILICON VALLEYS SEX ABUSES - The Silicon Valley oligarchs, and the politicians they control, reveal their true sick sociopath nature in the massive number of perverted sex scandals they are always involved in

SURVEILLANCE CAPITALISM - The abuse of privacy, created by the Silicon Valley technology monopoly mafia, for the mass harvesting of humans as "digital information cows" and tools for political behavior manipulation

THE DARK MONEY LAUNDERING - The way that the bribes are paid using covert asset layering techniques. How does a California Senator that is only supposed to be making $170K per year end up with $160+ Million in their bank account, all derived from profiteering on the backs of taxpayers?

THE DOE CLEANTECH PAYOLA SCAM - The U.S. Department of Energy was converted to a Dark Money political slush-fund to pay back Obama Administration campaign financiers by distributing payola in plain sight. They thought they could never get caught if they pulled it off right in front of everybody, but their smoke-and-mirrors scheme blew up when the deciders, financiers, beneficiaries and government staff all turned out to be holding the same stock, job offers and insider trading moves.

THE ELON MUSK SCAMS - Elon Musk operates Tesla Motors, SpaceX, Solar City, Neuralink,The Boring Company, etc. as government mooch stock market scams and dark money political campaign finance conduits in partnership with Goldman Sachs. The lies, financial crimes, arrogance, narcissism and manipulations of Musk are endless

THE HIRED CHARACTER ASSASSINS - When the Suspects get bent-out-of-joint, they use Gawker, Gizmodo, Fusion GPS, Black Cube, Jalopnik, CNN, Media Matters, etc. to "kill" those they don't like. Victims have suffered defamation blasts, character assassination, employment black-listing, investor black-listing, toxic poisoning, government benefits blockades and stonewalling, Google & Facebook shadow bans, and worse. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid

oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. **THE LITHIUM BATTERY SCAM** - The Obama campaign financiers promised exclusive lithium, indium, cobalt & rare-earth metals mining deals to Silicon Valley oligarchs who rigged the internet for Obama. The batteries they exploit turned out to be deadly, toxic, war-causing, child-labor camp harvested, cancer-causing, working killing, self-exploding disasters

THE PALO ALTO MAFIA - Also known as "The PayPal Mafia" or "The Deep State"; these sociopath frat boys, mostly homosexual, delight in bribes, sex abuse, monopolization, tribal boys clubs, elitism and tax evasion

THE POLITICAL DEATHS - When the character assassinations don't work, the Suspects just have people killed

USING PUBLIC AGENCIES AS HIT-JOB OPERATORS - HUD, SSA, SEC, DOE and your City and County offices are used by the Suspects, via their control of U.S. Senators, to harm those who speak out against the corrupt insiders who run this scheme

VENTURE CAPITAL TECHNOLOGY THEFT - Expect to have every great idea, start-up, invention or business venture stolen and copied by Google, Facebook, Kleiner Perkins, Draper Fisher, Greylock, etc. (The Palo Alto Mafia) and get blockaded from ever getting them into a jury trial to hold them accountable

Silicon Valley oligarchs, and the corrupt West Coast Senators they bribe, pretend to support 'green' issues, sex issues and immigrant issues in order to sucker the largest mass of the public into supporting schemes designed, exclusively, to put stock profits in their covert family stock market accounts. They spend over a billion dollars a month to rig government policy against you. The only way to stop them is to A.) vote them out, B.) expose them in the media using CIA/FBI-class financial forensics doxing and C.) bankrupt their assets and stock market holdings, D.) expose their corrupt lobby companies, "think tanks", Fusion GPS operatives and facade law firms. The true financiers of every politician are being publicly revealed! "Politicians" are your EMPLOYEES, never let them forget that fact!

Everyone has seen the news reports about ***Solyndra, Uranium One, The Tesla Stock Manipulations***, and the trillions of dollars of related energy industry financial crimes (ie: The CBS News ***60 Minutes*** reports: "***The Cleantech Crash***" & "***Congress Trading On Insider Information***"...). The victims of these crimes have never been compensated, never had their claims addressed, and are attacked DAILY for reporting the crimes and for assisting law enforcement agencies. The victims have joined together to get justice..one way or another!

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a ***'Program'*** because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: ***If you cheat rather than compete you will be destroyed.***

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.

B. Suffer the firings or forced terminations of multiple senior staff.

C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.

D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.

E. Have every investor who has placed over $50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

IT IS TIME FOR 100% LEGAL REVENGE AGAINST THESE POLITICAL MOBSTERS!

==========

Whistleblowers: XP Vehicles was on Googleâ s blacklist of sites because Google owned Tesla stock

- Massive anti-Trust and RICO Racketeering law violations by Google and YouTube

By Peter Barry Chowka

Buried deep in the extensive trove of internal documents documenting Googleâ s onerous censorship policies is this gem: American Thinker was on the dominant tech giantâ s list of â blacklistedâ news websites.

The source of the leak is identified as â Google Insider Zachary Vorhies.â On August 14, Vorhies outed himself as the leaker in a video posted ay Project Veritas, which published the documents. Among the hundreds of documents is one identified as a news â blacklistâ -- titled â Manual list of sites excluded from appearing as Google Now stories.â Sure enough, among the list of 400 or so sites (mostly from the conservative right but some on the left) -- under the subhead â sites with high user block rateâ -- is americanthinker.com. (near the lower right corner in the photo below)

Photo courtesy Steve McCann

Vorhies had been providing Project Veritas with documents he downloaded as a Google engineer for more than a year. He decided to go public this week â after he says Google allegedly called the police to perform a â wellness checkâ on him.â The story, including a 20-minute long video of Vorhies, is a compelling one and is documented in the August 14 release from Project Veritas.

According to Vorhies:

> I gave the documents to Project Veritas, I had been collecting the documents for over a year. And the reason why I collected these documents was because I saw something dark and nefarious going on with the company and I realized that there were going to not only tamper with the elections, but use that tampering with the elections to essentially overthrow the United States.

Zachary Vorhies in the Project Veritas video

In addition to providing the documents to Project Veritas, Vorhies said he also sent them to the Department of Justice Antitrust Division.

According to the Project Veritas news release:

> Among those documents [that Vorhies purloined] is a file called â news black list site for google now.â The document, according to Vorhies, is a â black list,â which restricts certain websites from appearing on news feeds for an Android Google product. The list includes conservative and progressive websites, such as newsbusters.org and mediamatters.org. The document says that some sites are listed with or because of a â high user block rate.â

The complete set of documents, which can be downloaded from Project Veritasâ s web site, and Vorhiesâ s testimony comprise an insiderâ s complement to the work of noted research psychologist Robert Epstein, Ph.D., who I had the privilege of interviewing for an hour on September 4, 2018 on The Hagmann Report in a conversation titled â Big Tech can shift 12 million votes in November [2018].â Epstein has emerged as a leading critic of Big Tech from a scientifically-grounded research viewpoint. In sworn testimony before the United States Senate Committee on the Judiciary Subcommittee hearing on â Google and Censorship through Search Enginesâ on July 16, 2019, Epstein testified that â In 2016, biased search results generated by Googleâ s search algorithm likely impacted undecided voters in a way that gave at least 2.6 million votes to Hillary Clinton (whom I supported).â Epstein went on to note that the potential for Google to influence millions of votersâ election results in 2020 is even greater.

==========

THE CROOKS - THESE PEOPLE SHOULD BE ARRESTED AND PLACED UNDER LIFE-TIME SURVEILLANCE:

THESE ARE THE FOLKS WHO ARE THE CROOKS BEHIND "THE DEEP STATE" AKA "CORPORATE ANTIFA" AKA "THE SILICON VALLEY MAFIA". THEY EITHER PAID BRIBES, TOOK BRIBES OR OTHERWISE ENGAGED IN CRIMINAL CORRUPTION. THIS IS THE HIT LIST OF THOSE BEING EXPOSED, WATCHED, SUED, TERMINATED AND REPORTED TO LAW ENFORCEMENT USING 100% LEGAL TACTICAL RESOURCES. EXTREME-DEEP DOSSIERS HAVE BEEN PREPARED ON EACH ONE:

Follow-the-money and the emails!

This is who financed and operated the attacks, illicit manipulations and anti-trust violations. These are the ones that everyone is working on exposing, indicting and TAKING DOWN:

- A.J. Delaurioâ Defamation-for-sale blogger **

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)

- Adam Dachisâ Defamation-for-sale blogger

- Adam Weinsteinâ Defamation-for-sale blogger

- Adrian Covertâ Defamation-for-sale blogger **

- Adrien Chenâ Defamation-for-sale blogger

- Al Mottur and Manuel Ortiz, Brownstein Hyatt Farber Schreck **

- Alan Henryâ Defamation-for-sale blogger

- Albert Burnekoâ Defamation-for-sale blogger

- Alex Balkâ Defamation-for-sale blogger

- Alexander Pareeneâ Defamation-for-sale blogger

- Alexandra Philippidesâ Defamation-for-sale blogger

- Allison Spinner â Wife of Steve Spinner and lawyer at WSGR and Solyndra who helped Feinstein rig the Solyndra cash ((Under investigation. All assets being tracked and terminated.) **

- Allison Wentzâ Defamation-for-sale blogger

- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation) **

- Andrew Collinsâ Defamation-for-sale blogger

- Andrew Magaryâ Defamation-for-sale blogger

- Andrew McCormack

- Andrew Orinâ Defamation-for-sale blogger

- Andy Barbour, Smith-Free Group **

- Andy Bechtolsheim â VC- **

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

THE UNITED STATES DEPARTMENT OF ENERGY PAYOLA SCAM

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a $25 billion direct loan program funded by Congress in fall 2008 under the guise of *"providing debt capital to the U.S. automotive industry for the purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. "* The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, ***one of the most criminally corrupt failures in American history***.. It was only a "success" as one of the biggest political slush-funds ever created!

A case study in pay-to-play cronyism

By Dan Epstein (White House Counsel)

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court **ruled** that Cause of Action, where I am executive director, can **proceed with a lawsuit** against the Department of Energy. Weâ re suing the federal government for the blatant political favoritism in its $25 billion â Advanced Technology Vehicle Manufacturing Loan Program.â

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car

manufacturers: **Tesla**and **Fisker**.

Both companiesâ political connections run deep, especially Teslaâ s. The companyâ s founder, Elon Musk, was a **max donor** for President Obama. One of its board members, **Steven Westly**, was appointed to a Department of Energy **advisory board**. And another Obama bundler, Tesla investor and adviser Steven Spinner, **secured employment** in the departmentâ s Loan Program Officeâ the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since **gone bankrupt**, **was backed** by a San Francisco **venture capital firm** whose senior partners **donated millions** to the 2008 Obama campaign and other Democrat causes. **One partner**, **John Doerr**, parlayed his support into a seat on the Presidentâ s Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

Thereâ s no shortage of examples. The departmentâ s leadersâ including then-Secretary of Energy Steven Chuâ repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). **One emails reads**, â DOE has made a political commitmentâ to approve a companyâ s loan. Another says the â pressure is on rea lheavyâ from none other than Vice President Joe Biden. And still **another shows** an employee asking, â whatâ s another billion anyhow?â

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companiesâ applications faster. The government **gave them extraordinary access** to its staff and facilitiesâ even to the point of having government employees personally walk them through the loan application and approval process.The department ignored its own lending rules in order to approve the companiesâ loans. And it **renegotiated the terms of some loans** after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fiskerâ s cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them bothâ and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPVâ s application because **its vehicle was powered by hydrogen**. It was an electric SUV. It also raised objections that it didnâ t raise with other companies whose applications were approved. For instance: The bureaucracy **criticized** the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply.

This casts the Department of Energyâ s loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S.taxpayer.

Sadly, similar examples are widespread in Washington. Thatâ s no surprise considering the feds spend **roughly $100 billion a year** in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, **over two-thirds of likely voters** think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. Theyâ re right.

This points to a simple conclusion: Politicians and bureaucrats shouldnâ t use the publicâ s money to pad private companiesâ bottom lines. As the Department of Energyâ s green-vehicle loan program shows, the capacity for corruption is immenseâ and inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that Silicon Valley has attempted to control. So, you see, it isn't about *"saving the environment"*; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the ***facade group: "The National Venture Capital Association"***, DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's ***two main manipulation tricks*** are: 1.) **STONE-WALLING** - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) **INTERPRETIVE LYING** - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was ***DEFRAUDED, LIED TO, STONE-WALLED*** and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without

ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanual), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A "Silicon Valley Mafia" (AKA - "The PayPal Mafia") exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4-way conflict of interest in which Google staffed the largest contingent of Obama White House staff.

- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies. If one wants to look at dirty Russian collusion, they need look no further than Steven Chu, the architect of the failed Iran Nuclear deal and corrupt Uranium One deal. Steven Chu and Rahm Emanual ordered DOE's Sandia Livermore Labs and Argonne Labs (who they were both connected to) to manipulate Applicant data in order to only favor camapign financiers companies.

- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.

- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.

- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.

- The Obama Administration promised an exclusive on Afghanistan mining deals to Frank Guistra and the Silicon Valley oligarchs for lithium, indium, cobalt and rare-earth metals mining after USAID pitched (http://2.bp.blogspot.com/_VyTCyizqrHs/TBaffwKixYI/AAAAAAAAH74/Wee8LTQfo3k/s1600/afghanminerals.jpg) manipulated reports from McKinsey Consulting saying that *"Afghanistan was the Saudi Arabia of lithium and had trillions of dollars of lithium"* to dig up. It turned out to be a lie to get oligarchs to support Obama's Afghan invasion. (http://pubs.usgs.gov/fs/2007/3063/pdf-page.jpg) DOE helped sell this lie because the Russians had already scoured Afghanistan and found it to be fairly worthless as a mining potential. Elon Musk bought into this for his battery monopoly. This is why Steven Chu gave so much money to Russians at

Ener1 and Severstal. DOE staff were fully aware of this. (http://www.mining.com/1-trillion-motherlode-of-lithium-and-gold-discovered-in-afghanistan/)

- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk share an apartment and financial programs.

- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.

- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.

- The DOE ATVM and LGP programs resulted in: ***THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA!*** Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need, and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. **TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL! After realizing this, Applicants and Congressional insiders forced ALL of the kick-back funded companies into bankruptcy as payback for the corruption and abuse of their resources. Said one Senator:** ***"If they want bankruptcies, we will give them bankruptcies..."***

- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".

- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.

- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.

- As shown by this letter:

https://news.wttw.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20
...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.

- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!

- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.

- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.

- A CBS News 60 Minutes segment called: "***The Cleantech Crash***" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.

- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.

- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.

- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.

- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.

- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.

- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a ***"first-come, first served"*** basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.

- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.

- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.

- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.

- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have ***NEVER*** gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'

by Tyler Durden

In his first pair of interviews since being sworn in, Attorney General Barr told Fox News and WSJ that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation he has tasked

John Durham, the US Attorney from Connecticut, with leading - because Americans need to know whether the government **"put a thumb on the scale"** to try and undermine President Trump both during the campaign and during the first two years of his term, just like **"we need to ensure that foreign actors don't influence the outcome of our elections."**

Separately, he told WSJ that **"government power was used to spy on American citizens**...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, **though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision,** in the summer of 2016, to open a counterintelligence investigation. At this point, **Durham's review isn't a criminal investigation,** and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

> My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!
>
> â Donald J. Trump (@realDonaldTrump) May 17, 2019

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

The Corrupt Mafia-like Silicon Valley 'Greentech' VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

Thereâ ve been a couple articles in the past few weeks pointing to President Obama as the â clean tech investor in chiefâ and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energyâ s (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didnâ t have a dedicated person in Washington â in some circles they call them lobbyists â maneuvering grant and loan programs, you werenâ t able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between $50 billion and $80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obamaâ s Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleinerâ s investments have had some successful government bids, most notably the $529 million loan to Kleiner portfolio company Fisker Automotive out of the DOEâ s highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the $25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Ventureâ s LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOEâ s loan guarantee and ATVM loan programs. About a third of the DOEâ s loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasnâ t a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked â excluding some potential applicants unnecessarily.â

Thereâ s nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gatesâ calls for boosting federal government investing to $16 billion per year into energy innovation. All Iâ m saying is that this level of influence should be watched.

Evidence that proves these assertions can be viewed at *http://www.londonworldwide.com*

ALL TESLA BATTERIES ARE EXPECTED TO HAVE THEIR INTERNAL BATTERY CHEMISTRY DEGRADE AND EXPLODE VIA MULTIPLE CHEMISTRY COMPOUND FAILURES.

WHY ARE FEDERAL LAW ENFORCEMENT AND REGULATORY AGENCIES COVERING UP THESE CRIMES?

BECAUSE MUSK AND HIS COHORTS ARE THE BIGGEST POLITICAL CAMPAIGN FINANCIERS IN AMERICA

THESE ARE THE FACTS THAT CALIFORNIA SENATORS, WHO OWN STOCK IN TESLA, WANT COVERED UP:

WHY DOES EVERY FAMOUS PERSON THAT GETS HIRED BY TESLA END UP QUITTING? Because Tesla tells these people a load of BS to get them to sign on. Then, when they see what is really going on at Tesla, they run for the hills. The crime, corruption fraud and cronyism at Tesla is self-evident once you are inside the Tesla cesspool. They find out, later, things like:

- *"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"*
- *"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"*
- *"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"*
- *"His is not faithful to his girlfriends"*
- *Tesla and SolarCity Solar Panels catch on fire and set Walmart's and other buildings on fire!*
- *He hung out with Pablo Escobar and is now getting sued by Pablo's brother for stealing stuff*
- *His SpaceX staff built the online drug crime network called: Silk Road*
- *He took his young "wife" to hang out with Sex Criminal Jeffrey Epstein*
- *He hires Gizmodo, Gawker and Jalopnik to put hit-jobs on people*
- *"The workers that build his batteries die or sicken from toxic poisoning"*
- *99% of every web comment, blog item or news story about Tesla or Elon Musk is bought and paid for by Elon Musk in order to hype up Elon Musk's self-image as a 'socialist tech god' "*
- *"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"*

- *"His self driving cars always crash into people and structures and are hacked in seconds by anyone"*
- *Obama ordered The Department of Energy to finance Tesla*
- *"He is a narcissist"*
- *Elon Musk and his friends bribed Secretary of Energy Steven Chu*
- *Google and Tesla rig stock market transactions*
- *Google and Tesla broke a large number of SEC, FEC, RICO and Anti-trust laws together*
- *"His partner: Steve Jurvetson, has been charged with sex and corruption issues"*
- *"He arranged government kick-backs with the White House"*
- *"He is the world's biggest government mooch"*
- *"He is a member of the Palo Alto Mafia"*
- *"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"*
- *"His so-called 'foundation" is just a payola and tax evasion scam for his family"*
- *"His batteries are the most dangerous use of lithium ion storage ever conceived"*
- *"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"*
- *"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him. Musk is 100% bull-shit"*
- *"His SpaceX is nothing more than a domestic spy satellite company"*
- *"Musk's brain chip company tortures small animals in bad science experiments"*
- *"His father screwed his daughter and got her pregnant"*
- *"Dianne Feinstein and her family own Musk interests"*
- *"You can't put out the fires when his batteries explode"*
- *"The fumes from his thermal battery vapors give you cancer, lung and brain damage"*
- *"His is not faithful to his girlfriends"*
- *"The workers that build his batteries die or sicken from toxic poisoning"*
- *"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"*
- *"He is addicted to drugs and booze"*
- *"He has sociopath mental issues"*
- *"He is a narcissist"*
- *"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."*
- *"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"*
- *"His partner: Steve Jurvetson, has been charged with sex and corruption issues"*
- *"He arranged government kick-backs with the White House"*
- *"He is the world's biggest government mooch"*
- *"He is a member of the Palo Alto Mafia"*
- *"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"*
- *"More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"*
- *"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"*
- *"His so-called 'foundation" is just a payola and tax evasion scam for his family"*
- *"His batteries are the most dangerous use of lithium ion storage ever conceived"*
- *"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"*
- *"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"*
- *"Musk's brain chip company tortures small animals in bad science experiments"*
- *"His father screwed his daughter, Musk's little sister, and got her pregnant"*
- *"Dianne Feinstein and her family own Musk interests"*
- *"You can't put out the fires when his batteries explode"*

- *"The fumes from his thermal battery vapors give you cancer, lung and brain damage"*
- *"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."*
- *There are thousands of additional points about why Musk is a criminal and a scammer...*

The Tesla CleanTech Crash:

Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds. Elon Musk, Steve Jurvetson, Tim Draper, Steve Spinner, Steve Westly, et al...organized the attacks and lobbying. Demand a Congressional Special Counsel investigation!

Any news outlet or news network that hides, or refuses to publish, these articles is revealing itself to be a ***Fake News Shill Propaganda Operation*** working as an information manipulation operation for the #PaloAltoMafia and Elon Musk's Deep State political corruption program! Contact each article author to debate any points in their article. Almost every article has a by-line.

Google, Elon Musk's political and financial partner (***Google Leaked***), is the world's largest mass public information manipulation and mass voter behavior modification service and will not allow this site to be equally visible on the internet in order to protect their stock market and political investments.

We have demanded FBI, SEC, FTC, FEC, NHTSB and Congressional investigations and those have now begun!

Together, we all got Elon Musk fired as CEO, now we need to have him arrested for RICO crimes, bribery, tax evasion, stock market manipulation, fraud, safety-lies, tort-based interference, anti-trust violations, illicit revolving door payola and more...!

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the cityâ s San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all

other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers

have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.'A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

The Massive Lies, Corruption And Fraud Of Elon Musk And Tesla Motors:

You may have run across Muskâ s self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or

live TV debates. Musk will do anything to keep this information from getting out butâ ¦ it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: â child labor electric car batteriesâ .

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his â trophy wifeâ Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance â Butt buddyâ . They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VCâ s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk â boyfriendâ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: â Muskâ , â Teslaâ or â Tesla Fireâ . They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no â Tesla Fan Boysâ . All of the fanatic Tesla comments on the internet are Muskâ s, Thielâ s, Jurvetsonâ s and Draperâ s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a â Tesla Fan Boyâ on blogs.

The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why arenâ t all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Letâ s take a look at the â lithiumâ in Muskâ s horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME

GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly â filling up with toxic smokeâ as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electrnics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal â reportâ from USAID that said there was â A TRILLION DOLLARS OF LITHIUM IN AFGHANISTANâ and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over $1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via â in-kindâ services.

ELON MUSK'S PAID-FOR FAKE NEWS MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times,

Tesla's out-of-control sudden-acceleration surge defects
and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of othersâ ¦These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNNâ s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running â Operation Echo Chamber,â which reportedly continues, in which he fed information to willing corporate media scribes. â They literally know nothing,â Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundationâ s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: â Today, we are revealingâ for the first timeâ the Justice Departmentâ s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.â

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trumpâ s team, as evidenced by Peter Strzok and Lisa Pageâ s texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls â SPYGATEâ .

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Hereâ s the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the â Electronic Surveillance Authorizationâ () â Foreign intelligence in relation to a US person (Trump or his associates) is information thatâ s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.â Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (â The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.â)

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch reportâ or only selectively reportâ to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.

2) To create â foreign intelligence,â John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.

3) Lynch certified Obamaâ s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a â smokescreenâ to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.

- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are â lostâ . Files in the application process â disappearedâ . Lois Lerner hard drive â incidentsâ are operated in order to seek to hide information and run cover-ups.

- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national â black-listsâ to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.

- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.

- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.

- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these â targetsâ were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.

- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over $40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Googleâ s â impressionsâ are manually controlled by Googleâ s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for itâ s ongoing prosecution of Googleâ s political manipulation of public perceptions.

- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.

- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.

- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.

- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.

- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.

- Covert Cartel financier: Google, placed Googleâ s lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Googleâ s operations as â Racketeeringâ , â Monopolistic Cartelâ and â Government Coup-likeâ behaviors. Thousands of articles and investigations detail the fact that Google, â essentiallyâ ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Googleâ s investors personally told Applicant they would â kill himâ . Google and the Obama Administration were â the same entityâ . Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the â targetâ in order to spy on and misdirect the subject.

- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from $150,000.00 to over $50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the â FISA Memoâ , Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as â hit-jobsâ against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!!

- Second former employee of controversial data firm to be questioned by special counselâ s inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica â which collapsed after the Observer revealed details of its misuse of Facebook data â confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the companyâ s activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign â received donations or paid for services from Cambridge Analytica â ¦beyond initial scoping workâ .

Damian Collins, chairman of parliamentâ s inquiry into fake news, said it was â no surpriseâ that Kaiser was under scrutiny by Mueller because â her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banksâ .

He said it was now vital Britain had its own inquiry into foreign interference: â We should not be leaving this to the Americans.â

Tom Watson, the deputy leader of the Labour party, echoed Collinsâ s statement, saying: â This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.â

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counselâ s inquiry because of work done with Paul Manafort, Trumpâ s campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, The Great Hack, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Muellerâ s investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clintonâ s presidential campaign â which indictments from Muellerâ s team say were obtained by Russian military intelligence â to use in Donald Trumpâ s campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: â She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin.â

Her legal representatives later wrote to the paper to say that the allegations, including that she had â channelledâ donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 â long before she worked at Cambridge Analytica â and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her â about how he saw the worldâ . He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had â unsettlingâ parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeriaâ s emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "Iâ m Being â Targetedâ For Saying the Media is â Mostly Liberal"
by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as â mostly liberal.â

Logan told Breitbart podcaster Mike Ritland the remarks made on his show â which drew widespread attention online â amounted to â professional suicide.â

Defending her remarks on Hannityâ s show, Logan said that as the result of her speaking out about how the

media is â mostly liberalâ she has been targeted because she is an independent voice.

â Any journalists who are not beating the same drum and giving the same talking points,â she insisted â pay the priceâ for not going along with the liberal crowd.

She also called out her targeters by name.

â I know theyâ re going to come after me,â she told Hannity. â Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter.â

She added: â They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They donâ t get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? Iâ m not owned by the left or the right.â

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of â weightâ in most news organizations on â one side of the political spectrum.â

â The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So thatâ s just a fact, right?â she told Ritland.

She also trashed reporting based on single, anonymous government sources.

â Thatâ s not journalism, thatâ s horseshit,â Logan stressed. â Responsibility for fake news begins with us. We bear some responsibility for that, and weâ re not taking ownership of that and addressing it. We just want to blame it all on somebody else.â

==========

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Groupâ s intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name) , last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israelâ s secret services and described themselves as â private Mossads.â Psy-Group initially stood out among its rivals because it didnâ t just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert â influenceâ operations to benefit the candidate. Psy-Groupâ s founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The companyâ s posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.â s elite â namely Donald Trump.

â Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,â one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

â There are dozens of payments from the media flowing into their (Fusion GPSâ) account,â one federal law enforcement official said. â One company wired funds to Fusion (GPS) more than a dozen times.â

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trumpâ s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories â likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was Buzzfeed â the only company to publish the full bogus dossier â on that list?

And who is on the payroll? We are trying to run that information down.

And why arenâ t these people behind bars?

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

==========

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury **automaker Fisker Automotive, which drew down on $192 million before having its government credit stripped away. Fiskerâ s loan was sold off to a Chinese billionaire for $25 million in 2013, netting taxpayers a $139 million loss.**

THE FILES AT HTTP://WWW.LONDONWORLDWIDE.COM (AND HUNDREDS OF OTHER DIGITAL REPOSITORIES AROUND THE GLOBE) HOLD PROOF OF THESE ASSERTIONS OF CRIMINAL AND ILLICIT CORRUPTION ACTIVITIES OPERATED BY WHITE HOUSE AND DEPARTMENT OF ENERGY EXECUTIVES!

DEMAND THAT THE WHISTLE-BLOWERS RECEIVE PROTECTION AND ARE ALLOWED TO SPEAK BEFORE CONGRESS!

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

DOE corruptionâ appointed and elected officials should face prison time

Marita Noon

|

An exhaustive review of 350+ pages of leaked emails regarding the Obama administrationâ s handling of the various green-energy loan and grant programs makes several things very clear: they lied, engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process â taxed investorsâ patienceâ â as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didnâ t think they were treated unfairly. He told me, â At the end of the day, we couldnâ t get through the process.â But, he admits, he hasnâ t read the emails.

Aptera was trying to build a very efficient electric vehicle with an under $30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didnâ t. Wilbur reports that he didnâ t donate to any candidate. He wanted to keep the whole process clean and do what was â good for America.â

The report from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and â shut down on December 2, 2011.â The report implies that Aptera was led on: â After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of $150 million if the company was able to raise $80 million privately.â And: â The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.â

Apteraâ s 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports Iâ ve written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a blog post specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate), got loans in 2010 and then the Vehicle Production Groupâ s loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissanâ both of which, according to the House report, â were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the â Historic Agreement.â â

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatosâ research, and personal experience, a different ATVM applicant has now taken its case to court citing â corruption and negligence.â

On November 16, 2012, XP Technologies filed a lawsuit against the federal government concerning the DOEâ s denial of XP Technologyâ s loan guarantee application. The complaint alleges: â criminal activities

did take place by DOE staff and affiliates.â A November 23 press release announces that XP Technologies is now represented by Cause of Action, â a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity.â

According to the document filed on November 16, â Plaintiffs' backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award â winnerâ , has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market.â

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: â Staff from within the DOE have provided evidence which is quite compelling.â As Aptera's Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a â principled stand,â which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from â above the agency.â Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo opsâ as well as providing talking points for the president.

Our XP source told us â We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary.â The leaked emails support this accusation, specifically regarding the â business connections.â In her post, Lakatos calls it â green fraternizing.â The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didnâ t provide us with a name, the XP official said, â We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially.â The discovery the lawsuit will provide will expose the â senior senator,â but our previous research shows that Senator Harry Reidâ s actions seem to fit the XP officialâ s comment.

XP Technologies believes that â DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required.â

Having extensively studied the DOEâ s various loan programs, including the ATVM, Lakatos and I agree with our sourceâ s startling conclusion: â Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or?appointed, officials might not be seeing measures ranging from censure or even federal prison time.â

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than our report, the October 31 release of the

emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the Heritage Foundation broke the XP story: â A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energyâ s decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe.â

On November 19, Lakatos, whose work is listed as â evidenceâ in the legal complaint, received a call from Fox Newsâ Gary Gasteluâ who reported on the story on November 20. The next day, Fox News covered the lawsuit on Americaâ s Newsroom. Even the Drudge Report picked up on the story.

XP has a litigation website on which the company states: â The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!â They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for othersâ especially industries who have been wronged by the Obama Administrationâ s practices (such as energy). The lawsuit mayâ or may notâ send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

IN ADDITION TO OUR EYE-WITNESS, FIRST-HAND, VIEWING OF THESE CRIMES THESE SMALL SAMPLES OF THE BROADCAST NEWS REPORTS, CONGRESSIONAL REPORTS, FBI CASE EVIDENCE AND AGENCY REPORTS PROVE EVERY ASSERTION WE HAVE MADE:

GOOGLE BOSSES, INCLUDING ERIC SCHMIDT, TOLD ASSOCIATES: "OBAMA NEVER WOULD HAVE BEEN ELECTED WITHOUT GOOGLE'S DIGITAL MASS PERCEPTION-MANIPULATION AND OPINION-STEERING TECHNOLOGIES..." SEE MORE AT: https://www.thecreepyline.com

EXECUTIVES FROM GOOGLE, FACEBOOK, NETFLIX AND THE SANDHILL ROAD VENTURE CAPITALIST OFFICES USE SILICON VALLEY AND OTHER REGIONS AS THEIR PERSONAL HUNTING GROUNDS FOR SEX ABUSE, SEX TRAFFICKING, SEX CULTS AND DATE RAPE!

THEIR DEGENERACY TRACKS BACK THROUGH THEIR BUSINESS AND POLITICAL ACTIVITIES AND PROVES THAT THEY HAVE NO RIGHT TO ENGAGE IN PROPER SOCIETY AND CULTURE.

THE PUBLIC IS NOW JOINING TOGETHER TO EXPOSE THEM AND SEEK THEIR ARREST!

THE SILICON VALLEY AND HOLLYWOOD OLIGARCH SEX PERVERSIONS

- These twisted deeds indicate the mind-set, moral depravity and disturbed culture of the, so-called, "Oligarchs" who control modern media.

- Silicon Valley Venture Capitalists Rape And Sex-Extort Interns.

- Silicon Valley's Greylock Partners, Kleiner Perkins, and most other VC's are rapists, sexual predators and political bribery enthusiasts and nobody ever arrests them for it...

- They Hire hookers and Rent-Boys, not for the sex, but to be able to "control another human" because they are almost all Sociopath personality types.

- They hire "clubs" to secure underage children for them because they want to have total manipulation over a helpless person because it makes these men feel more powerful.

- The Rosewood Hotel and the Four Seasons hotels in Palo Alto are riddled with $6000.00 per night hookers, rent boys, Stanford Co-Ed "sugar babies" and Russian Mafia managed Ukrainian prostitutes. You just have to know the "code words" and hand signals to play "the game".

- Google executives killed by their hookers, black-mailed by their hookers, exposed in sex slave rings and worse...

- Huge number of Google, Netflix and Facebook senior executives are homosexual and pressure staff for sex.

- San Jose and San Francisco International Airports have a non-stop flow of European Hookers flown in by tech CEOs who got them off of "seeking arrangements.com" and "match.com" using the "code words".

- Almost every tech executive and Sandhill Road VC has been charged with spousal abuse, sex trafficking, intern sex extortion, bribing Stanford to cover up sex exploitation and worse.

- Stanford University bosses cover-up, and support, frat house sex crimes in order to keep rich daddies donating to Alumni funds.

- Basements and secret rooms in some of their Woodside and Atherton, California mansions house BDSM chambers and sex abuse lock-rooms

By KATIE BENNER

Rachel Renock, the chief executive of Wethos, center, with her business partners, Claire Humphreys, left, and Kristen Ablamsky. Ms. Renock said they received sexist comments while seeking financing. Credit Sasha Maslov for The New York Times

Their stories came out slowly, even hesitantly, at first. Then in a rush.

One female entrepreneur recounted how she had been propositioned by a Silicon Valley venture capitalist while seeking a job with him, which she did not land after rebuffing him. Another showed the increasingly suggestive messages she had received from a start-up investor. And one chief executive described how she had faced numerous sexist comments from an investor while raising money for her online community website.

What happened afterward was often just as disturbing, the women told The New York Times. Many times, the investorsâ firms and colleagues ignored or played down what had happened when the situations were brought to their attention. Saying anything, the women were warned, might lead to ostracism.

Now some of these female entrepreneurs have decided to take that risk. More than two dozen women in the technology start-up industry spoke to The Times in recent days about being sexually harassed. Ten of them named the investors involved, often providing corroborating messages and emails, and pointed to high-profile venture capitalists such as Chris Sacca of Lowercase Capital and Dave McClure of 500 Startups.

The disclosures came after the tech news site The Information reported that female entrepreneurs had been preyed upon by a venture capitalist, Justin Caldbeck of Binary Capital. The new accounts underscore how sexual harassment in the tech start-up ecosystem goes beyond one firm and is pervasive and ingrained. Now their speaking out suggests a cultural shift in Silicon Valley, where such predatory behavior had often been murmured about but rarely exposed.

The tech industry has long suffered a gender imbalance, with companies such as Google and Facebook acknowledging how few women were in their ranks. Some female engineers have started to speak out on the issue, including a former Uber engineer who detailed a pattern of sexual harassment at the company, setting off internal investigations that spurred the resignation in June of Uberâ s chief executive, Travis Kalanick.

Most recently, the revelations about Mr. Caldbeck of Binary Capital have triggered an outcry. The investor has been accused of sexually harassing entrepreneurs while he worked at three different venture firms in the past seven years, often in meetings in which the women were presenting their companies to him.

Several of Silicon Valleyâ s top venture capitalists and technologists, including Reid Hoffman, a founder of LinkedIn, condemned Mr. Caldbeckâ s behavior last week and called for investors to sign a â decency pledge.â Binary has since collapsed, with Mr. Caldbeck leaving the firm and investors pulling money out of its funds.

The chain of events has emboldened more women to talk publicly about the treatment they said they had endured from tech investors.

â Female entrepreneurs are a critical part of the fabric of Silicon Valley,â said Katrina Lake, founder and chief executive of the online clothing start-up Stitch Fix, who was one of the women targeted by Mr. Caldbeck. â Itâ s important to expose the type of behavior thatâ s been reported in the last few weeks, so the community can recognize and address these problems.â

The womenâ s experiences help explain why the venture capital and start-up ecosystem â which underpins the tech industry and has spawned companies such as Google, Facebook and Amazon â has been so lopsided in terms of gender.

Most venture capitalists and entrepreneurs are men, with female entrepreneurs receiving $1.5 billion in funding last year versus $58.2 billion for men, according to the data firm PitchBook. Many of the investors hold outsize power, since entrepreneurs need their money to turn ideas and innovations into a business. And because the venture industry operates with few disclosure requirements, people have kept silent about investors who cross the lines with entrepreneurs.

Some venture capitalistsâ abuse of power has come to light in recent years. In 2015, Ellen Pao took her former employer, the prestigious venture firm Kleiner Perkins Caufield & Byers, to trial for allegations of gender discrimination, leveling accusations of professional retaliation after spurned sexual advances. Ms. Pao lost the case, but it sparked a debate about whether women in tech should publicly call out unequal treatment.

â Having had several women come out earlier, including Ellen Pao and me, most likely paved the way and primed the industry that these things indeed happen,â said Gesche Haas, an entrepreneur who said she was propositioned for sex by an investor, Pavel Curda, in 2014. Mr. Curda has since apologized.

Some of the entrepreneurs who spoke with The Times said they were often touched without permission by investors or advisers.

At a mostly male tech gathering in Las Vegas in 2009, Susan Wu, an entrepreneur and investor, said that Mr. Sacca, an investor and former Google executive, touched her face without her consent in a way that made her uncomfortable. Ms. Wu said she was also propositioned by Mr. Caldbeck while fund-raising in 2010 and worked hard to avoid him later when they crossed paths.

â There is such a massive imbalance of power that women in the industry often end up in distressing situations,â Ms. Wu said.

After being contacted by The Times, Mr. Sacca wrote in a blog post on Thursday: â I now understand I personally contributed to the problem. I am sorry.â In a statement to The Times, he added that he was â grateful to Susan and the other brave women sharing their stories. Iâ m confident the result of their courage will be long-overdue, lasting change.â

After the publication of this article, Mr. Sacca contacted The Times again to amend his original statement, adding: â I dispute Susanâ s account from 2009.â

Many of the women also said they believed they had limited ability to push back against inappropriate

behavior, often because they needed funding, a job or other help.

In 2014, Sarah Kunst, 31, an entrepreneur, said she discussed a potential job at 500 Startups, a start-up incubator in San Francisco. During the recruiting process, Mr. McClure, a founder of 500 Startups and an investor, sent her a Facebook message that read in part, â I was getting confused figuring out whether to hire you or hit on you.â

Ms. Kunst, who now runs a fitness start-up, said she declined Mr. McClureâ s advance. When she later discussed the message with one of Mr. McClureâ s colleagues, she said 500 Startups ended its conversations with her.

500 Startups said Mr. McClure, who did not respond to a request for comment, was no longer in charge of day-to-day operations after an internal investigation.

â After being made aware of instances of Dave having inappropriate behavior with women in the tech community, we have been making changes internally,â 500 Startups said. â He recognizes he has made mistakes and has been going through counseling to work on addressing changes in his previous unacceptable behavior.â

Rachel Renock, the chief executive of Wethos, described a similar situation in which she faced sexist comments while seeking financing for her online community site. While she and her female partners were fund-raising in March, one investor told them that they should marry for money, that he liked it when women fought back because he would always win, and that they needed more attractive photos of themselves in their presentation.

They put up with the comments, Ms. Renock said, because they â couldnâ t imagine a world in which that $500,000 wasnâ t on the table anymore.â Ms. Renock declined to name the investor. Wethos raised the $500,000 from someone else and is still fund-raising.

Wendy Dent, 43, whose company Cinemmerse makes an app for smart watches, said she was sent increasingly flirtatious messages by a start-up adviser, Marc Canter, as she was trying to start her company in 2014. Mr. Canter, who had founded a software company in the 1980s that became known as Macromedia, initially agreed to help her find a co-founder. But over time, his messages became sexual in nature.

In one message, reviewed by The Times, he wrote that she was a â sorceress casting a spell.â In another, he commented on how she looked in a blue dress and added, â Know what Iâ m thinking? Why am I sending you this â in private?â

Mr. Canter, in an interview, said that Ms. Dent â came on strong to me, asking for helpâ and that she had used her sexuality publicly. He said he disliked her ideas so he behaved the way he did to make her go away.

Some entrepreneurs were asked to not speak about the behavior they experienced.

At a start-up competition in 2014 in San Francisco, Lisa Curtis, an entrepreneur, pitched her food start-up, Kuli Kuli, and was told her idea had won the most plaudits from the audience, opening the door to possible investment. As she stepped off the stage, an investor named Jose De Dios, said, â Of course you won. Youâ re a total babe.â

Ms. Curtis later posted on Facebook about the exchange and got a call from a different investor. He said â that if I didnâ t take down the post, no one in Silicon Valley would give me money again,â she said. Ms. Curtis deleted the post.

In a statement, Mr. De Dios said he â unequivocally did not make a defamatory remark.â

Often, change happens only when there is a public revelation, some of the women said. In the case of Mr. Caldbeck and Binary, the investor and the firm have apologized, as has Mr. Caldbeckâ s previous employer, the venture capital firm Lightspeed Venture Partners, which had received complaints about him.

â We regret we did not take stronger action,â Lightspeed said on Twitter on Tuesday. â It is clear now that we should have done more.â

Lindsay Meyer, an entrepreneur in San Francisco, said Mr. Caldbeck put $25,000 of his own money into her fitness start-up in 2015. That gave Mr. Caldbeck reason to constantly text her; in those messages, reviewed by The Times, he asked if she was attracted to him and why she would rather be with her boyfriend than him. At times, he groped and kissed her, she said.

â I felt like I had to tolerate it because this is the cost of being a nonwhite female founder,â said Ms. Meyer, who is Asian-American.

But even after she reached out to a mentor, who alerted one of Binaryâ s investors, Legacy Venture, to Mr. Caldbeckâ s actions, little changed. Legacy went on to invest in Binaryâ s new fund. Binary and Mr. Caldbeck declined to comment.

â We failed to follow up on information about Mr. Caldbeckâ s personal behavior,â Legacy said in a statement. â We regret this oversight and are determined to do better.â

A Silicon Valley venture capitalist has been sued for $40 million by a woman who claims he used her as a virtual sex slave for 13 years.

Michael Goguen, who had worked for a firm that funded Google and Paypal, â sexually and physicallyâ abused Amber Laurel Baptiste over more than 13 years after picking her up at a Texas strip club, her lawsuit alleges.

Baptiste, who claims she was brought to the United States from Canada by human traffickers at 15, said she endured â countless hours of forced sodomyâ from the tech titan. The former stripper said Goguen made her endure demeaning sexual acts, sodomized her for â six hours at a time,â and forced her to call him â kingâ and â emperor.â

Filed in San Mateo County, Calif., on March 8, her suit details a life of torture and servitude as she was jetting around the globe to serve as the millionaireâ s plaything. She claims Goguen had promised to save her from human trafficking but instead became an even worse predator himself.

Goguen, who was forced to step down from his position at Sequoia Capital, did not deny that the two had a sexual relationship but insisted the sex was consensual. He filed a countersuit against Baptiste claiming she is an â exotic dancer . . . looking for a payday.â

The venture capitalist said Baptiste was obsessed with him and sought to extort him because she was jealous of his wife. In his countersuit, Goguen provides pages of texts and emails in which she apparently refers to him as â Prince Charming,â â My Beautiful Loveâ and â the sweetest man in the world.â

The suit includes Bapisteâ s descriptions of the â amazing sexâ the two had together and photos that she allegedly sent him in which she is seen playfully posing in her underwear.

Baptiste is demanding $40 million, saying the two agreed on the amount to compensate her for the horrors

she had suffered. Goguen, who has already paid her $10 million, said she is â a woman scornedâ and a victim â of her own delusions.â

He claims that when he tried to end their relationship, Baptiste became bent on vengeance, threatening to ruin his life and reputation. He said that he had no choice but to pay her the $10 million, but that she refused to relent and demanded more money.

Sequoia Capital released a statement that called Goguenâ s departure from the firm the â appropriate course of action.â A philanthropist, Goguen was lauded for donating $2 million to fight online child pornography and sex trafficking where he lives in Montana.

Goguen is not the only business leader whoâ s faced backlash over sexually inappropriate behavior.

FACEBOOK BOSS IN UNDER-AGE SEX SCANDAL

Dov Katz, head of the computer vision and machine learning group at Facebook-owned Oculus, has been charged in King County for attempted commercial sexual abuse of a minor. The 38-year-old tech exec allegedly attempted to contact what he believed to be was a 15-year-old girl for sex. The fictitious 15-year-old was actually an undercover police officer with the Tukwila Police Department, a city just south of Seattle.

The news was first reported by KING 5, which said that Katz was arrested by Tukwila Police on Wednesday. Katz is to be arraigned on January 5th, and bail was set at $125,000. An Israeli citizen who resides in California, Katz is forbidden to have contact with any minors, except in the presence of a responsible adult, according to charging documents. Katz allegedly **responded to an online advertisement that offered sex in exchange for money, an ad which was posted by undercover police officer posing as a 15-year-old girl.**

Horrific Google Anal Sex Slave Case Uncovers Twisted Perversions Of Google Executives

By Samantha Conners - APT

Michael Goguen, Google's married senior investor, â sexually and physicallyâ abused Amber Laurel Baptiste with constant anal sex over more than 13 years after picking her up at a Texas strip club. His company: Sequoia Capital, has had other run-ins with cheating married executives, escorts and tax evasion schemes, per legal filings.

Eric Schmidt, the head of Google, proclaimed that he would have a â open marriageâ where he could have sex any time, with anybody, and is documented in a ream of news articles and video regarding his fifteen million dollar â sex penthouseâ in New York.

Sergey Brin, another head of Google, is featured in numerous news articles for his â three way sex rompâ with multiple Google employees forcing one employee to move to China to escape him. A married Google senior executive named Hayes, who helped rig Google's searches for political clients, was murdered on his â sex yachtâ by his prostitute, which other Google executives had used.

Ravi Kumar, another VC associated with Google Executives, was also murdered by a pack of hookers and pimps that frequented his Silicon Valley home.

Valley Girls was a private escort service that used Stanford Co-eds to service the sexual kinks of Google executives.

Ellen Pao famously sued Google founding investor John Doerr, and his company Kleiner Perkins, for sexual abuse.

Google employee divorce filings hold the Silicon Valley record for use of the word â abuseâ as one of the reasons given in the legal papers filed to initiate the divorce.

The list of kinky, twisted, bizarre sexual antics of Google executives, and their investors, goes on for pages and pages...

Google seems to attract the most twisted, perverted, morally decrepit men in the world. One has to wonder why, of all the large companies on Earth, only Google got to place the majority of it's people in the White House? That's right, Nike doesn't have it's people in the White House. Macy's doesn't either. Neither does Chevron, or John Deere tractor or any other company on Earth.

Only Google, exclusively and uniquely, had all of their people placed in the White House and top federal agency lead positions. What's up with that? Were they selected because of their technical skills or their ability to make people bend over?

An addiction to dirty sexual perversions are not the only illicit trends that Google folks display. The Google investors are members of a financing cartel called the National Venture Capital Association

(NVCA). This group of frat boy elitists got busted for running the â Angelgateâ scandal in which they were documented rigging, colluding, black-listing and contriving the whole Silicon Valley start-up industry.

Then they were caught again when Eric Schmidt, Mr. â Sex Penthouseâ and the head of Google, wrote emails ordering a conspiracy against Silicon Valley engineers. This â No Poachingâ conspiracy got the Silicon Valley VC's sued in a class-action lawsuit, which the VC's lost. The Google founder's best friend: Jacques Littlefield, kept the world's largest private fully functional military tank squadron, in fully operational status, hidden in vast warehouses in his Silicon Valley estate in Woodside, California.

He said he had this arsenal: â just in caseâ . Does Google make white frat house men insane or does it draw the crazy ones to it?

The FBI is finally crunching down on these people. After so many years of the White House ordering the FBI to leave the Google VC's and Silicon Valley perverts alone, it was just getting plain embarrassing for the FBI. The audacious impunity with which Google, and it's friends, engaged in tax evasion, importing hookers, bribery, stock market rigging, anti-trust schemes and other crimes has become so overt, in the media, that it was created a spotlight on federal law enforcements avoidance of prosecution of the shenanigans of the Google crowd.

How Propaganda Spreads Angry White Manfluencer Silicon Valley ...

https://artificialisintelligentiaedictum.home.blog/2019/05/10/how-propaganda-spreads-angry-white-manfluencer-sili

While criticism just really is based on information from **Silicon Valley** power players who fast days at a "cargo **cult**" -type meditation retreat, there are staggering pods of consumer trends that shape the 11-point Lifestyle Plan of Spirit Baths.

Bad Sex in Silicon Valley - The Cut

https://www.thecut.com/2017/06/bad-sex-in-silicon-valley.html

But people do in fact get laid in **Silicon Valley**, as the show **Silicon Valley** recently dramatized. After more than three seasons of existing in a sexless, screen-filled hell, bumbling programmer Richard Hendricks finally had **sex**: an illicit tryst with his main client's fiancÃ©e, in an office conference room, late at night.

Let's Take the Cult out of Silicon Valley Culture ...

https://www.enterpriseirregulars.com/134781/lets-take-the-cult-out-of-silicon-valley-culture/

But sometimes **Silicon Valley cults** are not benevolent - Theranos being the best recent example. Continuing to work in such environments, prioritizing the needs of the **cult** over common sense and business ethics can do lasting damage to your personal relationships, to your health, and to your career.

WHO IS THE SILICON VALLEY MAFIA?

By Terry Reed and Mark Lawson

They are sex abusers like John Doerr and his entire Kleiner Perkins frat boy staff who were sued by Ellen Pao for the misogyny culture of sexual deviancy and abuse that they promote as their corporate culture. They are tax evaders like Ray Lane. They are hooker-hiring sex traffickers like Google's Forrest Hayes who died from an excess of drugs and sex. They are cheaters like Google's David Drummond who destroyed his family by his addiction to infidelity. They are sex addicts who own sex penthouses and cavort with the notorious Wendy Deng like Eric Schmidt. Amid the World's Largest Corporate Sex Scandals Google CEO Eric Schmidt will now leave Alphabetâ s board. Schmidt is a known womanizer despite being married for 37 years to Wendy Schmidt, who said in 2012 they started living separate lives because she felt like â a piece of luggageâ

following him around the world. News outlets have been sniffing around Schmidtâ s former flames looking for a Harvey Weinstein-like bombshell, a source close to Schmidt told The PostThey are mobster-class justice evasion lawyers like Wilson Sonsini and political bribe conduit lawyers like Perkins Coie. They are charged rapists and psychological sex manipulators like Joe Lonsdale.

When Kleiner Perkins offices were broken into by covert law enforcement operatives much was revealed. This was followed by the hack of all of John Doerr's emails' and the email of his top staff. This was followed by the revelation that Doerr bribes Stanford University for special favors for his kids and for certain 'relationships'. Now Doerr must walk on pins and needles because he has been put on notice that even the slightest bribe, political manipulation or mobster-like tech black-listing will not go unnoticed.

A female employee called Tesla's factory a 'predator zone' at a meeting where workers described the constant sexual harassment at Tesla.

DNC chairman Eric Bauman, the head of the California Democratic Party, and the Los Angeles County Democratic Party., has is former assistant say he was first assaulted after falling asleep in a hotel and waking up to his boss performing oral sex on him, and that there were two more instances where he was forced to submit to Bauman.

Bay area party guests and Rothschild-linked Bronfman sisters donated millions to the sex cult whose leaders, Allison Mack and Keith Raniere, have been charged with child sex trafficking.

Goddard, a director, producer and theme park designer, has faced many sex abuse allegations. Eight former members of a Santa Barbara youth theater group in the 1970s alleged that Goddard molested or attempted to molest them. A ninth was said to have told others before he died that Goddard sexually assaulted him as a child. Goddard denied their allegations.

The Silicon Valley Mafia is The Sandhill Road Venture Capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) partners and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, Linkedin, etc.) they control. They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control.

They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders. They collude on black-lists, valuation controls, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, executive prostitute clubs, trophy wife assignments, the bribery of politicians and worse. They are felons who pay politicians to halt investigations and interdiction efforts.

They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis abusers, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. They are not limited to California and also operate out of New York and Washington DC.

They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

The Department of Justice conducted a series of raids across California tech and media circles and arrested 238 people in connection with a Hollywood pedophilia network, but this story went totally ignored by almost all media outlets. According to police, the arrests included some entertainers, community leaders, white-collar

professionals, a monk, and other high-ranking clergy members. The raids were conducted by the Regional Internet Crimes Against Children task force, working directly with the Justice Department. Codenamed â Operation Broken Heart IIIâ , the sweeping raids targeted offenders wanted for the sexual exploitation of children, child prostitution, sex tourism and possessing and distributing child pornography, said Deputy Chief Matt Blake. Silicon Valley oligarchs use these intermediate level people to source up sex victims to be delivered to their Woodside and Atherton mansions.

Michael Goguen, who had worked for a firm that funded Google and Paypal, â sexually and physicallyâ abused Amber Laurel Baptiste over more than 13 years after picking her up at a Texas strip club, her lawsuit alleges. Baptiste, who claims she was brought to the United States from Canada by human traffickers at 15, said she endured â countless hours of forced sodomyâ from the tech titan. The former stripper said Goguen made her endure demeaning sexual acts, sodomized her for â six hours at a time,â and forced her to call him â kingâ and â emperor.â Filed in San Mateo County, Calif., her suit details a life of torture and servitude as she was jetting around the globe to serve as the millionaireâ s plaything. She claims Goguen had promised to save her from human trafficking but instead became an even worse predator himself.

The Silicon Valley Mafia Cartel is the largest provider of dark money bribes to West Coast politicians including Feinstein, Pelosi, Harris, Brown, Reid, Boxer, Lee, et al,. Those politicians and their families also covertly own the stock of the California tech companies and social media companies like Tesla, Solyndra, Abound, Google, Facebook, Netflix, etc. Larry Wallace, a senior staffer for Sen. Kamala Harris (D-CA) resigned over the discovery he was involved in a sexual harassment lawsuit and $400,000 payout to the sexually abused victim while working for then California Attorney General Kamala Harris. In related headlines we read: ***"ATTORNEY GENERAL THAT COLLUDED WITH KAMALA HARRIS EXPOSED AS SEX PERVERT!!!!"; "TOP DNC SEX PSYCHO MAY BE ALIGNED WITH SEX CULTS!"; "WHY IS EVERY DNC BIG SHOT TURNING OUT TO BE A SCREWED UP SEXUAL MESS!"***

The Bay Area headlines reek of perversion: ***"ANOTHER Democrat Sex Cult Exposed: 'sexual servitude' at San Francisco-based 'orgasmic meditation' company: One Taste"; "NXIUM, ONE TASTE, EMO, THE WOODSIDE CLUB: WHY DO THE DEMOCRATS GET INTO SUCH KINK?"; "UNDERCOVER CAMERA'S IN SAN RAFAEL, CALIFORNIA AT 4TH STREET "DANCE/YOGA" BUILDING AND MILL VALLEY CITY BUILDING CATCH SEX-FOR-SALE ESCORTS AND KINK"; "THEY USE "MEET-UP" (THE DNC'S NETWORKING SITE) TO HUNT FOR VICTIMS TO SEDUCE"; ""HOT LITTLE RED HEAD" TURNS OUT TO BE THE TOP ESCORT IN MARIN COUNTY"!***

In the latest case of Hollywood's and Silicon Valley's spiralling sexual abuse scandal, Variety reports that a veteran 58-year-old Disney executive has been charged with three felony counts of child sexual abuse. Jon Heely, the longtime director of music publishing at Disney, was arrested nearly a month ago and charged with three counts of lewd and lascivious acts on a child. One of the reported victims was 15. The other was abused for four years starting at the age of 11, according to the charges. Heely, who oversees the licensing of music from Disney films faces up to nine years and three months in prison according to The Daily News.

It is now time to sound the alarm bells on the economic prospects for the Millennial Generation in the Western world, but more importantly, at Stanford University. This generation of citizens aged 18 to 36, is the first in modern developed economies on course to have a lower standard of living than their parents. Housing affordability and a decaying job environment are some of the most pressing issues affecting Stanford Millennials. The future is bleak for this avocado and toast generation, as Western world economies have likely plateaued regarding economic growth. Surging debt and rising government bond yields are producing an environment that could lead to more hardships for this lost generation. Tech oligarchs have taken full advantage of broke Millennials by offering â adult arrangementsâ for a roof over their heads. Yes, you heard this correctly, Millennials are trading sex for a place to sleep and sex for tuition at Stanford University. Sugar Babies now comprise a large portion of Stanford students. Kleiner Perkins and Greylock VC's hire them for sex. Google and Facebook executives use them like disposable sex toys. The student debt crisis in the US

has gotten so bad, there's a growing group of young women â and some men â who are taking an unconventional approach to paying for college.Through dating websites like SeekingArrangement.com, and match.com, Sugar Babies, as they're called, partner up with wealthy, often older, men who want to spend money on them. Some 2.5 million Sugar Babies identified as students in 2016 on SeekingArrangement.com. Many of these Sugar Babies turned to the site to find someone who will pay for their education so they can graduate debt, and worry, free. In exchange, Sugar Babies go to dinners, attend events, or accompany their Sugar Daddy, or daddies, on trips. In some cases, they provide companionship or foster a mentor-mentee relationship. In other situations, the terms of the agreement include physical intimacy.

Jermaine Gagnon, 28, told DailyMailTV how he narrowly escaped death when DNC financier Edward Buck injected him with crystal meth at his sex-toy filled apartment. Gagnon said Buck, 63, paid to fly him from Minnesota to Los Angeles, drugged him with a substance dissolved in Gatorade then injected him with crystal meth. The 28-year-old shared photos of Buck, wearing white long johns, crouched over him on a mattress during one of their nights together last year. Gagnon shared images of sex toys Buck had for their encounter, saying: 'He had this red and black toolbox with all types of fetish toys, like c**k rings, sex toys'. He added: 'He gave me some Tommy Hilfiger tighty whities, a muscle t-shirt and some long johns. White knee-high socks'. Gagnon said during one encounter Buck offered him a drink he suspected had been spiked, feeling woozy and weak shortly after drinking it. He said: 'He took my phone. I was so scared. I felt death walked into my soul. I called my mother. I said, 'I feel like he's going to kill me, I think I'm going to die'. Buck is now under investigation over the deaths of two black men, including one man who died of an apparent overdose at his apartment on Monday.

According to the testimony of a federal agent, Harold â H.L.â Moody, a former Democratic Party chairman, streamed live videos of children being raped, distributed child pornography to other pedophiles, and regularly smoked methamphetamine out of a glass pipe while seated at his desk during work hours. Our tax dollars at work, folks. Jason Bennett, a special agent for Homeland Security Investigations, said an undercover agent took â screen shotsâ of Moody sitting at his desk and chatting with pedophiles in a secret chatroom online on â more than one occasionâ between Aug. 29 and Oct. 12. Bennett described Moody as a â high-volume userâ who logged in and out of a chat room solely devoted to child pornography several times a day, including 26 times in a two-day span. He was also a host of the private chat room, which Bennett explains indicates that Moody did something to receive such recognition.

Tech magnate Elon Musk reportedly admits in an upcoming book that he once attended a somewhat well-known Silicon Valley â sex party,â . Musk and his bro-friend: Steve Jurvetson, have been documented in a number of notorious sex scandals. ***E***ven worse is the headline that reveals: ***"Elon Musk Says Pedophile Accusation Against British Man Was Protected Speech But Ignores Fact That Musks Father Had Sex With His Own Daughter"***

Dov Katz, head of the computer vision and machine learning group at Facebook-owned Oculus, has been charged in King County for attempted commercial sexual abuse of a minor. The 38-year-old tech exec allegedly attempted to contact what he believed to be was a 15-year-old girl for sex. The fictitious 15-year-old was actually an undercover police officer with the Tukwila Police Department, a city just south of Seattle. The news was first reported by KING 5, which said that Katz was arrested by Tukwila Police on Wednesday. An Israeli citizen who resides in California, Katz is forbidden to have contact with any minors, except in the presence of a responsible adult, according to charging documents. Katz allegedly responded to an online advertisement that offered sex in exchange for money, an ad which was posted by undercover police officer posing as a 15-year-old girl. Katz allegedly arranged a meeting at the Embassy Suites in Tukwila, offering to pay $350 to have sex without a condom. When Katz arrived at the hotel with $600 in cash, he was arrested by police.

Former Democrat CDC director Dr. Tom Frieden was arrested on sexual pervert allegations.Frieden was charged with forcible touching, sex abuse and harassment, according to police.

California gubernatorial candidate Gavin Newsom's past sexual misconduct disqualifies him from holding higher office, rival Democrat Amanda Renteria said Thursday, and he should resign from his position as lieutenant governor. "If he was in the Legislature right now, he'd be called out, and like what we've seen, being forced out," Renteria said in an interview with The Sacramento Bee. "We've got to be sending the message that the more power you have, the more responsibility you have to protect others." As mayor of San Francisco more than a decade ago, Newsom had an affair with one of his city hall aides, who was also married to his campaign manager at the time.

Google employees have accused Google boss Rubin of sexual misconduct. A woman, with whom Mr. Rubin had been having an extramarital relationship, said he coerced her into performing oral sex in a hotel room in 2013, according to two company executives with knowledge of the episode. Google investigated and concluded her claim was credible, said the people, who spoke on the condition that they not be named, citing confidentiality agreements. Mr. Rubin was notified, they said, and Mr. Page asked for his resignation. Google could have fired Mr. Rubin and paid him little to nothing on the way out. Instead, the company handed him a $90 million exit package, paid in installments of about $2 million a month for four years, said two people with knowledge of the terms. The last payment is scheduled for next month. Mr. Rubin was one of three executives that Google protected over the past decade after they were accused of sexual misconduct. In two instances, it ousted senior executives, but softened the blow by paying them millions of dollars as they departed, even though it had no legal obligation to do so. In a third, the executive remained in a highly compensated post at the company. Each time Google stayed silent about the accusations against the men. Google executives have been caught having sex slaves.

The Rosewood Hotel is brimming with tech guys, some loudly talking about money. The college student at our table recommends the ribsâ sheâ s been here before, on â datesâ with her â daddies.â â There are a lot of tech guys,â she says. â They want the girlfriend experience, without having to deal with an actual girlfriend.â â The girlfriend experienceâ is the term women in the sex trade use for a service involving more than just sex. â They want the perfect girlfriendâ in their eyes,â says Miranda, the young woman at our table.* â Sheâ s well groomed, cultured, classy, able to converse about anythingâ but not bringing into it any of her real-world problems or feelings. Her adventures in â sugaringâ started three years ago when she got hit on by an older guy and rebuffed him, saying, â Look, Iâ m not interested, so unless youâ re offering to pay my student loans,â and he said, â Well . . . ?â After that, â he paid for stuff. He gave me money to help out with my living expenses.â This is how many of the skinny co-eds at Stanford University pay the bills and Stanford bosses look the other way.

Those under investigation are Bill Lockyer; Brian Goncher; Daniel Cohen; David Axelrod; David Drummond; David Plouffe; David E. In Silicon Valley, There Are Over 100 Services That Deliver Young Men And Girls To Rich Google And Facebook Executives For Dirty Sex. Most of the victims come from local colleges, universities, art schools and the Mission District, Haight Street and Noe Valley districts in San Francisco. They use Facade organizations like "Power Exchange", "Mission Exchange", "The Arena", "Orgasmic Meditation", "NXVIUM", "The Spinsters", "The Guardsmen", One Taste, etc. act as fronts for sexual transactions. The Rosewood Hotel has sex nights for the sale of women using sly hand signals. Almost every hotel on El Camino Real in Palo Alto has a prostitution activity going on around the clock. Russian and Italian prostitutes fly in and out of San Jose and San Francisco airports so often that they are known as the "pus*y ports". Young, impossibly attractive, girls with tight mini skirts and a roller bag in the airport alone are now under constant surveillance by police.

One report recalls: "...At the hotel, Hillary Clinton Mega donor and John Podesta partner Wyss assaulted Long physically and sexually, according to her police complaint. â Me screaming, â No stop it,'â she wrote in her own handwriting to police. â He grabbed my teeth with his left hand and ripped my mouth open. He inserted a vibrator into my vagina and almost suffocated me by putting his fist into my mouth. I struggled and pushed. I thought for sure he was going to kill me,â she wrote. â I left that hotel room sick and in pain,â she told police in the statement. She returned to Boulder and â stayed in bed for weeks. The physical sickness of this event was devastating,â she told police. Wyss also allegedly threatened to stop his financial support for her daughter if she broke up with him, according to Long.â Sheâ s probably one of the first who took on powerful men over sexual misconduct,â recalled Police Chief Tom Koby in an interview with TheDCNF. He personally knew the Boulder resident and counseled her about her relationship with Wyss.â After the attack, I had breakfast with Jackie at the Hotel Boulderado. She broke down during breakfast. This thing had happened and it was terrible. She was quite shaken and Jackie doesnâ t shake too easily,â Koby said.â Hans had her in a bind in terms of helping Jackie heal her daughter, who had some serious health addiction issues,â Kolby added. â That was what was keeping Jackie in the relationship and she didnâ t have a lot of money. She was still clinging to the hope she could save her daughter. And that she had these things she wanted to do with these organizations working on detention homes and shelters in Boulder and in Denver,â Koby recalled..."

Amid allegations of sexual harassment, embattled freshman Democratic Rep. Ruben Kihuen vowed he will not resign from his post, despite calls from Democratic leaders that he step aside.Instead, Kihuen is digging in with a shocking allegation of his own, taking aim at the leaders of his own party. In an interview with ABC News, Kihuen, D-Nev., said party leaders knew last year about a former campaign stafferâ s allegations of misconduct but stood by his campaign nonetheless. Kihuen questioned why they are calling for his resignation now, more than a year later.â I do find it interesting that the DCCC, Leader [Nancy] Pelosi and Chairman Ben Ray Lujan -- they knew about these allegations last year,â Kihuen said. â They looked into them. They didn't find anything, and they continued investing millions of dollars in my campaign. ***They went out there and campaigned for me.â***

A married senior official in President Obama's Department of Education was convicted of sex crimes and resigned for following women on the DC Metro and taking pictures up their skirts, DailyMail.com can exclusively reveal. William Mendoza, 42, the former executive director of the White House Initiative on American Indian and Alaska Native Education, stepped down after he was arrested and charged with attempted voyeurism in November, 2016, for the vile acts. Mendoza, who earned $140,000 a year as a policy advisor in Obama's White House, tried to take photos and videos up women's skirts at least four times on his government-issued iPhones in July 2016 without their consent. He was also caught looking at footage,

apparently filmed in secret, of a woman in her underwear getting changed in a dressing room. It is not known if he recorded the video himself. When he took the indecent photos, he was supposed to be at work and was using a travel card funded by the taxpayer, according to documents obtained by DailyMail.com through a Freedom of Information Act request.

After Californiaâ s then-Attorney General Kamala D. Harris announced felony pimping charges last year against the two owners of Backpage.com â a classified-ad website that is a hub for sex trafficking and prostitution, one of the men cut a $10,000 check to House Minority Leader Nancy Pelosiâ s super PAC. Mrs. Pelosiâ s political action committee, House Majority PAC, has resisted giving the money back, and an aide to Mrs. Pelosi said the California Democrat knows nothing about the contribution. The uproar over sexual harassment that began with the Harvey Weinstein scandal has intensified the scrutiny of political contributions linked to Backpage, which law enforcement officials say is the chief platform for activities far worse than harassment, including sexual slavery and child prostitution. Mrs. Pelosi isnâ t the only Democrat struggling to deal with the piles of cash that Backpageâ s owners spread around to candidates and state Democratic parties over the years. Even Ms. Harris, a California Democrat who is now a U.S. senator, ducked the issue. Her office wouldnâ t respond to repeated emails about Backpage money going to House Majority PAC and other Democratic organizations. Since 2010, the owners and their wives have shoveled about $99,000 to candidates and about $95,000 to Democratic parties in Arizona, Colorado and New Mexico, according to federal campaign finance data collected by the Center for Responsive Politics.

Prominent Democrat donor Terry Bean was indicted earlier this month on two counts of sodomy and one count of sex abuse for allegedly having sex with a teenage boy. Bean was arraigned on the charges, TV station KGW8 reported. He pleaded not guilty and was taken into custody at County jail.

The body of investigative journalist Jen Moore was found in her Washington D.C. hotel room on Monday after her investigation into an alleged sexual assault by President William J. Clinton. â In fact, just four weeks before her death, Moore filed details of the alleged victimâ s claims with the Department of Homeland Security, detailing the allegations against Clinton. Moore contacted Homeland Security beginning on July 6th through July 9th, records show. A week later, she contacted the FBI with identical details about the victim and the shocking allegations against Clinton,â

A leading liberal think tank run by a longtime adviser to former presidential candidate Hillary Clinton is facing allegations of serious sexual harassment which went undealt with by management, a new report claims. The Centre for American Progress (CAP), headed by Clinton associate Neera Tanden, has released four policy proposal papers on dealing with sexual harassment in the workplace, but former staffers have come forward with stories of repeated harassment at the think tank, BuzzFeed reports.

Defy Ventures brings the gospel of entrepreneurship to an unlikely place: prisons. The nonprofit company founded by Catherine Hoke says it is dedicated to helping formerly incarcerated people start their own businesses and stay out of prison. â Transform the hustle,â the companyâ s tagline encourages. Defy has received grants from Google. Facebook COO Sheryl Sandberg wrote a foreword to Hokeâ s new memoir. Former U.S. Attorney Preet Bharara called Hokeâ s work â incredibly inspiringâ on his podcast. But while Defy woos Silicon Valley and Washington, D.C., scandal has rocked the companyâ s leadership. Last month, Defy fired its president after he blew the whistle on allegations of sexual harassment by Hoke and fraudulent statistics exaggerating the programâ s successes.

Henry T. Nicholas III, the Silicon Valley billionaire founder of chip-maker Broadcom, has been arrested by police on drug trafficking charges. According to the Associated Press, Nicholas was arrested on suspicion of trafficking heroin, cocaine, meth and ecstasy. Security was called when Nicholas couldnâ t get into his sex fuelled room at the Encore, a Las Vegas casino hotel. When security arrived, they reportedly found Nicholas with Ashley Fargo, the ex-wife of an heir to the Wells Fargo banking fortune. Fargo was passed out with a semi-deflated balloon in her mouth, but was revived by paramedics. According to reports, security

subsequently found canisters of nitrous oxide inside the room, and a subsequent search by cops turned up more drugs inside a suitcase. Nicholasâ s attorney, David Chesnoff, told the Associated Press that they will â deal with the facts in court.â

Multiple famous Silicon Valley lawyers have been found dead, hanged by their own hand while attempting to masturbate while choking themselves because they thought that choking would add to the sensation. A formerly powerful Democrat, Attorney Mark Benavides, has been found guilty on six individual counts of human trafficking in a grotesque and sex-filled criminal conspiracy. Mark Benavides, a well-known Democrat who ran for the 186th District Court in 2014, was accused by federal law enforcement of trading his legal services as an attorney for sex from his clients and then recording those manipulative sex-romps, according to local ABC affiliate KSAT. Benevides would then promise the women that if they allowed him to engage in erotic sex that sometimes included physical torture, that he would offer them a legitimate defense in the courtroom.

Hundreds of leaked text messages between Kevin Tsujihara, actress Charlotte Kirk and partners Brett Ratner and James Packer show the powerful executive, under pressure, said repeatedly he would push for auditions as accusations of "extortion" and a proposed settlement agreement followed

==========

Y Combinator is half homosexual sextortion elitists and half Frat boy Google-worshippers seeking to control politics and expand the Silicon Valley Echo-Chamber

In its main program, Y Combinator interviews and selects two batches of companies per year. The companies receive seed money, SJW advice, and echo-chamber connections in exchange for 7% equity.[2]The program includes "office hours", where startup founders meet individually and in groups with Y Combinator partners for advice on how to be good liberal clones. Founders also participate in weekly dinners where guests from the Silicon Valley ecosystem (successful entrepreneurs, venture capitalists, etc.) speak to the founders. The deal at Y Combinator is " If you help us control American politics and ideologies, we will give you some cash..."

In Y Combinator meetings, naive young Millennial boys are stupid enough to wear sheep clone Fedora's, have the same tattoos and the same haircuts and carry the same man-bags. The robot-like hipster conformity is overt and ludicrous.

The bottom line is that you are going to get fucked by Y Combinator one way or another. The VC's and investors that fund it will extort you for blow jobs and anal sex. If you were not in a Stanford or Yale Frat House you will be ostracized. If you are over 30 you will be ostracized. If you are black or Mexican you will be ostracized. If you are a woman you will be ostracized after you are sextorted. If you don't worship ANTIFA and Barack Obama you are ostracized.

The bosses of Y Combinator are the single biggest group of narcissistic, sociopath, holier-than-thou, effete, peacock strutting, misogynist pigs on Earth. They love nothing more than hearing themselves talk.

Y Combinatorâ s motto is "Make Something Liberal Idiots Want And Nothing That People Actually Need."[3] The program aims to focus the founders on further developing their product, team and market, refining their business model, achieving product/market fit, and scaling the startup into a high growth business, etc. The program culminates at Demo Day where startups present their business to a selected audience of Democrat investors.[4]

As of 2017, Y Combinator had invested in ~1,450 companies including Dropbox, Airbnb, Coinbase, Stripe, Reddit, Instacart, Twitch, Cruise Automation, Optimizely, Zenefits, Docker, DoorDash, Mixpanel, Heroku, Machine Zone, Weebly, and Paribus.[5] The combined valuation of YC companies was over $80B.[6]

HOW YOU CAN BUST EVERY CORRUPT POLITICIAN IN AMERICA:

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

We identified and listed every person, organization and company involved in the attacks and RICO law violations and provided that list to The U.S. Congress and every agency.

We opened our own private investigator and crowd-sourced investigations into the following:

- Every stock market account they or their family owns

- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers

- Every flight manifest they appeared on

- Every bank account they have ever held

- Every lawsuit, divorce record and police record they have ever appeared in

- Every trust fund they or their family holds

- Every shell corporation they, or their family holds

- Every person named in the Epstein Pedo book: https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies

- Every item in the Swiss Leaks that cross connects to their holdings

- Every item in the Panama Papers Leaks that cross connects to their holdings

- Every item in the WikiLeaks that cross connects to their holdings

- Every item in the Snowden Leaks that cross connects to their holdings

- Every sex trafficking incident that connects to each of them alone, and in groups

- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo,Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Recor, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, Buzzfeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.

- Every item in the Quest Leaks that cross connects to their holdings

- Every tactical deployment, by a campaign financier, of the tactics listed in this manual: https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf

- Every sex service that their credit card payments every connect too

- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

We have demanded their arrests, indictments, exposures and bankruptcies. We say "***Fuck You***" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed. You say you are going to "*...kill us and destroy our lives..*" and that you are so frightening. You think you are a big scary thing? Here comes '*scary*'! Watch what billions of taxpaying voters with collaborative FBI-class forensics investigation software is doing to you now, you bastards! Have fun!

==========

Many thousands of additional person's, organization's and links are available for Grand Juries, Civil Trial Juries and Live Televised Congressional Hearings to prove these assertions. Produced With ***WIKILAWPEDIA*** collaborative global web-authoring group-editing software via wikipedia.com, wikinewsia.com, voat.co, reddit.com, pacer.gov, ICIJ, EU investigators and many other collaboration sites. (C) Creative Commons Open Source Law Enforcement Software. This data is compiled daily by millions of members of the public via crowd-sourced law enforcement, eye-witness reports, forensic data reports, Congressional reports and federal investigators. It proves the charges with indisputable corroboration from multiple sources via crowd-sourced forensics. These cloned sites self-replicate on new servers and p2p-nodes via ai-process when damaged or attacked. https://globalanticorruptionblog.com/

Our TEATRO POLITIQUE campaign was designed to get Joe-Six-Pack and the middle class to pay attention to politics and policy, and then get involved in the political process, by capturing their attention via audacious media amplification, Streisand effect acceleration, free server arrays and public education.

2007: CHARGES FILED!

In 2007 we filed federal charges that revealed crimes so audacious that some said those crimes *"could not possibly happen in real life..."* but we knew some of the criminals personally and saw the crimes with our own eyes*!*

2019: CHARGES PROVEN!

Now, every claim has been proven true in headline news, historical hacks and leaks and Congressional investigations. All of the crimes and corruption, that we described, have now actually been shown to have been TRUE in *"real life..."* and our evidence has been validated!

2020: THE EXPOSURE!

Where will you be when history is made? YOU, the public, acting in a crowd-sourced force as "*armchair FBI agents*" are now part of changing the way the world works.... forever!

NEVER POST YOUR MEDIA ON FACEBOOK, GOOGLE, YOUTUBE OR ANY CORPORATE SITE. YOU WILL BE CENSORED, TRAFFIC-ABUSED, SHADOW-BANNED, DEMONETIZED AND MANIPULATED. HOST YOUR OWN MEDIA ON SERVERS THAT YOU OWN OR LEASE!

READ THE FOLLOWING FILES AND HARD EVIDENCE, IN THESE FOLDERS, TO SEE A SMALL SAMPLE OF THE FBI-CLASS PROOF:

DEMAND FOR PAYMENT -

CRONY INSIDER PAYOLA IS THE BREAD AND BUTTER OF THE DEPARTMENT OF ENERGY

Cronyism is still prevalent in the energy sector, and the government allocates special benefits to the well-connected instead of fostering a playing field that provides opportunity for all to compete. Nancy Pelosi, Kamala Harris, Dianne Feinstein and Jerry Brown had stock market and revolving door job benefits from the Cleantech Crash DOE funds "winners" and helped to sabotage the competitors of their friends that got handed Crony Cash. These people were supposed to be our leaders but they chose to cheat rather than compete!

These crony-exclusive subsidies obstruct the long-term success and viability of the technologies and energy sources that they are intended to promote by distorting the actual costs of energy production and interfering with the price signals by which businesses monitor supply and demand. This is clearly covered in the feature films: "***Too Big To Fail***" and "***Omerta***".

In order to keep competitors (of the California Senator's friends) from getting access to the funding, White House and Department of Energy (DOE) goons, under Secretary of Energy Steven Chu, resorted to the following vendetta and blockade tactics:

- DOE refused to follow the "*First Come, First Served*" rule of the funding law and moved those Applicant's who had their act together, to the back of the line when it was discovered that they were ahead of Tesla and Fisker who had lackadaisically not even filed applications. Tesla and Fisker knew they were going to just be handed the funds, without review, based on White House insider say-so. DOE then arbitrarily published an illegal rule change press release saying that the "*First Come, First Served*" rule was suddenly no longer in effect after DOE realized that insider Tesla and Fisker had not had their acts together and that their competitors had filed first and could get money ahead of White House favorites Fisker and Tesla.

- DOE "bottom-drawered" outsiders applications and stuck them at the bottom of a file cabinet, in Lachlan Seward's office, for months without even looking at them in order to run-out-the-clock on those who competed with campaign-finance front facades: Tesla and Fisker.

- DOE told one applicant for funding, that competed with Tesla, that DOE would not approve the loan for their 100% electric car because the applicant's car "***DID NOT USE ENOUGH GASOLINE***"...! or that an applicant "was not going to make enough cars from the outset"..when it is widely know that any manufacturing effort requires a ramp-up curve.

- Every, so called, 'DOE reviewer' of the DOE applications was either a direct competitor of the applicant's or had stock market holdings in Tesla, Fisker, Solyndra, etc. or later went to work for them. The review process was the most rigged, crony deal anyone ever saw.

- Insider and bribe paying Tesla Motors had hundreds of meetings and phone calls with DOE staff, many at DOE HQ, in order to hand-walk Tesla through the process and babysit their application on orders from the White House. Competing applicants received no phone calls, no meetings and no help. DOE's Carol Battershal, refused to return most phone calls from applicants who were in competition with Tesla because she was a "Tesla Fan Girl".

- DOE lawyer Cohen, refused to respond to any questions from applicants competing with Tesla, yet spent many hours helping Tesla get their paperwork configured. He was terminated for conflict issues.

- White House car czar: Steven Rattner, refused to assist or respond to any applicants and told a number of members of Congress that he was just focused on trading "votes for DOE funding with Detroit auto unions". He said that small electric car start-ups "don't offer enough vote trades to make a discussion valuable". Rattner was later indicted in New York for Stock market fraud. His indictment provided key clues that the entire Cleantech "green energy" program was about pumping stock market holdings that DOE and White House insiders controlled.

- The DOE was so overt in their sabotage efforts that Tesla's own marketing boss wrote an article about it because they were so obvious in their manipulations of an industry:
https://www.wired.com/2009/12/doe-loans-stifle-innovation/

- DOE never once called, or returned calls from CEO's of the companies applying.

- One of the White House staff that communicated between agencies was caught taking pictures up girls skirts and his case was reduced because of White House intervention.

- Applicant Bright Automotive famously published a nationwide open letter confirming all of these crimes and lies by DOE

- ZAP Motors, Elio Motors, Brammo and almost every other applicant confirmed these charges.

- The GAO, Congress and yet-to-be-seen FBI documents and NSA recordings confirm all of these assertions.

- One Applicant hand delivered more written customer order letters to Congress and DOE in Washington DC than ALL of the other applicant's combined yet Lachlan Seward at DOE "lost them". The applicant re-sent them, yet the DOE office refused to review them or contact the customers that had submitted them because they proved that Tesla was faking customer order volume and other applicants were not.

- DOE staff Matt Rogers, Steve Spinner and other Steven Chu buddies, pushed onto DOE by Covington and Burling, flew back and forth to California, on the taxpayers dime, to go to parties and baseball games on the weekends, yet DOE could not find the time or resources for any in-person meetings with anyone but insider Tesla Motors. They were reported on by green energy CEO Gary D. Conley. Conley was later found with a bullet in his head behind Beale Air Force base in Northern California. Kamala Harris refused to investigate the matter when she was AG.

- Applicant XP Vehicles had applied for a loan under the DOE "LGP" program. DOE wanted a cash payment of many tens of thousands of dollars from them in order to look at that application. DOE told XP that "DOE does not have an application form so just make up your own". XP acquired an investor to fund the "review payment", which DOE maintained was not a bribe. Tesla Motors was not required to make such a payment in

advance of review. Tesla only had to make the payment later, after other applicant's complained that Tesla was getting "crony insider favors". Secretary of Energy Steven Chu's top man had committed, in a recorded call, to speak to XP's outside investor's in one phone call, per the request of XP's investors to confirm that the money was being used as a DOE fee. The DOE official refused to return all calls, emails, FEDEX letters and personal messenger requests to respond. He was recorded in conversations in the next room while his secretary said he was "not in the building" and also when he told his secretary to "hang up" on the callers. The investors had become concerned that the promised reply from DOE was being blocked. After a massive number of attempts, a few minutes after the deadline to pay the "review fee" had passed, the senior official at DOE finally responded with a communication. He sent an email stating that XP had missed the deadline and was not eligible to apply. He had specifically and overtly sabotaged XP by not giving the one sentence response to XP's investors, ever!, and then waiting until the moment the deadline passed to say "HA, we f*cked you!"
In a recorded conference call and Congressional meetings, Steven Chu had offered to waive the fee, as DOE had set a precedent of doing for this with other, applicants. XP, which beat every other applicant on comparative metrics, lost millions of dollars because of the lies and machinations of DOE.

- Steven Chu's buddies at McKinsey Consulting flooded Congress and the White House with "helpful" "White Papers" that all seemed to reach the ironically similar conclusion that only Tesla Motors could be the "green company" that could solve "green energy". Raj Gupta Went to jail for rigging McKinsey and stock market manipulations. The Silicon Valley oligarchs had hired all of McKinsey to push this narrative that would only hype Tesla stock.

- DOE "Tesla Fan Boys" made up their own interpretations of applicants statements and re-wrote applicants intentions in order to create negative data for competitors of Tesla and make Tesla look better even though Tesla was: 1.) about to go bankrupt, 2.) bleeding cash, 3.) owner of the absolute worse debt ratio of any applicant, 4.) Trying to build new buildings, like Solyndra (for real estate holdings to benefit CBRE, Feinstein's husband's company), 5.) bleeding staff, 6.) operated by a sociopath drug abuser, 7.) reliant on Afghanistan war-based lithium battery mines that may never materialize, 8.) reliant on Congo cobalt mines that used child slave labor, 9.) reliant on Panasonic lithium batteries that were never intended for auto energy storage and widely documented to explode and release poison cancer-causing gas during fires, 10.) off budget PER CAR by over $100,000.00 PER CAR, 11.) in a legal dispute with all of it's founders, 12.) fully conflicted with stock ownership by DOE, White House and Senate executives, and much, much more...

- Department of Energy staff use lies, Lois Lerner-type manipulations, sabotage, third-party contracted media hit-jobs (operated by Fusion GPS, Gizmodo, Media Matters, Google, etc.), stone-walling and other dirty tricks tactics known as "Ratf*ucking", to harm and delay funding for any party who might compete with the crony insiders.

There are ***thousands*** of other hard-evidence case examples of the corruption in this case.

White House Staff including Rahm Emanual, Bill Daley, Jay Carney, Robert Gibbs, Steve Rattner, David Axelrod, John Podesta, et al; and The Secretary of Energy Steven Chu and the Chief Counsel for the United States Department of Energy Daniel Cohen and Bill Cooper were, (from 2007 forward), either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; applicant's business adversaries, or the Senators and Department of Energy politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to.

Criminal U.S. Senators coordinated and profited in these schemes. Their own family members have now supplied evidence against them. Nobody is allowed to "*win*" government funds ***unless*** they are friends and stock market partners with certain U.S. Senators.

Even if your application metrics beat every single other competing Applicant, you will get lied to and defrauded by Department of Energy and White House officials. You will be told that you have a "*fair chance*", **but** all of the money is secretly hard-wired to a business partner of a Pelosi or Feinstein and you will just waste your time, staff resources and payroll waiting for years on promised funds that will never come.

Applicants were ***DEFRAUDED*** out of their life savings, their investors savings and years of their lives by the U.S. Government. The feds knew that the money was hard-wired to Fisker, Tesla and the crony insiders but they induced the other applicants to apply under false pretenses. They used the outsider applicants as a cover-up for their pass-through crony payola schemes to pay off Silicon Valley tech oligarchs for funding the Obama and Pelosi political campaigns and internet search rigging.

The White House, at the time, and the Department of Energy engaged in FELONY, ORGANIZED CRIME payola, worked with Jeffrey Epstein and his gang and operated massive stock market manipulation. The highest levels of law enforcement, including Eric Holder and James Comey, helped cover it up!

When the government plays favorites, valuable resources shift to less productive uses.

Removing the cronyism and corporate welfare that are pervasive in energy markets is no easy feat. The current administrationâ s attempt to rescind unused funds in the U.S. Department of Energy Advanced Technology Vehicles Manufacturing loan program provides a good case study.

In handing out only five loans, the program has wasted taxpayer dollars by subsidizing economic losers (Fisker) and has promoted corporate welfare by subsidizing well-off companies (Nissan and Ford). Tesla Motors was clearly awarded government funds based on bribes and cover-ups of its failed finances and deadly engineering defects. Additionally, Tesla acts as a campaign funding conduit to Nancy Pelosi and Dianne Feinstein's election drives. The program has $4.3 billion remaining but has been idle for more than eight years without a new loan administered by the department. Funds still left in that account should be given to the victims of the failed crony payola Cleantech Crash.

The Congressional Budget and Impoundment Control Act of 1974 authorizes the President to rescind funding previously enacted into law, and the White House appropriately offered a $15 billion rescissions package that included the Advanced Technology Vehicles Manufacturing loan program. The government owes the defrauded applicants their damages and that money should come from the $4.3 billion still sitting around at DOE

The Pelosi Special Interests have, so far, prevailed, and the program remains in place. A DOJ lawsuit is needed to expose the scam and shut down these crimes against the public. In the mean time, that money must be used to compensate those harmed, damaged, sabotaged and defrauded by DOE. No company will ever get that money again without a global crowd-sourced public FBI-class investigation being conducted against them. That money, must, therefore, be used to make up for the quantified past crimes and harms against the non-crony Applicant's!

Therefor, the State of California and The Agencies Of The U.S. Government should consider this a legal '**Demand For Payment**' and assume that collection proceedings shall be forthcoming!

Crony capitalism - Wikipedia

https://en.wikipedia.org/wiki/Crony_capitalism

Crony capitalism is an economic system in which businesses thrive not as a result of risk, but rather as a return on money amassed through a nexus between a business class and the political class.This is often achieved by using state power rather than competition in managing permits, government grants, tax breaks, or

other forms of state intervention over resources where the state exercises ...

Calls For Steven Chu To Be Fired Over Solyndra Scandal

-
-
-
-

WASHINGTON â Former House Speaker Newt Gingrich on Monday called for Energy Secretary Steven Chu to be fired for his decision to allow Solyndra to keep receiving taxpayer money even after the struggling solar company had technically already defaulted on the $535 million federal loan guaranteed by the Energy Department.

The long-shot presidential candidate attacked Chu on his website Monday, earning Gingrich the dubious honor of being the first politician to publicly attack the Nobel Prize-winning physicist who arrived in Washington via academia.

â The president says he has full confidence in Secretary Chu despite this scandal,â Gingrich wrote on his website. â What kind of confidence can we have in a president who refuses to hold his cabinet officers accountable?â

â As President, I would have fired Secretary Chu for so grossly mismanaging taxpayer dollars,â Gingrich continued. â Furthermore, to protect taxpayers, I would have blocked any additional loan guarantees until a full investigation had taken place into the mismanagement and potential corruption in the loan for Solyndra.â

The comments come as House Republicans are turning up the pressure on Chu after a spokesman admitted the secretary was ultimately responsible for the restructuring of Solyndraâ s federal loan guarantee, which the politically-connected company secured in 2009.

Rep. Cliff Stearns (R-Fla.), the chairman of the subcommittee at the center of an investigation into government loan programs that benefit private companies, told The Huffington Post on Friday that Chuâ s decision was a direct violation of the Energy Policy Act of 2005, which requires that taxpayers be placed ahead of private investors when it comes to repaying a federal loan guarantee.

Stearns has not, however, explicitly called for Chu to be fired.

â Secretary Chu and other officials should be held accountable for their role in exerting pressure to close the Solyndra loan and for illegally subordinating the taxpayers to two private hedge fund investors this year,â Rep. Cliff Stearns said in a statement to The Huffington Post on Tuesday night. â I intend to have him come before the committee and testify so that he can explain his actions and then hold him responsible.â

Chu is slated to appear sometime soon before the House Energy and Commerce subcommittee.

Internal White House email threads released in their entirety on Tuesday showed that government officials had significant concerns about the Solyndra loan guarantee. As Democrats have noted, the emails do not reveal any signs of corruption, merely disagreement about whether the firm was financially viable.

The documents â do not contain evidence that government decisions relating to Solyndra were influenced by considerations relating to campaign donations,â wrote Democrats in a memo on Monday. â Rather, the documents show that there was internal disagreement within the administration about Solyndraâ s viability

and the effectiveness of the loan guarantee program throughout the process.â

Chu takes responsibility for a loan deal that put more taxpayer money at risk in Solyndra

By Carol D. Leonnig and

and Joe Stephens

Energy Secretary Steven Chu acknowledged Thursday making the final decision to allow a struggling solar company to continue receiving taxpayer money after it had technically defaulted on a $535 million federal loan guaranteed by his agency.

Chu spokesman Damien LaÂ–Vera said in a statement that the secretary approved the restructuring agreement for Solyndra because it gave the company â the best possible chance to succeed in a very competitive marketplace and put the company in a better position to repay the loan.â

Also Thursday, a law enforcement official confirmed that the criminal probe of Solyndra is focused on whether the company and its officers misrepresented the firmâ s finances to the government in seeking the loan or engaged in accounting fraud. The official spoke on the condition of anonymity because of the sensitivity of the probe.

On the political front, Chuâ s admission came as some members of Congress were asking whether Chu went too far in trying to help the company before it went into bankruptcy, leaving taxpayers on the hook for the loan.

Chu, a Nobel laureate and physicist who came to the administration from academia, arrived in Washington with a mandate to push billions of dollars in stimulus funds into clean-energy companies and projects. With keen White House interest, Chu rode herd over an $80 billion showcase initiative that was supposed to spur a new â greenâ industry and economic growth.

Solyndra was the first company approved for a loan guarantee under the Obama administration; its application originated several years earlier during George W. Bushâ s presidency. Early on, there were concerns about Solyndraâ s finances, but the company was still endorsed by President Obama and received high-profile support from Chu. Both visited the firm at different press events. Chu flew to California to announce the loan approval at the groundbreaking for a $750 million factory that was built mostly with funds from the loan.

In announcing the Solyndra deal in March 2009, Chu boasted of the â speed at which the department can operate,â according to an agency news release.

â Secretary Chu initially set a target to have the first conditional commitments out by May . â •.â •. but todayâ s announcement significantly outpaces that aggressive timeline,â the release said.

In April 2010, the companyâ s auditors raised doubts about whether the company could continue as a â going concernâ because of cash-flow problems. The following month, Obama visited the company to praise it as an â engine of growth.â

In late autumn of 2010, company executives confided to the Energy Department that they were running out of cash and could not make a required payment to a cash-reserve account. The company was supposed to begin making the first of $5 million payments to create a $30 million cash reserve on Dec. 1.

Solyndra officially defaulted on its loan that day. Chu approved a softening of the loan requirements so that the company could continue receiving loan installments.

â Ultimately, the choice was between imminent liquidation or giving the company and its workers a fighting chance to succeed,â LaVera said in the statement, first reported by Politico.

The agency authorized the Federal Financing Bank to give two additional cash installments to Solyndra â one in December 2010 and another in January 2011. Both payments came before Energy Department officials finalized a deal to restructure the loan and forestall the companyâ s collapse in late February.

On Capitol Hill, Republicans continued to complain Thursday that the Obama administration and Chu had not protected taxpayers.

â Why was the leadership at DOE so stubborn, ignoring every warning sign that Solyndra was a bad bet, continuing to throw good money after bad right up until Solyndraâ s fate was sealed and taxpayers were left holding the bag on DOEâ s $535 million bust?â said Rep. Cliff Stearns (R-Fla.), chairman of the House Energy and Commerce oversight and investigations subcommittee.

Chu is tentatively scheduled to appear before the subcommittee next month. The House probe seeks to determine whether the White House sought to help Solyndra for political reasons. The nature of the separate criminal probe was first reported in an online story by Bloomberg News on Thursday evening. The leading private investors in Solyndra were investment funds tied to Oklahoma billionaire George Kaiser, a prominent fundraiser for Barack Obamaâ s 2008 presidential campaign.

Some Democrats also have questioned Chuâ s decision, including Rep. Henry A. Waxman (Calif.), the ranking Democrat on the Energy and Commerce Committee.

Rep. Gene Green (D-Tex.) said Thursday that he wants to know why Chu restructured Solyndraâ s loan to put taxpayers behind a group of private investors to be repaid if the company went bankrupt. Two investors, including an equity fund tied to Kaiser, provided an additional $75 million to keep the company afloat.

â I guess Iâ m surprised that Secretary Chu made the decision earlier this year to give the private sector priority over the federal commitment, because your fiduciary duty is to the taxpayer, and not to an applicant. . â •.â •. Your responsibility is to the American people,â Green said.

Church helped former priest accused of abuse get Disney job and many sex abusers work at Disney

Marc Levy, Associated Press

Photo: Joe Raedle/Getty Images

IMAGE 1 OF 22

The ex-priest, Edward Ganster, left the priesthood in 1990, moved to the Orlando area and went on to work at Disney World before he died in 2014.

HARRISBURG, Pa. (AP) â A sweeping grand jury report into child sexual abuse in Roman Catholic dioceses in Pennsylvania said church officials gave a former priest a positive reference to work at Disney World, even though they'd fielded at least one allegation about him sexually abusing a boy.

The ex-priest, Edward Ganster, left the priesthood in 1990, moved to the Orlando area and went on to work at Disney World before he died in 2014.

The report said Ganster worked at the theme park for 18 years. Ganster drove the train at the Magic Kingdom, according to an obituary in the Orlando Sentinel, which said Ganster worked there for 15 years.

Disney World did not respond to a request for information.

Ganster, who became a priest in 1971, was working at St. Joseph's Church in Easton in the late 1970s when a woman complained to a monsignor that Ganster had gotten in bed with her 13-year-old son on an overnight

trip and "hurt" him, the report said. The boy also told his mother that "something happened" in the confession booth, it said.

The PA Attorney General's office has released video interviews of people who say they are victims of priest sex abuse. A recent reports alleges more than 1,000 children were molested by Pennsylvania priests since 1940. (Aug. 15)

- Ex-Dallas bishop whose tenure marred by scandal dies at 87

The monsignor told her Ganster would be given counseling and Ganster was promptly reassigned, the report said.

About a decade later, Ganster was on sick leave at a Catholic mental health hospital as he sought to leave the priesthood and get married.

Ganster wrote the Diocese to say he would apply for a job at Disney World and wanted to use the Diocese as a reference, the report said.

Allentown's bishop, Thomas Welsh, wrote to Orlando's bishop that Ganster's problems were "partially sexual" and that he couldn't reassign him. A monsignor separately assured Ganster that he would get a positive reference.

"I am quite sure that the Diocese will be able to give you a positive reference in regard to the work you did during your years of service here as a priest," the monsignor wrote, according to the report.

A diocese spokesman, Matt Kerr, said he knows of no reference letter, or if one was written.

"That should not have happened," Kerr said. "It would not happen today."

More than a decade after Ganster left the priesthood, a man contacted the Allentown Diocese to report that Ganster had victimized him when he was 14 and an altar boy some two decades earlier, the report said.

Ganster fondled, groped and beat him repeatedly, once dragging him across a living room floor by his underwear and once beating him with a metal cross, the report said.

Years later, in 2015, the mother of another victim contacted the Allentown Diocese to report that Ganster abused her then 12-year-old son in 1977, the report said.

Class Action Lawsuits Under Development Against PG&E and Peninsula Clean Energy for Scamming Consumers

By David Brock

PG&E has sent out a series of â buried noticesâ to consumers over the last number of years. The notices look like boilerplate PG&E bills or marketing forms, which science has proven are not identifiable to consumers.

The scam works like this:

A. - An insider group of politicians and their financiers agree to buy stock in solar panel and other â Clean-yet-corruptâ companies.

B. - PG&E switches consumers to â clean energy electric generation chargesâ without the consumers actual knowledge.

C. - PG&E then begins charging hundreds of thousands of consumers 30% extra for electricity because PG&E covertly â opted-themâ into the clean kickback program.

D. - When caught, PG&E refuses to credit the years of over-billings back to consumers and the insider group of politicians refuse to make laws to help the consumers.

E. ..and the dirtiest part of the â clean energy electric generation chargesâ scam? The insider group of politicians own the very companies that PG&E is giving the 30% over-charge money to.

F. If consumerâ s try to cancel thus scam charge then PG&E bills them extra for canceling the thing that most consumers would never sign up for if they knew the truth about it.

In other words: Your local utility company forces you to pay cash, covertly routed through PG&E, to corrupt politicians and you can never get a refund for the corrupt thing you never knowingly opted into.

The liars at PG&E (The guys who regularly blow up and burn down cities, pay bribes, shoot tons of toxic methane into the air and run scams) say *â Oh, we sent everybody a letter telling them we were going to put them on this scamâ* , but 90% of all consumers say they never saw a letter and that nobody ever asked, offered or indicated that such a program was an â opt-inâ option.

In the San Francisco Bay Area a charge has been appearing on PG&E bills as: â PENINSULA CLEAN ENERGY Electric Generation Chargesâ . This add-on can add 30 to 40% to consumer's bills.

PG&E hopes that the tree-hugging Californians wonâ t question a mysterious charge that has the facade phrase â CLEAN ENERGYâ in it. They believe that nobody would dare question such a benevolent and altruistic sounding thing.

The scam worked for awhile, until it didnâ t.

The companies that are providing this so called â Clean Energyâ are dirty crony payola kick-back companies owned by PG&E executives, corrupt California Senators and their toxic campaign financiers. Let;s take a look at one of over 30 corrupt companies involved in this scam. These are companies you have heard of like Solar City, First Solar, Solyndra, etc. In one of hundreds of examples, First Solar makes solar panels with a horrific unsuitability for for Hot Climates. After this reply by their PR Director, more heartache was in store for the company.

A class action lawsuit was filed against First Solar by Pomerantz Haudek Grossman & Gross in the US District Court for the District of Arizona. The complaint states that First Solar violated the Securities Exchange Act of 1934 by not disclosing the full extent of certain manufacturing flaws on its earnings, that it improperly recognized revenue for certain products in its systems business, that it lacked sufficient internal and financial controls and, finally, that as a result, First Solarâ s statement were materially false and misleading at all relevant times.

The complaint claims that First Solar reported a decrease of US$345 million in net sales for the quarter that ended December 31, 2011, and a US$164 million charge for warranty payments to replace equipment that cause premature power loss in certain panels. The plaintiff is looking to recover damages on behalf of all First Solar shareholders who purchased common stock during the Class Period detailed above.

As is the nature of class action cases other law firms have come forward, citing similar claims, including a national securities law firm, Faruqi & Faruqi, law firm, Howard G. Smith and Rigrodsky & Long, P.A.

First Solar Shareholders are being given the opportunity to seek legal counsel from several firms after a class action lawsuit was filed in the US District Court for the District of Arizona last week. Case No. 12-cv-00555, alleges that between April 30, 2008 and February 28, 2012, potential securities fraud and an over-concentration of shares in First Solar stock led to investment losses.

Securities arbitration law firm, Klayman & Toskes, noted that trading was at over US$300 per share in July 2008 and is now only trading at around US$30 per share, an almost 90% decline. Harwood Feffer, LLP, further pointed out that on February 29, First Solar revealed its financial results for Q4 and the full year 2011, reporting a quarter-over-quarter drop of US$345 million in net sales, â primarily due to the timing of revenue recognition in our systems business and lower for module-only sales.â

First Solar also advised that it had incurred a charge of US$164 million for warranty payments to replace defective equipment, including a reserve of US$37.5 million to cover future claims.

This is the typical kind of scam that PG&E promotes and forces consumers to get caught up in. Every consumer should be speaking to a class-action law firm to sue PG&E for fraud and to demand that the U.S. Government sue PG&E for fraud and for refunds to consumers for these criminal utility bill

surcharge scams.

Clinton hounded by Energy Department past scandals as new charity questions emerge

By Eileen AJ Connelly and Mary Kay Linge

MORE ON:

CLINTON FOUNDATION

Bill Clinton's upcoming windfall

DOJ reportedly launches new probe into Clinton Foundation

Donations to Clinton Foundation plunged along with Hillary's election defeat

Jeff Sessions denies Trump is pressuring him into probing Clinton

The stench of past scandals is haunting Hillary Clinton as allegations regarding the familyâ s foundation fester.

News that the Clinton Global Initiative aided a company part-owned by a close female friend of Bill Clinton highlights two issues that the Democratic front-runner wants to put behind her as she prepares for the general election â her husbandâ s infidelity and the charityâ s shady ethics.

The Clinton nonprofit helped secure a pledge in 2010 for a $2â •million investment in Energy Pioneer Solutions. The for-profit green-energy company is co-owned by several well-connected Democrats, as well as wealthy divorcÃ©e Julie Tauber McMahon, a neighbor of the Clintonsâ in Chappaqua.

Bill Clinton reportedly made a call to then-Energy Secretary Steven Chu to endorse the company, which helps people insulate their houses. It later got an $812,000 Energy Department grant.

Federal law bars tax-exempt charitable organizations from acting to benefit a private company. But the foundation said the relationship with the firm reflected â a common practice in the broader philanthropic space.â

The investment deal, which was trimmed to $500,000, was announced at the Clinton Global Initiativeâ s 2010 conference, The Wall Street Journal reported, but details about it were wiped from the charityâ s Web site to avoid calling attention to McMahon.

â The Clinton foundation controversies give good material to Trump as the two campaigns engage in a scorched-earth game called â Whoâ s More Corrupt?â â

- Larry Sabato, director of the University of Virginiaâ s Center for Politics

The 69-year-old former president describes McMahon, 56, as a â family friend.â But speculation is rife that sheâ s the woman dubbed â Energizerâ by Secret Service agents because of her frequent visits to the Clintonsâ Westchester home when Bill was home but Hillary wasnâ t.

McMahon, daughter of a millionaire donor to the Democratic Party, has denied having an affair with Bill Clinton, 69. She could not be reached for comment.

The revelations bring new attention to the ethical minefield the Clinton foundation navigated with governments and corporations while Hillary Clinton was secretary of state.

They are also hampering her attempts to win over Bernie Sanders supporters who question her trustworthiness. Currently, a quarter of Sanders supporters say they wouldnâ t vote for Hillary in the general election, according to GOP pollster Frank Luntz.

And the issue feeds the â Crooked Hillaryâ message Donald Trump is pushing, even as she attempts to shift the focus to the Republican front-runnerâ s reluctance to release his tax returns.

â The Clinton foundation controversies give good material to Trump as the two campaigns engage in a scorched-earth game called â Whoâ s More Corrupt?â â •â said Larry Sabato, director of the University of Virginiaâ s Center for Politics. â As always, the best defense is a good offense.â

The Clintonsâ questionable ethics were already a negative with voters, said political consultant Susan Del Percio.

â This just calls into even more question their honesty and integrity,â she added.

Clinton foundation

Play Video

The latest headlines also play into the investigation of Hillary Clintonâ s use of a private e-mail server when she headed the State Department, Del Percio said.

Any new charges would mean â she canâ t put the old allegations behind her. They make what was old new again,â she said.

As for the airing of more of the Clintonsâ marital dirty laundry, Del Percio said, â it plays into a longstanding narrativeâ that casts Bill Clinton as a serial philanderer.

Itâ s a narrative that Trump is already exploiting.

â Trump appears to be inclined to make that an issue,â said political consultant Gerry Oâ Brien. â Especially if [Hillary Clinton] makes an issue of his indiscretions, like his comments and conduct with beauty .â •.â •. contestants.â

But, Oâ Brien warns, that tactic may boomerang for Trump.

â Hillary has always thrived when she can play the victim,â he said.

Community choice programs are not delivering on clean energy for America

Eighteen years ago, California was faced with rolling blackouts and a major energy crisis. It may not seem like it, but another energy crisis is brewing â this one caused by cities getting in the business of buying and selling electricity.

It was a lack of oversight and poor deregulation that led to those blackouts, when bad actors such as Enron saw an opportunity to game the system, manipulate energy markets and ultimately crash power grids.

Now, government-run energy programs â also known as Community Choice Aggregation â are unraveling the centralized planning and service California needs to keep the lights on.

As the former mayor of San Diego, I can see why CCAs are attractive to some local lawmakers since theyâ re billed as cheaper and greener alternatives. But they arenâ t delivering on their promises and itâ s not a program I would have introduced to

These programs produce very little new renewable energy, instead buying from existing sources, including out-of-state wind and solar farms. They take credit for improving our environment but theyâ re not actually reducing carbon emissions. For example, Marin Clean Energy, Californiaâ s first CCA, was launched eight years ago and is held up as a model. Yet it has not delivered more than 10 percent of its power from new clean energy sources in any year.

Government-controlled energy might one day deliver the benefits it promises, but the current market was not designed to support CCAs. Their customers can always return to utility companies. This risk, combined with a lack of credit, means that CCAs are reluctant to purchase long-term contracts for renewable energy, or build new facilities.

While utility companies buy nearly all their renewable energy under long-term contracts that lead to new renewable generation development, this has all but stopped because of the uncertainty caused by CCAs.

Also, some labor leaders strongly oppose CCAs because they are not creating more jobs. Worse, utility customers in neighboring cities are forced to pay higher energy bills to subsidize them.

So why is California seeing an acceleration of these programs, and why is San Diego even considering forming what would be one of the largest CCAs?

Cities are under pressure to comply with their own Climate Action Plans, even though all existing CCAs fall well short of achieving the goal: 100 percent clean energy use.

The only way for energy providers to meaningfully reduce emissions is to build more wind, solar, and other green energy sources. CCAs arenâ t achieving that, but they do expose cities to significant risks. In San Diego, a city study found that a CCA could require annual revenues of as much as $961 million.

Clearly, there are many reasons to be skeptical of government-controlled energy. Local leaders should focus on building more housing near job centers, conserving water and increasing energy efficiency through numerous strategies that do not expose cities and their residents to financial risks or power outages.

Jerry Sanders, former mayor of San Diego, is president & CEO of the San Diego Regional Chamber of Commerce. He can be contacted at jerry@sdchamber.org.

    - The Projects

Corruption In The Department

Of Energy

Green Subsidies under Obama. The Washington Post found that

â Obamaâ s green-technology program was infused with politics at

every level.â The $535 million loan guarantee for the failed

Solyndra is a prime example. The Department of Energy

approved the loan after pressure from the White House. A main

Solyndra investor was a billionaire Obama fundraiser. The New

York Times found that Solyndra â spent nearly $1.8 million on Washington lobbyists, employing six firms with ties to members of Congress and officials of the Obama White House.â

Crony Capitalism has existed for a long time. So energy companies have been able to get government officials to pass legislation that helps them make more money. So they get tax breaks, loopholes, subsidies while the rest of the economy suffers and they make huge profits (and in some cases, record breaking profits).

Clearly the Department of Energy has failed at it's job.

Green Energy Corporations Rolling in the Green, Thanks to Friends in High Places

This a portion of a much longer article entitled â Podesta Power and Center for American Progress: The dark, driving force behind the presidentâ s massive green energy schemeâ , published on March 3, 2014

Center for American Progress Finally Reveals its Corporate Donors:

At least 17 raking in tens of billions of tax dollars from the Green Bank of Obama

While the left-wing think tank is a well-known favorite of billionaire George Soros, as well as other left-leaning ultra-rich donors, â the center does not disclose who finances its activities, a policy it is declining to change even as Mr. Podesta prepares to wield influence over the shape of the Obama administration,â wrote the New York Times in 2008.

However, â after heavy pressure arising from CAPâ s quasi-lobbying history. That scrutiny ratcheted up following the announcement that CAP founder John Podesta would be formally joining the Obama administration. Both Politico and the New York Times called for the donor list to meet the public eye,â

reported Breitbart News.

So, on December 13, 2013, CAP â revealed that itâ s funded by some of the countryâ s largest and most powerful corporations, trade associations and lobbying firms,â announced POLITICO. The donor disclosure excluded individuals and foundations, only giving insight into their corporate influence, leaving more darkness in its wake. Moreover, it was reported that each of those listed (58 donors) has given the group more than $10,000 in 2013, yet the exact amount was not disclosed.

CAPâ s 2013 donor list â contains a myriad of massive corporations, including Apple Inc., AT&T, Bank of America, BMW of North America, Citigroup, Coca-Cola, Discovery, GE, Facebook, Google, Goldman Sachs, PepsiCo, PG&E, the Motion Picture Association of America, Samsung, Time Warner Inc., T-Mobile, Toyota, Visa, Walmart and Wells Fargoâ â â many of which are part of this massive green energy scheme.

Still, The Nation, in their May 2013 piece â The Secret Donors Behind the Center for American Progress and Other Think Tanks, released a list of CAPâ s 2012 corporate donors â â labeled â American Progress Business Alliance Members,â which are charged fees:

A confidential CAP donor pitch I obtained describes the Business Alliance as â a channel for engagement with the corporate communityâ that provides â the opportunity toâ ¦collaborate on common interests.â It offers three membership levels, with the perks to top donors ($100,000 and up) including private meetings with CAP experts and executives, round-table discussions with â Hill and national leaders,â and briefings on CAP reports â relevant to your unique interests.â

The Nation also divulged that CAP doesnâ t publicly disclose the members of its Business Alliance, but they â obtained multiple internal lists from 2011 showing that dozens of major corporations had joined.â Whatâ s relevant here is that in 2011 the lists compiled by The Nation of CAPâ s donors included Comcast, Walmart, General Motors, Pacific Gas and Electric, General Electric, Boeing and Lockheed â â with three confirmed winners of green energy funds.

So basically the donor list and the membership list are one and the same. And, whatâ s even more

interesting is how The Nation chronicles CAPâ s assets:

â After growing rapidly in its first few years, tax records show, CAPâ s total assets fell in 2006 for the first time, from $23.6 million to $20.4 million. Assets started growing again

in 2007 when CAP founded the Business Alliance, a membership rewards program for corporate contributors, and then exploded when Obama was elected in 2008.â

We know that CAP founded its Business Alliance (corporate donors) in 2007, but since we only have a hint of 2011, combined with lists for 2012 and 2013, the mystery remains. Missing are the corporate donors CAP enlisted from 2007 until 2011. When did these now public donors join CAP, and what was dollar amount of money that was given?

While I am about to dissect the corporations from these lists (2011 to 2013) that received green energy taxpayer money (loans, grants and special tax breaks), in full disclosure, the majority of the stimulus and non-stimulus clean-energy funds ($150 billion through 2014) were doled out between 2009 and

2011. However, as I reported in the beginning of this post, â greenâ funds continue to flow, and the Obama administration wants billions more of taxpayer money to save the planet.

I hate to be redundant, but as youâ ll see, CAPâ s corporate donors are connected to many of the same projects and firms that we have documented in previous Green Corruption Files. This is due to the fact that meaningful political ties â â Obamaâ s bundlers (both in 2008 and in 2012), top donors, financiers, and green cronies â â have surrounded the green energy money from the onset. However, considering that CAP players operated inside the Obama White House as well as the Energy Department â â prior, during and after the money was doled out â â this adds another layer of corruption behind the green energy deals.

At any rate, several of these corporations include Big Banks (even the â too-big-to failâ) that have benefited immensely from President Obamaâ s cleantech push. Even though many on Wall Street stood by the president in 2012, the majority sided with Mitt Romney. But that was after Obama enjoyed his fair share of Wall Street buddies who helped ensure his victory in 2008, pouring millions of dollars into his campaign coffers, making their mark as TOP campaign donors (PAC) â â with even Wall Street executives bundling huge sums of money for then-candidate Obama. Additionally, â the big bundlers had broad access to the White House for meetings with top administration officials and glitzy social events.â

Inside these CAP corporate donor lists we find a few TARP recipients such as Citigroup, Goldman Sachs, Bank of America, and Merrill Lynch. Whatâ s more telling is the infiltration of so many Citigroup and Goldman Sachs executives operating (past and present) inside the Obama administration, even shaping his economic policy.

CAPâ S 2013 DONORS: Green energy money winners

#1) Bank of America (now Bank of America Merrill Lynch â â confirmed donor since 2012):

Both Bank of America and Merrill Lynch (Campaign Committeeâ s), from 2003 to 2008, supported Senator Obama. Meanwhile, Bank of America, a heavy hitter donor with major lobbying pull, plays both sides of the isle. But in 2008, this Big Bank put their money (PAC and individuals) on blue,

including donating to candidate Obama.

In the final days of the DOE loan program (September 2011), the DOE awarded a partial guarantee of

$1.4 billion loan â â another shady stimulus deal (â non-investment gradeâ) that was â personally championedâ by then-Energy Secretary Steven Chu â â for a project called Project Amp. Prior to the finalization of this DOE transaction, in June 2011, Bank of America Merrill Lynch, Prologis and NRG Energy joined forces on Project Amp, which was â a four-year, $2.6 billion project to place solar panels on rooftops in 28 states, one of the most ambitious clean-energy projects in recent years,â reported the Wall Street Journal.

The Journal goes on, â Bank of America Merrill Lynch unit will provide $1.4 billion in loans for the project,â of which â the financing is part of Bank of Americaâ s plan to put $20 billion of capital to work in renewable energy, conservation and other clean technologies that address climate change.â

However, by October 2013, the Energy Department pulled the plug on Project Amp, and according to POLITICO, Prologis never tapped into the $1.4 billion. Still, along the way, Prologis did secure â a grant for $68,000 for the purpose of â rent for warehouse spaceâ under the Recovery Act.

While I have yet to do a complete analysis on Bank of America/Merrill Lynch and their renewable energy portfolio, there are additional firms or projects that this bank has backed that also received â greenâ taxpayer funds from the Obama administration.

NextEra Energy Wind Energy Assets

Fist is NextEra, whose CEO Lewis â Lewâ Hay, III was member of President Obamaâ s Jobs Council (from 2011 until 2013), that was awarded two large DOE stimulus loans, as well as a slew of other green energy stimulus funds. This is part of the scheme that weâ ve been documenting since the summer of 2012 (â Third Largest Recipient of DOE Risky Loansâ), and later in my January 2013 Big Wind Story.

But since Bank of America has invested in the wind side, whatâ s key here is this: NextEra was the biggest user of the wind energy production tax credit. In an analysis by John Fund of the National Review Online, he statesâ ¦

Begun 20 years ago to spur the construction of wind-energy facilities that could compete with conventional fossil-fuel power plants, the tax credit [PTC] gives wind an advantage

over all other energy producers. But it has mostly benefited conventional nuclear and fossil-fuel-fired electricity producers. The biggest user of the tax credit is Florida-based NextEra Energy, the nationâ s eighth-largest power producer. Through skillful manipulation of the credits, NextEra from 2005 to 2009 â paid just $88 million in taxes on earnings of nearly $7 billion,â Businessweek reports. Thatâ s a tax rate of just 1.25 percent over that period, when the statutory rate is 35 percent.

SolarCity

Considering that the Podesta Group added SolarCity as a client in 2012, I highlighted the various political connections to this solar firm earlier, including billionaire players that received taxpayer money for other green energy deals, such as Elon Musk, Nicholas J. Pritzker, and George Soros.

But what most donâ t know is that SolarCity was in line to get a stimulus loan from the DOE for $275 million. However, that deal â â dubbed SolarStrong â â fell apart due to the Solyndra â red flagsâ just prior to the loan programâ s deadline in September 2011. A month later, SolarCity found a willing partner in Bank of America, which was followed by this official announcement: â SolarCity and Bank of America Merrill Lynch today announced that they have agreed to terms on financing for

SolarStrong, SolarCityâ s ambitious five-year plan to build more than $1 billion in solar power projects for privatized U.S. military housing communities across the country.â

It should be noted that without government subsidies, SolarCity wouldnâ t be the success it is today: â SolarCity currently benefits from tax credits totaling as much as 30 percent of the cost of these systems,â noted Bloomberg. And, as I documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million.

SunPower

Bank of America Merrill Lynch and SunPower have worked together since 2009. And this year they announced a $220 million financing program for residential solar lease projects. In January 2010, SunPower Corp, the San Jose, Calif.-based designer and manufacturer of solar panels and systems, received four of the stimulus-enacted Section 48C Tax Credits totaling $10.8 million. Then, despite SunPowerâ s well-known financial issues and the fact that it was under a shareholder suit alleging securities fraud and misrepresentations, just days (September 2011) before the 1705 Loan Guarantee Programâ s deadline (along with four other solar companies), this â non-investmentâ grade $1.2 billion stimulus loan was approved â â to support the construction of the California Valley Solar Ranch (CVSR) in San Luis Obispo County.

The conditional loan to SunPower was announced on April 12, 2011, and shortly thereafter (April 30, 2011), the French oil conglomerate Total committed to buying a $1.37 billion controlling stake (60%) in SunPower Corp â â a bailout that was confirmed in June 2011. Now, SunPower never directly got the cash, because on the final closing of the DOE loan guarantee, they sold the California Valley Solar Ranch to NRG Energy. However, SunPower continued on as the developer and Bechtel as the primary contractor building the project.

Also, to date, SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 12 states, totaling over $86 million tax dollars. Besides Bank of America, both SunPower and NRG Energy have additional meaningful political

connections to President Obama and other high-ranking Democrats, of which weâ ve documented a few times: First in my October 2012 report (troubled green energy projects) and then in my February 2013 analysis on Citigroup, another CAP donor that is up next, which is a huge player inside this â climateâ scam. Lastly, due to the fact that NRG Energy, a Fortune 500 and S&P 500 Index company, of which they and their subsidiaries, initially, were the recipient of most of 1705 stimulus loans: at least $5.2 billion of taxpayer money (now minus the $1.4 billion for Project Amp). NRG Energy was one of

George Sorosâ timely investments that I mentioned at the beginning of this post, yet more Intel can be found in my March 2013 Green Corruption File.

#2) Citigroup (confirmed donor since 2012):

Since 2007, Citigroup has been heavily involved in â climate change activities.â We also can confirm that this â too-big-to-failâ bank has made a massive footprint inside Presidentâ s Obamaâ s clean-energy

dirt â â the candidate that Citigroup helped get elected in 2008 as the number seven top donor (PAC) with many executives and friends of Obama bundling for both his campaigns. Meanwhile, in 2012, Citi contributed to both President Obama and Mitt Romney.

By 2011 â â prior to the presidential reelection â â through their â 50 Billion Climate Change Investment Initiative,â Citigroup had â directed $36.35 billion into such initiatives so farâ ¦â â â of which they brag:

â In the U.S., Citi has the largest market share (28 percent) of U.S. Department of energy section 1703/1705 Loan Guarantee program financings for alternative energy, and we are the leader in such bond transactions.â

Considering that in February 2013, I dedicated an entire post to Cit and their Massive â Greenâ Money Machine,â which included a careful analysis of their â 2012 alternative energy portfolioâ that lists about 37 transactions (plus SolarReserve) â â both foreign and here in the United States, here Iâ ll just give some highlights.

What I found is that 58 percent (22) of Citiâ s clients had received government subsidies, totaling approximately $16 billion from the taxpayer-funded Green Bank of Obama, the majority from stimulus package. Furthermore, my research not only â followed the green money,â but profiled the Citi executives that operate (d) inside the White House, some with key positions, which included President Obamaâ s 2013 choice to replace Timothy Geithner for Treasury Secretary with Jack Lew (former Chief of Staff), Michael Froman, Richard Parsons, Louis Susman, and Michael Eckhart â â to name a few.

Many of the alternative energy projects that Citi was involved are mentioned in todayâ s study, starting with the Energy Departmentâ s junk bond portfolio, which were doled out between 2009 and 2011:

â ¢ BrightSource Energy was awarded $1.6 billion DOE loan for the Ivanpah solar facility in California

â ¢ Brookfield Renewable Power, whereas Granite Reliable received a $168.9 million loan for a wind project in New Hampshire.

â ¢ Caithness/General Electric received a $1.3 billion DOE loan for the Shepherds Flat wind project in Oregon

â ¢ NextEra Energy /First Solar got a $1.46 billion loan for the Desert Sunlight project in California;

â ¢ SolarReserve was awarded $737 million DOE stimulus loan for the Crescent Dunes project in Nevada.

According to their renewable energy portfolio, Citi, in February 2011, became a major investor in SolarCity. And, as I documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million. Citigroup, as of 2010 was listed as SunPowerâ s bookrunner. Then in August 2011 SunPower and Citi set up a $105 million fund for residential solar leasing projects, which states, â SunPower will use the

fund to extend its SunPower Lease programme to customers in 8 US states, expanding the financing options available to homeowners interested in SunPower solar energy systems. The SunPower Lease is now available in Arizona, California, Colorado, Hawaii, Massachusetts, New Jersey, New York and Pennsylvania. Citi is contributing $80m to the fund.â Again, I covered SunPower under Bank of America, showing that this solar firm was given plenty of green government subsidies:

â ¢ In January 2010, SunPower Corp received four of the stimulus-enacted Section 48C Tax Credits totaling $10.8 million.

â ¢ In September 2011, SunPower is part of the $1.2 billion stimulus loan to support the construction of the California Valley Solar Ranch (CVSR) in San Luis Obispo County.

â ¢ SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 12 states, totaling over $86 million tax dollars.

#3) Goldman Sachs (possibly a donor since 2012):

Goldman Sachs was a top Obama donor in 2008, but we also know that two Goldman executives sat on Obamaâ s 2008 Finance Committee and a slew of partners, executives and board members bundled for, and donated to Obamaâ s 2008 campaign. Meanwhile, his administration has been infested with Goldmanites â â even as early as 2008 when a Goldman board member, James A. Johnson (also an Obama bundler that I profiled many times due to his former firm Perseus), was chosen as head of Barack Obamaâ s vice presidential search team. Known as Jim Johnson and â a fixture of establishment Washington, with ties to Wall Street and â a major presence in Democratic politics for more than two decades,â Mr. Johnson resigned his VP vetting role amidst criticism over his part in the Countrywide Financial scandal as well as controversy surrounding his role as Fannie Maeâ s chief executive from 1991 to 1999.

Even though in 2012, Goldman Sachs turned their back on Mr. Obama in 2012, there were many executives and board members who helped him get reelected.

Like Bank of America, I havenâ t had the opportunity to examine Goldman Sachsâ Alternative Energy Group and its Environmental Markets financing and advisory; however, we do know that Goldman has

been investing in renewable energy since at least 2005.

By 2014, Goldman Sachs â declared that the renewable sector is one of the most compellingâ â â even as they backed â greenâ in 2012, having committed $40 billion to renewable energy (made and planned investments). According to Renew Economy, â Stuart Bernstein, who heads the bankâ s clean-technology and renewables investment banking group, told Recharge in a recent interview in a story titled Goldman goes Green, â It is at a transformational moment in time.â

As Goldman promotes President Obamaâ s Climate Action Plan along with other winners of clean-energy funds, they also brag about their climate change roles: â In 2012, we financed nearly $2 billion

and co-invested more than $430 million in the sector. We also served as financial advisor on clean-energy transactions valued at more than $1.1 billion.â

Needless to say, since 2010, Iâ ve been following Goldman and tracking how this Big Bank has been cashing in on the stimulus funds. As my research developed, I found their DNA all over this green energy scheme, of which to date we can confirm that Goldman Sachs has a vested interest â â via various roles, and having entered the scene at different junctures (before, during and after taxpayer subsidies were awarded), in many projects and firms that received loans, grants and special tax breaks. So far Iâ ve tracked at least 14 firms connecting Goldman to over $8.5 billion from the Green Bank of Obama, the majority from the 2009-Recovery Act.

Keep in mind too, that Goldman is associated (former executives and investments) with the Big VC firm Kleiner Perkins as well as Generation Investment Management (GIM) â â mentioned a few times already. As a reminder, Kleiner Perkins is where we find the â climate duo,â whose combined carbon footprint is larger than my entire city: Billionaires John Doerr and Al Gore (partners at the firm), where Doerr, â a very big-ticket Obama donor,â in January 2009, persuasions were reflected in the 2009-Recovery Act via his â meetings with Obamaâ s transition team and leaders in Congressâ as well as the fact that he made â five recommendations to Congress and President-elect Barack Obama to jumpstart a green-tech revolution and fight global warming.â

Shortly thereafter (around February 6, 2009) and just days prior to signing the stimulus bill (February 18, 2009), Obama appointed Doerr as a member of his Economic Recovery Advisory Board (PERAB), which later morphed into the presidentâ s jobs council â â only to close down in February 2013.

Meanwhile, back in 2004 Gore started GIM with former CEO of Goldman Sachs Asset Management David Blood, who is another Obama bundler. Apparently, Blood is the â wizard behindâ GIM, and behind this â sustainable firmâ are several former Goldman executives and partners â â even as Doerr, in 2007, joined the GIM advisory board.

This and more insight were profiled in my January 8, 2013 file on Doerr and Gore, whose â Greentech Portfolioâ (at least 50%) and GIMâ s â Sustainable Investingâ secured billions in loans, grants and

special tax breaks â â the two firms combined are tied to at least $10 billion from the taxpayer-funded Green Bank of Obama, the majority coming from the 2009-Recovery Act, of which Doerr had helped author.

As far as Goldman: first off they made big money from the sale of Horizon Wind Energy to Portugalâ s EDP for $2.5 billion in 2007, of which ironically, starting in 2009 until the end of 2012, EDP Renewables North America LLC (formerly Horizon Wind Energy LLC), received over $700 million of free taxpayer money from the Obama stimulus bill ($722,468,855 in Section 1603 Grants) for eleven wind projects, placing them at the number two spot of foreign firms that were winners of US grants. This was a shocking report released in early 2013 by the Energy and Commerce Committee, exposing the extent to which foreign corporations are benefiting from green energy stimulus funding.

Goldmanâ s Green Losers, Winners, Biofuels, & Smart Grids

Nevertheless, Goldman is credited as the â exclusive financial adviserâ for the now bankrupt Solyndra ($570.4 million loss), and in 2010, handled the IPO of what most deem a government winner, Tesla Motors that was awarded $465 million from the DOE ATVM program. Also, according to Goldman, â In May 2013, [they] helped raise over $1 billion in new financing for Tesla Motors.â

There are more bankrupt ones as well: SpectraWatt ($20.5 million), Nordic WindPower ($8.6 million),

and Suntech Power Holdings Co. ($2.1 million) â â all taking millions of taxpayer money down with them, while Goldman remains unscathed.

Goldman is also active in advanced biofuels and feedstock companies, handling the IPOs of biofuel companies, of which at least two won money and contracts from the Obama administration: Amyris ($25 million stimulus grant), Kior (seeking $1 billion DOE loan) and Solazyme ($21.7 million DOE stimulus grant; plus part of the $12 million biofuel contract with the U.S. Navy) â â the latter company has its very own direct connection to CAP: Jonathan Wolfson, Solazyme co-founder and Chief Executive Officer, â is an active participant in many advisory groups, including sitting on the board of the Center for American Progress (CAP) Clean Tech Council.

Meanwhile, Goldman hooked up with another huge winner of stimulus funds: â In March 2013, [they] served as lead-left bookrunner on the $93 million initial public offering for Silver Spring Networksâ â â a Foundation Capital, Kleiner Perkins, and Google (all with friends in the White House) green investment, which in 2009, cashed in big time when the DOE starting handing the smart-grid grants as part of the 2009-Recovery Act. During the course of my January 2013 analysis on Silver Spring, I found that 30 percent of the $4.5 billion stimulus smart-grid grants went to their â customersâ â â thatâ s over $1.3 billion. Then in my May 2013 report, â Smart Gird, Dirty Devicesâ , I documented additional ties and an interesting analysis of its IPO: â Silver Spring IPO has more red flags than a Communist Party military parade,â PrivCo CEO Sam Hamadeh.

Goldmanâ s Green DOE Stimulus Loans

Considering that First Solar is also a CAP Business Alliance Member (donor), weâ ll expand on that solar firm later, but what is key here is that Goldman was an early investor in First Solar that snagged three large DOE stimulus loans (over $3 billion) â â a story weâ ve featured many times, starting with â The First Solar Three Billion Dollar Swindle.â

Still, Goldman was (is) also an investor in U.S. Geothermal that in February 2011, landed a $97 million DOE stimulus loan slated to build a 22-megawatt power plant in the eastern Oregon desert. This was â â one of the first geothermal projects funded by the DOE, despite the fact that in December 2010, S&P

had rated this loan as non-investment grade. Yet, the â 2012 Internal DOE Email Dumpâ prove that this deal was rushed and approved in time for a POTUS photo op. Moreover, U.S. Geothermal had other projects that snagged millions in green energy subsidies.

Then in September 2011, Cogentrix of Alamosa, LLC (Cogentrix Energy a subsidiary of Goldman Sachs), was awarded a $90.6 million DOE stimulus loan for the Alamosa Solar Generating Project in

Colorado. Cogentrix, on July 16, 2012 bagged a $34.6 million stimulus grant (free taxpayer money) from the 1603 Grant Program â â Iâ m assuming this is for the same project.

But thatâ s not allâ ¦.

BrightSource Energy Just Got Darker

According to Renew Economy (January 2014), â [Goldman] has also a substantial investment in BrightSource Energy,â which actually brought its Ivanpah solar power facility into full production last month â â and if not for a federal loan guarantee, the $2.2-billion project would have never seen the light of day. Now this massive solar power plant (struggling to produce power) has become the â $2.2 Billion Bird-Scorching Solar Projectâ â â with even the left-leaning Los Angeles Times, chronicling their grand opening like this:

After nearly four years of construction that killed desert tortoises, burned the feathers off passing birds and mowed down thousands of acres of native flora, Ivanpah officially opened last month with a gala that included a rock band and a horde of dignitaries â Energy Secretary Ernest Moniz among them.

Weâ ve been uncovering BrightSource Energyâ s $1.6 billion shady DOE deal since July 6, 2012, and as new information became available weâ ve revisited this huge solar transaction several times. In short, the Ivanpah Solar Electric Generating System (SEGS) in California was subsidized with a $1.6 billion DOE stimulus loan, which was announced on February 22, 2010 and finalized April 11, 2011 â â a project that also received special treatment by the Department of Interior, which was

documented in our â 2012 Special Seven Series.â

Still, BrightSource investors not only include Goldman Sachs, but additional 2008 Obama donors such as Google, Morgan Stanley, and BP Alternative Energy. Meanwhile the Ivanpah project incorporates a slew of ties to President Obama as well as Vice President Joe Biden and Senator Harry Reid. This story comprises of big donors, political cronies and connections such as BrightSource, VantagePoint, Google, NRG Energy, PG&E, Goldman Sachs, Citigroup, George Soros, the former Commerce Secretary John Bryson, McBee Strategic Consulting, lobbyists Bernie Toon, and others â â with DOE officials, Obamaâ s Green Team, and several in Congress from the Democrat side involved.

While I briefly addressed Citigroupâ s part in this billion-dollar deal in February 23, 2013 (Ongoing â â $250mm IPO / Joint Bookrunner), it should be noted that just days after the finalization of the $1.6 billion government loan, BrightSource had filed for and IPO, of which Goldman Sachs Group Inc., Citigroup Inc. and Deutsche Bank AG were leading the proposed offering. However, a year later, they canceled their IPO, and BrightSource CEO John Woolard (now former) told Gigaom.com that it was â because of the weak public markets, particularly for solar and greentech companiesâ ¦â â â of which, to date the IPO is still pending. Yet, we do know that Goldman has made equity investments in the solar developer BrightSource.

We also can confirm that additional political heavyweights have been hovering over this deal, starting with Bechtel (another big corporation with their hand in the stimulus) that constructed BrightSourceâ s Ivanpah project as well as the fact that sometime in October 2010, during the time of their DOE loan review process, â NRG became the lead investor ($300m) in Ivanpah solar project. In fact, as mentioned, this was one of the four (now three) large taxpayer-funded stimulus projects that NRG Energy is part of.

Side Note: My March 22, 2013 file covers The Soros connection, its CEO David Crane, and more. My September 2013 post on BrightSourceâ s Top DC lobbyist (since 2009) gives more insight into other players inside this $1.6 billion DOE deal, such as VantagePoint, Google Inc, and PG&E, which included ongoing interaction and pressure from the heavyweight K Street firm McBee Strategic

Consulting â â another huge player inside this green energy scam. Whatâ s key is that Steve McBee â reportedly wrote key provisions in the stimulus bill to open the spigot of green corporate welfareâ â â thus over 60 percent of his energy client list cashed in under the Obama administration.

Lastly, in November 2013, we unleashed BrightSourceâ s connection to Senator Harry Reid as well as the incriminating â 2012 Internal DOE Email Dumpâ relevant to this particular DOE transaction.

Whatâ s key here is that BrightSource Energy has never been solid. In fact, the â Oakland-based BrightSource Energy Inc. had emerged from the bankruptcy of its parent company.â Now Iâ m assuming this was out of the ashes of BrightSource Industries (Israel) Ltd. that was formerly known as LUZ II Ltd., and changed its name in December 2008.

Nevertheless, according to Schweizer in Throw Them All Out, as he described the financial issues they were having, â BrightSource badly needed this infusion of taxpayer cash.â So in essence this $1.6 billion stimulus DOE deal was a bailout, which is a clear violation of the American Recovery and Reinvestment Act of 2009 â â a fact that we elaborated on many times.

Goldman: SolarCity, SunEdison & SunRun

According to Renew Economy (January 2014), â Goldman Sachs also provided $500 million of finance to SolarCity, to allow the biggest solar installer in the US to expand its solar leasing business. Goldman is one of a number of banks to do that â â the latest was Bank of America/Merrill Lynch.â

Goldman, in 2012, also handled the IPO for SolarCity â â the solar firm I first highlighted under the Podesta Group (became a 2012 client) and expanded upon under Bank of America, noting that SolarCity was not only in line to receive a loan from the Energy Department, but as documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million. Weâ ll keep watchingâ ¦

There is also SunEdison LLC â â a global provider of solar-energy services â â which was also an early Goldman Sachs investment. Due to the fact that this solar firm also became a client the Podesta Group in 2012, I covered the fact that in 2013, SunEdison won 5 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 5 states, totaling over $1.8 million tax dollars.

Furthermore, SunEdison is in cahoots with JPMorgan, GE Capital as well as Southern Company and a few other familiar green energy players and CAP donors such as Bank of America, Duke Energy, and First Solar.

Just last month, the Wall Street Journal reported, â Sunrun Inc., a company that finances and installs home solar projects, has retained Goldman Sachs to raise a growth equity round of more than $100 million, according to a person familiar with the situation.â

SunRun can be found in my May 2012 research on Foundation Capital â â another friend of the Obama White House and big VC winner of taxpayer money from the Green Bank of Obama, adding to my long list of Big VCâ s that have had made out like bandits. As of October 2013 , I found that SunRun, between 2011 and 2013, snagged 23 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 10 states, totaling over $141 million tax dollars, thus far.

Plus in 2010, SunRun announced a $100 million joint program with major utility Pacific Gas & Electric, which according to Venture Beat, â PG&E will be funding the rooftop systems in question via its subsidiary, Pacific Energy Capital II, a tax equity fund,â of which â In lieu of traditional returns, the investor â PG&E in this case â gets tax benefits in addition to some cash returns.â

#4) Covanta Energy (confirmed donor since 2012):

This was one of those Soros timely investments (twelve alternative energy and utility companies) that I had alluded to in the beginning of this post and exposed in my March 2013 Green Corruption File. I found that Covanta, a clean-energy company and the recipient of federal stimulus grants, also received millions in 2010 through Congressional earmarks, yet it is unclear as to how many green government subsidies or the exact stimulus dollar amount that Covanta Energy snagged. Also, Covanta Energy stands to benefit from the NAT GAS Act if it comes to light again.

#5) General Electric (confirmed donor since 2011):

General Electric (GE) is a heavy donor to both Republicans and Democrats, and its CEO Jeffrey Immelt â plays the role of typical corporate donor who hedges his bets on both sides of the fence.â However in 2008, GE gave the Obama campaign $529,855, marking them as a top Obama donor.

Meanwhile, in early 2009, Immelt was first appointed as a member of Obamaâ s Economic Recovery Advisory Board (PERAB), which later morphed into the presidentâ s jobs council, where Immelt served as the Jobs Czar, until it closed down in February 2013.

Nevertheless, GE is a major player on the clean-energy scene as well as in this green energy scheme, starting with the fact that they were also part of the DOEâ s Electricity Advisory Committee that had influence into the 2009-Recovery Act. In 2009, the New York Times recognized GEâ s green power, noting, â GE lobbied Congress to help expand the clean-energy subsidy programs, and it now profits from every aspect of the boom in renewable-power plant construction, including hundreds of millions in contracts to sell its turbines to wind plants built with public subsidies.â

Iâ ve been keeping track of GEâ s â green tabâ since 2012, which at that time exceeded $3 billion in direct (some indirect) taxpayer cash. This tally includes three large stimulus loans from Energy Departmentâ s junk bond portfolio that were doled out between late 2010 until September 2011.

Considering the treasure trove of Intel found in the â 2012 Internal DOE Email Dump,â I revisited GE in my December 2012 post. Long story short, in October 2010, the Caithness Shepherds Flat wind project located in eastern Oregon was awarded a $1.3 billion DOE stimulus loan â â a $2 billion project sponsored by GE, who also supplied the project with 338 wind-turbines. These internal emails show that this transaction was approved with White House pressure. For example:

September 9, 2010 EMAIL: James McCrea (subject line: Shepherds Flat â Draft Responses to OMB Questions), â As you all know, the pressure to make decisions on this transaction are high so speed of the essence.â Then later that day, McCrea writes (Email #4 from Appendix I) he says, â Pressure is on real heavy on SF [Shepherds Flat] due to interest from VP.â

Shepherds Flatâ s developers also received â a $500 million federal grant, state tax credits totaling $18 million, accelerated depreciation on federal and state taxes worth $200 million, and a premium for its power from the state worth $220 million.â At some point, the Shepherds Flat wind farm received three separate tax credits totaling $30 million from the state of Oregon.

But thereâ s moreâ ¦

In September 2011, the poorly rated 1366 Technologies, sponsored in part by GE, received a direct $150 million stimulus loan from the DOE for its solar manufacturing plant.

GE is also part of the $1.2 billion DOE stimulus loan for the Desert Sunlight project, which was finalized in September 2011. This is part of the First Solar Swindle that has been mentioned a few times in this post, and will be detailed later.

Federal Railroad Administration (FRA) loaned $54.6 million to Kansas City Southern Railway Company (KCSR) â to purchase thirty new General Electric ES44AC diesel-electric locomotivesâ â â a loan that raised red flags in the March 2012 House Oversight investigation.

Also, youâ ll be â blown awayâ by the billions of â wind energy grantsâ that flew out of the stimulus package back in February 2010, of which at that time, GE was contracted to at least 26% of them as the â Turbine Manufacturer.â

In late 2009, it was reported by Gigaaom, â GE is one of the newer smart meter players, but the conglomerate has been working with utility Oklahoma Gas & Electric on a 6,600 smart meter trial, and has a contract with PHI, which received $104.80 million for a smart meter deployment in Washington, DC. GE also has a big contract with Florida Power and Lightâ that also the recipient of a $200 million stimulus grant.

Other than bagging direct green energy stimulus money, GE has also joined forces with others that have benefited from Obamaâ s alternative-energy taxpayer funds. Two in particular â â the Advanced Metering Partners, another John Doerr â ventureâ via Silver Spring Networks, as well as Energy Technology Ventures formed in 2011 with NRG Energy and ConocoPhillips. And, Iâ m sure if were to visit GE again, weâ d find much more than $3 billion in green energy funds.

#6) Google (confirmed donor since 2012):

Google, like Wall Street and Big Energy, plays the political game well: itâ s all about access and influence, starting with campaign contributions. Googleâ s $814,540 contribution to then-Senator Obamaâ s campaign made it the fifth largest donor in 2008, and in 2012 moved up to the number three spot with a whopping $805,119. Furthermore, Googleâ s CEO at the time, Eric Schmidt, served as an

informal advisor to President Obama. Schmidt, Google Executive Chairman, was also an Obama donor in 2008, and since April 2009, is (was) a member of the presidentâ s Science and Technology Advisory Council (PCAST).

Another Google political connection is Dan Reicher, director of climate and energy initiatives at Google, who was one of the founders of Cleantech and Green Business Leaders for Obama. There are other interesting folks behind the Google scenes such as John Doerr and Al Gore â â the dynamic climate duo mentioned periodically in this post â â who has served as a member of Googleâ s board of directors since May 1999, with Gore as a (past) senior advisor.

And according to Michelle Malkin, â Google cofounder Sergey Brin, Chief Legal Officer and Senior Vice President David Drummond, and Google Vice President and Chief Internet Evangelist Vint Cerf are all vocal Obama supporters and top donors.â Meanwhile, Google co-founders Sergey Brin & Larry Page, invested in Tesla Motors, while Google, in 2011, partnered with SolarCity (mentioned a few times now) to create a $280 million fund for residential solar projects â â both BIG winners of â greenâ taxpayer money.

Like many of these Big VCâ s that won a significant amount of green money from the Obama administration â â Kleiner Perkins, Khosla Ventures, The Westly Group, VantagePoint Capital Partners, Google Ventures, Foundation Capital, and others â â their â cleantech investmentsâ overlap, and I briefly touched on Google in my January 2012 post about Doerr and Gore.

Later, I documented Google as energy client of McBee Strategic Consulting (in my September 2013 Green Corruption File), discovering and exposing the fact that Google Ventures â â via their â Energy Investmentsâ and other â green dealsâ that I tracked down at that time â â has ten verified stimulus and other green energy money winners, which places their investment score at close to $5 billion of taxpayer cash, which includes three DOE loans: BrightSource Energy ($1.6 billion); GEâ s Caithness Shepherds Flat wind project (presented under GE for $1.3 billion); and Tesla Motors that won $465 million ATVM loan. If you add in Silver Spring Networksâ customers that won $1.3 billion in smart-grid stimulus grants, which I divulged here a few times, that figure rises to $6.3 billion and counting.

#7. PG&E (confirmed donor since 2011):

This utility giant is a strong Obama and Democrat donor that happens to be all over this â greenâ scam. Not only did they have direct influence over the DOE loans, they are jam-packed with Washington â green cronies,â including Cathy Zoi, who is the â most controversial former PG&E employee to hold an influential government.â Zoi, an Al Gore acolyte was a DOE Insider from 2009 until 2011, and she is not only tied to PG&E but other stimulus winners.

Still, PG&E was another client of the top DC lobbyist, McBee Strategic Consulting, of which I divulged in my September 2013 Green Corruption File. As reported by the Washington Free Beacon in 2012, â PG&E has become an aggressive buyer of power supplied by solar, wind, and other renewable sources, in large part due to statutory requirements under Californiaâ s Renewable Portfolio Standard, which mandated that 20 percent of the utilityâ s electricity come from renewable sources by 2010 â and 33 percent by 2020.â

The big win for this huge energy corporation is that they have an invested interest in seven Energy Department stimulus loans worth $7.6 billion. Moreover, with the exception of BrightSource Energyâ s $1.6 project, of which we now know from an email Dated January 4, 2010, that Peter Darbee, then CEO of PG&E, had himself spoken to President Obama about this deal, the rest of the loans were finalized between June and September 2011. While the details into these taxpayer-funded projects can be found in my April 2013 post, hereâ s an overview.

Agua Caliente Solar Power Project located in Yuma, Arizona, of which â PG&E will purchase the projectâ s power and deliver it to customers in California.â Project by NRG Solar: $967 million loan guarantee

BrightSource Energy development located in Baker, CA, of which â electricity from the project will be sold under long-term power purchase agreements with Pacific Gas & Electric and Southern California Edison Company (SCE).â Project by NRG Energy, Inc. (BrightSource): $1.6 billion loan guarantee

California Valley Solar Ranch of which the 250-megawatt is under construction in eastern San Luis Obispo County, and â is generating clean, reliable solar power for transmission over PG&Eâ s utility

grid.â Project by NRG Solar and SunPower is still involved: $1.237 billion loan guarantee

Desert Sunlight Project located in Riverside, CA, with the PPA (purchase power agreement) listed as Southern California Edison and PG&E. This is a First Solar Project that is co-owned by NextEra Energy Resources, GE Energy Financial Services, and Sumitomo Corporation of America: partial guarantee of $1.46 billion

Genesis Solar Energy Project located in Riverside County, CA of which â power from the project will be sold to Pacific Gas and Electric Company.â Project by NextEra Energy Resources, LLC: partial guarantee of $852 million loan

Mesquite Solar 1, LLC located in Maricopa County, AZ, of which Bloomberg News had reported at the time the DOE loan was approved, â Sempra will sell electricity from the Mesquite Solar 1 plant to Californiaâ s largest utility, PG&E Corp., under a 20- year contract.â Project by Sempra Mesquite: $337 million loan guarantee

Mojave Solar located in San Bernardino County, CA, of which at the time of the DOE loan approval (September 2011), â Abengoa signed a power-purchase agreement with PG&E to buy the energy produced by the project for a period of 25 years.â Project by the Spanish firm Abengoa Solar, Inc.: $1.2 billion loan guarantee

Meanwhile, my May 2013 â Smart Gird, Dirty Devicesâ divulges PG&Eâ s partnership with Silver Spring Networks on many fronts (PG&E is their top customer). Silver Springs is the the lucky smart-grid technology company that I mentioned earlier, who has an array of White House connections â â Foundation Capital, Kleiner Perkins and Google â â and as of January 2013 is linked to at least $1.3 billion in smart-grid stimulus grants.

But thereâ s moreâ ¦

PG&E won a significant amount of stimulus money for various projects, of which last year I found at least seventeen that added up to over $55 million of tax dollars.

PG&E also bagged at least four stimulus 1603 grants in 2012 and 2013 (for fuel cell, hydropower and solar) totaling $127.2 million.

SolarCity and SunRun, who both won large sums of stimulus money (duly noted in this post), are in cahoots with P.G.&E. Corporation, the California utility holding companyâ s tax-equity fund to finance residential solar installations.

CAPâ S 2011 & 2012 DONORS: Clean-Energy Money Winners (referred to as â American Progress Business Alliance Membersâ)

Energy/Utilities

#8) American Electric Power (AEP):

While I found that AEP (between 2009 and 2010) was awarded at least four stimulus grants totaling $740 million, which was detailed in my March 2013 Green Corruption File, there is more to share.

According to Schweizerâ s bombshell book, â in the first quarter of 2009, Soros made an initial purchase of more than 1.5 million shares in American Electric Power (AEP), a utility company that invested heavily in an energy project called FutureGen.â

This was a project that had been abandoned by the Bush administration; however, on June 12, 2009, the Obama administration revived FutureGen: â a federal-industry partnership that would build an advanced coal-burning power plant in Illinois to trap and store carbon dioxide emissions.â After Obama took office, he not only restarted FutureGen with $1 billion from the stimulus package, but he moved the project to Meredosia.

The FutureGen Industrial Alliance â was formed to partner with the U.S. Department of Energy on the FutureGen project.â At that time it was a consortium of major coal and utility companies such as American Electric Power Co. Inc. and Peabody Energy Corp. Just thirteen days later, both AEP and Southern Co withdrew from the U.S.-government backed FuturGen project.

Despite ongoing drama, cost overruns and delays, as well as potential air pollution and other matters; back in February 2013, the FutureGen project was moving forward. While AEP was gone, we did find Ameren Corp (another Soros timely investment) along the way. Currently the FutureGen Industrial Alliance includes Alpha Natural Resources, Joy Global Inc, Peabody Energy, Xstrata Coal Pty Limited, and another CAP corporate donor, Anglo American (up next).

#9) Anglo American (confirmed donor since 2012, listed under energy/utility):

As detailed above, Anglo American, â one of the worldâ s largest mining companies, is headquartered in the UK and listed on the London and Johannesburg stock exchanges,â is now part of the FutureGen project funded with green energy funds. This past January, the Energy Department â gave the long-planned FutureGen clean-coal project one of the final OKs [and $1 billion] it needs to start building,â announced the Daily Journal.

According to most reports, â If all goes according to plan, the FutureGen project should be fully operational by 2017 and continue commercial operations for at least 20 years.â

#10) Constellation Energy:

Again, this is one of those twelve alternative energy and utility companies that another Soros had invested in shortly having helped craft the 2009 stimulus package that I had alluded to in the beginning of this post (exposed in my March 2013 Green Corruption File). I found that Constellation, an Exelon Company, which is labeled as â the presidentâ s utility,â was another top 2008 Obama donor and big winner of â greenâ funds. Constellation received a $200 million stimulus grant, of which since they are (were) the parent of Baltimore Gas and Electric Co, Iâ m assuming the $200 million smart-grid grant (awarded in October 2009) that went to BGE is the one Schweizer had mentioned in his book (unless they got another $200 million for something else).

Moreover, according to the Washington Free Beacon, â Constellation is one of the most prolific providers of green energy to federally owned facilities, sporting contracts with the General Services Administration (GSA) for the U.S. Capitol building, the Federal Reserve, the Smithsonian Institution, the United Nations building in New York, and a host of federal buildings in several states.â

#11) Dow Corning (Silicone Manufacturing/Solar):

In January 2010, two manufacturing tax credits were awarded from the 48C stimulus-created program for solar projects in Michigan. The tax credits included â $141.9 million for Hemlock Semiconductorâ s (a joint venture of Dow Corning Corporation and others) expansion of its Michigan polycrystalline silicon operations, and $27.3 million for a monosilane plant Dow Corning is building.â

By 2012, Hemlock Semiconductor announced that they â were postponing three of the four phases of

their $1.2 billion plant in Tennessee,â of which the state of Tennessee had committed $245 million to Hemlock â â some of which was stimulus funds. In 2013, the company began laying off hundreds of workers at their Clarksville plant â â even 100 were from their facility in Michigan (March 2013), and 50 more in May 2013. With the future of their plants unknown, â Dow Corning Corp. announced [November 2013] that it is acquiring a bigger stake in Hemlock Semiconductor.â So, here we have two more failing stimulus-funded projects that we need to watch â â and a CAP donor ta boot.

#12) Duke Energy:

As duly noted, Duke Energy â â the nationâ s largest electric power company â â has been a client of the Podesta Group since 2009. Jim Rogers, the chairman of Duke Energy, is another Obama donor, who was a major player at the 2012 Democratic convention, as a contributor, creditor, host, and even a speaker.

While Duke Energy is worthy of additional scrutiny, my January 2013, Big Wind Story documented that in 2011, Duke Energy was the recipient of a $22 million grant from the DOEâ s ARPA-E advanced energy research program that was funded by the 2009 stimulus package. This was â to design, build and install large-scale batteries to store wind energy at one of its wind farms in Texas.â

Then in May 2013 (previously dated June 2010), Notrees Windpower â â a project of Duke Energy located in Texas â â was handed a stimulus grant from the 1603 Program for $103.6 million. And after a quick glance, I found three 1603 stimulus grants for Duke Energy Carolinas, LLC that were dished out in 2012 and 2013, totaling over $62 million for â hydropowerâ and â solar electricity.â Duke Energy was also privy to the â smartâ money as well â â in 2009, the DOE awarded Duke Energy a $200 million stimulus smart-grid grant to support projects in the Midwest.

#13) Enel Green Power North America:

In July 2012, Enel Green Power, through its US subsidiary Enel Green Power North America Inc., was awarded a grant for approximately $99 million from the 2009-Recovery Act 1603 grant program for the construction of the Caney River wind farm in Kansas. The Caney River and the Rocky Ridge wind farm project includes J. P. Morgan as well as Wells Fargo Wind Holdings LLC and Metropolitan Life

Insurance Company.

#14) First Solar (Solar Manufacturing and possibly a 2011 donor):

As Iâ ve alluded to many times in this post and others, First Solar has considerable ties to the Obama administration, starting with the fact that this solar firm was an early investment of Goldman Sachs, the Wall Street giant mentioned above as a CAP corporate donor since 2012 (maybe sooner).

In the mix we find another First Solar investor â â Generation Investment Management (GIM), which as you know, is Al Goreâ s sustainability firm tied to many green energy deals. Along the way we find a myriad of Obama billionaire cronies (donors and bundlers) that were also investors in First Solar: Ted Turner, Paul Tudor Jones, Whitney Tilson, David Shaw, as well as the fact George Soros bought First Solar stock sometime in late 2007, until about May 2011, as recorded at GuruFocus.com.

Prior to the $3 billion in DOE stimulus loans, in 2010, First Solar snagged $16.3 million â to expand its manufacturing facility to produce fully completed thinâ film solar modules,â in Ohio, which was part of the 2009-Recovery Act via the DOE / Treasury, Clean Energy Manufacturing Tax Credits (48C).

According to reports, â The Ohio Department of Development also lent First Solar $5 million, and the stateâ s Air Quality Development Authority gave the company an additional $10 million loanâ â â marking First Solarâ s Ohio facility as taxpayer-funded with over $30 million.

But it gets better: First Solar, in 2011, â also scored $547.7 million in loan guarantees [by the controversial taxpayer funded Export-Import Bank (Ex-Im)] to subsidize the sale of solar panels to solar farms abroad,â as documented by Veronique de Rugy (senior research fellow at the Mercatus Center) in her stunning assessment of DOEâ s Loan Program. Ms. de Rugy goes on, â More troubling is the fact that some of the Ex-Im money [$192.9 million] went to a Canadian company named St. Clair Solar, which is a wholly owned subsidiary of First Solar, meaning that the company received a loan to buy solar panels from itself.â

This Ex-Im transaction even hits closer to CAP, starting with Carol Browner â â CAP fellow, former DOE insider, and Al Goreâ s pal â â who is sits on (and has for a while) the Advisory Committee of the Export-Import Bank.

Still, the Daily Caller last month, unearthed another alarming connection: â [First Solar] is not only listed as a CAP donor, but has also been listed as a client of the Albright Stonebridge Group (ASG) in 2011 â a lobbying firm founded by former Clinton Secretary of State Madeleine Albright. ASG is also listed as a CAP donor.â

And, it gets better, as reported The DC

Coincidentally, Export-Import Bank President Fred Hochberg has spoken annually at CAP since 2011 â the same year First Solar got its loan. It is unknown whether the solar company was also a CAP donor at the time.

When Hochberg spoke at the progressive think tank in 2012, he mentioned that Alice Albright was in attendance â Madeleine Albrightâ s daughter and the Ex-Imâ s chief operating officer from 2009 to 2013. Hochberg spoke on June 25 and First Solar was awarded $57.3 million in financing on July 18.

In 2011, Hochberg spoke on June 15 and, just over a week later on June 23, Ex-Im awarded First Solar millions more in financing. That year the taxpayer-backed export bank awarded First Solar nearly $573 million to make their products more competitive abroad and boost their sales â most of that financing came after Hochberg gave his speech. First Solar Vice President Frank de Rosa was likely bundling donations for Obamaâ s reelection campaign around this time.

Nevertheless, the big money came from the Energy Department: First Solar, an Arizona-based manufacturer of solar panels, in August and September 2011, won three 1705 DOE â junk ratedâ stimulus loans totaling over $3 billion. Marita Noon and I first covered the â First Solar Swindlerâ in the summer of 2012, which began by documenting how seven solar companies received fast-tracked approval by the Department of the Interior (DOI) to lease federal lands in a no-bid process:

Abengoa Solar, BrightSource Energy, First Solar, Nevada Geothermal Power, NextEra Energy Resources, Ormat Nevada, and SolarReserve.

Since then, weâ ve tracked First Solarâ s woes, which began since the finalization of these three large DOE loan guarantees â â projects, by the way, that were sold to more Obama â energyâ cronies just after the taxpayer funds were approved. However, First Solar remained involved in all of them.

The Projects

Exelon (Antelope Valley Solar Ranch): $646 million stimulus loan

In September 2011, the same day that the Antelope Valley Solar Ranch, located in California, received a DOE loan guarantee for $646 million, Exelon Corp. purchased it. First Solar, which developed the project, is still actively involved. The AVSR1 project, by the way, is expected to create 350 constructions jobs and 20 permanent jobs.

The Chicago-based Exelon Corp, a big Obama donor and labeled as â The Presidentâ s Utility,â by itself is a huge piece of the Green Corruption scandal, which I have alluded to in the past and a another piece of the scandal in the works.

NextEra Energy Resources, LLC (Desert Sunlight): $1.46 billion stimulus loan

The California Desert Sunlight, in September 2011 â â again the same day that this project received $1.46 billion offer for a partial loan guarantee from the DOE â â was sold to NextEra Energy Resources, LLC, the competitive energy subsidiary of NextEra Energy, Inc. and GE Energy Financial Services. Yet, the September announcement also stated, â First Solar will continue to build and subsequently operate and maintain the project under separate agreements.â Both CEOâ s Jeffrey Immlet and Lewis Hay were featured in my â Green Five: Spreading the Wealth to Obamaâ s Ultra-Rich Jobs Council Membersâ series.

According to the DOE, Desert Sunlight, which is expected to create 550 construction jobs and 15 permanent jobs for the plantâ s operation, â will deploy commercially available First Solar Series 3 modules and is projected to achieve commercial operation by February 28, 2015.â

NRG Solar, LLC (Agua Caliente): $967 million stimulus loan

In August 2011, as the $967 million DOE loan guarantee for the Agua Caliente, located in Arizona, was announced, it was purchased from First Solar by NRG Solar, LLC, a subsidiary of NRG Energy. At that time it was noted that the First Solar will be providing the solar panels for this project, and that the plant, when completed, would supply power to PG&E.

According to the DOE, the Agua Caliente project â â considered another jobs creator with an expected

400 construction jobs and 10 permanent jobs â â â currently generates enough energy to power 49,600 households annually.â

Keep in mind that documented much earlier was Steve Spinner â â the two-time Obama bundler DOE advisor (April 2009 to September 2010) turned CAP fellow (September 2010 to October 2011) â â and his part in the First Solar deal making, which included advocacy for the at least the Antelope Valley project. Nevertheless, there are additional CAP players here, starting with what The Nation revealed in May 2013:

JosÃ© Villarreal â a consultant at the power-house law and lobbying firm Akin Gump, who â provides strategic counseling on a range of legal and policy issuesâ for corporations â was on First Solarâ s board until April 2012 while also sitting on the board of CAP, where he remains a member, according to the groupâ s latest tax filing.

#15) First Wind

In my January 2013 Big Wind Story â â also a client of the top DC lobbyists McBee Strategic Consulting â â I exposed a â twister of sweetheart dealsâ found in the Department of Energyâ s junk bond

portfolio, which included four risky wind projects. One of those was Kahuku Wind Power, LLC, a project of First Wind in Kahuku Oahu, HI, which in July 2010, was granted a $117 million DOE stimulus loan, estimated to create a whopping 200 jobs. And then on February 3, 2012 this same project received a 1603 grant for over $35 million [docket #2594 to $35,148,839].

Sadly, in August 2012 a fire that destroyed First Windâ s battery storage facility (built by Xtreme Power) and sent toxic fumes into the air, which left ratepayers in the dark over costs and safety. And, it was reported on January 23, 2014 that â Xtreme Power ran out of cash and filed for bankruptcy,â â â NOTE: Xtreme Power built the energy storage system for Duke Energyâ s Notrees wind energy farm in Texas, another winner of stimulus funds, listed above.

The First Wind plan was to secure taxpayer money and then go public. Now they achieved their first objective with the help of U.S. taxpayers, because and as of July 2012, First Windâ s projects have also received over $452 million in grants through the stimulusâ 1603 Program.

â ¢ First Windâ s Stetson Wind Farm in Maine â â $40,441,471

â ¢ Cohocton Wind Farm in New York, $52,352,334

â ¢ Dutch Hill Wind Farm In New York, $22,296,494

â ¢ Milford Wind Corridor Phase I In Utah; $120,147,809

â ¢ Milford Wind Corridor Phase II In Utah, $80,436,803

â ¢ Rollins Wind Farm In Maine; $53,246,347

â ¢ Sheffield Wind Farm In Vermont, $35,914,864

â ¢ Kahuku Wind Farm In Hawaii, $35,148,839

â ¢ Steel Winds II Wind Farm In New York, $12,778,75

However, in November 2010, Bloomberg announced, â First Wind Holdings Inc., the operator of wind-energy projects backed by D.E. Shaw & Co. and Madison Dearborn Partners LLC, said it withdrew its initial public offering because of unfavorable market conditionsâ thatâ s code for â weak demand.â

Speaking of IPOâ sâ ¦

Within the House Oversight leaked emails that were unleashed late October 2012, more specifically the 350+ page Appendix II (â 2012 Internal DOE Email Dumpâ), we find that just months prior to the final approval of the Kahuka loan there was intense interaction within the DOE regarding this transactionâ ¦

â Someone is pressing Jonathan [Jonathan Silver is the former Executive Director of the Loan Program Office] who is now pressing hard on the everyone as the sponsor has an IPO in the works.â

This and more can be found in my Big Wind Story, including a the fact the first-rate, high-powered political ties to First Wind are vast, starting with D.E. Shaw & Co, a New York-based investment firm that is a backer of First Wind Holdings Inc. (also an investor in First Solar). This was noted when I profiled Larry Summers from CAP â â adding that, according to Peter Schweizer, â Larry Summers was part owner of First Wind.â

The founder of the hedge fund DE Shaw & Co., David Shaw, is a two-time Obama bundler, who employed Larry Summers before heading to the Obama White House, as the top economic advisor. It turns out that in 2011, according to BusinessInsider.com, Shaw, a computer scientist and computational

biochemist, was â appointed by Obama to serve on the Presidentâ s Council of Advisors on Science and Technology.â

As revealed by Peter Schweizer, â another 42 percent of First Wind is owned by Madison Dearborn Partners, an investment firm with close ties [and friend of] to then-White House Chief of Staff Rahm Emanuel. The founder of the firm, David Canning, had been a bundler for George W. Bush. But he switched sides in 2008 and gave heavily to Obama. Madison Dearborn gave more to Emanuelâ s congressional campaigns than did any other business.â

While the GOP found that â Julia Bovey, First Windâ s Director of External Affairs, was formerly Director of External Affairs for Obamaâ s Federal Energy Regulatory Commission (June 2009 to June 2010),â there is much bigger fish here. All government backed green comes with a slew of lobbyists, and First Wind is no different â â enter in Larry Raskyâ s Lobbying Firm with ties to the top.

Larry Rasky, â a longtime confidant and campaign strategistâ of Vice President Joe Biden, was also a 2012 Obama bundler, and since Obama took office, â Rasky has visited the White House at least 21 Times,â half of which were during the course of the DOE loan review process (Data.gov, Accessed 7/18/12). Moreover, we know that in 2009, about the time the 2009-Recovery Act passed, First Wind retained lobbyists Rasky Baerlein Strategic Communications as well as Brownstein, Hyatt et al, who is primarily a Democrat donor, with some Republicans in the mix â â and as of 2012, maintains the work of Rasky. .

#16) General Motors (donor in 2011)

As I divulged at the beginning of this post, General Motors (GM) â â a CAP donor in 2011 â â was a client of the Podesta Group from 2010 until 2012. Even after the taxpayers bailed out General Motors in 2009 (over $80 billion â â $17.5 billion under Bush and $63.4 billion from Obama), of which we lost at least $14 billion, green energy taxpayer money continues to subsidize the failed auto maker. This time, though, was for GMâ s hybrid electric vehicle the Chevy Volt â â a car thatâ s not doing very well.

What Iâ ve tracked so far is that starting in 2009 until recently, GM has bagged hundreds of millions of stimulus dollars ($471.6 million to be exact) to support the Chevy Volt as well as green car

components, of which Iâ ll share the details when I dissect the CAP corporate donors.

According to the January 25, 2012 House Oversight Reportâ ¦

The American Recovery and Reinvestment Act of 2009 (ARRA) appropriated $2.4 billion for domestic production of batteries and components for electric cars. Of this, $1.5 billion in grants were directed toward manufacturing the batteries, while the remaining $900 million went to building new facilities or improving existing facilities to produce electric drive components. This included $151.4 million to Michigan-based Compact Power, Inc., for production of lithium-ion polymer battery cells for the GM Volt; $105.9 million directly to GM for production of high-volume battery packs for the Volt; $105 million to GM to construct facilities for electric drive systems; and $89.3 million to Delphi Automotive Systems, a former division of GM, to expand manufacturing facilities for electric drive power components.

Also, â buyers of the Volt will receive a federal tax credit of up to $7,500 of per vehicleâ as well as state tax credits.

Then, lo and behold, on December 12, 2013, Think Progress â â CAPâ s propaganda machine â â announced, â Ford Motor Company and General Motors Company will receive a combined $50 million to support their respective manufacturing facilities that produce electric cars.â This was from the stimulus-created 48C Program, of which GMâ s share was $20 million for â its Detroit-Hamtramck Assembly Plant where the company manufactures Extended Range Electric Vehiclesâ Chevrolet Volts and the Cadillac ELR electric luxury coupe â along with internal combustion cars.â

#17) Xcel Energy:

Whatâ s interesting is that Xcel Energy was in the loop with Cogentrix Energy, a subsidiary of Goldman Sachs, which in September 2011, snagged a $90.6 million DOE stimulus loan for the Alamosa Solar Generating Project. Then on July 16, 2012, Cogentrix bagged a $34.6 million stimulus grant (free taxpayer money) from the 1603 Grant Program â â Iâ m assuming this is for the same project.

Whatâ s interesting (see graph with Goldman Sachs stimulus loans) is that the partners involved in this

project included utility Xcel Energy (XEL), which signed a 20-year contract to buy enough CPV power to supply electricity to 6,500 homes; and Amonix, the California-based company that will supply the CPV panels â â Amonix (complete with Obama buddies) was subsidized with $29.6 million of taxpayer money before it went bankrupt in July 18, 2012. What a scamâ ¦

Also, according to MinnPost.com, in 2010, Minnesotaâ s Senator Al Franken visited Mulroyâ s Body Shop â to highlight the use of federal stimulus funds in creating jobs and boosting the alternative energy economy.â It turns out that the owner had 174 solar panels installed on the roof of his Nicollet Avenue body shop in South Minneapolis. And that â Minneapolis-based Solarflow Energy installed the system and is leasing the equipment to Mulroyâ s under contract with Xcel Energy. The lease agreement also includes installation, maintenance and support. The federal stimulus funds deliver a grant-in-lieu of a 30 percent tax credit on the value of the installation to Solarflow.â Solarflow start-up was partially funded through an Xcel Energy Renewable Development Fund grant of $1.5 million.

While Xcel was omitted from the $3.4 billion in stimulus smart-grid grants in 2009, for their highly touted $100 million â Smart Grid Cityâ project in Boulder, Colorado did snag about $24.2 million in federal economic stimulus money for â Smart Gridâ updates to the stateâ s power grid and customer meters. Still, Xcel Energy is slapping ratepayers with the bill: â In 2010, Xcel found itself asking Colorado regulators for permission to recoup $44.5 million in rate increases, but the Colorado Public Utilities Commission only gave it $27.9 million,â as documented by GreenTechMedia in 2012. And it seems that while they were seeking another $16.6 million in 2012 for their Smart Grid City mess, â The Colorado Public Utility Commission (recently) denied Xcelâ s request to recover a big chunk of that $45 million,â reported Smart Grid News in August 2013.

Corruption In The Department Of Energy

The Solyndra Scandal

The Daily Show with Jon Stewart Get More: Daily Show Full Episodes,Political Humor & Satire Blog,The Daily Show on Facebook

Note: 4 mins and 30 seconds into the video above you discover that a report actually shows that this project would run out of money this September of 2011, i.e. it was written on paper that this project wasn't feasible.

Energy-related loan guarantees arose from the stimulus legislation of 2009. Policy makers thought a huge infusion of low-cost loans would create many thousands of jobs at solar- panel factories, alternative-energy power plants and the like. There was an implicit assumption that most of these ventures would succeed. Barring fraud, Solyndraâ s failure reflects the companyâ s bet on an inadequate technology. Its tubes, coated with an unusual four-metal compound, were supposed to cut power costs more than 20 percent. That wasnâ t nearly enough. Production costs fell much faster for a rival technology, conventional flat silicon panels, and Solyndra couldnâ t compete.

The Energy Departmentâ s loan guarantee program is the real Solyndra scandal

You can call it crony capitalism or venture socialism â but by whatever name, **the Energy Departmentâ s loan guarantee program privatizes profits and socializes losses.** *Itâ s an especially risky approach in the alternative-energy space, where solar energy is many years from being cost-competitive with fossil fuels for most uses â and history is littered with failed government attempts to back the next big thing.*

Exclusive Timeline: Bush Administration Advanced Solyndra Loan Guarantee for Two Years, Media Blow the Story

Itâ s often claimed that the Solyndra loan guarantee was â rushed throughâ by the Obama Administration for political reasons. In fact, the Solyndra loan guarantee was a multi-year process that the Bush Administration launched in 2007.

Youâ d never know from the media coverage that:
The Bush team tried to conditionally approve the Solyndra loan just before President Obama took office.
The companyâ s backers included private investors who had diverse political interests.
The loan comprises just 1.3% of DOEâ s overall loan portfolio. To date, Solyndra is the only loan thatâ s known to be troubled.
Because one of the Solyndra investors, Argonaut Venture Capital, is funded by George Kaiser â a man who donated money to the Obama campaign â the loan guarantee has been attacked as being political in nature. What critics donâ t mention is that one of the earliest and largest investors, Madrone Capital Partners, is funded by the family that started Wal-Mart, the Waltons. The Waltons have donated millions of dollars to Republican candidates over the years.

More incredible signs of corruption...

But the above is just the tip of the iceberg...

Oil Industry and Government connections

(Image is edited from here - Found this image through Bill Moyers.com)

Solyndra Scandal: 5 More U.S. Energy Scandals

2005: Halliburton and Iraq: *The Texas oil giant reportedly overcharged $108 million for work in Iraq, but reports didn't leak until after the 2004 election. Former Vice President Dick Cheney, who was once chief executive, came under fire for his connection to the company. Nonetheless, Halliburton continued to be awarded government contracts, such as in 2006 when subsidiary Kellogg Brown & Root received a $385 job to build immigration detention centers in the U.S. for the Department of Homeland Security.*

From the huff-ington post:

Over the last eight years, President Bush, Vice President Cheney and their Republican allies in Congress **have fallen over themselves to give oil companies huge tax breaks**. *They have repeatedly blocked meaningful progress toward energy independence and they have shown no interest in taking on the unchecked speculation*

that has created extreme volatility in energy markets and pushed oil and gas prices upward. Yesterday, addressing the U.S. Chamber of Commerce, **Vice President Cheney** *said, "We have to recognize that there isn't anything out there that is going to get us away from a hydrocarbon economy anytime in the near future. There really isn't anything on the horizon that today is economic, relative, for example, to basic, good old oil and gas." Not surprising coming from an oil man, and* ***the man*** *who sat down with oil company lobbyists behind closed doors to write the current failed policy. But those remarks show the bankruptcy of the Republican vision on energy. It's a vision of the status quo, invested in the problem, not in finding a solution. And it just doesn't cut it.*

Note: A closed door meeting on a â failedâ policy that put Halliburton at number one and helped Exxon have the largest profits EVER. I wonder how many other failed policies have helped the oil companies?

The following is from an old book called Unequal Democracy

â *The recession of 1974-1975 was triggered by a massive oil price shock engineered by the Organization of Petroleum Exporting Countries (OPEC). The real price of oil increased by 140% in 1974, throwing the industrial sector of the United States and other advanced economies into a tailspin. Accidental president Gerald Ford entered the White House in the midst of a major economic crisis not of his own making.*

From the Guardian:

Scientists and economists have been offered $10,000 each by a lobby group funded by one of the world's largest oil companies to undermine a major climate change report due to be published today. Letters sent by the American Enterprise Institute (AEI), an **ExxonMobil-funded thinktank with close links to the Bush administration, offered the payments** *for articles that emphasise the shortcomings of a report from the UN's Intergovernmental Panel on Climate Change (IPCC).*

When Lou Dobbs lied, Bill Schneider played along.

Dobbs: "We have to consider what else happened in the markets and that is precisely as most of the experts had suggested, once the executive ban on oil drilling offshore had been lifted, we have seen a huge decline of approximately 13 percent decline in the price of crude oil and gasoline prices actually begin to roll back over the course of

11 days, which is remarkable, isn't it?"

Schneider: "It is certainly remarkable. And the vast majority of Americans do support offshore oil drilling. They support anything, anything that will give them relief from high gas prices." Lou Dobbs Tonight, July 29, 2008 No experts said any such thing. For obvious reasons. "[Bush's] move to end the moratorium, in place since 1992, won't have any effect until a separate congressional prohibition expires or is overturned," said The Wall Street Journal on July 15. Instead, analysts "point to two distinct trends that may take the wind out of this year's price spike: an easing of tensions over Iran and evidence that demand for oil in the U.S. is falling faster than many believed."(The Wall Street Journal, July 18, 2008)

From CBS:

Senator Pete Domenici, R-N.M, has relayed the mixed message of "we feel your pain" (at the pump), while attempting to justify his party's blockage of a windfall profit tax on Big Oil by saying that increased taxes on oil companies would be something Americans wouldn't want. [**Note:** Which Americans?]

"Americans are furious about what's going on," declared Sen. Byron Dorgan, D-N.D., and want Congress to do something about oil company profits and "an orgy of speculation" on oil markets.

"If you don't tell the big oil companies they can no longer run energy policy in America, we will not succeed, plain and simple," *Sen. Charles Schumer, D-N.Y., told CBS Radio News.*

With all the evidence of corruption above, the following connections between General Electric and it's (initial) lack of taxes makes complete sense, as it's part of the government so obviously it will create policy that will benefit them...

With so many corporations so firmly embedded in the

government, it's funny the kind of rhetoric you hear. Jon Stewart explains...

Conclusion:

Crony Capitalism has existed for a long time. So energy companies have been able to get government officials to pass legislation that helps them make more money. So they get tax breaks, loopholes, subsidies while the rest of the economy suffers and they make huge profits (and in some cases, record breaking profits).

Clearly the Department of Energy has failed at it's job.

Corruption In The Department Of Energy- How Campaign Financiers Are Paid Off With Crony Cash

Green Subsidies under Obama. The *Washington Post* found that â Obamaâ s green-technology program was infused with politics at every level.â The $535 million loan guarantee for the failed Solyndra is a prime example. The Department of Energy approved the loan after pressure from the White House. A main Solyndra investor was a billionaire Obama fundraiser. The *New York Times* found that Solyndra â spent nearly $1.8 million on Washington lobbyists, employing six firms with ties to members of Congress and officials of the Obama White House.â

Crony Capitalism has existed for a long time. So energy companies have been able to get government officials to pass legislation that helps them make more money. So they get tax breaks, loopholes, subsidies while the rest of the economy suffers and they make huge profits (and in some cases, record breaking profits).

Clearly the Department of Energy has failed at it's job.

Green Energy Corporations Rolling in the Green, Thanks to Friends in High Places

This a portion of a much longer article entitled â Podesta Power and Center for American Progress: The dark, driving force behind the presidentâ s massive green energy schemeâ , published on March 3, 2014

Center for American Progress Finally Reveals its Corporate Donors:
At least 17 raking in tens of billions of tax dollars from the Green Bank of Obama

While the left-wing think tank is a well-known favorite of billionaire George Soros, as well as other left-leaning ultra-rich donors, â the center does not disclose who finances its activities, a policy it is declining to change even as Mr. Podesta prepares to wield influence over the shape of the Obama administration,â wrote the *New York Times* in 2008.

However, â after heavy pressure arising from CAPâ s quasi-lobbying history. That scrutiny ratcheted up following the announcement that CAP founder John Podesta would be formally joining the Obama administration. Both Politico and the *New York Times* called for the donor list to meet the public eye,â reported *Breitbart News*.

So, on December 13, 2013, CAP â revealed that itâ s funded by some of the countryâ s largest and most powerful corporations, trade associations and lobbying firms,â announced *POLITICO*. The donor disclosure excluded individuals and foundations, only giving insight into their corporate influence, leaving more darkness in its wake. Moreover, it was reported that each of those listed (58 donors) has given the group more than $10,000 in 2013, yet the exact amount was not disclosed.

CAPâ s 2013 donor list â contains a myriad of massive corporations, including Apple Inc., AT&T, Bank of America, BMW of North America, Citigroup, Coca-Cola, Discovery, GE, Facebook, Google, Goldman Sachs, PepsiCo, PG&E, the Motion Picture Association of America, Samsung, Time Warner Inc., T-Mobile, Toyota, Visa, Walmart and Wells Fargoâ â â many of which are part of this massive green energy scheme.

Still, *The Nation*, in their May 2013 piece â The Secret Donors Behind the Center for American Progress and Other Think Tanks, released a list of CAPâ s 2012 corporate donors â â labeled â American Progress Business Alliance Members,â which are charged fees:

> A confidential CAP donor pitch I obtained describes the Business Alliance as â a channel for engagement with the corporate communityâ that provides â the opportunity toâ¦collaborate on common interests.â It offers three membership levels, with the perks to **top donors** ($100,000 and up) including private meetings with CAP experts and executives, round-table discussions with â Hill and national leaders,â and briefings on CAP reports â relevant to your unique interests.â

The Nation also divulged that CAP doesnâ t publicly disclose the members of its Business Alliance, but they â obtained multiple internal lists from 2011 showing that dozens of major corporations had joined.â Whatâ s relevant here is that in 2011 the lists compiled by *The Nation* of CAPâ s donors included Comcast, Walmart,

General Motors, Pacific Gas and Electric, General Electric, Boeing and Lockheed â â with three confirmed winners of green energy funds.

So basically the donor list and the membership list are one and the same. And, whatâ s even more interesting is how *The Nation* chronicles CAPâ s assets:

> â After growing rapidly in its first few years, tax records show, CAPâ s total assets fell in 2006 for the first time, from $23.6 million to $20.4 million. **Assets started growing again in 2007 when CAP founded the Business Alliance**, a membership rewards program for corporate contributors, and then exploded when Obama was elected in 2008.â

We know that CAP founded its Business Alliance (corporate donors) in 2007, but since we only have a hint of 2011, combined with lists for 2012 and 2013, the mystery remains. Missing are the corporate donors CAP enlisted from 2007 until 2011. When did these now public donors join CAP, and what was dollar amount of money that was given?

While I am about to dissect the corporations from these lists (2011 to 2013) that received green energy taxpayer money (loans, grants and special tax breaks), in full disclosure, the majority of the stimulus and non-stimulus clean-energy funds ($150 billion through 2014) were doled out between 2009 and 2011. However, as I reported in the beginning of this post, â greenâ funds continue to flow, and the Obama administration wants billions more of taxpayer money to save the planet.

I hate to be redundant, but as youâ ll see, CAPâ s corporate donors are connected to many of the same projects and firms that we have documented in previous Green Corruption Files. This is due to the fact that *meaningful* political ties â â Obamaâ s bundlers (both in 2008 and in 2012), top donors, financiers, and green cronies â â have surrounded the green energy money from the onset. However, considering that CAP players operated inside the Obama White House as well as the Energy Department â â prior, during and after the money was doled out â â this adds another layer of corruption behind the green energy deals.

At any rate, several of these corporations include Big Banks (even the â too-big-to failâ) that have benefited immensely from President Obamaâ s cleantech push. Even though many on Wall Street stood by the president in 2012, the majority sided with Mitt Romney. But that was after Obama enjoyed his *fair share* of Wall Street buddies who helped ensure his victory in 2008, pouring millions of dollars into his campaign coffers, making their mark as TOP campaign donors (PAC) â â with even Wall Street executives bundling huge sums of money for then-candidate Obama. Additionally, â the big bundlers had broad access to the White House for meetings with top administration officials and glitzy social events.â

Inside these CAP corporate donor lists we find a few TARP recipients such as Citigroup, Goldman Sachs, Bank of America, and Merrill Lynch. Whatâ s more telling is the infiltration of so many Citigroup and Goldman Sachs executives operating (past and present) inside the Obama administration, even shaping his economic policy.

CAPâ S 2013 DONORS: Green energy money winners

#1) Bank of America (now Bank of America Merrill Lynch â â confirmed donor

since 2012):

Both Bank of America and Merrill Lynch (Campaign Committeeâ s), from 2003 to 2008, supported Senator Obama. Meanwhile, Bank of America, a heavy hitter donor with major lobbying pull, plays both sides of the isle. But in 2008, this Big Bank put their money (PAC and individuals) on blue, including donating to candidate Obama.

In the final days of the DOE loan program (September 2011), the DOE awarded a partial guarantee of $1.4 billion loan â â another shady stimulus deal (â non-investment gradeâ) that was â personally championedâ by then-Energy Secretary Steven Chu â â for a project called Project Amp. Prior to the finalization of this DOE transaction, in June 2011, Bank of America Merrill Lynch, Prologis and NRG Energy joined forces on Project Amp, which was â a four-year, $2.6 billion project to place solar panels on rooftops in 28 states, one of the most ambitious clean-energy projects in recent years,â reported the *Wall Street Journal*.

The *Journal* goes on, â Bank of America Merrill Lynch unit will provide $1.4 billion in loans for the project,â of which â the financing is part of Bank of Americaâ s plan to put $20 billion of capital to work in renewable energy, conservation and other clean technologies that address climate change.â

However, by October 2013, the Energy Department pulled the plug on Project Amp, and according to *POLITICO*, Prologis never tapped into the $1.4 billion. Still, along the way, Prologis did secure â a grant for $68,000 for the purpose of â rent for warehouse spaceâ under the Recovery Act.

While I have yet to do a complete analysis on Bank of America/Merrill Lynch and their renewable energy portfolio, there are additional firms or projects that this bank has backed that also received â greenâ taxpayer funds from the Obama administration.

NextEra Energy Wind Energy Assets

Fist is NextEra, whose CEO Lewis â Lewâ Hay, III was member of President Obamaâ s Jobs Council (from 2011 until 2013), that was awarded two large DOE stimulus loans, as well as a slew of other green energy stimulus funds. This is part of the scheme that weâ ve been documenting since the summer of 2012 (â Third Largest Recipient of DOE Risky Loansâ), and later in my January 2013 Big Wind Story.

But since Bank of America has invested in the wind side, whatâ s key here is this: NextEra was the biggest user of the wind energy production tax credit. In an analysis by John Fund of the *National Review Online*, he statesâ¦

> Begun 20 years ago to spur the construction of wind-energy facilities that could compete with conventional fossil-fuel power plants, the tax credit [PTC] gives wind an advantage over all other energy producers. But it has mostly benefited conventional nuclear and fossil-fuel-fired electricity producers. The biggest user of the tax credit is Florida-based NextEra Energy, the nationâ s eighth-largest power producer. Through skillful manipulation of the credits, NextEra from 2005 to 2009 â paid just $88 million in taxes on earnings of nearly $7 billion,â Businessweek

reports. Thatâ s a tax rate of just 1.25 percent over that period, when the statutory rate is 35 percent.

SolarCity

Considering that the Podesta Group added SolarCity as a client in 2012, I highlighted the various political connections to this solar firm earlier, including billionaire players that received taxpayer money for other green energy deals, such as Elon Musk, Nicholas J. Pritzker, and George Soros.

But what most donâ t know is that SolarCity was in line to get a stimulus loan from the DOE for $275 million. However, that deal â â dubbed SolarStrong â â fell apart due to the Solyndra â red flagsâ just prior to the loan programâ s deadline in September 2011. A month later, SolarCity found a willing partner in Bank of America, which was followed by this official announcement: â SolarCity and Bank of America Merrill Lynch today announced that they have agreed to terms on financing for SolarStrong, SolarCityâ s ambitious five-year plan to build more than $1 billion in solar power projects for privatized U.S. military housing communities across the country.â

It should be noted that without government subsidies, SolarCity wouldnâ t be the success it is today: â SolarCity currently benefits from tax credits totaling as much as 30 percent of the cost of these systems,â noted *Bloomberg*. And, as I documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million.

SunPower

Bank of America Merrill Lynch and SunPower have worked together since 2009. And this year they announced a $220 million financing program for residential solar lease projects. In January 2010, SunPower Corp, the San Jose, Calif.-based designer and manufacturer of solar panels and systems, received four of the stimulus-enacted Section 48C Tax Credits totaling $10.8 million. Then, despite SunPowerâ s well-known financial issues and the fact that it was under a shareholder suit alleging securities fraud and misrepresentations, just days (September 2011) before the 1705 Loan Guarantee Programâ s deadline (along with four other solar companies), this â non-investmentâ grade $1.2 billion stimulus loan was approved â â to support the construction of the California Valley Solar Ranch (CVSR) in San Luis Obispo County.

The conditional loan to SunPower was announced on April 12, 2011, and shortly thereafter (April 30, 2011), the French oil conglomerate Total committed to buying a $1.37 billion controlling stake (60%) in SunPower Corp â â a bailout that was confirmed in June 2011. Now, SunPower never directly got the cash, because on the final closing of the DOE loan guarantee, they sold the California Valley Solar Ranch to NRG Energy. However, SunPower continued on as the developer and Bechtel as the primary contractor building the project.

Also, to date, SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 12 states, totaling over $86 million tax dollars.

Besides Bank of America, both SunPower and NRG Energy have additional *meaningful* political connections to President Obama and other high-ranking Democrats, of which weâ ve documented a few times: First in my October 2012 report (troubled green energy projects) and then in my February 2013 analysis on Citigroup, another CAP donor that is up next, which is a huge player inside this â climateâ scam. Lastly, due to the fact that NRG Energy, a Fortune 500 and S&P 500 Index company, of which they and their subsidiaries, initially, were the recipient of most of 1705 stimulus loans: at least $5.2 billion of taxpayer money (now minus the $1.4 billion for Project Amp). NRG Energy was one of George Sorosâ *timely* investments that I mentioned at the beginning of this post, yet more Intel can be found in my March 2013 Green Corruption File.

#2) Citigroup (confirmed donor since 2012):

Since 2007, Citigroup has been heavily involved in â climate change activities.â We also can confirm that this â too-big-failâ bank has made a massive footprint inside Presidentâ s Obamaâ s clean-energy dirt â â the candidate that Citigroup helped get elected in 2008 as the number seven top donor (PAC) with many executives and friends of Obama bundling for both his campaigns. Meanwhile, in 2012, Citi contributed to both President Obama and Mitt Romney.

By 2011 â â prior to the presidential reelection â â through their â 50 Billion Climate Change Investment Initiative,â Citigroup had â directed $36.35 billion into such initiatives so farâ¦â â â of which they brag: â In the U.S., Citi has the largest market share (28 percent) of U.S. Department of energy section 1703/1705 Loan Guarantee program financings for alternative energy, and we are the leader in such bond transactions.â

Considering that in February 2013, I dedicated an entire post to Cit and their Massive â Greenâ Money Machine,â which included a careful analysis of their â 2012 alternative energy portfolioâ that lists about 37 transactions (plus SolarReserve) â â both foreign and here in the United States, here Iâ ll just give some highlights.

What I found is that 58 percent (22) of Citiâ s clients had received government subsidies, totaling approximately $16 billion from the taxpayer-funded Green Bank of Obama, the majority from stimulus package. Furthermore, my research not only â followed the green money,â but profiled the Citi executives that operate (d) inside the White House, some with key positions, which included President Obamaâ s 2013 choice to replace Timothy Geithner for Treasury Secretary with Jack Lew (former Chief of Staff), Michael Froman, Richard Parsons, â¨â¨â¨Louis Susman, and Michael Eckhart â â to name a few.

Many of the alternative energy projects that Citi was involved are mentioned in todayâ s study, starting with the Energy Departmentâ s junk bond portfolio, which were doled out between 2009 and 2011:

- BrightSource Energy was awarded $1.6 billion DOE loan for the Ivanpah solar facility in California
- Brookfield Renewable Power, whereas Granite Reliable received a $168.9 million loan for a wind project in New Hampshire.
- Caithness/General Electric received a $1.3 billion DOE loan for the Shepherds

Flat wind project in Oregon
- NextEra Energy /First Solar got a $1.46 billion loan for the Desert Sunlight project in California;
- SolarReserve was awarded $737 million DOE stimulus loan for the Crescent Dunes project in Nevada.

According to their renewable energy portfolio, Citi, in February 2011, became a major investor in SolarCity. And, as I documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million.

Citigroup, as of 2010 was listed as SunPowerâ s bookrunner. Then in August 2011 SunPower and Citi set up a $105 million fund for residential solar leasing projects, which states, â SunPower will use the fund to extend its SunPower Lease programme to customers in 8 US states, expanding the financing options available to homeowners interested in SunPower solar energy systems. The SunPower Lease is now available in Arizona, California, Colorado, Hawaii, Massachusetts, New Jersey, New York and Pennsylvania. Citi is contributing $80m to the fund.â Again, I covered SunPower under Bank of America, showing that this solar firm was given plenty of green government subsidies:

- In January 2010, SunPower Corp received four of the stimulus-enacted Section 48C Tax Credits totaling $10.8 million.
- In September 2011, SunPower is part of the $1.2 billion stimulus loan to support the construction of the California Valley Solar Ranch (CVSR) in San Luis Obispo County.
- SunPower Residential, in 2013 and 2014, snagged 34 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 12 states, totaling over $86 million tax dollars.

#3) Goldman Sachs (possibly a donor since 2012):

Goldman Sachs was a top Obama donor in 2008, but we also know that two Goldman executives sat on Obamaâ s 2008 Finance Committee and a slew of partners, executives and board members bundled for, and donated to Obamaâ s 2008 campaign. Meanwhile, his administration has been infested with Goldmanites â â even as early as 2008 when a Goldman board member, James A. Johnson (also an Obama bundler that I profiled many times due to his former firm Perseus), was chosen as head of Barack Obamaâ s vice presidential search team. Known as Jim Johnson and â a fixture of establishment Washington, with ties to Wall Street and â a major presence in Democratic politics for more than two decades,â Mr. Johnson resigned his VP vetting role amidst criticism over his part in the Countrywide Financial scandal as well as controversy surrounding his role as Fannie Maeâ s chief executive from 1991 to 1999.

Even though in 2012, Goldman Sachs turned their back on Mr. Obama in 2012, there were many executives and board members who helped him get reelected.

Like Bank of America, I havenâ t had the opportunity to examine Goldman Sachsâ Alternative Energy Group and its Environmental Markets financing and advisory; however, we do know that Goldman has been investing in renewable energy since at least 2005.

By 2014, Goldman Sachs â declared that the renewable sector is one of the most compellingâ â â even as they backed â greenâ in 2012, having committed $40 billion to renewable energy (made and planned investments). According to *Renew Economy*, â Stuart Bernstein, who heads the bankâ s clean-technology and renewables investment banking group, told Recharge in a recent interview in a story titled *Goldman goes Green*, â It is at a transformational moment in time.â

As Goldman promotes President Obamaâ s Climate Action Plan along with other winners of clean-energy funds, they also brag about their climate change roles: â In 2012, we financed nearly $2 billion and co-invested more than $430 million in the sector. We also served as financial advisor on clean-energy transactions valued at more than $1.1 billion.â

Needless to say, since 2010, Iâ ve been following Goldman and tracking how this Big Bank has been cashing in on the stimulus funds. As my research developed, I found their DNA all over this green energy scheme, of which to date we can confirm that Goldman Sachs has a vested interest â â via various roles, and having entered the scene at different junctures (before, during and after taxpayer subsidies were awarded), in many projects and firms that received loans, grants and special tax breaks. So far Iâ ve tracked at least 14 firms connecting Goldman to over $8.5 billion from the Green Bank of Obama, the majority from the 2009-Recovery Act.

Keep in mind too, that Goldman is *associated* (former executives and investments) with the Big VC firm Kleiner Perkins as well as Generation Investment Management (GIM) â â mentioned a few times already. As a reminder, Kleiner Perkins is where we find the â climate duo,â whose combined carbon footprint is larger than my entire city: Billionaires John Doerr and Al Gore (partners at the firm), where Doerr, â a very big-ticket Obama donor,â in January 2009, persuasions were reflected in the 2009-Recovery Act via his â meetings with Obamaâ s transition team and leaders in Congressâ as well as the fact that he made â five recommendations to Congress and President-elect Barack Obama to jumpstart a green-tech revolution and fight global warming.â

Shortly thereafter (around February 6, 2009) and just days prior to signing the stimulus bill (February 18, 2009), Obama appointed Doerr as a member of his Economic Recovery Advisory Board (PERAB), which later morphed into the presidentâ s jobs council â â only to close down in February 2013.

Meanwhile, back in 2004 Gore started GIM with former CEO of Goldman Sachs Asset Management David Blood, who is another Obama bundler. Apparently, Blood is the â wizard behindâ GIM, and behind this â sustainable firmâ are several former Goldman executives and partners â â even as Doerr, in 2007, joined the GIM advisory board.

This and more insight were profiled in my January 8, 2013 file on Doerr and Gore, whose â Greentech Portfolioâ (at least 50%) and GIMâ s â Sustainable Investingâ secured billions in loans, grants and special tax breaks â â the two firms combined are tied to at least $10 billion from the taxpayer-funded Green Bank of Obama, the majority coming from the 2009-Recovery Act, of which Doerr had helped author.

As far as Goldman: first off they made big money from the sale of Horizon Wind

Energy to Portugalâ s EDP for $2.5 billion in 2007, of which ironically, starting in 2009 until the end of 2012, EDP Renewables North America LLC (formerly Horizon Wind Energy LLC), received over $700 million of free taxpayer money from the Obama stimulus bill ($722,468,855 in Section 1603 Grants) for eleven wind projects, placing them at the number two spot of foreign firms that were winners of US grants. This was a shocking report released in early 2013 by the Energy and Commerce Committee, exposing the extent to which foreign corporations are benefiting from green energy stimulus funding.

Goldmanâ s Green Losers, Winners, Biofuels, & Smart Grids

Nevertheless, Goldman is credited as the â exclusive financial adviserâ for the now bankrupt Solyndra ($570.4 million loss), and in 2010, handled the IPO of what most deem a government winner, Tesla Motors that was awarded $465 million from the DOE ATVM program. Also, according to Goldman, â In May 2013, [they] helped raise over $1 billion in new financing for Tesla Motors.â

There are more bankrupt ones as well: SpectraWatt ($20.5 million), Nordic WindPower ($8.6 million), and Suntech Power Holdings Co. ($2.1 million) â â all taking millions of taxpayer money down with them, while Goldman remains unscathed.

Goldman is also active in advanced biofuels and feedstock companies, handling the IPOs of biofuel companies, of which at least two won money and contracts from the Obama administration: Amyris ($25 million stimulus grant), Kior (seeking $1 billion DOE loan) and Solazyme ($21.7 million DOE stimulus grant; plus part of the $12 million biofuel contract with the U.S. Navy) â â the latter company has its very own direct connection to CAP: Jonathan Wolfson, Solazyme co-founder and Chief Executive Officer, â is an active participant in many advisory groups, including sitting on the board of the Center for American Progress (CAP) Clean Tech Council.

Meanwhile, Goldman hooked up with another huge winner of stimulus funds: â In March 2013, [they] served as lead-left bookrunner on the $93 million initial public offering for Silver Spring Networksâ â â a Foundation Capital, Kleiner Perkins, and Google (all with friends in the White House) green investment, which in 2009, cashed in big time when the DOE starting handing the smart-grid grants as part of the 2009-Recovery Act. During the course of my January 2013 analysis on Silver Spring, I found that 30 percent of the $4.5 billion stimulus smart-grid grants went to their â customersâ â â thatâ s over $1.3 billion. Then in my May 2013 report, â Smart Gird, Dirty Devicesâ , I documented additional ties and an interesting analysis of its IPO: â Silver Spring IPO has more red flags than a Communist Party military parade,â PrivCo CEO Sam Hamadeh.

Goldmanâ s Green DOE Stimulus Loans

Considering that First Solar is also a CAP Business Alliance Member (donor), weâ ll expand on that solar firm later, but what is key here is that Goldman was an early investor in First Solar that snagged three large DOE stimulus loans (over $3 billion) â â a story weâ ve featured many times, starting with â The First Solar Three Billion Dollar Swindle.â

Still, Goldman was (is) also an investor in U.S. Geothermal that in February 2011, landed a $97 million DOE stimulus loan slated to build a 22-megawatt power plant in

the eastern Oregon desert. This was â â one of the first geothermal projects funded by the DOE, despite the fact that in December 2010, S&P had rated this loan as non-investment grade. Yet, the â 2012 Internal DOE Email Dumpâ prove that this deal was rushed and approved in time for a POTUS photo op. Moreover, U.S. Geothermal had other projects that snagged millions in green energy subsidies.

Then in September 2011, Cogentrix of Alamosa, LLC (Cogentrix Energy a subsidiary of Goldman Sachs), was awarded a $90.6 million DOE stimulus loan for the Alamosa Solar Generating Project in Colorado. Cogentrix, on July 16, 2012 bagged a $34.6 million stimulus grant (free taxpayer money) from the 1603 Grant Program â â Iâ m assuming this is for the same project.

But thatâ s not allâ¦.

BrightSource Energy Just Got Darker

According to Renew Economy (January 2014), â [Goldman] has also a substantial investment in BrightSource Energy,â which actually brought its Ivanpah solar power facility into full production last month â â and if not for a federal loan guarantee, the $2.2-billion project would have never seen the light of day. Now this massive solar power plant (struggling to produce power) has become the â $2.2 Billion Bird-Scorching Solar Projectâ â â with even the left-leaning Los Angeles Times, chronicling their grand opening like this:

After nearly four years of construction that killed desert tortoises, burned the feathers off passing birds and mowed down thousands of acres of native flora, Ivanpah officially opened last month with a gala that included a rock band and a horde of dignitaries â Energy Secretary Ernest Moniz among them.

Weâ ve been uncovering BrightSource Energyâ s $1.6 billion shady DOE deal since July 6, 2012, and as new information became available weâ ve revisited this huge solar transaction several times. In short, the Ivanpah Solar Electric Generating System (SEGS) in California was subsidized with a
$1.6 billion DOE stimulus loan, which was announced on February 22, 2010 and finalized April 11, 2011 â â a project that also received special treatment by the Department of Interior, which was documented in our â 2012 Special Seven Series.â

Still, BrightSource investors not only include Goldman Sachs, but additional 2008 Obama donors such as Google, Morgan Stanley, and BP Alternative Energy. Meanwhile the Ivanpah project incorporates a slew of ties to President Obama as well as Vice President Joe Biden and Senator Harry Reid. This story comprises of big donors, political cronies and connections such as BrightSource, VantagePoint, Google, NRG Energy, PG&E, Goldman Sachs, Citigroup, George Soros, the former Commerce Secretary John Bryson, McBee Strategic Consulting, lobbyists Bernie Toon, and others â â with DOE officials, Obamaâ s Green Team, and several in Congress from the Democrat side involved.

While I briefly addressed Citigroupâ s part in this billion-dollar deal in February 23, 2013 (Ongoing â â $250mm IPO / Joint Bookrunner), it should be noted that just days after the finalization of the $1.6 billion government loan, BrightSource had filed for and IPO, of which Goldman Sachs Group Inc., Citigroup Inc. and Deutsche Bank AG were leading the proposed offering. However, a year later, they canceled their

IPO, and BrightSource CEO John Woolard (now former) told Gigaom.com that it was â because of the weak public markets, particularly for solar and greentech companiesâ¦â â â of which, to date the IPO is still pending. Yet, we do know that Goldman has made equity investments in the solar developer BrightSource.

We also can confirm that additional political heavyweights have been hovering over this deal, starting with Bechtel (another big corporation with their hand in the stimulus) that constructed BrightSourceâ s Ivanpah project as well as the fact that sometime in October 2010, during the time of their DOE loan review process, â NRG became the lead investor ($300m) in Ivanpah solar project. In fact, as mentioned, this was one of the four (now three) large taxpayer-funded stimulus projects that NRG Energy is part of.

Side Note: My March 22, 2013 file covers The Soros connection, its CEO David Crane, and more. My September 2013 post on BrightSourceâ s Top DC lobbyist (since 2009) gives more insight into other players inside this $1.6 billion DOE deal, such as VantagePoint, Google Inc, and PG&E, which included ongoing interaction and pressure from the heavyweight K Street firm McBee Strategic Consulting â â another huge player inside this green energy scam. Whatâ s key is that Steve McBee â reportedly wrote key provisions in the stimulus bill to open the spigot of green corporate welfareâ â â thus over 60 percent of his energy client list cashed in under the Obama administration.

Lastly, in November 2013, we unleashed BrightSourceâ s connection to Senator Harry Reid as well as the incriminating â 2012 Internal DOE Email Dumpâ relevant to this particular DOE transaction.

Whatâ s key here is that BrightSource Energy has never been solid. In fact, the â Oakland-based BrightSource Energy Inc. had emerged from the bankruptcy of its parent company.â Now Iâ m assuming this was out of the ashes of BrightSource Industries (Israel) Ltd. that was formerly known as LUZ II Ltd., and changed its name in December 2008.

Nevertheless, according to Schweizer in Throw Them All Out, as he described the financial issues they were having, â BrightSource badly needed this infusion of taxpayer cash.â So in essence this $1.6 billion stimulus DOE deal was a bailout, which is a clear violation of the American Recovery and Reinvestment Act of 2009 â â a fact that we elaborated on many times.

Goldman: SolarCity, SunEdison & SunRun

According to Renew Economy (January 2014), â Goldman Sachs also provided $500 million of finance to SolarCity, to allow the biggest solar installer in the US to expand its solar leasing business. Goldman is one of a number of banks to do that â â the latest was Bank of America/Merrill Lynch.â

Goldman, in 2012, also handled the IPO for SolarCity â â the solar firm I first highlighted under the Podesta Group (became a 2012 client) and expanded upon under Bank of America, noting that SolarCity was not only in line to receive a loan from the Energy Department, but as documented earlier, SolarCity, so far (and since 2009) has been subsidized with â greenâ through various stimulus funds, grants and federal tax breaks at the tune of $514 million. Weâ ll keep watchingâ¦

There is also SunEdison LLC â â a global provider of solar-energy services â â which was also an early Goldman Sachs investment. Due to the fact that this solar firm also became a client the Podesta Group in 2012, I covered the fact that in 2013, SunEdison won 5 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 5 states, totaling over $1.8 million tax dollars.

Furthermore, SunEdison is in cahoots with JPMorgan, GE Capital as well as Southern Company and a few other familiar green energy players and CAP donors such as Bank of America, Duke Energy, and First Solar.

Just last month, the Wall Street Journal reported, â Sunrun Inc., a company that finances and installs home solar projects, has retained Goldman Sachs to raise a growth equity round of more than $100 million, according to a person familiar with the situation.â

SunRun can be found in my May 2012 research on Foundation Capital â â another friend of the Obama White House and big VC winner of taxpayer money from the Green Bank of Obama, adding to my long list of Big VCâ s that have had made out like bandits. As of October 2013 , I found that SunRun, between 2011 and 2013, snagged 23 federal stimulus grants from the 1603 Program for â solar electricityâ that ranges across 10 states, totaling over $141 million tax dollars, thus far.

Plus in 2010, SunRun announced a $100 million joint program with major utility Pacific Gas & Electric, which according to Venture Beat, â PG&E will be funding the rooftop systems in question via its subsidiary, Pacific Energy Capital II, a tax equity fund,â of which â In lieu of traditional returns, the investor â PG&E in this case â gets tax benefits in addition to some cash returns.â

#4) Covanta Energy (confirmed donor since 2012):

This was one of those Soros timely investments (twelve alternative energy and utility companies) that I had alluded to in the beginning of this post and exposed in my March 2013 Green Corruption File. I found that Covanta, a clean-energy company and the recipient of federal stimulus grants, also received millions in 2010 through Congressional earmarks, yet it is unclear as to how many green government subsidies or the exact stimulus dollar amount that Covanta Energy snagged. Also, Covanta Energy stands to benefit from the NAT GAS Act if it comes to light again.

#5) General Electric (confirmed donor since 2011):

General Electric (GE) is a heavy donor to both Republicans and Democrats, and its CEO Jeffrey Immelt â plays the role of typical corporate donor who hedges his bets on both sides of the fence.â However in 2008, GE gave the Obama campaign $529,855, marking them as a top Obama donor.

Meanwhile, in early 2009, Immelt was first appointed as a member of Obamaâ s Economic Recovery Advisory Board (PERAB), which later morphed into the presidentâ s jobs council, where Immelt served as the Jobs Czar, until it closed down in February 2013.

Nevertheless, GE is a major player on the clean-energy scene as well as in this green energy scheme, starting with the fact that they were also part of the DOEâ s

Electricity Advisory Committee that had influence into the 2009-Recovery Act. In 2009, the New York Times recognized GEâ s green power, noting, â GE lobbied Congress to help expand the clean-energy subsidy programs, and it now profits from every aspect of the boom in renewable-power plant construction, including hundreds of millions in contracts to sell its turbines to wind plants built with public subsidies.â

Iâ ve been keeping track of GEâ s â green tabâ since 2012, which at that time exceeded $3 billion in direct (some indirect) taxpayer cash. This tally includes three large stimulus loans from Energy Departmentâ s junk bond portfolio that were doled out between late 2010 until September 2011.

Considering the treasure trove of Intel found in the â 2012 Internal DOE Email Dump,â I revisited GE in my December 2012 post. Long story short, in October 2010, the Caithness Shepherds Flat wind project located in eastern Oregon was awarded a $1.3 billion DOE stimulus loan â â a $2 billion project sponsored by GE, who also supplied the project with 338 wind-turbines. These internal emails show that this transaction was approved with White House pressure. For example:

September 9, 2010 EMAIL: James McCrea (subject line: Shepherds Flat â Draft Responses to OMB Questions), â As you all know, the pressure to make decisions on this transaction are high so speed of the essence.â Then later that day, McCrea writes (Email #4 from Appendix I) he says, â Pressure is on real heavy on SF [Shepherds Flat] due to interest from VP.â

Shepherds Flatâ s developers also received â a $500 million federal grant, state tax credits totaling $18 million, accelerated depreciation on federal and state taxes worth $200 million, and a premium for its power from the state worth $220 million.â At some point, the Shepherds Flat wind farm received three separate tax credits totaling $30 million from the state of Oregon.

But thereâ s moreâ¦

In September 2011, the poorly rated 1366 Technologies, sponsored in part by GE, received a direct $150 million stimulus loan from the DOE for its solar manufacturing plant.

GE is also part of the $1.2 billion DOE stimulus loan for the Desert Sunlight project, which was finalized in September 2011. This is part of the First Solar Swindle that has been mentioned a few times in this post, and will be detailed later.

Federal Railroad Administration (FRA) loaned $54.6 million to Kansas City Southern Railway Company (KCSR) â to purchase thirty new General Electric ES44AC diesel-electric locomotivesâ â â a loan that raised red flags in the March 2012 House Oversight investigation.

Also, youâ ll be â blown awayâ by the billions of â wind energy grantsâ that flew out of the stimulus package back in February 2010, of which at that time, GE was contracted to at least 26% of them as the â Turbine Manufacturer.â

In late 2009, it was reported by Gigaaom, â GE is one of the newer smart meter players, but the conglomerate has been working with utility Oklahoma Gas & Electric

on a 6,600 smart meter trial, and has a contract with PHI, which received $104.80 million for a smart meter deployment in Washington, DC. GE also has a big contract with Florida Power and Lightâ that also the recipient of a $200 million stimulus grant.

Other than bagging direct green energy stimulus money, GE has also joined forces with others that have benefited from Obamaâ s alternative-energy taxpayer funds. Two in particular â â the Advanced Metering Partners, another John Doerr â ventureâ via Silver Spring Networks, as well as Energy Technology Ventures formed in 2011 with NRG Energy and ConocoPhillips. And, Iâ m sure if were to visit GE again, weâ d find much more than $3 billion in green energy funds.

#6) Google (confirmed donor since 2012):

Google, like Wall Street and Big Energy, plays the political game well: itâ s all about access and influence, starting with campaign contributions. Googleâ s $814,540 contribution to then-Senator Obamaâ s campaign made it the fifth largest donor in 2008, and in 2012 moved up to the number three spot with a whopping $805,119. Furthermore, Googleâ s CEO at the time, Eric Schmidt, served as an informal advisor to President Obama. Schmidt, Google Executive Chairman, was also an Obama donor in 2008, and since April 2009, is (was) a member of the presidentâ s Science and Technology Advisory Council (PCAST).

Another Google political connection is Dan Reicher, director of climate and energy initiatives at Google, who was one of the founders of Cleantech and Green Business Leaders for Obama. There are other interesting folks behind the Google scenes such as John Doerr and Al Gore â â the dynamic climate duo mentioned periodically in this post â â who has served as a member of Googleâ s board of directors since May 1999, with Gore as a (past) senior advisor.

And according to Michelle Malkin, â Google cofounder Sergey Brin, Chief Legal Officer and Senior Vice President David Drummond, and Google Vice President and Chief Internet Evangelist Vint Cerf are all vocal Obama supporters and top donors.â Meanwhile, Google co-founders Sergey Brin & Larry Page, invested in Tesla Motors, while Google, in 2011, partnered with SolarCity (mentioned a few times now) to create a $280 million fund for residential solar projects â â both BIG winners of â greenâ taxpayer money.

Like many of these Big VCâ s that won a significant amount of green money from the Obama administration â â Kleiner Perkins, Khosla Ventures, The Westly Group, VantagePoint Capital Partners, Google Ventures, Foundation Capital, and others â â their â cleantech investmentsâ overlap, and I briefly touched on Google in my January 2012 post about Doerr and Gore.

Later, I documented Google as energy client of McBee Strategic Consulting (in my September 2013 Green Corruption File), discovering and exposing the fact that Google Ventures â â via their â Energy Investmentsâ and other â green dealsâ that I tracked down at that time â â has ten verified stimulus and other green energy money winners, which places their investment score at close to $5 billion of taxpayer cash, which includes three DOE loans: BrightSource Energy ($1.6 billion); GEâ s Caithness Shepherds Flat wind project (presented under GE for $1.3 billion); and Tesla Motors that won $465 million ATVM loan. If you add in Silver

Spring Networksâ customers that won $1.3 billion in smart-grid stimulus grants, which I divulged here a few times, that figure rises to $6.3 billion and counting.

#7. PG&E (confirmed donor since 2011):

This utility giant is a strong Obama and Democrat donor that happens to be all over this â greenâ scam. Not only did they have direct influence over the DOE loans, they are jam-packed with Washington â green cronies,â including Cathy Zoi, who is the â most controversial former PG&E employee to hold an influential government.â Zoi, an Al Gore acolyte was a DOE Insider from 2009 until 2011, and she is not only tied to PG&E but other stimulus winners.

Still, PG&E was another client of the top DC lobbyist, McBee Strategic Consulting, of which I divulged in my September 2013 Green Corruption File. As reported by the Washington Free Beacon in 2012, â PG&E has become an aggressive buyer of power supplied by solar, wind, and other renewable sources, in large part due to statutory requirements under Californiaâ s Renewable Portfolio Standard, which mandated that 20 percent of the utilityâ s electricity come from renewable sources by 2010 â and 33 percent by 2020.â

The big win for this huge energy corporation is that they have an invested interest in seven Energy Department stimulus loans worth $7.6 billion. Moreover, with the exception of BrightSource Energyâ s $1.6 project, of which we now know from an email Dated January 4, 2010, that Peter Darbee, then CEO of PG&E, had himself spoken to President Obama about this deal, the rest of the loans were finalized between June and September 2011. While the details into these taxpayer-funded projects can be found in my April 2013 post, hereâ s an overview.

Agua Caliente Solar Power Project located in Yuma, Arizona, of which â PG&E will purchase the projectâ s power and deliver it to customers in California.â Project by NRG Solar: $967 million loan guarantee

BrightSource Energy development located in Baker, CA, of which â electricity from the project will be sold under long-term power purchase agreements with Pacific Gas & Electric and Southern California Edison Company (SCE).â Project by NRG Energy, Inc. (BrightSource): $1.6 billion loan guarantee

California Valley Solar Ranch of which the 250-megawatt is under construction in eastern San Luis Obispo County, and â is generating clean, reliable solar power for transmission over PG&Eâ s utility grid.â Project by NRG Solar and SunPower is still involved: $1.237 billion loan guarantee
Desert Sunlight Project located in Riverside, CA, with the PPA (purchase power agreement) listed as Southern California Edison and PG&E. This is a First Solar Project that is co-owned by NextEra Energy Resources, GE Energy Financial Services, and Sumitomo Corporation of America: partial guarantee of $1.46 billion

Genesis Solar Energy Project located in Riverside County, CA of which â power from the project will be sold to Pacific Gas and Electric Company.â Project by NextEra Energy Resources, LLC: partial guarantee of $852 million loan

Mesquite Solar 1, LLC located in Maricopa County, AZ, of which Bloomberg News had reported at the time the DOE loan was approved, â Sempra will sell electricity from

the Mesquite Solar 1 plant to Californiaâ s largest utility, PG&E Corp., under a 20-year contract.â Project by Sempra Mesquite: $337 million loan guarantee

Mojave Solar located in San Bernardino County, CA, of which at the time of the DOE loan approval (September 2011), â Abengoa signed a power-purchase agreement with PG&E to buy the energy produced by the project for a period of 25 years.â Project by the Spanish firm Abengoa Solar, Inc.: $1.2 billion loan guarantee

Meanwhile, my May 2013 â Smart Gird, Dirty Devicesâ divulges PG&Eâ s partnership with Silver Spring Networks on many fronts (PG&E is their top customer). Silver Springs is the the lucky smart-grid technology company that I mentioned earlier, who has an array of White House connections â â Foundation Capital, Kleiner Perkins and Google â â and as of January 2013 is linked to at least $1.3 billion in smart-grid stimulus grants.

But thereâ s moreâ¦

PG&E won a significant amount of stimulus money for various projects, of which last year I found at least seventeen that added up to over $55 million of tax dollars.

PG&E also bagged at least four stimulus 1603 grants in 2012 and 2013 (for fuel cell, hydropower and solar) totaling $127.2 million.

SolarCity and SunRun, who both won large sums of stimulus money (duly noted in this post), are in cahoots with P.G.&E. Corporation, the California utility holding companyâ s tax-equity fund to finance residential solar installations.

CAPâ S 2011 & 2012 DONORS: Clean-Energy Money Winners (referred to as â American Progress Business Alliance Membersâ)

Energy/Utilities

#8) American Electric Power (AEP):

While I found that AEP (between 2009 and 2010) was awarded at least four stimulus grants totaling $740 million, which was detailed in my March 2013 Green Corruption File, there is more to share. According to Schweizerâ s bombshell book, â in the first quarter of 2009, Soros made an initial purchase of more than 1.5 million shares in American Electric Power (AEP), a utility company that invested heavily in an energy project called FutureGen.â

This was a project that had been abandoned by the Bush administration; however, on June 12, 2009, the Obama administration revived FutureGen: â a federal-industry partnership that would build an advanced coal-burning power plant in Illinois to trap and store carbon dioxide emissions.â After Obama took office, he not only restarted FutureGen with $1 billion from the stimulus package, but he moved the project to Meredosia.

The FutureGen Industrial Alliance â was formed to partner with the U.S. Department of Energy on the FutureGen project.â At that time it was a consortium of major coal and utility companies such as American Electric Power Co. Inc. and Peabody Energy Corp. Just thirteen days later, both AEP and Southern Co withdrew from the U.S.-government backed FuturGen project.

Despite ongoing drama, cost overruns and delays, as well as potential air pollution and other matters; back in February 2013, the FutureGen project was moving forward. While AEP was gone, we did find Ameren Corp (another Soros timely investment) along the way. Currently the FutureGen Industrial Alliance includes Alpha Natural Resources, Joy Global Inc, Peabody Energy, Xstrata Coal Pty Limited, and another CAP corporate donor, Anglo American (up next).

#9) Anglo American (confirmed donor since 2012, listed under energy/utility):

As detailed above, Anglo American, â one of the worldâ s largest mining companies, is headquartered in the UK and listed on the London and Johannesburg stock exchanges,â is now part of the FutureGen project funded with green energy funds. This past January, the Energy Department â gave the long-planned FutureGen clean-coal project one of the final OKs [and $1 billion] it needs to start building,â announced the Daily Journal.

According to most reports, â If all goes according to plan, the FutureGen project should be fully operational by 2017 and continue commercial operations for at least 20 years.â

#10) Constellation Energy:

Again, this is one of those twelve alternative energy and utility companies that another Soros had invested in shortly having helped craft the 2009 stimulus package that I had alluded to in the beginning of this post (exposed in my March 2013 Green Corruption File). I found that Constellation, an Exelon Company, which is labeled as â the presidentâ s utility,â was another top 2008 Obama donor and big winner of â greenâ funds. Constellation received a $200 million stimulus grant, of which since they are (were) the parent of Baltimore Gas and Electric Co, Iâ m assuming the $200 million smart-grid grant (awarded in October 2009) that went to BGE is the one Schweizer had mentioned in his book (unless they got another $200 million for something else).

Moreover, according to the Washington Free Beacon, â Constellation is one of the most prolific providers of green energy to federally owned facilities, sporting contracts with the General Services Administration (GSA) for the U.S. Capitol building, the Federal Reserve, the Smithsonian Institution, the United Nations building in New York, and a host of federal buildings in several states.â

#11) Dow Corning (Silicone Manufacturing/Solar):

In January 2010, two manufacturing tax credits were awarded from the 48C stimulus-created program for solar projects in Michigan. The tax credits included â $141.9 million for Hemlock Semiconductorâ s (a joint venture of Dow Corning Corporation and others) expansion of its Michigan polycrystalline silicon operations, and $27.3 million for a monosilane plant Dow Corning is building.â

By 2012, Hemlock Semiconductor announced that they â were postponing three of the four phases of their $1.2 billion plant in Tennessee,â of which the state of Tennessee had committed $245 million to Hemlock â â some of which was stimulus funds. In 2013, the company began laying off hundreds of workers at their Clarksville plant â â even 100 were from their facility in Michigan (March 2013),

and 50 more in May 2013. With the future of their plants unknown, â Dow Corning Corp. announced [November 2013] that it is acquiring a bigger stake in Hemlock Semiconductor.â So, here we have two more failing stimulus-funded projects that we need to watch â â and a CAP donor ta boot.

#12) Duke Energy:

As duly noted, Duke Energy â â the nationâ s largest electric power company â â has been a client of the Podesta Group since 2009. Jim Rogers, the chairman of Duke Energy, is another Obama donor, who was a major player at the 2012 Democratic convention, as a contributor, creditor, host, and even a speaker.

While Duke Energy is worthy of additional scrutiny, my January 2013, Big Wind Story documented that in 2011, Duke Energy was the recipient of a $22 million grant from the DOEâ s ARPA-E advanced energy research program that was funded by the 2009 stimulus package. This was â to design, build and install large-scale batteries to store wind energy at one of its wind farms in Texas.â

Then in May 2013 (previously dated June 2010), Notrees Windpower â â a project of Duke Energy located in Texas â â was handed a stimulus grant from the 1603 Program for $103.6 million. And after a quick glance, I found three 1603 stimulus grants for Duke Energy Carolinas, LLC that were dished out in 2012 and 2013, totaling over $62 million for â hydropowerâ and â solar electricity.â Duke Energy was also privy to the â smartâ money as well â â in 2009, the DOE awarded Duke Energy a $200 million stimulus smart-grid grant to support projects in the Midwest.

#13) Enel Green Power North America:

In July 2012, Enel Green Power, through its US subsidiary Enel Green Power North America Inc., was awarded a grant for approximately $99 million from the 2009-Recovery Act 1603 grant program for the construction of the Caney River wind farm in Kansas. The Caney River and the Rocky Ridge wind farm project includes J. P. Morgan as well as Wells Fargo Wind Holdings LLC and Metropolitan Life Insurance Company.

#14) First Solar (Solar Manufacturing and possibly a 2011 donor):

As Iâ ve alluded to many times in this post and others, First Solar has considerable ties to the Obama administration, starting with the fact that this solar firm was an early investment of Goldman Sachs, the Wall Street giant mentioned above as a CAP corporate donor since 2012 (maybe sooner).

In the mix we find another First Solar investor â â Generation Investment Management (GIM), which as you know, is Al Goreâ s sustainability firm tied to many green energy deals. Along the way we find a myriad of Obama billionaire cronies (donors and bundlers) that were also investors in First Solar: Ted Turner, Paul Tudor Jones, Whitney Tilson, David Shaw, as well as the fact George Soros bought First Solar stock sometime in late 2007, until about May 2011, as recorded at GuruFocus.com.

Prior to the $3 billion in DOE stimulus loans, in 2010, First Solar snagged $16.3 million â to expand its manufacturing facility to produce fully completed thinâ film

solar modules,â in Ohio, which was part of the 2009-Recovery Act via the DOE / Treasury, Clean Energy Manufacturing Tax Credits (48C). According to reports, â The Ohio Department of Development also lent First Solar $5 million, and the stateâ s Air Quality Development Authority gave the company an additional $10 million loanâ â â marking First Solarâ s Ohio facility as taxpayer-funded with over $30 million.

But it gets better: First Solar, in 2011, â also scored $547.7 million in loan guarantees [by the controversial taxpayer funded Export-Import Bank (Ex-Im)] to subsidize the sale of solar panels to solar farms abroad,â as documented by Veronique de Rugy (senior research fellow at the Mercatus Center) in her stunning assessment of DOEâ s Loan Program. Ms. de Rugy goes on, â More troubling is the fact that some of the Ex-Im money [$192.9 million] went to a Canadian company named St. Clair Solar, which is a wholly owned subsidiary of First Solar, meaning that the company received a loan to buy solar panels from itself.â

This Ex-Im transaction even hits closer to CAP, starting with Carol Browner â â CAP fellow, former DOE insider, and Al Goreâ s pal â â who is sits on (and has for a while) the Advisory Committee of the Export-Import Bank.

Still, the Daily Caller last month, unearthed another alarming connection: â [First Solar] is not only listed as a CAP donor, but has also been listed as a client of the Albright Stonebridge Group (ASG) in 2011 â a lobbying firm founded by former Clinton Secretary of State Madeleine Albright. ASG is also listed as a CAP donor.â

And, it gets better, as reported The DC
Coincidentally, Export-Import Bank President Fred Hochberg has spoken annually at CAP since 2011 â the same year First Solar got its loan. It is unknown whether the solar company was also a CAP donor at the time.

When Hochberg spoke at the progressive think tank in 2012, he mentioned that Alice Albright was in attendance â Madeleine Albrightâ s daughter and the Ex-Imâ s chief operating officer from 2009 to 2013. Hochberg spoke on June 25 and First Solar was awarded $57.3 million in financing on July 18.
In 2011, Hochberg spoke on June 15 and, just over a week later on June 23, Ex-Im awarded First Solar millions more in financing. That year the taxpayer-backed export bank awarded First Solar nearly $573 million to make their products more competitive abroad and boost their sales â most of that financing came after Hochberg gave his speech. First Solar Vice President Frank de Rosa was likely bundling donations for Obamaâ s reelection campaign around this time.

Nevertheless, the big money came from the Energy Department: First Solar, an Arizona-based manufacturer of solar panels, in August and September 2011, won three 1705 DOE â junk ratedâ stimulus loans totaling over $3 billion. Marita Noon and I first covered the â First Solar Swindlerâ in the summer of 2012, which began by documenting how seven solar companies received fast-tracked approval by the Department of the Interior (DOI) to lease federal lands in a no-bid process:

Abengoa Solar, BrightSource Energy, First Solar, Nevada Geothermal Power, NextEra Energy Resources, Ormat Nevada, and SolarReserve.

Since then, weâ ve tracked First Solarâ s woes, which began since the finalization

of these three large DOE loan guarantees â â projects, by the way, that were sold to more Obama â energyâ cronies just after the taxpayer funds were approved. However, First Solar remained involved in all of them.

The Projects

Exelon (Antelope Valley Solar Ranch): $646 million stimulus loan

In September 2011, the same day that the Antelope Valley Solar Ranch, located in California, received a DOE loan guarantee for $646 million, Exelon Corp. purchased it. First Solar, which developed the project, is still actively involved. The AVSR1 project, by the way, is expected to create 350 constructions jobs and 20 permanent jobs.

The Chicago-based Exelon Corp, a big Obama donor and labeled as â The Presidentâ s Utility,â by itself is a huge piece of the Green Corruption scandal, which I have alluded to in the past and a another piece of the scandal in the works.

NextEra Energy Resources, LLC (Desert Sunlight): $1.46 billion stimulus loan

The California Desert Sunlight, in September 2011 â â again the same day that this project received $1.46 billion offer for a partial loan guarantee from the DOE â â was sold to NextEra Energy Resources, LLC, the competitive energy subsidiary of NextEra Energy, Inc. and GE Energy Financial Services. Yet, the September announcement also stated, â First Solar will continue to build and subsequently operate and maintain the project under separate agreements.â Both CEOâ s Jeffrey Immlet and Lewis Hay were featured in my â Green Five: Spreading the Wealth to Obamaâ s Ultra-Rich Jobs Council Membersâ series.

According to the DOE, Desert Sunlight, which is expected to create 550 construction jobs and 15 permanent jobs for the plantâ s operation, â will deploy commercially available First Solar Series 3 modules and is projected to achieve commercial operation by February 28, 2015.â

NRG Solar, LLC (Agua Caliente): $967 million stimulus loan

In August 2011, as the $967 million DOE loan guarantee for the Agua Caliente, located in Arizona, was announced, it was purchased from First Solar by NRG Solar, LLC, a subsidiary of NRG Energy. At that time it was noted that the First Solar will be providing the solar panels for this project, and that the plant, when completed, would supply power to PG&E.

According to the DOE, the Agua Caliente project â â considered another jobs creator with an expected 400 construction jobs and 10 permanent jobs â â â currently generates enough energy to power 49,600 households annually.â

Keep in mind that documented much earlier was Steve Spinner â â the two-time Obama bundler DOE advisor (April 2009 to September 2010) turned CAP fellow (September 2010 to October 2011) â â and his part in the First Solar deal making, which included advocacy for the at least the Antelope Valley project. Nevertheless, there are additional CAP players here, starting with what The Nation revealed in May 2013:

JosÃ© Villarreal â a consultant at the power-â¨house law and lobbying firm Akin Gump, who â provides strategic counseling on a range of legal and policy issuesâ for â¨corporations â was on First Solarâ s board until April 2012 while also sitting on the board of CAP, where he remains a member, according to the groupâ s latest tax filing.

#15) First Wind

In my January 2013 Big Wind Story â â also a client of the top DC lobbyists McBee Strategic Consulting â â I exposed a â twister of sweetheart dealsâ found in the Department of Energyâ s junk bond portfolio, which included four risky wind projects. One of those was Kahuku Wind Power, LLC, a project of First Wind in Kahuku Oahu, HI, which in July 2010, was granted a $117 million DOE stimulus loan, estimated to create a whopping 200 jobs. And then on February 3, 2012 this same project received a 1603 grantÂ− for over $35 million [docket #2594 to $35,148,839].

Sadly, in August 2012 a fire that destroyed First Windâ s battery storage facility (built by Xtreme Power) and sent toxic fumes into the air, which left ratepayers in the dark over costs and safety. And, it was reported on January 23, 2014 that â Xtreme Power ran out of cash and filed for bankruptcy,â â â NOTE: Xtreme Power built the energy storage system for Duke Energyâ s Notrees wind energy farm in Texas, another winner of stimulus funds, listed above.

The First Wind plan was to secure taxpayer money and then go public. Now they achieved their first objective with the help of U.S. taxpayers, because and as of July 2012, First Windâ s projects have also received over $452 million in grants through the stimulusâ 1603 Program.

- First Windâ s Stetson Wind Farm in Maine â â $40,441,471
- Cohocton Wind Farm in New York, $52,352,334
- Dutch Hill Wind Farm In New York, $22,296,494
- Milford Wind Corridor Phase I In Utah; $120,147,809
- Milford Wind Corridor Phase II In Utah, $80,436,803
- Rollins Wind Farm In Maine; $53,246,347
- Sheffield Wind Farm In Vermont, $35,914,864
- Kahuku Wind Farm In Hawaii, $35,148,839
- Steel Winds II Wind Farm In New York, $12,778,75

However, in November 2010, Bloomberg announced, â First Wind Holdings Inc., the operator of wind-energy projects backed by D.E. Shaw & Co. and Madison Dearborn Partners LLC, said it withdrew its initial public offering because of unfavorable market conditionsâ thatâ s code for â weak demand.â

Speaking of IPOâ sâ¦

Within the House Oversight leaked emails that were unleashed late October 2012, more specifically the 350+ page Appendix II (â 2012 Internal DOE Email Dumpâ), we find that just months prior to the final approval of the Kahuka loan there was intense interaction within the DOE regarding this transactionâ¦

â Someone is pressing Jonathan [Jonathan Silver is the former Executive Director of the Loan Program Office] who is now pressing hard on the everyone as the sponsor

has an IPO in the works.â
This and more can be found in my Big Wind Story, including a the fact the first-rate, high-powered political ties to First Wind are vast, starting with D.E. Shaw & Co, a New York-based investment firm that is a backer of First Wind Holdings Inc. (also an investor in First Solar). This was noted when I profiled Larry Summers from CAP â â adding that, according to Peter Schweizer, â Larry Summers was part owner of First Wind.â

The founder of the hedge fund DE Shaw & Co., David Shaw, is a two-time Obama bundler, who employed Larry Summers before heading to the Obama White House, as the top economic advisor. It turns out that in 2011, according to BusinessInsider.com, Shaw, a computer scientist and computational biochemist, was â appointed by Obama to serve on the Presidentâ s Council of Advisors on Science and Technology.â

As revealed by Peter Schweizer, â another 42 percent of First Wind is owned by Madison Dearborn Partners, an investment firm with close ties [and friend of] to then-White House Chief of Staff Rahm Emanuel. The founder of the firm, David Canning, had been a bundler for George W. Bush. But he switched sides in 2008 and gave heavily to Obama. Madison Dearborn gave more to Emanuelâ s congressional campaigns than did any other business.â

While the GOP found that â Julia Bovey, First Windâ s Director of External Affairs, was formerly Director of External Affairs for Obamaâ s Federal Energy Regulatory Commission (June 2009 to June 2010),â there is much bigger fish here. All government backed green comes with a slew of lobbyists, and First Wind is no different â â enter in Larry Raskyâ s Lobbying Firm with ties to the top.

Larry Rasky, â a longtime confidant and campaign strategistâ of Vice President Joe Biden, was also a 2012 Obama bundler, and since Obama took office, â Rasky has visited the White House at least 21 Times,â half of which were during the course of the DOE loan review process (Data.gov, Accessed 7/18/12). Moreover, we know that in 2009, about the time the 2009-Recovery Act passed, First Wind retained lobbyists Rasky Baerlein Strategic Communications as well as Brownstein, Hyatt et al, who is primarily a Democrat donor, with some Republicans in the mix â â and as of 2012, maintains the work of Rasky. .

#16) General Motors (donor in 2011)

As I divulged at the beginning of this post, General Motors (GM) â â a CAP donor in 2011 â â was a client of the Podesta Group from 2010 until 2012. Even after the taxpayers bailed out General Motors in 2009 (over $80 billion â â $17.5 billion under Bush and $63.4 billion from Obama), of which we lost at least $14 billion, green energy taxpayer money continues to subsidize the failed auto maker. This time, though, was for GMâ s hybrid electric vehicle the Chevy Volt â â a car thatâ s not doing very well.

What Iâ ve tracked so far is that starting in 2009 until recently, GM has bagged hundreds of millions of stimulus dollars ($471.6 million to be exact) to support the Chevy Volt as well as green car components, of which Iâ ll share the details when I dissect the CAP corporate donors.

According to the January 25, 2012 House Oversight Reportâ¦

> The American Recovery and Reinvestment Act of 2009 (ARRA) appropriated $2.4 billion for domestic production of batteries and components for electric cars. Of this, $1.5 billion in grants were directed toward manufacturing the batteries, while the remaining $900 million went to building new facilities or improving existing facilities to produce electric drive components. This included $151.4 million to Michigan-based Compact Power, Inc., for production of lithium-ion polymer battery cells for the GM Volt; $105.9 million directly to GM for production of high-volume battery packs for the Volt; $105 million to GM to construct facilities for electric drive systems; and $89.3 million to Delphi Automotive Systems, a former division of GM, to expand manufacturing facilities for electric drive power components.

Also, â buyers of the Volt will receive a federal tax credit of up to $7,500 of per vehicleâ as well as state tax credits.

Then, lo and behold, on December 12, 2013, Think Progress â â CAPâ s propaganda machine â â announced, â Ford Motor Company and General Motors Company will receive a combined $50 million to support their respective manufacturing facilities that produce electric cars.â This was from the stimulus-created 48C Program, of which GMâ s share was $20 million for â its Detroit-Hamtramck Assembly Plant where the company manufactures Extended Range Electric Vehiclesâ Chevrolet Volts and the Cadillac ELR electric luxury coupe â along with internal combustion cars.â

#17) Xcel Energy:

Whatâ s interesting is that Xcel Energy was in the loop with Cogentrix Energy, a subsidiary of Goldman Sachs, which in September 2011, snagged a $90.6 million DOE stimulus loan for the Alamosa Solar Generating Project. Then on July 16, 2012, Cogentrix bagged a $34.6 million stimulus grant (free taxpayer money) from the 1603 Grant Program â â Iâ m assuming this is for the same project.

Whatâ s interesting (see graph with Goldman Sachs stimulus loans) is that the partners involved in this project included utility Xcel Energy (XEL), which signed a 20-year contract to buy enough CPV power to supply electricity to 6,500 homes; and Amonix, the California-based company that will supply the CPV panels â â Amonix (complete with Obama buddies) was subsidized with $29.6 million of taxpayer money before it went bankrupt in July 18, 2012. What a scamâ¦

Also, according to MinnPost.com, in 2010, Minnesotaâ s Senator Al Franken visited Mulroyâ s Body Shop â to highlight the use of federal stimulus funds in creating jobs and boosting the alternative energy economy.â It turns out that the owner had 174 solar panels installed on the roof of his Nicollet Avenue body shop in South Minneapolis. And that â Minneapolis-based Solarflow Energy installed the system and is leasing the equipment to Mulroyâ s under contract with Xcel Energy. The lease agreement also includes installation, maintenance and support. The federal stimulus funds deliver a grant-in-lieu of a 30 percent tax credit on the value of the installation to Solarflow.â Solarflow start-up was partially funded through an Xcel Energy Renewable Development Fund grant of $1.5 million.

While Xcel was omitted from the $3.4 billion in stimulus smart-grid grants in 2009, for their highly touted $100 million â Smart Grid Cityâ project in Boulder, Colorado did snag about $24.2 million in federal economic stimulus money for â Smart Gridâ updates to the stateâ s power grid and customer meters. Still, Xcel Energy is slapping ratepayers with the bill: â In 2010, Xcel found itself asking Colorado regulators for permission to recoup $44.5 million in rate increases, but the Colorado Public Utilities Commission only gave it $27.9 million,â as documented by GreenTechMedia in 2012. And it seems that while they were seeking another $16.6 million in 2012 for their Smart Grid City mess, â The Colorado Public Utility Commission (recently) denied Xcelâ s request to recover a big chunk of that $45 million,â reported Smart Grid News in August 2013.

Corruption? Energy Department Secretary has $5 million stake in company promoted by Biden

Written By Staff Editor

Ethics questions are being raised after news broke that a company promoted by Biden is partially owned by his Department of Energy Secretary.

President Joe Biden is a creature of the DC Swamp, as he approaches his 50-year anniversary of coming to DC and producing little of value except for his friends.

â Energy Secretary Jennifer Granholm owns up to $5 million in the electric battery and vehicle manufacturer President Joe Biden will promote on Tuesday as part of his push for a $1.9 trillion infrastructure bill,â the *Washington Free Beacon* reported recently.

> .@Proterra_Inc is honored to host @POTUS today for a virtual tour of our SC factory to share how our electric buses and EV tech are driving the switch to clean, quiet transportation for all. Solutions for the climate crisis are here now & built in the US https://t.co/4xiO8imbYH
>
> â Proterra Inc (@Proterra_Inc) April 20, 2021

â Bidenâ s virtual visit to the electric battery producer Proterra comes days after Vice President Kamala Harris paid a visit to Thomas Built Buses, a North Carolina-based school bus company that counts Proterra as its main supplier of electric vehicles,â *WFB* reporter Matt Foldi said.

> Biden placed Granholm in charge of â identifying risks in the supply chain for high-capacity batteries, including electric-vehicle batteries, and policy recommendations to address these risks.â
>
> A key Proterra product? Electric-vehicle batterieshttps://t.co/nDp4aBr5MV
>
> (4/4)
>
> â Matthew Foldi (@MatthewFoldi) April 20, 2021

Granholmâ s â financial disclosures reveal up to $5 million worth of stock options in [Proterra], which went public in January through the special purpose acquisition company ArcLight Clean Transition Corp.â

The company will likely benefit from the trillions of dollars of new spending under COVID relief and could benefit more if Bidenâ s massive infrastructure bill gets passed.

More Corruption In The Department Of Energy

The Solyndra Scandal

The Daily Show with Jon Stewart Get More: Daily Show Full Episodes,Political Humor & Satire Blog,The Daily Show on Facebook

Note: 4 mins and 30 seconds into the video above you discover that a report actually shows that this project would run out of money this September of 2011, i.e. it was written on paper that this project wasn't feasible.

Energy-related loan guarantees arose from the stimulus legislation of 2009. Policy makers thought a huge infusion of low-cost loans would create many thousands of jobs at solar- panel factories, alternative-energy power plants and the like. There was an implicit assumption that most of these ventures would succeed. Barring fraud, Solyndraâ s failure reflects the companyâ s bet on an inadequate technology. Its tubes, coated with an unusual four-metal compound, were supposed to cut power costs more than 20 percent. That wasnâ t nearly enough. Production costs fell much faster for a rival technology, conventional flat silicon panels, and Solyndra couldnâ t compete.

The Energy Departmentâ s loan guarantee program is the real Solyndra scandal

You can call it crony capitalism or venture socialism â but by whatever name, **the Energy Departmentâ s loan guarantee program privatizes profits and socializes losses.** *Itâ s an especially risky approach in the alternative-energy space, where solar energy is many years from being cost-competitive with fossil fuels for most uses â and history is littered with failed government attempts to back the next big thing.*

Exclusive Timeline: Bush Administration Advanced Solyndra Loan Guarantee for Two Years, Media Blow the Story

Itâ s often claimed that the Solyndra loan guarantee was â rushed throughâ by the Obama Administration for political reasons. In fact, the Solyndra loan guarantee was a multi-year process that the Bush Administration launched in 2007.

Youâ d never know from the media coverage that:
The Bush team tried to conditionally approve the Solyndra loan just before President Obama took office.
The companyâ s backers included private investors who had diverse political interests.
The loan comprises just 1.3% of DOEâ s overall loan portfolio. To date, Solyndra is the only loan thatâ s known to be troubled.
Because one of the Solyndra investors, Argonaut Venture Capital, is funded by George

Kaiser â a man who donated money to the Obama campaign â the loan guarantee has been attacked as being political in nature. What critics donâ t mention is that one of the earliest and largest investors, Madrone Capital Partners, is funded by the family that started Wal-Mart, the Waltons. The Waltons have donated millions of dollars to Republican candidates over the years.

More incredible signs of corruption...

But the above is just the tip of the iceberg...

Oil Industry and Government connections

(Image is edited from here - Found this image through Bill Moyers.com)

Solyndra Scandal: 5 More U.S. Energy Scandals

2005: Halliburton and Iraq: *The Texas oil giant reportedly overcharged $108 million for work in Iraq, but reports didn't leak until after the 2004 election. Former Vice President Dick Cheney, who was once chief executive, came under fire for his connection to the company. Nonetheless, Halliburton continued to be awarded government contracts, such as in 2006 when subsidiary Kellogg Brown & Root received a $385 job to build immigration detention centers in the U.S. for the Department of Homeland Security.*

From the huff-ington post:

Over the last eight years, President Bush, Vice President Cheney and their Republican allies in Congress **have fallen over themselves to give oil companies huge tax breaks**. *They have repeatedly blocked meaningful progress toward energy independence and they have shown no interest in taking on the unchecked speculation that has created extreme volatility in energy markets and pushed oil and gas prices upward. Yesterday, addressing the U.S. Chamber of Commerce,* **Vice President Cheney** *said, "We have to recognize that there isn't anything out there that is going to get us away from a hydrocarbon economy anytime in the near future. There really isn't anything on the horizon that today is economic, relative, for example, to basic, good old oil and gas." Not surprising coming from an oil man, and* ***the man*** *who sat down with oil company lobbyists behind closed doors to write the current failed policy. But those remarks show the bankruptcy of the Republican vision on energy. It's a vision of the status quo, invested in the problem, not in finding a solution. And it just doesn't cut it.*

Note: A closed door meeting on a â failedâ policy that put Halliburton at number one and helped Exxon have the largest profits EVER. I wonder how many other failed policies have helped the oil companies?

The following is from an old book called Unequal Democracy

â *The recession of 1974-1975 was triggered by a massive oil price shock engineered by the Organization of Petroleum Exporting Countries (OPEC). The real price of oil increased by 140% in 1974, throwing the industrial sector of the United States and other advanced economies into a tailspin. Accidental president Gerald Ford entered the White House in the midst of a major economic crisis not of his own making.*

From the Guardian:

Scientists and economists have been offered $10,000 each by a lobby group funded by one of the world's largest oil companies to undermine a major climate change report due to be published today. Letters sent by the American Enterprise Institute (AEI), an **ExxonMobil-funded thinktank with close links to the Bush administration, offered the payments** *for articles that emphasise the shortcomings of a report from the UN's Intergovernmental Panel on Climate Change (IPCC).*

When Lou Dobbs lied, Bill Schneider played along.

Dobbs: "We have to consider what else happened in the markets and that is precisely as most of the experts had suggested, once the executive ban on oil drilling offshore had been lifted, we have seen a huge decline of approximately 13 percent decline in the price of crude oil and gasoline prices actually begin to roll back over the course of 11 days, which is remarkable, isn't it?"

Schneider: "It is certainly remarkable. And the vast majority of Americans do support offshore oil drilling. They support anything, anything that will give them relief from high gas prices." Lou Dobbs Tonight, July 29, 2008 No experts said any such thing. For obvious reasons. "[Bush's] move to end the moratorium, in place since 1992, won't have any effect until a separate congressional prohibition expires or is overturned," said The Wall Street Journal on July 15. Instead, analysts "point to two distinct trends that may take the wind out of this year's price spike: an easing of tensions over Iran and evidence that demand for oil in the U.S. is falling faster than many believed."(The Wall Street Journal, July 18, 2008)

From CBS:

Senator Pete Domenici, R-N.M, has relayed the mixed message of "we feel your pain" (at the pump), while attempting to justify his party's blockage of a windfall profit tax on Big Oil by saying that increased taxes on oil companies would be something Americans wouldn't want. [**Note:** Which Americans?]

"Americans are furious about what's going on," declared Sen. Byron Dorgan, D-N.D., and want Congress to do something about oil company profits and "an orgy of speculation" on oil markets.

"If you don't tell the big oil companies they can no longer run energy policy in America, we will not succeed, plain and simple," *Sen. Charles Schumer, D-N.Y., told CBS Radio News.*

With all the evidence of corruption above, the following connections between General Electric and it's (initial) lack of taxes makes complete sense, as it's part of the government so obviously it will create policy that will benefit them...

With so many corporations so firmly embedded in the government, it's funny the kind of rhetoric you hear. Jon Stewart explains...

The Daily Show with Jon Stewart
Get More: Daily Show Full Episodes,Political Humor & Satire Blog,The Daily Show on Facebook

Conclusion:

Crony Capitalism has existed for a long time. So energy companies have been able to get government officials to pass legislation that helps them make more money. So they get tax breaks, loopholes, subsidies while the rest of the economy suffers and they make huge profits (and in some cases, record breaking profits).

Clearly the Department of Energy has failed at it's job.

Crescent Dunes Solar Is Doomed as Taxpayers Pick Up the Tab For Another Dept of Energy Obama Payola Failure

- Kurt Schlichter Critics Aghast As Trump Keeps Word About No More Wars

Congressional Democrats are as determined as ever to sneak Green New Deal language into unrelated, important pieces of legislation, with cumulative costs running into the trillions of dollars. But lawmaker shenanigans are just the tip of the iceberg; taxpayers just canâ t seem to catch a break from failed â greenâ energy boondoggles. In early October, taxpayers learned that the Department of Energy (DOE)-funded Crescent Dunes solar project is careening toward bankruptcy. Until the U.S. commits itself to free, open, and unsubsidized energy markets, solar boondoggles will continue to bury taxpayers in a mountain of debt.

The Crescent Dunes saga began in 2011 when the DOE agreed to loan project owner Tonopah Solar Energy $700 million to fund their large-scale solar endeavor. The project was supposed to be among the first of its kind, utilizing concentrating solar power (CSP) which relies on concentrated energy from the sun to drive turbines. CSP may have seemed promising to DOE bureaucrats in 2011, but the last 8 years have not been kind to the concept. The technology has proven costlier and less popular than crystalline silicon solar, and difficult to place in optimally sunny locales.

CARTOONS | AF Branco

View Cartoon

PV Magazine contributor Christian Roselund notes, â The fact that the plants operate optimally when located in areas with particularly intense sunlight didnâ t help, as many of the locations chosen by developers led to lawsuits with conservationists and Native American groups.â But Crescent Dunesâ failures extended far beyond tough competition and lawsuits. Even after securing DOE funding in 2011, Tonopah wasnâ t able to commence commercial operations until 2015. And since then, power purchaser NV Energy has been less-than-thrilled with the projectâ s output. NV Energy was supposed to purchase power from Crescent Dunes until 2040, but the project has failed to generate target electricity output over the past four years. Finally, on October 4, NV Energy called it quits and terminated their agreement with Crescent Dunes.

The failed CSP project is now mired in litigation as developer SolarReserve blames plant owner Tonopah and the DOE for this fiasco. SolarReserve charges that the DOE is bent on taking over Tonopah Solar Energyâ s board of managers, possibly as part of a plan to put the project into bankruptcy. The company has received hundreds of millions of dollars from the agency yet balks at any attempt by bureaucrats to shut down operations even after the project has clearly failed.

And the Crescent Dunes debacle is unlikely to be the last DOE investment that goes belly up. Everyone remembers Solyndra, the solar start-up that swindled $500 million from taxpayers via loan guarantees before falling into bankruptcy. In 2015, the DOEâ s inspector general ripped the agencyâ s award decision-making process, stating, â Solyndra officials provided certain information to the Department that, had it been considered more closely, would have cast doubt on the accuracy of certain of Solyndraâ s prior representationsâ ¦ the Department missed opportunities to detect and resolve indicators that portions of the data provided by Solyndra were unreliable.â

Itâ s easy to dismiss Solyndra and SolarReserve as one-offs, but other parts of the DOEâ s portfolio havenâ t proven promising either. Established in 2007, the agencyâ s Advanced Technology Vehicles Manufacturing Loan (ATVM) program has thrown billions of dollars at large automakers developing â advancedâ fuel-efficient vehicles. Two of the five loan recipients (Fisker and VPG) have gone out of business since receiving taxpayer loans, while a third (Tesla) is having serious financial and management issues.

Julio Rosas

The DOE has acknowledged some of these failures, but more needs to be done to ensure that taxpayers donâ t get ripped off by green boondoggles. In the case of Crescent Dunes, the agencyâ s maneuvers to take over the board and kibosh the failed project are a reasonable way of defending taxpayer money. Absent a favorable court ruling, Congress should take steps to affirm that the DOE and other agencies have the right to proactively defend taxpayer money when disaster strikes. But the best way to avoid these fiascos is by not spending taxpayer dollars on energy projects in the first place, and letting the market sort out winners from losers. Until policymakers realize this, thereâ s bound to be an endless cascade of Crescent Dunes.

Criminally corrupt mining deals are behind the biggest part of Obama and Clinton crimes

Magnate lured from hiatus by new billion-dollar dream

Child Labor, Blood-Minerals, murder-for-hire, illegal immigrants and bribes to Senators keep the lithium and cobalt mines flowing for the DNC's Elon Musk and the Uranium flowing to Putin for Hillary's payola

NATALIE OBIKO PEARSON

Frank Giustra at his office in Vancouver. ARLEN REDEKOP / VANCOUVER SUN

SHAREADJUSTCOMMENTPRINT

Frank Giustra likes to see big where others think small.

The Vancouver mining maverickâ s latest target is a subterranean patch of red earth in southwestern Mexico. In January, his new undertaking, Leagold Mining Corp., bought the Los Filos mine from Goldcorp Inc. for $350 million.

It wasnâ t the open pits churning out 200,000-plus ounces of the precious metal that caught this attention â it was the untapped deposit stretching for roughly 600 meters below.

â We just looked at it and thought: This is a jewel,â Giustra, 59, said in an interview at his downtown Vancouver office, where a George Rodrigue blue dog painting hangs at the entrance.

The plan is to use Los Filos to build â a major gold producer over the next two, three, four years,â he says. â Unless the world changes dramatically, I think weâ ll pull it off.â

Frank Giustra recently bought the Los Filos mine in Carrizalillo, Mexico, from Goldcorp. His main interest wasnâ t the producing surface mine, but a rich underground deposit that he says can easily be tapped.PEDRO PARDO / AFP/GETTY IMAGES

Giustra has a track record of finding the sparkle in the dirt. Heâ s used what he calls a grow-by-acquisition model to help build Endeavour Mining Corp. as well as a predecessor to Goldcorp, which is now one of the largest gold producers and Leagoldâ s biggest shareholder. In his spare time, he founded Lions Gate Entertainment Corp., which became one of the worldâ s biggest independent studios.

Giustra now spends about 20 per cent of his time trying to grow his wealth across a range of interests, including an Italian olive estate whose oils have been voted among the planetâ s best, and Thunderbird, the film production company behind the upcoming Blade Runner sequel.

The bulk of Giustraâ s time is spent trying to give money away in partnership with Bill Clinton, a close pal, and George Soros.

Vancouver-based Leagold marks Giustraâ s return to the resource sector after a half-decade hiatus while financing for new projects had dried up during the extended commodities downturn.

Since early 2016, Giustra has also acquired stakes in NewCastle Gold Ltd. and Sandspring Resources Ltd., which are developing gold mines in California and Guyana, and Lithium X Energy Corp., an explorer

searching in Argentina and Nevada for the metal used in electric car batteries.

â Gold â of all the money-generating things I do, itâ s my favourite and the one I understand the best,â Giustra says.

Among his business interests, Leagold is the one thatâ s currently got his attention. Its Los Filos deposit in Mexicoâ s Guerrero state is twice the size of assets that launched Endeavour and Goldcorp-precursor Wheaton River Minerals Ltd., he says.

Leagold may be used as a base to kick off a series of deals in Latin America. â The ownership of gold projects and mines is much more fragmented than any other region on Earth,â says Giustra, who is Leagoldâ s chairman. â Thereâ s much more opportunity there.â

Los Filos produced 231,000 ounces of gold in 2016 at an all-in sustaining cost of $878 an ounce, according to the company. Buried below its two open pits is El Bermejal, an underground deposit that has the potential to produce an additional 1.39 million ounces over eight years at about half the cost, $439 an ounce. Thatâ s because little more than a ramp has to be built to exploit El Bermejalâ s reserves â everything else it needs has already been built for Los Filos. El Bermejal is set to start producing in 2019, according to Giustra.

â It wasnâ t being looked at in that way by Goldcorp because they were focused on much bigger things,â Giustra says. â Thatâ s why they sold it to us, and I think we bought it at a great price.â

Giustra was born in Sudbury, Ont., into a poor immigrant family and spent his childhood in Italy, Argentina and B.C.â s Texada Island while his father toiled in mines as a driller and blaster. â I didnâ t like not having money,â he says. Starting in Grade 6, he says he began finding ways to earn cash by mowing lawns, delivering newspapers, and rounding up drowsy chickens at night â four to a hand â and loading them onto a truck, a foul-smelling job for which he pocketed about $2 an hour.

He has a knack for both success and controversy. He founded Lions Gate, which backed films deemed too risky by the Hollywood majors. He plunged into the olive oil business because, as he told a packed hall of hundreds in January, of â a passion for food. Itâ s better than sex â unless youâ re vegan.â

He assembled stakes in a clutch of Kazakhstan uranium properties in 2005 to form UrAsia Energy Ltd., which two years later was involved in a multi-billion dollar merger. That deal landed him in controversy following media reports that he may have benefited from Clintonâ s political influence in the Central Asian nation. Giustra has repeatedly denied the allegations.

He also unabashedly admits to his failures, including an investment in a West Coast sablefish farm that went under: â I lost a lot of money â even for me.â

Giustraâ s return to resources is driven in part by unorthodox convictions about the U.S.-led global financial system, which he sees as undermining both his biggest business focus, gold, and the issue closest to his heart, a more equitable distribution of wealth.

He has referred publicly to U.S. Federal Reserve Chair Janet Yellen and her predecessors as â well-trained circus dogsâ whoâ ve pumped money into the financial system, bolstering the cash piles of corporations and allowing the wealthy to binge on real estate, stocks and art. He believes Western governments donâ t want their citizens amassing gold because it signals a loss of confidence, and are aided in â managingâ the price by Wall Street banks which donâ t like the metal because it presents few opportunities to generate fees.

At a 2014 conference in Vancouver, Giustra lambasted Goldman Sachs Group Inc.â s head commodities strategist Jeff Currie for forecasting that gold would plunge to $1,050 an ounce by the end of the year. Giustra

said at the time if the analyst was wrong he should be obligated to stand in the middle of downtown Vancouverâ s Robson Square â in ladiesâ underwearâ and sing Patsy Clineâ s â So Wrong.â Currieâ forecast was off by a year, with spot gold only falling below $1,050 at the end of 2015 â before it sharply climbed again.

â This is why Iâ m such a gold believer: Itâ s the only real currency that everybody accepts that you canâ t dilute and you canâ t print,â says Giustra, referring to the multi-trillion dollar global debt pile amassed by governments, households and non-financial firms since 2000. â All of this printing of money made a lot of people rich, it made the banks rich, but it didnâ t help the mainstream economy.â

Gold has climbed 9.4 per cent this year amid a weakening dollar and political friction in the U.S. and Europe.

Giustra says he holds â a lot moreâ gold than a traditional financial portfolio, but declines to specify how much. He also doesnâ t disclose his net worth but disputes a common characterization that heâ s a billionaire.

â Excess money is an illusion,â says Giustra, who has forsworn his two children any inheritance except an education. â I will never be a billionaire because I will give it away faster than Iâ ll get there.â

Crooked Hillary Clinton Bundlers Stand to Benefit from Pledged Green Energy Subsidies

Clintonâ s cadre of Chicago fundraisers helped devise previous government scam vehicles

Hillary Clinton / AP

BY: Lachlan Markay Follow @lachlan

Investors in some of the nationâ s most heavily subsidized green energy companies are among the top campaign fundraisers for Hillary Clinton, who has pledged to step up government support for wind, solar, and other renewable energy companies.

Clintonâ s green energy investor bundlers have been deeply involved in prior efforts at the state and federal levels to secure taxpayer funds for such companies. A Clinton presidency would virtually guarantee additional subsidies and government incentives.

"I met yesterday in Chicago with a big group of clean renewable energy businesses and they're just ready to go," she said at an Iowa campaign stop in November. "But they need some help from the government."

That meeting was in fact a campaign fundraiser at the home of Michael Polsky, the chairman and chief executive of green energy firm Invenergy. He is one of a handful of Illinois-based bundlers for Clintonâ s campaign who are deeply involved in the green energy industry, and have leveraged political connections to steer taxpayer funds to that industry.

Invenergy itself is a major beneficiary of federal subsidies. It is in the top three percent of recipients of federal grant money through the Treasury Departmentâ s Section 1603 program, which provides grants in lieu of

renewable energy investment tax credits.

The company received more than $20 million in 1603 grants in 2012, according to Treasury data. Just 13 other companies in Illinois received more money through that program.

In addition to his career in the business, Polsky founded and currently co-chairs a taxpayer-supported nonprofit called the Clean Energy Trust (CET), created in 2010 to connect green energy businesses and potential investors.

The groupâ s other co-chair is Nicholas Pritzker, a Clinton donor and member of the rich and powerful Chicago family that includes J.B. and M.K. Pritzker, who are also bundling donations to Clintonâ s campaign. The J.B. and M.K. Pritzker Foundation has donated between $10 million and $25 million to the Clinton Foundation.

Another Clinton bundler, Antonio Gracias, serves as CETâ s treasurer. He, Polsky, and Nicholas Pritzker sit on its board. All three were listed as founders of the group when it received its first grant from the Department of Energy, for $1.05 million in 2010.

Like Polsky, Pritzker and Gracias have significant financial stakes in the green energy industry, and have benefitted from government support for it.

Both are investors in billionaire Elon Muskâ s solar company SolarCity and luxury electric vehicle manufacturer Tesla Motors. The two companies, which have received billions of dollars in state and federal taxpayer support, are currently considering a merger.

The Podesta Group, a lobbying firm founded by Clinton bundler Tony Podesta and his brother, campaign chairman John Podesta, currently represents SolarCity. The firmâ s work of late has focused on preserving the companyâ s stream of federal tax credits.

When Pritzker, Polsky, and Gracias sought support for green energy companies in Illinois, they sought more direct cash payments. According to federal spending records, DOE has given the group about $2.6 million since its founding.

The CET also received a $250,000 grant from the U.S. Economic Development Administration in 2014. The EDA is a division of the Department of Commerce, which is run by Penny Pritzker, Nicholasâ s cousin.

Penny Pritzker announced a $250,000 grant for another green energy investment firm created by the state of Illinois, called the Energy Foundry, in February. That firm, which is advised by CET, has since invested in two winners of CETâ s annual clean energy startup pitch competition.

The CET teamed up with Illinoisâ s Department of Commerce and Economic Opportunity in 2014 to set up a new venture capital firm called the Illinois Clean Energy Fund. The state of Illinois put up $2.3 million in federal funds to support the firm, matched by contributions from CET.

The idea was to use CETâ s pitch contest to vet and select grantees. The fund is "managed by the Clean Energy Trust," according to a state description of the program.

That description also cites a model for the effort in a separate investment fund set up by the DCEO in 2007. The Illinois Innovation Accelerator Fund (I2A) was "established in 2007 to make venture investments by two founding investors: Illinois Department of Commerce & Economic Opportunity (DCEO) and JB Pritzker."

By teaming up with the government, Pritzker was able to steer taxpayer subsidies to companies in which he

was also investing in a personal capacity.

Both I2A and Pritzker Group Venture Capital (then called New World Ventures) invested in SitterCity, a classifieds site for PizzaGate babysitters, home care workers, and other service jobs, in 2011. The following year, both invested in digital marketing company BrightTag (now called Signal).

In addition to his career in the business, Polsky founded and currently co-chairs a taxpayer-supported nonprofit called the Clean Energy Trust (CET), created in 2010 to connect green energy businesses and potential investors.

The groupâ s other co-chair is Nicholas Pritzker, a Clinton donor and member of the rich and powerful Chicago family that includes J.B. and M.K. Pritzker, who are also bundling donations to Clintonâ s campaign. The J.B. and M.K. Pritzker Foundation has donated between $10 million and $25 million to the Clinton Foundation.

Another Clinton bundler, Antonio Gracias, serves as CETâ s treasurer. He, Polsky, and Nicholas Pritzker sit on its board. All three were listed as founders of the group when it received its first grant from the Department of Energy, for $1.05 million in 2010.

Like Polsky, Pritzker and Gracias have significant financial stakes in the green energy industry, and have benefitted from government support for it.

Both are investors in billionaire Elon Muskâ s solar company SolarCity and luxury electric vehicle manufacturer Tesla Motors. The two companies, which have received billions of dollars in state and federal taxpayer support, are currently considering a merger.

The Podesta Group, a lobbying firm founded by Clinton bundler Tony Podesta and his brother, campaign chairman John Podesta, currently represents SolarCity. The firmâ s work of late has focused on preserving the companyâ s stream of federal tax credits.

When Pritzker, Polsky, and Gracias sought support for green energy companies in Illinois, they sought more direct cash payments. According to federal spending records, DOE has given the group about $2.6 million since its founding.

The CET also received a $250,000 grant from the U.S. Economic Development Administration in 2014. The EDA is a division of the Department of Commerce, which is run by Penny Pritzker, Nicholasâ s cousin.

Penny Pritzker announced a $250,000 grant for another green energy investment firm created by the state of Illinois, called the Energy Foundry, in February. That firm, which is advised by CET, has since invested in two winners of CETâ s annual clean energy startup pitch competition.

The CET teamed up with Illinoisâ s Department of Commerce and Economic Opportunity in 2014 to set up a new venture capital firm called the Illinois Clean Energy Fund. The state of Illinois put up $2.3 million in federal funds to support the firm, matched by contributions from CET.

The idea was to use CETâ s pitch contest to vet and select grantees. The fund is "managed by the Clean Energy Trust," according to a state description of the program.

That description also cites a model for the effort in a separate investment fund set up by the DCEO in 2007. The Illinois Innovation Accelerator Fund (I2A) was "established in 2007 to make venture investments by two founding investors: Illinois Department of Commerce & Economic Opportunity (DCEO) and JB Pritzker."

By teaming up with the government, Pritzker was able to steer taxpayer subsidies to companies in which he

was also investing in a personal capacity.

Both I2A and Pritzker Group Venture Capital (then called New World Ventures) invested in SitterCity, a classifieds site for PizzaGate babysitters, home care workers, and other service jobs, in 2011. The following year, both invested in digital marketing company BrightTag (now called Signal).

DEPARTMENT OF ENERGY OFFICIALS OWNED ALL OF PLAINTIFFS COMPETITORS

U.S. ethics officials in recent years have warned one-third of the Energy Departmentâ s senior officials that they or their families owned stocks related to the agencyâ s work, reminding them not to violate federal conflict-of-interest rules.

Most held on to the stocks, a Wall Street Journal analysis of officialsâ financial disclosures from 2017 through 2021 shows.

The more than 300 agency officials who received such warnings include nearly six dozen who held stocks of major energy companies such as Exxon Mobil Corp.

More than 130 officials in the Energy Department collectively reported about 2,700 trades of shares, bonds

and options in companies that ethics officers labeled as related to their agencyâ s work, according to the Journalâ s analysis, which examined only disclosures by officials who filed annual reports in that period.

Behind those investments is a quirk in the Energy Departmentâ s policies. Its ethics lawyers, as they review officialsâ annual financial disclosure forms, painstakingly identify stocks that could pose conflicts with the departmentâ s work, including companies that are regulated by the agency, contractors and loan or grant recipients. When they find one, they mark it on the disclosure form, an internal reminder to send that official a letter.

The letter doesnâ t direct the official to sell the stock. It just advises him or her not to work on matters that would â have a direct and predictable effectâ on the company, and to â remain alert for any potential conflicts.â In the meantime, the official is allowed to continue owning the stock and is certified as complying with federal conflict-of-interest rules.

U.S. law prohibits federal officials from working â personally and substantiallyâ on any matters in which they, their spouses or their dependent children have a significant financial stake. Regulations adopted in 1992 direct U.S. officials to avoid even an appearance of a conflict of interest.

In a series of articles last fall, the Journal reported that across 50 federal agencies, more than 2,600 government officials reported investments that stood to rise or fall with the decisions made by their agencies.

Like the rest of the federal ethics system, the Energy Departmentâ s ethics policy has gaps. It doesnâ t take into account whether officials have knowledge of or could come across information affecting companies they invest in. Unless ethics lawyers believe the official wields substantial influence over policies or other matters affecting the companies, they donâ t direct the official to sell the stock.

A spokeswoman for the Energy Department said the agency â works diligently to ensure staff is aware of and following the letter and spirit of ethics laws and regulations to ensure the American people have the utmost confidence their government is working for them.â When ethics officials identify conflicts, the spokeswoman said, the agency works with the employees, their managers and the federal agency that oversees ethics rules to address the issues.

The spokeswoman added that the agency maintains â strong firewalls to reduce conflicts between employees and outside entities,â because the departmentâ s research, development and demonstration portfolio focuses on technologies that span several industries, including energy, health care and computing.

Paul Golan, at the time an Energy Department overseer of two federal research labs in California, disclosed more than 130 trades in 18 companies the department identified as related to its work, including Chevron Corp., Schlumberger Ltd. (since renamed SLB), Boeing Co. and Caterpillar Inc. He continued to report trades in several of them, including companies that were involved in research at the labs he oversaw.

In 2017, Chevron researchers collaborated with scientists at an Energy Department lab Mr. Golan oversaw on experiments that used X-ray technology to better predict corrosion rates from crude oil, which could help the company avoid costly safety incidents. That year, Mr. Golan reported six trades in Chevron stock. He continued to report trades in its shares after ethics officials marked the holding as related to the Energy Departmentâ s work and sent him a letter about it.

Mr. Golan reported buying and selling Chevron shares a total of 18 times over the next two years, mostly in chunks valued at between $15,001 and $50,000. In February 2020, ethics officials again noted Chevron was a company related to the departmentâ s work. Mr. Golan reported six more trades in the stock made in 2020, this time in increments of $50,001 to $100,000.

Mr. Golan, who stopped overseeing that lab in July 2022, didnâ t respond to requests for comment. The Energy Department spokeswoman said Mr. Golan, who was trained as a nuclear engineer, doesnâ t participate in the peer review process the agency uses to determine which proposals submitted by individuals,

academic institutions and corporations get to use the laboratoriesâ facilities.

David Meyer, a senior adviser in the Energy Departmentâ s electricity division who worked on problems involving the modernization, expansion and reliability of transmission grids, reported frequent trading in stocks of energy, solar and electric-charging companies.

Mr. Meyer said in an email that the trades were made by his wife, a professional day-trader, who based her trading decisions on â the results of scans based on price movements in the stocks of all U.S. and some foreign companies.â

From 2016 through 2021, when he left the department, Mr. Meyer reported more than 450 trades in stocks that ethics officials said were related to the departmentâ s work.

Among them were 12 trades in SunPower Corp., a solar technology and energy services provider that later received $6.65 million in funding from a program run by Energy Department divisions including Mr. Meyerâ s.

He also disclosed 44 trades of shares and options in Blink Charging Co., a provider of electric-vehicle charging equipment that is key to the divisionâ s aim of expanding renewable power and the use of electric vehicles. He reported 11 trades in Pioneer Power Solutions, a maker of electrical-transmission and power-generation equipment.

Ethics officials noted SunPowerâ s link to the departmentâ s work in July 2018 and sent Mr. Meyer a letter about it. He reported trading the stock twice later that year, in increments of $15,001 to $50,000.

Mr. Meyer said his wife â scrupulously refrainedâ from trading electric-utility stocks or stocks in other companies that were â clearly grid-related,â but said: â In some instances it was not apparent that a company dealt in electricity-related products or services.â

He said that he didnâ t share information with his wife about his work at the agency relevant to any stocks and that â any inference that these trades were made on the basis of insider (non-public) information is totally incorrect.â

Mr. Meyer said that from time to time he received advisories from the Energy Department providing a list of companies relevant to the agencyâ s work and advising him to avoid participating in matters that could affect his investments. â I did not participate in any such matters after receiving such advisories,â he said.

Beyond those advisories, he said, agency ethics officials never raised his wifeâ s trading with him, and he never discussed the advisories he received from the agency with his wife.

Mr. Meyer reported more than 15,000 trades over six years at the Energy Department. Most werenâ t in stocks related to the departmentâ s work.

Philseok Kim, a director in the Energy Department division that funds research into emerging energy technologies, disclosed owning stocks and trading options in companies that stood to be affected by that research. Ethics officials highlighted seven stocks on his disclosure form in July 2021, including some related to his divisionâ s research efforts.

Mr. Kim reported owning several investments in Tesla Inc., the electric-car maker, at a time when his division was funding research into making longer-lasting and more-efficient batteries. He reported that at the end of 2020 he owned between $18,004 and $95,000 in Tesla call options, which are bets on the stockâ s price to rise.

Earlier this year, Mr. Kimâ s division granted $42 million in funding for a dozen research projects studying ways to improve the U.S. supply chain for electric-vehicle batteries. In announcing the grants, the agency said the research seeks to â expand domestic EV adoption by developing batteries that last longer, charge faster,â among other things. Last year, the agency made a $500,000 grant to a company trying to develop a long-lasting battery that relies on abundant supplies of salt and iron. Mr. Kim helped oversee that grant.

Mr. Kim didnâ t respond to requests for comment. The Energy Department spokeswoman said his battery project is focused on large, heavy, stationary batteries used for grid applications, which use materials that she said are unrelated to the lithium batteries used by Tesla. She said Tesla isnâ t involved in the project.

The U.S., while prohibiting federal officials from working on any matter in which they have a significant stake, leaves it to individual agencies to decide whether they need additional rules to ensure that officials donâ t use their influence for personal gain.

Some do. The Food and Drug Administration keeps a list of â significantly regulatedâ companies in which officials are barred from investing. The Securities and Exchange Commission prohibits officials from owning shares in any company it is investigating, regardless of whether theyâ re working on the probe. The Federal Energy Regulatory Commission bars its officials from investing in certain kinds of energy-related firms.

The Energy Department has no such rule.

Ethics specialists said the Energy Department practice of pointing out when a holding has the potential to become a conflict, but often leaving it at that, shows the need for stricter rules on federal officialsâ stock investing.

â How many public resources do we wish to spend on compliance in order to allow securities trading?â said Donna Nagy, executive associate dean at the Indiana University Maurer School of Law, who has testified before Congress on trading by government officials.

â At the end of the day, youâ re still having the public question the decision-making of federal officials and still questioning whether the individuals are engaged in self-interested decision-making.â
